4th Foot: Private Richard Hending, William Dawson, Alexander Moir, severely; Leonard Brooks, slightly.
38th Foot: Private Michael Bird and Corp. Ras Hunt, severely

MISSING.

12th Jan.—68th Foot. Private John Lawrence. [illegible]

J. B. BURGHALL ESCOURT, Adjutant-General.

A RETURN OF CASUALTIES IN THE NAVAL BRIGADE ON THE 21ST JANUARY, 1855.

KILLED.

Mr. J. H. Spalding, acting mate, London
SIDNEY LUSHINGTON, Captain Commanding Naval Brigade

(From the *Gazette* of Friday.)

War Department, Feb 7.

His Grace the Duke of Newcastle has received a despatch and its enclosure, of which the following are copies, addressed to his Grace by Field Marshal the Lord Raglan, G.C.B

Before Sebastopol, Jan. 16

My Lord Duke,—I have the honour to lay before your Grace the copy of a despatch from Lieutenant-Colonel Simmons, which he wrote by desire of Omer Pacha, expressing his Highness' approbation of the services of Major Bent, of the Royal Engineers, and the detachment of Sappers which I lent him in the summer; his regret at the loss of Lieutenant Burke, of the Royal Engineers, and his high sense of the conduct and services of Lieutenant Glyn, of the Royal Navy: of his Serene Highness Prince Ernest of Saxe Lemingen: and of the detachment of seamen of her Majesty's fleet employed in the construction of the bridge across the Danube, the success of which he attributes in a great measure to their well-planned dispositions

Colonel Simmons, your Grace will perceive, has further been desired by Omer Pacha to say, that it would be very gratifying to him if her Majesty should be graciously pleased to reward these officers for the able services they have rendered to the Ottoman army and the common cause

I think it right to mention that the Hon. Major Gage, of the Royal Horse Artillery, was the officer who conducted these detachments to Roustchuk from Varna. I appointed him to this duty, having previously sent him to examine the armament at the former place, and being satisfied that the employment of his services on the occasion would be advantageous.

I beg your Grace will be so good as to obtain her Majesty's permission for Captain Andrew Anderson, of the Royal Sappers and Miners, to accept and wear the decoration of the fourth class of the Order of Medjidie, in consideration of his distinguished gallantry.—I have, &c., RAGLAN

His Grace the Duke of Newcastle, &c.

(Enclosure.)

Varna, January 8, 1855

My Lord, His Highness Omer Pacha has requested me to write to your Lordship to return his best thanks for the services rendered to his army by Major Bent, of the Royal Engineers, and the detachment of Sappers under his command

His Highness desires me to express his regret at the losses which have been sustained by this small detachment, who, under the direction of Major Bent, have well sustained the character of the British army

His Highness has already expressed to your Lordship his regret at the loss of Lieut. Burke, of the Royal Engineers, who his Highness considers to have been an officer of much merit

His Highness desires me to inform your Lordship that he has done himself the honour to write to the Turkish Ambassador at the Court of St. James', expressing the desire of his Majesty the Sultan that Private Andrew Anderson, of the Royal Sappers and Miners, may receive and wear the decoration of the 4th class of the order of Medjidie, in commemoration of his gallantry in recovering the body of Lieutenant Burke, after he was killed at the passage of the Danube on the 27th of July last. In the meantime he has presented Private Anderson with the decoration, and trusts your Lordship will allow him to wear it until the commands of her Majesty may be received.

His Highness further desires me to express to your Lordship his entire approbation of the manner in which Major Bent has conducted his duties

He desires me to inform your Lordship that this officer showed great energy in his endeavours to enter Silistria before the siege was raised, that he subsequently showed great gallantry at the passage of the Danube, when he was the first to land on the left bank, and covered the landing of the Turkish troops with a detachment of riflemen, who maintained their ground under a very heavy fire until the disembarkation of the supports was effected.

Major Bent and his Sappers were subsequently of great service in throwing up the *tete du pont* at Giurgevo, and in the construction of the bridge across the Danube

His Highness desires to take the opportunity of expressing to your Lordship his high sense of the services rendered by Lieut Glyn, R.N., and H.S.H. Prince Ernest of Saxe Lemingen, with the detachment of sailors of her Majesty's fleet under their command, in the construction of the bridge across the Danube.

His Highness considers that the success of the construction of this bridge is in great measure attributable to their well-planned dispositions, which, although executed with limited means, proved fully effective to resist the storms and strong currents of the Danube.

He desires me to say that he is fully satisfied with the zeal and indefatigable energy of this detachment of her Majesty's fleet under the able direction of Lieutenant Glyn, whom he considers a very promising officer, and entirely worthy of the confidence of your Lordship.

His Highness desires me to add, that it would be very gratifying to him if her Majesty could in some way reward these officers for the able services they have rendered to the Ottoman army and the common cause

I am, &c., C. L. A. SIMMONS, Lieut.-Colonel

Field-Marshal Lord Raglan, G.C.B., &c.

An Artillery camp of 4000 men is to be formed at Scutari.

The Foreign Legion will assemble for drill, &c., at Heligoland, and Lieut. Lemprière, with a detachment of Royal Sappers and Miners, will leave Woolwich for Heligoland in the early part of the present week, to erect huts for their accommodation.

An augmentation of half a battalion of Royal Engineers and 500 Royal Sappers and Miners is ordered to take place immediately, which will give four companies of 120 non-commissioned officers and men in each. The company at Corfu is also to be made up to 120.

WRECK OF H.M. STEAM-SLOOP "HECLA," OFF GIBRALTAR.

LOSS OF HER MAJESTY'S STEAM-SLOOP "HECLA."

We find the following details of this catastrophe in the *Gibraltar Chronicle*, dated Jan. 23:—"The weather during the night and this morning has been very boisterous—the wind blowing hard from the east, with rain. Her Majesty's steam-sloop *Hecla*, Commander Hawker, which was returning from a cruise to the eastward, ran on shore at about half-past four o'clock this morning on the eastern beach, the weather being very bad at the time. The Captain was obliged to cut away the masts in order to save her. At the above date she lay in a very precarious position, and the sea was beating over her. Assistance had been rendered by the Captain of the port."

The *Mauritius*, which arrived at Portsmouth on the 3rd inst., reports that "little hope is entertained of the *Hecla* being got off. A Sardinian emigrant-ship had also been totally wrecked, by mistaking the lights of the *Hecla* for shore lights, and eight or ten emigrants had been drowned."

We are indebted to a Correspondent at Gibraltar for the accompanying Sketch of the wrecked vessel.

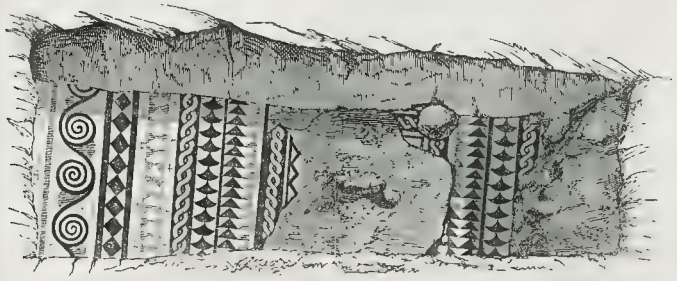
ATTACK ON THE REBEL TOWN OF DANISH ACCRA.

I beg to enclose a Sketch of the attack made by armed natives on the English Fort Christiansbourg, at what was formerly Danish Accra. The attack by the natives commenced at half past seven o'clock on the morning of the 13th September, and was continued vigorously until four p.m., notwithstanding the entire town was in flames, and the well-directed fire of the fort

At five p.m. H M S *Scourge* was signalled to come to the assistance of the fort, which she did in the most efficient manner, the 10-inch and 8-inch shot and shell making awful havoc amongst the enemy, who retired precipitately. The fort, I regret to say, sustained a loss of four killed and twenty-five wounded, including the Commandant, Captain Bird, of the Gold Coast Corps. The garrison consisted of Captain Bird, Lieutenants Brownell and Duke, and Ensign Clarke, of the Gold Coast Corps, with 120 rank and file; also Lieutenant Grubbe, of H.M.S. *Scourge*, who had volunteered to instruct the black soldiery in gunnery previous to the attack. The enemy numbered 4000, and suffered a loss of about 300 in killed and wounded. The number of killed and wounded on our side sufficiently proves the obstinate attack made by the natives, who are by no means to be despised as foes.

By a private letter from Sierra Leone, dated December 15, we learn that six companies of the 1st, 2nd, and 3rd West India Regiments, under the command of Captain Rookes, returned on the 26th of November in H.M.S. *Promethens* from Danish Accra, where they had been employed in operations against the rebellious inhabitants of Christiansbourg and Labadée. On the 2nd of December they re-embarked on board H.M.S. *Britomart*, *Promethens*, and *Dover*, and proceeded up the Malecourie river to the fortified town of Malegeah, which was taken and occupied; after which a treaty was signed by the Kings and chiefs on the field, acceding to all terms demanded. The thanks of the senior naval officer and Government of Sierra Leone were given to Captain Rookes and the officers, non-commissioned officers, and men under his command, for their services on this occasion.

H.M. STEAMER "SCOURGE" ATTACKING DANISH ACCRA.



TESSELATED ROMAN PAVEMENT, RECENTLY FOUND AT IPSWICH.

ROMAN PAVEMENT FOUND AT IPSWICH.

The discovery of this curious relic of Roman civilisation in Britain has already been noticed in our pages. It consists of a tesselated pavement and foundations of walls, at about fourteen inches deep, in a field not far from the village of Whitton, upon slightly-elevated ground, in digging for erecting a fence round a newly-built farmhouse. The pavement is about ten feet in length by three feet in breadth; the pattern is varied—a line of scrollwork, white upon a black ground; another in cabled form, composed of red, black, and white; a third in black squares placed lozenge-wise on white ground; and a fourth in triangles formed of circular arcs. The tesseræ are about half an inch square, and the centre is filled up with

ROMAN REMAINS, RECENTLY FOUND AT BURGH.

ragments of ancient bricks. The field is called the Castle-hills, and is conjectured to have been the site of the Castle of the Bigods, destroyed in the twelfth century. There have been various concrete foundations discovered in the field, all of Roman work, some seven feet wide. Quantities of Roman bricks have recently been dug out, most of which were used in the foundations of the premises just built. Fragments of Samian ware, and other earthen vessels, have likewise from time to time been discovered in the field. Altogether, this is the finest Roman relic discovered of late years in the eastern counties.

ROMAN RELICS FOUND AT BURGH.

(From a Correspondent.)

The accompanying Sketches (from the pencil of the Rev. J. B. Norman, of Bowness) represent some mutilated Roman remains recently dug up from a gravel-pit in the parish of Burgh-by Sands—famous as the death place of Edward I. One of the stations of the great Roman wall occupied the centre of the present village and the adjoining gravel-pit. Some bones (which, on being disinterred, speedily mouldered away) and a considerable quantity of broken pottery, handles of urns or vases, seem to warrant the supposition that the cemetery of the Roman town was placed there. Two bronze coins have also been found, but their legends are defaced by rust.

No. 1 is a fragment of a statue in low relief, of poor execution, representing a hand grasping a spear.

No. 2. A block of white freestone, with the numeral VII boldly cut.

No. 3. A circular ornament, with a moulding—of a cippus?

No. 4. A corner piece of a square ornament, with the letter S between two indented lines.

No. 5. A sepulchral slab (?) containing the name, and that not perfect, of the dedicator—"Cives," probably from Civis. After Trajan conquered the Dacians, some of them took service under the Roman eagles, and formed part of the garrison of this remote district. The head-quarters of the Dacians were at Amboglanum or Birdoswald. In a neighbouring village, a much-mutilated slab contains the word "NOR," sole survivor of a long inscription, whence it would seem that the ancient inhabitants of Austria and Salzburg, as well as of Wallachia and Moldavia, contributed to the defence of the wall.

Roman Remains at Bath.—The workmen engaged in the excavations for the new sewer from Lansdown-road to Walcot Church, Bath, and which passes down Cornel-lane, the track of the old Roman road, "Via Julia," have made numerous discoveries of Roman remains. Among the antiquities found are a coin of Commodus, a fine specimen of the first brass, a portion of a broken fibula, the rim of a vessel of blackish brown colour, and several pieces of Samian pottery of different patterns. One piece appears to have been carefully drilled through, and stopped up with a leaden plug. Vessels of Samian pottery have been often found, mended by rivets, showing that the Romans valued this kind of ware. There have also been found two bottoms of vessels of the same kind of pottery, inscribed with the marks SVONALD OF and PECVLIAR. Some stone coffins have also been dug up in Russell-street, and two portions of the bottoms of vessels, inscribed with the marks MARTI, and QVINTI M. Similar marks may be found mentioned in the list of potters' marks given by Mr. Wright in his work, "The Celt, Roman, and Saxon." It is anticipated that, in the course of the sewerage operations at present going on, traces will be found of villas and other remains of the Roman inhabitants of the "City of the Waters of the Sun."

THE CRYSTAL PALACE.

The beautiful grounds of the Crystal Palace at Sydenham, during the frost of last week, presented a new phase of seasonable enjoyment. The reservoirs and lakes, being completely frozen, were very numerously attended by skaters, and thus presented a novel picture for our Artist's pencil. The Skating Club also obtained permission to appropriate to their especial use a piece of water known as the intermediate reservoir, upon which a number of the members of the Club might be seen daily practising. The scene was altogether very animated, the frostwork lending a new charm to the grounds and the legion of panes in the Crystal Palace.

JOHN TIMBS, F.S.A.,

AUTHOR OF "CURIOSITIES OF LONDON."

We engrave a Portrait of the Author of the above work, a review of which will be found in another part of the present number of our Journal. Mr. Timbs has been for many years honourably associated with the production of cheap and useful illustrated literature. "The Mirror" commenced by John Limbird, some three-and-thirty years since, was edited for eleven years by the subject of this sketch. Its unexceptionable character and marked success called up many imitators; but it outlived them all, and long kept at the head of that useful class of literature of which it was the pioneer.

Soon after the commencement of the Illustrated London News, the Proprietors, fortunately, secured the services of Mr. Timbs as one of the Editors of this Journal, with which he has continued to be associated to the present hour—a period of twelve years. It does not become us here to say more of his labours, as our readers have had frequent opportunities of appreciating his merits. Of his active life we subjoin a few particulars.

JOHN TIMBS, F.S.A., AUTHOR OF "CURIOSITIES OF LONDON."
FROM A PAINTING BY T. J. GULLICK.

John, the second son of John and Deborah Timbs, was born in 1801, in Clerkenwell. Thence his family removed to the High-street, Southwark, where they carried on business as Italian "warehousemen," for nearly thirty years, in premises originally the Boar's Head Inn, part of Sir John Fastolf's benefaction to Magdalen College, Oxford, in the reign of Henry VII. The young John Timbs was educated under the Rev. Joseph Hamilton, D.D., and his brother, Mr. Jeremiah Hamilton, at New Marlowe, Hemel Hempstead, where the subject of this sketch for a considerable time issued a manuscript newspaper for the edification of his schoolfellows. At the age of fourteen he was articled to a druggist and printer at Dorking, in Surrey, where, at his master's table, he first met Sir Richard Phillips, who had just completed his "Morning's Walk from London to Kew." The great publisher kindly encouraged the boy-printer to contribute to his *Monthly Magazine*, and the beautiful country of the neighbourhood suggested the youth's first work, "A Picturesque Promenade round Dorking," in 1822; reprinted in the following year with a dedication to Mr. Thomas Hope, the author of "Anastasius." In 1821 John Timbs came to London, and for some years

SKATING IN THE GROUNDS OF THE CRYSTAL PALACE, SYDENHAM.

served as amanuensis to Sir Richard Phillips, in his publishing establishment in Blackfriars: of this very remarkable man the "Curiosities of London" contains several medicinal recollections. About this time Mr. Timbs became acquainted with Mr. Britton, F.S.A., with whom he has maintained an unbroken friendship to this day. In 1825–6 Mr. Timbs published anonymously "Laconics," the result of a course of ethical reading: a selection described by a critic in "The Examiner" to have "been made by a man of nice discernment, who knew where to look for good things, and to make the best of use of them when he had found them." In 1827 Mr. Timbs became Editor of "The Mirror," and so continued until 1838; compiling, also, an annual volume of records of Discoveries in Science and Art. This design he improved as "The Year-book of Facts," in 1839, characterised as "a laborious production of patient industry." Besides contributing to periodicals, Mr. Timbs has produced the following works:—

"Promenade round Dorking," 1822. The same, second edition, 1833. "Laconics; or, the Best Words of the Best Authors," three vols., 1836. "Maxim," edited, 1827-1838 (twenty-two vols.). "Cameos of Science," 1828. "Companion to the Theatres," 1829. "Arcana of Science and Art, 1825-1838 (eleven vols.). "Wise-Grinder's Manual," 1830. "Family Manual," 1831. "Knowledge for the People; or, the Plan Why and Because" (four vols.), 1831-2. "Popular Zoology," 1834. "Domestic Life in England," 1835. "The Instructor," vol. 2 (written for the Society for Promoting Christian Knowledge), 1835. "Family Handbook," 1837. "Hints for the Table," 1838. "Literary World" (three vols.), 1839, 1840. "London Anecdotes" (two vols.), 1848. "Illustrated Year-book" (two vols.), 1850, 1851. "Wellingtoniana," 1852. "Year-book of Facts," 1839, 1855 (seventeen vols.).

CALENDAR FOR THE WEEK.

Sunday, Feb. 11.—Sexagesima Sunday.
Monday, 12.—Lady Jane Grey and her husband beheaded, 1554.
Tuesday, 13.—Massacre of Glencoe, 1691.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, FEBRUARY 10, 1855.

THE NEW MINISTRY.

The pernicious interregnum of Ministerial authority is at an end; and Lord Palmerston occupies the place which the public voice had set apart for him long before the dissensions in the late Cabinet had reached their maturity. The changes made have been exceedingly few, and amount to a reconstruction of the old, rather than to the creation of a new, Ministry. The Earl of Aberdeen—whose political character was tainted with the original sin of having too long believed in peace and in the good faith of the Czar—has retired before the storm of public disapproval; and will regain, as an independent member of the Legislature, some portion of the esteem and popularity which he failed to secure in office. Impartial history will do him justice; and even his contemporaries, amid all the heats and animosities of the hour, will confess his honesty and purity of purpose. When the quarter or half a million of bayonets that Austria will ere long bring into the field are employed in support of the cause of Great Britain and France—as they are certain to be, at a period much earlier than many people suspect—the far-seeing sagacity and patient ability of Lord Aberdeen will receive some portion of the credit to which they are entitled, and Europe will admit, even if his own countrymen deny, his claim to wise, prudent, and successful statesmanship. The Duke of Newcastle—damaged in a similar manner, but from dissimilar causes—has also retired from the responsibilities of government, but will yield to the Administration of Lord Palmerston his independent and, we believe, his cordial support. The reputation of the Duke of Newcastle has not suffered by the late Ministerial crisis. It stood lower before the sudden resignation of Lord John Russell than after that event, and a reaction has already commenced in his favour, which, at some future time, will have the effect of again securing his valuable services to the public in some other department than that which he had not the good fortune to reform. Lord John Russell preceded his colleagues in retirement from the public service, and has not been included in the new arrangements. His presence in the late Cabinet was a main source of disunion; and his absence from the present Government will lend it strength—the more especially as his Lordship is not in a position to take his seat alongside of Mr. Disraeli, or to assume the task of leader of another section of the Opposition. In default of his own Premiership, which appears to have been the great desideratum in his Lordship's mind, Lord Palmerston is the statesman whom he himself has most emphatically designated as the fittest to conduct the affairs of the country. So far the advice of Lord John Russell has been taken; and his Lordship, though he may oppose in minor matters, cannot do otherwise than support the general policy of a Government which, to this extent at least, is of his own making. Lord Panmure, another statesman especially designated by Lord John as equal to the all-important duties of War Minister, has been selected by Lord Palmerston to fill that post, so that the section of the Whig party which is out of office, and which may be supposed to yield allegiance to and fight under the banner of the noble Member for London, cannot, without a factiousness of which no one has any present right to accuse it, oppose the Ministry on the ground of the inefficiency of the new War Minister. Mr. Sidney Herbert's late office will merge into that of the War Minister; and the right hon. gentleman, with his Parliamentary standing and high abilities, will continue his services to the Crown and country in the capacity either of Home or Colonial Secretary, as may be hereafter, or as perhaps has been already, arranged. Mr. Layard will be the first occupant of a new office to be created under the Minister of War, and will be Under-Secretary of State for that department. Earl Granville succeeds Lord John Russell as President of the Council; or, in other words, resumes a post which he previously filled with honour to himself and advantage to the country; but from which he retired at a recent period that he might not stand in the way of arrangements which were believed at the time—though, as it now appears, erroneously—to give efficiency and stability to the Aberdeen Ministry. The Earl of Clarendon retains the seals of the Foreign Department; and Mr. Gladstone those of Chancellor of the Exchequer. The country could have ill spared the services of either of these statesmen—especially of the Earl of Clarendon, whose management of its foreign relations during a most critical period has reflected the highest credit on his skill, sagacity, and patriotism, and been of the most essential benefit to his country. Sir James Graham—whose health has been partially re-established, and which it is to be hoped will soon be sufficiently restored to enable him to return to the fulfilment of the duties which he has hitherto discharged so ably—angry Napier notwithstanding retains the administration of the Navy. The list of the new Cabinet therefore stands as follows:—

First Lord of the Treasury	Viscount Palmerston
Lord Chancellor	Lord Chanworth
President of the Council	Earl Granville
Privy Seal	Duke of Argyll
Foreign Secretary	Earl of Clarendon
Home Secretary	Right Hon. Sidney Herbert
Colonial Secretary	Sir Geo. Geo. Grey
Minister at War	Lord Panmure
Chancellor of the Exchequer	Right Hon. W. E. Gladstone
First Lord of the Admiralty	Sir James Graham
Public Works	Sir William Molesworth
In the Cabinet, but without office	Marquis of Lansdowne
President of the Board of Control	Sir Charles Wood

The Chancellorship of the Duchy of Lancaster and the Chief Secretaryship for Ireland remain vacant, and it is possible that Mr. Sidney Herbert and Sir George Grey may change places.

The only statesman whose name has been brought prominently before the public as likely to lend his aid to the Ministry, and who is not included in the arrangement, is Earl Grey. It is impossible not to respect the reasons which have induced his Lordship to refuse the office of War Minister, for which the decision of his character and the course of his studies appear to have so thoroughly qualified him; but in refusing to be a Minister he will not refuse either the aid of his genius and experience, or of his vote in support of the general principles on which Lord Palmerston's Government is founded. The country has unanimously demanded a strong Government. Lord Palmerston's is the strongest that it was possible to form. If it be not strong enough in itself, it will fall like its predecessor; but if its weakness do not result from any inherent vice in its composition, but from want of due Parliamentary support, Lord Palmerston has the remedy in his hands. An appeal to the country would give him an overwhelming majority. The House of Commons knows this; and will, doubtless, be as patriotic and docile as the new Ministry can desire, or the urgency of public affairs commands.

The Duke of Newcastle's retirement from office has been accomplished with a better grace than usually attends a Ministerial *exit*; and his Grace owes this advantage to one who certainly did not desire to do any kindness to a late colleague. Roused by the ungenerous and uncandid attack of the ex-President of the Council, the Duke addressed himself to his fellow Peers in a tone of manliness and earnestness that at once set him right with everybody—even the Earl of Derby, sore at the failure of his attempt to get together a Cabinet, scarcely managed, in reply, to vent a sarcasm of average point, low as the oratorical standard is fixed in the august assembly in question. But the Duke did more. Having obtained the permission of his Royal Mistress to make certain disclosures connected with the interior life of the Government, he completely convicted his assailant in the Commons of perulance, of precipitancy, and of insincerity; and a few simple touches produced such a portrait of Lord John Russell in the character of a colleague as will, one would imagine, effectually deter any future constructor of a Cabinet from voluntarily including his Lordship in Ministerial arrangements.

A resignation which might otherwise have been a somewhat ignoble retreat has thus been invested with a species of éclat. The champion who falls by an unfair thrust avenges himself well if, in falling, he cleaves his enemy with a downright blow. Lord John Russell's manœuvre has ejected two of the Peelites from office, but the ablest of the party remain; while one of the two who retire has, by a single speech, made his Lordship's own return to office all but an impossibility. So that, on counting gain and loss, and especially setting his Lordship's own value upon his Parliamentary character, the balance-sheet will not present a very favourable aspect.

We do not, of course, intend to imply that the Duke of Newcastle offered such a defence of the administration of the War Department as could render it desirable that the sentence which virtually dismissed him from office should be reconsidered. There is no answer to the "heart-rending and horrible case" still receiving frightful additions in field and in hospital. However just it might be to apportion with exactitude the blame which should rest upon each official, and the still more formidable amount with which the system itself must be credited, that course is impracticable. Those who have assumed the perilous honour of representing the system must submit, when it has been tried and found so fatally wanting, to bear no small part of the odium in which it is involved. Nor have they a right to complain on the ground that they had not the power to make the system succumb to the exigencies of the occasion. To lack such power, at a grand crisis, is to stand self-condemned; and, whether skill or courage were wanting for the purpose, the absence of either becomes, under the circumstances, an actual and unpardonable offence. No appeal, therefore, lies from the verdict of the Commons. In the lesson given by that verdict is implied what the country demands of the new War Ministry.

But in vindicating himself from the imputations sought to be fixed upon him by Lord John Russell the Duke was perfectly successful. The impression which Lord John endeavoured to leave upon the mind of the country was, that the Duke of Newcastle was a vain, incapable man, who had clung to office with the tenacity common to incapacity; and, by way of corollary, the ex-President would have led us to regard his own self-sacrificing manœuvre which contributed to the ejection of such an individual from office as a master-deed of patriotism. But Lord John's industrious little attempt in his own favour met with the discomfiture its littleness deserved. The Duke of Newcastle showed upon evidence which would even have been satisfactory in a court of law, and which of course carried instant conviction to the minds of the men of honour around him, that he had not only been at no time tenacious of place, but that he had actually offered to forego any claim to place which his services in peace time might be supposed to give him. Further still, he proved that so completely had he understood the character of his colleague, long before the demonstration which shook the Ministry, that he had pressed upon his chief the warning counsel to do nothing which could give Lord John "an excuse for quitting the Cabinet." This remark the ex-President angrily referred to as a "sneer," and characterised as uncalled for; but, if anything were needed to justify it, such justification would be found in the fact that Lord John Russell, unable to find an "excuse" for quitting, quitted in an inexcusable manner.

It is with much regret that we find ourselves obliged to record and to call attention to circumstances which place the late leader of the House of Commons in a position of humiliation. No friend of liberty or progress will forget the services which have been rendered to both by Lord John Russell. But the affairs of a nation do not admit, when a special question is under consideration, of the introduction of the sentimental element which softens the dealings of social life. A country cannot afford to forgive irrelevant for the shortcomings of this year on the ground of good service years ago. State work is too grave to be regarded except upon its own merits; and were a gentler rule adopted its main effect would be incalculable, because the misdeeds no previous character of an individual, the larger are his powers for injury. If a man like Lord John Russell is to be judged by his antecedents at all, they must be appealed to against himself, and we must demand that he act up to the standard to which he has himself taught us to refer. Therefore, when, towards the termination of an honourable course, we find a statesman of merit stooping to the artifices of faction, and prompted, whether by ambition or mere petulance, to acts of insincerity and unfairness, it is not the recollection of old service that should prevent those who have honoured him from pointing out how unworthy of its general character is the close of his career. In the present case, Lord John Russell has by his own confession of "errors," as well as by irrefragable evidence adduced by the individual he has assailed, added another link to the long chain of proof that selfishness will at times override and vitiate all the most estimable qualities of mankind, while the Duke of Newcastle, although assuredly he has not shown that he was the War Minister required by the crisis, has approved himself a man of honour and of earnestness, and perhaps nothing in his official career has become him like the unexpected and becoming manner in which he has terminated it.

THE COURT.

The "Ministerial interregnum" has had the effect of bringing the Court to London more than once during the past week. After the failure of the Earl of Derby to form an Administration, Lord John Russell was commanded to wait upon the Sovereign at Buckingham Palace. His Lordship had audiences of her Majesty on the 31st ult. and 1st instant; but, failing in his turn, the Queen sent for Viscount Palmerston, who accepted the ordeal task on Saturday last. As the Premier completed his arrangements, that, at a Privy Council, held by her Majesty at Windsor Castle on Tuesday, the new members of the Cabinet were presented and sworn into office.

On Sunday the Queen and Prince, the Prince of Wales, the Princess Royal, the Princess Alice, Prince Alfred, and the Duchess of Kent, the Ladies in attendance on the Court, and the domestic household, attended Divine Service in the private chapel of the Castle. The Hon. and Very Rev. the Dean of Windsor performed the service, and administered the Holy Communion.

On Monday the Queen and Prince Albert travelled to London by the Great Western Railway, arriving at Buckingham Palace at a few minutes before one o'clock. Soon after the arrival her Majesty gave audience to Viscount Palmerston. Later in the afternoon the noble Viscount had a second audience of the Queen. Her Majesty and the Prince left Buckingham Palace at half-past six o'clock, on their return to Windsor Castle.

On Wednesday her Majesty held a Chapter of the Order of the Garter at Windsor Castle. In the evening the Queen gave a grand banquet in the Waterloo Chamber.

Lord Alfred Paget has succeeded Major General the Hon. Charles Grey as Equerry-in-Waiting to her Majesty.

THE ORDER OF THE GARTER.

The Queen held a Chapter of the Most Noble Order of the Garter at three o'clock on Wednesday afternoon, in Windsor Castle.

The Knights Companions present were—The Marquis of Lansdowne, the Marquis of Exeter, the Duke of Buccleuch, Earl De Grey, Earl of Clarendon, Marquis of Abercorn, Marquis of Salisbury, Duke of Bedford, Earl Spencer, Earl Fitzwilliam.

The Knights Companions having proceeded to an election, the Chancellor presented the suffrages to the Sovereign, who commanded the Chancellor to declare that George William Frederick, Earl of Carlisle, had been duly elected a Knight of the Order. The Earl of Carlisle having been introduced, the ceremony of investiture was proceeded with, at the close of which his Lordship kissed her Majesty's hand, and, having received the congratulations of the Knights Companions, retired.

The like forms of election and investiture were then gone through with the Earl of Fifeshire and the Earl of Aberdeen; the latter nobleman retaining, by her Majesty's special command, the Order of the Thistle.

The Prince of Wales, the Princess Royal, Prince Alfred, the Princess Alice, and the Princess Helena, witnessed the investiture in the Chapter room.

His Royal Highness the Duke of Cambridge waited on the Queen on Saturday, at Buckingham Palace, and was honoured with an interview of some duration by her Majesty. The illustrious Duke has received complimentary visits, at his apartments in St. James's Palace, from nearly all the persons of distinction at present in London. Viscount Palmerston called upon his Royal Highness on Saturday.

CHURCH, UNIVERSITIES, &c.

Prayer and Intercession. The following circular has been issued by the Bishop of London:—"London-house, Feb. 5. Rev. and dear Sir,—It appears to me desirable that the clergy should appoint a particular day during the season of Lent on which the minds of their congregations may be more specially directed to the offering up to Almighty God of united prayer and intercession for the safety and success of their brethren now serving in our armies and fleets, and for the restoration of peace. I would suggest the third Sunday in Lent for this purpose. The clergy are not at liberty to depart from the prescribed Order of Common Prayer; but they may, by previous notice, direct the thoughts of their parishioners to this special object. I am, Rev. and dear sir, your affectionate friend and servant, C. J. London."

Preferments and Appointments.—*Rectories:* The Rev. R. Jarratt to Bourton-on-the-Hill, Gloucestershire; Rev. R. J. Roberts to Ysceifiog, Flintshire. *Vicarages:* The Rev. R. L. Lewis to Denbigh. *Incumbencies:* The Rev. W. P. Babington to Manningtree, Essex; Rev. G. Ross to Sheepscomb, Gloucestershire.

Presentation of Plate.—A dinner was given in the common room of Worcester College, Oxford, on Friday, the 2nd instant, at which the Rev. Dr. Cotton, Provost of the College, and Vice-Chancellor, presided, for the purpose of presenting a testimonial to the Rev. R. Greswell, late fellow and tutor of the College, to mark the sense entertained by the society of the rev. gentleman's valuable services during the long period of his tutorship, and its esteem for his private character. It consisted of a very handsome service of silver plate, valued at £260, and was procured by subscription amongst the present and former members of the College, most of whom had been Mr. Greswell's pupils.

The Lord Bishop of Oxford has appointed Robert Joseph Phillimore, Esq., D.C.L., of Doctors' Commons, Chancellor of the diocese of Chichester and Salisbury, M.P. for Tavistock, to be Chancellor of the diocese of Oxford, in the room of his late father, Dr. Joseph Phillimore.

The total number of merchant-vessels of all classes taken up by the Government for war purposes has been 206, of an aggregate burden of 205,388 tons, their average capacity being almost exactly 1000 tons.

NOTES OF THE WEEK.

THERE are plenty of subjects that ought to interest the world of England in general and London in particular at present; but during the larger portion of last week they were all utterly absorbed, *flock, pulk, rill*, quite annihilated and consumed, in the one great question—who are our rulers? Fancy a man who has defrauded the revenue, and whose conscience, pricking him, cannot be satisfied, because he does not know to what Chancellor of the Exchequer he should pay (or be duly acknowledged in the *Times*) £5 10s. for misreturned Income-tax or suppressed Customs-duties! But all uncertainty on this subject is now at an end;—and Gladstone remains as before the recipient of consumer-money, and the head of the Finance department. Within the last ten days a change has come over the minds of men — of those especially who congregate in the morning rooms at White's, Brookes's, Arthur's, or the Travellers', and the result of this change is the admission that there has been a fearful amount of mismanagement in our War Department, both at home and abroad. It seems difficult to measure out justly the relative amount of blame which is due to the Duke of Newcastle or to Lord Raglan. Just now the former is the larger creditor—in a week hence the latter may be. Probably our system of government (meaning thereby the arrangement of our public offices, the selling commissions, the intricacy of check and counter-check between departments), may be more in fault in either. It is certainly a state of things almost without parallel in the history of representative government that now in the very middle of a great war, when all our enormous resources are not too much for our necessities, we should have allowed ourselves to remain for a fortnight without a Ministry. The peculiarity of the case lies in the fact that from the first there was no doubt as to the main part of the Government that would succeed that of Lord Aberdeen. Every one knew that Lord Palmerston was to be at the helm. The appointment (which *could* have been only temporary) of any one else would have sent down Consols two or three per cent, and that is not to be risked in war time. Lord Grey's objection to accept the office of War Minister is said to be founded upon the peace speeches he made last session. Can he not adopt the advice of *Polonius*?

> Beware
> Of entrance to a quarrel; but, being in,
> Bear 't, that the opposed may beware of thee.

General Evans made a rather unseemly blunder in his speech in acknowledgment of the thanks of the House of Commons. It was all right and proper that he should rectify Lord John's *laches* as to the conduct of his division; but it was not right that he should take that opportunity for making a violent attack upon Lord John. Lord Palmerston administered the rebuke courteous by moving that only so much of the gallant General's speech as expressed his gratitude to the House should be inserted in the minutes.

Sir Charles Napier and Lord Cardigan have been dining at the Mansion-house. The gallant Admiral in his speech (evidently an after-dinner one) has thrown down the gauntlet to the late Ministry, and Sir James Graham in particular, with a vengeance. He says that the Admiralty had neither "plain dealing nor honesty:" that "if Sir James Graham has one single bit of honour about him he will never take his seat again at the Admiralty till the matter is cleared up," &c. So there is evidently to be a very pretty quarrel Napier *v.* Graham. Lord Cardigan spoke calmly and well, and was immensely cheered.

When a woman talks about her virtue, or a man about his courage, it is easy to guess that the existence of those qualities is somewhat doubtful. Now we, the British people, have a way of continually boasting that we are men of business, a practical nation; but it seems just possible that in this we are taking credit for what we do not entirely possess. Certainly the laying out millions upon millions on a transport service over the three thousand miles which separate London from the Crimea, without making the half-dozen miles of road between the coast and the camp, for the want of which all that enormous outlay has been hitherto nearly useless, is not a proof of our being practical; and two or three things which have occurred in the last twelvemonth—as, for instance, what became known only the other day—that one Cole, insolvent in 1843, was able to carry on in 1852 a fraudulent business to the amount of two millions sterling—do not look as if we were the best of men of business. But as regards this quality, there never was such a slap on the face of our self-esteem as what took place at the meeting this week between Sir Benjamin Hall and a deputation of ratepayers from certain parishes in the metropolis. It had transpired that it was the wish of the Chairman of the Board of Health to consolidate the smaller trusts for paving, lighting, &c.; and, of course, the first feeling of the officers of those trusts, when they heard of the plan, was, that thereby a good many comfortable appointments not overworked, would be swept away. Straight they appear before the Minister to remonstrate against this interference with vested interests. But, alas! poor men! they were unlucky enough to stumble on a head of department who had thought it necessary to make himself acquainted with the statistics of his business, and was not content to learn them from deputations. Never did men get such a dressing; and never was clearer proof given that the people of London—those celebrated men of business—have not yet learned how to manage their own affairs. It appeared that the cost of road *management* (i.e., overlooking) in two-and-twenty small metropolitan districts averaged £160 per mile. Some were far above the average—in the placid retreats of Ely-place, for instance, the expenses amount to twice as much. It is not uncommon to hear grumblers complain that the supply of gas in many streets is not too liberal. If they only knew what a deal it costs to *inspect a lamp* they would know better than to ask for more. In one district, and that not a small one, this duty cannot be fulfilled at a less cost than *one pound ten shillings* a year. What, then, are the onerous duties of the well-paid lamp-inspector? No one need any longer remain in ignorance of them, for one of the deputation holding that honourable office very frankly confessed that they were, in his case, "to see, once in three years, that the contract with the Equitable Gas Company was renewed."

Sir B. Hall has begun well, and has shown that he is not to be hoodwinked or put off from his purpose by interested clamours or misrepresentations. Heaven knows there is plenty for him to do! even without going farther than the outward and visible condition of the streets, and the enormous cost of keeping them in *disorder*. What we want is a central, responsible authority, endowed with sufficient power, to whom just complaints can be addressed with a reasonable prospect of speedy redress. Hitherto, no matter how crying an iniquity existed before a man's door or under his dining room windows, it has been almost impossible to get it amended. In civic matters we groan under the joint-yet separate, rule of some half-dozen republics, all hating each other, and agreeing in nothing but a determination not to do each other's business. Aggrieved in some way by the streets or the drains, you post off to the Commission of Sewers, who will have nothing to do with you, but send you off to the Vestry; wrong again; you must go to the Paving Board; there you meet with little sympathy, but are told to apply to the Board of Health, who won't have anything to do with you, but refer you back to the Sewers; until, tired of revolving in a vicious circle, you go home in despair, resolved to try to "bear the ills you have." This last week, in which heavy snow has been succeeded by rapid thaw, has given us very strong proofs of what an utter want of management there is in these matters. On Monday the pavement of Pall-mall was literally submerged by the sludge and mud which had accumulated in the gutters. In Paris every one of the larger streets is carefully swept and cleaned out every morning before eight o'clock. Alas! we still on many occasions may say with the author of a "Sentimental Journey," "they manage these things better in France."

LATEST INTELLIGENCE.

THE WAR IN THE CRIMEA.

The last accounts from the Crimea, received viâ Vienna, are to the 30th. The weather had very much improved, and a general attack on Sebastopol was considered imminent. [A Paris letter states, on the authority of the Emperor, that the assault would be made on Monday, the 12th.] A considerable amelioration was visible in the health of the English troops, and supplies and every necessary were getting more abundant.

A sortie on the 23rd January, made by the garrison of Sebastopol, had caused the French heavy losses. The Zouaves had mutinied, and demanded a retreat from the Crimea. 400 of the mutineers had arrived at Constantinople in chains, and will be dispatched to Toulon. The railroad from Balaclava to the Camp had been commenced.

The barracks at Smyrna have been converted into hospitals, and will be provided with 2000 beds.

Intelligence from Odessa of the 30th January confirms the report of the illness of the Grand Duke Michael. He is at Cherson, where the Governor-General had gone to visit him. The Grand Duke Nicholas had left Simpheropol for Sebastopol. The Russians were experiencing a want of provisions.

Accounts from Warsaw, under date of yesterday, state that the Russian forces in Poland were concentrating. The troops on the Gallician frontier had been ordered to retire into the interior.

WAR ON THE DANUBE.

The *Moniteur* of Thursday gives the following account of an action fought on the Danube, re-published from the *Journal de Constantinople*:—

"Bucharest, Jan. 20.

"Intelligence has arrived here by Matschin and Ibraila, that a Russian corps in the Dobrutscha, having attempted to pass the Danube, had been repulsed with great loss, after a conflict of several hours, by the rearguard of Yaya Pachi, and that the latter had already crossed the Danube at Toutscha and Ismail. During the last six days the Turkish forces that were at Ibraila under the command of Achmet Pacha have crossed the Danube at Goura Jalcuntza."

THE NEW MINISTRY.

It has now been decided that Mr. Sidney Herbert will be the Colonial Secretary, while Sir George Grey takes the Home Department, which he administered with such satisfactory results from 1846 to 1852. No re-election will be necessary in the case of Sir George Grey. He retains the office of one of her Majesty's Principal Secretaries of State, and his transfer from one department to another is merely a matter of arrangement, and not a new appointment involving the loss of his seat in Parliament.

No appointment has yet been made to the Chancellorship of the Duchy of Lancaster; and as regards the office of Chief Secretary for Ireland, we believe that it is not yet actually vacated

Mr. Edward Francis Maitland, Sheriff of Argyll, will be the new Solicitor-General for Scotland, in succession to Mr. Mackenzie, appointed one of the Lords of Session.

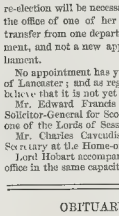
Mr. Charles Cavendish Clifford, who was Lord Palmerston's Private Secretary at the Home-office, continues his Lordship's Private Secretary.

Lord Hobart accompanies Sir G. Grey from the Colonial to the Home-office in the same capacity. *Globe of last evening.*

OBITUARY OF EMINENT PERSONS.

BARONESS BASSET.

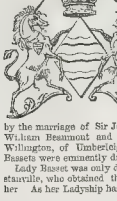
FRANCES BARONESS BASSET (in her own right) died on the 22nd ult., at her seat, Tehidy Park, Cornwall, aged seventy-three. Her Ladyship was the descendant of one of the oldest families in England—the great baronial house of Basset, which arose into power and importance immediately after the Norman Conquest, and gave a Chief Justice to England in the person of Ralph Basset, *temp.* Henry I. About the middle of the twelfth century the Bassets obtained the estate of Tehidy, in Cornwall, by marriage with the heiress of De Dunstanville, and, at the commencement of the sixteenth, the two noble seats of Umberleigh and Heanton Court, Devon, by the marriage of Sir John Basset with Joan Beaumont, descended from her William Beaumont and Isabel his wife, daughter and coheir of Sir John Willington, of Umberleigh. In the great Civil War three brothers of the Bassets were eminently distinguished in the Royal cause.



Lady Basset was only daughter and heiress of Francis, late Lord De Dunstanville, who obtained the Barony of Basset of Stratton, with remainder to her. As her Ladyship has died unmarried, the title now becomes extinct.

GENERAL THE HON. ARTHUR PERCY UPTON, C.B.

GENERAL UPTON died on the 22nd ult., at Brighton, in his seventy-eighth year. He was the youngest son of Clotworthy, first Lord Templetown, and grandson of John Upton, Esq., of Castle Upton, co. Antrim, a military officer who distinguished himself at the battle of Almanza, and for his spirited conduct obtained the command of a regiment upon the fall of Colonel Kulligrew.



The Hon. Arthur Upton, whose death we record, entered the Army 26th April, 1793; and, in the following year, joined the Duke of York's forces in Holland, where he went through the ensuing winter campaign. In 1799 he was appointed Aide-de-Camp to Sir Ralph Abercromby, and took part in the operations on the landing near the Helder. He was also in the Walcheren Expedition, and assisted at the siege of Flushing. From 1811 to 1812 he served at Cadiz; and from 1812 to the close of the war in 1814 with the Duke of Wellington's army, on the Quartermaster-General's Staff. In 1815 he was employed as Military Correspondent with the Bavarian army, and was present with it in its various operations. He received the gold medal and one clasp for Vittoria and the Nive, and the silver war medal with one clasp for Nivelle. General Upton was Knight of Maximilian-Joseph of Bavaria, a Companion of the Bath, and Equerry to H.R.H. the Duchess of Kent.

THE REV. SIR THOMAS GERY CULLUM, BART.

THE death of this lamented Baronet occurred on the 26th ult., after a short illness, at his fine old Elizabethan seat, Hardwick-house, near Bury St. Edmunds. Sir Thomas was born 23rd October, 1777, the elder son of Sir Thomas Gery Cullum, 7th Baronet, of Hawstead and Hardwick, F.R.S., F.S.A., by Mary his wife, sister and heiress of Sir Lovell Hansen, Knt., and grandson of Sir John Cullum, 5th Baronet, by Susanna, his second wife, daughter and coheir of Sir Thomas Gery, Knt., one of the Masters in Chancery. The Baronetcy was conferred 18th June, 1660, on Thomas Cullum, Alderman of London, the purchaser of Hawstead and Hardwick, who was himself a stanch cavalier and adherent of Charles I., and who had married Mary Crisp, first cousin of the noted Royalist Sir Nicholas Crispe. Sir Thomas Cullum (whose death we record) would, had he survived his cousin, Lady Harland, have assumed the name and arms of Vernon only, and succeeded to the estates of the late John Vernon, Esq., at Wrexstead-park and Great Thurlow-hall, county Suffolk. He married, first, 27th August, 1805, Mary Anne, only child of Henry Eggers, Esq., of Woodford, Essex; and, secondly, 30th April, 1832, Ann Lloyd, of Kingstown, Dublin. By the former, who died 29th January, 1850, he leaves an only child, Arethusa Susannah, who married, in 1832, the Right Hon. Thomas Milner Gibson, M.P. By the second lady (who survives him) he has left no issue. Sir Thomas's only brother, John Palmer Cullum, Bath King of Arms, having died s.p., in 1829, no male heir of the family remains, and the Baronetcy, in consequence, becomes extinct.

SIR GEORGE BEST ROBINSON, BART.

THIS gentleman died on the 28th ult., at Dyrham, Gloucestershire, at his brother's Rectory. His family has long been connected with the East; and his father, the late Sir George Abercrombie Robinson, of Butts-house, co. Somerset, M.P. for Honiton, who was Military Auditor-General in Bengal, and afterwards one of the Directors, and several times Chairman, of the East India Company, was created a Baronet the 11th Nov., 1828. Sir George Best Robinson, the second Baronet, the subject of this notice, was himself for some years her Majesty's Chief Superintendent in China, in which office he succeeded Lord Napier, and his administration in that capacity was mentioned with approbation by the leading statesmen in both Houses in the debates on the Opium War in 1840. Sir George was born at the Cape of Good Hope, 14th Nov., 1797; and married, 5th Dec., 1825, Louisa, youngest daughter and coheir of the late Major-General Douglas, of Garston, N.B., by whom (who died in 1843) he leaves a daughter, Louisa, wife of C.B. G. Douglas, Esq., 32nd Bengal Infantry; and four sons, of whom the eldest, the present Sir George Abercrombie Robinson, third Baronet, is a Captain in the 22nd Regt.

Of the late Baronet's surviving brothers, two are in the Bengal service, viz., Francis Horsley Robinson, Esq., and Edward James Robinson, Esq.; and the other is the Rev. William Scott Robinson, M.A., Rector of Dyrham, co. Gloucester, and Farleigh, Hungerford, co. Somerset.

SIR JOHN WILLIAM FITT MUIR MACKENZIE, BART., OF DELVINE, PERTHSHIRE.

SIR JOHN MUIR MACKENZIE died on the 1st inst., in Montagu-place, Russell-square. He was the only son of the late Sir Alexander Muir, who assumed the additional surname of Mackenzie on succeeding to the estates of his maternal grand-uncle, John Mackenzie, Esq., of Delvine; and was created a Baronet 8th November, 1805.

Sir John was born in 1806; and married, in 1832, Sophia-Matilda, fifth daughter of the late James Raymond Johnstone, Esq., of Alva, county Clackmannan, by whom he leaves a son and successor, now Sir Alexander Muir Mackenzie, third Baronet, of Delvine, born in 1840.

GENERAL JOHN MILLETT HAMERTON, C.B., COLONEL OF THE 50TH REGIMENT.

THIS highly-distinguished officer died on the 27th ult., at Orchardstown, his country residence in Tipperary, after a short illness. He was a soldier from his youth, and obtained his first commission of Cornet at the early age of fifteen, in 1792. In 1794 he served under the Duke of York; in 1795 embarked for the West Indies; in 1796 assisted at the capture of St. Lucia, and, in 1801, fought with distinction in Egypt. Subsequently he took part in the Peninsular campaigns, in command of the 1st Battalion of the 44th. At Waterloo he bravely led on the 2nd Battalion of the same gallant regiment, and was left for dead on that bloody field, having received several severe wounds in the head and thigh. Owing to the attachment of a faithful non-commissioned officer, Sergeant Ryan, who brought his wounded and insensible commander under the care of skilful medical treatment, he slowly recovered, and with his devoted follower returned home.

A chivalric soldier, an honourable and most amiable gentleman, General Hamerton is deeply lamented by all who came within the influence of his high and endearing qualities.

REAR-ADMIRAL SIR JOHN HILL.

THIS gallant Admiral—one of the survivors of the glorious battle of the Nile—died on the 20th ult., at Walmer Lodge, Deal, aged eighty-one.

SIR JOHN entered the Navy in 1781; became Lieutenant 28th July, 1794; and was advanced to the rank of Commander 8th October, 1798, for his conduct as Senior Lieutenant of the *Minotaur*, at the Nile. He attained Post rank 28th October, 1815, and was made Rear-Admiral of the White in 1852. From 1820 to 1836 he was resident Commissioner of the Victualling Board at Deptford; and from 1838 to 1841 acted as Captain-Superintendent of the Dockyard at Sheerness. In the last-named year he returned to Deptford, and officiated there as Captain-Superintendent until 1851, when he finally resigned on promotion. The Admiral leaves (besides daughters) one son—a military officer.

LIEUTENANT-COLONEL COTHER.

LIEUTENANT-COLONEL COTHER, C.B., died on the 24th ult., at his house in York-buildings, Gloucester. His soldier-like career was one of long and valuable service, and of the highest possible credit. So far back as 1806 he covered the landing of the force under Sir David Baird at the Cape of Good Hope, and was present in the general action of Blue Berg, and in all the operations that took place until the surrender of the colony. He covered the advance of the force under General Beresford at the reduction of the River Plate, and was engaged in every affair at and in the vicinity of Buenos Ayres. On the surrender of that place he was taken prisoner, together with the whole force, and was marched nearly a thousand miles into the interior. In Portugal, in 1808, Cother commanded the light companies of the brigade under General Ferguson at the battles of Rolein and Vimiera; and was afterwards engaged successfully with the 71st Regiment on the retreat to, and the battle of, Corunna. In 1811 he was again in Portugal, and was at Arroyo de Molinos when General Girard was captured. Cother's command of the storming parties at the taking of the Forts of Almarez, on the Tagus, obtained for him the brevet of Lieutenant-Colonel. He led the 71st at the battle of Vittoria, and there received three musket-balls through his clothes and in his saddle, and was wounded by a fourth. He subsequently passed seventeen years in Ceylon, and commanded in the Eastern Provinces in the Kandian country during the rebellion in 1818.

Lieutenant-Colonel Cother was a C.B., and had a silver war-medal, and a gold medal for Vittoria.

WILLS AND CHARITABLE BEQUESTS.—Vice-Admiral Sir John Hill left personalty estimated at £80,000.—Mr. John Minter Morgan, of Stratton-street, Piccadilly, has bequeathed £500 to the National Orphan Asylum, Ham-common; £200 to the National School, Westminster; and other legacies to public schools—in the whole amounting to nearly £2000.

The railway calls for the month of February of the present year amount to 1,769,832, of which £1,567,332 is on account of foreign companies.

Further experiments with the Lancaster gun, ordered to be supplied to the Royal Sappers and Miners, have afforded much gratification to the men, as it is found effective at 1600 yards range, and upwards, when the artillerist becomes acquainted with it.

The Ordnance have sent down Colonel Burmester, R.E., to inspect the coast of South Wales, and to select the most important and advantageous sites for the erection of batteries or other defences. Among other places, Swansea is to be better protected.

So many erroneous statements regarding the augmentation of the cavalry have appeared that it may be well to mention the arrangements made. The 1st, 2nd, 3rd, 4th, 5th, 6th, and 7th Dragoon Guards, the 1st Royal Dragoons, Scots Greys, 3rd and 4th Light Dragoons, 6th (Inniskilling) Dragoons, 7th, 8th, and 11th Hussars, 13th Light Dragoons, 15th Hussars, and 16th and 17th Lancers, will be each augmented to eight troops of 74 rank and file each, or, including staff, 640 per regiment. Six of these troops will be dispatched for service in the Crimea, while the remaining two will constitute a dépôt to train recruits and horses, so as to keep up the strength of the six troops on active service.

In consequence of a communication from the Secretary of State to Sir Richard Mayne, the Chief Commissioner of the Metropolitan Police, that gentleman has called upon the different superintendents in the force with respect to him and recommended any inspectors, sergeants, and private constables who may feel inclined to volunteer and form a transport corps in the Crimea. The body is to consist of a quartermaster, sergeants or superintendents, drivers, and corporals. The strength of the whole is to be 2000. There are to be 1400 drivers at a pay each of 3s. per day, and 2s. 6d. each for the lowest class, clothing and rations to be given in addition. The officers' allowances is to be £100 for an outfit, and the candidate must in every respect be efficient and fully qualified to hold her Majesty's commission.

THE SMALL GRAND DUKE.—The Herbarium left by the late Mr. Webb is valued at £50,000 sterling, is unique in the world, and contains specimens of every plant known in the present botanical arrangement. The Grand Duke of Tuscany, however, little moved by the value of the gift, or the envy of every other Government, suffers it to lie unclaimed as yet in the empty house of the testator, refusing to be at the expense of its removal to Florence, and haggling to obtain the price of its transportation from the executors, which they, of course, indignantly refuse to pay.

THE VOTE OF THANKS TO SIR DE LACY EVANS.

On Friday evening, the 2nd inst., there was a very full attendance of members in the House of Commons, anxious to witness the interesting ceremony—a ceremony which has not occurred, we believe, s the conclusion of the last war—of conveying to Sir De Lacy Evans personally the thanks of the House for his distinguished services in the Crimea. The gallant General entered the House about twenty minutes past four, in full uniform, and with his orders glittering on his breast. He was received with the most expressive marks of honour. The whole of the members present remained standing and cheering him as he walked up the floor. He took the seat he used to occupy before his campaigns, on the front bench below the gangway.

The Speaker then rose and said:

Lieutenant-General Sir De Lacy Evans, I have to inform you that on the 16th of December last the House agreed *nem. con.* to the following resolution:—

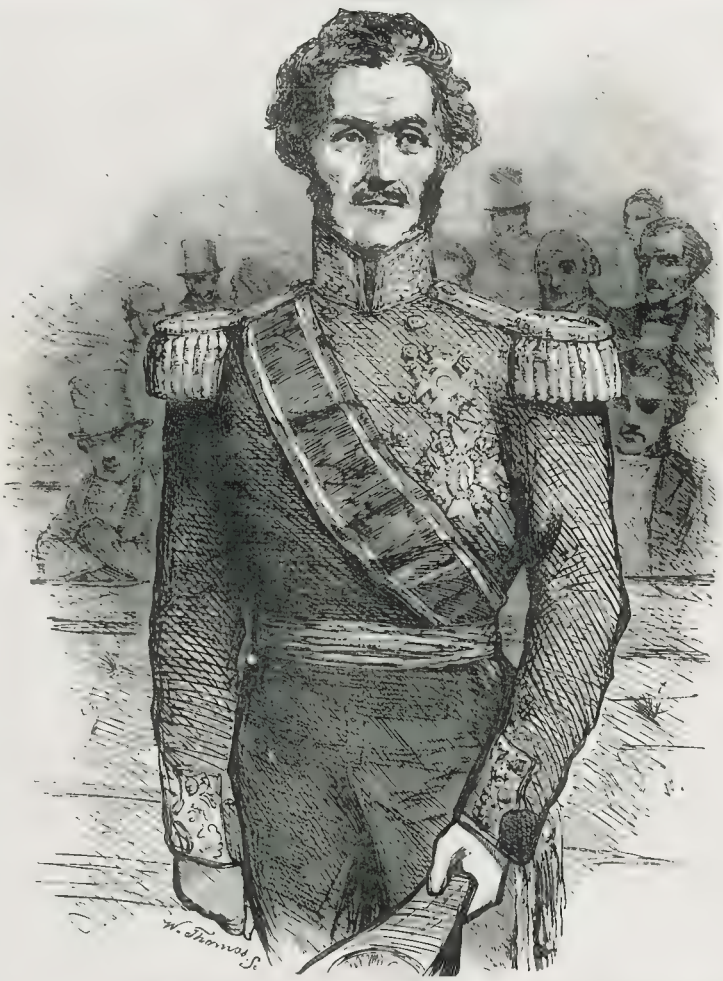
"That the thanks of this House be given to Lieutenant-General Sir De Lacy Evans, Knight Commander of the Most Honourable Order of the Bath, and to the several other officers, for their zeal, intrepidity, and distinguished exertions in the several actions in which her Majesty's forces have been engaged with the enemy."

Lieutenant-General Sir De Lacy Evans, it is with feelings of pride and satisfaction that this House welcomes the return amongst them of one who has borne so conspicuous a part in the brilliant achievements which have characterised the present war. At the battle of the Alma you encountered and overcame with admirable coolness and judgment the almost insuperable difficulties which opposed the advance of the gallant Second Division against the Russians. You repulsed the formidable attack of the Russians on the 26th of October, and the energy and valour with which you led the troops on that occasion have been honourably recognised. But it was on the heights of Inkerman that you displayed that undaunted courage (Cheers) and chivalrous generosity which have called forth the admiration of your country (Cheers)—when, rising from a bed of sickness, you hastened to assist with your counsel and experience the gallant officer in temporary command of your division, and refused to withhold from him the honours whilst you shared with him the dangers of the day. Your conduct throughout this memorable campaign has been marked by the same intrepid gallantry which distinguished your early military career, and has justly earned for you the highest honour which it is in the power of this House to confer. It is, therefore, my agreeable duty, in the name and on behalf of the Commons of the United Kingdom, to deliver to you their unanimous thanks for your zeal, intrepidity, and distinguished exertions in the several actions in which her Majesty's forces have been engaged with the enemy (Cheers)

Sir De Lacy Evans could assure the Speaker and the House that he felt most deeply the very high honour that had just been conferred on him. He was deeply impressed with the conviction that there was no honour a British subject could look to with more anxiety, or be more proud of when obtained, than the recognition of his services, whatever those services might be, by the representatives of his fellow-subjects. He thanked the Speaker for alluding to his former military career, in which, though his services had not been recognised by the House, yet he had then a more difficult and a more intricate duty to perform. But, having alluded to this circumstance, he must express his gratitude to those gentlemen who did not concur with him in political opinions for the kindness which they had manifested towards him. The gallant General then proceeded to complain of Lord John Russell, that in moving the vote of thanks to the army he suppressed almost all allusion to the services of the Second Division, which he commanded, though in three general engagements—at Alma on the 26th October, and at Inkerman—the Second Division bore the brunt of the battle for hours together. He did not state this on his own account—it was on account of the gallant officers and men whom he commanded; and he felt deeply grateful to the Speaker and to the House for the honour which was now done to them. He should hope to say a few words upon the state of the army, but he felt that this was not the proper time; other opportunities would arise for doing so. He begged once more to express his deep sense of the honour which had been conferred upon him.

Lord Palmerston said there was no duty which could fall to the lot of the Speaker of that House more agreeable than that which the right hon. gentleman had just been engaged in, and there never was a Speaker who had such an opportunity as the present of becoming the organ of the feelings both of the House and the country. These expressions ought to remain on perpetual record; and he therefore moved that the address of the Speaker, together with so much of the hon. and gallant General's reply as related to the expression of his thanks, should be entered on the records of the House. Mr. Walpole seconded the motion, which was carried unanimously.

The unusual incident of the House of Commons communicating its thanks through the Speaker to one of its own members for gallantry in the field of battle may excite sufficient interest to justify some further notice of former testimonials to that gallant member. It is now forty-four years since Sir De Lacy Evans was five times, in as many months, mentioned in



LIEUTENANT-GENERAL SIR DE LACY EVANS, K.C.B., RECEIVING THE THANKS OF THE HOUSE OF COMMONS.

THE MILITARY HOSPITAL, PORTSEA.

SKETCHES IN THE CRIMEA.

SIMPHEROPOL, FROM AN ORIGINAL SKETCH.

despatches published in the *London Gazette* for having specially distinguished himself, not as a favoured member of the staff, but as a working soldier, who had been in ten battles and sieges, numerous skirmishes; had ridden on horseback, without rest, 300 miles on exigent service; had five horses killed under him, been three times wounded, and had led three or four desperate assaults in person, as desperate as any forlorn hope, and was still no more than a subaltern officer, only a friendless Lieutenant.

THE MILITARY HOSPITAL AT PORTSEA.

This scene represents another sad episode of the war, the contemplation of which cannot fail to exercise a humanising influence. The apartment before the reader is tenanted by sufferers from the Crimea, containing seventeen beds: there is no larger room in the Hospital, which is divided into large and small apartments. Here two young surgeons are about to dress the stump of a soldier's arm; while another sufferer in the foreground is anxiously watching the scene. Over each bed is a tin plate inscribed with the name of the occupant. The room is very light.

The French Government intends authorising a grand lottery at the period of the Grand Exhibition. The amount to be raised is, it is said, to be 10,000,000 f.; and it states that there are to be one large prize of 500,000 f., four of 100,000 f., and a great number of smaller amount.

VIEWS IN THE CRIMEA.

We are indebted to the Sketch-book of Mr. Lawrence Oliphant for the accompanying Views. The Sketch of Simferopol is taken from a rising ground to the east of the town, near the road which enters it from Kertsch. The minarets on the left indicate the position of the Tartar quarter, built upon an overhanging cliff. The intervening valley is watered by the Salghir, an inconsiderable stream, crossed by a well-constructed bridge. A steep street leads from this into the European quarter of the town. On the west, high but not precipitous cliffs command the town as well as the road from Bagtcheserai: the fortifications of which we have recently heard as being in the process of construction in all probability now crown these heights. Simpferopol is not generally garrisoned, but the barracks there afford abundant accommodation for troops. It is at present the head-quarters of the Russian army. There is a good road leading to Bagtcheserai, about twenty miles distant.

The second View is taken near the gate of the Old Jewish Fortress of Schonful Kelé, the ruined walls of which are visible upon the precipitous rocks on the right. The narrow valley formed by lofty cliffs leads to the town of Bagtcheserai, the minarets of which, about three miles off, are seen rising above the rich foliage amid which it is concealed. The main road from Sebastopol to Simpferopol does not pass through the town, but leaves it about a mile to the right. General Osten-Sacken, in command of the right wing of the Russian army, has made Bagtcheserai his head-quarters. The Djurouk Sou runs through the town and falls into the Katscha, the embouchure of which is barely discernible about fifteen miles distant. It is twenty-one miles from Sebastopol to Bagtcheserai, by a rough road.

Births and Deaths in Prussia.—According to the tables just published by the Berlin Statistical-office, the total number of births in the kingdom of Prussia, for the ten years 1844 and 1853 inclusive, amounted to 8,434,270, showing an annual average of 843,427 children of both sexes. The greatest number was in the year 1849 (891,562), the smallest (876,937) in the revolutionary year 1848. The number of deaths in the same ten years was on an average 484,113 persons annually, or in the proportion of 1 to 33½ of the population. The mortality appears to be greater in Prussia than in some other countries, for the proportion in England is 1 in 44; in France, 42; in Belgium, 39; and in Bavaria, 35. The annual number of marriages in Prussia amounted during the ten years to 142,510; or in the proportion of 1 to every 112 inhabitants—a result only exceeded in England (111) in the year 1853.

At Bucharest a newspaper called the *Tempul* has been established by some Wallachian citizens to combat the corrupt influence of the Russian party.

FORTRESS OF SCHONFUL-KELE.—SEBASTOPOL IN THE DISTANCE.

(Continued from page 138.)

HOUSE OF LORDS.—THURSDAY.

Lord LYNDHURST said that, considering the present state of affairs and the difficulties of the new Ministry, he thought he should best consult the interests of the country by not pressing the motion of which he had given notice; and he trusted that all parties in the House would unite heart and soul with the Government in their efforts to retrieve the affairs of the empire

The Marquis of CLANRICARDE, before the withdrawal of the motion, begged to suggest that the Ministry, by a certain date, should be prepared to furnish a statement of the condition of the army in the Crimea; as, by such a course, he believed much important time would be saved.

Earl GRANVILLE, in rising to move the adjournment of the House, said that it was an accident of the office which he held that he should be the mouth-piece of the present Ministry in this House, now that the First Lord of the Treasury had a seat in the House of Commons. The principles of the present Government were precisely identical with those of the late Administration. There was one paramount object which they should keep in view, and that was the active and energetic prosecution of the war. There was no cause for despondency—the resources of this country were unlimited, and the war should be prosecuted with the utmost vigour, until a safe and honourable peace should be procured. He concluded by moving that the House do adjourn until to-morrow week

The Earl of DERBY, in a speech of considerable length, stated the reasons which induced him to decline the honour offered to him by her Majesty—viz., that of forming an Administration. Seeing that the press and the country, during the late Ministerial crisis, pointed to one man whose services should be enlisted as a leading member of the Government, he (the Earl of Derby), with the concurrence of her Majesty, waited upon Lord Palmerston with the view of effecting that object. Although the noble Viscount did not appear to him to be unwilling to aid him (Lord Derby) in the formation of a Government, he nevertheless declined to give him a definitive answer until he had consulted Mr. Gladstone and Mr Sidney Herbert, whom he was also anxious to have as colleagues. Both of those right hon. gentlemen, as well as Viscount Palmerston, having declined to take office under him, he (Lord Derby) respectfully asked her Majesty to relieve him of the task with which he had been honoured. The present crisis was one too serious and too important for any but a strong Government to assume power; and, although he knew he could rely upon the cordial co-operation of a large and influential party in the House of Commons as well as upon that of some of the ablest and most experienced members of their Lordships' House, he, nevertheless, felt that the same combination of parties which had overthrown his last Government might be again employed to destroy any Ministry over which he had the honour to preside. Under such circumstances he thought he would be best discharging his duty to his country by declining office altogether, rather than by taking it to run the risk of plunging our public affairs into another state of embarrassment at a time when it was so necessary that there should be a union amongst all parties to carry on the present war to a speedy and successful result (Cheers).

The Marquis of LANSDOWNE entered into similar explanations as to the position he occupied during the late crisis

After some observations from the Earl of MALMESBURY and other noble Lords, the subject dropped.

The Fisheries (North America) Bill passed through Committee.

HOUSE OF COMMONS.—THURSDAY.

THE ARMY IN THE CRIMEA

Mr. RICH asked the Chancellor of the Exchequer whether he had any objection to lay upon the table the correspondence upon which he had grounded the statement that there were under arms in the Crimea 7,200 men, independent of the Navy Brigade and the Marines, and exclusive of the men in the hospital and at Balaclava?

The CHANCELLOR of the EXCHEQUER said that the statement was made from information not under the control, but was supplied by the military authorities; and he should not like to make a statement of a more positive character. He did not say that there were 28,000 men under arms, but 28,000 men engaged in military duty before Sebastopol

ADJOURNMENT OF THE HOUSE.

The CHANCELLOR of the EXCHEQUER said, that he would move that the House at its rising do adjourn until to-morrow week, twelve, to proceed with money bills. He would then move an adjournment until Friday week, on which day the orders of the day would stand as follows:—1. The Navy estimates; 2. the Army estimates; 3. Notice of Committee for Newspaper Stamps.

SUPPLY.

The House then went into a Committee of Supply.

The sum of £1,600,000 was voted on account of the Naval estimates.

The House then resumed

Mr. WILLIAMS denounced the manner in which the war had been conducted, and hoped the in-coming Government would take a better course with regard to its management

EDUCATION.

Lord J. RUSSELL brought in a bill for the promotion of education in England. He was anxious that it should be before the House in order that the country might be made acquainted with the nature of it.

THE WAR IN THE CRIMEA

Mr. G. BUTT drew the attention of the House to the condition of the army in the Crimea, and said he had read in the newspapers that morning that the effective force of the army in the Crimea was only 15,000, and that it was rapidly perishing

Mr. S. WORTLEY believed that the statements which had appeared in the newspapers were greatly exaggerated, and that the publication of those statements had given great encouragement to the enemy.

Lord J. RUSSELL did not wonder that honourable members were surprised that there should be such a difference between the statements popularly put forward on the one hand, and the official statements on the other. He believed the statement that there was a force of 28,000 men before Sebastopol was perfectly correct when the usual reductions were made. He might state that yesterday he saw a gentleman from the Crimea, who informed him that, although there was a good deal of sickness in the Crimea, the men who had good constitutions were ready for their duty. The noble Lord concluded with a high compliment upon Lord Raglan, who, he said, would not be injured by the attacks which had been made upon him by a ribald press.

After some further discussion, the House adjourned, shortly after SIX o'clock.

HOUSE OF COMMONS.—FRIDAY.

The House met at twelve o'clock.

THE LATE SPEECH OF SIR CHARLES NAPIER

In reply to a question from Mr. Crauford as to the authenticity of the speech attributed to Sir Charles Napier at the Mansion-house,

Admiral BERKELEY said he deeply regretted the indiscretion of his gallant friend Sir Charles Napier in making the speech referred to by the hon. gentleman. It became his (Admiral Berkeley's) duty to state the facts of the case. Sir Charles Napier was never censured by the Admiralty: he was never dismissed by the Admiralty; he was never indicted by the Admiralty to attack Bomarsund or any other place; and, in fact, he was left perfectly unfettered in the command of the Baltic fleet. He (Admiral Berkeley) deplored that it became his duty to state, as a Lord of the Admiralty, that Sir Charles Napier, in the course which he had pursued towards his superior in command, had held out a bad example to those placed under his orders

The House having gone into Committee of Supply, some unopposed votes were agreed to.

The House subsequently went into a Committee of Ways and Means, when a sum of £2,000,000 on account was voted.

OUR ARMY IN THE CRIMEA.

The CHANCELLOR of the EXCHEQUER, in reference to a question placed on the paper by Mr. Rich (who was not in the House), took the opportunity of stating that, with regard to the documents relating to the number of troops in the Crimea, he found there were great objections to laying on the table any papers relating to the distribution of our forces, either in the Crimea or elsewhere. He quite agreed that it would be very objectionable to do so; but if the hon. gentleman, or any other hon. member, were desirous of satisfying himself as to the number of the army now in the Crimea, he should have every facility of access to the documents in the proper office.

On the motion of the CHANCELLOR of the EXCHEQUER, the House then adjourned to Friday, the 16th inst

---

THE statement that Lord John Russell has become the possessor of Lithlow Hall, near Christchurch, Hants, is incorrect: his Lordship has been in treaty for the property, but has declined the purchase.

MUSIC.

THE AMATEUR MUSICAL SOCIETY, which, in the course of nine years, has gradually risen to much distinction among the artistic associations of London, had its first concert of this season at the Hanover-square Rooms, on Monday evening. Its members belong, for the most part, to the aristocracy. Nobles and honourables stand as rank and file in the muster roll of the band, and handle their arms under the command of a general, himself an amateur, who, belonging to the middle class of society, holds his musical rank by the tenure of acknowledged talent. Though a young man, Mr. Henry Leslie has already gained an eminent position; and, having ample means to cultivate the art to which he is devoted, his genius, ardour, and industry promise to achieve for him a world-wide reputation. Till this season the musical director of the Amateur Society has always been a professional musician. It is only now that the Amateurs have placed an amateur at their head, and he has already shown himself worthy to wield the baton of command. In the numbers of the orchestra, too, the proportion of professional performers is much diminished. It is eighty strong; and among these there are only fifteen professors, chiefly wind instruments; the stringed instruments being almost entirely amateurs. This change, for a time, may be disadvantageous; for professional players, generally speaking, have greater precision and neatness of execution, and are more amenable to orchestral discipline, than amateurs. But there is no reason why an amateur, if he is hearty in the cause, may not acquire all that is necessary; and the members of this society seem well disposed to do so.

The concert of Monday evening included several great orchestral pieces: Weber's overture to the "Freyschütz," Mendelssohn's "Italian Symphony" in A major, Mozart's pianoforte concerto in D min or, and Auber's overture to "Les Diamans de la Couronne." In their performance, the defects of want of precision and *ensemble*, and of imperfect execution, especially on the part of the violins, in rapid and difficult passages, were apparent; but, on the other hand, there was a fire, and animation which made up for many mechanical deficiencies. This is often the case with amateur playing and singing, which is unjustly slighted. Persons who play or sing for love do so *con amore*; and, if they acquit themselves with tolerable skill, they communicate their own feelings to their listeners, and thus make a greater impression than could be made by much better executants not animated by the same spirit. Mozart's most delicious pianoforte concerto was performed by Miss Poland, a pupil of Herr Pauer. She played charmingly—with grace and feeling, a clear, liquid touch, and brilliant execution. The vocal portion of the concert consisted of several German part-songs of Mendelssohn, Reisseger, and Lachner, sung by the members of a society of German amateurs in the City, who practise under the direction of Herr Pauer. They sang without any instrumental accompaniment, and with a precision, accuracy of tune, and beauty of effect which reminded us of the famous Cologne chorus-singers, whose performances made such a sensation in our musical circles. The room was full of fashionable company, among whom were the Duke of Wellington (who appears to inherit his father's love of music), and a number of persons of distinction.

MRS. FANNY KEMBLE, after a long interval, has reappeared in public. She read "The Midsummer Night's Dream," at Exeter-hall, on Monday evening, to an overflowing audience; and the attraction of the entertainment was heightened by the performance of Mendelssohn's beautiful music, introduced in the same manner as if the play had been performed on the stage. We have always admired Mrs. Fanny Kemble as a reader, still more than as an actress. To read an entire play of Shakspeare demands a higher order of intellect than to perform any single part in it. It requires a profound study of the work, and a thorough comprehension not only of the design and scope of the whole, but of the idiosyncrasies and proclivities of every individual character. It demands a force of imagination capable of conceiving, and a power of expression able to give form and substance to every creation of the poet's fancy, however sublime, however delicate, however grotesque, however ludicrous—from the Royal Arcana to the *Gynecidger*, from the *Fairy Queen* to *Bottom the Weaver*. This comprehensive intellect has been an especial attribute of the Kemble family, and the last scion of that family is largely gifted with it. Her reading of "The Midsummer's Night's Dream" was an entertainment such as she alone, at the present time, is capable of giving. It was, by turns, ethereal in its refinement, genial in its humanity, rich and even exuberant in its comic humour. No wonder that it was applauded with an enthusiasm which we have not been excited by any theatrical performance of the play which could be given.

On this occasion Mendelssohn's exquisite music was heard to full advantage for the first time in this country. It is as dramatic as it is beautiful. It was intended to accompany the performance of the play, and, unless heard in conjunction with the play, half of its beauties are lost. Till now it has been confined to our concerts; or, if some attempts have been made to perform it along with the play, it has always been marred by poverty of means and lameness of execution. On this occasion it was performed by a splendid orchestra, and a powerful and well-trained chorus, under the able direction of Mr. Benedict. The public are already familiar with the various pieces of which this music consists—the fanciful overture, the charming fairy chorus, "Ye spotted snakes with double tongue," the gay and delicious *Intermezzo*; and the brilliant and festive Wedding March. Their musical beauties have always been appreciated, but it was now that the audience fully perceived the source of Mendelssohn's inspiration, and felt that his strains breathed the very spirit of Shakspeare.

LOYSELL'S HYDROSTATIC PERCOLATOR.—M. Loysell has written to contradict some remarks in our "Notes of the Week" on the coffee made by his invention. He has forwarded to us testimonials from Robert Warrington, Esq., of Apothecaries' Hall; his Excellency Marshal Vaillant, Minister of War; and Mr. Grove, of the Crystal Palace; all highly commendatory of the Hydrostatic Percolator: and we are willing, therefore, to believe that the coffee of which our correspondent complains must have been made by some other process than that invented by M. Loysell.

INTERNATIONAL LAW.—The Society of Arts has proposed that the subject of International Law shall be taken up at a congress composed of representatives from the various European nations meeting at the approaching Great Exhibition in Paris; and an interesting paper, containing remarks and suggestions on the proposed congress, was read by Mr. Leone Levi at a special meeting of the society last week.

THE CAMP RAILWAY. If the railway were terminated all would soon be distributed and set up in forty-eight hours. Unfortunately, the railway meets with unexpected obstacles. Between 600 and 700 Croatians were engaged to work at it. Every needful measure was taken—they had their passports *en règle*, and had even received advances of money, but on the day fixed for the departure the whole party refused. It is impossible to conjecture the secret motive of this desertion *en masse*. *Letter from Constantinople, Jan. 22*

A WARNING TO JESUIT AGITATORS.—The General of the Jesuits has addressed a circular, dated Rome, January 10, to the provincials of the Order, in which he instructs them how to act with respect to the different forms of political government. The company of the Jesuits being, he says, solely a religious order, and devoted exclusively to the salvation of men's souls, the various members of it are everywhere to act as faithful subjects of the Government under which they live, and in no case to interfere in political matters. In fine, whether they are called the secular or regular clergy, they are to conform to the principles on which the Order is founded.

A SHABBY CONGREGATION. The Dean of St. Patrick expresses his sorrow at the "miserable smallness" of the Sunday-evening collections in the Cathedral (Dublin), which are devoted to the purchase of the repairs; and remarks that many of the wealthy people who attend the service are "too proud to give pence, and too sordid to give silver"

COOKERY FOR THE SICK.—M. Soyer, of high culinary celebrity, has offered his services gratuitously to the Secret Committee of Council for a short time, at his own personal expense, to regulate the culinary department, if the Government will honour him with their confidence, and grant him the full power of acting according to his own knowledge and experience in such matters.

THE raising and organisation of the new corps of drivers for service in the East is to be confided to officers of cavalry, a major of which arm of the service will command the corps. The corps will be divided into twelve troops of 100 non commissioned officers and drivers, each officered by a captain, two lieutenants, and one sub-lieutenant, who will be taken, as far as practicable, from cavalry regiments. It is understood that each troop will have a commissioned quartermaster and inspector. The last-named officers, with two paymasters, troop-sergeant-major, sergeants, corporals, and drivers, will be taken from the metropolitan and city police in the first instance; and, to complete the required number, young and active men, accustomed to horses, and of good character, will be enlisted. The adjutant and sergeant-major will, of course, have served in the cavalry. The dress of the waggoners will be a plain tunic, or frock coat, overalls, boots, and a shako. Each man will be armed with a pair of belt-pistols and a sabre; but when on service the waggons will always be accompanied by an escort. A portion of the corps is to be placed under the orders of the Quartermaster-General, and the remainder under those of the Commissary-General, for the conveyance of provisions, &c

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

WHO is to be the new Royal Academician? is the chief subject of conversation in artistic circles. Mr. John J. Chalon everybody admits was a very indifferent artist, and it is now particularly incumbent on the Academy that his vacancy should be filled up by a really able artist. If we look through the list of Associates we shall see that the Academy has some most excellent men to choose from. Painters are of course the most numerous. The twenty Associates include one architect (Mr. Sydney Smirke), two sculptors (Messrs. Foley and Weekes), and seventeen painters, of whom the oldest in point of election is Mr. Danby, and youngest Mr. Millais. Upon whom is the election likely to fall—on a sculptor, on an architect, or on a painter? Will they choose Mr. Danby or Mr. Patten, Mr. Hollins or Mr. Elmore, Mr. Sydney Cooper or Mr. E. M. Ward, Mr. Frost or Mr. Poole, Mr. Pickersgill or Mr. Thorburn, Mr. Egg or Mr. Hook, Mr. Boxall or Mr. E. W. Cooke, Mr. Frank Stone or Mr. Goodall; or will they elect the youngest on the list, and do homage to pre-Raphaelitism in the person of Mr. Millais? Shall we have an historical painter or a miniature painter, a painter of landscape or a painter of history? We will reply by a rumour now rife, that the new Royal Academician will not be any one of the twenty we have named; that the Academy is about to render tardy justice to the noble art of engraving; and that Mr. Samuel Cousins, the distinguished mezzotinto engraver, will succeed Mr. Chalon, and be the first English engraver admitted to the full honours of the Academy. We shall, indeed, rejoice if the rumour is confirmed.

Our notice last week of the sister of William Wordsworth has afforded us an opportunity of hearing from the lips of a true poet an account of a visit which he made to Wordsworth. His story is in every way characteristic of the great author of "The Excursion;" and we have our friend's permission to tell it, but are not at liberty to mention his name:—

In the summer of 1846, when on a visit to the Lake District, I called upon Mr Wordsworth, to convey a message from his daughter, then in London. He received me with a kindly shake of the hand. "I am told," said he, "that you write poetry; but I never read a line of your compositions, and I don't intend." I suppose I must have looked surprised, for he added, before I could find time to reply, "You must not think me rude in this, for I never read anybody's poetry but my own, and haven't done so for five-and-twenty years." Doubtless I smiled. "You may think this is vanity, but it is not; for I only read my own poetry to correct its faults, and make it as good as I can." I endeavoured to change the subject by some general remarks on the beauty of the scenery, visible from his garden in which our interview had taken place. "What is the name of that mountain?" I inquired. "God bless me!" he said: "Have you not read my poems? Why, that's Nab-Scar. There are frequent allusions to it in my writings. Don't you remember the lines?" and he repeated in a clear, distinct voice a well-known passage from "The Excursion." The name of Southey having been accidentally mentioned, I inquired as a matter of literary history whether, as was commonly believed, he had impaired his health and his intellect by too much mental exertion, and thus brought on that comparative darkness of mind which clouded the last months of his life. "By no means," said Wordsworth; "Southey was a most methodical worker. He systematised his time. He was never confused or in a hurry, and got through a deal of labour with an amount of ease and comfort which your hurry-scurry kind of people can neither accomplish nor understand. The truth is—at least I think so—that his mind was thrown off its balance by the death of his first wife, and never afterwards wholly recovered itself." I remarked him at this point that the late Mr. Laman Blanchard, whose sad story was then fresh in the recollection of the public, had been reduced to a state of insanity by a similar bereavement. From that moment my name seemed to fade away from Mr. Wordsworth's recollection, and he always addressed me during the remainder of our interview as Mr. Laman Blanchard. His sister, Miss Wordsworth, was wheeled into the garden in a little garden-carriage, or chair, impelled by Mrs. Wordsworth. I wore on my head a Glengarry travelling-cap, with a sprig of heather; and Miss Wordsworth no sooner caught sight of me than she exclaimed in a shrill voice, "Who's that man, brother?" "Oh! nobody, my dear," he replied. "It's only Mr. Laman Blanchard." I gently hinted my right name. "It's all the same to her, poor thing!" he rejoined He would possibly have added more; but the unfortunate lady interrupted him by commencing to sing the well-known Scotch song:—

A Highland lad my love was born,
The Lowland laws he held in scorn.

She sang one verse with much correctness, and was commencing another when Mr. Wordsworth led me away "This is a painful scene, Mr. Blanchard," he said; "let us go into my room, and I will read you some more passages from my poems about Nab-Scar"

Mr Wordsworth's impression of the primary cause of Southey's insanity is now, we believe, admitted by all who knew him intimately.

We have received from the proprietor of the a fleged unpublished novel by Sir Walter Scott the following reply to certain remarks which we thought proper to make on the subject of his discovery. We print his letter in full, that he may tell his own story

Reply of M. E. de Saint Maurice Cabany, Proprietor of "Moredun," *to the Attacks of the British Press.*

On the 25th November, 1854, I published an account of the extraordinary manner in which the manuscript of a tale or romance, in three volumes, entitled "Moredun, a Tale of the 1310," came into my hands, accompanied by a letter of most singular interest. That manuscript and that letter I placed in my bureau, and I invited *all* whom the discovery interested to come and inspect them, and to judge for themselves of the grounds on which I founded the opinion, which I still entertain more strongly than ever, that Sir Walter Scott alone could have been the author of that romance

One of the most eminent critics in France, and a personal friend of Sir Walter Scott, M. Philarète Chasles, was the first distinguished writer of my own country who examined the evidence, *and he concurred in my opinion*, after having studied the original in English of the letter signed "W. S." to the discussion and examination of which he devoted five columns of the *Journal des Débats* of the 27th December last

Other literary gentlemen, among whom were several English critics, examined the documents, and expressed themselves unanimously and decidedly of the same opinion with M. Philarète Chasles and myself, some of them even pointing out minuter circumstances which had escaped our observation; although *now*—frightened, apparently, by the storm of insults with which, I understand, I have been assailed in England—they advise me to go to London or Edinburgh, there to have the authenticity of the letter determined

By whom? By those who have *prejudged* the question, and who, without examining the evidence, have treated with contempt the opinion of the first Literary critic in France, and received with contumely the testimony of the Society of Archivists of that country! This is *trop fort!*

But more than this. What—as M. Chastes and others have said what has the question of whether the letter be in Scott's own handwriting, or a copy by the other W. S., anxiative of it, to give to the German whilst he kept the original?—what has this to do with the authorship of the work? Nothing whatever. Those who have read the work, or portions of it (as a select party of distinguished English residents in the Faubourg Saint Honoré did the other evening), and have been convinced *by itself* that it was written by Sir Walter Scott, would *their* conviction of this be swayed in the smallest degree by such a circumstance? Not in the least. That letter is written on note-paper bearing the water-mark of the *first* Empire, having the bust of Napoleon I., surrounded by his titles. It is clear from that and other circumstances which have been examined by the Society of Archivists that it is either the original letter, or a copy taken of it *at the time*. I think it the former, so do the others who have examined it; it may be asserted to be the letter, without the authenticity of the work being in the smallest degree affected by such a circumstance.

But even in this view of the case, as either is an object of considerable interest, I am now having three copies of the letter most carefully traced: of these, I shall send one to the British Museum, one to the Crystal Palace at Sydenham, and the third I shall lodge with my London publishers, so soon as I find any hold enough to give to the world a work of fiction full of interest, rich in humour, rapid and brilliant in its descriptions of scenery and of character, but which the critical press of England is determined *shall not* have

been written by Sir Walter Scott. I shall accompany the copy sent to such publishers with some papers *of most singular interest* in themselves, but which are doubly so from being found in the same work with the MS. of "Moredun."

They are *forty-three* in number, and relate entirely to the period of the *Hundred Days* and the *Restoration* (1814, 1815, 1816). These papers would have been of such immense value to the author of the "Life of Napoleon," that I shall not examine them will go along with me in considering them a collection or the commencement of a collection, intended for presentation as an expression of thanks to the author of "Moredun." My attention was so entirely engrossed by that work that I did not at first give them the examination they were entitled to.

In the course of that examination, too, some pages of MS. in English were found which supply several *lacunæ* in "Moredun," which had greatly puzzled those who were translating it for me into French. Among them is the following, without heading or title, evidently intended as an introduction to the work:—

"I have somewhere met with the remark that 'Dante's only object is to interest.' Such has been my aim in that to which I have on that account given the name of a tale rather than claim for it the title of a romance: and if, as has been said of his poetry, it can be said of this tale that the interest never flags, my main object, besides that of turning to it as a recreation, will have been gained. If any apology be necessary for the neglect of the duties of time and place in such a narrative, I can quote the authority of Dr. Johnson, who justifies the want of them in much higher productions. I may likewise quote the same illustrious writer for a justification of many departures from the rules of fiction, and say with him 'that there is always an appeal open from criticism to nature.'"

The paper seems to be of English manufacture, and bears in the water-mark the name of "Horne," with the date "1817."

All the facts relative to the MS. of "Moredun," known to myself, are now before the world. I do not intend to take any special notice of the articles—I cannot call them criticisms—of the English press, having seen only but a small portion of them—few of their authors or publishers having had the fairness or politeness to send me copies of the Journals in which they appeared, although the literary treaty lately agreed between the two countries would have led one naturally to expect some little *courtesy*. If not justice, on the part of the English Journalists towards the director of a literary society in France who gave his name and address along with his statements, but whilst one doubter says that Scott wrote "Moredun" all but a few pages, another that he always employed an amanuensis, a third that all the handwriting had a name full, of L's, and a fourth that they were not L's but G's, I may safely leave them to demolish each other. The latest *fiction*, however, I must not pass unnoticed. It is therein alleged, as a suspicious circumstance, that at the discovery of "Moredun" was not made known until after the death of Mr. Lockhart. I reply my notice of the discovery was lodged with the Minister of the Interior, in Paris, on the 24th November, and was published here and in London, in the *Sun* newspaper, on the 29th *—the day on which Mr. Lockhart died in Scotland*. The telegraph does wonders, but it could scarcely have told in Paris on the 24th what happened at Abbotsford on the 29th. *Ab uno disce omnes*

Le Directeur-Général de la Société des Archivistes de France.

This letter we have shown to the former amanuensis and librarian of Sir W. Scott, who observes in reply:—

The name "full of L's" was, I suppose, *William Laidlaw* or John *Ballantyne*; the G's must refer to "*your humble servant*," in whose name there are certainly three—one more than in that of "MM. *Gurnion* de Gonouilhac. Secretaire Perpetuel" of the Société des Archivistes. It is curious enough that a Gordon should be connected with "Moredun." I say a *Gordon*, for it is well known that my clan originated in a branch of the Gordons who came over with the Conqueror, and remained to the south of Scotland. I am sorry that M. Cabay does not intend sending us a facsimile of that which we are so desirous of seeing—not the letter signed "W. S.," which may or may not be a cover, but a page of *the text itself*, which must be the *apparent* MS., if we are to believe M. Cabany's account of the purpose it was intended to serve. And I consider myself quite competent to determine the authenticity of the MS., having transcribed from Scott's autograph thirty-two volumes of the novels and [illegible] of "Tales of Napoleon," the necessity for the translation [illegible] unnecessary after the second volume by Scott's avowal of the author-ship.

GEO. HUNTLY GORDON.

I have omitted to observe how extremely improbable it is that Scott composed a story in three volumes which we never heard of before, during or *after* "1817" (the date of the *paper*); as he produced more works from that year till 1827 than in any ten preceding years of his life. It is quite incredible that he should have had time for "three volumes" more! Nor can I believe that he wrote a note to Wm. Spencer on paper "bearing the water-mark of the first Empire, having the name of Napoleon I., surrounded by his titles" ... Paris, in 1826, when the name of Napoleon was proscribed, and it was considered a sort of high treason to be in possession of his effigy.

Will M. Cabany comply with Mr. Gordon's very proper request?

METROPOLITAN NEWS.

NOTE.—The sign — denotes below the average. The numbers in the 7th column are calculated on the supposition that the saturation of the air is represented by 100.

The reading of the barometer decreased from 30.02 in. at the beginning of the week to 29.26 in. by the afternoon of the 4th; increased to 29.78 in. by the 7th, and decreased to 29.68 in. by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29.586 inches.

The weather has been severe all the week, the sky has been overcast; the temperature has been below its average on every day, snow has fallen frequently, and crystals have been abundant.

J. GLAISHER.

HEALTH OF LONDON.—The births of 1648 children were registered in the week ending February 3; of these, 845 were boys and 803 were girls. The average numbers in the fifth week of the year, from the preceding ten years, were 765 and 724. The number of deaths registered were 1151; and thus the continuance of the rigorous weather causes an increase of about 300 deaths weekly.

THE daily delivery of water to London during the last few months has been little short of 4,000,000,000 gallons.

THE Directors of the Bank of England, on Thursday week, passed a resolution to give each clerk in their establishment an immediate bonus of ten per cent upon his salary, as compensation for the double Income-tax.

THE SOUTH-SEA HOUSE.—This well-known edifice in Threadneedle-street (an Engraving of which was given in our Journal of Jan. 20), with its Doric portico, its quadrangle with Tuscan colonnade and fountain, and extensive vaulted cellars, is to be brought to the hammer, the Conservancy Board having at length been obliged in the first instance for the purchase by private contract, in which mode, it appears, the directors are not empowered to sell. The South Sea Company was originally a party, Earl of Oxford, in 1711, for the discharge of nearly ten millions of public debt; and in 1853-4 the South Sea Stock was converted or paid off. The building occupies more than half an acre of ground, and its value for building purposes is of course enormous.

ST. PAUL AND ST. BARNABAS, KNIGHTSBRIDGE.—Some days since Mr. Charles Westerton, the churchwarden of St. Paul's, Knightsbridge, proceeded in the Consistory Court against the Hon. and Rev. Robert Liddell, the incumbent of St. Paul and St. Barnabas, Knightsbridge, for the purpose of restraining him from certain Tractarian observances in those churches. The allegations were, that a "high altar" had been set up, that candlesticks and crosses were placed thereupon, and that a marble credentia or preparatory altar, had been erected. The Episcopal monition directs that all these articles shall be forthwith removed, and that there shall be substituted in lieu and stead thereof a decent communion-table for the administration of the Lord's Supper, or that Mr. Liddell shall show cause to the contrary in the Consistory Court.

THE inquiry into the cause of the death of Mrs. Catherine Bacon, of Ordnance-terrace, Chatham, terminated on Tuesday in a verdict of "Wilful Murder" against Elizabeth Lawe, the servant girl, who has been committed to prison.

THE claims for compensation in respect of the unsightly block of buildings which obstructs Threadneedle-street have been settled. The thoroughfare is to be opened forthwith from the Exchange to Bishopsgate. The parties interested claimed £35,276; they have got £28,711.

CHESS.

TO CORRESPONDENTS

MELROSE.—To comprehend the ingenuity of the Problem by Ali Shatranji, given by Prof. Forbes in our last number, it is necessary to have a clear idea of the difference in value, the moves and powers of the pieces in the Oriental game, and their several powers in our game. In Oriental Chess, the King, the Rook, the Knight, and the Pawn moved and captured precisely as they do with us; with the exception that in the East there was no castling, and a Pawn could never make but one step forward. With these few pieces, then, there is no difficulty. Now, clear your chessboard and place the White Queen, say, on her 4th square, and you will understand the immense disparity between her powers in the ancient and the modern game. With us, as you know, in this position she can pretty well sweep the whole board; but, in the old game, her power took in four moves and for capturing an enemy, was limited to one *square* diagonally, in each direction from the spot whereon she stood. In other words, she could, in this situation, command only her own, the King's Rook's 5th, and her Bishop's 3rd and 5th squares; so that the first move of any other piece, might be played to any other squares, near to her, or away from her, without danger. Next place a Bishop on the same square. Well, in our game, a Bishop so placed commands the whole rank of squares, in a diagonal course, from the Q's Rook's square to the King's Rook's 8th, and from the King's Kt sq to the Q Rook's 8th. In the ancient game, he commanded only the *third* square diagonally in each direction, that is to say, he could now move to or capture a piece on his K E 3rd, K B 5th, Q Kt 3rd, and Q R 5th and, to reach either of these squares, he leapt over any piece intervening. For example, if the adverse King stood at his 5th, he would not be in check of your Bishop, and to reach the K B 5th you would leap your Bishop over him. Practise the moves of the Queen and Bishop here described, first with a board divested of other pieces, and then with a number of pieces on it, for an hour, and you will be able to appreciate some of the beauties in the Chess tactics of the East.

J. L. Falmouth.—Your solution of the clever Problem by D'Orville given in our notices to Correspondents is quite correct; and, strange to say, the only one we received.

ARIEL.—B. of Bridport. A. F.—They are now undergoing examination.

TYRO, KEL.—Our solution of No. 571 is quite right, and yours all wrong. If Black take the Bishop, as you suggest, White has merely to move his King to Q B 4th, and mate next move with the K Pawn.

J. M., of Sherburn.—1 The position of the men in Enigma 569 is correct. 2 Begin by playing B to Q 6th.

VOX ET PRÆTEREA NIHIL, Brussels.—Too was the writer meant. We do not remember to have seen the move in any earlier book.

A. B. F. Stockport.—If this is true, the bishop so much the worse for him. He will then be posted in a capital hole.

C. W. Manchester.—Your solution of the Knight's Tour is a problem this week.

*** We are compelled once more, most unwillingly, to request Correspondents on Chess to send their communications to reach us by Tuesday morning, at the latest.

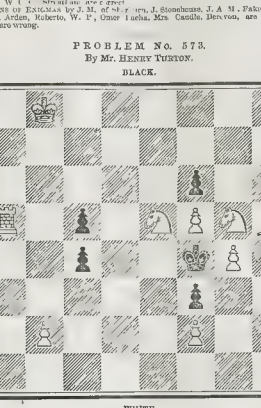
SOLUTION OF PROBLEM No. 571 (Invented), Derek, R. A., Falmouth, Barry, J. A. M., Falmouth, Medieus, Verax, are correct.

SOLUTIONS OF PROBLEM No. 572 by Cheddleigh, J. J. L., Islington, P. P., Derek, R. A., Hanworth, J. S., Dublin, Medieus, J. A. M., Falmouth, F. J. Newell, E. H., Dorset, Verax, Brighton, are correct.

SOLUTIONS OF ENIGMAS by J. M. of Sherburn, J. Stonehouse, J. A. M., Falmouth, C. F. Moore, Arden, Roberto, W. F., Omer Pasha, Mrs. Castille, Berwyn, are correct. All others are wrong.

PROBLEM No. 573.
By MR. HENRY TUSTON.

BLACK.



WHITE.

White, playing first, to mate in five moves.

A CHESS MANUSCRIPT

At the present moment, when the attention of amateurs is being directed towards the records of the play of the great masters in olden times, the following account of a MS. collection of ancient games, in the possession of M. Bonnau, a zealous and highly-respected member of the *Cercle des Echecs* in Paris, will not be without interest. The description, which we have taken the liberty to abridge considerably, is by M. D. himself, and appeared originally in the French *Chess Magazine*:—

"For many years I gave a sort of general commission to a respectable librarian to buy for me at the book-sales all works he met with which treated of Chess: with little success, however, for a long time for my *employé*, having been engaged some fifty years in the purchase and sale of Greek and Latin authors, esteemed no work precious except Ernesti's 'Homer,' Kuster's 'Aristophanes,' the 'Virgil' of Heyne, the Bible of Mariltier, or other ancient books *quidem Parmæ*. His customary reply to my remonstrances at his ill success in meeting with what I wanted was, 'But, sir, would you give five and twenty francs for a poor pamphlet which might be picked up on the quays for ten sous?' I convinced him at length that he was not likely to find the 'incunabula pamphlets' I desired on the book-stalls of the quays, but must seek for them in other quarters, and be content to pay for them the market price. And one day with much exultation he brought me a Chess-book, of which the title, portentously long, commenced thus:—'La Supériorité aux Echecs, mise à la Portée de tout le Monde, et particulièrement des Dames qui, &c.' If the good man had taken time to read this formidable title to the end, he would have found these words:—'Avec un volume de Planches pour l'explication des Coups, &c.' This volume of plates, without which the first portion of the treatise is valueless, my bookseller had not obtained. I refrained, however, from reproaching him; on the contrary, I thanked him for his attention, and encouraged him to further researches. The result was that in a few days he again appeared before me, and on this occasion with a purchase, the quality of which I was delighted to find, and shall now describe. It was an Italian MS. of the end of the sixteenth or beginning of the seventeenth century, containing a collection of games, or openings of games, by the most skilful players of the sixteenth century, arranged by some amateur, who evidently intended to obtain a complete series.

"The following are the contents:—Fifty-six Games or Openings, by Giulio Cesare Polerio; Nineteen of Giovanni Domenico; Thirty-five by Giovanni Leonardo: Four of Avalos; Two of Buonsenso; Two of Scorza; One of Don Antonio; Three Ends of Games, Anonymous; Three Ditto, from Damiano. The work is in Five Divisions:—The First comprises the King's Bishop's and King's Knight's Opening; the Second, Games of Defence against the Move; the Third, King's Gambits Accepted and Refused.

"In the foregoing list it will be observed that there is no mention of the Queen's Gambit, which doubtless had not at that period been invented. Greco, who lived long afterwards, gives in his work three games at the Queen's Gambit, with variations. Whether the honour of the invention is, as his French translator affirms, due to him, I cannot say.* If this opening were unknown to the contemporaries of Leonardo and Paoli Boi, of Syracuse, we must admit that its discovery evinces a marked progress in the theory of the game. We convince ourselves of this it is necessary only to examine the games between La Bourdonnais and McDonnell, where the Queen's Gambit rank among the most beautiful of the *parties*. The Fourth Division presents us with forty-two games of attack and defence, all connected with our ordinary openings of the present day. In the Fifth we meet only with the end games. The book is a compilation; but a compilation not without value if it have preserved for us some precious fragments of masters whose works and traditions are long passed away, and whose names even for the most part seem to be forgotten.

"The compiler of the present MS., unfortunately, employed a very incorrect transcriber, for the work abounds with errors, not only of orthography, which are unimportant, but with gross faults, which destroy the sense, and render several passages quite unintelligible. For example, at the end of a paragraph we meet with these words:—'The game was played in Spain, by Il Cieco and Giovanni Leonardo, very skilful players.' Now, the game to which they refer is incomprehensible, through some blunders, which is deeply to be regretted, since it is not certain that the Chess magnates of that epoch have ever been surpassed. The combinations of our admirable game have subsequently been infinitely multiplied, and we have acquired more science, but perhaps without any increase of genius.

"The players of the sixteenth century printed very few books upon Chess, but they attached too much importance to their combats and their studies not to preserve them. I am convinced, therefore, that a careful search in the national libraries of Spain and Italy would be rewarded by the discovery of many priceless treatises on the science.

"Of the present MS. the Second Division is, perhaps, the most curious. It contains a number of openings, by the celebrated Leonardo, in which the defence is shown how to regain the move.

"From these we take the following, which affords one or two interesting points for

BLACK.	WHITE.	BLACK.	WHITE.
1. P to K 4th	P to K 4th	6. P to Q 3rd (b)	P takes Kt
2. K Kt to K B 3rd	P to K B 4th	9. Q takes R	Kt takes K B P (ch)
3. Kt takes K P	Q to K 2nd	10. K to Q 2nd	Q to K Kt 5th
4. Q to K R 5th (ch)	P to K Kt 3rd	11. Q to K 4th (ch)	K to K B 2nd
5. K takes K P	Q takes K P (ch)	12. B to K 3rd	Q to K Kt 4th (ch)
6. K to Q sq (c)	K Kt to K B 3rd	13. K to Q B 3rd	Q to K R 5th
7. Q to K R 4th	Kt to K Kt 5th		

"White now menaces mate with his Queen at her Kt 8th, and to win the adverse Queen by playing K B to K Kt 2nd. Black must, therefore, at least lose his K Rook.

(*Notes by the Editor.*)

(a) This is not the best move. Black should interpose his Bishop at King's 2nd, in which case the game proceeds as follows:—

6. K B to 2nd	K Kt to K B 3rd	8. P to Q 3rd	Q to Q B 3rd
7. Q to K R 3rd	K Kt to K R sq	9. Kt takes K B	B takes Kt
		An. Black has the best game.	

(b) In his notes to this opening MS. Anonymous recommends P to K B 3rd as preferable. We doubt, however, very much whether this move would check him much. For suppose—

6. P to K B 3rd	P takes Kt	7. Q to K R 5th	B to Q 3rd

"Leaving for a moment Leonardo (to whom we shall soon return), we wish to speak of a celebrated Spanish player called Scovara, whose favourite opening is shown in the next game:—

WHITE.	BLACK.	WHITE.	BLACK.
1. P to K 4th	P to K 4th	8. Q Kt to Q B 3rd	P to Q 4th
2. K Kt to Q B 4th	K B to Q B 4th	9. K B to Q 3rd	Q to K 2nd
3. K Kt to K B 3rd,	Q Kt to Q B 3rd	10. P to K R 3rd	K Kt to K B 3rd
4. P to Q B 3rd	Q to K 2nd	11. K to his Kt sq (*b*)	K R to K B sq
5. P to Q 4th	P takes P (*a*)	12. P to K Kt 4th	K to his Kt sq
6. P takes P	Q takes P (ch)	13. K R to B 2nd	
7. Q B to K 3rd	B to Q Kt 5th (ch)		

"From that position Scovara, notwithstanding his having a Pawn less than his adversary, won all the games."

(*Notes by the Editor.*)

(*a*) It is now pretty generally admitted that the best move for the second player here is to retreat the Bishop to Q Kt 3rd.

(*b*) This was the ancient sap of the K at, which he was privileged to make once in the game, and by means of which, and the subsequently bringing his Rook over the King, a player effected the operation of what we call Castling, which, in former times, required two moves instead of one. See Black's 11th and 12th moves in the present game, and observe that a player might, at his choice, play either King or Rook first.

(*To be continued.*)

THE WEATHER IN THE EAST.—The French before Sebastopol have tales of suffering which will make with ... which it has been our duty to publish from the English Camp. The *Siècle* publishes the following:—"Up to the 15th the troops before Sebastopol had been twelve days in tents with cold at 10 deg. below zero (14 deg Fah.) About forty men had been frozen to death whilst sleeping in the midst of their comrades, and about 400 had had their feet frozen, and it is to be feared that several of them will die. The tent appears decidedly to be an insufficient shelter with such a temperature."

THE Prime Wardens of the Watermen's Company have made a return of the number of free watermen and their apprentices who are fit for the naval service, with a view to the ballot, should they be called on to furnish their quota of men to the Royal Navy—the company being bound by an Act of Parliament to find 100 men to man her Majesty's ships in case of war.

THE RAW-COFFEE QUESTION.—We are astounded, on reading our papers, to find that our authorities in London declined, on the 22nd of December, that the coffee issued to the men in our wars roasted before it was given out! Who has hoaxed them so cruelly? Around every tent there is even yet a fair sprinkling of green berries trampled into the mud, which the men could not roast. There is, however, some attempt made *out here* to roast coffee at last. Mr. Murdoch, chief engineer of the *Steamspeed*, has mounted some iron oil casks, and adapted them very ingeniously for roasting coffee; and they are in active play at Balaclava. I do not believe that, at the time the statement referred to was made, one ounce of roasted coffee had ever been issued from any commissariat store to any soldier in the Crimea.—*Letter from the Camp, January.*

THE THEATRES.

MARYLEBONE.—The five-act drama of "Leon; or, the Iron Mask," by Mr. Bayle Bernard, though not entirely original, is a work of very great merit. It is well rendered and arranged, and placed upon the boards with great elegance and taste. "The Man in the Iron Mask" reminds to this moment an historical mystery; and the dramatist has therefore selected his own solution. The twin-brother of the King, and resembling him in person, *Leon*, is brought up in ignorance of his birth, and while he remains in that condition is safe from annoyance; but time and circumstances reveal to him the truth; and lead to his confinement in the Bastile, where "The Iron Mask," by obliterating his features, precludes suspicion. The dramatist has reserved this incident to the last acts of his play, and drawn from it much pathetic and expressive incarnation. The situation is indeed exceedingly touching, and received from Mr. Wallack a sympathetic interpretation which reached the hearts of his audience, who were profoundly penetrated with the situation. Mrs. Wallack, as the devoted *Constance*, a lady of the court and deeply beloved by *Leon*, played admirably, and with a power over the emotions seldom attained. The entire play was meritoriously acted; and the scene-setting was in irreproachable taste, very picturesque, and especially appropriate. The performance was received with repeated applause, and at the conclusion the house was unanimously demonstrative in its favour. Its production amply fulfils the pledge given by the management.

"JANET PRIDE," AT THE ADELPHI THEATRE.

THE above new piece, by Mr. Dion Bourcicault, professes "to be in three acts," but as it has two prologues, after the manner of the French stage, it is really in five; or, in other words, is a trilogy, like the Greek dramas, or Shakspeare's "Winter's Tale" and "Pericles." The drama is also ostensibly original, and no doubt is so as a whole. But, in its parts, it is indebted to "Marie Jeannet," the "Sonnambula," the "Maid and the Magpie," &c. In fact, the evident aim of the author has been to combine the most effective situations of many dramas, and thus to gain a novel force of a composite kind, instead of concentrating himself within the more rare merit of a single incident. This coalition of points has been managed with undoubted cleverness; and a piece of accumulated interest, thoroughly elaborated, has been produced. Mr. Webster was the hero, and a truly-difficult *rôle* had he to support—a man inebriate through five acts; and the different phases of the state constituted the variety which he had to throw into the part. For an actor so consummate this variety was sufficient; and the artistic manner in which the different *phases* and *nuances* were suggested or realised by Mr. Webster is a very high histrionic rank indeed. The action of the piece altogether occupies twenty years. It opens in Paris in 1834, when *Richard Pride* (Mr. Webster) is only twenty-eight years of age, and who, with his wife *Jane Pride* (Mdme. Celeste), resides in a garret in Paris, a refuge from English justice, still sacrificing all things to the love of brandy, though not without a heart, and somewhat good humoured withal. His destitute wife is ultimately compelled to entrust her dying daughter to the Enfans Trouvés; an illustration of which scene accompanies this article. The poor child is accordingly saved; but the frantic mother perishes amidst the winter's snow in the street, at the time that her drunken husband and his companions are passing. By them she is found dead; at the same moment *Pride* is arrested for forgery. Thus ends the first part.

Nineteen years afterwards the second part presents the victim of drink in Australia with *Black Jack* (Mr. Paul Bedford). Sparks of superior culture yet distinguish *Pride* from the baser character of his associate, who murders a returning soldier, *Sergeant Grey* (Mr. R. Romer), in the bush, for the sake of his money. *Pride* immediately avenges the man's death; but takes possession of his cash and accoutrements, in order to pass under his name, enjoy his pension, and thus effect his own escape. Thus armed, we find him in London in Greek-street, Soho, the inmate of the family of *Mr. Bernard*, a French watchmaker, formerly the friend of *Jane Pride*, and who has taken charge of her infant, *Janet Pride* (Mdme. Celeste), when discharged from the Foundling Hospital. The Frenchman loves her as his own child, and makes her the companion of *Sergeant Grey's* daughter *Minnie* (Miss Keeley). *Pride* intrudes into this happy domestic circle as *Minnie's* supposed father. She has also a lover, in the French watchmaker's apprentice, *Dicky Trotter* (Mr. Keeley). *Minnie* likewise has attracted the attention of *George Heriot* (Mr. G. Lee), the son of a goldsmith, and the very

* The Queen's Gambit was known at least a century before the time of Greco. It is found both in Damiano and Lopez. [ED.]

SCENE FROM "ROMEO AND JULIET," AT THE HAYMARKET THEATRE.

man whom *Pride* had defrauded. *Mr. Heriot* entrusts a gold watch, set with diamonds, to *Bernard's* care, concerning which *Janet*, suspicious of the supposed *Sergeant Grey's* honesty, is exceedingly anxious. Being a somnambulist, this anxiety haunts her slumbers; and, in her sleep-walking, she attempts to transfer the watch from a table-drawer to a safer cabinet. But the criminal of the drama is on the spot, and abstracts the watch from the case during the attempted transfer, so that, when the former is missed, *Janet's* possession of the latter becomes evidence against her. The poor girl is tried and convicted at the Old Bailey; when *Pride*, discovering that she is his own daughter, shoots himself, and, by his dying confession, clears the prisoner. Mr. Keeley has an amusing part in *Dicky Trotter*, whose colloquy with the numerous kitchen clocks, which he has marred rather than mended—with his calculations about the mean time, and their different characteristics—suffices to send him into a profound sleep at the moment of the robbery. His behaviour in court as a witness, because he was asleep in the apartment all the while, provoked many a laugh. That a production so various in interest, and so lifelike in character, should be successful was natural, and, acted with so much talent, indeed inevitable. Mr. Webster has, moreover, earned our most unequivocal testimony to his extraordinary histrionic genius, in his successful assumption of the peculiar attributes that distinguish the hero of this new dramatic romance.

"ROMEO AND JULIET" AT THE HAYMARKET THEATRE

The performance of *Romeo* by Miss Cushman is one that possesses peculiar characteristics, and in them corresponding advantages. For force and passion it exceeds that of any male performer, and yet avoids exaggeration; because the utmost vehemence of action that an actress of taste can throw into the situations is necessarily less robust than that of an actor. The latter must modify and suppress: Miss Cushman is enabled to expand and display the signs of emotion. One of the most affecting scenes in this, the greatest love-play in the world, is the parting one between the lovers. The necessity of the step overcomes all scruples; but that necessity is better made out in Arthur Brooke's poem than in Shakspeare's tragedy. This scene, which has been more than once pictorially illustrated, derives new interest from the successful début of a new *Juliet*. Miss Swanborough, though deficient in physical force, has much feeling and grace; and when she becomes more fully acquainted with the requirements of the stage in general, and of this highly-impassioned character in particular, she will doubtless make a good actress. It has been justly said by histrionic professors that no actress, however talented, can know how *Juliet* should be performed until she is too old to impersonate the part. We should recollect and make allowance for the difficulty that this authority implies, in judging of the claims of a new actress in Shakspeare's great love-heroine.

SCENE FROM THE NEW DRAMA, "JANET PRIDE," AT THE ADELPHI THEATRE.

HUNTING IN THE HOLIDAYS.—DRAWN BY JOHN LEECH.—(SEE NEXT PAGE.)

HUNTING IN THE HOLIDAYS.

MOODY THE HUNTSMAN *loquitur*.

"Hold 'ard, gentlemen, hold 'ard!" Darn me, but it's enough to drive a fellow crazy!

That chap in a wide-awake has nigh rid over MERRY LASS and DAISY!

I wish there warn't no holidays for boys, leastways in the hunting season.

'Cos they're always a larking and spoiling the sport, and that's a very good and sufficient reason.

That cock-sparrow there on Mr. Thingumy's mare is called the fox, and, on course, the hounds chopp'd him.

Had I seen his highly respectable parient I'd a cried 'Ware Fox!' and jolly well whopp'd him.

I'm very fond of boys, and would forgive 'em shirking school, or breaking windows, or playing peg-top on a mahogany table;

But when one's out here, in one's natural element, as one may say, and they gets in the way, darn me, if I'm able!

It's quite right to enter 'em to hounds, 'cos 'the Noble Sport' 's the pride of the British nation,

But cub-hunting, which is Hunting Made Easy, ought to be the time when boys has their vacation.

"Hark to Ann-dromacky!" (*Rheecoat boy*: "Hark to An"——) "Stop your gab, sir! What do you mean by hollaring on the hounds?

"Ware, old Dido! You young yellowhammer, you're not worth so many pence as she is worth pounds."

There! the hounds have thrown up! And who's to make a cast, I should like to know, with this tail of boys

A riding about like wild Ingians or March hares, a shouting and making a deuce of a noise?

Now that's what he hates as cool as a cowcumber; and, when I grumble, he says—

'O never mind, Moody; it's only at holiday time, and they'll all know better one of these days.'

"Hark to Dido!" There goes Pug, pointing to Charnwood Gorse—a good ten-mile burst at least!

"Hark for'ard! Too! too!" There'll be bellows to mend with the ponies, but good entertainment for man and beast!

NATIONAL SPORTS.

THE frost seemed so completely set in last week that trainers began to despair of ever getting their horses ready for their spring engagements; and one lot was removed to the sea-side with a view to being "prepared" on the sands. Towards the close of it these gloomy forebodings seemed likely to prove ill-founded. The "shovel regiments" were once more beginning to appear on their favourite parades, and the slipper and the huntsman at their posts; but a second edition of winter set in on Wednesday last, and blighted all their hopes. Hence the prospects of the 1855 racing season, which opens next week, are the reverse of promising. Derby has a steeplechase-day on Tuesday. Its Selling Chase has five entries, and its Selling Hurdle Race seven acceptances out of eleven; while sixteen out of twenty-six have accepted in its principal steeplechase. Peter Simple, list., lands the Chase, and Maria Day, 9st. 5lbs., is sixth on it. The *Tyro* of the turf will travel from there to Lincoln, which has a mixed programme of steeple chasing and flat racing for them on Wednesday and Thursday. Benham's, whose dam was once a great favourite in those parts, is their principal name in the Trial Stakes. Forty out of fifty four have accepted in the Liverpool Steeplechase, among whom Bourton, with 12st. 5lbs., has boldly said "Content," and certainly he seemed, under Tasker's magnificent handling, to win with quite 10lbs. to spare last year. Miss Mowbray, list. 6lbs., also stays in, and John Scott is preparing her as carefully as a St. Leger crack.

The Coursing meetings are sown broadcast throughout the week. Newmarket, open, is fixed for Monday, &c.; Aston (Cheshire), Newport (Salop), and Lee Bridge (Salop), for Tuesday; Biggar Champion for Tuesday, &c.; Limerick and Baldock Club for Wednesday and Thursday, and Ampthill and Bryn-y-pys for Friday. The celebrated dog Tarrabas is said to have a purchaser, at a pretty strong price.

None of the great mares, except Phryne and Alice Hawthorne, have as yet had foals, but the flapper (the dam of *Gemma di Vergy*) has just had a colt to Chanticleer, who is still at the Rawcliffe paddocks along with Flying Dutchman, whose first batch of two-year-olds will appear this season. Burgundy has been purchased by a Mr. Daykin; and Pelion, one of the most promising young horses Mr. Gratton ever had, has left the turf, on which his legs failed him early, and gone to join Surplice at Doncaster, where three seasons since he ran such a terrific and victorious race with Longbow. Epirus has quitted the stud; but he leaves a splendid representative in his son of Alarm, who is considered to be the stoutest of Defence with the speed of Langar, and has communicated them both, in no ordinary degree, to his daughter Virago. Arnold is in future to train Mr. Saxon's horses instead of Abraham; and Dockeray has arrived at Newmarket and taken the late Payne and Grimshaw's stable. Twelve horses from Nat, who has looked after them at the Palace Stables since the Houghton Meeting.

Sporting literature is not very rife, but "Scrutator's" work on horses and hounds has quite the call at present. A Mr. Goodwin has also published some remarks on the strange running of Acrobat, a painful subject, which hardly needed reviving at this distance of time. The *Sporting Magazine* has a very characteristic likeness of Virago, from a sketch by Mr. Harry Hall, who has done the illustrious "roach-back" most ample justice. One of the articles contains an amusing account of "Crutch Robinson's" political colloquy with Lord Derby, as well as some recollections of the nonagenarian Yorkshireman, Michael Brunton, who was so fond of betting that during his three Parliamentary Sessions he always clenched a legal dispute by offering to bet his brother magistrates "*six tofour*" he was right. The "Sam Chifney Recollections" are also continued through the fourth chapter, which is entirely devoted to the racing career of George IV., and contains a great amount of anecdote, though it is evident he could have been dug up for the first time. Of his money habits the writer observes—"He was most liberal with money, *so long as he did not see it*. He would sign away cheques to any amount, but if he had a fifty-pound note in his pocket it was a bitter pang to him to spend five pounds of it."

A strong attempt is about to be made to introduce salmon into the Australian rivers, and a gentleman has offered to give half of a £1000 prize, if the Australian Government will give the other half, to any man who will successfully rear them there. In the Dee great pains is at present taken with salmon spawn, and it is thought that about 107,000 young fish will be reared this spring.

INTERNATIONAL COPYRIGHT (ENGLAND AND BELGIUM).—The copy of a convention between Her Majesty and the King of the Belgians for the establishment of international copyright, signed in London on the 19th day of August, 1854, and ratified on the 24th January, has been published.

THE SPANISH MINISTRY AND THE CHURCH.—M. Madoz, the new Spanish Finance Minister, has proposed to alienate the property of the Church held in mortmain. The Spanish Bishops are furious, and the Bishop of Cadiz has just addressed an energetic protest against the measure to the Cortes. His episcopal brother of Barcelona, a Catalan and an ardent Carlist, has just published in his journal a fiery article, in which he stigmatises the present Government of Spain as a band of robbers—the breakers of all laws, human and divine. The Government has ordered him off to a little town in Andalusia, which has been appointed as his residence. The Bishop has refused to go, and cannot be found.

HOW THEY MANAGE IN THE TRENCHES.—When we are in the trenches, if it be our turn to be in the first parallel, i.e., farthest from the enemy, we walk about as much as possible to keep ourselves warm, and if a shot comes, we often get in the way, so bob our heads to let the rascal pass over us. In the second parallel we walk about as in the last, but also sit down a good deal, and when you so much as show your head above the parapet, you find twenty rifle bullets whizzing about it immediately. We take some salt pork and biscuit and a bottle of water with us, and, if we are in the first parallel, our servants bring us some hot coffee about eight o'clock.—*Letter from the Camp.*

A TIMELY WARNING FOR LORD PALMURE. This is about the time when new tents and suitable clothing for summer should be provided. We may look for a summer-like opening early in April. Our men suffer enough from cold and wind—there is no reason why they should contend, unprotected and overclad, against the blaze of a Crimean summer sun.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Notwithstanding the Ministerial interregnum, and the unfavourable reports which have come to hand from the manufacturing districts on the subject of trade, the value of nearly all National Securities has not been depreciated to any extent. The supply of stock in the hands of the jobbers is by no means large, and any increase in the amount expected whilst the public continues to purchase so freely as of late. Much surprise has been expressed in the present high range in Consols; but it must not be forgotten that, as yet, no sums have been withdrawn from the Bank of England as is still good, and the revenue is flourishing. In addition to all this, money for commercial purposes is abundant, and not likely to become dearer.

Some rather extensive movements have taken place in bullion. The imports have exceeded £200,000, chiefly from the West Indies and Mexico, including £16,000 from New York. The resumption of specie imports from America is a most favourable feature; but some little uneasiness appears to be entertained that the present high rate in Consols; but it must not be forgotten that, as yet, no sums have been withdrawn from the Bank of England account; the Government balance in the Bank of England is still good, and the revenue is flourishing. In addition to all this, money for commercial purposes is abundant, and not likely to become dearer.

Some rather extensive movements have taken place in bullion. The imports have exceeded £200,000, chiefly from the West Indies and Mexico, including £16,000 from New York. The resumption of specie imports from America is a most favourable feature; but some little uneasiness appears to be entertained that the present high rate of discount will be sufficiently large to have much influence upon the supply in the Bank of England. The total exports have been nearly £300,000, mostly to India.

The Consol Market on Monday was tolerably firm, and prices had an upward tendency. The Three per Cents, for transfer, marked 91¾⅜; the Three per Cents Reduced, 91¾⅜; the New Threes per Cents, 92⅛⅜; and Consols for Account, 91¾ up to 91¾. Bank Stock was 211 to 213½; India Stock, 222; Long Annuities, 4 5-16; India Bonds, 12s to 15s.; Exchequer-bills, 5s. to 8s. prem.; Exchequer-bonds, 99⅜. On Tuesday great inactivity prevailed in the market, and the quotations were a shade lower. The Three per Cents Reduced were 91¾; the Three per Cent Consols, 91¾; the New Three per Cents, 92⅜ 91⅝ 92; the New Two-and-a-Half per Cents, 84⅝ 84⅞; Consols for Account, 91¾ 91⅝; Long Annuities, 1859, 4⅛. India Bonds were 15s. Exchequer-bills, 8s. prem.; Exchequer-bonds, 99⅜. Bank Stock, 211 to 213½. The transactions on the following day were limited, and the quotations were nearly the same. The Three per Cents Reduced were 91¾; the Three per Cent Consols, 91¾; the New Three per Cents, 91¾⅜ 92; Long Annuities, 4 5-16. India Stock, 223 to 224; Bank Stock, 213 to 213½; Exchequer-bills, 5s. to 8s. prem.; Ditto Bonds, 99⅜. Funds were flatter on Thursday, owing to the settlement of the account. The "Contango" was about ¼ per cent. Consols were 91¾ to 91⅝ 91; the Three per Cents Reduced, 91¾ ⅜ ⅛; and the New Three per Cents, 91⅞ to 92; Exchequer Bills, 6s. to 9s.; and India Bonds, 12s prem.

The market for foreign bonds has been dull, yet very little change has taken place in prices. Brazils Deferred have marked 84; Mexican Bonds, for Account, 21; Russian Five per Cents, 100 to 102; Ditto, Four-and-a-Half per Cents, 89½; Spanish Three per Cents, 38; Ditto, Passive, 4; Ditto, New Deferred, 17½; Turkish Six per Cents, 96; Belgian Four per Cents, Half per Cents, 92; Dutch Two-and-a-Half per Cents, 62½; Ditto, Four per Cents, 93⅜; Ecuador, 4.

Joint-stock Bank Shares have been tolerably firm, at full prices. Australasia have marked 61; Chartered of Asia, 4⅜; London Chartered of Australia, 21½; Ditto, New, 8½; London and Westminster, 40; Oriental, 38¾. Miscellaneous securities have ruled unsteady, yet we have very little change to notice in the quotations. Australian Agricultural, 33 ex div.; Australian Royal Mail Steam, 4⅜; Canada, 120; Ditto, Government Six per Cent Bonds, 103; Crystal Palace, 8⅜; London Dock, 102; Victoria, 141; North British Australasian, 1⅜; Peel River Land and Mineral, 2½; Royal Mail Steam, 61; South Australian Land, 35. Canal Shares have been dull, as follows: Ashton and Oldham, 137½ ex div.; Coventry, 209; Derby, 84; Grand Surrey, 48; Leicester, 59; Loughborough, 575; Neath, 130; Oxford, 113; Rochdale, 60; Stafford and Worcester, 426; Southridge, 285; Worcester and Birmingham, 25 to 24. In Water-works Shares very few transactions have been reported: Berlin, 94; Grand Junction, 70; Kent, 79; Southwark and Vauxhall, 89½; New River, 85; West Middlesex, 94½ to 95¾ ex div. Gas-light and Coke Companies' Shares have retained full quotations—Continental, 85¾ ex div.; Equitable, 20; Great Central, 11; Imperial, 97½ to 98 ex div.; London, 97¾ 13 ex div.; Ratcliff, 70; Surrey Consumers', 11; Westminster Chartered, 39¾ ex div. Insurance Companies' Shares have met a dull market: Globe, 125 ex div.; Guardian, 55; Imperial Fire, 327 ex div.; Ditto, Life, 13; Law Life, 96; Pelican, 46 to 45; Provident Life, 39; Rock Life, 7⅛; Sun Life, 57½; Victoria, 5⅝. Bridge Shares have been quoted—Hungerford, 12; Vauxhall, 23; Waterloo, 4⅛; Waterloo Old Bridge, £8¾ 9; Ditto, New Annuities, 6¾; Ditto, Extension, 6¾.

Railway Shares only a limited business has been transacted, and the quotations almost generally have not been supported. The following are the official closing prices on Thursday:

ORDINARY SHARES AND STOCKS.—Ambergate, Nottingham, and Boston Junction, 4¼; Birmingham, Wolverhampton, and Stour Valley, 58½; Bristol and Exeter, 84; East Anglian, 8⅞; Eastern Counties, 5⅜; Edinburgh, Perth, and Dundee, 78; Great North of Scotland, 89½; Ditto, A Stock, 69½; Ditto, B, 128½; Great Southern and Western (Ireland), 91; Great Western, 86½; Lancashire and Yorkshire, 74½; London and Blackwall, 8⅞; London, Brighton, and South Coast, 103⅜; London and North-Western, 100⅜; London and South-Western, 86; Manchester, Sheffield, and Lincolnshire, 23½; Midland, 69½; Norfolk, 51½; North British, 29¾; North-Eastern, Berwick, 76½; Ditto, York, 54½; North Staffordshire, 13 ex d.v.; South-Eastern, 58½.

LINES LEASED AT FIXED RENTALS.—East Lincolnshire Six per Cent, 134; London and Greenwich, 22; Lincoln, Tilbury, and Southend, 10½.

PREFERENCE SHARES.—Caledonian, 97 AN NEW; [illegible]; Dundee, Four per Cent, [illegible]; Eastern, 4 Four-and-a-Half per Cent, 103; Chester Eight per Cents, 14; Ditto Five per Cent, 10; [illegible]; Stock, 71.

FOREIGN.—Antwerp and Rotterdam, 6¼; Eastern of France, 8⅜; East Indian Extension, 6¾; Great Luxemburg Shares, 2⅜; Great Western Italy Canada Shares, 17⅜.

Mines have been very dull. On Thursday, Agua Fria were ⅜; St. John del Rey, 20¾; General, 15¾; Santiago de Cuba, 3⅜; Tin Croft, 2; West Mariposa, 4.

Friday Evening.

Scarcely any change has taken place in the value of National Stocks to-day. The business done is very moderate. The Three per Cents are 91¾⅜; the Three per Cents Reduced, 91¾; and the New Three per Cents, 92. India Bonds, 12s.; Exchequer Bills, 6s. to 9s. prem. Foreign Bonds and Railway Shares are dull.

THE MARKETS.

CORN EXCHANGE (Friday). Since Monday the arrivals of English wheat up to our market, constituted mainly by land carriage, have been on a very limited scale, and the show of samples to-day was trifling. For most kinds we had only a moderate inquiry. In the meantime scarcely any change took place in the value of foreign wheat; but, as money is plenty, and the business doing in that grain was limited, at about stationary prices. Floating cargoes were steady, but not dearer. Selling barley was in fair request, at full prices; but good malting qualities were not a shade easier. In the value of malt we have no change to report. There was a limited inquiry for peas, at full prices. Beans, and flour as last advised.

ARRIVALS. English—wheat, 1270 quarters; barley, 2220; malt, 3410; oats, 360. flour, 670. Irish: oats, 40. Foreign: wheat, 5990; oats, 120; flour, 510 sacks.

English.—Wheat, Essex and Kent, red, 65s. to 70s.; ditto, white, 72s. to 80s.; Norfolk and Suffolk, red, 65s. to 70s.; ditto, white, 72s. to 80s.; rye, 44s. to 46s.; grinding barley, 30s. to 34s. Distilling ditto, 35s. to 37s.; malting ditto, 53s. to 56s.; Lincoln and Norfolk oats, 25s. to 26s.; ditto, ditto, 28s. to 29s.; Kingston and Ware, 30s. to 32s.; potato ditto, 27s. to 29s.; Yorkshire and Lincolnshire feed oats, 26s. to 28s.; potato ditto, 29s. to 30s.; tongueland and Scotch ditto, 28s. to 30s.; Poland, 28s. to 30s.; potato ditto, 29s. to 32s.; grey peas, 38s. to 40s.; maple, 42s. to 44s.; white, 47s. to 48s.; tick beans, 48s. to 50s. per quarter. Town-made flour, 45s. per 280 lbs.; Suffolk and Norfolk, 40s. per sack; Essex and Kent, 42s. per sack; Stockton, 38s. per sack.

Irish.—There is a fair inquiry for linseed. Cakes are held at full quotations, but the business doing in them is limited. Clover seed is steady. In the value of other articles no change has taken place.

Linseed, English, crushing 72s. to 76s.; Baltic, crushing, 58s. to 60s.; Mediterranean and Odessa, 60s. to 62s.; hempseed, 34s. to 36s per quarter. Coriander, 17s. to 18s. per cwt. Brown mustard, 10s. to 12s.; white, ditto, 9s. to 10s.; tares, 40s. to 42s. per bushel. English rapeseed, £23 0s to £25 0s. per last of ten quarters. Linseed cakes, English, £12 5s. to £13 0s.; ditto, foreign, £11 10s. to £12 0s. Rape cakes, £6 10s to £6 15s. per ton. Canary, 52s. to 56s. per quarter.

Beyond.—The prices of wheat in the metropolis are from 10s. to 11s. of household ditto, 63s to 64s per four-pound loaf.

Imperial Weekly Average.—Wheat, 70s. 11d.; barley, 39s. 2d.; oats, 26s. 9d.; rye, 42s 6d.; beans, 44s 9d.; peas, 43s. 6d.

The Six Weeks' Averages.—Wheat, 72s. 6d.; barley, 33s. 5d.; oats, 27s. 3d.; rye, 45s. 4d.; beans, 46s. 10d.; peas, 43s 9d.

Duties.—Wheat, 1s.; barley, 1s.; oats, 1s.; rye, 1s.; beans, 1s.; peas, 1s.

English Grain Sold last Week.—Wheat, 16,000 quarters; barley, 9400; oats, 16,800; rye, 80; beans, 3750; peas, 1511 quarters.

Tea.—The business done in our market is very moderate, yet prices are mostly supported. Common sound congou, 9½d. to 10d per lb. The supply on offer is good.

Sugar.—Our market is dull, and prices this week are [illegible] Mauritius, 6s 6d to 6s 7; Bengal, 5s 6d to 6s 6d; Madras, 6s to 6s 6d; Bourbon, 6s to 6s 3d per cwt. Foreign sugars offer somewhat dull quotations. Refined goods are in fair request, at from 67s 6d to 68s 6d per cwt. for lumps. The total clearances for last week 6845 tons, against 6135 tons in 1854.

Coffee.—There has been rather more business doing in this article, and, in some instances, prices have ruled a shade higher. Good ordinary native has realised 46s. to 46s. 6d. per cwt.

Rice.—The demand is very limited; yet we have no sellers on lower terms.

Provisions.—There has been a fair demand for nearly all kinds of Irish butter at full prices. Foreign butter has changed hands on former terms. English is very dull, and the last week's imports into London have been large. Bacon is in limited request, at previous terms. In the value of other kinds of provisions we have no change to report.

Hops (Friday).—Rather a improved demand for the best kinds of hops from Ostend. Our market is but moderately supplied, and a steady business is doing, at full prices. New Mid and East Kent pockets, 90s. to 121s.; New Weald of Kent, 84s. to 112s.; East and Mid Sussex, 84s to 110s. per cwt.

Potatoes.—Yorkshire Regents, 90s. to 100s.; Scotch Perthshire, 110s.; Wisbech, 90s. per ton.

Smithfield (Friday).—A very moderate supply of beasts was on offer in to-day's market, yet the demand for all kinds ruled very inactive at barely Monday's currency. Very few sheep were on sale. The station trade, however, was heavy, on former terms. The few calves in the market were mostly sold. In pigs, the business was done on former terms, without any change to notice in those value. Mitch cows were extreme dull at late rates.

[illegible] Scots, [illegible] Herefords, [illegible] Devons, [illegible] Sussex, [illegible] Shorthorns, [illegible] Runts, [illegible] Welsh, [illegible] Norfolk and Suffolk, [illegible] Lincolns, [illegible] Leicesters, [illegible] Downs, [illegible] Calves, [illegible] Pigs, [illegible] Cows, [illegible] Horses, [illegible] Sheep, [illegible] Lambs

AMUSEMENTS, &c.

WILLIAM III. (1688).

QUEEN OF WILLIAM III. (1688).

QUEEN ANNE (1702.)

STATUES IN THE NEW PALACE AT WESTMINSTER.

We now complete our series of the Statues which fill the niches in the Central Hall and St. Stephen's Hall in the New Palace at Westminster They do not follow in strict chronological order, as at the date of our former Illustration many of the Statues were not finished. The entire series is now placed, and gives a rich and varied finish to the entrances by which they stand, one above the other. Many designed by, and executed under the superintendence of, Mr. Pugin Hanms, and reflect much credit upon his ability; there being much difficulty in varying the attitudes of so great a number of figures.

GIBSON'S MARBLE GROUP FOR THE PRINCE'S ROOM IN THE HOUSE OF LORDS

(From our own Correspondent.)

THE most interesting and attractive work of sculpture now being executed in the studio of Mr. Gibson at Rome is a colossal statue of Her Majesty Queen Victoria, on either side of which will be placed two figures representing Justice and Clemency. The group is intended for the Prince's Room in the House of Lords. Workmen are at this moment employed in executing in marble Mr Gibson's admirable design. The head of her Majesty is complete, and I am enabled to send you a Photograph of the same, by Macpherson. The other portions of the statue are only dawning into form, under the chisel of the workman; but the plaster cast of course conveys the sculptor's conception. The Queen is seated in a coronation-chair, which chair rests on a pedestal adorned with emblems of Science and Art. The pedestool is to be enriched with mosaic emblems; and the whole will be coloured and gilded. The likeness of our beloved Queen is excellent, yet its familiar portrait character does not detract from the dignity. The idea of colouring and gilding statuary is now occupying much attention in Rome. The present group is an experiment; and it remains to be seen what opinion the mass of the public will pronounce on a new mode (as far as the moderns are concerned) of treating sculpture.

MARBLE BUST OF HER MAJESTY, BY J. GIBSON, R.A.

THE QUEEN'S STAIRCASE, WINDSOR CASTLE.

THIS staircase is situated at the south-east angle of the Great Quadrangle in Windsor Castle, and leads directly to the Royal apartments. It is exclusively the Royal staircase, and is entered from the Quadrangle through a porch which forms an important feature in the building. In plan the staircase is very peculiar, being placed at an angle of the building; it is, therefore, three-sided instead of square, and the ceiling is divided into triangular shaped compartments to suit the quaint plan There are two lantern lights in the roof, one over the other, each enriched with trefoil mouldings and foliage, and having trefoil headed windows. The staircase itself winds to the right and left, meeting on a landing in the centre, the balustrade being ornamented with a range of trefoils of somewhat large design. On the landing are two doors leading to the Queen's apartments, and opposite to them a door to the vestibule. The walls of the staircase are panelled, with trefoil-headed arches, for some height, and an air of richness pervades the whole, from the crimson velvet pile carpets, and the numerous lamps which are placed on the balustrades Coloured and stained glass, however, are wanted to add their luxurious tints to the scene.

WINDSOR CASTLE.—THE PRIVATE STAIRCASE.

CABINET PICTURES AT SYDENHAM.—The various objects of art in the Palace at Sydenham can now be seen and studied at leisure, and many of the smaller treasures will be noticed which in more crowded times would not have been observed. Amongst these latter may be mentioned the beautiful collection of cabinet pictures in water-colours, the work of Mr West, and painted by that gentleman to the order of the Crystal Palace Directors. They are one hundred and thirty or forty in number, and are the fruits of a tour through all the great Continental galleries. They comprise copies of all the great Raphaels, Titians, Rubens, &c., in Europe; and in every case a very successful attempt is made to communicate a satisfactory idea of the style, drawing, and colouring of the master. To those who only know the great galleries by the descriptions of the Handbooks, a careful inspection of this elegant little collection will be invaluable, while the more travelled visitor cannot fail to acknowledge their great artistic merit and fidelity.

PRINCE MENSCHIKOFF'S GALLANTRY.—An English officer, now a prisoner in Sebastopol, had a letter sent him from a young lady in England, to the effect that she "hoped, when he took Menschikoff prisoner, that he would send her a button from his coat, for her to keep as a relic." The letter was forwarded by flag of truce into Sebastopol, with other letters for prisoners now in the enemy's hands. This letter fell into Menschikoff's own hands, of course, to be read ere delivered. On coming to the above passage, he immediately cut a button from his coat, and sent it out under flag of truce, to be conveyed to the lady, with a remark to the following effect:—"That he had no idea yet of being taken prisoner; but, rather than disappoint a young lady of so simple a request, he would fulfil her wish himself before that time arrived."

AMONGST the numerous suite of persons who have accompanied the Duke and Duchess of Brabant to Egypt are the Canon Misslin, who has written a remarkable work on the Holy Land and Syria; Dr. Wimmer, the Duke's medical adviser, and a painter named Leider, whom the Royal Highness has taken with him for the purpose of making drawings of all the remarkable spots visited by the Royal party.

OLD LONDON MAKING WAY FOR THE NEW.

A SKETCH IN THREADNEEDLE-STREET.

(See the Engraving at page 144.)

SINCE the time of the Great Fire of 1666, London has not been so greatly changed as it has been during the last quarter of a century; and it is gratifying to note that these changes distinctly show the onward progress of the nation, both in taste and wealth. It is curious to compare in an architectural point the places of business such as banks and insurance offices, shops, taverns, &c., of the times to which we refer, and the structures intended for similar uses at the present day. The new squares, streets, and warehouses look like palaces by the contrast. This beneficial change has been most visible during the late City improvements, which, although not by any means all that we could wish, will, undoubtedly, be attended with much good. Our Sketch shows the progress of a beneficial alteration in the throngest centre of our commerce, which when carried out will render the well-known street worthy of its important position. In viewing the grim old building—part of which is represented in our engraving—many recollections of former changes come to memory.

It is curious to think of this now bustling neighbourhood as shown in Agas's old plan of London, of about the date of the beginning of the reign of Queen Elizabeth. At this time the Royal Exchange was not built. Aldgate and the City wall and ditch are shown in perfect condition, outside the wall a large field runs to Hogge lane, in which persons are busily engaged in drying linen, &c. The scaffold is on Tower-hill, and the only names of streets and churches near Threadneedle street mentioned, are—Harte str., S. Caterin Colemana, Blanck Cheaston, [illegible] lane, Fan Church, Lime st., S. Denys, Leaden hall, Bushop gate [illegible], Broad st., Gracious st., St. Clement's lane, Abchurch lane, and the other lanes leading towards the Thames—Eschcap, Lombard st., and Burchin lane.

In the plan of London executed by order of the Corporation, Threadneedle-street commences at the west end of the Gresham's Royal Exchange, which was near the present Mansion-house; all except a few houses at the east end, where the South Sea House stands, was destroyed by the Great Fire: a few houses of the old date are now in course of demolition.

It is deeply to be regretted that, after the fire had done its fearful work, the plan of Sir Christopher Wren for building the new city was not carried into effect. The great architect wished to continue Leadenhall-street in a straight line past St. Paul's to Temple-bar, and to form two other straight lines of streets nearer to the river, with smaller streets at right and other angles. The Royal Exchange in this plan is placed in the centre of a large area, and surrounded by the Post-office, Excise-office, Goldsmiths' (at that time bankers also), and insurance offices.

After the fire in spite of Wren's suggestion, the streets were built very nearly on the old plan, but of substantial brickwork, instead of wood and plaster; however much this might aid the stability of the City it certainly did not add to its picturesque or elegant appearance. Over the large space swept by the fire the houses were nearly destitute of ornament, and similar in shape.

The next great change in this neighbourhood was the erection of the Bank of England, in 1734. Previous to this time the business of the Bank had been carried on since its foundation, in 1694, in the hall of the Grocers' Company. The building was enlarged by Sir Robert Taylor, between the years 1766—86; and, says Mr. Cunningham, "Sir John Soane subsequently receiving the appointment of architect to the Bank, and the business of the Governor and Company increasing, much of Sampson's first building, and of the wings erected by Sir R. Taylor, were either altered or taken down, and the (one-storied) Bank, as we now see it, covering an irregular area of four acres, altogether completed by the same architect." Threadneedle-street, which runs from Bishopsgate-street to the Bank, is called by Stow *Threcneedle-street*.

Cunningham says: "The grandfather and father of Sir Philip Sydney lived in this street, in a tenement called Lady Tate's House, on the site of a part of the Mouse and Hospital of St. Anthony, annexed by Edward IV to the Collegiate Church of St. George, in Windsor. The Dean and Canons of Windsor demised this house to Sir Henry Sydney by an indenture dated May 26th, 1563, for the further term of sixty years, at the yearly rent of £6 13s. 4d." The alteration of the value of land on this spot since that time is extraordinary; for a narrow frontage near the Merchant Taylors' Hall the Company receives a ground rent of £3 per foot per annum. This great increase should serve as a lesson that we should not delay necessary improvements, for undoubtedly the value of land in the heart of London will increase in a compound ratio.

THE GREEN MAN, BARNET.—This celebrated inn and posting-house, which has existed for nearly a century, is now entirely closed, and the furniture, horses, and farming stock of the late proprietor Mr James Buckell were sold by auction, by Messrs. Pike and Cameron, on the 17th and 18th ult. The Grand Stand used at the annual races held here formed a prominent feature in the sale. The house must be well known to all persons who formerly travelled northwards from London, as it stands at the angle formed by the junction of the new road to St. Albans and the great North or Holyhead road. Some idea of the business formerly done at the Green Man will be conceived when we state that on three successive days in 1836 nearly £160 was taken for posting, and at the yard, and on a given day in 1838 fifty-six pairs of horses left the stables, upwards of 100 coaches at that time ran through Barnet, and it is computed that quite a third of them changed horses at this house.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

CONVOCATION.

In answer to a question from the Earl of Shaftesbury,

The Archbishop of CANTERBURY observed that he did not think it would be necessary either to prorogue or adjourn Convocation further, because it was not intended to initiate any new business, but simply to proceed with what had been commenced, and to consider the reports of Committees which had already been appointed.

THE MINISTERIAL CRISIS.

The Earl of ABERDEEN, in moving the adjournment of the House, said that he thought it right to inform their Lordships that his noble friend the Secretary of State for the Home Department (Lord Palmerston) was commissioned by her Majesty to form an Administration; and, as his noble friend was then engaged in that work, he would only propose to adjourn to the next day.

HOUSE OF COMMONS.—MONDAY.

BALACLAVA HARBOUR

In answer to Mr. Deedes, Admiral BERKELEY read extracts from a letter of Sir Edmund Lyons, and from the reports of thirty-six masters of transport-vessels, denying that any confusion had ever existed in the harbour of Balaclava.

THE MINISTERIAL CRISIS

The CHANCELLOR of the EXCHEQUER postponed, on the part of the Home Secretary, the orders of the day, with the exception of the Fisheries (North America) Bill; and he was desired by his noble friend to state that all the reasons which induced the House to waive the discussion of public business on Friday last existed still in their full force

Lord ERRINGTON wished to know whether that statement was intended to imply that no progress had been made in the formation of a Government?

The CHANCELLOR of the EXCHEQUER said he had received no communication from his noble friend on that subject.

The American Fisheries Bill was then read a third time and passed.

LORD JOHN RUSSELL'S EXPLANATION

On the question that the House do now adjourn, Lord J. RUSSELL rose to reply to some portions of the speech of the Duke of Newcastle last week. He might state at the outset that that speech attempted to place the matter rather in the light of a party and not in a broad question which he attempted to place it. It appeared to him, at the close of last session, that the composition of the Government was not such as to inspire any great party enthusiasm, and in frequent defeats of the Government took place in consequence. This would have induced him to resign at that period but for the war. At the same time he felt that the conduct of the war was likely to be much affected by the personal character of the War Minister. The Duke of Newcastle complained that he (Lord J. Russell) represented him as anxious to retain the War office last year. He made that statement not on general rumour merely, but on the authority of a letter from Lord Aberdeen. As to his taking the office himself, he would have taken it if Lord Aberdeen had offered it to him; but he considered the office wholly alien to all his experience and habits of business. At the same time he did not think that a Prime Minister of the character and habits of Lord Aberdeen, and a War Minister of the character and habits of the Duke of Newcastle, were fitted to carry on the war with energy and efficiency. A more important statement was that he had abandoned his opinions on the 16th of December last. But it was to be remembered that he had from the first divested the proposition into two heads—the one was with respect to the consolidation of the offices, the other as to the person of the Minister. Now, as regard to the consolidation of the offices, he had changed his views, chiefly by the opinions of Sir C. Trevelyan; but on the personal question he had never changed. [illegible], though after what had passed with Lord Aberdeen it would not be right before the Cabinet. It was very likely he was in error on that point; that he ought to have brought the matter before the Cabinet, and, if he were overruled, then and there to resign. There were other points, too, in the conduct of the war with which he was not satisfied, but he still continued a member of the Cabinet. He admitted he ought to have brought the question sooner before the Cabinet. He admitted that that was an error; but it would have been a still graver error—it would have been an error in morality, and without sound morality there could be no sound politics—if he had stood up and told the House to be satisfied with a state of things which did not satisfy himself. He went on to say that he was totally ignorant of the statement since made by the Duke of Newcastle, that that nobleman had some days before the meeting of Parliament placed his resignation in Lord Aberdeen's hands. That announcement was new to him, and he thought, as his resignation was based on the inefficiency of the Duke, that the Earl of Aberdeen need not have been so hasty in accepting his resignation, but might have acquainted him with the Duke's resignation, and consulted with him whether that might not alter the state of affairs. However, his resignat on was accepted; and now, in answer to all the slanders that had lately been directed against him, he had only to say, that, if his past life did not refute them, he had no other answer to give. He must say, however, in regard to the sneer of the Duke of Newcastle, implied in his letter to [illegible] Aberdeen, "I do not give any pretext to Lord John Russell for [illegible] that that sneer might have been spared. Instead of attributing his (Lord J. Russell's) dissatisfaction to selfishness, it might have occurred to him that it was just possible it might arise from his own inefficiency. Having finished this statement, he had now to state to the House the [illegible] Majesty called upon him on Friday night last to undertake the formation of a Government. There were two reasons to induce him to attempt the task. One was, that he had been partly instrumental in bringing up the last—the other, that he was charged with shrinking from the consequences. He did undertake the task, therefore, but he found insuperable obstacles in his way, and twenty-four hours after receiving her Majesty's commands he resigned the honour back into her hands. He hoped that whoever might be successful in this onerous task would receive all the support of the House. He then adverted to the attack made upon him on Friday night in the speech of Sir De Lacy Evans, and reminded the House that he stated at the outset he did not intend to enter into the details of these battles. He trusted, however, the time would come when the House would and some mode of acknowledging, not only the gallantry of the army, but, what was a more rare quality, its patient endurance of every privation to which men could be subject.

The CHANCELLOR of the EXCHEQUER defended Lord John Russell from the attack of Sir De Lacy Evans on Friday night, but deprecated the practice of referring to negotiations now going on so long, as there was no responsible Government. With regard to the composition of the late Cabinet, he stated that the appointment of the Duke of Newcastle to the War Department took place with the full concurrence of the whole Cabinet. The noble Lord said that when he changed his mind in December it was not to the offices, not as to the Minister. But the House must know that [illegible] Lord made such a distinction; there was nothing in his language towards his colleagues to induce them to believe that he still retained any portion of his former dissatisfaction. He suggested no change—he proposed no plans—he uttered no censure. He defended Lord Aberdeen from the charge of concealing the state of affairs with respect to the formation of a Government would have on the army and the country at large. He expressed his hope that such a Government would soon be formed that would bring the war, which now constitutes almost his only politics, to a speedy and successful [illegible]

HOUSE OF LORDS.—TUESDAY

THE MINISTERIAL CRISIS

The Earl of ABERDEEN: My Lords, in moving the adjournment of the House, I think it necessary to express my confident hope that, before the next meeting of the House on Thursday, the present state of uncertainty [illegible] will have been brought to a happy termination

HOUSE OF COMMONS.—TUESDAY.

[illegible]

tary of State for the Home Department to state to the House that, in pursuance of her Majesty's commands, he has undertaken the task of forming a Government. I had, therefore, intended to move that the House, at its rising, should adjourn to Thursday; but, since I came in, I have been informed that there is some business which it will be necessary to transact to-morrow. The sitting, however, will be a very short one. I, therefore, move that the House at its rising adjourn till to-morrow.

PROMOTIONS IN THE ARMY.

Lord GODERICH gave notice that on Tuesday, the 20th instant, he would move the following resolution:—"That, in the opinion of the House, the present system of promotion in the army, under which a non-commissioned officer seldom attains the rank of officer, and never that of field officer, is injurious to the public service, and unfair to the non-commissioned officers."

THE MINISTERIAL CRISIS

On the question that the House do adjourn,

Mr BENTINCK rose to call the attention of the House to the present anomalous and disastrous state of public affairs. It was now more than a week since the late Government had resigned. Since then it was rumoured that Lord Derby attempted to form a Government, in which he was first supported by the noble Lord the Home Secretary, but who very shortly afterwards withdrew his support—conduct which, if correctly reported, savoured of vacillation (Much laughter, arising from the honourable gentleman pronouncing the word "vacillation"). After that Lord John Russell attempted to form a Government and failed. Now it was rumoured that the noble Lord the Home Secretary, who was entrusted with the same task, had met with difficulties, in consequence of certain public men attempting to obtain a preponderance in the Cabinet. He thought this was a discreditable state of things, and he was induced to notice it in the hope that the House would use its influence to put an end to it.

Sir C. WOOD deprecated such a discussion at the present time. When the Government was formed then would be the proper time for such remarks, but not when the Government was in the course of formation.

Mr. WHITESIDE defended the course which Mr. Bentinck had taken

Mr. SCOTT also insisted upon the propriety of the House expressing an opinion at the present time. The feeling of the House and the country was that the head of the late Government was a *caput mortuum*, and unfit to be at the head of the Government; and yet it was now rumoured that that individual was to have a place in the new Cabinet. He hoped the country would not tolerate such an outrage upon its opinion.

Mr. LABOUCHERE thought the character of the House would not be raised, or public business promoted, by desultory conversations of this kind. It might be necessary that the House should have to interpose by an address to the Crown on the present anomalous state of affairs; but, that its interposition might be effectual, it was most desirable that they should not enter into discussion now.

Mr. MALINS also complained of the want of a Government, and asked if it were true that the Chancellor of the Exchequer was the cause of the delay? He urged that the House should at once proceed to nominate the Committee of Inquiry agreed to on Monday week. If the Ministry were not formed by Thursday next, he hoped some honourable member would, without further delay, move an address to the Crown on this subject

Mr. S. WORTLEY, on public grounds, deprecated the continuance of this discussion. All must regret the want of a Government at the present time when every hour was of importance to our armies in the East But public opinion had already pointed to one member of this House as most competent to undertake the formation of a Government, and they had that night been informed that that member had been entrusted by her Majesty with the task of forming a Government. This conversation could only tend to embarrass his plans, and he therefore hoped it would now cease

Mr. ROEBUCK rose to explain to the House why he had not moved the appointment of his committee. He was anxious that the Committee should consist of the leading members of this House, but, as he did not know who might be members of the Government, he could not be sure that in naming a member he might not be naming a member of the Administration. As to the formation of a Government, he would say one word. Rumour said that the noble Lord the Home Secretary had met with difficulties in forming a Government. The noble Lord might make himself easy. The country had called him, and upon the country he might rely. If any one attempted to cross his path, he might say to them, "Stand aside! I will appoint those who, if they have not the confidence of this House, will, through me, obtain the confidence of the country."

HOUSE OF COMMONS.—WEDNESDAY.

A number of bills were read a second time and committed

NEW WRITS.

Mr. HAYTER moved for a new writ for the borough of Tiverton, in the room of Lord Palmerston, who has accepted the office of First Lord of the Treasury; and one for the Southern Division of Wiltshire, in the room of Mr. Sidney Herbert, who has accepted the office of one of her Majesty's Principal Secretaries of State.

SUPPLY.

The CHANCELLOR of the EXCHEQUER moved that the House should go into a Committee of Supply, in order to take a vote on the Ordnance Estimates. He proposed to enter upon the estimates on Friday week, beginning with the Navy estimates. He did not think the First Lord of the Admiralty would be able to take his seat before that day. It was necessary not only that the money should be raised and assigned by Parliament, but it was necessary that a bill of Ways and Means should be passed to enable it to raise money to be issued. If the House agreed to the vote he intended to ask for, it might be reported to-morrow, and he would then move the adjournment of the House for a week.

Sir H. WILLOUGHBY and Mr. MUNTZ complained of the irregularity of the proceeding, the first intimation of it which hon. members had being in the paper of that morning.

Sir C. WOOD observed that no one would be committed by the vote on account which the Chancellor of the Exchequer had asked for. In reference to a remark by Sir H. Willoughby, that the House had been taken by surprise, the right hon. Baronet reminded him that the estimates had been on the table for a week.

Mr. WALPOLE said that the Navy estimates were not yet laid upon the table

The CHANCELLOR of the EXCHEQUER said the Navy estimates would be laid upon the table to-morrow.

Mr. STAFFORD said he had that morning received a letter from Scutari, stating that the condition of the hospital was becoming worse rather than better, and that there were more than forty deaths there every day.

The CHANCELLOR of the EXCHEQUER said that there were two courses which the honourable member might have taken with discretion—first, to have laid his statements before the Government; and, secondly, to call the members of the Government to account if they neglected those statements; but the hon gentleman had made no communication to the Government, and had made his statements in the absence of those who had the management of the War Department. From his knowledge of the case, he (the Chancellor of the Exchequer) was able to say that the late Secretary at War had not been behindhand in his duty in making provision for the increased demands upon the hospital. That right honourable gentleman had organised a civil military establishment, which would be sent out at the earliest possible period, for the purpose of superintending the hospital at Scutari (Cheers).

Mr. WHITESIDE said that while the gravest disasters were occurring in the Crimea, which it would take a Defoe adequately to describe, the Chancellor of the Exchequer had his feelings under control, and could speak with tranquillity of a perishing army. He saw no reason why any member who had complaints to make should go mincingly to the Secretary at War, upon whom the House had passed a formal censure, and who by a shuffle of the political cards had succeeded to a higher office.

Col. KNOX had just received a letter from the Crimea, from which he ascertained that 1000 men were dying there every week, that the whole force of the British army was 11,000 men, and that everything was mismanaged by the authorities there.

Col. DUNNE was prepared to state, that instead of there being 30,000 men in the Crimea, as asserted a few evenings since by the Secretary at War, there were not 11,000, and that not 2000 of these were able to take up arms. The Government had destroyed half the army; and, if the Ministry stood which was now about to resume office, the other half would soon be destroyed. Sebastopol might be taken, no doubt would, but it would be by the French army.

Sir W. MOLESWORTH denied the statement that the deaths amounted to 1000 a week. He believed the statement made by the Secretary at War was strictly true, according to the last returns

The Speaker then left the chair, and the House went into a Committee of Supply

The CHANCELLOR of the EXCHEQUER moved for a vote of £1,300,000 on account of Ordnance supplementary estimate

The vote was agreed to after some discussion, and the House resumed at twenty-five minutes to two

(*Continued on page* 150.)

OPINIONS OF THE SILENT MEMBER.—(No. III.)

I SUPPOSE it will be called conceit on my part, but I really think that I should stand a chance of getting better men at the head of affairs if some of the Silent Members were occasionally invited to take a share of the Government. The difficulty just experienced in forming an Administration has arisen not so much from there being a limited choice of fit men, but from there being a limited choice of men with "Parliamentary reputations"—that is to say, men who have the talent for speech-making which is acknowledged to be the greatest of all impediments to the transaction of public business. Talking is the great vice of Parliament, and the chief bar to useful legislation; yet it is thought necessary to select the principal talkers in the land to conduct the affairs of the nation. So hand-so is admitted to be a most able man of business, but if he cannot make an effective speech he is put aside as of no use in the Government. The initiated are familiar with the rumour that a certain Attorney-General obtained his high office, not because he was the ablest lawyer whose services the country could command, but because he was the best speaker—with any pretensions to professional reputation—on the side of the Government. If a Ministry requires an advocate, and must have a good eloquent orator to plead for acts which do not speak satisfactorily for themselves, the choice of the best speaker instead of the best lawyer to fill the post of Attorney-General is easily understood; but though the Cabinet may gain a prop the public interest is sacrificed. Considering, also, that the law officers of the Crown are almost, as a matter of course, entitled to the highest judicial posts that fall vacant, we are exposed to the risk of not the certainty of having our Chief Justiceships filled by politics partisans

Everybody thought that Parliament was summoned at an earlier period than usual because there was urgent business to be done; but who we ask ourselves how far we are advanced in the real work of the session on this 10th of February, about a week after the ordinary commencement of the legislative year, the answer is far from satisfactory. We are, in fact, rather later than we should have been under ordinary circumstances if Parliament had just met, for we have some new writs to be issued and elections to be decided before we shall be able to begin the actual business of the nation. The Noodle-ism and Doodle-ism of the past week has been carried to an extent that, but for the serious interests involved would have been intensely ludicrous. The running about of Lords and Honourables to and fro between each other's residences, the sulkiness of right honourables who have not been "called upon" or "sent for" by any of the chiefs successively employed in attempting to form a Cabinet, and the communications that have been passing from one to the other, have occupied the public mind at a time when every minute has been too precious to be wasted on these miserable frivolities. Day after day has the House of Commons been adjourned because, as the Chancellor of the Exchequer said, "the reasons for the postponement of general business remained still in full force"—or, in other words, the parties relied upon to get together a Government remained in full feebleness. Let us hope that at all events we shall have no more time consumed in "explanations;" for we may generally be pretty sure that, whenever public men begin systematically to "explain," the state of public affairs has become hopelessly confused and inexplicably intricate.

During what was termed the Ministerial Interregnum a petition was presented which may perhaps be considered an infringement of the understanding that no business was to be brought forward, because, as the petition prayed for "the total and immediate abolition of the sale of all intoxicating drinks," it may have been introduced by way of joke—a supposition to which the "laugh" with which the petition was received gives some countenance. Nevertheless there is a great deal to be said on both sides of the question, which bids fair to become one of the most important questions of the day—the propriety of restricting temperate enjoyment for the sake of preventing drunkenness. Admitting that intoxication is the cause of much crime, it would seem that we must have degenerated into a nation of little better than brutes, if we require a restrictive law debarring us altogether from the use of that which is liable to be abused by some amongst us. To prohibit the sale of all drinks that will produce intoxication if taken to excess seems little wiser than prohibiting the sale of all razors because razors are sometimes employed in the crimes of murder and suicide. Am I to be prevented from shaving because my neighbour may cut his own or somebody else's throat if we are not both prevented from purchasing what is to me a very useful, and, from habit, an almost indispensable, instrument? The sale of every article might be prohibited on the same ground, for there is nothing that may not be, and hardly anything that is not, occasionally applied to an evil as well as to a good or reasonable purpose. It is true that drunkenness, when it leads to crime, is an abuse that is dangerous to society But there is no abuse that has not the same effect in a smaller or greater degree, and, if the principle sought to be applied in this case were to be applied in others, we should have to banish from use nearly everything from which we derive benefit. Let intemperance be as prolific as it may of crime, it cannot prevent temperance from being a virtue—and a virtue that it would be impossible to practise if we were to prohibit the use of that of which the abuse only is criminal. Tested by the application of sound principles, the cause of what is called the Maine liquor law must fall to the ground as completely, if not so ignobly, as the most drunken of its opponents. No one denies the desirableness of the end which the abstainers or prohibitionists have in view, but the doctrine that the end will justify the means has no place in the science of sound morality. Let drunkenness be punished as a crime, if society requires that it should be so; but let not temperate enjoyment be forbidden to all because there are some who, by the abuse of a good, turn it into an occasional evil.

I am sorry to see that the prospects of the Crystal Palace are not so encouraging as every lover of harmless recreation and popular instruction could desire. The Crystal Palace has come into my mind in connection with the temperance question, because I think there is more sound and wholesome support for the temperance cause to be met with in the morals of the Crystal Palace than in all the teetotal lectures and discussions that were ever uttered or written. The best antidote to the gin palace will be the Crystal Palace; and not half so much good will be done by shutting the doors of the former as by keeping the doors of the latter open. The allurements of the gin palace will seem the more to be desired the more they are rendered difficult of access; but in the Crystal Palace attractions are contained that, if they are acceptable, must and will supersede the pleasures of mere sensual excitement. There would have been little pretext for closing the public-houses in London on Sunday if the Crystal Palace at Sydenham had on that day been permitted to remain open. At all events we are not justified in resorting to the prohibitory system until we have given the free principle a fair trial, and this we cannot be said to have done. Until we have made harmless Sunday recreations as easy of access as we have hitherto permitted to be the case with more dangerous allurements, it is not fair to say that "people will get drunk on Sunday, if we do not restrain the sale of all intoxicating drinks," until we have placed within their reach some alternative that will enable them to choose a good in preference to an evil.

The German papers speak of a new sect, of whose opinions no account is given; but we are told that the members "meet at night in the open fields, wearing high caps adorned with horse-tails, and holding in their hands high staffs surmounted with [illegible] pear-like knobs." We are not informed whether these [illegible]ounders represent a new re[illegible]on or a new party in politics, but whether may be the case it [illegible]t be as well, if the costume is intended

nblematical, that the horses tails should be superseded by those of animal The authorities have taken the usual course ed the parties; as if taking them up were the best way of putting k and so shall now, no doubt, hear of them as martyrs, though ould probably never have been spoken or again had they been themselves as mountebanks.

ies of law are sometimes as remarkable, if not as p the curiosities of literature; and judicial acts which seem at startling at first sight are occasionally rendered more so by reasons. The other day a young man pleaded "Guilty" at the ex Sessions to a charge of having obtained by false pretences a atch and three gold chains, value £26, and three sets of studs mself, as it was his professional duty to do, having been paid contended that "it was not a case for full punishment, for the r had given one of the gold chains to a young woman, and had into the 17th Lancers, in which regiment he would re efficiently employed in the service of his country in imen than undergoing punishment in a prison here." Of this will be considered all very legitimate in the mouth id advocate. If it had been a clerk, who had robbed a bank another place before he was apprehended, his counsel might, if he ave argued that "his client would be much more efficiently em- as a cashier in his new situation, handling the gold under his than in turning a crank at Wandsworth gaol, or walking up an mable flight of steps without arriving at any satisfactory conclusion." ught be the "legitimate" course for a barrister to pursue, in con- with the practice and morality of the bar, but we should hardly he Judge to acquiesce in the proposition. Perhaps, however, we might ng in our supposition, for who would have imagined that, in the case of the Assistant Judge would so far have acquiesced in the e prisoner's counsel as to say, "The Court regarded it as a case h some lenity could be shown, but still there was a rule from it would not do to depart"? It is rather difficult for a non-judicial see any grounds for special lenity, unless it is an extenuation of ce to give a portion of the proceeds to a young woman, and then n a cavalry regiment. It is not very complimentary to y to imply that a criminal has shown such a knowledge of his proper position by joining it that the Judge feels upon to almost apologise for passing any sentence at all, and in vindication of the course he is taking, that "still there is a within it *will not do to depart*," and he accordingly indicts a term disconsent. Every one will agree with the learned Judge that, as happens to be a law against obtaining jewellery under false pretences, it *not do* to treat it as if it did not exist; but many will wonder why essary to urge this plain proposition as a reason for passing sen- a criminal whose case had no other mitigating circumstances than ing handed over part of the proceeds of his crime to a female, and attempted to evade the hands of justice by enlisting as a soldier.

ANESTHESIA BY COLD IN SURGICAL OPERATIONS

(To the Editor of the ILLUSTRATED LONDON NEWS.)

Sir,—The experience of the last few weeks has proved to my complete content that local anæsthesia can be obtained by the benumbing influence of cold without resorting to the administration of chloroform, which by its many powerful renders insensible the system generally, and occasionally produces fatal effects to which almost every surgeon can bear testimony. I applied the ice in several cases, in both hospital and private practice, and in every instance the success was evident, the patient when blindfolded unconscious of the use of the knife. It affords me great pleasure to confirm the statement of Dr. Arnott upon this interesting subject, and to draw the attention of surgeons, both at home and abroad, to this agent, whereby we can be freed from the pain which attends many every-day operations usually called upon to treat with the knife, and reserve chloroform for those cases where either the duration of the operation or the depth of pain requires the employment of that potent agency

I am, Sir, your obedient servant, THOMAS WAKLEY, F.R.C.S.

Regent-street, Feb., 1855

CAMP OF THE HIGHLANDERS.—There was a wind that would ally deprive, if wind could do it, any number of rats of their ir bed-days. Anxious to see what things were like up on the heights Balaclava, I started, with my gun on my shoulder, through the ness the hill, knee-deep in snow, and after a futile shot or two at ous old vultures, and stately eagles, and some more fortunate at "blue rocks," scraping the snow off the points of the cliffs, I in the camp of the Highlanders, several hundred feet below the h position of the Rifles, that I had visited on Monday last, and a hearty invitation to stop to dinner, and rest for the night. Oh! Caledonienis," "Pictus," "Memor antique virtutis," or any of spirited Gallic gentlemen who are fighting about lions rampant ottish rights, and the garb of that respectable person, Auld Gael, for one moment what their countrymen are like as they face this ld winter, "how shaned they would be" of their kilt and pulling cking declamation! All such things are clean gone, and if liant Highlanders ever wear the kilt now *'tis for punishment!* slow-lived breeks and blanket-gaiters, and any kind of s over them, are the wear of our Scottish Zouaves, though, in oth, they are no more like Zouaves, except in popular modern ery, than they are like Dutchmen *à la* Rip Van Winkle. The fact m the weather the folds of the kilt over the loins are oppressively r distressing—in cold weather, as long as a man is taking active the kilt is bearable, because it keeps the stomach, and thighs, warm, and the small space between the fall of the kilt and be- of the stocking is protected by the vigorous circulation; but if a kilt is knocked on a hillside of a cold night he would be an or the Humane Society next morning. Over the waste of snow, down from the heights towards the valley of the Tchernaya, I se those indefatigable Cossacks riding about through the snow over icket-ground, and a few waggons were stealing along from rie's Farm towards the heights of Inkerman. A vidette or two aking up and down along a ridge, keeping a bright look-out on rements, and through the glass we could see them flapping their under their armpits, as London cabmen do of a cold night, when for a fare. Towards Baidar pickets of the same active but cow- entry were moving along to keep themselves warm. We had ary posts advanced against them. Why not? Because we send any out conveniently. Those rugged ruffians, in in coats and fur caps, mounted on ragged ponies, with coal and coarse iron tips, are able to hold ground in drifting snow and ambles which our cavalry, such as they are, could not face.—*Letter Balaclava. Jan.* 19

WE HAVE RUINED BALACLAVA. Look at Balaclava, that le and idyllic village, with its ruined castle and inappreciable ar Balaclava, which was all order and cleanliness when we from the Russian barbarians, and which, with its neat cottages, ns covered with creeping plants and studded with flower-pots, tall poplar-trees and luscious orchards, presented so enchanting to the people in England laughed at the descriptions I and others so much tranquil beauty, because the pictures were considered ged. Look at Balaclava now, after three months' occupation by ish army, and that army, too, the most refined, orderly, and well- ted that ever went forth to fight our country's battles on foreign ; ever since we came we have done all to destroy, nothing to rebuild, t, and promise. We have turned the streets into quagmires and made them as nearly as possible impassable, we have crowded our barricading them with huge blocks of stone, which those in con- with the work put on one side, to the inconvenience of every one ent. The Turks of Gallipoli and the scum and refuse of the Levan- ns men at Pera bestow more care on their abominable streets than in those of our Majesty's town of Balaclava. After three months' ion the harbour is a cesspool, and the beach a bottomless pit full of bominations—a putrid sea of black fetid mire, exhaling a poisonous [illegible] [illegible] [illegible]

FROM THE EXHIBITION OF THE PHOTOGRAPHIC SOCIETY.—(SEE NEXT PAGE.)

"THE MOTHER."—PAINTED BY D. W. DEANE.—FROM THE EXHIBITION OF THE BRITISH INSTITUTION.

OPENING OF THE BRITISH INSTITUTION.

THERE seems to be but one opinion about the Exhibition of Pictures by Living English Artists opened to the public on Monday last, at the British Institution: that it is one of only very average merit. It is true that artists and connoisseurs did not expect much, nor has expectation been disappointed.

Of the forty Royal Academicians only four have condescended to send pictures: Mr Lee, Mr Creswick, Mr A Cooper, and Mr Jones. Mr. Lee's small landscape (No 34), "A View on the River Awe," will not sustain his reputation. Mr Creswick's single unassisted picture (No. 2), "An English Cottage Home," has many of his characteristic excellences; and his landscape, in which he has wrought most happily with Mr Anstell, has every charming quality of his pencil. Of Mr Cooper and Mr. Jones it is not necessary to say anything.

Of the twenty Associates of the Royal Academy, five are exhibitors, viz.—Mr. E. W. Cooke, Mr. Sidney Cooper, Mr. F. Goodall, Mr. Frost, and one sculptor, Mr. Weekes. Mr. Cooke gives us a taste of Venice and Holland, each on a small scale; Mr. Cooper reproduces his favourite cows; Mr. Goodall contributes a "Cottage Interior;" Mr. Frost, a "Sea Nymph" (a little gem in its way); and Mr. Weekes, a statue in plaster, called 'The Young Naturalist."

If the works are not particularly excellent this year, the prices certainly are moderate. In a catalogue of more than five hundred pictures, only sixteen are priced at more than £100. The highest price is £262 10s., modestly asked by M. T. M. Joy, for one of the very few historical pictures in the rooms. There is merit beyond Mr. Joy's usual pitch in this picture (No. 138)—"The Death-bed Interview between Queen Elizabeth and the Countess of Nottingham." The story is well told, and the accessories carefully arranged and painted.

Some notion of the general appearance of the exhibition may be formed from the places of honour assigned to certain pictures. Over the fireplace in the north room (long dedicated to choice cabinet pictures), Mr Sidney Cooper is seen, supported on one side by Mr Creswick, and on the other by Mr Lee. In the centre of the same room, on the east side, a large and clever landscape by Mr. Hering hangs with a female head by Mr Sant on one side, and a female rustic by Mr. Inskipp on the other. Opposite, on the west side, is a noble landscape by Mr. T Danby, "The Troubles of Youth" (engraved in our present Number), with a scene from "Gil Blas," by Mr. Selous, on its left, and a large Fruit piece, with a Peacock, by Mr. Lance, on its right.

Stepping into the middle room, over the fireplace is the long and clever landscape with deer the joint production of Mr Creswick and Mr. Anstell, and facing it, and deservedly in the place of honour, is the interior of an artist's Studio, by Mr. Wingfield, one of the best pictures from his pencil that we remember to have seen.

"ON THE GRAND CANAL."—PAINTED BY J. HOLLAND.

In the south room, and over the fireplace, is the sweetly-conceived and sweetly painted picture by Mr D. W. Deane, No. 470, "The Mother," engraved in our present Number. Another picture by the same artist, and of the same touching stamp, is called "The Angel's Whisper," from Mr. Lover's well known song. We look upon Mr. Deane as an artist fast rising to distinction in a walk of art peculiarly English.

Landscapes of course abound, and among the best are those contributed by Mr. T. Danby, Mr Henry Jutsum, and Mr. J. Middleton. Mr. Danby makes his appearance once more, and Mr Copley Fielding exhibits a sea in repose, with much of the charm of foreground and detail which he gives to his best water-colour drawings.

Another unexpected contributor is Mr George Cruikshank, who, in No 190, "A Runaway Knock," has told a common incident with all his usual merriment and humour.

We have often had occasion to remark that no one understands Venice better than Mr. Holland. Mr Ruskin does not treat it more poetically. He catches its architecture with a masterly hand, and gives us its climate with a glowing pencil. His "View on the Grand Canal" (No 147), engraved in our present Number, is a capital example of his art.

Among the most distinguished exhibitors we must mention Mr. G. Smith (who paints most ably in the manner of Mulready), Mr. Hemsley Mr. Sant, Mr. Glass, Mr. Gale, Mr. Burchett, and Mr. Underhill. We shall have something to say about them all when next week we shall continue our pictorial illustrations.

In the Sculpture there is nothing better than Mr. Munro's clever group called "Child Play."

EXHIBITION OF THE PHOTOGRAPHIC SOCIETY

[SECOND NOTICE.]

We this week engrave the sketch of "Geneyra," which affords evidence of the application of Photography to purposes of high art. There are five specimens sent by Mr Lake Price, which are fine pictures made up by the artist to illustrate varied subjects. The one which we have selected illustrates the story of "Geneyra, as told by Rogers in his "Italy:"

> As when the Pard that hath by the worms,
> Hunters, carry'd his wounds, Dread,
> Lies down and licks his gory
> Within that chest but she concealed herself.
> Flattering with joy, the hapless of the happy,
> Weeping, rejoicing at once, lay in ambush there
> Fashioning how to die ever.

Hitherto it has been more with the business of the engraver that Photography has appeared to be in rivalry—here, however, the domain of the artist is threatened. The great commercial principle of "unrestricted competition," it would appear, is to be applied to art. We rejoice to witness results at once so pleasing and so promising, and we feel confident, from the success of this first essay, that at the next exhibition of the Society we shall have to award our praise to still finer and more artistic productions of the photographic artist.

"THE TROPHIES OF YOUTH."—PAINTED BY T. DANBY.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Sir James Graham is suffering from a painful disease, which has rendered a surgical operation necessary. The operation was successfully performed by Sir Benjamin Brodie, and it is hoped that the right hon. Baronet will soon be convalescent.

The French Court has gone into mourning for three weeks on account of the deaths of the Queen Dowager and the reigning Queen of Sardinia.

The Queen of Naples was safely delivered of a Princess on the 21st ult.

The Queen of Spain has conferred upon Mr. George Mould, railway contractor, the Order of Charles III., as a recognition of his enterprise in initiating the railway system in that country.

The Court Almanack of St. Petersburg for 1855 includes for the first time since 1834 Queen Isabella amongst the reigning Sovereigns of Europe.

Lord Westmoreland had an audience of the Emperor of Austria on the 25th ult., to deliver an autograph letter of the Queen.

The Count and Countess de Chambord, now in Venice, have open all their magnificent saloons; but they have fewer French Legitimists at their receptions than in former years.

The Austrian General Count de Crenneville, who is charged by the Emperor of Austria with a military mission to the French Government, has arrived in Paris, and has had an audience of the Emperor.

The Northampton Town Council have unanimously voted an address of congratulation to the Earl of Carlingan. Lord Cardigan's tenantry are also getting up an address to the noble and gallant soldier.

The Duke of Modena has returned to his duchy, after having passed some days with his sister, the Countess de Chambord.

The Right Hon. the Speaker of the House of Commons gave his first Parliamentary dinner on Saturday evening, at his mansion in Eaton-square. The guests on this occasion consisted of the Ministerial members of the House of Commons.

The Grand Duke of Saxe Weimar has invested the Marquis de Ferrière le Vayer, recently appointed French Minister at Stuttgard, with the grand cordon of his order; and the Duke of Saxe Coburg Gotha also presented that diplomatist with the grand cordon of his order.

General La Marmora, who will command the Piedmontese army destined for the Crimea, is expected in Paris, to organise his plans in common with other Military Commissioners of the Allies.

Count Riverol, who is to assist in the organisation of the services of the Piedmontese army, arrived at Constantinople on the 28th ult.

The late Commander-in-Chief in the Black Sea, Vice-Admiral Dean Dundas, C.B., left Paris on Monday morning, and arrived at Dover in the new French and English mail steam-packet *Queen* in one hour and a half.

Changes in the Spanish Ministry are still looked for. M. Olozaga is spoken of as likely to be the new Minister of Foreign Affairs.

Count Pralormo, the Piedmontese Envoy at Rome, has received letters of recall.

A public banquet in honour of the Marquis of Westminster, and in celebration of the erection of the new Market-house, Shaftesbury, which has been erected entirely at his Lordship's expense, took place last week in the building referred to.

The Princess Gortschakoff, wife of the Russian General of the Army of the South, has left Warsaw for the head-quarters of the army in Bessarabia.

A Swiss paper states that the English Government has offered to the Federal Colonel Bontems the rank of Lieutenant-General of the Foreign Legion, and that he has accepted the appointment.

M. Auguste Portalis, who was Procureur-General at Paris after the revolution of 1848, and Vice-President of the Constituent Assembly, died three days ago at Plombières (Cote d'Or), after a brief malady.

Charles Robert Scott Murray, Esq., of Danesfield, Berks, has been made by the Pope a *Commendatore*, or Knight Commander of the Order of Pius e Saint Gregory the Great.

M. Sauvage, of Havre, whom the French represent as the inventor of the screw propeller, has become insane.

A statue of Charlemagne in white marble by M. Lévell is to be erected in the open space in front of the College of France.

Miss Harriet Martineau has lately been giving a series of lectures in the Lake districts, illustrative of what she considers dangerous to the peace and well-being of the world.

M. Foyatier, the sculptor, whose fine statue of Spartacus in the garden of the Tuileries has been always so much admired, has finished an equestrian statue of Joan of Arc, ordered for the city of Orleans.

The Department of Science and Art of the Board of Trade have formed a small museum of models, which is about to be sent in succession to the different local schools in connection with that department.

Miss Catherine Hayes reaped a rich harvest in Sydney ere she left that city for Melbourne—some £7000 from nine concerts, besides presents of plate and jewels.

A personage belonging to one of the highest families in Portugal, who desires to preserve a strict incognito, has placed 10,000 bottles of port wine at the disposal of the French Government for the Army in the Crimea.

The *Sheffield Iris* (the name of the paper once edited by James Montgomery) has been revived as a weekly paper.

Intelligence which plies between Alost and Brussels has been placed on a sledge, and has performed its journey with great celerity.

The Austrian Government is at present employing 12,000 men, under the direction of military engineers, in executing a railway from Dembica to Rosohina, to join the Warsaw line.

The Leeds subscriptions to the Patriotic Fund now amount to £12,800.

By the last advices, about £4000 had been subscribed at Melbourne for the Patriotic Fund.

A new process has been invented in Birmingham which makes bricks nearly as hard as stones. One of the new bricks sustains a weight of 2625 lbs.; common hand-made bricks break at 640 lbs.

The Swiss Federal Council has reduced the import duty on wrought or sheet iron worth 28f. to 36f. the 100 kil., from 5f. to 1f. 50c the 100 kil.

A number of the poor women in Skye are at present engaged in fulfilling a Government contract for socks and stockings.

Bread is now nine times the ordinary price in Egypt, in consequence of the European demand for grain.

The inhabitants of Seville have just sent to the French soldiers in the Crimea a hogshead of sherry, purchased from the proceeds of a subscription opened for that purpose.

There are now nearly 10,000 paupers in Norwich, double the number receiving relief at the corresponding period of last year.

A very large contract has been entered into for English hay and oats—a sufficient supply for 5000 horses for six months—for the Crimean campaign. No Scotch or Irish hay will be taken.

The Dissenters of Kettering rejected a church-rate lately, and the Churchmen have retaliated by refusing a grave.

A new college has been founded at Rome under the special protection of the Pope, who has just presented the establishment with a very valuable set of instruments and apparatus for natural philosophy.

A slight change is in contemplation in the uniform of the French regiments of the line. The collars are all to be yellow, and the skirts of the coat will be lengthened so as to come a little below the knee.

It is rumoured that the Hornsey accident has or will cost the Great Northern Railway Company as much as £20,000.

There were, last week, 705 inmates in the Leicester workhouse, a greater number than has been known since the house was built.

There is great suffering in India from the high price of rice. At Madras it has led to rioting, and quelled by military force, after considerable damage had been done. In Ceylon mothers have sold their infants to obtain the means of buying food.

The Panama Railroad, connecting the Atlantic and Pacific Oceans, which is hitherto attracted but little notice in England, is now completed, and at this date the trains are probably running through from sea to sea.

In Lower Canada the farmers are complaining of the want of snow, the covering being thought insufficient to keep the autumn-sown grain in a proper state for germination.

In the Assembly at Albany a bill has been introduced for the suppression of gambling, particularly policy-playing.

A great stimulus has been given to building in Wolverhampton by the Freehold land societies. It is calculated that £150,000 has been already subscribed for this purpose.

To [illegible] payments that are now in Canada two pence (Currency) Allowed per mile.

LITERATURE.

CURIOSITIES OF LONDON: Exhibiting the Most Rare and Remarkable Objects of Interest in the Metropolis: with nearly Fifty Years' Personal Recollections. By JOHN TIMBS, F.S.A. Bogue.

Here is a clever book on a subject that is always interesting and always new: here is a well-filled volume on a topic that is inexhaustible, here is a happy title happily carried out: in a few words, a volume on London that will live.

From the time when the "Curiosities of London" was first announced we have looked forward to its publication with very great interest. This was due to its author; for Mr. Timbs, by his "Year-books of Facts" and other works of a like nature, has earned for himself a well merited name for that skill in gathering, and painstaking accuracy in recording, facts which are so essential to the success of a work like the one before us. Mr. Timbs lays claim to nothing more than diligence: but more may be safely accorded to him. He has exhibited great tact in grouping his materials: though we are at times inclined to think that he has been too much in love with little matters, and occasionally overburdened his pages with minor materials, but still, we must add, with facts.

In a brief and appropriate preface Mr. Timbs informs us that this work has been twenty-seven years in hand. By this he does not mean that it had been so continuously, and to the exclusion of other labours, but that his "pleasing theme" has been constantly before him, and that he has seldom allowed a day to pass without adding something of moment to his materials:—

Twenty-seven years since (in 1826) I wrote in the parlour of the house No. 5, Crane-court (then a publisher's), the title and plan of a volume to be called "Curiosities of London;" and the work here submitted to the public is the realisation of that design. I then proposed to note the most memorable points in the annals of the metropolis, and to describe its most remarkable objects of interest, from the earliest period to my own time—for the Present has its "Curiosities" as well as the Past. Since the commencement of this design in 1826—precisely midway in my Lifetime—I have scarcely for a day or hour lost sight of the subject; but, through a long course of literary activity, have endeavoured to profit by every fair opportunity to increase my stock of materials; and, by constant comparison, "not to take for granted, but to weigh and consider," in turning such materials to account. In the labour I have been greatly aided by the communications of obliging friends, as well as by my own recollection of nearly Fifty Years' Changes in the aspects of "enlarged and still increasing London."

The plan of the work is in the main alphabetical, with a sub-alphabetic thus Piccadilly is treated entire with the streets and turnings from it, such as Berkeley-street on one side, and Duke-street on the other, in the strict order of the Alphabet; while to the whole work is added a really useful Index, so essential to a work that deals in facts, and facts alone.

It is not as a library companion alone that Mr. Timbs's "Curiosities of London" will be found of real value, but as a strict guide to the foreigner and to the Londoner as well, both of whom will find at every turn the very information they require, with much that they will be glad to know on points connected immediately and even remotely with their inquiries. Mr. Timbs has a surprising and happy knack of bringing points of importance from remote corners into broad daylight. Here is an example from the very first page of the book of condensed and useful information:—

ADELPHI, THE.

A series of streets in the rear of the houses on the south side of the Strand, reaching east and west from Adam-street to Buckingham-street, and facing the Thames on the south—a grand commencement of the architectural embankment of the river in 1768. It is named Adelphi (ἀδελφοι, *brother*) from its architects, the four brothers Adam, who built vast arches over the courtyard of Old Durham-house, and upon these erected, level with the Strand, *Adam*-street, leading to *John*, *Robert*, *James*, and *Wilson* streets; the noble line of houses fronting the Thames being the Adelphi terrace. The view from this spot is almost unrivalled in its metropolis for variety and architectural beauty: from Waterloo-bridge on the east, with the majestic dome and picturesque *campanile* of St. Paul's, to Westminster-bridge on the west, above which rise the towers of London Palace and Westminster Abbey, and the pinnacles and bristling roofs of the new Houses of Parliament.

At No. 5, the centre house of the terrace, David Garrick died, Jan. 20, 1799; and here his remains lay in state, previous to their interment in Westminster Abbey, Feb. 1. Garrick's widow also died here in 1822. At No. 1, Adelphi-street, lived Dr. Knox, the "British Essayist." At Osborne's Hotel, John-street, in 1824, sojourned Kamehameha II., King of the Sandwich Islands, and his sister the Queen, with their suites; the Queen died here of measles, July 8; and the King died of the same disease, at the Caledonian Hotel, on the 14th, their remains lay in native pomp at Osborne's, and were then deposited in the vaults of St. Martin's Church, prior to their being conveyed in the *Blonde* frigate to the Sandwich Islands for interment. The poor King and Queen were wantonly charged with gluttony and drunkenness, while here; but they lived chiefly on fish, poultry, and fruit; and their favourite drink was some cider, presented to them by Mr. Canning.

In John-street, also, is the house built for the Society of Arts by the Adams. In the second floor chambers at No. 2, James-street, lived, for nearly thirty years, Mr. Thomas Hill, the "Hull" of Theodore Hook's "Gilbert Gurney." Hill died here December 20, 1841, in his eighty-first year; and left a large collection of curiosities, including a cup and a small vase formed from the mulberry-tree planted by Shakespeare at Stratford-upon-Avon. Neither of these, however, is the Shakspeare Cup presented to Garrick by the Mayor and Corporation of Stratford at the time of the Jubilee. This celebrated relic was bought on May 3, 1826, for 121 guineas, by Mr. J. Johnson; and by him sold, July 4, 1846, for £40 8s. 6d., to Mr. Isaacs, of Upper Gower-street.

The Adelphi vaults, occupied as cellars and coal-wharfs, in their grim vastness, remind one of the Subterranean Cloacæ of old Rome. Beneath the "dry arches" the most abandoned characters have often passed the night, nestling upon foul straw; and many a street thief escaped from his pursuers in these subterranean haunts before the introduction of gas-light and a vigilant police.

In a work containing what Mr. Timbs's old acquaintance, Sir Richard Phillips, would have called "a million of facts," some slight errors must from fatal necessity be found. But these are so few in number, and of so little real consequence when weighed against the undoubted facts to be found throughout a volume of eight hundred closely and clearly printed pages, that they will be readily pardoned as inevitable to any great design. He is indeed a narrow-minded critic who pounces on a few errors, condemns a whole work thereupon, and does not give its author credit for the real merits of his book. Mr. Timbs's errors in this way are where he has relied others, and has not relied on his own usually happy diligence in sifting truth and adjusting the order of minute events.

Prefixed is a portrait of the author from a capital miniature, to which we called attention in our notice of the Royal Academy Exhibition of last year. As readers are always curious to know what any author who has entertained them is like, we have transferred Mr. Timbs to our present number. (*See the Engraving at page* 125.) He is in a thoughtful mood, and is evidently thinking of old Strype, or older Stow.

SUMMER TOURS IN CENTRAL EUROPE. 1853-54. By JOHN BARROW, Esq. Dalton.

Mr. Barrow left England on the 11th of June, 1853; and, between that time and the 2nd of September, made a very agreeable tour from Calais to Cologne by railway, thence by Stuttgardt and Munich to the Tyrol; crossed the Alps to Padua; and returned by Turin, Genoa, Mont Cenis, and Lyons, to London—"that focus of fog and fashion, thankful to have breathed so much fresh air, and to have been through

many a pleasant place;
Though sluggards down it put an idle chase,
And wonder men should quit their *easy* chair.
The toilsome way had long long long league to trace.
Oh! there is pleasure in the open air,
And health which bloated ease can never hope to share."

Mr Barrow industriously kept up his diary, day by day, and has now published it, with every appearance of being a *bond fide* transcript of running impressions. From his route it will be seen that he lost no time. His motto is "Celer Eundo," and he has carried it out in his go-a-head progress. His little book (which would have been more prosperous at a shilling than eighteen pence, in spite of what "his publisher is obliged to charge") is an excellent guide, not in any way intended to encroach upon the *great* "Murray." It consists in accounts of just the route that a man who can allow himself the time, and a pound a day for his expenses, would wish to make. Mr. Barrow makes several judicious "notes" beyond these merely pertaining to hotels and routes. Thus, at a review at Lille, he says:—

The 17th Regiment of the Line, like all other French infantry, did not seem to care about marching as our soldiers do, and when advancing [illegible] were certainly much *out* of *one* (and step too). They make no attempt even to march with precision. The [illegible] hours, and perhaps if they had a little more of curb [illegible] of which we are [illegible] and we had a little [illegible] their nature case, both [illegible] ld be the better for the [illegible] As it is, the English soldier [illegible] and he knows [illegible] *comme il faut*. What the French would be in possession of the fortress *coute que coute*.

This, written nearly two years ago, might have been lately illustrated; and, in addition, after a review at Lyons, in which he says the French cavalry charged superbly, but failed in Lalling, he bears tribute to the heroes of Balaclava, as follows:—

The most splendid charge I have ever seen for speed, precision, and sudden halt, was in a review of Lord Cardigan's regiment. I shall never forget an incident [illegible] witnessed of the 11th Hussars on Wimbledon Common, as I considered it as the *ne plus ultra* of light cavalry movements, and certainly not to be equalled by any regiment in Europe, and consequently in the world.

And again anticipated a military reform at Coblentz:—

After church saw two Prussian regiments on parade. They look remarkably well, the short frock-coat and handsome helmet having a smart soldier-like appearance in line, or with any body of troops. The helmet cannot be judged of easily, as it gives the notion of being too large and cumbersome, just as a [illegible] seems large and ugly when seen alone, but magnificent in line. They [illegible] I want the moustache to make them look as fine a body of men as any in Europe, and I trust they will adopt it.

His absolute travelling sketches are equally judicious. Who has not sat behind the fellow in the neighbourhood of Como!—

[illegible] [illegible] [illegible] [

NEW BOOKS, &c.

CROGGON'S PATENT ASPHALTE . . . . . ROOFING FELT; INODOROUS FELT, for damp walls, lining iron houses; sold in rolls, 32 inches wide, ONE PENNY per SQUARE FOOT. Also, DRY HAIR FELT, for deadening vibration of steel and deadening sound; and SHEATHING FELT, for ships' bottoms, as sold to the Admiralty and Her Majesty's Dockyards. Specimens and testimonials sent by post. CROGGON and Co., 2, Dowgate-hill.

ROBINSON'S PATENT GROATS, for more than thirty years have been held in constant and increasing public estimation as the purest farinaceous food for infants and the best and most easy preparation for making a pure and delicate GRUEL, which forms a light and nutritious supper for the aged. It is a popular recipe for colds and influenza, is of general use in the sick chamber, and, administered with Robinson's Patent Barley, is an excellent food for infants and children.
Prepared only by the Patentees, ROBINSON, BARLEY, and CO., Purveyors to the Queen, 64, Red-Lion-street, Holborn, London.
CAUTION.—As Robinson's Patent Barley and Patent Groats, desirous that the public shall at all times purchase these preparations in their perfect purity and integrity, have adopted the precaution that every packet is now completely enveloped in the purest tinfoil, over which is the usual and well-known paper wrapper.
Sold by all respectable Grocers, Druggists, and others, in Town and Country, in Packets of 6d. and 1s.; and Family Canisters, at 2s., 5s., and 10s. each.

CAUTION.—For above thirty years S. MORDAN and CO. have been compelled to caution the Public with reference to the various imitations of their RE-POINTED PENCIL-CASE.
The celebrity which this article obtained when the letters patent were first granted has steadily and uninterruptedly increased, and the exercise of the Patentees' functions have been directed to justify this confidence.
In common with every successful invention, the Pencil-case has been that numerous infractions have been produced, and the vendors of such have, in many cases, been . . . . . to a large extent of groats.
Under these circumstances, S. Mordan and Co. are induced to issue this notification, and to request the public, when desirous of purchasing their Pencil-cases, to observe that they are genuine only those on which the words "S. Mordan and Co." are stamped.
As in every town in Great Britain respectable houses are found who have a stock of S. Mordan and Co.'s goods, no difficulty need be experienced in procuring the recommendations offered.
Perhaps the above caution is even more strictly necessary when Cumberland Lead Pencils are purchased for refilling the pencil-cases. Unless these have been most accurately gauged to the exact size of the pencil-point, they will be found utterly useless.
Each box of genuine lead pencils is Warranted. S. Mordan and Co.
CHEAP PENCILS made from the Cumberland Lead, purified by Mr. Brockedon's Patent Process. S. Mordan and Co. have no hesitation in asserting that such pencils are superior to any . . . . . that can be obtained from . . . . . from the . . . . . Mines . . . . . Testimonials . . . . . supply having appeared . . . . . Cumberland Lead pencils made from the only pure lead . . . . . and the public. The highest encomiums have been pronounced . . . . . these Pencils by painters, engravers, architects, engineers, and draughtsmen of the greatest eminence in their several professions, and whose testimonials have been published in detail. The following names are selected:—

Charles Barry, Esq., R.A.	Copley Fielding, Esq., P.W.S.
C. L. Eastlake, Esq., P.R.A.	W. Wyon, Esq., R.A.
E. Bransby Cooper, Esq., F.R.S.	David Roberts, Esq., R.A.
Clarkson Stanfield, Esq., R.A.	J. T. Willmore, Esq., A.R.A.
E. Wedmore, jun., Esq., F.S.A.	H. C. Wilson, Esq., Director, Government School of Design.
S. Prout, Esq., F.S.A.	
Philip Hardwick, Esq., R.A.	

Each Pencil is stamped "Warranted Pure Cumberland Lead. S. Mordan and Co., London."

ROUSSILLON WINE.
During the autumn of 1853, our MR. FOSTER, in journeying through the Pyrenean Wine Districts of France, obtained a fund of most important information, the substance of which we beg to lay before the public, and whose is consistent in the following narrative.
We sincerely hope that, ere many years have elapsed, the Acts of our Legislature will be such as will more fully develope the advantages . . . . . of the Wine districts of Europe in general, and of Roussillon in particular, on such terms as to set each succeeding to augment the consumption of the most wholesome and delightful beverage which we now have the pleasure of tasted at the tables of rich and poor.
In addition to orders for ROUSSILLON WINE, we must earnestly beg a careful perusal of the annexed matter, which is descriptive of the soil, growth, and peculiar treatment of the Vines, and which we think will be found . . . . . in spending and instructive.
The Wine is shipped by us at Port Vendres, in its purestate, as received direct from the Growers, and . . . . . at the present price at which we offer the Wine is 30s per dozen in hampers containing four gazogi, carriage free to all railway stations in England and ports in the United Kingdom. Owing to the . . . . . per cent of profit realised on the Wines &c., supplied by us we shall . . . . . to be distinctly understood that all transactions must be for Cash on or before delivery.
FOSTER and INGLI
Mitre-court, Milk-street, ...
Dozen . . . . . Standard or Natural, 36s . . . . Old Ruby, 42s . . . . bottles, 2s per dozen. Hampers, 1s per dozen.
For supplying . . . . . please to address all orders and money letters with our bankers "Glyn and Co." Per Press, see "Times newspaper Printed lists will be forwarded on application.
Crossing White Heraldings (one of the finest Sparkling Wines), Vintage 1846, at 48s. per dozen. 42 to per three dozen case

Although the merits of the above Wine have hitherto been but little known in England, yet some growths of it have deservedly enjoyed a high reputation on the Continent.

GROUP FROM THE MEXICAN ANTIQUITIES, NOW EXHIBITING IN PALL-MALL.

(*Continued from page* 142.)

contorted human figure, wrapped in the skin of a base animal. This is probably accounted for by what is recorded by some writers on Mexican Antiquities, that at the festivals of some of their idols—that of Quetzalcoatl, the God of Air, for instance—the people used to dress themselves up disguised as beasts and reptiles, and perform all sorts of antics in honour of the idol. In fearful contrast to these mummeries is a group representing a priest in the act of slaying a human victim. The latter is kneeling with his back to the priest, and the lower part of his body covered with the sacrificial veil. The priest has drawn his victim's head and shoulders backward, so as to rest on his lap, and grasps a knife, with which he has just made an incision in the breast, exposing the heart; which on such occasions is taken out palpitating and offered to the idol in whose honour the sacrifice is made. Another object of dread import is the idol supposed to be the Messenger of Death. He sits, in a kneeling position, upon a large skull; his lower limbs appear as if they had been flayed, showing only the muscles, and on his breast are cross-bones. There are two faces—one like a mask, the other a real face, with the lower jaw removed, exposing large lion-like teeth.

The scientific world of Class X. of the Great Exhibition (that comprising Chronology and Music) will find many objects to interest them in the present collection; amongst the most important of which is a circular tablet, or disc, representing in relief the *Tonal poualli*, or solar reckoning of the ancient Mexicans; and another similar disc-calendar, representing only the seasons and months. The Mexican year consisted of eighteen months of twenty days each. They reckoned by cycles of 52 years, and subdivided the months into four periods of five days each. The musical instruments are very funny, comprising pipes, in terra cotta, of the very shape and make of the penny trumpets sold at fairs at this day; rattles exactly of the shape of the "bells" now used in horses' head-gear, and producing the same sound; whistles in the forms of various animals, and, curiously enough, emitting sounds appropriate to the particular animal represented as the owl-whistle, screeching like an owl; and the dove-whistle, cooing like a very turtle. There is also a pipe of shrill sound, like a modern railway-whistle; and—talking of pipes, though not one for musical purposes—amongst the lot is a veritable tobacco-pipe, of most "knowing" form, and of good colouring clay, witness the dye successfully imparted to it by some lover of the weed, and follower—no! predecessor—of the immortal Raleigh.

Having now given a general idea of the features of this interesting collection of Antiquities, we now proceed to give some particular account of the objects selected by us for representation in the engraved group accompanying this article. Following them in the order in which they stand, and distinguishing them by the numbers in the catalogue:—281, is a Snake with a singularly-formed head, and a tail terminating in a whistle;—376, a jug;—131, the God of Silence, personified by a grotesque squatting figure, with a long snout, and a bar or muzzle between the jaws;—125, a seated figure, with a turreted head-dress;—289, a coiled Snake;—152, a large red idol, in a sitting posture, with hands pressed upon the breast; head surmounted by what appears to be a double plume of feathers;—267, a large Vase, standing on four claws or feet. It is remarkable of the indented ornaments upon this vase that they strongly resemble the paintings still to be seen on the rocks in various parts of the American continent, and spoken of in the late work by Squier; and which are supposed to have reference to the worship of the Sun. 396, a Two-handled Vase, supported on three eagles' heads for feet; the face is surrounded by representations, in bold and high relief, of fruits, ears of corn, and cakes, which lead to the belief that this vase served for presenting first-fruit offerings;—522, a Figure, seated on an elevated chair of state, resting on four legs, the two in front being Indians, the two behind animals upright; two snakes form the arms of the chair. The figure has on its head a rayed crown; in one hand it holds a truncheon or baton, in the other an open book, in which is written in Spanish, "Yo soy soy Safurtysty Gobernardo de Santyago Tlaltelolco, 1552." The figure is clothed in rich vestments, and an order is suspended round the neck. The policy of the victorious Spaniards led them, in order to conciliate the feelings of the conquered, to invest the native princes with power and authority, and this there can be little doubt is a portrait of one of the first to whom such dignity was entrusted. The figure is of unmistakable Aztec physiognomy.—311, a Black-banded Tortoise;—404, a Tall Vase, with the figure of an Idol on it, and the mouth something like the beak of a large bird, probably used in propitiating sacrifices;—236, a Model of a Teocalli (*i.e.* House of God) or Mexican Temple, consisting of three stories above the basement; the door is reached by a flight of ten steps: the wide platform on the summit was the place where human victims are sacrificed.—71, a Small Vase of grotesque design, the chief feature of which is a sitting Human Figure without the head, which is represented in relief in the front;—247, an Idol, which has a remarkable resemblance to the stone sculptures of Egypt, the heavy square-formed head-dress being of a similar type to that of various Deities at Thebes and Memphis, an Owl-faced Divinity riding on a Turtle.—368, a Tortoise.

OLD AND NEW BUILDINGS IN THREADNEEDLE-STREET.—(SEE PAGE 137.)

THE ILLUSTRATED LONDON NEWS.

No. 728.—VOL. XXVI. SATURDAY, FEBRUARY 17, 1855. [WITH A SUPPLEMENT, SIXPENCE.

THE PEOPLE AND THE WAR.

CAN we do nothing but make railroads and cotton goods? Are we indeed a nation of miserable bunglers? Are we so demoralised by a long peace so soaked and soddened in the fat of commercial speculation that we have lost the robust and manly virtues of our ancestors? Are we so weak and craven-hearted that the slightest reverse is sufficient to repress our few remaining energies, and to transform us into a rabble of grumblers? Or are we so impatient, so ignorant, and so perverse, that we expect impossibilities, and, being disappointed, find no resource but to vent our useless and malicious spleen against our servants and instruments, demanding a victim somewhere and somehow we do not care whether innocent or guilty—and offering him up without remorse as a sacrifice to our wounded vanity and unreasoning vindictiveness? And, last of all, have we, in the gigantic struggle against Russian aggression, been foiled and beaten, and reduced to a pitiable, if not to a dishonourable, extremity? Surely there is not one of these questions that can be answered in the affirmative. Yet, if a stranger to our habits and idiosyncrasies were to take his opinion of us from the tone of some of the most influential of the newspapers which are supposed to represent public opinion, or from the debates consequent upon Mr. Roebuck's motion, he might be pardoned for coming to the opposite conclusion, and for believing that the day of our glory had departed—that England was no longer the polar star of the nations; that we had neither sagacity in council, nor courage in the field; that we had no allies in the struggle in which we are engaged; and that we, and civilisation along with us, were fast sinking under the blood-stained hoofs of that northern barbarian whom, in an evil hour, we had resolved to restrain and punish.

Our imaginary stranger, however, upon looking a little deeper into the matter, would speedily discover that these gloomy views of our condition had no foundation in truth. He would find that we not only had a splendid cause, but that we had, in every respect the best of it. He would see that we had the firm alliance of France—the only Power that can rank with ourselves in the very front of the world; that we had secured the alliance of Austria an empire which, in case of need, can arm and feed from half to three-quarters of a million of effective soldiers; that our patient diplomacy had checkmated the King of Prussia, whose subjects are already, and always have been, on our side; and that the smaller Potentates of Germany had been reduced to the position of uniting with the armies of Austria, or of being dethroned by their own people; that the secondary States of Europe were gradually making common cause with us; that Sardinia had joined the Allies with a welcome reinforcement; that Portugal was preparing to do the same; that Denmark and Sweden—though slow to move—were moving at last; and that in the early summer, if not in the spring, Russia, on her whole European frontier, and in her most vulnerable points, would be exposed to the simultaneous attacks of numerous, well-disciplined, and energetic foes. He would also learn that we had rendered the naval force of Russia perfectly innocuous—that we had effectually shut up her navies in their only European outlets; that in every battle, even against overwhelming odds, our soldiers had been magnificently triumphant; and that the people at home, whenever they found or made an opportunity to speak their sentiments, were enthusiastic in their approbation of the policy of the war, and demanded nothing of their rulers but to carry it on with the utmost vigour, so as to restrain the aggressor, and secure a durable peace.

Whence then, the stranger might ask, comes the croaking of the press and of the Parliament? And for what class of the people do those politicians write or speak who seek to discourage the war? Not for the lower classes, for their hearts are sound; and from their ranks have emerged the heroes of the Alma and of Inkerman. Not from the upper classes, for they have been prodigal of their blood in the cause, and have exalted by their bravery the name and fame of the aristocracy of England. Is it, then, the middle classes that act the craven, that hate the war, that love nothing but their money-bags, and that raise maudlin, if not treacherous, cries of peace, where there is no peace;—that "would buy a minute's mirth to wail a week," and that would sacrifice the national honour for the sake of a miserable percentage on a running transaction? Such a supposition would be a libel against the brave and generous British nation. Such men unluckily exist among us, as Manchester can bear witness, but they are to be numbered by units, and are repudiated by the great bulk of their countrymen, or tolerated, as the Mormons are—(not without some displeasure, or perhaps disgust)—on the broad principle of religious liberty, that invests the promulgation of the opinions of a Joseph Sturge and a John Bright with as much security as law and opinion allow to those of a Joseph Smith and a Brigham Young.

Yet there has been, it cannot be denied, gross mismanagement in the Crimea. Disease has taken a hundred victims from the ranks of our heroes where the shell and the bayonet of the Russians have but taken one; and a fine army has been decimated by the incapacity of our own officials. But we do not believe that irreparable mischief has been done, or that there is the slightest ground for the discouraging tone which a portion of the press has adopted upon this question. The miseries of the British Army have been exposed to the whole world; but who knows what the Russians have suffered, with all their boasted superiority of management? Nay, who knows what our gallant allies the French have endured? Perhaps, if the whole truth were known, the sufferings of the British soldier have been equalled in the French and surpassed in the Russian camp. However this may be, it is unworthy, to say the least, that despondency should be allowed to enter into the councils or the heart of this nation We have a man at the head of affairs whose name is synonymous—all over the civilised, and many parts of the barbaric, world—with British pre-eminence and power, and who has been called to his present high position by the almost unanimous voice of the

CURLING MATCH AT MONTREAL.—(SEE NEXT PAGE.)

people because of that great name, and because of the universal belief that he will resolutely and triumphantly pursue the policy which made it great. We have victories to boast of where our enemies have none; we have inexhaustible resources; we have incomparable allies; we have a noble cause; we have an invincible determination to win it; and we have the indomitable courage and pluck of our great and noble common people as well as of our aristocracy. What then fails us? Nothing but a better organisation of our Army and Commissariat departments, and the opening up of the higher honours of the military career to the merit and bravery of the humblest soldier. These are the only requisites, and the want of these has been the only subject of the growls of the growlers, and the lamentations and denunciations of our diurnal Habakkuks. They are great tasks, no doubt; and, unless in the presence of danger, it is likely enough that they might never have been attempted.

But, in undertaking this great and urgent reform, let the country take care not to lose sight of the real evil. There is at present a cry against the aristocratic system. That system we shall not attempt to defend. Its doom is pronounced, and it must fall unlamented. But who fostered the aristocratic system? Was it the aristocracy or the people? We say that, however much the aristocracy may have been to blame, the people meaning by the word the men who possess and exercise the right of voting in the election of members of the lower House of Parliament—are not innocent. If the people prefer to send aristocrats to Parliament—and our popular Constitution compels the Minister of the day to choose his colleagues from the members of the Legislature—is it not the people who are primarily the cause of the evil? And is it not a melancholy fact that our small boroughs are venal, and sell their privilege for a mess of pottage; that voters make a traffic of their votes—not for money always—but for money's worth; and that their importunities for places say in the Post-office or the Customs for their worthless and inefficient sons, brothers, and cousins—are daily and nightly inflictions upon the time and temper of the men whom they send to Parliament? These things cannot be denied; and while they exist it is in vain to expect that mere law can lessen the undue preponderance of the aristocratic element in our system of government. Parliament is the fountain-head of our system, and the Parliament can only be what the people choose to make it. And perhaps it will be found that the bunglers in our Commissariat department, or the little "jacks in office," who allow no jurisdiction to compete with theirs, and other officials and sub-officials who have brought our army into peril, and our name into disgrace, are not aristocrats, but the creatures of that corrupt system which foists off poor relations upon the public service, and considers their salaries and emoluments as equivalents for votes at contested elections. Among other reforms, this, which is perhaps the most essential of all, ought to be carefully looked to. It is not only the military and naval but the civil service of the State that requires the strong hand and mind of a man of genius to set them right. No partial reform will suffice. The one depends upon the other, and the country looks to Lord Palmerston and his colleagues to perform the task. When it is accomplished, or in the fair way of accomplishment, our Government will perhaps be able to "organise victory." In the meantime victory lags—and the national fame is sullied.

CURLING MATCH, MONTREAL.

CURLING is a favourite sport in Canada; and one of the great fields of ice on which it is played is the river St. Lawrence. The winter cold is often very intense; when the frozen surface presents a very animated picture of curlers, skaters, and spectators. Towards the middle of last month a grand Curling Match, or "Bon Spiel," as it is called, was played on the St. Lawrence opposite Montreal; when Mr Duncan, the clever artist of that city, made a spirited Sketch of the wintry sport. The day on which the match was played was intensely cold, the thermometer being about 20 degrees below zero. There were, notwithstanding, at one time, about 500 players and spectators. The ice was good, and the various games were keenly contested.

Independently of the Illustration upon the preceding page affording a vivid picture of the sport, it presents a good view of the Lower Town, along the river, and the principal trading quarter; and we obtain a glimpse of some of the fine buildings of the Upper Town. Montreal, like the capital of the mother country, has its Nelson memorial—a colossal statue of the great hero, placed upon a Doric column. It is shown upon the right of the Illustration. The twin-towered Gothic edifice, rising from the city upon the left is the Cathedral.

The Canadas have recently remitted to England a noble contribution to our Patriotic Fund; and by the last mail we learn that a concert has been given at Montreal in aid of the Fund; the great City Hall was crowded to excess; about 6000 persons were present, and the amount received was about £400. This indicates a healthful sympathy with the mother country which it is highly gratifying to have to record.

GENERAL FEBRUARY.—Since I wrote last the weather has been delightful: breezy, sunny days, and nights of astounding mildness at this season of the year, have done much to reconcile the troops to the winter campaign. It is said that, if General February is as harmless as General January, the Czar will see small results from the efforts of his great commanders. Whatever General February may be like, certain it is he will find our troops in a better condition to cope with him. Balaclava is inundated with warm clothing, from public and private sources, and the men that have any warmth left in them are not likely to lose it in a hurry. Wooden houses, too, are rising up in every direction, even in the divisions in front, whither the component parts of each house are dragged, tied, in the fashion of Pera, to the sides of a horse, or carried up on the backs of soldiers sent down for that special service. The late arrivals of bât horses, and mules too, hold out a hope of full and regular rations to the troops in front. The men, properly fed, clothed, and housed, must soon pick up; and disease, in so far as it is caused by want and exposure, will claim a lesser number of victims than has hitherto been the case. But there is one point which cannot too strongly be pressed upon the attention of authorities at home and in camp. Unless energetic measures are taken to cleanse Balaclava and the intrenched camp from the abominations which have been allowed to accumulate during an occupation of four months, early spring, with its fever season, will do quicker and deadlier work among our troops than has been done by all the rigour of winter. We should be free of fresh graves, old filths, and the rotting carcases of thousands of horse before the advent of that trying season. Oh for Tom Taylor and a detachment of Board of Health men to superintend the sanitary police of the camp! Col. Harding, the new Commandant of Balaclava, has up to the present done little or nothing to cleanse this town of muck and mire. It is asserted, though it is hardly to be believed, that he finds difficulties in the way of procuring fatigue parties for the work to be done.—*Letter from Balaclava, Jan. 29.*

RUSSIAN WHEAT.—The quantity of wheat exported from ports in the Sea of Azoff—viz., Taganrog, Mariopol, and Berdiansk—was, in 1853, 1,868,870 qrs., and in 1852, 1,299,366 qrs.—an excess in 1853 over 1852 of 561,473 qrs. The total quantity of wheat exported from European Russia in 1852 was 3,173,597 qrs.

IT is a curious fact that the Peace party in the Camp—if ever that expression can apply to soldiers—consisted chiefly of men who had just come out; while those who have gone through the whole of the campaign could not reconcile their minds to so abrupt and unsatisfactory a termination of their dangers and privations.

FOREIGN AND COLONIAL INTELLIGENCE.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

A return of the intense cold, accompanied by a heavy fall of snow, makes us all sufficiently miserable. Despite every attempt to clear the streets, the mixture of half-frozen snow and mud renders them in a deplorable state, which can only be made worse by the arrival of the thaw.

There is much illness in Paris, partly resulting from the state of the weather, which produces inflammation of the chest, influenza, and every variety of malady that has its origin in cold. People, nevertheless, dance, dine, and amuse themselves as they are wont to do ere Carême closes Carnival.

If the present temperature continues, the gaieties of the Mardi Gras are likely to prove a dance of death to many of the hapless masques who, at this period, regardless of the warnings of the thermometer, appear in the procession of the Boeuf Gras and elsewhere in costume not fit for midsummer. Conceive the Corps, the Cupids, &c., who, when the thermometer is but little above zero, and that honest people can't succeed in keeping themselves warm within any given number of cloaks and paletots, perambulating the streets "from morn to *snowy* eve," bare-armed, bare-necked, and bare-headed, fortifying themselves against the cold by profuse libations; the result of which system has, on many occasions, produced raging inflammation, which has carried off the victims within the twenty-four hours, to say nothing of the maladies which then contracted have destroyed their constitutions, and sooner or later proved fatal.

The ball at the Tuileries went off very brilliantly. The Corps Diplomatique were not received separately, nor were there any presentations before the commencement of the ball (two innovations on the usual routine. • The Pope's Nuncio alone was honoured with a special reception. The ball opened with a quadrille, in which the Empress accorded her hand to the Prince Napoleon, who, extremely thinned by his recent illness, and ornamented (?) with a vast beard, was so singularly altered that his identity has since been the subject of various warm discussions in the *salons* of the Faubourg St. Honoré. The Princess Mathilde danced with Lord Cowley, Lady Cowley with the Prince de Chimay, the eldest daughter of the Queen Christina (on whose approaching marriage the Emperor took this occasion of personally congratulating her mother) with the Maréchal Magnan, the Princesse d'Essling with the Duc de Rianzarès, &c.

The Emperor did not dance during the evening, nor did the Empress take part in anything but the official *contre dance*. For the edification of the *belle moitié* of our readers we give a description of her Majesty's toilet. A gown of white embroidered tulle, with a number of narrow flounces; in the hair a white aigrette, the bandeaux turned up at each side with a rose and foliage in diamonds: ornaments of emeralds and brilliants. At twelve the Emperor conducted the Queen Christina to supper, the Prince Jérôme giving his arm to the Empress; and at half-past one their Majesties retired.

Considerable regret is felt in Paris at the recall of Vely-Pacha, who is very popular here. His farewell ball, which took place on Saturday, was very magnificent, but the pleasure of the guests was much impaired by the enormous number of persons invited, which made the crowd so intense, that some got no further than the antechamber, and then retired, deeming it almost hopeless to wait till the space should be sufficiently cleared to reach the *salons*.

Another grand ball is to take place on Saturday at the Hôtel de Ville. So numerous have been the applications for invitations—they have exceeded fifteen thousand that the Préfet de la Seine has been obliged to notify that he has already been compelled to refuse the applications of some of the guests he should have had the greatest desire to receive; and that, in consequence, it is impossible to grant further invitations on any pretext whatsoever.

Mdlle. Rahel again quits the stage definitively, and is about commencing a new series of positively last appearances previous to going to fulfil her engagement in the United States, which is to last nine months; after this the great tragedian bids us an eternal adieu. *Consolons nous*—we have heard the same story too often to break our hearts about it.

AMERICA.

The steam-ship *Canada*, which left Boston on the 31st ult., arrived at Liverpool on Monday night.

The Senate and House of Representatives had adopted a joint resolution authorising the President to give notice for terminating reciprocity treaties of commerce and navigation, in cases where the terms stipulated for their continuance have expired, with such Powers and States as in his opinion manifest illiberality to the United States. The French Spoliation Bill had been discussed and passed. Authority had been given to dispatch a naval force to the relief of the Grinnell Arctic Expedition.

The New York authorities had notified to the Sardinian Vice Consul that they would not permit the landing of some convicts who were said to be on board a frigate of that nation from Genoa.

The *George Law* had arrived at New York from California, with the mails of January 1. There had been a revolt at the California state prison, which, after a serious fight between the prisoners and the keepers, resulted in upwards of twenty of the former making their escape.

San Francisco had been visited by a violent rain storm, and a large amount of property was damaged. The mines were suffering from want of rain.

Letters from Cuba, to the 23rd ult., state that important municipal reforms had been effected, and it had been proposed to revive the old system of representation to the Spanish Cortes.

The Mexican journals inform us that several successful attacks on the insurgents had been made by the Government troops, and that the revolution was said to be crushed in OAXACA.

BRIGHTER PROSPECTS.—The weather has of late taken a favourable turn for our troops. It is moderately cold at night. The days are clear and sunny. The wind is low, and incoming vessels report fair average passages. Among the late arrivals was the 14th Regiment, and the *Jason*, with a fresh load of bat horses from Constantinople. Mules, too, the finest that were ever seen with the army, have arrived from Gibraltar, and were landed yesterday, accompanied by Spanish drivers, who, it is to be hoped, will know how to take care of these invaluable animals. This opportune accession to our transport cannot fail to make the service more efficient; and as good will is certainly not wanting in the commissariat, though method may be, there is every reason to believe that all our troops in front will, from this date, receive full rations regularly. In this respect our prospects are certainly brightening, for the mildness of the weather, the warm clothing, issued in abundance to our troops—in such abundance, indeed, that it seems the quantity must make up for the delay—and the full rations which may henceforth be expected, must tend to lessen the amount of mortality, which of late became rather alarming. It remains to be seen whether the new arrivals of mules and horses will enable us to take up the wooden houses; not an easy task, considering the heaviness of the materials and the state of the roads.—*Letter from the Camp, Jan. 28.*

PLEASURE TRIP TO SEBASTOPOL.—A prospectus has been in circulation in Paris for some days for a pleasure trip to Sebastopol at the commencement of the spring season. The traveller is to start from Paris and proceed to Marseilles, thence to Constantinople, next to the Crimea, afterwards to Egypt, and, finally, home by Algeria. The vessel fixed on for the tour in the East is the *Isabelle*, steam pleasure-yacht, under the neutral colours of Tuscany. The charge for each person is to be 1200f. (£48). The trip is to last three months, and only ten passengers are to be taken.

THE GAS COMPANIES OF PARIS.—The Municipal Corporation of Paris not having consented to accept, on account of their insufficiency, the offers made by the united gas companies to lower their prices on having their contract prolonged by the city to 1863, the Emperor has ordered experiments to be made at Sèvres, at works established for that purpose on grounds belonging to the civil list, in order to ascertain the exact cost at which gas can be supplied. The experiments are carried on under the direction of an eminent member of the Institute.

THE WAR IN THE CRIMEA.

Intelligence from Sebastopol, through Russian channels, has been received up to the 6th inst. At that date the brief report was, "nothing of importance had occurred." This disposes of the Bourse rumour regarding a Russian victory, and the taking of Eupatoria. Our own telegraphic despatches, viâ Marseilles, are to the 3rd inst. from the Crimea, and to the 5th from Constantinople. The Russians had made sorties on the 1st and 2nd February, but are said to have been driven back with great loss by "young French volunteers." The 9th French Division, under General Bosquet, was to sail from Constantinople for the Crimea on the 6th inst. With this addition, and the 8th Division, which had landed at Kamiesch a short time before, it is estimated that the French will now muster 75,000 bayonets.

The statements regarding the strength of the British army now before Sebastopol vary so widely that it is difficult to give even an approximate return. Mr. Gladstone affirms that there are not less than 30,000 effective English troops there. Other accounts say that there are not more than half that number. A letter has been received in Paris from one of the French officers attached to the staff of Lord Raglan, which states that "the destruction of the English troops has been vastly exaggerated, and that upwards of 20,000 good men can yet be paraded in the field." Such a statement from one of General Canrobert's staff would be more worthy of credit. Some of the French papers estimate the total effective force of the Allies at from 80,000 to 90,000. That of the Russian army of observation in the neighbourhood of Sebastopol is not much greater, if we are to rely upon the following estimate contained in a letter from Constantinople of the 29th ult.:—

The Russian army in the Crimea has just received large reinforcements. It now consists of the garrison of Sebastopol, supposed to be 30,000 strong; of the army of observation, which occupies very strong positions to the north and east of the camp of the Allies, and which communicates with Sebastopol, though with difficulty, of detached divisions in the environs of Bagtchesarai and Simpheropol, which may be concentrated in a few hours, so as to oppose to the besiegers a mass of 100,000 men; of a corps of from 25,000 to 30,000 men fortified in the positions of the Alma, in order to close the road to Sebastopol against Omer Pacha, and to cut off all communication by land with the Allied army; and lastly, of about 50,000 men who are encamped at the entrance of the isthmus to protect Perekop, observe Eupatoria, keep up the communications of Prince Menschikoff with Russia, and be ready to go wherever they may be required.

The *Military Gazette* of Vienna states that,—

From the 25th to the 26th Jan., the fire opened upon Sebastopol had been very brisk, especially from the six batteries erected by Admiral Bruat near the Bay of Chersonesus, which are armed with fifty pieces of the largest calibre. The defensive barracks of the Russians, on which the fire was especially directed, had to be evacuated. Since then the French have constructed some earthworks on the heights which overlook the cemetery, and shells thrown from that point upon the town cause much damage to the Russians. In general, the cross fire of the batteries of Cape Chersonesus, and of the trenches opposite the southern fort, is daily gaining in strength. The Russians cannot any longer operate with much effect on that side with their heavy artillery because the French works are most advantageously situated.

Meanwhile the Russians in Sebastopol are busily preparing for the threatened assault. "It is impossible," says one correspondent, "to speak too highly of the apparent solidity, workmanship, and finish of the lines of formidable earthworks, armed with about eighty heavy guns, which the Russians have thrown up to enfilade our attack and to defend this position [to the rear of the round tower of Malakoff], which is, indeed, the key of their works in front of us."

Letters from General Niel, dated "Camp before Sebastopol," have been received in Paris. They state that the condition of the French army is satisfactory, and that he had found the English army in a better state than he had expected.

Omer Pacha was to leave Varna on the 6th of February for the Crimea, accompanied by Colonels Dieu and Simmons.

THE TURKISH EXPEDITION TO THE CRIMEA

When this expedition was first announced, it was said that the whole of the Turkish troops—some 30,000 or 40,000 altogether—would be landed in the Crimea by the middle of last month. But the transportation of so large a number of men, with the requisite stores and ammunition, across the Black Sea, at this inclement season, is not so easy a task. By letters from Varna of the 28th ult., we learn that not more than half the number had sailed at that time, and, at the rate the embarkation was proceeding, it was thought that the whole force would not have sailed in less than a fortnight from that time. One correspondent gives the following satisfactory account of the Turkish army:—

The men, when they embark, take a month's provisions with them, so as to be on their arrival at least independent of the commissariat. But the illusions about abundance of provisions in the Crimea—at any rate, in the small part occupied by the Allies—have been too dearly paid for already not to make Omer Pacha, who is by nature rather prudent, anxious about the commissariat department. Accordingly, stores have been erected both at Baltschik and Varna, to which large quantities of wheat, flour, butter, "kaurma" (a kind of preserved meat), and other articles of provisions are sent from all parts. Besides this, so large a supply of wood and charcoal has been collected, chiefly at Bourgas, that part of it has been put at the disposal of the English and French armies in the Crimea. The steam-mill at Varna is in full activity, so are the shambles. The possession of the Danubian Principalities is of great importance on this occasion, for a great part of the meat and the butter (which for a Turk is nearly indispensable) come thence.

Besides provisions, means for transporting them on land in case of a march have likewise to be provided from here, for Eupatoria can no longer furnish them, and the surrounding country has been nearly cleared by the Cossacks. Buffaloes are chiefly taken over for this purpose, which are very extensively employed for carting in Bulgaria. The question is only how they will bear the Crimean climate; for, as there are no buffaloes kept there, it may be that experience has proved that they are not suited for the country, and it seems always dangerous to try experiments in a winter campaign.

A great part of the troops have fur-lined coats, but it did not strike me that all were provided with them, although, with the little uniformity in the dress of the Turkish soldiers, it would be difficult to say so positively. They have, however, one article which every one of them will find of the greatest use in the piercing east winds of the Crimea, and that is the hood, which is quite detached from the coat, and bound round by bands. They have had already one winter campaign, so it may be fairly expected that they have learnt how to go through it, although there must always be a great difference between war in a friendly and in an enemy's country.

The army will consist of three infantry and one cavalry division. The first infantry division, which is already in the Crimea, is commanded by Mehmed Pacha (Ferik), and Teofik and Behram (General Cannon) Pachas as Brigadiers. The second, which is likewise partly gone, will be under Ferik Ismail Pacha, not to be mistaken for Mushir Ismail Pacha, who distinguished himself at Kalafat, and who remains as commander in Bulgaria. Sisly Pacha is spoken of as commander of the third division, and Hahm Pacha as commander of the cavalry.

The whole are, with little exception, old troops; from the cavalry the best men, as well as the strongest horses, have been selected; 400 Bashi bazouks, the *crème*, are also to form part of the expedition. The men seem very healthy, and in excellent spirits; they look also more soldierlike than their comrades at Balaclava, so that a year's campaigning has not been without its effects on them. But still much remains to be washed for.

THE SARDINIAN CONTINGENT.

The treaty of military convention between Sardinia, France, and England, has been adopted by the Piedmontese Chambers, after a good deal of discussion, by a majority of 101 votes against 60. M. Correnti, one of the speakers, described the war as one of civilisation against barbarism.

The Sardinian contingent will not embark for the seat of war before the middle or perhaps end of next month; but General La Marmora, who is to command it, will proceed to Paris and London immediately after the treaty has been ratified, to take counsel with the military authorities as to the measures most advisable with regard to its destination, the amount of particular arms, and other minor details. According to the terms of the convention, it will amount to 15,000 men. No positive distribution of this force has yet been made, nor can it be, until the peculiar circumstances of where and with what troops it is to act have been definitively arranged; but it may be supposed there will be 10,000 or 12,000 infantry, from 1000 to 2000 cavalry, about 600 artillerymen, a company or two of Sappers and Miners, if required, and a strong force of waggon train and ambulance corps, which they possess in a very efficient state. Profiting by their own and our experience with regard to the latter departments, there is not likely to be any

lack of carriage for the wounded, provisions, or forage. A recent invention has been adopted in packing cooked provisions, by which means a cart attached to each battalion carries rations for 800 men for three days, an invaluable accessory in cases of protracted reconnaissances The Minié rifle is now being introduced throughout the service, both land and marine. Hitherto the War Department has been so closely economised it was impossible to make the improvements in small arms as fast as was carried out in richer and larger countries, and the Minister of War was forced to content himself with placing his forces in a more perfect state of defence, an object to which he has succeeded to a degree that would surprise those who have not watched the gradual and steady development of his plans. To the discipline and instruction of the army General La Marmora has devoted himself more particularly since the peace of 1849; and in this also he has been so successful that the justice of his reforms is admitted on all hands, though he unavoidably risked much popularity with the aristocratic classes in so doing. The result, however, is, that every department has been wonderfully improved since the last war; and the Sardinian contingent is by no means likely to suffer from comparison as to discipline or intelligence with those troops they are about to join.

PREPARATIONS FOR A EUROPEAN WAR.

A letter from Hamburg of the 10th inst. states that of all the German Governments, that of Hanover displays the greatest activity at the present moment in completing its army to a war establishment. Every material is being renewed, and the whole will soon be perfectly ready for mobilisation. A commission chosen from the superior officers, under the presidency of General Jacopi, Chef d'Etat Major, and formerly Minister of War, has been named by the King for this object. Several of the members have been sent into the provinces where the regiments are quartered, to examine in detail their arms and equipments. All the State arsenals are actively engaged in the manufacturing of various warlike necessaries. The soldiers have had their furloughs recalled, and have been ordered to rejoin their regiments immediately. The Government has directed the purchase of 3000 horses for the artillery and other carriages of war. Two guns are to be added to each field-battery. The Hanoverian cavalry, reputed one of the best in Europe, is likewise on the full war establishment. Like several German Governments, that of Hanover is about to forbid the exportation of horses, which has been allowed up to this time. In short, if we may judge by what has been ordered, and what has already been done, the Hanoverian contingent will, of all the German Confederation, be the first completely organised in readiness for active and serious service.

According to the *Post-Ampt Gazette*, the Prussian Government has been informed that Austria has not renounced her proposition for mobilisation; and, in order to counteract the wishes of Austria, she is actively negotiating with the secondary States. The mission of General Willisen to Carlsruhe, of Colonel Tann to Schwerin, the arrival of M. Otterstedt at Berlin, and the active correspondence carried on between Dresden and the Prussian capital, are all connected with this object.

"The majority of the States of the Germanic Confederation," says the *Patrie*, "are making arrangements for putting their contingents on a war footing. Their number of horses is nearly everywhere completed."

The *Gazette de Silesie* and the *Gazette d'Augsbourg* assert positively that Naples is about to accede to the Western alliance. The *Gazette de Verona* considers the news very probable. Portugal, it also says, is about to join the alliance: it could furnish 12,000 men. The *Kreuz Zeitung* states, on the contrary, that Portugal has positively declined active participation in the alliance. We believe that, at present, all that can be positively affirmed is that the Allies are seeking to unite all the secondary States of the Continent in a general European coalition against Russia, and that the work is making steady progress.

The Swedish Government is continuing its military preparations. The Hereditary Prince displays the greatest activity in everything connected with improvements to be introduced into the army.

INDIA AND CHINA.

The most important news contained in the letters and papers received from India by the Overland Mail is the despatch by the overland route of our first reinforcements from India to the army in the Crimea. The first division of her Majesty's 10th Hussars left Bombay on the 10th of January, on board the *Punjaub* and *Sultana*, towed by the *Victoria* and *Auckland*. The *Punjaub* took 230 horses and the same number of men; the *Sultana*, 84; and each of the steamers a smaller number. The remainder of the regiment was to sail in ten days. Altogether they will muster 650 sabres. Her Majesty's 14th Dragoons, equally strong, were also on their way to Bombay to embark for the Crimea *viâ* Suez. It is said that several infantry regiments are to follow, and that the Peninsular and Oriental Company's steamers *Norna*, *Pekin*, and *Precursor* have been taken up to convey troops from Bombay to Suez. If it was required, India, it was thought, could well spare a contingent of 20,000 or 25,000 excellent troops as long as Lord Dalhousie remains at the helm.

The Persian War, from which so much was expected, has ended in disappointment. Till their final interview the Ambassadors had demanded nothing, and the sole object of the Embassy had appeared to be the cultivation of friendly relations and the establishment of free commerce and diplomatic intercourse between the Burmese and the British, but at the farewell reception a scene took place which is described in the Calcutta papers as follows:—

After a little of the usual complimentary language had passed that is stereotyped for State interviews, the Burmese Envoy proclaimed, that he had "come, by command of the King of Ava, to seek restitution of the whole of the captured provinces in Burmah!"

We are informed that, despite this unforeseen explosion, the Governor-General stood calm and collected, and at once desired Major Phayre to make the following reply, or words to this effect: —"Tell them that as long as the sun shines in the heavens the British flag shall wave over those possessions." The Envoy, it is said, scarcely expected any other answer; but, having been entrusted with the mission, he was of course compelled to perform it to the very letter.

The progress of the war in Europe excites intense interest in India. The subscription to the Patriotic Fund has been headed by Lord Dalhousie with £300, and will probably reach from all India £20,000. There is a strong feeling among military men that India might send aid to the forces in the Crimea. It cannot spare Europeans, and the idea of sending Mussulmans is said to be a mistake. The Sikhs, however, would go willingly, and 10,000 irregular Sikh horse would be equal to at least 20,000 Cossacks. They mess altogether, drink rum, will eat anything except beef, and would be proud in the extreme of such a proof of confidence. The only difficulty would be in transport, and that is, in India, simply a question of money.

There have been meetings in all three presidencies in aid of the Patriotic Fund. By the latest accounts the subscriptions to the fund amounted in the city of Calcutta to 70,000r., in the city of Madras to 30,000r., and in the city of Bombay to 65,000r. These figures represent pretty fairly the comparative intelligence, wealth, and influence of the three presidential cities.

The latest accounts from China states that the presence at Canton of a strong naval force, British and American, had apparently checked any active demonstration that might have been contemplated by the Chinese insurgents against the city, and the two parties remain relatively in the same position as when the previous mail left. Some desultory fighting had been going on on the river and in the neighbourhood of the city.

His Excellency Admiral Sir James Stirling left Hong-Kong for Canton on the 12th ult. in the *Winchester*, accompanied by the steamer *Styx*, and his Excellency Sir John Bowring followed in the steamer *Rattler* the next day.

A meeting of the British and American authorities had taken place in Canton to consider the peculiar state of matters, but nothing whatever had transpired His Excellency Sir James Stirling had inspected the neighbourhood of the foreign residences, with a view of being prepared, in case of emergency, to render the most efficient assistance.

There are various reports of communications made to her Majesty's Plenipotentiary by the Imperial authorities and the rebel chief, but no details are given. It is generally believed his Excellency Sir John Bowring will avail himself of the present opportunity to endeavour to gain admission into the city.

A PROPER REGULATION.—An order issued by the Commissioners of Police was on Saturday promulgated, and read over to the summoning officers at the various police-offices, to the effect that they are not on any account to recommend solicitors to the persons whom they may have in custody, or any body else.

THE RHINE FROZEN OVER.—At Metz, on the 1st instant, the Rhine was completely frozen over to a considerable thickness. To commemorate the event the coopers of the town constructed a huge cask on the ice, and afterwards paraded it through the town in a car drawn by six horses, preceded by a band of music, and followed by the whole corporation of coopers carrying their banner. Two restaurants were established in the middle of the river, and it was proposed to set up a dancing saloon.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—FRIDAY.

The Earl of ELLENBOROUGH called the attention of their Lordships and of the new Minister of War to the promises of the late Ministry with respect to clasps to be granted for the charge at Balaclava, and also to the rewards to be granted to the seamen engaged at the siege of Sebastopol. He trusted that the present Government would not neglect to carry out without delay the pledge that had been given.

Lord PANMURE assured the noble Earl that no time should be lost in conferring the distinctions to which he had called attention. The noble Lord then introduced a bill to enable her Majesty to enlist men for any period of time they may please under ten years, such men to be between the ages of 24 and 32 years. The object of the measure was to obtain a better and more experienced class of men than were usually enlisted as new recruits.

The bill was read a first time.

After some observations from the Earl of Shaftesbury, the Earl of Harrowby, and the Earl of Ellenborough, in approval of the proposed arrangements of the Government, the subject dropped.

The Purchasers' Protection against Judgments Bill was read a second time

The Fisheries (North America) Bill was read a third time and passed

HOUSE OF COMMONS FRIDAY.

Lord Palmerston took the oaths and his seat for Tiverton; Mr. S. Herbert, for South Wiltshire; Mr. S Ricardo, for New Windsor.

A new writ for the borough of Cardigan, in the room of Mr Pryse Loveden, deceased, was ordered.

Letters from Sir E. Lyons and Admiral Bruyères were read by the Speaker, acknowledging the vote of thanks awarded by the House of Commons.

Mr ROEBUCK gave notice that on Thursday next he would move the names of the committee granted recently by the House on the subject of the conduct of the war. He would put the names on the votes to-night.

Mr. FRENCH asked the Government if there were any reasons why Sergeant Sullivan, who carried the colours of the 30th at the Alma, and had its singular honour of being specially reported by the General in command of his division to Lord Raglan, had not been promoted?

Lord PALMERSTON said power was given to Lord Raglan to promote one non-commissioned officer in each regiment; and Lord Raglan recommended the Sergeant-Major, so that no one else could be promoted. In reply to Mr Layard, his Lordship thought there could be no objection to laying on the table of the House the despatch of General Evans in which Sergeant Sullivan's name was mentioned.

MINISTERIAL STATEMENT.

On the motion for going into a Committee of Supply,

Lord PALMERSTON said it would be expected that he should state what had led to his assuming the office he then held. It had been stated by the Earl of Derby that when her Majesty called upon him to form a Government he called upon him to join, and added that he wished him also to communicate with the Chancellor of the Exchequer and Mr. S. Herbert. He told the House that he would gladly join him in a public emergency, but that he could give him no answer until he had communicated with his colleagues, but this he could state, that he could not join any Administration that did not continue the control of foreign affairs in the hands of Lord Clarendon. He immediately afterwards communicated with the Marquis of Lansdowne, and soon afterwards he informed Lord Derby that he did not think his connection with his Government would add any material strength to it. Her Majesty was then pleased to call upon Lord John Russell, and charged him with the duty of forming an Administration. Lord J. Russell called upon him to assist in that: and he said that, feeling the importance of the crisis, he would render the noble Lord any assistance in his power; and if he had succeeded in forming an Administration he would have assisted him with the greatest possible alacrity. That attempt failed, and her Majesty then called upon him (Lord Palmerston) on Saturday, and on Tuesday he was able to report to her Majesty that he had succeeded in forming a Government which he thought would be enabled to carry on public affairs. He trusted that that Government contained sufficient administrative ability, sufficient political sagacity, sufficient liberal principles, sufficient patriotism and determination to justify him in appealing to the House and country for support in the present critical state of our national affairs (Loud cheers). He would sketch out, though not in detail, what it was the intention of the Government to do. It would be seen that he had not thought it his duty to appoint a Secretary at War, because he thought the office ought to be reinstated, and that the civil departments of the Government should be placed under the control of the Secretary for War (Hear, hear). The Secretary of the Admiralty had established a board to superintend the transport service at sea. We were engaged in warlike operations with France, our ancient ally, but we had not the means of sending so many men into the field as France, and it was but fair that we should make some return to France in the shape of additional naval arrangements (Cheers). He was convinced that the establishment of that board would lead to increased economy and efficiency in that department. Well-grounded complaints having been made as to the condition of our war hospitals, it was intended to send out three civilians for the purpose of making good sanitary arrangements for the hospitals, camps, and ships, and from their scientific labours he anticipated the greatest advantages. No means would be omitted to reinforce the army in due time. Charged as the Government was with the interests of a great nation, they had to look not only to the means of carrying on the war with great vigour, but it was their duty to take all measures in their power to put an end to it. They had been informed that certain arrangements agreed to between England and France had been submitted to Austria, and adopted by Russia as the basis of negotiation. In order that these negotiations might be most solemnly conducted, they proposed to Lord John Russell to undertake the duty, being convinced that when they were placed in the hands of a man so generally respected at home, and so well known throughout Europe, if their efforts should fail they would stand acquitted from blame. Lord John Russell at once undertook the duty, and no one ever did himself more honour than did the noble Lord in taking upon himself duties of such importance. The noble Lord would first proceed to Paris, thence to Berlin, where he would be in communication with the King of Prussia, and, although some time might elapse before his arrival in Vienna, the time he spent in those two capitals would not be thrown away.

Mr. DISRAELI, in reference to Mr. Roebuck's motion, protested against the House of Commons stultifying itself by departing from the position which, but a few nights ago, it so triumphantly occupied. He was determined to maintain the decision of the House, and the wholesome opinion of the country, that there should be a Parliamentary inquiry into the condition of the army before Sebastopol, and of those branches of the Government which should have prevented the present lamentable condition of our troops

Mr. ROEBUCK said that, after the solemn decision of the House in respect to his motion, he hoped that it would not stultify itself by taking an opposite course, particularly when it was considered that the Ministry was comprised of nearly the same contemplated by the House as had formed the late Government. He should certainly persevere with his motion on Thursday.

After some discussion the subjet dropped.

NAVY ESTIMATES.

The House then went into committee upon the Navy Estimates.

Sir J. GRAHAM made a statement in which after reviewing all that had been done during the past year by the Admiralty, proceeded to state that the Government intended as fast as circumstances would admit, to substitute steam-vessels for those now in use. He had much pleasure in informing the house that Government would be in a position to send out to the Black Sea six new screw steamers, and that the fleet intended for the Baltic would reach the extraordinary number of 100 vessels. The Navy Estimates for the present year as prepared, would exceed those of last year by £2,000,000, and the number of men proposed to be employed in this branch of the public service would reach 70,000

After some discussion the votes were agreed to.

THE letter upon "Anæsthesia by Cold in Surgical Operations," from Mr. T. Wakley, in the ILLUSTRATED LONDON NEWS of last week, was accidentally stated to have been addressed to our Journal, whereas it was extracted from the *Lancet* of the current week.

COST OF THE PUBLIC DEBT.—It is shown by a Parliamentary paper recently issued that the cost of the funded and unfunded public debt, as interest and management (exclusive of £16,196 16s. 2d., the interest on donation and bequests), amounted in the year ended the 5th January to £27,736,268 14s.

FATAL SHIPWRECK.—During a severe snowstorm at Dublin on Friday the steamer *Will-o'-the Wisp*, of 400 tons, trading between Maryport and Dublin, went on shore at Lambey, and all hands were lost. In addition to the crew, several passengers were on board.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

HER Majesty, by her royal sign-manual warrant of the 31st of last month, has been pleased to grant a Civil-list pension of £100 a year to Mr. Thomas Keightley, "in consideration," so the warrant runs, "of his services to historical literature, and of the straitened circumstances to which he is reduced." As this is the last literary pension which Lord Aberdeen will have to recommend her Majesty to grant, so we hope it will be the last time that "straitened circumstances" will ever be introduced into a Royal warrant, coupled with services to historical literature, and so small an amount of pension. Mr. Keightley has published some well-written and useful works on history in general, and is the author, as well, of a book on "Fairy Mythology," which all who have read it will remember with pleasure and profit, and both of a high kind.

This grant to Mr. Keightley reminds us that, by a warrant of a like date, a pension of £150 a year has been granted to the widow of the late Mr. E. T. Crafer, of the Treasury. The pension is given "in consideration of her husband's long and faithful services, and the distressed situation in which she is left with a large family at his decease." Mr. Crafer's widow well deserved a pension from the public of this amount; but we must protest against its being granted from the petty twelve hundred pounds a year assigned by Parliament for literary, scientific, and artistic services. Mr. Crafer *fell* in the service of his country. He was assiduous, he was useful, and his public career had been long and faithful. Surely, out of the Superannuation Fund of the Civil Service of the public means might have been found to have given Mr. Crafer's widow this well-merited but small annuity? But Mr. Gladstone is to take up the whole case of the civil servants of the Crown; and we recommend Mrs. Crafer and this pension to his particular notice.

Poets are improving in worldly condition. When Goldsmith died £3000 was found in debt, Johnson exclaimed (naturally enough), "Was ever poet so trusted before?" Southey's property was at least worth £7000, and Wordsworth's worth as much. Campbell, it is true, died poor, "living on the life to come," that has hitherto made so important a part in every poet's creed. But here is James Montgomery, of Sheffield, whose will was made in 1827, and who died in 1854, has left property in Sheffield and its neighbourhood that has just been sworn under £9000! This was money honourably won and well deserved. It will soon no longer be allowed us to couple poets and imprudence together. What has Butler told us?—

> It is not poetry that makes men poor,
> Nor few do write that write not so before,
> But, being for all other trades unfit,
> Only t' avoid being idle set up wit.

But few take to poetry now; with a very few exceptions it has become a barren and, in bookselling language, an unprofitable art.

M. Cabany's letter on his acquisition of an alleged unpublished novel by Sir Walter Scott, and the remarks of Mr. Huntly Gordon, Sir Walter's amanuensis, thereon, have led us into a longer correspondence than we wish to encourage. Mr. Gordon has, however, sent us a further letter on the subject which merits publication. His letter, it will be seen, is bringing the point of genuineness still nearer to a satisfactory conclusion.—

Since the publication of the last number of your paper, a respectable and well-known London bookseller brought me facsimiles just received from M. Cabany of the letter to Mr. Spencer, which *appears* to have accompanied the MS. of "Moredun," and of the notice referred to by M. Cabany in his letter to the ILLUSTRATED LONDON NEWS, last week, and which he (M. C.) believes to have been intended as an introduction to the tale. The note to Spencer is such a dextrous imitation of Scott's handwriting that I should say "Moredun" must be well worth reading, if the style and sentiments have as striking an air of *resemblance* as the letter. Yet it will not bear a close examination. I cannot swallow the improbability of Scott addressing Mr. Spencer—a man whom he seldom met, though he had a great regard for him—as "My dear W. S." His address even to his *famulars*—the Ballantynes—was always "My dear John," or "My dear James." Then note it signed "W. S.," in imitation of *printing*, which I don't believe Sir Walter ever tried after he left school! Nor did I ever observe an instance of his signing his *initials* to a letter. I have a brief one, written from a sick-bed; but still it bears the signature "W. Scott."

With respect to the handwriting—many of the letters are too tall; and I noticed the final *t* formed about double the length of Scott's, and without *turning* up the bottom, which I never knew him to omit. But I was chiefly struck with the letter *h*, which is fashioned with an open top or loop; and on carefully referring to many letters, &c. (one of them a letter of eleven quarto pages), I could not find a *single instance* where this letter was so formed. I therefore unhesitatingly pronounce W. S.'s note to be an imitation, though a very clever one; and have no doubt that M. Cabany has been imposed on. If that gentleman will consult *Scott expert* in Paris, I am pretty confident he will be told that it would be considered fatal to the authenticity of any document should even one letter be fashioned, several times, in a manner in which the presumed writer never formed it before. I need say nothing of the scrap commencing with an allusion to Dante, as that would strike one even little versed in Scott's handwriting as a very poor imitation indeed. But I stick to the *h*. Like John Kemble, I cannot give up my *at-chet!*

I take this opportunity of explaining that part of my communication which you printed on Saturday, as I find it has been misunderstood. Neither Wm. Laidlaw nor John Ballantyne ever acted as Scott's "amanuensis," except during the composition of "Ivanhoe" and the "Bride of Lammermoor" And it is one of the most remarkable facts in the literary history of my illustrious friend, that the two works which many consider his best romances ("Ivanhoe" was, and I think still is, the most popular on this side of the Tweed) should have been composed when the author was too ill to hold a pen; and, stranger still, that "Ivanhoe" should be, in style, perhaps the most perfect of his prose writings. And yet he never tried dictation till he began "Ivanhoe." Nearly the whole of that splendid tale, and the entire "Bride," were dictated; but Mr. Lockhart was mistaken when he included the "Legend of Montrose" in the same category, every word of it having been transcribed by me.

I said that "the name of Napoleon was proscribed," &c., merely as a strong mode of expressing my disbelief that a fashionable stationer, in the neighbourhood of the Tuileries—to whom Scott would probably send for writing-paper if his travelling stock was exhausted—would have sold paper with the "water-mark of the first Empire" during the reign of Charles X. and the life-time of the King of Rome! Believe me, &c.,

13th February, 1855. G. HUNTLY GORDON.

If M. Cabany's acquisition is a genuine production of the great novelist he cannot give it too great a publicity. He should court inquiry everywhere; and what is more, publish the work forthwith.

Artists and amateurs (in spite of the frost) have been making their way to Messrs. Foster's auction rooms, in Pall-mall, to view a small but choice collection of fifty pictures of the English school, the property of Mr. Birch, of Edgbaston, near Birmingham, and of another gentleman, name unknown. We have examined the collection with care, and shall have something to say next week about the works themselves, and the prices they obtained. The bulk of them were well-known faces. Of the new pictures we saw nothing better than Mr. Herbert's "Nimrod," a picture of the year 1853, and in Mr. Herbert's best manner.

TIVERTON ELECTION.—The nomination of a candidate to represent the borough of Tiverton in the House of Commons, in consequence of the vacancy caused by Lord Palmerston's acceptance of the office of First Lord of the Treasury, took place on Monday, at twelve o'clock, in the Town-hall. The committee for ensuring the noble Lord's return had, in consideration of the present state of public affairs, passed a resolution to the effect that they would undertake to re-elect Lord Palmerston in his absence. His Lordship, therefore, was not present. After the usual preliminaries, Mr. J. H. Amory, in proposing Viscount Palmerston as a fit and proper person to represent the borough in Parliament, observed, that in asking the meeting to elect the noble Lord he was asking them to elect a man whom every shade of political party could honestly and fairly support. Lord Palmerston, now Prime Minister of England, was the man to whom they all looked at the present moment to bring the war in which this country was engaged to a successful conclusion. Mr. W Hole (a magistrate of the borough) seconded the nomination. The Mayor inquired if there was any other candidate, and, no one responding in the affirmative, he declared the noble Lord re-elected. Three cheers were then given right heartily for the Queen, for Lord Palmerston, Mr. Amory, and Mr. Hole; for the Emperor of France and the gallant French army; and for the press of England. The meeting, having them given three decided groans for the Czar, separated with a vote of thanks to the Mayor.

WRECK OF THE "DIANA," OFF PENZANCE.

WRECK OFF PENZANCE.

We regret to record the wreck of the collier-brig the *Diana*, of Swansea, which was driven on the Pier Rocks in endeavouring to reach the harbour of Penzance during the storm of Friday, the 9th inst. When she struck all was confusion and excitement: ropes were thrown from the pier-wall to the poor fellows on board; and they bore up manfully under such awful circumstances. Eight out of nine were saved, but several were severely injured, the Captain having three of his ribs broken. One poor sailor was killed: he had fastened a rope round his waist, and was being hauled up, when a heavy sea lifted the vessel against the wall, and cut the unfortunate man in pieces. The brig struck about nine o'clock, and by three in the afternoon it was the most confirmed wreck that has occurred on this part of the coast for many years. In appearance it was a chaos of matchwood; scarcely any portion of the ill-fated brig remained that could be distinguished. A few hours later, another brig (coal-laden) was driven on shore between Penzance and Marazion. Fortunately, it cleared the rocks, and was secured high on the beach.

The accompanying Illustration of the catastrophe is from a sketch by Mr. George W. Petitt.

LANDING OF THE REMAINS OF LORD FREDERICK FITZCLARENCE AT THE DOCKYARD BANDER.

The scene represented by the Sketch we have given under this head took place on the 14th of November last. The Commander-in-Chief of the Bombay army died at Poorundhur, of gout in the stomach, on the 30th of October. Judging from the tone of the newspaper press in the Presidency, his death has been felt as a great loss by the Indian. He was always devoted to his profession, and zealous for the welfare of the troops under his command. The *Bombay Times* gives the following laudatory notice of his career:—

He assumed office on the 24th of November, 1852, being then only fifty-two (the bulk of our Commanders-in-Chief having for a long while past been between sixty and seventy), bringing with him a high reputation as a man of ability and an enthusiast in his profession. The highest expectations had been formed of him; these, unfortunately, were destined to disappointment. In reviewing his short career, and giving him the fullest credit for perfect integrity, great kind-heartedness, and an earnest desire to do what he deemed right, and never to spare himself or those around him, his military administration, perfectly free as it is of the stains of nepotism and indifference which have characterised those of many of his predecessors, is admitted to have been a failure. The mechanical details of drill and discipline seem to have exhausted his conceptions of the management of an army 70,000 strong. He seems to have assumed that unbounded folly had reigned supreme in all departments until his arrival, and that his first duty was to have everything changed, and, had some of the measures latterly proposed by him been carried out, universal mutiny would have been the consequence. He inspected in person every regiment, visited their barrack-rooms and quarters, and partook of the soldiers' fare, in order to ascertain that the provisions with which they were served were wholesome and nutritious. Such conduct endeared him to both officers and men, and, if he had only refrained from ordering incessant drills and parades, his memory would have been worshipped by the army at large. Unfortunately, however, in consequence of not having seen service in the East in his youth, his ideas of

LANDING, AT THE DOCKYARD BANDER, OF THE REMAINS OF LORD FREDERICK FITZCLARENCE, AT BOMBAY.

the daily routine of garrison life were purely English, and he endeavoured to introduce into military life in the tropics a system of tactics totally antagonistic to the climate and the general routine of duty to which the army had been accustomed. The error would no doubt have been rectified in time.

The arrangements for his funeral were in the most magnificent style The funeral car is described as "a masterpiece of chaste art and skill it was all black velvet and gold lace armorial bearings, and with the coronet of the deceased; the followers of the funeral train were ushered into the state-room, where a red glare of light showed several peons, half in shadow half in shade, bearing glittering swords, as if they were the 'guardian genii' of the place." The ceiling of the hall was hung with colours and black drapery; "the walls literally covered with glittering arms of the most unique description;" "the platform on which the bier rested was a masterpiece of skill, which reflected the highest credit on the designer."

The following order was issued by the Indian Government on the melancholy occasion of his Lordship's death:

With sentiments of the deepest regret, the Right Hon. the Governor in Council announces to the army the demise of his Excellency Lieutenant-General the Right Honourable Lord Frederick Fitzclarence, G.C.H., Commander-in-Chief at this Presidency, which event took place at the Hill Fort of Poorundhur, at half-past two o'clock on the morning of the 30th October. On this melancholy occasion the flag of the Castle will be hoisted half-mast high, and continue so until sunset; and seventeen minute-guns, corresponding with the rank of the late Commander-in-Chief, will be fired at each of the principal military stations under this Government. The Governor in Council further directs that the officers of her Majesty's and the Honourable Company's army will wear mourning for a fortnight from this date.

SKETCHES IN CONSTANTINOPLE.

"THE City of the Sultan" and its environs abound in picturesque sites, two of which we this week engrave, from sketches by Mr James Robertson, of Constantinople.

TOPHANA (OR TOP-HANEH) is one of the suburbs of Constantinople, and a continuation of Galata, the principal seat of commerce. The name is derived from the cannon-foundry existing here. The accompanying Engraving represents a street in the Tophana quarter, descending from the "Russian" Palace, and affords a very accurate idea, not only of the architectural structure of the place, but of the company one encounters in making one's way to the place of embarkation for Scutari. There is not much to see in the quarter except a very beautiful fountain of white marble in the market-place, but it is in the general character of an Oriental city, rather than in individual objects of attraction, that a curious fascination is found for an unaccustomed eye. Must it be added that with familiarity grows contempt? and that after one has had a few days of such places of the Judas yellow boots and tantalising veils of the picturesque porters, the grinning slaves, the pompous eunuchs, and the noisy *gamins de Stamboul*—the eye begins to be much less pleased; while the ear and the nose acquire proportionate readiness to detect the dissonant noises and the unsavoury odours of streets which you first people from the "Arabian Nights" and then you wish peopled with scavengers? This remark applies in full force to the suburb here depicted

VIEW IN TOPHANA.—FROM A SKETCH BY JAMES ROBERTSON, OF CONSTANTINOPLE.

THE OAK OF GODFREY OF BOUILLON.

One of the most celebrated historic relics of Constantinople is the noble Oak beneath which Godfrey of Bouillon and Raymond, Count of Toulouse, are stated to have encamped in the first Crusade:—

"Four other chiefs of the Royal blood of Europe also assumed the cross, and led each his army to the Holy Land; Hugh Count of Vermandois, brother of the King of France; Robert Duke of Normandy, the elder brother of William Rufus; Robert Count of Flanders, and Bohemund Prince of Tarentum, eldest son of the celebrated Robert Guiscard. These men were all tinged with the fanaticism of the age, but none of them acted entirely from religious motives They were neither utterly reckless like Gautier sans Avoir, crazy like Peter the Hermit, nor brutal like Gottschalk the Monk: but possessed each of these qualities in a milder form; their valour being tempered by caution, their religious zeal by worldly views, and their ferocity by the spirit of chivalry. They saw whither led the torrent of the public will; and it being neither their wish nor their interest to stem it, they allowed themselves to be carried with it, in the hope that it would lead them at last to a haven of aggrandisement. Around them congregated many minor chiefs, the flower of the nobility of France and Italy, with some few from Germany, England, and Spain It was wisely conjectured that armies so numerous would find a difficulty in procuring provisions if they all journeyed by the same road. They therefore resolved to separate; Godfrey de Bouillon proceeding through Hungary and Bulgaria, the Count of Toulouse through Lombardy and Dalmatia, and the other leaders through Apulia to Constantinople, where the several divisions were to reunite The forces under these leaders have been variously estimated. The Princess Anna Comnena talks of them as having been as numerous as the sands on the sea-shore, or the stars in the firmament Mailler of Chartres is more satisfactory, and exaggerates less magnificently, when he states, that all the divisions, when they had set down before Nice in Bithynia, amounted to 100,000 horsemen and 600,000 men on foot, exclusive of the priests, women, and children. Gibbon is of opinion that this amount is exaggerated; but thinks the actual numbers did not fall very far short of the calculation The Princess Anna afterwards gives the number of those under Godfrey of Bouillon as 80,000 foot and horse; and supposing that each of the other chiefs led an army as numerous, the total would be four half a million. This must be over rather than under the mark, as the army of Godfrey of Bouillon was

THE OAK OF GODFREY OF BOUILLON.—FROM A SKETCH BY JAMES ROBERTSON, OF CONSTANTINOPLE.

confessedly the largest when it setout, and suffered less by the way than any other.—*Mackay's Popular Delusions, Vol. 2.*

We quote this vivid picture from the second volume of Mackay's work on "Popular Delusions." The area beneath the majestic oak was not long since covered by British troops; when it was remarked that not before had Christians encamped beneath the wide-spreading tree since the days of Godfrey of Bouillon.

CALENDAR FOR THE WEEK.

Sunday, Feb. 18.—Quinquagesima or Shrove Sunday. Martin Luther d., 1546.
Monday, 19.—Galileo born, 1564.
Tuesday, 20.—Shrove Tuesday. Voltaire born, 1694.
Wednesday, 21.—Ash Wednesday. Archbishop Cranmer burnt, 1556.
Thursday, 22.—Sir Joshua Reynolds died, 1792.
Friday, 23.—
Saturday, 24.—St. Matthias.

HIGH WATER AT LONDON-BRIDGE,

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, FEBRUARY 17, 1855.

The failure to assault and take Sebastopol immediately after the brilliant victory of the Alma has been the cause of the singular ill-temper and impatience of the British people during the last three months. *A coup de main* at that time might have been successful—at least such is the opinion of many competent judges in the British and French armies. The Russians themselves admit as much; and there is every reason to believe that the loss of life which would have ensued would have been far less than that which has since occurred from disease and exposure in the trenches. After the famous hoax of the "Tartar," which was solemnly affirmed to be true by the best-informed journal in Europe, the public mind, which had for a few days dwelt with complacency upon easy and brilliant victories, experienced a gloomy reaction. Not even the battles of Balaclava and Inkerman though reflecting the highest glory on the prowess of our army—were sufficient to restore the people to good humour. A sullen discontent grew up, which nothing but the capture of Sebastopol was sufficient to allay. In the fourteen weeks that have been passed in comparative inaction since the splendid day of Inkerman, sad havoc has been played at home with many reputations—both political and military which before that time stood at the highest point. Though our army suffered no reverse, though the enemy had been deterred from fresh attacks, though large reinforcements continued to reach the camps both of Lord Raglan and General Canrobert, though Sardinia offered us 14,000 men, though the Turks under Omar Pacha made good a position at Eupatoria, though that place was fortified in such a manner as to render its capture by the Russians imperative before they could again risk an onslaught upon us such as that so signally foiled at Inkerman, though the Powers of the Continent—Prussia alone excepted—were gradually drawn into our alliance, and though the mismanagement of the Commissariat and other departments was remedied to a considerable extent; all these and a thousand other favourable circumstances were held as nought. Sebastopol remained unconquered; and the British public not only remained unsatisfied, but highly displeased. Against Lord Aberdeen the first vial of wrath was discharged. The other members of the Ministry shared his obloquy, till, there being nothing new to be said in their dispraise, Lord Raglan became the object of the popular ill-will, although shortly after the battle of the Alma, and the flank march to Balaclava, no eulogium seemed energetic enough to satisfy the admiration which his brilliant generalship had excited. At the present moment the tide of opinion has found a new obstacle, and is dashing itself against "Aristocracy." How long this state of mind will last it is impossible to say; but it may be safely predicted that the quadruped which represents the power of the British people will continue to roll its fierce eyes, to shake its mane, to extend its tail, and to growl ominously, until it be gratified by the capture of the fortress on which it has set its mind. We do not think, as some do, that the noble animal is in reality discouraged; but it is evident that he is vexed and angry. A similar feeling exists in France, although it has not the same means as in this country for making itself manifest; and is shared to so large an extent by the head of the State, that the Emperor has, within the last few days, been with difficulty deterred from proceeding to the Crimea in person. But a variety of circumstances combine to show that the time is fast approaching when the Allied armies will resume the offensive; and when a new and vigorous attack, both by sea and land, will be directed against the stronghold of the Russians. The French have been ready for some weeks; and frost—a more rapid engineer than Mr. Peto—has hardened the muddy road between Balaclava and the British camp to such a degree as to render the getting up of our guns to their positions no longer a matter of impossibility, or even of great difficulty. Both armies are eager for the opportunity of renewed attack, either by the ordinary operations of a siege, or by the more brilliant, and perhaps less costly, alternative of a general assault.

The sufferings which both armies—and especially the British—have endured are favourable to the success of any movement which depends on desperate valour. Better to perish nobly in a gallant onslaught than to linger miserably in the cold of the trenches, or to be shipped off from Balaclava to die on the road to Scutari. The very best feeling pervades the soldiers of both nations; and hundreds of officers who, in the forced and painful inaction of their present duties, find nothing to do but to grumble at the war and those who have the command of it, will resume their proper character of brave men in the moment of danger, and will fight more lustily than they complain. That Sebastopol will be taken we cannot bring ourselves to doubt. The task may be difficult, and perhaps tedious, but it will be accomplished. Yet we can scarcely imagine that the British people will wholly recover their good humour in the interval. They have confidence in Lord Palmerston's energy, and in the prestige of his name; but even his great reputation may be "used up" if the siege last a few months longer. By the 1st of March the sword of Austria will be drawn; and the mighty struggle will convulse all Europe. Sebastopol will then cease to be the sole point of interest; and victories over Russia in other portions of her vulnerable frontiers may show the Czar that his ultimate triumph is impossible.

The new Premier has displayed something more than adroit management in selecting Lord John Russell as the negotiator to be accredited on the part of England to the Viennese Congress. For the adroitness—which is the first merit a great number of people will discover in the arrangement—let Lord Palmerston have due credit. The Derbyites—in whose ranks we are by no means disposed to include the Earl of Derby—are at this moment exceedingly incensed with the Premier because he declined to form what it is believed Lord Derby was never in earnest in asking him to form, namely—a new Coalition. The bewildering prospect of office induced a numerous band of exceedingly respectable and moderately-talented gentlemen to forget that, since the destruction of Lord Derby's Ministry by the very Parliament he had called together, they had never ceased to vituperate the union of men of different shades of principle, simply because it was such a union. The word Coalition was used by the Opposition writers as a synonym for all that was unprincipled and humiliating. Yet no sooner is office just possible than Lord Derby is thrust forward by his followers to propose a far more singular combination of statesmen—one in which strong political opinions would not be merely held in suspense, but must inevitably clash; and because Lord Derby is supposed to have been lukewarm in his effort to produce such a union, he is severely taken to task by the organs of his party; while the nobleman who avowedly declined to be a partner in such an arrangement is assailed with a bitterness for which disappointment is scarcely an extenuation:

But we must give the losers leave to chide.

The irritation of the unlucky candidates for office has by no means subsided; and they threaten that the new Administration shall commence its labours amid stormy weather. The presence of the man who acted as the wedge to split up the late Government, who has been galled by the mode in which his secession from office has been received by the country, and by the inculpatory criticisms offered by some of his colleagues upon his own vindications, would have acted as a species of conductor for the element with which the atmosphere of the House is charged. Appeals to "the noble Lord lately the President of the Council" would have come fast and furious, more ill blood must have been generated, and even the patriotism of the noble Lord himself might not have been sufficient to prevent his interest in the discussions from taking an inconvenient turn. For this, and for sundry cognate reasons, Lord Palmerston has done a clever thing in procuring Lord John Russell's temporary absence. It will throw out many calculations made on the Speaker's left. *Promptus ad artem suam*, as usual, Viscount Palmerston has shown himself

But these are considerations of small importance compared to the question of the real value of the appointment. Viewed with regard to the national honour and interests, the choice of Lord John Russell as our representative at Vienna seems a very desirable one. Unless these negotiations lead up to the great object of the war, the dismantling of Sebastopol, and the destruction of Russian ascendancy in the Black Sea, they are mere mockery, and will not be tolerated by nations already wearied and sickened by the solemn fooleries of diplomacy. In fact, unless the mode of effecting this (with, perhaps, the least loss of dignity to Russia) be the question for discussion, neither Lord John Russell nor the representative of France has any business at the Congress at all. At this moment there is much reason to believe that, despite diplomatic protestations, and authorised articles by Russian organs, the Emperor Nicholas will not permit his envoy to discuss the "points" in the only sense in which England and France can permit their discussion; and in that case Lord John Russell will merely have to withdraw from the Conference altogether, and devote his leisure to refreshing his recollections of St. Stephen's and the Karnthor Strasse; and we are inclined to think that, practically, this is about what his Lordship's errand will come to. Certainly, recent events can hardly be said to have offered to Nicholas any special reasons for an early surrender of his stronghold.

Nevertheless, it must come down. And if the Emperor of Russia should have arrived at the conviction that, though armies waste away, and all the untold horrors of war be found in fearful aggregation in our camps, England and France have vowed a hate to Sebastopol, like that of Juno and Pallas to Troy, a hate to be quenched only with the last flame of the tyrant's fortress, and that such vow will be kept, he may be in earnest in his negotiations. Startled at the attitude of Europe, leagued against him, and preparing for a dread rush upon his legions, Nicholas may be disposed to submit, rather than have his fortress and fleets destroyed by the enemy. If he be sincere in his dealings, the selection of our representative at the Congress is a very fortunate one; for it is certain that every wile which the chancery of St. Petersburg—rich in tricky treaties can devise will be put forth to obtain as much as possible from the forbearance of the Allies; to yield nothing that can be saved; and to confuse the terms of treaty, in order to raise questions and baffle remedies hereafter. The treaty by which the navigation of the "months" of the Danube was to be secured, and by which Russia cheated the other Powers by the most impudent devices, is a warning.

Now, Lord John Russell has not been trained to diplomacy; and as a man who cannot fence at all has far more chance against a skilful swordsman than one who knows the rules, but is a bad fencer, he may succeed better by refusing to enter into any phrase-mongery than any of our regular diplomatic hands, who are proverbially inferior to those of the despotic Powers. There are several reasons why Lord John may be expected to acquit himself well; and the chief one is, that his heart must be in the business. Any one who was present in the House of Commons on the memorable evening when he made the declaration that nothing but the depriving Russia of her great stronghold in the Black Sea could make Constantinople safe will remember the sensation those words produced, and the tone they gave to the subsequent debate. That Lord John was obliged, later in the evening, and at the instance of his chief, to qualify those expressions, to the manifest discontent of his auditors, was regretted, but it was felt that the first spirited declaration was that of his own feelings. Next, he has justified the step which has recently occasioned so much animadversion, simply and solely upon the ground that the war was not carried on in the vigorous way which was desirable, and with a view to the prescribed object. Thirdly, he has to vindicate by acts the course he has taken, having been by no means successful in doing so by words; and it will certainly not answer his purpose, as a statesman who values reputation, to show in negotiation any of that faltering and shortcoming which he has charged upon his late colleagues at home. He goes out armed at all points, a War Envoy, and his business is to do at Vienna that which hitherto Lord Raglan's cannon have not effected in the Crimea. If he do this, Sydney Smith's oft-quoted sneer at his courage will henceforth fall harmless, and his Lordship will show himself a great "commander." If—which, sincerely speaking, we do not anticipate—his aim prove to have been short of this, the name of Lord John Russell will not shine so brightly as it might have done in the page of his country's history.

THE COURT.

The Queen and the Prince Consort, with the youthful members of the Royal family, and the ladies and gentlemen of the Royal household, arrived at Buckingham Palace from Windsor Castle on Thursday afternoon. The Court will now remain in London until the week before Easter.

The Queen has entertained a distinguished circle of visitors at Windsor Castle during the week just closed. On Saturday morning, being the anniversary of her Majesty's marriage, the band of the Royal Horse Guards played several select pieces of music on the South Terrace. On the previous day his Royal Highness the Duke of Cambridge, her Royal Highness the Princess Augustus of Saxe Coburg, and the Marquis of Abercorn arrived on a visit.

On Sunday the Queen and Prince, the four elder of the Royal family, the ladies and gentlemen of the Court, and the domestic household, attended Divine service in the Private Chapel of the Castle. The Hon. and Very Rev. the Dean of Windsor officiated. The Duchess of Kent and the Duke of Cambridge were also at the service. The Princess Augustus of Saxe-Coburg went to the Catholic chapel at Clewer.

On Monday morning the Queen and Prince, accompanied by the Princess Augustus of Saxe-Coburg, and attended by the Marchioness of Ely and the Hon. Matilda Paget and the Equeries in Waiting, drove out in two sledges. The Princess Augustus subsequently took leave of her Majesty, and returned to Claremont. In the evening the Royal dinner party included her Royal Highness the Duchess of Kent, his Royal Highness the Duke of Cambridge, Lady Fanny Howard, Baroness de Speth, Lieut.-Colonel Hon. J. Macdonald, Lieut.-Colonel Tyrwhitt, and Major Clifton.

On Tuesday morning his Royal Highness Prince Albert, with Prince Alfred, skated in the Home Park. Her Majesty, attended by the Marchioness of Ely, was present. The Gentlemen in Waiting skated with his Royal Highness. The Duke of Cambridge took leave of her Majesty, and returned to London. After dinner her Majesty and his Royal Highness the Prince, attended by the Ladies and Gentlemen in Waiting, went to an evening party given by her Royal Highness the Duchess of Kent, at Frogmore-house.

On Wednesday morning his Royal Highness Prince Albert, attended by the Gentlemen in Waiting, skated in the Home Park. Several officers of the garrison had the honour of skating with his Royal Highness. Her Majesty, attended by the Hon. Mary Seymour and the Hon. Matilda Paget, witnessed the scene. Lord John Russell arrived at the Castle, and had an audience of her Majesty.

The Queen and Prince Albert, with the Prince of Wales, the Princess Royal, Prince Alfred, the Princesses Alice, Helena, and Louisa, Prince Arthur, and Prince Leopold, left Windsor Castle at three o'clock on Thursday afternoon, travelled by a special train to the private station at Nine Elms, and proceeded in eight carriages, escorted by a detachment of Carabineers, to Buckingham Palace, where the Royal party arrived at ten minutes past four o'clock.

The Countess of Desart has succeeded the Marchioness of Ely as Lady in Waiting to the Queen.

Lord de Tabley and Mr. Frederick Cavendish have succeeded Lord Waterpark and Major-General Berkeley Drummond as the Lord and Groom in Waiting.

Their Royal Highnesses the Duchess of Cambridge and Princess Mary have arrived at St. James's Palace, from Cambridge cottage, Kew, for the season.

Viscount Palmerston gave a dinner to the Cabinet Ministers on Wednesday evening, at his residence in Piccadilly.

Lord John Russell is expected to leave town almost immediately for Vienna. The noble Lord and family are at present staying at Richmond-lodge.

CHURCH, UNIVERSITIES, &c.

Preferments and Appointments.—*Rectories:* Rev. W. Collins Collins to Harswell, near Market Weighton, Yorkshire; Rev. J. P. Lucas to Rhossili, Glamorganshire; Rev. G. M. Sykes to East Hatley, with the Vicarage of Tadlow, now united, Cambridgeshire. Rev. J. G. Dobree to Holton St. Mary, Suffolk; Rev. C. Parker to Ormsby. *Vicarages:* Rev. R. James to Abbeston, near Yoxford, Suffolk. Rev. W. Nixon to Sutton, Suffolk: Rev. H. H. Swinny to Wargrave, Berkshire; Rev. H. H. Hardy to Preston, Gloucestershire; Rev. R. Hancock to Bathford, with Bathampton annexed; Rev. G. L. Faussett to West Haddon, Northamptonshire; Rev. H. Wybrow to Stratton-upon Dunsmore, near Coventry; Rev. W. Speke to Skenpeth, Herefordshire. *Incumbencies.* Rev. T. H. Dixon to Upleatham, near Redcar; Rev. C. G. Coombe to St. Thomas's, Crookes, Sheffield; Rev. J. Hoye to Knowle, Warwickshire; Rev. J. F. Jones to Ivington, near Leominster. The Rev. H. Christmas, minister of Tavistock Chapel, Lambeth, and lecturer of St. Peter's, Cornhill, has been appointed Professor of British History and Archæology, in connection with the Royal Society of Literature.

Testimonials.—We record with pleasure the recent presentation of a handsome set of robes to the Rev. R. Bilsonc, B.A., curate and evening lecturer of St. Luke's, Old-street, by a number of the ladies who form part of the congregation of the church under his excellent and exemplary guidance. The Rev. John Cumming Bright Baker, on leaving the curacy of Botley, Hants, was presented by the parishioners with a splendid set of robes, as a testimonial of the high sense they entertained of his exemplary manner of performing his duties during ten years.

Mr. Samson Ricardo was returned for the borough of Windsor on Wednesday, without opposition.

The Army Estimates.—The Army Estimates for the financial year ending the 31st of March, 1855, amount to no less than £13,721,158; being an increase of £6,586,672 upon the estimate for the present year. There being a decrease of £35,600 in non-effective services, the increase under the head of effective is £6,580,001. The effective services will cost £11,764,631; of which £7,316,000 is for the maintenance of the Army (deducting the troops in India), £88,000 for Volunteer Corps, and £4,813,000 for the Militia.

The 10th Hussars arrived on the 6th inst. at Alexandria. Between Bombay and Aden they lost seven horses; five died from natural causes, and two were shot, having been attacked by the glanders.

The large barracks at Smyrna is to be converted into a hospital for English troops. Lieutenant-Colonel Powell, 57th Regiment, has reached that city to take possession. The Ottoman troops are to be posted in other barracks. Other English officers are expected daily at Smyrna.

The Bombay Command.—A Court of Directors was held at the East India-house on the 7th instant, when Major-General Sir Henry Somerset, K.C.B., was appointed Commander-in-Chief of the East India Company's forces on the Bombay Establishment, and Second Member of Council at that presidency.

Sir C. Napier and Admiral Berkeley. Sir C. Napier sends to the *Times* the following letter, which he has addressed to Mr. Crauford, M.P.:—"Morpeth-hall, Horndean, February 11.—Sir,—I have been very much surprised at Admiral Berkeley's reply to your question. I do not intend to bandy words with the gallant Admiral, but I beg to tell you, when the papers—which I hope will be asked for—are produced, it will be seen that I was goaded to act contrary to my own judgment; that I was censured; and, finally, dismissed my command. I have the honour to remain, Sir, your obedient servant, Charles Napier."

The Vienna Conferences. The *Independance Belge* states, as from high authority, that the Conferences were to open on the 15th inst. Diplomatic gossip in Paris does not anticipate a pacific result from them. A diplomatist lately said, "The Conferences will end by the 1st of March, and then each party will draw the sword."

LATEST INTELLIGENCE.

PROPOSED AUSTRIAN LOAN.

The Earl of Westmoreland has had lately several conferences with Count Buol. It is confidently stated that they had for object to settle the conditions of a loan of fifteen millions sterling which the Austrian Government wishes to contract under the guarantee of England. The loan is to be brought out in London.

THE WAR IN THE CRIMEA.

The mail steamer from Constantinople of the 5th inst., arrived at Trieste on Thursday. Everything was prepared in the Crimea for an approaching assault. Favourable weather was anxiously expected. The French had extended their position to the extreme right. The British troops and the Imperial Guard were to form the reserve corps, and were also to be charged with the defence of Balaclava.

An answer was expected on the 6th at Constantinople, from Greece, to the propositions made by Redschid Pacha. The intelligence from Persia is unfavourable. Russian influence at Teheran predominates. The English Ambassador and M. Bourrée were about to present an ultimatum to the Shah, demanding an auxiliary corps of 30,000 men.

By the fire which broke out in the arsenal near the Golden Horn, a severe loss of stores was sustained by the French.

The *Danube* announces that 1500 Turkish prisoners who were being conducted under escort from Tiflis into the interior of Russia, have been rescued by Schamyl; and that Hussein Pacha has replaced General Guyon as Chief of the Staff of the Turkish army of Asia. It was regarded in Paris on Thursday, and to a considerable extent believed, that the Empress intended to proceed to the Crimea, there to take the chief command of the French army. The rumour was generally discredited.

THE NEW MINISTRY.

Sir Francis Baring has been appointed to the Chancellorship of the Duchy of Lancaster, in succession to Lord Granville. The Secretaryship to the Board of Control is not yet filled up, Lord Goderich having declined the office. The Right Hon. Henry Fitzroy resigns the office of Under Secretary for the Home Department, the duties of which he has so creditably discharged during the last two years. No appointment in his place has been yet made, nor has any successor been named to Mr. Peel as Colonial Under Secretary. We understand that the changes about to take place in the War Departments will have the effect of creating considerable alterations in the Ordnance, involving the abolition of some of the higher offices. Pending this arrangement, it is not probable that the Clerkship of the Ordnance, vacated by Mr. Monsell, will be filled up.—*Globe* of Friday.

THE BALTIC FLEET.

The professional character and standing of the Hon. Richard Saunders Dundas, C.B., who has just been appointed Commander-in-Chief of the Baltic fleet, affords ground for the happiest anticipations of the result. He is about the youngest admiral on the list, being in his 54th year, and consequently could not have participated in any of the actions of the last great European war; but in the operations in which he has been engaged in China he exhibited an amount of daring and judgment that called forth the warmest eulogy from his commanders. He subsequently had charge of a squadron in the Mediterranean, and we believe on all occasions kept up the best feeling with those serving under his command. Rear-Admiral Michael Seymour, the second in command, was flag-captain to Sir Charles Napier, and his last year's experience in the Baltic will not be his least qualification for the office. Rear-Admiral Robert L. Baynes will be the third in command, and Captain Pelham is likely to be Captain of the Fleet. *Ibid.*

LORD JOHN RUSSELL'S MISSION TO VIENNA.—We have reason to believe that Lord John Russell has accepted the duties of Lord's Plenipotentiary in the conferences and negotiations about to open at Vienna, and that his Lordship will proceed in a very few days to that destination.

LORD JOHN RUSSELL, who was to have left town for Vienna tomorrow, is, we regret to hear, suffering from severe indisposition, by which his departure will be delayed for some days. We trust the earliest moment that his health permits the noble Lord will proceed upon his mission, accompanied by Mr. Hammond, and other gentlemen from the Foreign Office.—*Globe of Friday.*

DESTRUCTION OF THE "MAURITIUS" STEAM-SHIP.—A fire broke out in the *Mauritius* steam-ship, in the Southampton graving-dock, on Friday (yesterday) morning, and, although there was plenty of water at hand, she was completely destroyed. There were 400 barrels of powder on board, which exploded at ten o'clock, but without doing the slightest damage. It is reported that the fire was the act of an incendiary, in consequence of the recent mutiny on board, and from expressions which have fallen from some of the crew. The value of the *Mauritius* is stated at £80,000.

MEETING OF LICENSED VICTUALLERS.—A meeting of delegates from the Victuallers' Defence Association throughout the country, was held yesterday at Cogers-hall, Bride lane, Fleet-street, to consider the best mode of obtaining a repeal of Wilson Patten's measure passed last session. The draft of a bill for repealing the obnoxious enactment was read and approved.

A SLEDGE MASQUERADE.—Potsdam was enlivened by an animated spectacle on Saturday evening. The officers of the garrison got up a masquerade, or rather *en costume* representation partly in sledges, and partly on horseback—wherewith they traversed the crowded streets, to the great delight, but not much to the historical edification, of the spectators. The masque represented an episode in the history of the Teutonic order during the year 1377. Its outline runs somewhat thus: The Grand Master Winrich, of Kniprode, having by his side the young Duke Albert III. of Austria, who had come to gain his Knight's spurs, determined to march with a chosen force of Knights and men-at-arms into the then Pagan Lithuania, and there to attack and chastise the "Lord of the Wild," Prince of that country. The expedition perfectly succeeded. The Knights were victorious in all their engagements, and the wild Kynstutt was so far dumpted that he used for peace, and, as a guarantee of security, proceeded to the Grand Master's quarters, with a train of richly ornamented sledges, to invite him and Duke Albert to a grand banquet. The invitation was accepted, and the German guests proceeded in Kynstutt's sledges to attain the fete, during which Duke Albert received the honours of knighthood, with the device of "Better aught in a service." The Potsdam chronicler also observes that the spectators were mightily pleased at the brilliant display, but, not being sufficiently versed in Teutonic history, were utterly at a loss to make head or tail of the pageant. There is another sledge episode in German history, of much more recent date, which would have been well adapted to the season and to general comprehension, and quite as appropriate on other grounds. This was the wonderful expedition undertaken during the severe winter of 1708, from Stettin, by the great Elector. Placing his infantry and field-pieces in sledges, and accompanied by a sufficient body of that redoubted horse which had routed the Swedes at Fehrbellin, that truly great Prince advanced in almost a direct line, over frozen rivers and hills, to Courland. Then, after reviewing his infantry as they stood up in their sledges, he advanced, overtook the Muscovites, formed his order of battle, attacked, defeated, and completely cleared East Prussia and the adjacent parts of those unwelcome and already-grasping neighbours. Those were great deeds, glorious for the illustrious House of Hohenzollern, and worthy of being represented, as they were undertaken, by gallant officers who may select episodes of national history for the edification and heart-warming of the public during frozen carnivals. But times are changed. If the dominant party had full sway, the Brandenburg railway to St. John would be more ready to receive a friendly but commanding visit from the orthodox legions of the present Lord of Lithuania, than to send forth its chivalry to imitate the daring exploits of Winrich of Kniprode, or those of the great Elector's glorious days.—*Letter from Berlin, Feb. 6.*

WHO'S TO BLAME?—Those who pretend to be behind the scenes say that Lord Raglan considers Mr. Filder has deceived him, and has at various times misrepresented the nature and magnitude of the means at his disposal, otherwise steps would have been taken to place our transport service on a better footing. Mr. Filder can, however, it is said, point to some important letters, written both before and after the 14th November to Lord Raglan, on the subject of transport and of the roads, in which he is understood to have declared he could not be responsible for the evils and misfortunes which might befal the army if the important matters to which he called attention were neglected.

ON Saturday the Comptroller for Transport Service forwarded a notice to Lloyd's intimating an augmentation of the fleet of transports, furnishing the "number" of the additional vessels hired by the Government, by which we find that almost every steam-ship in the mercantile service has been taken up for the purposes of the war. The transport fleet now number no fewer than 200 ships of the largest class, upwards of a third of which are propelled by steam.

OBITUARY OF EMINENT PERSONS.

THE DUKE OF GENOA

DEATH, asserts the poet, "æquo pulsat pede pauperum tabernas regumque turres." This can hardly be admitted with regard to the Royal house of Sardinia. Death has of late been so fatally active in the family of the Sardinian Monarch, Victor Emanuel II., that his Majesty and his infant children have now scarcely one grown relative left. First died the present King's gallant father, Charles Albert, whose sword was so strongly but so unfortunately drawn in the cause of freedom; then died Charles Albert's mother, the Duchess of Savoy and Princess Montléart, and just recently the deaths of Charles Albert's widowed Queen, and of the present King's beloved and excellent consort, have followed in rapidly awful succession. News still more recent announces the demise of King Victor Emanuel's only brother, the accomplished Duke of Genoa, who will be remembered in this country as an agreeable and popular visitor to our shores but a short time ago. This Prince, Ferdinand Maria Albert, Duke of Genoa, was the younger of the two sons of the late Charles Albert, King of Sardinia, Victor Emanuel II., the present Sovereign being the elder. The Duke was born the 15th Nov., 1822, and married, the 22nd April, 1850, the Princess Elizabeth, eldest daughter of John present King of Saxony, by whom (now his widow, in her twenty-sixth year) he leaves an infant daughter, Marguerite, born the 20th Nov., 1851. The Duke of Genoa was a General in his brother's service, and Commander-in-Chief of the Sardinian artillery. He died at Turin on the 10th instant. A Portrait of the Duke appeared in the ILLUSTRATED LONDON NEWS, No. 627.

VISCOUNT O'NEIL.

JOHN BRUCE RICHARD O'NEILL, Viscount O'Neil, of Shane's Castle, in the co. of Antrim, in the Peerage of Ireland, and one of the Irish Representative Peers, was the younger son of John O'Neill, the first Viscount, by his wife, Henrietta, only child of Charles Boyle, Lord Dungarvon. He was born the 20th December, 1780, and succeeded in the Viscounty of O'Neil on the 25th March, 1841, his brother Charles Henry St. John, the second Viscount, who was created Earl O'Neil in 1800; but whose Earldom became extinct on his dying without issue. The third Viscount (the subject of this notice) never married, and, consequently, the Viscounty now ends also with his demise. The Viscount died on the 12th inst., at his ancestral seat, Shane's Castle. His Lordship was a General in the British service, and held the offices of Constable of Dublin Castle and Vice-Admiral of Ulster.

The Viscount's family, of Milesian origin, is one of the oldest in the sister kingdom, proving a clear descent from Niall, Monarch of Ireland in the beginning of the tenth century.

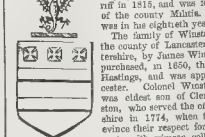
MARY ANN, VISCOUNTESS ST. VINCENT.

THE death of Lady St. Vincent took place at Meaford, county Stafford, on the 31st ult. Her Ladyship was second daughter of the late Thomas Parker, Esq., of Park-hall; and second wife of Edward Jervis, present Viscount St. Vincent. Her Ladyship leaves one surviving son—the Hon. Edward Swynfen Jervis, and one daughter, Mary Anne, widow of David Ochterlony D. Sombre, Esq.

BARONESS ROLLO

AGNES, Dowager Lady Rollo, widow of John, eighth Lord Rollo, died on the 3rd inst., at 1, Stanhope-street, Hyde-park-gardens. Her Ladyship, who was daughter of William Greig, Esq., of Gayfield-place, married June 12th, 1806, the eighth Lord Rollo, and became his widow December 24, 1846. Her Ladyship's issue consisted of three sons (of whom the eldest, William, was the late Lord Rollo), and two daughters, Mary Trotter, of Ballidean, and Martha, of Lieut.-Colonel Richardson Robertson, of Tullielitton.

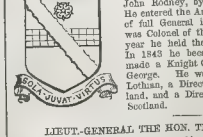
CLEMENT WINSTANLEY, ESQ., OF BRAUNSTON, COUNTY LEICESTER.



THIS respected country gentleman died on the 25th ult., at his residence Brookfield, near Teignmouth. He was a Magistrate and Deputy-Lieutenant for Leicestershire, served as High Sheriff in 1815, and was for some years Lieutenant-Colonel of the county Militia. At the period of his death he was in his eighteenth year.

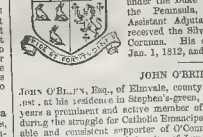
The family of Winstanley, one of remote antiquity in the county of Lancaster, was first established in Leicestershire, by James Winstanley, Esq., of Gray's-inn, who purchased, in 1650, the manor of Braunston from the Hastings, and was appointed, in 1653, Recorder of Leicester. Colonel Winstanley, the subject of this notice, was eldest son of Clement Winstanley, Esq., of Braunston, who served the office of High Sheriff for Leicestershire in 1774, when the gentlemen of the county, to evince their respect for him, arrayed themselves in blue coats with crimson collars, and attended Mr. Winstanley from his seat at Braunston in something like military order. Maternally, Colonel Winstanley was nephew of the first Lord Ranelifte, and, through his grandmother, Mary Prideaux, was a coregresentative of the baronetcial family of Prideaux.

GENERAL THE HON. SIR PATRICK STUART, G.C.M.G., COLONEL OF THE 44TH REGIMENT



THE death of this officer occurred on the 7th inst. at his seat, Eaglesscairnie, county Haddington, in the seventy-eighth year of his age. Sir Patrick was the second son of Alexander, tenth Lord Blantyre, by Katherine, his wife, daughter and heiress of Patrick Lindsay, Esq., of Eaglesscairnie. He was born in 1777, and married, in 1810, Catherine Henrietta, daughter of the Hon John Rodney, by whom he leaves a large family. He entered the Army in 1793, and attained the rank of full General in 1851. From 1837 to 1843 he was Colonel of the 60th Rifles, but since the latter year he held the Colonelcy of the 44th Regiment. In 1843 he became Governor of Malta, and was made a Knight Grand Cross of St. Michael and St. George. He was a Deputy-Lieutenant for East Lothian, a Director of the Royal Academy of Scotland, and a Director Extraordinary of the Bank of Scotland.

LIEUT.-GENERAL THE HON. THOMAS EDWARD CAPEL.



THIS venerable General died on the 3rd inst. at his residence, Charles-street, Berkeley-square, aged eighty-five. He was second son of William Anne, fourth Earl of Essex, by Harriet, his second wife, daughter of Colonel Bladen, and grandson of William, third Earl of Essex, by Elizabeth, his second wife, daughter of Wriothesley, Duke of Bedford. General Capel, who entered the Army April 10, 1788, served the campaign in Flanders under the Duke of York, and was subsequently in the Peninsula, where he was employed as Assistant Adjutant-General at Cadiz in 1811. He received the Silver War Medal with one clasp for Corunna. His commission of Colonel bears date Jan. 1, 1812, and that of General Nov. 9, 1846.

JOHN O'BRIEN, ESQ.

JOHN O'BRIEN, Esq., of Elmvale, county of Clare, died suddenly on the 6th inst., at his residence in Stephen's-green, Dublin. Mr O'Brien was for many years a prominent and active member of the Liberal party in Ireland, and during the struggle for Catholic Emancipation he distinguished himself as an able and consistent supporter of O'Connell. The honourable gentleman for several years represented the city of Limerick in Parliament. In private life his character was that of an amiable, generous, and high-minded Irish gentleman. He was brother to Mr. Serjeant O'Brien, M.P.

J. H. VIVIAN, ESQ., M.P.

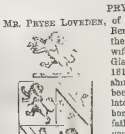
JOHN HENRY VIVIAN, Esq., M.P. for Swansea, died at his residence, Singleton, near Swansea, on the evening of Saturday last, in his 72nd year. He was the second son of John Vivian, Esq., of Truro, Vice-Warden of the Stannaries, and the brother of Sir Richard Hussey Vivian, first Lord Vivian; the present Lord Vivian is his nephew. Mr. John Henry Vivian represented Swansea and its contributory boroughs, Neath, Aberavon, Kenog, and Loughor, since their enfranchisement under the Reform Bill in 1832. So popular was Mr. Vivian among the electors, that he was always returned without a contest. He was the head of the firm of Vivian and Sons, the extensive copper-smelters. In politics Mr. Vivian was a moderate Liberal. When the Whigs were in office he generally voted with the Ministry, but not further than they did, in supporting the ballot and one or two other measures.

Mr. Vivian was ever held in high esteem for his private virtues, even by those who differed from him in politics. His munificence in favour of all the local charities and other eleemosynary establishments was proverbial throughout the county of Glamorgan.

Mr. Vivian married, the 30th October, 1816, Sarah, eldest daughter of Arthur Jones, Esq., of the Priory, Reigate, Surrey, and leaves issue four sons and five daughters. The eldest son, Hussey Vivian, Esq., is present M.P. for Truro; the eldest daughter is the wife of Sir W. Gibson Craig, Bart., and the third daughter the wife of William Jones Lloyd, Esq.

PRYSE LOVEDEN, ESQ., M.P.

MR. PRYSE LOVEDEN, of Gogerddan, in Cardiganshire, and Buscot-park, in Berkshire, died in London on the 31st ult. He was the eldest son of Pryse Pryse, Esq., by his second wife, Jane, daughter of Peter Cavallier, Esq., of Glaburnbrig, Cleveland, and was born the 1st June, 1815. He represented in Parliament the Cardiganshire boroughs for a period of six years, having been elected in 1849, on the death of his father, the late Pryse Pryse, Esq., who had represented those boroughs for thirty years. Mr. Loveden, like his father, was an ardent Reformer; and in two severely-contested elections succeeded in upholding his political views in his native county. His many virtues and kindness of heart so endeared him to his friends and neighbours, that three thousand of them attended his funeral. He was interred on Wednesday, the 7th inst., in the old parish church of Llanbadarn-Fawr, in



Cardiganshire. Mr. Pryse Loveden married Margaretta-Jane, third daughter of the late Major Rice, of Llwynybarus, Carmarthenshire, and leaves three children—one son and two daughters. Mr. Pryse Loveden was the representative of the two very ancient and honourable families of Pryse of Gogerddan or Gogerthan, and Loveden of Buscot. His father assumed the surname and arms of Pryse on succeeding to the Welsh estates of his maternal ancestors in 1786.

THE RIGHT REV. DAVID LOW, D.D., BISHOP OF ROSS, MORAY, AND ARGYLL

THE death of this venerable prelate is just announced. He had entered on his eighty-eighth year, and although younger than the marvellous old man of Magdalen College—the late Dr. Routh—he had been longer in holy orders, having been ordained a Deacon so far back as 1787. He was born near Brechin in 1768, educated at the University of Aberdeen, and afterwards under Bishop Gleig at Stirling, and settled as pastor at Pittenweem in 1790, since which period, for more than half a century, he fulfilled the duties there. He was consecrated Bishop of the united diocese of Ross, Moray, Argyll, and the Isles in 1819. A few years ago he effected the separation of the latter, and its erection into a separate see, by his own endowment; and, finally, he resigned his episcopal jurisdiction in 1850, when he was succeeded by Bishop Eden. The Bishop took a deep interest, and a frequent and active share, in promoting the great movements affecting the Episcopal Church of Scotland. Personally, the Bishop was one of the most interesting relics of the elder days of Scottish character and manners. His appearance was most striking—thin, attenuated, but active—his eye sparkling with intelligence—his whole appearance that of a venerable French shadow of the ancien régime. His mind was eminently buoyant and youthful, and his memory was a fount of the most interesting historical information, especially in connection with the Jacobite and Cavalier party, to which he belonged by early association and strong political and religious conviction. Born and bred in a district pre-eminently (at that time) devoted to the cause of the Stuarts, almost under the shadow of Edzell Castle, the ancient stronghold of the Lindsays in Forfarshire, and having lived much from time to time, in his early years, in the Western Highlands, among the Stuarts of Balschulish and Appin, he had enjoyed familiar intercourse with the veterans of 1715 and 1745, and detailed the minutest events and scenes of those times with a freshness and a graphic force which afforded infinite delight to his younger auditors. Nor was his traditional knowledge limited to the last century—it extended to the wars of Claverhouse and Montrose, to Bothwell Brig and Inverlochie; of anecdotes of old Scottish manners he possessed a most abundant and curious store.

THE RIGHT REV. OWEN EMERIC VIDAL, D.D., BISHOP OF SIERRA LEONE

THIS most estimable and accomplished prelate expired at sea, forty-eight hours before reaching Sierra Leone (to which colony he was returning), on or about the 23rd December, having been out visiting the churches in Yoruba. He was buried at Freetown on the 27th, and thousands of all classes attended his funeral. Dr. Vidal was born at Rachampstead, Berks, in 1810, the eldest son of Emeric Essex Vidal, Esq., R.N., of Graham Lodge, Hailsham, Essex, and the grandson, maternally, of the Rev. James Capper, Vicar of Wilmington. He received his education at St. Paul's School, Southsea, and at St. John's College, Cambridge, where he obtained a Lady Margaret Scholarship, was Senior Optime, and Second Class in Classics, in 1842. In the following year he was appointed Incumbent of Trinity Church, Dicker Common, Arlington, Sussex, and in 1852 was consecrated the first Bishop of Sierra Leone. He married, in 1852, Miss Hoare, fourth daughter of the Rev. Henry Hoare, Vicar of Framfield, Sussex.

LIEUT. HENRY CLARKE, R.N., son of Captain Clarke, R.N., formerly of Hyde-hall, Cheshire, died at Kensington, Lancashire, on the 4th inst. Lieut. Clarke entered the Navy in 1830, and went through much service in North America, the West Indies, and New Zealand. The fatigues he endured shattered his constitution, and caused his lamented death in his 39th year.

MISS MARY FRANCES FITZGERALD, a lady well known for her high mental accomplishments, and for her patronage of literature and the fine arts (her house being the favourite resort of writers, dramatists, and painters), died at her residence in the Royal Crescent, Brighton, on the 30th ult., in her 76th year. Mrs. Fitzgerald was a scion of the house of Leinster, being a descendant of that branch which descends from the second son of the first Earl of Kildare. Mrs. Fitzgerald's family held property in Waterford. She herself possessed large estates in Lancashire, as well as owning the historic manor of Naseby, in Northamptonshire, and the lands of Bonlge, in Sussex.

RICHARD PLUNKETT, Esq., the very last of the famous "Irish Volunteers" of '82, who in that year achieved Hibernian independence, died recently, at the patriarchal age of one hundred and seven, at the residence of his son, M. R. Plunkett, Esq., R.M., Nenagh, co. Tipperary.

THE REV. VILLIERS PLANTAGENET HENRY SOMERSET, twenty-eight years Rector of Honiton, whose death has just occurred, was the third son of General Lord Charles Somerset, Governor of the Cape of Good Hope, who was son of the fifth and brother of the sixth Duke of Beaufort. The rev. gentleman, who was born in 1803, married, in 1844, Frances, daughter of John Tierney, one of the House of Commons, and leaves issue. The rev. gentleman's only surviving brother is Lieut.-Gen. Sir Henry Somerset, K.C.B., the Commander-in-Chief at Bombay.

WILLS AND PERSONALTY.—The Most Noble John Marquis of Ormonde, of Kilkenny Castle, left personalty in England estimated at £6000. The Hon. Lieut.-General Sir George Calcraft, C.B., £5000. Rear-Admiral Sir Richard Countess, C.B., £2000. General James Hennessy, £20,000. The Rev. Dr. W. Warneford, D.C.L., £140,000. The Rev. M. J. Routh, D.D., President of Magdalen College, Oxford, died intestate, leaving personalty amounting to £60,000.

CHARITABLE BEQUESTS.—Miss Charlotte Rebecca Howard, of York-place, Marylebone, has left to charities a sum exceeding £12,000, as under:—The Clergy Orphan Asylum, St. John's-wood, £2000; Queen Charlotte's Lying-in Hospital, New-road, £1000; Royal Free Hospital, Gray's-inn-road, £1000; City Truss Society, Cheapside, £1000; Blind School, St. George's-circus, £1000; Seamen's Hospital, *Greenwich*, £1000; Destitute Boys, for All Classes, Haverstock-hill, £1000; Free Cancer Hospital, Chenies-row, Parliament-street, £1000; Society for the Protection of Cruelty to Animals, £1000, Hanwell Lunatic Asylum, £500; For Giving Nightly Shelter Houseless Poor, £500; and other sums to be invested and laid out in blankets and clothing, and other benevolent uses.

LORD PANMURE,

THE NEW MINISTER OF WAR.

When Lord John Russell, some few months since, first began to be dissatisfied with the management of the War Departments, the person whom he consulted as to the best mode of reorganising them was Lord Panmure, who had filled the office of Secretary at War during the six years of his (Lord John Russell's) Administration. When, also, Lord Palmerston became charged with the commands of her Majesty to form a Government, in place of being made War Minister, he, too, applied to Lord Panmure to fill that important office. In commenting on that appointment the noble Lord, who might be said to have originated it, paid a high compliment to the talents of Lord Panmure, and asserted his fitness for the post Speaking of the new War Minister, he said, that he was a perfect master of all the principles which regulate an army, and of all the details. He would, he had no doubt, turn his attention to every improvement relative to the supply of the army, and would not be induced to adopt, under the name of improvements, innovations which might be destructive of the army, but would adopt those improvements which the science of the present day would enable him to carry out. Lord John Russell also expressed his conviction that Lord Panmure would be ready to act in a manner which would increase the efficiency of our army, which had suffered, not from the want of discipline or the want of military organisation, but from the failure of the civil department. These are high praises and strong promises; but the past career of Lord Panmure leads to the opinion that they are not exaggerated or hazardous, but that they will be borne out by his subsequent proceedings.

It is as Mr Fox Maule that Lord Panmure is better known in the political and Parliamentary history of his country. During some twenty years he has filled, while his party have been in power, positions more or less important in the Government, and has invariably acquitted himself to the satisfaction of his superiors and of the public. He is one of those scions of the aristocracy whose whole life and conduct discredit the clamours which are now being raised against our existing institutions. He has those abilities, those qualities of mind and heart, those hard-working instincts, and those popular manners, which would have enabled him to rise in the State, had he entered Parliament only with the ordinary advantages, and trusted to his own powers to make his way. He is descended from the same family as the Earl of Dalhousie. His father was the youngest son of the eighth Earl of Dalhousie (the present Marquis is the tenth); but he changed his name from Ramsay to Maule on succeeding, through his grandmother, to the estates of the old Earls of Panmure. When he was raised to the peerage in the year 1831 (we speak still of the father of the subject of this notice) he took the title of Panmure, thus perpetuating indirectly the extinct honours of his family. It might be supposed that it was to the influence derived from these family associations that Mr. Fox Maule owed his election and advancement in political life. So far from this being the case, it is generally understood that he derived no advantage whatsoever from the wealth and position of his father, for reasons into which it is needless here to enter.

Mr. Fox Maule, then, entered public life with scarcely any more advantages than those of any other public gentleman seeking advancement in the State Born in 1801, he early obtained a commission in the 79th Highlanders, in which regiment he served for twelve years It was not until the age of thirty-four that he entered the civil service of the country. On the accession to power of Lord Melbourne, in April, 1835, that nobleman offered to Mr. Fox Maule the post of Under Secretary of State for the Home Department; and he continued to discharge its duties until the month of June, 1841. He was early noticed as a collected and sufficiently fluent speaker, a good man of business, remarkable for *bonhomie*, and yet always commanding the respect of the House by his quiet dignity and self-possession. The excellent manner in which he had discharged the duties of this subordinate post led to his being nominated Vice-President of the Board of Trade in the month of June, 1841

THE NEW MINISTER OF WAR, THE RIGHT HON. LORD PANMURE.

He had scarcely found an opportunity of showing his capacity for his new duties, and of defending the commercial policy of the Government against the assaults of Sir Robert Peel and his then Protectionist followers, when the success of the Conservative Opposition led to the dissolution of Parliament, and the return of the immense Conservative majority which finally overthrew Lord Melbourne's Government. During the foregoing period Mr. Fox Maule had sat for Perthshire, from 1835 to 1837, and for the Elgin districts of burghs from 1838 to 1841. At the general election of the latter year he did not resume his connection with his former constituencies, but stood successfully for Perth city, which he continued to represent during the next eleven years

In the opposition, if such it can be called, which was maintained by Lord John Russell and the Liberal party against Sir Robert Peel, Mr. Fox Maule took a distinguished, and sometimes even a leading, part; and on more than one occasion he developed striking debating powers. On the rupture between Sir Robert Peel and his party, which was the consequence of his repeal of the Corn-laws, Mr. Fox Maule came into office with Lord John Russell. It was now that he first became connected with the War Department, for which his military experience, as well as his general temperament, fitted him. In discharge of his duties as Secretary at War, from the accession of the Russell Ministry in July, 1846, to certain changes which preceded its downfal in February, 1852, he commanded the confidence of his colleagues, and generally satisfied his critics in the Army. How he performed those duties may be inferred from the spontaneous tribute of praise on the part of Lord John Russell to which we have already alluded. Lord Palmerston, as the Foreign Minister of that Government, also enjoyed constant opportunities of appreciating the services of the right hon. gentleman, and to this date we must refer the formation of the opinion which has now led to Lord Panmure's appointment to the most onerous and responsible office in the Ministry at the present crisis. Mr. Fox Maule's official career was once more varied by a change of office, ere he temporarily retired from political life. After yielding up the War-office at the commencement of February, 1852, he became President of the Board of Control, and continued to hold that post until the resignation of Lord John Russell's Administration Lord Panmure—for by the death of his father he had now succeeded to the title—took no part in the arrangements which led to the formation of the Coalition Government; but the reputation he had made led to his almost immediate selection for the office of War Minister, as soon as it became clear that Earl Grey could not accept the post. Considering that we are actually at war, and that a time of war is not the best for organic changes, however necessary in the abstract, it is perhaps preferable that we should have at the head of the War Department, and invested, as it is to be hoped he is, with plenary powers, a man of the character, experience, and temperament of Lord Panmure, who will not needlessly outrage military prejudices, yet will not yield to the spirit of routine; who is courageous enough to resolve on any changes, however great, yet practical enough and (so to speak) soldier enough not to insist on reforms for mere theory's sake; and whose general bearing, whether in Parliament or in his department, is such as to command respect, while conciliating the confidence even of the most susceptible of military men.

Lord Panmure is the second Baron—the eldest son of the first Baron, by his first wife, who was daughter of Gilbert Gordon, Esq., of Halleaths. The late Lord Panmure married a second time, in March, 1822, Elizabeth, daughter of Barton, Esq., who still survives. The present Lord Panmure was born at Brecon Castle, in Forfarshire, in 1801; so that he is still in the full vigour and maturity of his powers; and he married, in 1831, the eldest daughter of the first Lord Abercromby, who died in 1853. In November, 1843, while still Mr. Fox Maule, Lord Panmure was elected Lord Rector of the University of Glasgow. In June, 1849, he was appointed Lord Lieutenant of Forfarshire, and in May, 1855, Lord Keeper of the Privy Seal of Scotland. Lord Panmure has no children, and his heir presumptive is his brother.

The accompanying Portrait has been engraved, by permission of Messrs. Graves and Co., of Pall-mall from a fine print, just published by that firm.

SITE FOR A BRITISH HOSPITAL, AT CONSTANTINOPLE.

A short time since it was stated in the *Journal de Constantinople*, the site of the old Palace of Galata Serai, which was burnt down about six years since, had been placed at the disposal of the British Government, for the erection of an Hospital. One of the Artists attached to the Illustrated London News, who was at the time waiting at Constantinople for his passage to the Crimea, sketched the picturesque locality, a pleasant spot on the south side of the Rue de Pera, within fifty yards of the British Embassy. It commands a beautiful view of the entrance to the harbour of the Golden Horn, Seraglio Point, Princes' Islands, and the Sea of Marmora, with Mount Olympus in the distance.

CONSTANTINOPLE. PROPOSED SITE FOR AN ENGLISH HOSPITAL.

ILLUSTRATED LONDON NEWS

LANDING THE WOUNDED FROM H.M.S. "RETRIBUTION," AT PORTSMOUTH—(SEE NEXT PAGE.)

THE WAR.—LANDING OF THE WOUNDED AT PORTSMOUTH

The large Illustration engraved upon the preceding page was sketched by our Artist at Portsmouth, on the afternoon of the 24th ult.; and shows the landing of the wounded and invalid soldiers from the *Retribution* steam frigate. The vessel presented a singular appearance from having lost her mainmast, and bearing other marks of having seen hard service. Two or three stretchers were put in requisition for severe cases; and the body of a soldier who had died on the previous day was landed.

The reception was an interesting scene. Vice-Admiral Sir Thomas Cochrane was present on the jetty when the *Retribution* was hailed alongside. The military authorities were also promptly on the alert. Nothing could exceed the attention paid by them to the careful landing of those men who were so helpless as to require stretchers. The Admiral Superintendent's Flag Lieutenant, Mr. Waddilove, was present at the disembarkation, which commenced immediately the vessel got moored. All were out of the ship by a quarter-past twelve; and the body of the deceased John Thompson, of the 19th, was removed from the ship in a shell, covered with the union-jack. The most urgent cases were taken to the garrison hospital, and the rest were berthed in the new auxiliary hospital adjacent to the Millbank; all receiving the utmost attention of the medical staff.

The invalids, about fifty in number, walked ashore—some carrying their comfy kits or little bundles; some assisted in their short walk to the omnibus close by with the broad shoulder of a hearty blue-jacket. They were mostly wrapped up in their regimental dark grey great-coat. No great uniformity of dress prevailed: here one of the 11th Hussars with his red trousers and little foraging-cap; there one of the heavy cavalry with his uncut whiskers and beard, and his complexion yellow and bearing the stamp of long sickness, and perhaps of a hospital atmosphere. A few omnibuses were ready to convey them to the railway station and hospitals.

NAVAL AND MILITARY INTELLIGENCE.

OFFICIAL DESPATCHES FROM THE CRIMEA.

(From a *Supplement* to the *London Gazette*.)

War Department, Feb. 12, 1855.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Grace the Duke of Newcastle, by Field-Marshal the Lord Raglan, G.C.B.:

Before Sebastopol, Jan. 27, 1855.

My Lord Duke,—I have the satisfaction to acquaint your Grace that the weather continues fine. There are severe frosts at night; but the sun shines brightly through the day, and there is an absence of wind, which, whilst it continued, added considerably to the sufferings of the troops.

Every exertion is making, by public transport and individually, in getting huts up; but this is a most difficult operation, and the ground is still so rotten that it is a most arduous labour to pass along it.

The extremely confined space of Balaclava, and the vast accumulation of stores, has obliged me to erect huts at some distance outside the town for their reception.

I enclose the list of casualties to the 25th instant inclusive.

I have, &c., RAGLAN

His Grace the Duke of Newcastle, &c.

NOMINAL RETURN OF NON COMMISSIONED OFFICERS AND PRIVATES WOUNDED, FROM 3RD TO 8TH JAN., BOTH INCLUSIVE.

Scots Fusilier Guards.—Privates James Ahlo, severely	8th.—Privates John Rogers, slightly. Richard Mounsey, Patrick Hogan severely
1st Battalion Rifle Brigade.—Privates Henry Ralph Edmund Byer, slightly.	30th.—Private William Birch, severely.
1st Foot.—Private Lawler, severely	38th.—Privates James Shearman, Edwin Elsey, severely. Austin Fitzgibbon, slightly.
17th. Private Thomas Loftus, severely (since died)	44th.—Private A. Mahon, slightly

Admiralty, Feb. 13, 1855.

A despatch has been received from Rear-Admiral Sir Edmund Lyons, of which the following is an extract:

Agamemnon, off Sebastopol, Jan. 27, 1855.

Sir,—I have the honour to report, for the information of the Lords Commissioners of the Admiralty, that since my last general letter of the 23rd inst. the weather has been unsettled and fine, but with the latter the army has been much benefited by the change. A good deal of progress has been made in hutting the troops and distributing the clothing which has been so liberally sent out from England—so that the men express themselves as being comfortable

2. The health of the fleet and of the naval brigade is excellent. The men are well supplied with fresh meat and vegetables, and also with oranges, sent from Malta by Rear-Admiral Stewart.

3. The fire from the batteries of the Allies has increased during the last week, and that of the enemy has not slackened. New guns have been mounted in our batteries during the last four days.

4. On the 24th instant I passed the day at Balaclava to superintend the service going on there, and to make inquiries and examine into matters connected with the duties of the port and the transport service. I met Lord Raglan there by appointment, and we made some arrangements which will, I trust, have a beneficial effect.—I have, &c.,

(Signed) E. C. LYONS,
Rear-Admiral and Commander-in-Chief

To the Secretary of the Admiralty.

AUGMENTATION OF THE ARMY.

The Army for the ensuing year, exclusive of artillery, engineers, and of the troops in India, will consist of 6947 officers, 13,643 non-commissioned officers, trumpeters, and drummers, and 173,005 rank and file—making 193,595 individuals of all ranks. Of these 178,643 will be British troops; and as the number this year amounts to 142,776, it will be seen that the Army will be increased by 35,869 men. In the cavalry no augmentation will take place in the three regiments of Household Cavalry, in the 1st, 2nd 3rd, 6th, and 7th Dragoon Guards, the 3rd Light Dragoons, 7th Hussars, 9th Lancers, 10th Hussars, 12th Lancers, 14th Light Dragoons, 16th Hussars, and 16th Lancers. The 4th and 5th Dragoon Guards, 1st Royal Dragoons, Scots Greys, Inniskilling Dragoons, 4th Light Dragoons, 8th and 11th Hussars, 13th Light Dragoons, and 17th Lancers will each be raised from the present establishment of six troops (27 officers, 32 non-commissioned officers, 328 men, and 271 horses per regiment) to eight troops of 76 men. The strength of these regiments will then be 34 officers, 55 non-commissioned officers and trumpeters, 639 rank and file, and 520 horses each. Of this strength six troops will be in the Crimea, amounting in round numbers to about 280 men, and the remainder will form a dépôt at home. Our force of cavalry in the Crimea under the new arrangement should be therefore over 5000

The following infantry regiments will be raised to the strength of 68 officers (4 field-officers, 12 captains, 4 lieutenants, and 8 staff), 140 non-commissioned officers, drummers, &c., and 2000 rank and file, making 2217 of all ranks, of which it is intended that 1400 should be always on active service:—1st Royal Regiment (1st Battalion), 3rd Buffs, 4th King's Own, 7th Fusiliers, 9th Regiment, 14th, 17th, 18th Royal Irish, 19th, 20th, 21st Fusiliers, 23rd Royal Welsh Fusiliers, 28th, 30th, 33rd, 34th, 38th, 39th, 41st, 42nd Highlanders, 44th, 46th, 47th, 49th, 50th, 51st Light Infantry, 55th, 57th, 62nd, 63rd, 88th Light Infantry, 71st Highland Light Infantry, 77th, 79th Highlanders, 80th, 88th Connaught Rangers, 90th, 93rd Light Infantry, 93rd Highlanders, 94th, 95th, and 97th.

No additions will be made to the Foot Guards, the Grenadiers remaining on their present establishment of three battalions (3549 of all ranks), and the Coldstream and Scots Fusilier Guards of two battalions (2439 of all ranks) It is not true, as stated, that a third battalion is to be added to the 1st Royal Regiment. The 60th Rifles and the Rifle Brigade will, however, each have a third battalion of 68 officers, 149 sergeants and drummers, and 2000 rank and file

An order is daily expected at Sheerness for several steam-vessels of light draught of water (principally gun-boats) to proceed to Copenhagen at the earliest opportunity on the breaking up of the ice, as a squadron of observation, to cut off communication and traffic with Russian ports in the Baltic

All the commissioned appointments, civil and military, in the "Land Transport Corps" now forming for the Crimea are filled up. Direct appointments to the non-commissioned ranks of superintendent and sub-superintendent can only be given to men who are, or have been, non-commissioned officers in the Army, or who hold a corresponding rank in the police forces of Great Britain and Ireland. All other candidates must, in the first instance, enlist as second-class drivers.

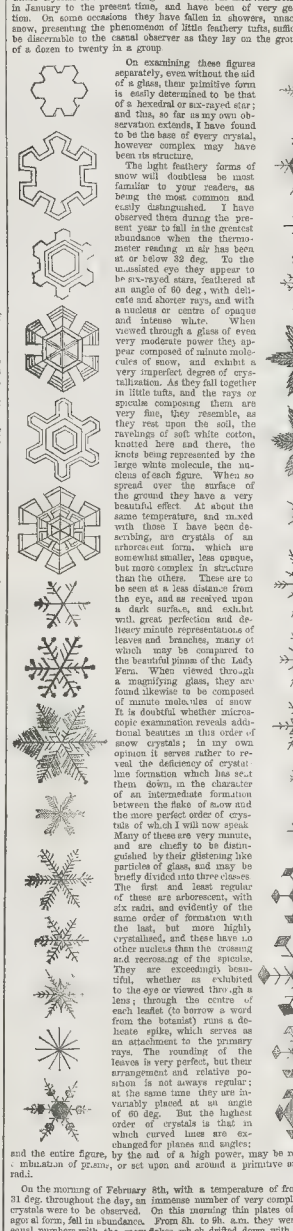
The 63rd Regiment—or rather the remains of it—marched on the 21st ult. to Balaclava, there to embark either for Scutari or Malta It left 30 strong, every officer, regimental staff, and all hands included (scarcely a sufficient escort for the colours), after landing in the Crimea about 970 strong, and having since received a draft of 30 men. There was one sergeant only to represent the grenadier company remaining, out of 120. The returns show 400 men in hospital at Scutari

The 22nd and 68th Regiments being about to leave the Bengal Presidency, on their return to England, the Commander-in-Chief has issued a general order to be issued previous to their departure, specially congratulating those regiments upon their conduct while in India, and wishing them success and distinction on whatever service it may be their fortune to be engaged.

SNOW CRYSTALS.

To the Editor of the Illustrated London News.

I find that, amid the severity of the weather during the last few weeks, the multiplicity of snow crystals which have fallen with the recent snow showers and storms have attracted very considerable attention. It may be interesting to your readers if I describe briefly the results of my observations on this remarkable feature of the snow-fall of the present year. These crystals have fallen in great numbers at intervals from the last week in January to the present time, and have been of very general distribution. On some occasions they have fallen in showers, unaccompanied by snow, presenting the phenomenon of little feathery tufts, sufficiently large to be discernible to the casual observer as they lay on the ground in clusters of a dozen to twenty in a group.



On examining these figures separately, even without the aid of a glass, their primitive form is easily determined to be that of a hexadral or six-rayed star; and this, so far as my own observation extends, I have found to be the form of every crystal, however complex may have been its structure.

The light feathery forms of snow will doubtless be most familiar to your readers, as being the most common and easily distinguished. I have observed them during the present year to fall in the greatest abundance when the thermometer reading in air has been at or below 28 degs. Then the unassisted eye they appear to be six-rayed stars, feathered at an angle of 60 degs., with delicate and shorter rays, and with a nucleus or centre of opaque and intense white. When viewed through a glass of even very moderate power they appear composed of minute molecules of snow, and exhibit a very imperfect form of crystallization. As they fall together in little tufts, and the rays or spicules composing them are very flaky, they resemble, as they rest upon the soil, the ravelings of soft white cotton, knotted here and there, the knots being represented by the large white molecule, the nucleus of each figure. When so spread over the surface of the ground they have a very beautiful effect. At about the same temperature, and mixed with these I have been describing, are crystals of an arborescent form, which are somewhat smaller, less opaque, but more complex in structure than the others. These are to be seen at a less distance from the eye, and as received upon a dark surface, exhibit with great perfection and delicacy minute representations of leaves and branches, many of which may be compared to the beautiful pinna of the Lady Fern. When viewed through a magnifying glass, they are found likewise to be composed of minute molecules of snow It is doubtful whether microscopic examination reveals additional beauties in this order of snow crystals; in my own opinion it serves rather to reveal the deficiency of crystalline formation which has set them down, in the character of an intermediate formation between snow and the more perfect order of crystals of which I will now speak. Many of these are very minute, and are chiefly to be distinguished by their glistening like particles of glass, and may be briefly divided into three classes The first and least regular of these are arborescent, with six radii, and evidently of the same order of formation with the last, but more highly crystallised, and these have no other nucleus than the crossing and recrossing of the spicules. They are exceedingly beautiful, whether as exhibited to the eye or through a glass; through the centre of each leaflet (to borrow a word from the botanist) runs a delicate spike, which serves as an attachment to the primary rays. The rounding of the leaves is very perfect, but their arrangement and the form of dispersion is not always regular; at the same time they are invariably placed at an angle of 60 degs. The next higher order of crystals is that in which curved lines are exchanged for planes and angles; by the aid of a high power, may be resolved into a combination of prisms, or set upon and around a primitive arrangement of radii.

On the morning of February 8th, with a temperature of from 29 deg to 31 deg. throughout the day, an immense number of very complex and perfect crystals were to be observed. On this morning thin plates of ice, of hexagon al form, fell in abundance. From 8h. to 9h. a.m. they were in a nearly equal numbers with the snow flakes, which drifted down with great rapidity. From 9h. to 10h. a.m. a remarkable variation in their figure was to be observed. The plain hexagonal figure became the nucleus of an order of forms composed of prisms, arranged around the six angles of the original figure; and on this morning, for the first time, I observed a series of inner markings within the crystals, which betokened a high degree of crystallisation, and which I had only previously observed in the drawings of Dr. Scoresby, of the crystals seen by him in the Arctic Seas Up to midday I observed a large variety of combinations—the difference chiefly consisting in the form of the prisms, their method of grouping, and the number and arrangement of the inner markings. From noon to half-past twelve I made drawings of a few specimens, in which the most complex of the figures I have described served as the nucleus of an arrangement of a far higher and more complex order than commonly to be observed; from the nucleus diverged spicules, clubbed at the extreme end with an elongated prism, while on either side of the spicules were arranged prisms at an angle of 60 deg., resembling in their disposition the pinnæ of a fern. Within each prism were duplex and triplex markings of great delicacy, which communicated to the specimens, as viewed through a lens of high power, an exquisite degree of finish. Intermediate between the six spicules so laden were six other rays clubbed with prisms. In one variety I observed these were elongated to very graceful proportions, whilst in another they were clubbed to almost an oval figure. In one specimen that came beneath my careful observation two of the spicules considerably exceeded the remainder in length, and remains an exception to my experience. From 12h. till towards 4h. p.m. the number of crystals much diminished; but the snow during the interval fell faster and more thickly; at 4h. it was drifting in all directions, and was a storm. About this time the crystals commenced falling in greater numbers, but their character was altered; the six-sided figures of the morning had almost disappeared, and were exchanged for those of arborescent form, highly crystallised; by candle-light they glistened in the snow as the grains of mica in a piece of granite

The last of the three classes I have grouped together as belonging to the higher stages of crystallisation are those which combine a nucleus of prisms with an arborescent and prismatic arrangement of rays. This is an extremely beautiful order, and on this day (Feb. 13), while I am writing, is drifting in large numbers, unaccompanied by flakes. In the greater number of these specimens that I have examined, the nucleus exhibits a very regular and complex arrangement of prisms. The primary figure, composed of six rays, is studded with prisms for half or a third of the way up, when the more crystalline formation gives way to the arborescent, or, as I am led to imagine, less perfect stage of crystallisation), and the ray is completed with a crown of leaves, which, composed of granulated portions of snow, are distinguished by an opaque and intense white. They are of considerable size, and falling in numbers both singly and together, with a temperature of from 26 deg. to 29 deg.; interspersed here and there with them are a few of very complete structure.

Thus far I have endeavoured, for the sake of brevity, to classify into a few distinct orders the almost numberless varieties of crystals; but in each class there are so many individual varieties, that I despair of conveying to your readers any adequate idea of the infinity of changes wrought in these figures in virtue of the conditions operating upon their formation, of which we know so little.

For the information of those who would carefully observe snow crystals, I may remark that my own plan of procedure is to expose a thick surface of plate-glass on the outer side of the window, resting on the ledge. Seated within the room, at the open window, I am enabled, with comparative comfort, and at my leisure, to make my drawings and record my observations, the accuracy of which I am able to verify to my satisfaction, as the crystal received upon the cold surface of the glass, itself several degrees below freezing, remains a sufficient length of time for the requirements of the observer. In many cases it becomes frozen to the glass, and is thus secured from the influence of the wind, which not unfrequently snatches away some most intricate form from the desiring eye of the observer.

It is worth recording, that in two instances I have observed a change in the figure of the crystal on being deposited on the receiving surface of the glass. On both these occasions I had previously blown away the accumulation of snow, and my breath had warmed the glass, and at the same time left a deposit of moisture. I observed a crystal change the form in which it had descended instantaneously for another on touching the glass, with the same movement and rapidity with which the figures in the kaleidoscope are seen to change. In both cases the crystals were quickly dissolved upon the warm glass, and I lost the opportunity of ascertaining the nature of the change which had been effected in the original figure. I forbear at present to put forward any theory respecting their formation and variety, at the same time I am doubtless attributable to the different strata of the atmosphere, and the differing intensities of cold. The annexed Drawings are magnified copies of a few I have observed, drawn by Mrs. Glaisher.

I am, sir, &c., JAMES GLAISHER.

Lewisham, Feb. 13, 1855

Miss Martineau is so dangerously ill as to leave no hope for her recovery. Her disease is enlargement of the heart.

Prussian Commerce.—From the official tables just published of the state of the Prussian mercantile navy, it appears that the total number of their ships amounts only to 829, of an aggregate tonnage of 133,500 lasts, equal to 267,000 tons. The greatest shipowning port is Stettin, with 157 vessels; Stralsund owns 108; Dantzic, 106; Barth, 84; and Memel, 76. The rest are distributed among twenty-one other ports. The average size of the vessels is about 400 tons.

Prussian Neutrality.—According to mercantile reports large quantities of lead are being imported into Dantzic. This lead thence finds, or will find, its way into Russia, there to be converted into balls to be fired at the Allied troops It is high time that the Board of Trade, or some other board, should look to those matters. Indeed, it is high time that every article susceptible of being converted into warlike purposes should be forbidden to be exported to any ports or places north east of Dunkirk. This would be an act of defence, not of aggression; and some such measures must be adopted if we sincerely intend to prevent supplying Russia, through Prussian agency, not only with raw materials for her factories, but with contraband of war to be employed against ourselves.

Increase of Insanity.—In the city of London without any increase of population—the number of lunatic poor has doubled within the memory of some of the guardians; and the cause has baffled their inquiries. Some are inclined to attribute this dreadful visitation to excess of vehemence and strife in commercial pursuits, or in mental exertions; others to diet, and some partially to the effects of railway travelling.

A Discovery in Time. It appears that, according to "official routine," the commission for the appointment of the Irish Solicitor-General as a going Judge of Assize at the ensuing Circuit was actually drawn up in the "proper quarter," when a discovery was made, the effect of which was the immediate cancelling of the hon. and learned gentleman's temporary promotion to the Judicial bench. At the eleventh hour it was recollected that no Member of the House of Commons was competent to discharge the duties of a going Judge of Assize without having first taken the disagreeable preliminary step of resigning his seat, as the *sine qua non* for his acceptance of the office.

A Worthy Veteran.—Previous to the departure of the 48th Regiment from the Citadel Station, Carlisle, last week, a poor woman, the wife of one of the men, and mother of six children, made a most touching appeal for the release of her husband from foreign service. If a volunteer could be procured, she was informed, he might remain. On hearing this a veteran, "without incumbrance," whose period of service had nearly expired, stepped forward and offered to take the place of the husband and father. His offer was accepted, and the overjoyed father was at once restored to his family. On taking his place in the ranks the noble fellow was loudly cheered.

Trade with Russia.—The Court of the Russia Company had an interview with Lord Clarendon on Monday, upon the subject of the Government policy regarding trade with Russia. We understand that Lord Clarendon stated to the deputation that the blockade of the Danube would be immediately raised; and the blockade of the Russian ports in the Baltic and in the Black Sea, and White Sea, would be rigidly enforced during the ensuing campaign; and that with regard to the overland trade through Prussia the Government had as yet come to no decision

Divorces in San Francisco. Divorce cases form an important branch of legal practice here. Of these interesting cases we have had thirty-eight in the course of this year in San Francisco, all carried to a successful issue. This in a population of 40,000, where the proportion of married persons is very small, would indicate a "free and easy" sort of disposition. The oddest thing is that the divorced persons come together again. I have known them to be remarried. Divorce cases are falling off, however, or they are becoming exhausted.—*Letter from San Francisco.*

Sebastopol Handkerchiefs.—The *Gazette de Lyon* states that, when intelligence arrived by the electric telegraph at the Lyons firms of the fall of Sebastopol, orders were instantly sent to Lyons by firms of Paris to manufacture at once a large quantity of pocket-handkerchiefs, giving a "View of the Ruins of Sebastopol." Accordingly the looms were worked night and day, the handkerchiefs could not be completed before the news turned out to be false. Since then they have remained on hand. Now, however, says the *Gazette*, the firms of the Paris firms are proposing the pocket handkerchiefs for sale to provincial dealers, in order that they may be able to offer them to their customers the moment the news of the capture of the town shall have arrived.

Provisioning our Army in the Crimea.—A firm of the highest respectability in the provisioning trade are prepared to bind themselves in the heaviest penalties which the jealousy of Government can impose to supply to the British army in its present position, or anywhere within 200 miles of the coast, food consisting of three meals a day, to be cooked and delivered at the head quarters of each battalion. The breakfast is to consist of tea, coffee, or cocoa, according to choice, and of fresh-baked bread; the dinner of bread, meat, and potatoes, with a quart of malt liquor, and the ordinary allowance of rum. They undertake to give fresh meat twice a week, and vegetables besides potatoes. To this is to be added a very comfortable evening meal. They are willing to bind themselves under the heaviest penalties, not merely for the performance of the contract in general, but for the punctual delivery of every meal to the soldiers. They ask no assistance whatever from the Government for performing this task, except their forbearance and non-interference. They want neither our ships, our horses, our carts, nor our men. They are contented to take their orders as they find them, and to relieve the British soldier from any care or thought for his own maintenance. And this service they are ready to perform at the rate of 3s. 3d. a-head per diem, expressing a very confidence that they shall gain at least 9d. a-head by the contract' Observing, also, the miseries suffered by our men from defective tents, they are willing to undertake, for another 3d. a-head, to provide our soldiers with excellent tents, to be approved by the commanding officer, and to be replaced whenever disallowed. Thus, for 6d. a-head per diem is a firm of the most undoubted respectability and solvency willing to undertake, under the most ruinous penalties, to provide our troops with competent food and shelter. A rough calculation will show that, at this rate, an army of 30,000 men might be fed and sheltered for about £1,825,000 per annum.—*Times.*

MUSIC.

THE NEW PHILHARMONIC SOCIETY had their first concert of this season on Wednesday evening, at Exeter-hall, instead of St. Martin's hall, where their concerts were given last year. The reason for this change is not apparent; for it is generally thought that, for performances of this kind, St. Martin's-hall is the more desirable locality of the two For sacred choral concerts on a very large scale, like those of the Sacred Harmonic Society, which demand a vast space for the diffusion of a great mass of sound, and also for the proper accommodation of an immense audience, such a place is demanded; but the case is different with the secular and miscellaneous music of the concert-room; and besides, Exeter-hall is too large for any audience which the New Philharmonic Concerts have hitherto obtained, or have any prospect of obtaining. The society seek this year to establish an additional claim upon the public by announcing that the profits of their concerts shall be wholly devoted to the cause of charity. Each concert is to be in aid of one of the charitable institutions of the metropolis—the first being for the benefit of the Asylum for Idiots. It is always praiseworthy to enlist the arts in the service of beneficence; and we give the society credit for the goodness of their motives; but we doubt whether they will be able to effect much in this way. The success of the concerts will depend, as it has done before, on their intrinsic attractions. Hitherto they have produced no profit; indeed the society expressly admit positive loss to a great amount on every previous season. To turn the balance the other way it is not enough that the concerts are to be charity concerts; it will be necessary to increase their value in an artistic point of view; and, if we are to take the first concert as a sample of the series, we cannot say this is done. That concert, though entitled to praise in various respects, did not rise above the average merit of the performances of the three past seasons: indeed, it rather fell beneath it. It did not in the slightest degree make good the professedly distinctive object of the New Philharmonic Society, that of bringing forward new works by modern and native composers. There was not a note by a native composer; nor, with one exception, was there a piece that was not quite familiar to the musical public; and, as to the exception, it belonged to a foreign composer who has been dead nearly twenty years. The programme will enable our readers to judge for themselves:—

PART I.

Overture (Egmont)	Beethoven.
Grand Choral Work in C (first time of performance in this country), the solo parts by Miss Birch, Miss Dianelli, Miss Murrai, Miss Dyer, Mr. Augustus Braham, Mr. Roberts, Mr. Smythson, Mr. Hamilton Braham	Cherubini.
Symphony in A	Beethoven.

PART II.

Overture (Ruy Blas)	Mendelssohn
Aria, "Parto; ma ti, ben mio" (La Clemenza di Tito), Miss Birch, clarinet obligato, Mr. Lazarus	Mozart
Solo, Violin, Fantasia on "Il Pirata," Herr Ernst	Ernst
Part-song (chorus), "O hills, O vales"	Mendelssohn.
Overture (Euryanthe)	Weber.

The conductor was Dr. Wylde; who, we observe, is to direct the first four concerts, and the last two are to be directed by M. Hector Berlioz.

The single novelty—a novelty to the general public, but not to amateurs—was the fourth mass—ridiculously designated in the programme as the "Grand choral work in C"—of Cherubini. This mass was well worth giving; for, though it cannot be performed to advantage in a concert-hall, its meaning and effect depending upon its union with the Catholic ecclesiastical service, of which it forms a part, yet, as we cannot hear it in this way in England, it is better to hear it, however imperfectly, at a concert, than not to hear it at all; the more especially as the music of Cherubini is not sufficiently known in this country. It is, indeed, a grand and beautiful work, combining the pure, graceful, and expressive melody of the Italian school, with the richest harmony and the most profound counterpoint. The performance on the whole was very interesting; but it demands more study and rehearsal than it evidently has as yet received. The solo singers and the instrumental band acquitted themselves well; but the chorus was very deficient in steadiness, smoothness, and delicacy.

As all the rest of the concert consisted of things which are familiarly known, it calls for little remark. Beethoven's symphony, and the three overtures, were played in a manner which did great honour to the orchestra and their conductor. Miss Birch sang Mozart's fine air very beautifully, and was well accompanied on the clarinet by Mr. Lazarus. Ernst contrived to have shown his charming talents in something of more consequence than a slight fantasia on an opera air. Mendelssohn's part-song is often sung at our chamber concerts. It requires to be nicely sung by a small number of well-trained voices: its power in the full chorus of twenty-four number of well-trained voices is not sufficient to make it completely lost in the mouths of a great miscellaneous chorus.

AUBER'S ballet-opera, "Le Dieu et la Bayadère," has been produced at the ADELPHI with success, under the title of the "Unknown and the Bayadere." It was popular in Paris some five-and-twenty years ago, but has been long forgotten. As a musical work it is of the slightest possible description; and the subject is a mere vehicle for dancing and spectacle. The Adelphi is not a musical theatre; but Auber's light, pretty tunes are performed pleasantly enough: while the dancing and spectacle are admirable. The two principal dancers, Mdlle. Marquita and Mdlle. Benoni, might hold a high rank in any theatre in Europe.

THE THEATRES.

OLYMPIC.—This fortunate theatre progresses without effort in the public opinion, the constant presence of good acting being a sufficient stimulus to patronage. Both Mr. Robson and Mr. Wigan are possessed of special attributes, and popular judgment readily recognises the genius supplied when once judicially directed to its appreciation. They have, indeed, created a taste for themselves, and will now long benefit by its results On Monday "The Lucky Friday," originally performed at the Queen's Princess', was reproduced. This little drama, if we recollect rightly, is an adaptation by Mr. Wigan himself, whose picture of the confidential clerk, weak in his superstition, but strong in his honesty, is one of his best and truest impersonations. The dramas of "Tit for Tat" and "The Yellow Dwarf" still continue to last

DRURY-LANE.—The manager has been lately reviving some of Mr. D. Jerrold's pieces with effect, such as "The Wedding Gown" and "The Bride of Ludgate," which latter was acted on Monday. After the revival a new farce was produced, entitled "The Waiting on the Shutters," "to be played before *apropos* of a betting-office, where conductors are thus announced as "Gone to the diggins' for the money." Such is the conclusion of a little piece of intrigue, in which Mr. Wild performs the part of a blundering jack in office, named *Jack Corker*, who is engaged in the pursuit of a runaway couple, and mistakes an effeminate *Captain Lovidack* for the eloping bride in disguise, and accordingly has him borne away into a bed-room. The *Captain* is the chief of a betting party, whose efforts are directed to the cheating the villagers, and playing off the dropped-letter dodge on them; but the writing on the shutters removes every illusion, and ultimately causes a reconciliation between all parties. The farce was successful.

CITY OF LONDON.—A new drama, by the late John Wilkins, the author of "Civilisation," was produced at this theatre on Monday. It is in three acts, and entitled "Money and Misery." The catastrophe combines the situations of the "Corsican Brothers" and "Faust and Marguerite"—there being two ghost scenes and an assumption—both effectively managed. But the real merit of the piece lies in its well-written dialogue and pathetic incidents, both of which commanded the sympathies of a numerous and admiring audience. Messrs Lee and Johnstone are fortunate in having secured so good and prolific a playwright to their establishment They have, we understand, other posthumous works of his in their possession.

THE LATE MR. O. SMITH.—On Thursday, 1st instant, died the once celebrated O. Smith, called so from his admirable performance of *Obi* in "Three-fingered Jack. This prefix, it is stated, was applied by himself, in order to distinguish his success in the character. His proper Christian name was Richard. He made his first appearance at the Surrey Theatre in 1810, being then twenty-four years old, having spent his previous years in a lawyer's office. His great triumphs, however, were achieved at the Adelphi, in such pieces as "Victorine," "Wreck Ashore," "Isabelle," "Henriette the Forsaken," "Agnes de Vere;" and in the melodramatic heroes of such productions he far distances all competitors. To excel in this, his peculiar way, was impossible; to equal him scarcely within the pale of possibility. It is said that Mr. Smith was also an intellectual man, addicted to antiquarian research, and a great authority in matters of costume. In business he was indefatigable, never absent at the rehearsal of a new piece, or indeed at any other, except when severely indisposed. His laugh was peculiar, what Gilbert à Beckett called "an inward double knock." The *Weekly Chronicle*, from which we have quoted some of the foregoing particulars, justly says that "Mr. O. Smith was almost the last left on the stage of that celebrated company which five-and-twenty years ago delighted the audiences of the Adelphi. Nearly all are now gone: Fred. Yates, John Reeve, Hemming, Mrs. Fitzwilliam, Mrs Daly, with the subject of this brief memoir—all dead!" The complexion of theatricals is indeed altogether much changed, and there are many signs of our being about to enter a new era of dramatic effort

CHESS.

TO CORRESPONDENTS.

RESIDUS.—You will find Kling's Chess Rooms, 454, New Oxford-street, though small and in a cellar, a very pleasant place of resort for the game

R. M. T.—We have not yet studied or analysed the variations you speak of to give a decided opinion upon which is the best play for White at the 16th move. 2. If Black play Q Kt to Q B 4th, White retreats the Bishop to K 2nd, and seems to get the better game in all the many moves

W. C., F. T. Derby, Chirurg Rarin, P. H. of Norwich, A. K., J. G. C.—They shall be reported next week

M. P., Sprotsgate.—Your solution is right

A. M.—Your first problem will be by no means suitable for the Illustrated

B. B., New York.—Safely received. If the match-games turn out well, we shall be glad to have a few of them

O. P. Q.—No. It is only among the innumerable translations from

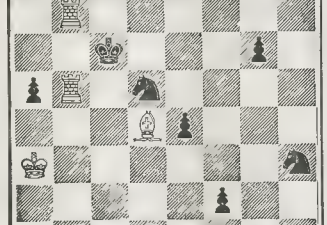
PROBLEM No. 574

To be played

By J. B., of Bridport.

BLACK.



WHITE.

White to play, and mate in three moves.

A CHESS MANUSCRIPT.

(Continued from our last Number.)

"In the noble science of Chess, as with all which the human mind delights to honour, the men who have rendered themselves most distinguished have appeared only at those privileged epochs when nature produces extraordinary men in every class. The great players of the Italian and Spanish schools sprung up in the sixteenth century—the era of Leo X., of Michael Angelo, of Raphael, of Ariosto, of Tasso, of Leonardo da Vinci, of Titian and Correggio—that of Charles V. and of Philip II.; when Italy and Spain establish her dominion in the new world, carry her riches and glory to the highest pitch, and become the rival of Italy in the cultivation of the arts. This age, so prolific in great characters, was that also of Ruy Lopez, of Leonardo, and of Paoli Boi, the Syracusan. Unfortunately, from the imperfect fragments which have reached us we can form but a very inadequate judgment of those fine geniuses Collected and disfigured by unskilful hands, how can they give us a true idea of the golden age of Chess?

"Much later, in the middle of the eighteenth century, an intense fermentation agitated all minds throughout Europe This forth epoch brought forth all the great orators of the Republic, of the Convention, and the Empire. At this period, Philidor, Deschapelles, and La Bourdonnais have elevated themselves to a height which will never now perhaps be attained by any other people. Well, what remains even of the last, with whom we lived? Some games collected by his adversaries? Beautiful indeed, and instructive; but will they ever be placed on a par with the Iliad and Odyssey? Will they ever obtain for their author the glory of Homer, so rapid, yet so true? Will they ever possess sagacity which never forsook him? or that mechanistic insight which enabled him to discover resources so marvellous and unexpected? In a word, of those sudden inspirations which electrified the lookers on, and transported them into raptures of admiration? Alas! these brilliant qualities are in the tomb with him, and the world, though preserving his name, will do honour to his memory without really knowing his genius. For Chess, even, as time flies, does not the talent of La Bourdonnais become less estimated? Do we not day by day ourselves lose something of the just appreciation of those qualities which constituted his superiority? Is he not inevitable march of things. Posterity beholds the luminous track which great men leave behind, but the source itself is lost in the darkness which obscures the past

"If it is thus with one who quitted us so lately, how much more, then, must it be with the masters who are separated from us by a period of three centuries! Let us then examine carefully, respect, admire all which has been preserved of the Philidor and La Bourdonnais, but not set ourselves up as judges of them by the miserable fragments from which I have taken, without discernment, such games and openings as chance first brought to hand.

"I have said before that the second division of my MS. was, perhaps, the most curious. The accompanying opening is found in it among those which Leonardo adopted to recover the move:—

(Gioco Sotto Mano di Gioc. Leonardo.)

BLACK.	WHITE.	BLACK.	WHITE.
1 P to K 4th	P to K 4th	7 Q to K R 3rd	P takes K P
2. K B to Q B 4th	P to K B 4th (a)	8. Q Kt to Q B 3rd	Q to K B 4th
3 B takes K Kt	R takes B	9. Q to Q 3rd	K R to K B 2nd
4. Q to K R 5th (ch)	P to K Kt 3rd	10. Q Kt takes P	P to Q 4th
5. Q takes K R P	K R to K Kt 2nd	11 Q Kt to K Kt 3rd	Q takes Q B P
6. Q to K R 6th	Q to K Kt 4th	And White has a good position	

(a) This is now called "Le Gambit en Second" and it has by some writers been attributed to Allgaier. But in fact Greco gives us this opening at the 45th Chapter of his second Book; and he himself has copied it, as he has almost all his work, from collections of more ancient games.

FIRST VARIATION.

BLACK.	WHITE.	BLACK.	WHITE.
11 Q Kt to K Kt 5th	K B to K B 3rd	16. Q to her B 3rd	Q Kt takes P
12 P to K R 4th	Q takes Q B P	17. Q takes Q	Kt to Q 6th (double ch)
13 P to K B 4th	K R to K 2nd	18 K moves	R mates
14 P takes K P	P to Q 5th		
15. Q takes Q P	Q Kt to Q B 3rd		

SECOND VARIATION.

BLACK.	WHITE	BLACK.	WHITE
15 Q to K 2nd	Q Kt to Q B 3rd	17. Q to Q Kt 7th	K B takes Kt
16. K Kt to K B 3rd	Q B to K Kt 5th	18. P takes B	Q B takes R
	White mates with.		

SECOND GAME.

(Play the nine first moves on each side as on the first game.)

BLACK	WHITE	BLACK.	WHITE
10 K Kt to K R 3rd	P to Q 4	13 P takes P	Kt the Q B P (ch)
11. Q Kt takes Q P	K Kt to K B 3rd	14. K to Q 2nd (best)	Kt takes Q
12. P to Q 3rd	Kt to Q 5th	P takes Q	Kt takes Kt
	White has a piece		

FIRST VARIATION.

BLACK.	WHITE.	BLACK.	WHITE
10. K Kt to K R 3rd	P to Q 4th	15. P takes Kt	Q takes Doubled P
11. Q Kt takes Q P	Kt to Q B 3rd		
12 P to Q 3rd	Kt to Q 5th	16. K R to Kt sq	Q B takes Kt
13 Q to her 2nd	P takes P	17. Kt to K 3rd (a)	K B to Q Kt 5th
14 Q B P takes P	Kt to K B 6th (ch)	18. Q takes B	Q takes K B P (ch)
		And White has won	

(a). If 17. Kt to Q B 3rd, then follows, Q R to Q sq, and White wins

SECOND VARIATION.

BLACK.	WHITE	BLACK.	WHITE
13. K to Q 2nd	P takes P	17. Q takes B	Kt to K B 6th (ch)
14. P takes P	Q B to K 3rd	18. P takes Kt	Q takes Q P
15. Q Kt to Q B 3rd	Q R to Q sq		Mate.
16. K R to K sq	K B to K B 3rd		

This opening, I agree, has been studied by Allgaier. I admit even that he has penetrated farther into it than his predecessors, always supposing (which, however, is not very probable) that the only game recorded by the Italian compiler contains *all* that Leonardo knew on this subject. As Greco only presents one single game without variation, Allgaier may have made some new discoveries. But even had his work been complete, if he had even exhausted the subject, he would not be justified in giving his name to this Gambit. M. St. Amand, Calvi, and Kieseritzky, who have profoundly analysed so many openings previously unknown, have never thought of attaching their names to them: they have always respected the *ur* gnator.

* The preceding game, as far as the eleventh move, will be found in Greco; but, as the Calabrese was an unscrupulous borrower, he probably derived it from some earlier writer.—EDITOR.

(To be continued.)

Note.—The sign — denotes below the average.

The reading of the barometer decreased from 29 91 inches, at the beginning of the week, to 28.30 inches by the 14th: and increased to 29.80 inches by the end of the week. The mean for the week, at the height of eighty-two feet above the level of the sea, was 29.603 inches

The temperature during the week has been very low. On Sunday morning it was as low as 7°: on February 12, 1845, it was 1° below zero, and therefore was 8° lower on that day than on the 11th inst. The mean temperature of this day was 17°6, depressed below the average, and that of the 14th as much as 16° below its average. The mean temperature of the week was 27.0°, being 13.6° below its average. The weather, notwithstanding its rigour, has been fine: snow has fallen in small quantities frequently, and snow crystals have been abundant.

Lewisham, February 16, 1855. JAMES GLAISHER.

HEALTH OF LONDON. Within the week ending Feb. 10 the births of 934 boys and of 838 girls (in all 1832 children) were registered. The number of deaths in the week was 1546—a number greater by 332 than the average number, increased in the proportion of increase of population. thus, the temperature having been from 10° to 12° below its average in the last four weeks, has caused the deaths of more than 300 weekly, and has increased the mortality by this amount above that which would have been in an ordinary season.

THE WEATHER AND THE PARKS.

The various Parks have this week presented the appearance of fairs. The thermometer at the Royal Humane Society's receiving house in Hyde-park, during the night of Monday, fell as low again as 22 deg., being 7 deg. below freezing-point. On Tuesday morning the quicksilver rose to 25 deg.; and even at noon it rose no higher than 27 deg., being then 5 deg. below freezing-point. Towards seven o'clock in the evening the mercury commenced to fall rapidly, indicating a continuance of the present severe weather. That night was the coldest experienced in the metropolis during the present winter. The thermometer at the Royal Humane Society's receiving-house in Hyde-park fell to 19 deg., being 10 deg below freezing-point

The intense frost has frozen up the Thames above bridge, and produced almost an entire stoppage of the navigation; the steam-boats have ceased running for the last two or three days. Below bridge great quantities of ice float up and down with the tide. Many of the piers between the Custom-house and the Pool are set fast; also many vessels lying close in shore. The masses of floating ice increase in thickness every tide; and, although no apparent mischief has yet been done, it is apprehended that, in the event of a continuance of the intensity of the frost, much havoc to the shipping will inevitably occur. The Greenwich and Woolwich steamers have also been compelled to lay up. The Gravesend steamers have not ceased running on Thursday, but they had great difficulty in making way through the ice. All the vessels and barges lying in Regent's Canal Docks are frozen in; and the basins of the East and West India Docks, as also the docks on the opposite side of the river, are covered with thick ice, and several of the ships therein are fast. The locks are kept free, but the navigation generally on the river is brought almost to a stand-still

In St. James's-park a very novel scene took place in the enclosure between two and three o'clock on Tuesday: a performance termed the "Express train" came off. This consisted of 500 or 600 men, who extended back to front nearly 100 yards. Having seized each other's coats, they started at a given signal, some whistling the railway overture, and others making a noise resembling the blowing off of the steam of a locomotive. This large body of men, who were at certain distances joined by some of the Foot Guards, glided over the ice at the rate of three-quarters of a mile per minute, owing to the exertions of Deputy-Superintendent Parsoles and the icemen under him, the performance went off without any of those engaged in the affair meeting with any serious accident, but, owing to the crowding of the spectators, about thirty persons were either knocked down or fell upon the ice, by which they sustained serious cuts on the head and other injuries. They were taken to the police-station-house, where their wounds were dressed; but several others, by falling upon the ice, had arms and legs broken.

The ice on the Serpentine was six inches thick on Wednesday, and during the afternoon Captain Wheatley, of the Guards, drove a horse and sledge over the ice at a rapid rate, in the midst of many thousands of spectators. The scene in St. James's-park was almost without precedent, and fewer than 20,000 persons having ventured upon the ice. On the Serpentine there were said to be about 12,000 persons.

Several skating matches took place on the Serpentine on Wednesday and Thursday, between members of the Skating Club, and a number of elegantly-dressed ladies, greatly amused the spectators by their graceful evolutions, in forming quadrilles on the ice, and cutting out figures of different descriptions

THE SOCIETY FOR IMPROVING THE CONDITION OF THE INSANE

A meeting of the members of the above society took place on Wednesday night (the 7th inst.) at the residence of the treasurer, Sir Alexander Morison, when the following names for meritorious conduct were made to applicants:—To Matthew King, 23 years of service, three guineas; Roderick M'Lennan, of Elgin Lunatic Asylum, 20 years of service, two guineas; Mrs. M'Lennan, of the same institution, for a service of 26 years, three guineas; and to Hannah Middleton, of Witham Lunatic Asylum, 13 years, an award of two guineas. There were nine male applicants and six female, whose certificates were of the most satisfactory character.

FALL OF A HOUSE AND LOSS OF SIX LIVES.—On Saturday night, a few minutes after nine o'clock, the inhabitants of the Lower-road Islington, were alarmed at hearing an unusual noise and loud cries for help, and at the same time they perceived what appeared to be a dense column of smoke issuing from the premises numbered 2 in that thoroughfare The smoke having been perceived and the cries heard by Douglas, the conductor of the Royal Society's fire-escape stationed on Islington green, he proceeded to the spot, when he found a man, his wife, and two children at the second floor front window, whose escape had been cut off by the falling of the staircase and centre of the building. He instantly ascended the fire-escape, and brought down in safety the whole of the four persons whose lives were so much jeopardised. As other portions of the building kept falling, Douglas removed his machine, when the whole of the front fell with a fearful crash into the road, burying six persons in the ruins, including a police constable, named Francis Stoker, who lost his life in attempting to save some of the unfortunate inmates.

NEW CHAPEL OF EASE, STRATFORD-ON-AVON.

Of late years hundreds of churches have been raised in various parts of the country, especially in districts the inhabitants of which are of the poorer classes; the funds being supplied for the most part by voluntary contributions, freely bestowed by those who enjoy the luxury of doing good. The town of Stratford-on-Avon has not been weary in well doing. Within the last seven years the population has considerably increased, with which has come the want of church accommodation; a large proportion of the occupants of houses in the New Town being situated about one mile from the parish church—an inconvenient distance to many, and to the aged and invalid an insuperable obstacle to their regular attendance at worship. To combat these difficulties, a meeting was convened in 1851, at which the idea of erecting an additional Church in the populous district of the New Town was proposed, and met with the most cordial approval and pecuniary support. From time to time subscriptions have been added; up to this moment a very handsome sum has been received, but not quite sufficient to carry out the original intentions in their full integrity. The first stone of the Chapel was laid in August, 1853; and in sixteen months the edifice has been completed for all necessary purposes.

NEW CHAPEL OF EASE (OF ST. JAMES THE GREAT), STRATFORD-ON-AVON.

The new Chapel, which is dedicated to St. James the Great, was consecrated on the 23rd ult. by the Lord Bishop of Worcester. It is one of the most beautiful ecclesiastical structures in the diocese; and, for the accommodation afforded (viz., for 512 persons), the least costly of any recently erected, the expense of the Church, including warming and lighting, not exceeding £1600. The edifice will cost, complete with tower and spire, £2300. The style adopted by the architect (Mr. James Murray, of Coventry) is the Early Decorated Gothic, the detail of which in this instance has been treated with considerable taste and pleasing variety. The interior dimensions are about 90 feet long and 45 feet wide. The plan is composed of nave, south aisle, aisle, north and south transepts, chancel, and south chancel aisle, in which the organ will be placed. The vestry is on the north side of the chancel. The Church is fitted up with open benches, the chancel with stalls. The roofs are of open timber framing, which, together with other woodwork, is stained and varnished. The walls are built of Wilmcote limestone, with dressings and window tracery of Bath stone: the roofs are covered with tiles. The tower and spire, through want of funds, yet remain to be built. The whole of the works has been creditably executed by Mr. Joseph Mills, of Stratford-on-Avon.

The Illustration shows the design completed—a consummation devoutly to be wished.

MEMORIAL TO LIEUTENANT BELLOT.

In the Illustrated London News for July 29th, 1854, we engraved the Tablet sent out in the *Phœnix* to be erected at Beechey Island in memory of Lieutenant Bellot, the ill-fated Arctic explorer. We now illustrate the Monument which has been raised in the Lieutenant's native country. This Tablet is from a design by Captain Courtney Boyle, and executed by Nicolas Guillemin, sculptor, of Paris. It is cast in bronze.—8 feet 2 inches high, 8 feet 9 inches broad. It is to be placed—by the permission of the Count de Niewerkerke, Director-General of the Imperial Museums—in the Naval Museum of the Louvre at Paris.

A
BELLOT
JOSEPH RENE,
Lieut. de vaisseau de la Marine Impériale,
Chevalier de la Légion d'Honneur:
Né à Paris le 18 Mars, 1826,

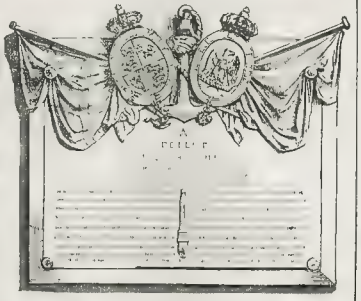
Who twice served as a volunteer in the expeditions sent from England to the Arctic Regions, in search of Sir John Franklin, and who, when under the command of Captain N. Inglefield, of H.M.'s ship *Phœnix*, unhappily perished amongst the ice on the 18th August, 1853,

Qui deux fois prit part comme volontaire à des expéditions envoyées d'Angleterre dans les Régions Arctiques à la recherche de Sir John Franklin, et qui, placé sous le commandement du Capitaine N. Inglefield, du bâtiment de sa Majesté Britannique le *Phœnix*, périt malheureusement au milieu des glaces, le 18 Août, 1853,

Cette tablette a été élevée à sa mémoire par les Anglais résidents en France.

Nicolas Guillemin, Sculptor.

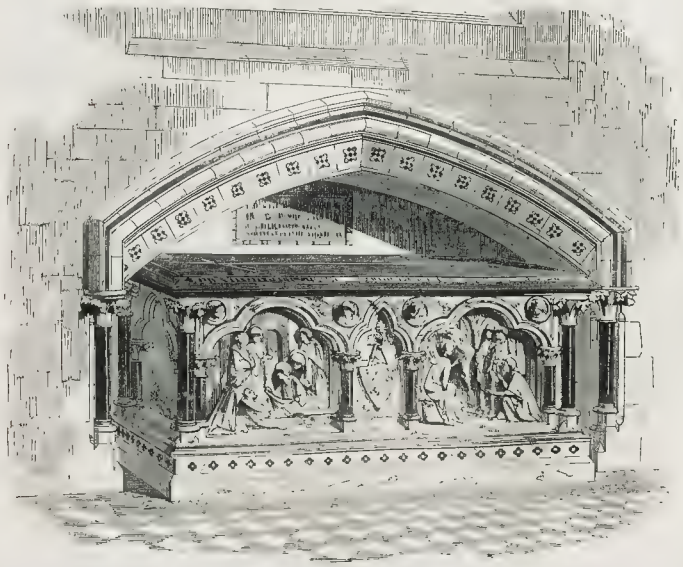
The subscriptions for this memorial from British residents in France amounted to 12,209f. 20c. (£488); a portion of which (the expenses being paid) is to be placed in the Funds for the benefit of Lieutenant Bellot's brother, on his coming of age.



TABLET TO THE MEMORY OF LIEUTENANT BELLOT, AT PARIS.

Dividends on Property in Chancery.—A document has been recently published, by order of the Lord Chancellor, on the subject of unclaimed dividends upon certain stocks belonging to estates now in litigation in the Court of Chancery, which discloses the somewhat curious fact that in no less than between 500 and 600 suits some of the parties now entitled to receive dividends have, either through ignorance of their claims or a disinclination to interfere in Chancery law, not made any claim to the same for the long period of fifteen years. The document is headed as follows:—"The Lord Chancellor has directed public notice to be given of the following causes, matters, and accounts, in which it appears that the dividends upon certain stocks standing to the credit of such causes, matters, and accounts have not been dealt with for upwards of fifteen years. In any petition which may be made respecting such dividends, the act of such period having elapsed without any dealing therewith must be stated on the face of the petition." Here follows a closely-printed list of the causes in question, amounting in number to upwards of 600.

Burnett Treatises.—Among the competitors for the late theological premiums were the following distinguished writers:—Rev. Dr. Croly, Rev. Dr. Harris, Rev. Dr. R. W. Hamilton, Rev. Dr. M'Neil, Rev. Dr. Dick, Rev. Dr. Crichton (since deceased); Revs R. Montgomery, F. D. Maurice, R. C. Trench, J. A. James, Hugh Stowell, and T. Binney; Rev. Dr. Cumming, and Mr. E. Miall, M.P.



MONUMENT TO THE LATE EARL SOMERS, AT EASTNOR.

MEMORIAL OF SIR ROBERT PEEL, BART.

A handsome monumental tablet has recently been erected by the sons of the late Sir Robert Peel, in the parish church of Drayton, Staffordshire.

MONUMENT TO THE LATE SIR R. PEEL, JUST ERECTED IN DRAYTON CHURCH.

It is of statuary marble and Roche Abbey stone, elaborately carved in the Tudor style, by Mr. White, of the Vauxhall-bridge-road, from the design of Mr. Sidney Smirke, A.R.A. The height of the Monument, from the floor of the church to the apex of the finial of the canopy is 19 feet 6 inches; and the extreme width of the base is 6 feet 4 inches. It has an inscription table of statuary marble; and the letters are incised and gilt.

MONUMENT TO THE LATE EARL SOMERS.

This beautiful work of monumental art has just been completed from the designs of Mr. George Gilbert Scott, architect, by Mr. J. B. Philip, sculptor, and is to be erected on the north side of the mortuary chapel of the Somers family, in the church at Eastnor, Herefordshire, to the memory of the late Earl Somers. In style the design is a free rendering of that which prevailed in the architecture of France and England at the dawn of the fourteenth century. As an example of monumental sculpture this work evinces skill and delicacy of treatment, both in design and execution, such as are rarely seen in modern works of the kind. In a deeply-recessed arch of Caen stone, spanning about 11 feet, is enshrined the principal portion of the work. This is wrought in the choicest alabaster, the effect of which has been materially heightened by polishing throughout. On the frontal are sculptured alti-relievi representing the "Entombment of Our Lord" and the "Holy Women at the Sepulchre. In various other parts, foliated ornament, small busts of saints, and heraldic bearings are dextrously carved. The slab forming the top of the tomb is of the serpentine marble of Cornwall, and for the numerous columns this rich material and a fine green marble from Ireland have been used. The inscription, enamelled on brass, is inlaid in the cornice; and the general effect is still further enhanced by the introduction of mosaic pattern-work, formed of Brazilian cornelians and other highly-coloured stones a means of enrichment which has likewise been adopted in the arch mouldings with good effect.

By such a work as this memorial honour to the dead is worthily expressed, and by the same means is a Christian temple truly and fitly embellished, as churches once were when, at the hands of men like Pisano and Lucca della Robbia, Art gave to them her fervent and most devoted efforts. Of this high character the usual monumental work of the present day rarely partakes.

Imperial Preparations. The widow of the late General Welden has been selected by the Emperor of Austria as the principal nurse for the Imperial infant whose arrival may be expected in a short time. Meyerbeer is now engaged in composing a new cradle song (*Wiegenlied*) to be dedicated to the Empress Elizabeth on the auspicious occasion. Preparations have been made for announcing the joyous event to the inhabitants of Vienna by the roar of artillery from a bastion on the Danube side of the city. A hundred guns will be discharged if it is a Prince, and twenty if a Princess. It is, however, settled that if the event takes place in the night the firing will be deferred till the morning.

NEW BARRACKS AT IPSWICH.

The new Artillery Militia Barracks erected at Ipswich are, we believe, the first that have been erected upon a regularly fortified plan. They occupy the crest of a hill on the north side of the town; and the Orwell river, which flows in from the German Ocean, and is navigable for 600-ton vessels to Ipswich, forms a prominent object from the parade-ground. The extent of the site is two acres and a half, which is entirely surrounded by high walls, loopholed for musketry every few feet. Along the north side of the ground is thrown up a banquette, five steps in height.

The main building is on plan in the form of an L, having bastions built out on each of its sides, loopholed at every story. The windows have wrought-iron bullet-proof shutters, also loopholed; and the whole of these openings are so arranged that no body of men could approach the building, even if they succeeded in forcing the outworks, without being subjected to a sharp and continued fire. A powder-magazine, capable of holding from twenty to thirty tons of powder and shot, is placed in the interior of the building, under ground. This is approached by two copper doors, and ventilated with copper chambers carried up to the roof.

The main building is surrounded by a fosse or dyke, formed in bricks, with the counterscarp turfed; the entrance being by a drawbridge affixed to the front bastion.

The wings, extending right and left, contain the guard-rooms, cells, black-hole, surgery, scullery, gun-stores, and gun-sheds. At present these last are occupied by four 6-pounders and two 9-pound howitzers. The walls of the main building are of considerable thickness; the stone is the very hardest Anstone, similar to that used for the river embankment at the Houses of Parliament. The whole has been executed from the designs and under the superintendence of Mr. R. M. Phipson, architect, the plans having been first submitted and approved of by the authorities at Woolwich.

Our View shows the main building and wings from the parade-ground, which latter is again surrounded by outworks, as before described.

Divisions of the Suffolk Artillery are at present quartered at Languard Fort, Tilbury Fort, and Hull; Ipswich still remaining head-quarters. The above regiment, which has been pronounced by military men of high standing who have inspected it the finest and most efficient corps of militia, is commanded by Colonel R. A. S. Adair, M.P., who, during the encampment of the regiment at Languard Fort, in 1853 and 1854, had the men well drilled and exercised in every department of artillery practice, which accounts for their present high state of discipline.

NEW ARTILLERY MILITIA BARRACKS, IPSWICH.

THE HOWDEN TESTIMONIAL.

The Spanish bondholders have testified their high sense of the exertions of Gen. the Right Hon. Lord Howden, K.C.H., K.C.B., in their behalf by

THE SPANISH BONDHOLDERS' TESTIMONIAL TO GENERAL LORD HOWDEN, K.C.B., K.H.

presenting his Lordship with a superb Centre-piece of Plate, which has been executed by Messrs. Hunt and Roskell in their best manner. It consists of a seven-light Candelabrum, in silver, with circular base, upon which are arranged figures illustrative of an incident from the Spanish legend of "The Cid." The Cid is in the act of taking leave of Ximena, and is fully accoutred for war, his horse and page waiting his movements at a distance. The shaft and branches are decorated in the Louis-Quatorze style. The inscription on panel is as follows:—

To his Excellency the Right Hon. Lord Howden, K.C.B., K.C.H. A token of gratitude and respect from the Spanish bondholders for great services rendered to them.—London, June, 1852.

Although the presentation was formally made at the above date, the Plate has but just been completed, and was forwarded last week, at his Lordship's request, to Spain.

Preparations for Pestilence. It would astonish a stranger riding out from Balaclava to the front to see the multitudes of dead horses all along the road. In every gully there are piles of the remains of these wretched animals, torn to pieces by wild dogs and vultures. On a lone hillside I beheld the remnants of the gallant grey on which Mr. Maxse rode to the mouth of the Katscha, in company with Major Nasmyth, on the eve of the flank march to Balaclava, and many of the equine survivors of the desperate charge at Balaclava now lie rotting away by the side of the cavalry camp. The attitudes of some of the skeletons are curious. Some have dropped dead, and are frozen stiff as they fell, others are struggling, as it were, to rise from their miry graves. Nearly all of the carcases have been skinned by the Turks and French, who use the hides to cover their huts, and many suspicious-looking rags, too, suggestive of horse steak, have been cut out in their flanks. For about six miles the country is dotted all over with this carnage in every stage of decay. Were it spring or summer time, I can foresee we would be one great pesthouse, and I tremble to think of Balaclava and its hillside, full of festering trunks, should there be an army there when the hot weather comes.—*Letter from the Camp, Jan. 27.*

WHALE CAUGHT AT THE GRUNE-POINT, CUMBERLAND.

In the Illustrated London News of the 6th January we gave an Illustration of some of the Cetacea captured on the coast of Cumberland from the remarkable shoal of these gigantic creatures lately stranded in the Solway Firth.

It has given rise to some speculation, what could have brought so vast a multitude of these strange visitors to those shores, when in our seas even a solitary one is but very rarely seen.

From the limited opportunities for observation very little is known of the habits of the species to which they belonged; but the rows of prehensile teeth with which their jaws are provided show them to be predatory animals, and that they must be terrible foes to the larger fishes. It is believed that they attack and devour even whales—that is, the Edentatæ, or Toothless Whales; a species which, though of equal size to themselves, must fall an easy prey to such formidable pursuers.

A very interesting fact in natural history—and one confirmatory of that belief—occurred a few days after the appearance of the shoal referred to, in the capture of a Whale of that species in the flat waters of the Solway, whither it had doubtless fled to escape the legion of many hundreds of voracious carnivora in pursuit of it. These its pursuers followed it to their cost; and many a cottager along that coast has reason to be glad that they did so, as their lamps are provided with oil for many a winter in consequence.

The Whale of which we give an Illustration was wounded in several places; and after having escaped from its pursuers it became a prey to no less formidable foes. It was seen floundering about in the Firth by two men armed with a fowling-piece, who quickly dispatched and brought it to shore on the Grune-point. It proved a valuable prize to its captors, in yielding a great quantity of excellent oil. It was about 25 feet in length, and about 16 in circumference; and was of the genus commonly known as the Bottle-head or Beaked Whale.

This Whale was captured a few days after the vast shoal was stranded in the Solway Firth, as noticed on the 6th ult., in the Illustrated London News, No. 722. It is of a totally different species from those whales, and it was, doubtless, the prey of which they were in pursuit when they got so far out of their depth. The capture of this latter specimen (*Hyperoodon*) at the same time is an occurrence of singular interest to the naturalist, in connection with the appearance of the remarkable shoal of Cetacea.

Russian Account of Inkerman.—Duke George of Strelitz, who is at present in Berlin, has communicated some interesting details to military men relative to the disaster of Inkerman. According to his statement, the plan of attack, long discussed and minutely prearranged, was so admirable, that the Anglo-French army was regarded as foredoomed, had it not been for utter misconstruction, amounting to disobedience of orders. Thus, false or reserved attacks were inopportunely converted into foremost action, and foremost assaults retarded or carried out in wrong directions. The brunt was to have been directed upon the extreme French right, so as to separate it from the English, in fact, as matters turned out, of the former being enabled to throw themselves on the assailants' flank, cut them off from the fortress, and force them back on the Tchernaya. Liprandi, also, with his twenty-one battalions and twenty-four squadrons, might have converted his demonstration into a vigorous assault as a diversion at the moment of crisis. In a word, the whole plan was deranged, and executed with great confusion and negligence, or a perversion of preconcerted orders. The Emperor was irritated beyond expression. The plan was deemed infallible. The Allied army was already regarded as no more. Prince Menschikoff almost answered for its total destruction—upon his head. The conviction of success was so complete at St Petersburg that the Emperor would not give credit to the first telegraphic despatch, cautiously announcing that the Imperial hopes had been blighted—not blighted by the dauntless and even superhuman valour of a few thousand British and French heroes, but by some of those fatalities which strategists and tacticians class under the head of "frictions of war." The Czar at first blamed Prince Menschikoff, who, as commander-in-chief, ought to have been responsible. But he cleared himself by copies of written orders and notes of precise verbal instructions to commanders of columns. He was denied powers of ubiquity; he could not lead each column himself; he was at hand to direct the whole; and, therefore, discharged the blame upon Dannenberg. The latter endeavoured to shelter himself by attributing the fault to the impetuosity and wilfulness of Solmonoff, and the error of Pauloff. The latter cleared himself by pleading insurmountable difficulties of ground and other counteractions. Solmonoff had died the death of a gallant soldier, and luckily for him, perhaps, as the Czar's wrath would have fallen upon his head, and he would have been brought to a court-martial for disobedience or mal-execution of orders, and thereby causing the disastrous failure. Had he lived he would probably have been degraded. But a scapegoat was necessary; so the Imperial choker was concentrated upon Dannenberg, who, it is understood, reached St. Petersburg to answer for the faults and failure of all.

The Mint and the Coinage. The annual account of the moneys coined at the Mint during the past year (1854) has been laid before the House of Commons in a printed form. It states the total value of the gold coinage to have been £4,152,183, including 921,890 470 oz. weight, and 3,589,611 pieces, of sovereigns; and 144,496 940 oz. weight, and 1,125,144 pieces, of half-sovereigns: the value of which latter was, of course, one-half, or £562,572. No "double sovereigns" were coined. The total value of the silver coinage amounted to £140,480, including 350,413 florin-pieces, of 200,150 200 oz. in weight and £55,041 in value; 852,414 shilling-pieces, of 100,432 000 oz. weight and £27,620 in value; 840,116 sixpenny pieces, of 76,374 200 oz. weight and £21,092 in value; 1,096,619 groats, of 56,461 450 oz. in weight and £18,206 in value; 4188 threepenny-pieces, of 252 000 oz. in weight and £69 6s. in value; 1,471,734 threepenny pieces, of 66,897 000 oz. in weight and £18,296 in value; 4792 twopenny-pieces, of 144 000 oz. weight and £39 12s. in value; and 7,920 silver penny-pieces, of 120 000 oz. in weight and £33 in value. The total value of the copper coinage was £61,535, including 8,827,920 pennies, of 127 tons in weight and £38,448 in value; 12,461,568 half-pennies, of 115 tons in weight and £25,961 in value; 6,504,960 farthings, of 30 tons in weight and £6778 in value; and 677,376 half-farthings, of 1 ton 11 cwt. 2 qrs. in weight and £352 16s. in value. It is worthy of mention that no crowns or half-crowns were coined in 1854. The gross total value of the gold silver, and copper coinage of 1854 amounted to £4,364,201.

WHALE CAPTURED AT THE GRUNE-POINT, CUMBERLAND.

GENERAL SIR DE LACY EVANS

Pursuant to a resolution of the vestry of Marylebone, the leading members of that body attended by appointment at the residence of General Sir De Lacy Evans, in Bryanston-square, on Wednesday, for the purpose of presenting a congratulatory address to the gallant General on his safe return to England. J. A. Nicholay, Esq., having formally introduced the various gentlemen, prefaced the reading of the address with a few remarks eulogistic of the recent distinguished services and admirable bravery of the gallant General, who, he said, had returned, would yet receive the reward to which his services to his country long ago entitled him. The address having been read by Mr. Greenwell,

General Sir De Lacy Evans, after expressing how much he felt honoured at the reception of so kind an expression of the feelings and opinions of the representatives of what might truly be called a great city, said they had very properly alluded to the events of the war. He looked upon the present contest as one of a more momentous character even than the great war in which England was engaged after the French Revolution. There never was so serious a conflict between the nations of Europe as at present. He had himself for many years anticipated the event, and now they had arrived at the crisis. There could be no doubt upon one point, namely, the earnest and united desire of the people of Western Europe to see this great and important contest carried out properly and energetically (Hear). He (Sir De Lacy Evans) did not desire to touch upon political questions, but at the same time he must say he had lamented to see a man as Prime Minister who, although he bore a most unexceptionable character in other respects, was wholly and entirely unqualified to perform the duties of that office so as to ensure a proper and energetic conduct of the war (Hear, hear). It was, therefore, with no small amount of gratification that he found a change of Government had taken place. He was not one of those who thought that any very great advantage would be obtained by the removal of the War Minister. He thought amongst his class there was to be found a still better gentleman than the Duke of Newcastle, who had, in his (the General's) opinion, been somewhat victimised. They had, however, now at the head of the Government one whose energy was well known, and one by whom he thought it would be the duty of the Parliament and the public to give their most cordial support (Hear, hear). He spoke in warm terms of the cordial alliance between the French and English people. With regard to the French army, he must say that he never witnessed anything in his life which exhibited so great an amount of generous feeling, cordial kindness, and, he might add, brotherly affection, as was exhibited on the part of the French army towards their British allies, from the officers of the highest rank down to the private soldiers of every class and grade. It was quite extraordinary to find so much kindness of feeling from those with whom we had been for so many years in deadly conflict (Hear, hear). Our brave army had certainly incurred some very severe losses, and some suffering would might have been avoided; but it was to be hoped that, with the return of more genial weather, and the addition of necessary comforts to the soldiers of this country—of which he trusted that ample supply would be rescued from many of the sufferings they had endured With the reinforcements the French army were receiving, and those which the small military force of this country could send out, he hoped and trusted that our army would be on a better footing, and that the anxieties of the public would speedily be relieved as to their safety and success. He (Sir De Lacy Evans) did hope, and he had no doubt, from the feelings which had been so strongly indicated, that the people of England and France would see, that no unsatisfactory peace was patched up, which might in a few years again lead to a still more severe contest.

ADDRESS TO SIR DE LACY EVANS.—On Saturday evening a meeting of soldiers who had fought under Sir De Lacy Evans was held at the Ship Tavern, Warden-street, Soho, to adopt an address to the gallant officer in honour of his services to the country. Mr. Cuffe, a sergeant of the Legion, was called to the chair, and proposed an address congratting Sir De Lacy on the services he had rendered the country. The address was seconded by Private John Cranney; and, after some observations from Sergeant Owen, carried amidst applause.

NATIONAL SPORTS.

The present ice and snow have converted sportsmen into one vast Deadlock family; and many of them—while they look at their hunters and gravhounds eating their heads off, and their guns rusting in their case—are flutter in straw beds instead of taking their sweats for the spring handicaps—indulge in moody fears that the frost will not break up before we are well into March. The weather has been so unusually severe that a brace of foxes left their earths lately and stole across the country as far as some pleasure-grounds near Rotherham, advancing boldly on to the lawn, and refusing to be frightened away by all the view-hollas and chases with which the children and the servants indulged them. In another instance the hounds were so unmercifully cut up by the frost that a meeting was summoned to council, and he arrested two foxes (male and female) in a tuned close by, which they had temporarily converted into a larder and winter residence

All steeplechase meetings are at an end for the present, and it seems probable that many of them will, in despair, be given up altogether. The Carmarthen ones will, we believe, if possible, come off on Monday, and those at Derby and King's Lynn on Thursday; while Westbury looks to Tuesday for the realisation of its hopes. Saddle may, perhaps, come off on the last two days of the week, and Lincoln on Tuesday and Wednesday, seeing that Nottingham has put off its meeting till the week after Liverpool. Liverpool also contemplates the dreadful idea of an adjournment, which we trust may not be necessary. Hence at present everything is a complete Balaclava chaos, and the old-fashioned turtles who consider that the season should commence punctually on Easter Monday, with the Craven, are rather chuckling over the woes of the managers of the early race-meetings.

The coursers are in an equally hopeless way, although they contrived to hold a few meetings last week, in one of which the blood of War Eagle was successful with a very promising young dog, Jupiter. The Newmarket Champion 3s, we believe, on the list for Monday, &c.; Coquelade (open) and Newport (Salop) stand for Tuesday; Middleton (Westmoreland) and Workington for Tuesday and Wednesday; North Union and Laurencekirk for Wednesday and Thursday; Everley for Wednesday, &c., Sundorne (Salop), Malton, and Hillsdale (Yorkshire) for Thursday; and North Berwick and Dirleton for Thursday and Friday.

The acceptances for the Spring Handicaps at Newmarket, Northampton, Chester, and Epsom number about 288 against 344 last year, and 237 the year before. Mr. Topham has about 120 of them, which is his usual share; but Mr. Johnson is quite as successful, as he secures 60 "contents," and had only half as many horses as Mr. Topham to handicap. The Yorkshiremen are not a little disappointed about having only half as many entries for their Handicap as they had in 1854, seeing that since they lost their money over the Derby they have been considerably bothered by the bad starting at Chester, they had fondly hoped to establish a great race over Knavesmire which should throw the Chester Cup into the shade. Vandal, a good-looking son of Van Tromp, who has exchanged his groom-trainer for John Scott, is the leading Yorkshire representant for their race, and some few anticipate that he will be *the* Derby horse of the Malton stable. De Clare is quite out of favour, and Bonnie Morn is not in any force. This little grey was a late foal, and did not see the light till May, 7th, 1852, the year memorable that his full-brother, Daniel O'Rourk, won the Derby. None of the Venisons have ever won the three great races, but his son Cruiser, another of the small sort, wears a very healthy look, and it seems quite on the cards that the Derby will go to Danebury with him, or to Findon with Gulcion. The bidder's chief companion, Sir Hubert, we do not expect to see long in his present pride of place, either for the 2000 Guineas or the Derby. Reports about the latter are not favourable, and so far confirm the opinion we formed of him when we saw him as a yearling. He is hardly large enough, and, at 12 lbs., will ever start for the Chester Cup, and we hear that he was never tried farther than one mile and a half last year. His two-year-old brother, Anton, is very beautiful animal, and, if anything, too finished and perfect in his make; and we hear that The Dandie, who was also bred by Mr. Etwall, is something quite out of the common, and the very finest colt that was ever trained at Danebury. In order to make up for the badness of the three-year-olds, it is said that this season will produce none of the finest two-year-olds sent out by Messrs. Jardine, 1853 then which came to the hammer last year averaged 137 guineas a piece, we have a right to expect great things.

Chatham, whose rumoured sale for a five-pound note is incorrect, still figures among the high-priced sires; and the Earl of Carlisle, grieved over the absence of a prize for blood and coaching sires in the Royal Society's programme, at their coming festival in July, has offered a £50 prize in the one class, and a £30 one in the other. Miss Mowbray is said to be "no use" for the Liverpool Steeplechase; and The Trout, who has 26 lbs. less on his back than Bourton, is at present the favourite for that event.

A clever picture of Virago, after Barratt, has just been published. The mare is in the Epsom Paddock, with Muscovite and Jonathan Martin saddling in the distance for the Great Metropolitan. Walls is "up," and old John Day stands at the mare's head talking to him. The likenesses of both are very good; and John Day especially, with his stiff white neckcloth, is a most characteristic study.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Notwithstanding that the amount of business transacted in the Consol-market this week has been trifling, and that much anxiety has been shown to ascertain the contents of the next Budget of the Chancellor of the Exchequer—in other words, whether we are to have a loan or additional taxation to meet the expenses of the war—the changes in the value of the national securities have been trifling. It is true that at one time Consols have been done at 90⅞, being a fall of nearly one per cent from the highest point; but this has not given rise to any unfavourable impression. It is somewhat remarkable that the quantity of stock at this time in the hands of the jobbers is small—that very few *bond fide* sales have been made—and that the public continue to be steady purchasers.

The Consol-market, on Monday, was rather dull, yet prices were tolerably firm. The Three per Cents Reduced marked 91¾; the Three per Cent Consols, 91¾ to 90⅞; Consols for Account, 91¾ ⅞ 91; the New Three per Cents, 91¾ 92; Long Annuities, 1860, 1-16; Ditto, 4½. India Stock was done at 223; India Bonds, 15s.; Exchequer-bills, 6s. to 8s. premium. On Tuesday the Market was steady. The Three per Cents Reduced were 91¾; the Three per Cent Consols, 91¾, 90⅝, 91⅛; New Three per Cents, 91¾ ⅜; Long Annuities, 4-5-16; India Bonds, 15s.; Exchequer Bills, 6s. to 9s. premium. Indian Bonds were 99⅝. Great business prevailed on Wednesday, and the Three per Cents fell from 91¾ to 90⅞. The Three per Cents Reduced were 91¾; Consols for Account, 91¾, 91, to 90⅞; the New Three per Cents, 91¾ to 90⅞; per Cent Annuities, 1-16; Long Annuities, 4 5-16 ⅜; Bank Stock, 213, 214, and 212; India Bonds, 12s. to 15s.; Exchequer-bills, 6s. to 6s. prem. It is somewhat remarkable that the value of the latter security has not increased during the week. On Thursday the Three per Cents Reduced were marked 91¾; the Three per Cents Reduced, 91¾; the New Three per Cents, 91¾; Consols for Account, 91¾ ⅞ 91; Bank Stock, 213 and 212; India Bonds, 12s. to 15s.; Exchequer-bills, 6s. to 8s. prem. On Friday the Three per Cents Reduced were marked 91¾; the Three per Cents, 91¾; Consols for Account, 91¾ ⅞ 91; Bank Stock, 213, 214, and 212; India Bonds, 12s. to 15s.; Exchequer-bills, 6s. to 8s. prem. It is somewhat remarkable that the value of the latter security has not increased during the week. On Thursday the Three per Cents Reduced were marked 91¾; the Three per Cents Reduced, 91¾; the New Three per Cents, 91¾; Consols for Account, 91¾ ⅞ 91; Bank Stock, 213, 214, and 212; India Bonds, 12s. to 15s.; Exchequer-bills, 6s. to 8s. prem. It is somewhat remarkable that the value of the latter security has not increased during the week. On Friday the Three per Cents Reduced were marked 91¾; the Three per Cents, 91¾; Consols for Account, 91¾ ⅞ 91; Bank Stock, 213, 214, and 212; India Bonds, 12s. to 15s.; Exchequer-bills, 6s. to 8s. prem. It is somewhat remarkable that the value of the latter security has not increased during the week.

The Canada Loan has been taken at par. Railway Shares have been in good demand, and prices have advanced. The Foreign Stocks have been dull, and the Mining Shares have been very dull, and almost nominal.

Friday Evening

The Consol-market has been fair, yet very little change has taken place in the quotations. The Three per Cents are 90⅞ ⅞; Three per Cents Reduced, 91¾; ⅞; and the New Three per Cents, 91¾ ⅞; India Bonds, 12s.; and Exchequer Bills, 6s. to 8s. prem. All Foreign Bonds and Railway Shares are very dull.

THE MARKETS.

CORN EXCHANGE, (Friday.)—A very limited supply of English wheat has been received up to our market this week, coastwise and by land carriage. The show of samples has to-day been trifling; yet, owing to the dulness of the question, the demand for all kinds was very inactive, and scarcely any change took place. For foreign wheat—the show of which was moderate—there was a little inquiry, on former terms. Importers generally were firm. Malting barley was in good request, and quite as dear as on Monday. Grinding and distilling sorts were heavy. In oats a trade was done, on former terms. We had a steady demand for oats, and rather dearer. Beans, peas, and flour commanded very little attention.

ENGLISH.—Wheat, [illegible] per quarter; barley, [illegible]; oats, 26s. 2d.; rye, [illegible]; beans, [illegible]; peas, [illegible]; flour, [illegible] per sack.

FOREIGN.—Wheat, Essex and Kent, red, [illegible] per qr.; ditto, white, 58s. to 84s.; Norfolk and Suffolk red, 66s. to 74s.; ditto white [illegible]; Scotch, [illegible]; Dantzic, [illegible]; Pomeranian, 81s.; distilling, 28s to 32s.; malting, [illegible]; Chevalier, [illegible]; Ingrian, [illegible]; Brabant, [illegible]; ditto, 64s. to 68s.; Kingston and Ware, 68s. to 72s.; Cowsiller, 74s to 77s.; Yorkshire and Lincolnshire feed oats, 23s. to 25s.; potato ditto 23s to 25s.; Donaghad and Cork blace, 25s. to 27s.; ditto, white, 27s to 30s.; cock beans, 40s. to 42s.; grey peas, 32s. to 37s.; maple, 35s. to 40s.; white, 38s. to 40s.; Dutch, 42s. to 44s.; Friesland, [illegible]; Zealand, [illegible]; flour, 37s. to 39s.; Suffolk, 36s. to 40s.; Stockton and Yorkshire, 32s to 37s. per 280 lbs. American, 38s to 40s. per barrel.

Seeds.—Linseed continues in steady request, at full quotations. Owing to the scarcity of the weather, all other seeds have met a dull enquiry. Cakes command very full prices.

Linseed.—English, sowing, [illegible]; Mediterranean and Odessa, [illegible] per quarter; Baltic, [illegible]; Bombay, [illegible]; Calcutta, [illegible]; Egyptian, [illegible]; Black Sea, [illegible]; Hempseed, 50s. to 36s. per quarter. Coriander, 17s. to 18s. per cwt. Brown Mustard seed, 12s. to 14s.; white ditto, 9s. to 10s. Tares, [illegible]; Carraway, [illegible]; Canary, [illegible]; Rapeseed, [illegible] last of 10 quarters. Linseed cakes, English, £12 to £13; ditto, foreign, [illegible]; Rapecake, £5 10s. per ton; rape cakes, £5 to £5 10s. per ton. Canary, 48s. to 54s. per quarter.

Bread.—The prices of wheaten bread in the metropolis are from 10d. to 11d. of household ditto, 8d to 9½d. per 4 lb. loaf.

Imperial Weekly Averages.—Wheat, 71s. 1d.; barley, 37s. 6d.; oats, 26s. 2d.; rye, [illegible]; beans, [illegible]; peas, [illegible].

Aggregate Average.—Wheat, 72s. 6d.; barley, 38s. 3d; oats, 26s. 10d.; rye, 44s. 6d.; beans, [illegible]; peas, 42s. 7d.

Foreign Grain sold last week.—Wheat, 31,223; barley, 21,370; oats, 18,968; rye, 133; beans, [illegible]; peas, 1207 quarters.

Flour.—There is only a very inactive demand for most kinds. In some instances the quotations have a downward tendency. Common sound congou, 9½d per lb.

Sugar.—Our market has been in a very unsatisfactory condition. Business obtained full prices for all kinds of sugar. Foreign sugars afloat are held on former terms. In crushed—both English and foreign—very little is doing. The market for refined goods is dull. Fine lumps and 43s to 46s. 6d per cwt. for low to fine grocery. The total clearances from the Mersey for the week ending Saturday last were 748,296 cwts., against 122,447 ditto in 1854.

Coffee.—The business doing in our market is but moderate. In prices, however, very little change has taken place. Good ordinary native Ceylon has realised 62s. 6d. to 63s. 6d. per cwt.

Rum.—About 800 tons have been sold at the public sales this week, at former prices. The supply of fine rum being but limited, the demand for that description has been somewhat brisker. Leeward Island, 1s 10d to 2s. 2d.; Demerara, 2s. 2d. to 2s. 4d.; Jamaica, 2s. 4d. to 2s. 6d. per gallon.

Brandy and Geneva.—Moderate business has been transacted in brandy, at full prices. Cognac, 4s. 2d. to 4s. 4d.; Hollands, 2s. 2d. to 2s. 4d. per gallon.

Hay and Straw.—Meadow hay, £2 12s to £4 12s.; clover ditto, £3 to £5 15s.; and straw, £1 4s. to £1 16s. per load.

Wool.—The wool sales have been commenced. Up to the present time the biddings have been by no means active.

Potatoes.—The supplies are by no means extensive, yet the demand is in a sluggish state, at prices varying from 75s. to 120s. per ton.

Hops (Friday).—The imports of foreign hops this week are 110 bales from Ostend. Fine hops are very scarce, and quite as dear as last week. Inferior and middling sorts are dull. Descriptions of foreign on offer, are very dull.—Mid and East Kent pockets, £14 10s. to £21; Weald of Kent, £14 to £18; Sussex, £14 to £15; Yearlings, £9 to £12; American (in bond), £7 to £9.

Coals (Friday).—Ascen Close, 20s.; Harton, 22s.; Riddell, 20s.; Haswell, 27s.; Caradoc, 27s.; Cassop, 27s. per ton

Smithfield (Friday).—Although the supply of beasts was very moderate, the demand for all breeds ruled heavy, at Monday's prices. There was a slow sale for sheep, but we have no change to notice in their value. The show was rather on the increase. Calves, though in but moderate supply, were very dull, and 6d. per 8 lbs lower. In pigs scarcely any business was doing. Milch cows sold heavily, at from £14 to £18 each, including their small calf

Per 8 lbs. to sink the offals.—Coarse and inferior beasts 3s. 6d. to 3s. 8d.; second quality ditto, 3s. 8d. to 4s.; prime coarse-woolled sheep, 4s. 4d. to 4s. 6d.; prime Southdown ditto, 4s. 10d. to 5s.; large coarse calves, 4s. 6d. to 4s. 8d.; prime small ditto, 4s. 10d. to 5s. 4d.; large hogs 3s. 8d. to 4s. 0d.; neat small porkers, 4s. 2d. to 4s. 4d.; sucking calves, 24s. to 28s.; and quarter old pigs, 20s. to 24s. each. Total supply: beasts 909; cows, 149; sheep 3452; calves, 87; pigs, 350. Foreign: beasts, 96; calves, 44.

Newgate and Leadenhall (Friday).—The trade ruled heavy, and prices were with difficulty supported.—

The trade supplied on liberal terms. Goods sent to all parts on receipt of Post-office order.

THE HON. ARTILLERY COMPANY of LONDON, the most ancient Corps of Volunteers in England, is open for the election of Gentlemen who are willing to give a portion of their time to military services

The Corps is empowered by Royal Patents and Warrants from her present most gracious Majesty, and her Majesty's Royal predecessors, to train persons to the use of arms and to the practice of military evolutions and exercises.

The Corps possesses a large piece-ground of several acres, a Rifle gallery 230 feet long, an armory-house, arms, and every facility for efficient military training.

The Officers are selected from the Corps, and hold her Majesty's commission.

Gentlemen under twenty-one years of age are admitted as Cadets, but must produce the consent of their parents or guardians.

Members have private Entrances with the uniform of the Corps.

The expenses of the Band, Arms, Ammunition, &c., are defrayed out of the funds of the Company.

All efficient members are exempt from the militia.

Gentlemen desirous of joining can obtain further information on application, by letter, to W. H. White, Esq., Armory-house, Finsbury.

ROYAL BANK BUILDINGS, LIVERPOOL, February 14, 1855.

The great fluctuations in the price of Tea during the last two years have caused much consternation among Private Families, and numerous complaints by families of the inferiority of the quality. These complaints too frequently have their origin in the Tea-Dealer's desire to make a profit, and his anxiety to satisfy his customers may be witnessed in our business, which exhibits a large increase in the number of families supplied, as well as in the quantity disposed of, being greatly in excess of any similar period during the last fifteen years.

The support which has been so liberally accorded to us affords the most conclusive proof of the importance and value of advantages in the selection of suitable qualities—with an especial eye to the satisfaction of consumers

Our inflexible regard to quality has been the gradual means of opening to us a new Public—Virgins orders from English families residing abroad. Shippers of fine Teas will find our Stock to consist of suitable packages (6 lead) for export, and the prices fixed upon a principle calculated to give continued satisfaction, and with every possible security.—to the quality

Notwithstanding the continuance of the rebellion in some districts of the Chinese Empire, there is no sound apprehension of a short supply of Tea. The imports this year will prove at least equal to those of the last year—the present estimate being upwards of 96,000,000 lbs.—a tolerable scope will therefore be afforded for a constant and personal attention in the selection of proper qualities.

Having already obtained—by many years' experience—a large amount of distinguished patronage, Families may rest assured of our continued candour in recommending only such descriptions as we please.

Your obliged faithful Servants,
ROBERT ROBERTS and COMPANY,
Tea and Coffee balesmen,
LIVERPOOL.

NB.—Other remarks and the present List of Prices may be had on application.

MEDICAL BENEVOLENT COLLEGE.
Office, 37, Soho-square.
PRESIDENT—The Right Hon. the Earl Mahon.
TRUSTEES
Dr. T. A. Wilson. | John Bacot, Esq.
Dr. R. Lee, F.R.S. | Benjamin Phillips, Esq., F.R.S
William Fergusson, Esq., F.R.S
TREASURER—John Propert, Esq., 6, New Cavendish-street
The Council of Medical Benevolent College have the satisfaction of announcing to the friends of the Institution that the THIRD ANNUAL FESTIVAL will be held at FREEMASONS' TAVERN (Hubbard-street) on WEDNESDAY, the 28th FEBRUARY next, under the Presidency of the Right Hon. the Earl of CARLISLE, K.G.

The Council trust that, as great exertions are being made to open the College in June next, the Festival will be numerously and most cordially attended, and that the support given to the cause on this occasion will be such as will enable them to accomplish the desirable object.

The following noblemen and gentlemen have kindly consented to act as STEWARDS:

The Right Hon. the Earl of Aberdeen.

EDWARD HENRY SIEVEKING, M.D., Hon. Sec.
HERBERT WILLIAMS, Assistant Sec

Office, 37, Soho-square, Feb. 14, 1855.
The Fourteenth List of contributors will be published on the 10th of March

TAXES on KNOWLEDGE (Association for Promoting the Repeal of). The ANNUAL PUBLIC MEETING will take place at the LONDON TAVERN, on THURSDAY next, when the Chair will be occupied by John Bright, M.P.; Richard Cobden, M.P.; George Dawson, M.A.; T. M. Gibson, M.P.; Apsley Pellatt, M.P.; Sir W. Molesworth, M.P.; Charles Gilpin, M.P.; and Sir Joseph Eight. Tickets for the Platform may be had of Novello, Dean-street, and Mr. Cash, Bishopsgate; at Exeter-hall; and Office of the Association, 10, Ampton-place, Gray's-inn-road.

TWENTY-FIFTH PUBLIC DRAWING.—ONE HUNDRED AND FIFTY RIGHTS OF CHOICE in the FREEHOLD BUILDING SOCIETY.—At the Society's Office, No. 51, Eight, Tickets for the Platform may be had of Novello, Dean-street, and Mr. Cash, Bishopsgate; at Exeter-hall; and Office of the Association, 10, Ampton-place, Gray's-inn-road.

TWENTY-FIFTH PUBLIC DRAWING.—ONE HUNDRED AND FIFTY RIGHTS OF CHOICE .THE FREEHOLD BUILDING SOCIETY will hold its TWENTY-FIFTH MONTHLY MEETING, at three o'clock, at the TENTH QUARTERLY MEETING, Viscount Ranelagh in the chair, the Twenty-fifth Drawing for Rights, and the Distribution of Surplus Estates will take place. One hundred numbers will be drawn from the unexpired shares, and Forty numbers will be taken from the Satisfactory List and added to the Record of Rights. The 140 Rights thus added to the Register may be exercised either on the undisposed plots of the valuable Estates already allotted, or on the new Estates preparing for allotment to various counties. Rights of choice can also be applied to acquire advances for Building, each right satisfying the holder of a share to the extent of £150, the repayments to be by simple share in 12s. 6d., and the subsequent payments in 5s. per month per share, with an additional 1s. every three months for the interest, and 1s. per month for the fine. The fine followed, payable half-yearly, on completed Shares and on unacomplished Shares on which the verge's mortgagian and upwards has been paid in advance. The profits of the Society, after providing for the expenses of Management, are placed at the end of every financial year to the credit of holders of unadvanced Shares. The Bonus for 1854 was 8s. per Share, and for 1853 Seven per Cent. The taking of land is quite optional. No partnership liability. The prompt withdrawal of subscribed capital whenever a Member wishes to leave and his investment. A collateral Stock, which is at once entered on the record of rights, costs £5 5s. Many Profitable Plans and Estates, made of obtaining advances for building, record of exhausted and unexhausted rights, with a list of the Directors, Auditors, and Solicitors, apply to

CHARLES LEWIS GUNNESS, Secretary.

Offices, No. 23, Norfolk-street, Strand, London.

The names of Investors are not confined to the metropolis; there are members in every part of the United Kingdom, as the most distant Occupiers, and on the Continent; the interests of shareholders being as carefully attended to by correspondence as if they resided in London.

SOUTH SEA HORSE HOSTAIL, THREADNEEDLE-STREET.

MESSRS. BRADLEY and SONS are favoured with Instructions to SUBMIT to PUBLIC COMPETITION, on 14th DAY, FEB. 27, at Twelve, the above valuable PROPERTY, having extensive frontage to Threadneedle-street, commanding views with Old Broad street, and covering a space of nearly 2000 superficial feet. The present occupier is desirous to part with a small remainder, rent and a half land to redeem. It may be the present Hostal or Tavern House, a commodious family residence, three valuable messuages used as offices, the open area surrounding the South Sea House, the whole of which will be offered in one lot; also a small building now occupied with the Flower Pot public-house, which will be sold separately. The property presents a rare opportunity for the acquisition of a compact Freehold Estate in the neighbourhood of the Bank of England, and, in its present state, will realise a handsome rental; but if judiciously rearranged will probably realise an increased income in ground rents, and the materials will find a ready sale to the various houses.—Particulars, with Lithographic plans attached, are now ready, and may be had on application to Messrs. Wordsworth, Greenland, and Blake, solicitors, at the South Sea House, Threadneedle-street, at the Mart; and of Messrs. Rendell and Sons, 28, Gresham-street.

"How to SKETCH WITH; being the sequel to the above. Price 5s. per Set.
London: HARRARD, 339, Oxford-street.

WAX FLOWERS.—The ART of MODELLING. By MRS. SKILL. Price 1s., per post, 1s. 6d.
WAX FRUIT and FLOWERS. The ART of MODELLING. By G. W. FRANCIS, F.L.S. Price 2s. 6d.; per post, 3s
Also, by the same Author, 2s. 6d., Oxford-street; where all the necessary materials for the use of the above may be obtained.

Second Edition, price 1s., per post 1s. 4d.,
ORNAMENTAL LEATHER WORK. A Clear and Concise Explanation of the Art. By EMILIE DE CONDE. Illustrated with Engravings on Wood.
Handsome Boxes, containing all necessary materials for the Work.
London: BARNARD, 339, Oxford-street; where may be obtained Instructions and Materials for Potichomanie.

CURIOSITIES OF LONDON
Now Ready, in a closely-printed Volume of 920 pages, price 16s., with a Portrait of the Author, painted by T. J. Gullick,
CURIOSITIES of LONDON; Exhibiting the most Rare and Remarkable Objects of Interest in the Metropolis, and its History; with nearly Fifty Years' Personal Recollections. By JOHN TIMBS, F.S.A.
Life-long observation, books, conversation, and tradition, have each contributed to swell the facts that fill a place in this "Curiosities of London." Those facts are numerous, briefly stated, and well brought together, so that we know where to search for information upon the metropolis can be found in a single volume, or even in many volumes."—Spectator, 5th inst.
DAVID BOGUE, 86, Fleet-street.

Just published, price 1s.,
THE LECTURE on the PENDULUM EXPERIMENTS at HARTON PIT, near South Shields, delivered in the Omnia Hall, South Shields, by Professor BRIDGE, M.A., Esq., Astronomer Royal. To which is appended a Letter on the Pendulum Experiments. The Astronomer Royal, at the request of a deputation of gentlemen of South Shields, wrote this Lecture in answer to them in form.
London: LONGMAN and Co., Paternoster-row; Oliver and Boyd, Edinburgh and Hewison, South Shields.

Samples, directions, and testimonials sent free by post.—CROGGON and Co., 3, Bowgate-hill.

EFFECTUAL SUPPORT for VARICOSE VEINS. This unopposing STOCKING is pervious, light, and inexpensive, easily drawn on without lacing. Instructions for measurement, with prices, forwarded by the manufacturers, POPE and PLANTE, 4, Waterloo-place, Pall-mall, London.

NAVIGATION.—Mrs. JANET TAYLOR'S NAUTICAL ACADEMY, 181, Minories, offers superior advantages to Young Gentlemen preparing for the sea. References can be given to all the large Steam Companies and all the leading shipowners in London. Terms moderate, and forwarded on application.

MARION'S RESILIENT BODICE and CORSALETTO DI MEDICI. By Royal Patents. "Infinitely superior to anything of the kind yet introduced, and in point of style and workmanship it is alike unexceptionable."—Editorial notice in "Le Follet," the leading Journal of Fashion.
They combine firmness with elasticity, fit closely, fasten easily in front, and are adapted for every age, figure, and habitude. Enlarged prospectus, Illustrations, details of prices, explicit directions and papers for self-measurement, &c., on receipt of two stamps for postage. All country orders sent carriage paid, at post free.
Madame MARION and MAITLAND, Patentees and Sole Manufacturers, 14, Cossamgehi-terrace, Hyde-park, London.

H.M.S. "NANKIN," 50 GUNS (HON. KEITH STEWART, COMMANDER).

H.M.S. "NANKIN."—50 GUNS.

This noble and beautiful frigate, built at Woolwich, and launched in March, 1850, has just been fitted out at Sheerness, and commissioned there, for the first time since she has been afloat, by the Hon. Keith Stewart, left that port on Saturday last, for Spithead, where she arrived on Monday morning, and saluted the flag of Vice-Admiral Cochrane, K.C.B. She is bound on secret service to the China seas, and to strengthen the squadron of Sir James Stirling, now acting against the Russians at the mouth of the Amoy River.

Before leaving Sheerness she was inspected by Vice-Admiral the Hon. W. Gordon, the commander of the port, and leaves with one of the choicest crews of officers and men that has ever left this country. The ship was very popular, and could have been manned several times over. The greatest care and attention has been paid to her equipment. She was designed and built by Mr. O. W. Lang, the present master-shipwright at Pembroke; and her model proportions, lofty masts, gigantic spars, and powerful armament, render her the most perfect sailing-ship of her class in the world. She carries on her main-deck sixteen 68 and twelve long 32 pounders; and on her upper-deck four 68 and eighteen long 32 pounders. All these guns are of the greatest length made for their calibre. Her height and accommodation between decks is of the most perfect description, and every attention has been paid to the comforts of the ship's company, which numbers 500 men, exclusive of officers, &c., and 100 Marines. Her principal dimensions are—Length, 185 feet; beam, 50 feet 10 inches. Burden, 2050 tons. A View of this vessel, building in the slip, appeared in our Journal of March 16, 1850.

THE VICTORIA RIFLE CORPS, AT KILBURN.—(SEE PAGE 166.)

EXTERIOR OF A COURT-HOUSE IN THE BACKWOODS OF CANADA.

A JURY IN THE BACKWOODS OF CANADA RETIRING TO DELIBERATE.

SKETCHES IN A COURT-HOUSE, UPPER CANADA.

(From a Correspondent.)

THE Division or County Courts in Upper Canada were established some few years ago, for the trial of civil causes in which the amounts at issue do not exceed the sum of £25. They are presided over by a Barrister, who is also Chairman of the Quarter Sessions, and generally termed Judge; and who makes the circuit of the different townships, in which the Courts are held about once in every two months. These Courts have been found very successful in preventing the ill effects of litigation among the poorer settlers, as the cases are decided in a manner truly patriarchal: the Judge hears the evidence on both sides of the question, and gives his judgment accordingly; and as this decision is guided more by justice than by the strict letter of the law, and the cost is very trifling, the parties generally return to their homes perfectly satisfied.

A short time ago I accompanied a young barrister who was about to plead a cause before one of these Courts, in one of the remotest parts of the county of Simcoe. We set off one fine afternoon in a one-horse vehicle, technically termed a 'buggy,' and reached that evening a small hotel in the flourishing village of Keenansville, about five-and-twenty miles from the shores of Lake Simcoe, which said village consisted of a saw-mill, two log houses, a tavern, and a store. Our host, a comical Irishman, who prided himself on being the founder of the village, after supplying us with a capital supper, provided us with beds, evidently intended for short people, causing us to roll up in a manner by no means agreeable. Next morning we set off, through a beautiful and tolerably well-cleared country, for the Court—a distance of about nine miles, over a road quite rough enough to sharpen our appetites sufficiently to enable us to enjoy a second breakfast with the Judge, who had slept the night before at the house of the Clerk of the Court, Mr. M'Manus, who rejoices in the possession of a capital farm and a portly and most hospitable wife. He had shortly before moved from the log shanty (shown in the Sketch) in which the Court was held, and in which he had lived since he first located himself in the woods with his axe some five-and-twenty years ago, to a substantial brick house, the pride of Mrs. M'Manus's heart. After breakfast we adjourned to the Court-house, which was already filled with a crowd of plaintiffs, defendants, witnesses, and spectators. The apartment in which the Court was held had been the principal room in the old house, and had been divided along one side by a strong wooden bar to keep the crowd at a respectful distance from the Judge and the bar. After several small cases had been satisfactorily disposed of, the one in which my learned friend had been retained came on, and, as the amount at stake was considerable, the Judge availed himself of a power which he possesses of summoning a jury of five to take the responsibility of the decision off his shoulders.

INTERIOR OF A COURT-HOUSE IN THE BACKWOODS OF CANADA.

The jury having stowed themselves in a corner of the room, the plaintiff, an artful fellow, commenced pleading his own cause; and after cross-examination of witnesses and a little perjury, my friend replied in a most powerful speech, demolishing his adversary in a manner which established his fame in that region, as a lawyer and orator, for ages to come. When the case was closed, a difficulty presented itself in the fact of there being no room to which the jury could retire to consult upon their verdict. The Judge, however, soon arranged this by telling the jury to betake themselves to some quiet spot out of doors, and charging them on their honour not to speak to any one until their return. The jury accordingly went out; and, after looking about them, they with one consent and with wonderful foresight and sagacity betook themselves to the orchard, and squatted down under an apple-tree to combine mastication with argument. In about the time required to eat half a dozen apples a piece, and to cram their pockets, they returned, and, as was fully expected, gave a verdict for the defendant: the crest-fallen plaintiff applying for a new trial, and vowing that next time he would not be beaten for want of a lawyer.

FORT MATANZA, EAST FLORIDA.—FROM AN ORIGINAL SKETCH.

MATANZA FORT, EAST FLORIDA.

IN January, 1854, the author of the subjoined stanzas travelled from St. Augustine to the south end of the Peninsula of Florida, a distance of more than 200 miles. The journey was performed in row-boats through a series of creeks or arms of the sea skirting the entire eastern coast.

After leaving St. Augustine, the most ancient, the most dilapidated and stagnating town in the United States, the traveller takes leave—with a few solitary exceptions—of all evidences of civilisation. His journey is cheered by no picturesque scenery, for the whole country is raised a few feet only above high tides, and consequently it is for the most part composed of marsh, and swamp, and swale. These creeks are bounded on the west by continuous forests of pine-trees, with intermediate strips of sedgy marsh, which vary from one to five miles in breadth. On the eastern or ocean side are sand-reefs covered by the "saw or scrub" palmetto, which grows wherever the belt of sand is of sufficient breadth to be out of the reach of the breaking surf.

During the monotony and tediousness of travelling through such uninteresting scenery, the dull regular stroke of the oarsmen contrasts most strongly with the deep brooding solemnity of the surrounding uncultivated and uninhabited wilds; but when the old fortress of Matanza first looms on the sight, then the blood-stained history of the early conquest of the Seminole Indians by the Spaniards fills the mind with the drama of the past.

Matanza means in Spanish the place of murderous strife.

In solemn, brooding silence the old Fort stands;
But lo! no martial watch there now is kept;
Since foes no longer haunt those sedge-girt sands,
Where once the stealthy savage prowling crept.

Its ruined walls, time-stained by mottled moss,
With mute significance tell forth their tale:
We see no ditch, nor line, nor intrenched fosse.
Gave shelter from the wary warder's hail.

But plain and solid walls rear up on high,
Without an opening in their beveled base;
No door nor gateway has been left to try
The strength or weakness of that fortress-place.

From thence the sentinels, with searching eye
The smallest speck could see for miles afar,
And, passing oft, endeavour to descry,
The Seminoles' stratagem of war.

* * * * * *

Those warlike times are past, yet firm remains
This massive monument of blood-stained strife;
And echoes, too, have ceased from bugle strains
Which roused each soldier to defend his life. GEO. HARVEY

EDUCATION IN THE NORTH-WESTERN PROVINCES OF INDIA.

THE Civil Engineers' College at Roorkee was instituted in 1847, by the Hon. James Thomason, Lieutenant-Governor of the North-West Provinces of India, for the purpose of educating young men, natives as well as

ANNUAL GOLD MEDAL PRIZE OF THE COLLEGE OF CIVIL ENGINEERS ROORKEE.

Europeans, in different branches of civil engineering, surveying, architecture, &c. The original scheme embraced three classes of students: the first for young men who, from sub-assistant civil engineers, might rise to the highest grade of their profession, and whose education extended to the higher branches of mathematics; the second class for soldiers—whether sergeants, corporals, or privates, who might ultimately become overseers and assistant-overseers in the Department of Public Works; the third class for youths who were to learn surveying, levelling, plan-drawing, &c., and to receive the education necessary to fit them for subordinate employment on district duties, where simple surveys of boundaries, roads, &c., or the simple construction of works, would be required. The above is an outline of the idea on which the College was founded but the plan has been extended and improved since 1847

Mr Thomason died in 1853, and the Court of Directors of the East India Company, on that event being communicated to them, resolved to mark their sense of his services in promoting education in India by designating the Roorkee College "The Thomason College of Civil Engineers."

Mr Thomason fixed upon Roorkee as the site of the College in consequence of that place being contiguous to all the main works which were then in progress on the Ganges Canal, to the Solani Aqueduct, to the extensive works in the Doab Canal, Putri, and Rajpoor Valleys, and to the dams and regulating works connected with the main stream of the Ganges at Hardwar. Roorkee, moreover, had for the use of the above mentioned works extensive workshops, model-rooms, library, &c., in its neighbourhood.

Lieut.-Colonel (now Sir Proby Thomas) Cautley, the projector and designer of these works, who naturally took much interest in the objects to which Mr Thomason's thoughts were directed, and whose experience had led him to appreciate mathematical acquirements most highly when applied to practical purposes, requested Mr Thomason to allow him to found an Annual Gold Medal Prize, open to the competition of all students of the College, and to be presented to that student "who made the best application of mathematics to a design for a work or works of practical utility." The offer was accepted by Mr. Thomason, who unfortunately did not live to realise the hope that he had long looked forward to—namely, of himself presenting the first medal.

The medal, which we have represented, has been executed by Mr. G. G. Adams, of Sloane-street, Chelsea, to whom its founder intended for the design on the obverse. The reverse is a representation of one of the lions on the pedestals which adorn the flanks and approaches of the great aqueduct of the Ganges Canal, over the Solani Valley. The pedestal on the medal bears the following inscription:—

Thomason C. E. College, Roorkee, January 3, 1851.

IMPROVEMENTS IN PROPELLING VESSELS.

Mr B. Waldock has patented certain Improvements in Screw Propulsion, calculated to remedy an acknowledged defect in the screw as at present used. It is well ascertained that a considerable amount of power is lost by the water being thrown off from the faces of propellers of the screw kind, partly by the impact of the blades spreading out the water laterally, and partly by centrifugal force. This defect appears to be effectually remedied by Mr. Waldock's invention, which consists in making the faces of propellers grooved or fluted, by which the water is prevented from escaping from the blades until it has done its work. Some novel forms of blades are shown in the drawings referred to in the specification. In two of the propellers shown, the grooves are arranged

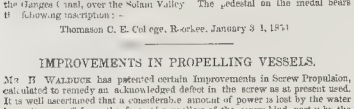

FIG. 1

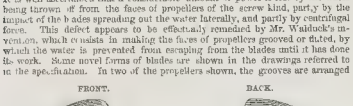

FIG. 2

WALDOCK'S PATENT SCREW PROPELLERS.

in a series of curved steps, rising one above the other, which give the propeller a firm hold on the water, and prevent its escape until it passes off at the back edge of the blades. We have seen a working model, and checked its operation with the existing blades, and with the patentee's improved blades; and, although working in a circular tank in which the water could not get up its speed, the improved blades passed quickly through the water without the slightest sensation, with a decided gain in speed of upwards of 10 per cent over the old form of blades, which created both noise and commotion in the water. The two kinds of propellers compared were of the same size and pitch. We understand that experiments on a large scale will shortly be tried, and we shall look with interest to the result.

LIST OF EXPERIMENTS.

Description of Screw.	Time.	Number of Revolutions round the Tank.
Lowes's Blades - -	7min. 7secs. - -	14
Waldock's blades (Fig. 1)	5min. 35secs. - -	12 1-6th
Do conical form (Fig. 2)	6min. 30secs. - -	13½

New Zealand.—In the Illustrated London News for Feb. 9, 1850, appeared an interesting illustration and account of a banquet given by Dr. Fitzgerald, the Colonial Surgeon of Wellington, to the Native chiefs, on the occasion of the presentation by Earl Grey of a beautiful engraving of the Queen, for the Colonial Hospital under Dr. Fitzgerald's charge. This gentleman has just returned from the colony, after an absence of sixteen years, in consequence of ill-health and family affliction. On leaving, he was invited to a public meeting of the principal European inhabitants, on which occasion he was presented with a purse of 250 guineas; and an address, expressive of the high esteem and regard which they entertained for him personally, as well as of their high appreciation of the exemplary manner in which he had acquitted himself of the arduous duties of his public appointment as medical officer of the Colonial Hospital, whereby he not only secured to himself the affections of the natives, but rendered his skill a powerful incentive to the restoration of harmony between the two races. The Chairman, Mr. A. Hort, J.P., stated that it would be a lasting memorial of the appreciation by his fellow settlers of his services, particularly of his unremitting exertions on behalf of the natives, which had greatly contributed to increase their confidence in the Europeans. Addresses were presented to Dr. Fitzgerald from the native inhabitants expressive of their deep affection and gratitude for his kind and unremitting attention. These addresses abound with affectionate allusions to Governor Grey, and their appeals to her Majesty to send back Dr. Fitzgerald, who has, we understand, considered it his duty to lay them before her Majesty's principal Secretary of State for the Colonies.

Nineveh Relics.—The French Minister of State has caused a three-masted vessel, the *Manuel*, of Bordeaux, to be hired to bring to France the objects discovered by M. Victor Place, Consul at Mossul, in his excavations at Nineveh, and she has just sailed from Nantes for the Persian Gulf. Among the objects she will bring back is one of the monumental gates of the city, four gigantic bulls, several bas-reliefs, a great number of utensils of earthenware, copper, and iron, and a number of statues of greater antiquity than any yet discovered. They are to be conveyed down the Tigris on large rafts, supported by bladders, according to the custom of the country, to Bussorah, and there to be shipped. The descent of the Tigris, a distance of 300 leagues, will be attended with considerable difficulties and dangers; but M. Place, no doubt, is able to surmount them. He has already accomplished the more difficult operation of conveying the objects, some of which are of enormous weight, from Khorsabad to the banks of the Tigris, a distance of some leagues, and across a country which is not only without roads, but traversed by torrents, over which it was necessary to throw bridges; and all this he has done without any of the accidents usual in such undertakings. It is expected that the *Manuel* will have returned to France in sufficient time to enable her precious cargo to be deposited in the Assyrian Museum of the Louvre before the opening of the Exhibition.

The Foxes and the Badger.—During the whole of the week before last two fine foxes visited the kitchen grounds of Benjamin Badger, Esq., at Eastwood-house, near Rochdale. Although many a view-halloo and chase took place in front of the mansion by Mr. Badger's well-bred, still these unusual visitors did not leave the grounds. The severe weather was doubtless the cause of their being driven so near the town.

OPINIONS OF THE SILENT MEMBER. (No. IV.)

"There is nothing new under the sun" is a saying which may certainly be applied with perfect truth to the new Ministry. If the old Government fabric has tumbled to pieces, we must hope the fall was owing to some fault in the construction, and not to the worthlessness of the materials. It is true we have got rid of the "dry rot," and retained most of the "old bricks;" but the new structure has been built chiefly out of the ruins of the old, with some rather unimportant additions. I quite agree with every one else in wishing to give it a fair trial; but we must not deceive ourselves with the idea that we have got a new Government, for we have got nothing but the old "men," from whom we must hope for new "measures." We have not changed the Ministry, but we expect the Ministers to change themselves; and we must content ourselves with anticipating that the result will be such as it is in a Christmas-piece, for it is not till after the change of the characters that we have the "business" of the pantomime. We have had much solemn burlesque up to the present point; but activity may be looked for at last, and much may be expected from the change of Lord Palmerston into the principal character. A Premier has often been compared to a theatrical manager; and, adopting the comparison, I would ask our new Ministerial manager whether it is wise to have so many old men in his company? In addition to the drawback of age, there are some who are labouring under infirmity; and, in fact, there has been so much talk about the "ill health" of some members of the Cabinet that the idea of a Government "with its feet in hot water" has more than once occurred to me. For some time there was a question whether Sir George Grey's health would be strong enough to allow him to remain at the Colonial-office, and the presumption is, that, feeling himself too weak for the Colonies, he has been sent for change of air to the Home-office. Lord Panmure is said to be very well calculated for a Minister of War, but it is feared that the periodical attacks of gout to which he is subject may confine him occasionally to his room when his colleagues may require his company. Considering what his Lordship will have on his hands, it will be rather awkward if the gout should from time to time deprive him of the use of his fingers.

One would almost imagine that appointments in our public service are made occasionally on the principle of furnishing an asylum to age and infirmity, instead of affording a field to capacity and vigour. The command in Ireland has been conferred on Lord Seaton, who is said to be eighty years old, and the command of a division in the present war has been given to Lord Rokeby, who is "as deaf as a post," if we are to believe the newspapers. These appointments will, of course, be officially justified in some way or other; and it may probably be urged that, as the Commander-in-Chief will have "nothing" to do just now in Ireland, a nobleman of eighty was just the person likely to do it. As to Lord Rokeby, it will be said that, though deaf, he is not dumb; and, as his duty will be to command, his task will rather be to talk than to listen. Besides, deafness in high quarters is rather a fashionable failing; and, as it is customary among the official chiefs to turn a deaf ear to the voice of censure or complaint, it will be a double advantage to have two deaf ears to turn to troublesome criticism or impertinent curiosity.

I have been much amused by a newspaper paragraph intended to show the especial fitness of Lord Panmure for his new office; though when I read it I could not help thinking that, as "good wine needs no bush," so a good War Minister should need no puffing. We are told that his Lordship was "for ten years an officer of the 79th Highlanders," in which capacity he was never at the taking of anything except the taking of the oaths and his seat in the House of Commons. But, "though never on active service, he was deeply imbued with the military spirit," which must have been a most troublesome spirit to one who could find no vent for its workings. The paragraph adds, that Lord Panmure "would doubtless have proved himself a thorough soldier had he ever had an opportunity of facing an enemy on the battle-field." I do not doubt the fact; but I am hardly disposed to concur in giving his Lordship a high military reputation on the strength of what he might, could, would, or should have done, if he had ever faced an enemy. I do not mention this matter in disparagement of Lord Panmure, but only to express my opinion of the folly of his friends in trying to get up the reputation of a military hero for one who has never been engaged in any field more formidable than the field of politics.

If Lord Raglan's despatches should be collected into a volume, many of them will wear the aspect of a weather table, and his history of the war will carry out the irreverent idea by which history was likened to an old almanack. One of Lord Raglan's latest despatches, dated January 27, 1855, is almost exclusively occupied in talking about "the weather," which is the favourite topic with Englishmen when they don't exactly know what to say—a predicament in which the Commander at the Crimea very naturally finds himself. The following is the eloquent opening of Lord Raglan's despatch:—"My Lord Duke,—I have the satisfaction to acquaint your Grace that the weather continues fine." The letter then proceeds, in language no less roundabout, to intimate the simple facts that "the nights are frosty," that the "sun shines" by day, and that there is an "absence of wind;" so that some three or four paragraphs are taken up by an amplification of the announcement that the troops have got fine weather. The latter portion of the despatch is not so satisfactory, for it tells us that there is difficulty in getting huts up for the troops, because "the ground is rotten"—a truth which applies to the whole management of the war up to the present period.

The men are without shelter. The stores are better off; for these have so vastly accumulated at Balaclava—where they are not wanted—that, as they cannot be carried to the Camp—where they are wanted—Lord Raglan "has been obliged to erect huts outside the town for their reception." This comfortable housing of the stores, contrasted with the houselessness of the troops for whom the stores were intended, reminds one of Dickens's idea of the wrapping up of the muffins in warm blankets contrasted with the exposed condition of the half-naked muffin-boys.

I have read with satisfaction the announcement that Mr. Peto—the builder, or contractor, or engineer, or whatever else he may be called—is about to be made a Baronet. On consideration, I am not quite so sure whether the subject is one of congratulation after all; for, by conferring a piece of aristocracy on talent, the inference is that the former constitutes the superior distinction. When an hereditary title is given to a man of genius, it often happens that his descendants not only think more of the title than of its source, but that they seek to bury the latter in oblivion, and, while feeling an ignoble pride in the title, have a sort of disgraceful shame at the recollection of its origin. It would be eventually more honourable to the family, and certainly more useful to the country, that there should be a race of illustrious engineers than a long line of useless baronets. I do not make these remarks as bearing particularly on the case of Mr. Peto, who well deserves any honour that may be conferred on him, but I mean to enter a general protest against treating aristocratic distinction as the *summum bonum* towards which all genius should be directed. The late George Stephenson is understood to have refused a title, and his name will not be the less illustrious for want of a handle. If the distinction conferred were to be personal instead of hereditary, the practice of giving titles to distinguished men would be more reasonable; but how many a title there is which, though illustrious in connection with one great man by whom it was originally won, is almost ludicrous in connection with the small man to whom it has descended? Fortunately for the fame of some great men who have been nominally ennobled on account of their real nobility they have no descendants to make their names ridiculous. By this accident of fortune we are prevented from imagining the existence of a stupid Brougham some hundred years hence, though it is not so difficult to conceive the possibility of an inferior Duke of Wellington. There is a hero of the present day who might be raised to any honour the country deems him worthy of without the risk of an illustrious name descending to those in whose persons it might become disembodied, or rather degraded. Sir De Lacy Evans is without heirs male, and his promotion to the peerage would be only a proper tribute to his distinguished merits. He has rejected the offer of a lucrative but not very exalted post, for he looks to honour, and not to money, as the reward of his glorious services. The House of Commons having conferred on him the highest distinction it is able to bestow, it would be an appropriate close to his brilliant career if the opportunity were afforded him of conferring distinction on the House of Lords by taking his place among its members.

WHAT IS A NEWSPAPER?

The Attorney-General at home has been puzzled to define a newspaper; and Mr. Gladstone's proposal to reform and regulate the Stamp duties on newspapers is the consequence. A similar difficulty has arisen in the Colonies, as will be seen from the following petition, with reference to our own Journal, which has just been presented to the Legislative Council of New South Wales. We are happy to learn that the Colonial Government acceded to the prayer of the petitioners, and that the Illustrated London News circulates freely through the whole district in question.

On the debate that ensued in the Chamber, Mr. Parkes, one of the members, stated that the petition contained arguments well worthy their consideration. When they were told that 600 copies of the Illustrated London News were regularly circulated throughout the colony, it appeared to him that they were not only bound to remove the impediments at present affecting its circulation, but that they ought to show every desire, if possible, to increase that circulation. This was the more desirable, seeing that the information disseminated through this Journal was of a very high character, and such as could not fail to have a beneficial effect on the moral and social condition of the community. From what he had seen and heard of this matter, he had not the slightest doubt in his own mind that the Illustrated London News had a very large circulation in the colony; so much so that he believed that it went to nearly every respectable family in the interior.

Mr. Cowper presented the following petition from Messrs. W. R. Piddington, James Waugh, and Joseph Cox:

To the Honourable the Legislative Council of New South Wales, in Council assembled.

The humble Petition of the undersigned, sheweth,—

That for nearly seven years your petitioners have transmitted through the New South Wales Post-office the English Stamped Newspaper entitled the Illustrated London News, in parts, at the rate of one penny for each newspaper.

That the practice of treating the Illustrated London News, published in parts, as a newspaper, and charging one penny postage upon each number, was invariably followed by the Sydney Post-office during the period when the late Mr. Raymond, and also Mr. Meerwether, held the office of Postmaster-General, and for a short time since the appointment of Major Christie to that office.

That about twelve months since your petitioners received a letter from the present Postmaster-General, containing an intimation that the practice of treating the Illustrated London News, when sent out together in parts, as a newspaper, would not be continued after the 1st of November, 1854.

That since that period your petitioners have been constrained to pay the enormous charge of ten pence postage upon a part of the Illustrated London News, containing four numbers only, being at the rate of two pence halfpenny postage upon each English stamped newspaper. This charge, your petitioners humbly submit, is in direct opposition to the New South Wales Postage Act, 16th Victoria, cap. 12, section 10. That your petitioners respectfully submit that the circumstance, or accident, that four or five weekly numbers of the Illustrated London News being enclosed together with a cover does not destroy their character as a packet of English stamped newspapers, the so-called monthly part of the Illustrated London News cannot be called a "monthly newspaper," because it is composed of four or five *original* weekly publications issued at intervals of seven days only from each other, and because the said Illustrated London News comes strictly within the definition of a newspaper contained in the Act of Council of New South Wales, 16th Victoria, No. 35, section 6, as well as the more perfect definition in the Act of the Imperial Parliament, 6 and 7 of William IV., cap. 76.

That the distinction between a monthly part of the Illustrated London News and a periodical may be seen by dividing the part or packet into the respective weekly numbers composing it. No one would insist that the separate numbers could be legally charged with more than one penny per number postage, under the Postage Act of New South Wales, and it is equally unquestionable that if an undivided periodical, for instance, a monthly part of *Blackwood's Magazine*, were divided into sheets in a similar manner, each sheet would be legally liable to the charge of twopence, although it might not weigh one quarter of the weight of a single number of the Illustrated London News.

That your petitioners respectfully represent that it is inconsistent with sound policy to impose the heavy tax of twopence halfpenny upon each number of the Illustrated London News, when stitched together, as so onerous a charge must tend to impede the circulation of a publication of the highest character, calculated to promote a taste for the fine arts, as well as contributing to gratify the anxious desire of many residents in the distant interior for an unexceptionable English newspaper.

Your petitioners unhesitatingly assert that they have heard no argument in favour of the exaction they complain of, except what might be as fairly urged against the transmission of any other newspaper through the post, whether published in the colony or otherwise.

That your petitioners represent that nearly 600 country residents, who are impressed with the conviction of the injustice they suffer from the impediments thrown in the way of the circulation of a newspaper which contains intelligence of the most interesting nature, and the feeling of injustice is aggravated by the reflection that the local circumstances of the colony afford no reason for the exaction.

Your petitioners pray that your honourable House will take their petition into your favourable consideration, and cause to be introduced into the bill of the present session of your honourable House for the amendment of the Postage Act, certain clauses enabling your petitioners to transmit the Illustrated London News through the Post-office, either in numbers or in parts, upon payment of one penny postage upon each number of the said newspaper.

Your petitioners are aware that it is the rule to number each issue of every newspaper, and that to prevent all doubts arising as to what shall be deemed a newspaper, for the purpose of postage, your petitioners humbly pray your honourable Council to adopt the principle that the penny rate of postage shall be levied only upon every numbered issue of the newspaper.

And your petitioners, as in duty bound, will ever pray.

(Signed by) W. R. Piddington, Sydney.
Waugh and Cox, Sydney.

The Sandwich Islands.—His Majesty King Kamehameha, alarmed at rumours of filibuster invasions, issued a proclamation on the 8th of December proclaiming that he accepted the proffered aid of the United States, Great Britain, and France in support of his sovereignty. The United States sloop of war *Portsmouth* sailed from Honolulu on the 3rd for the United States via Tahiti.

Liberty of the Press in Prussia.—In consequence of the liberal sentiments contained in the leading article of the third number of the *Preussische Jahrbücher*, on the question "Is Russia to be considered as a State of Europe?" in which the question was answered in the negative, and proofs brought forward to show that in character and institutions Russia is more allied to Asia than to Europe, the Russian Consul denounced it by the telegraph to the Czar's Envoy at Berlin, who complained to the Minister of the Interior, and effected the total suppression of the paper.

Russian Trade. According to letters from Russia, material interests are beginning to feel the effect of war more and more. If we produce must be got rid of, at first hand, at the lowest prices, on account of the cost of transport from the interior, in order to clear it away with purchasers abroad. Many Russian factories are also at a standstill in consequence of a want of raw material and [illegible] supplies conveyed to them by wheel are insufficient, and the prices of [illegible] enormously increased by those of transport. The imports and exports of tallow from [illegible] point of concentration [illegible] the convoys generally [illegible] carriage of twelve months [illegible] at Konigsberg.

RUSSIA, SWEDEN, DENMARK, AND NORWAY.

The population of Russia according to some statistical works published in foreign countries, recently published by the Government, which contain the latest and most accurate information collected, amounted in 1849 (exclusive of Poland and Finland) to 62,197,150 persons, of whom 29,282,777 were males and 29,914,373 females; the latter being to the males about 101½ to 100. In 1846 Poland is stated in Mr. McCulloch's "Geography" to have contained 4,857,700, and Finland 1,471,715; which would make the total population 67,527,150, within a few thousands of the total population as officially published in 1852, 69,135,562. Though Mr. McCulloch puts down the total population in 1846 at 66,008,315, we are inclined to suppose his statement is erroneous; and, as the official account now published must be presumed to be correct, confirmed as it is by agreeing with the official accounts published in 1849, we conclude that within its own territories the Russian population increases very slowly, and hence its uneasiness, and the trouble it gives to other nations. People well off at home are quiet and contented. Amongst the population, 1,793,797 are nomad, or without fixed habitation. The total town population is 2,897,815—not more than the inhabitants of London and Liverpool. The only really great towns in Russia are St. Petersburg, 487,362 persons; Moscow, 364,... Odessa, 78,151; Riga, 65,... Kazan, 61,104; Tula, 61,622; Kief, 48,711; Astrachan, 46,699; Saratov, 44,774; Jaroslaw, 40,765; and Kovnor, 40,661. The half of our population lives in towns; in Russia the town population is not much more than one-twentieth of the whole.

The revenue of Russia, from which we may infer the relative productive power of our 28,000,000 and the 55,000,000 of Russians (excluding Poland and Finland, as they are also excluded from the revenue accounts), was, in 1849, £24,7..,... which we paid to the State, say £2,000,000. The revenue of Russia was derived from direct taxes, £7,27...488; brandy monopoly, £7,74...67; indirect taxes, £7,745,110—including the customs duties, £1,...,468; making a total of £24,794,745. Our population of 28,000,000, therefore, raised for the ordinary expenses of the Government in peace, 2½ times as much as 55,000,000 Russians.

The national debt of Russia is £65,155,338 or little more than one-thirteenth of our debt (nearly £800,000,000); still, with her stinted revenue, the debt is onerous. More than half our taxes, before the war began (£27,7...,000), went to pay the interest on our debt, which would speedily ruin us were we not our own creditors, only a small portion of our debt being held by foreigners.

The trade of Russia compares with our trade as follows, in 1852:—

RUSSIA					
No. of Ships Entered	Tonnage		No. of Ships Cleared	Tonnage	
8,405	1,580,600		5,...6	1,...,...0	
ENGLAND					
20,884	6,759,169		1,747	6,...,...81	

If we add the tonnage of the ships that came and went together, we shall have 3,118,400 as the amount of tonnage employed in the trade of Russia, and 13,0...,... in the trade of Great Britain—or the trade and shipping of Russia is not one-tenth of our trade and shipping. It must be remarked also that not above one-eighth of the tonnage can, in the Russian trade is native, one-third of the whole being actually English; while, of the tonnage carrying on our trade, more than four sevenths are native. The Russian coasting trade appears to have employed, in 1852, about 5422 vessels, many of them very small; while the coasting trade of Great Britain employed 2,700,000 vessels, and the tonnage which came and went amounted to 25,800,000. In 1852 the total imports of Russia, exclusive of Poland and Finland, and exclusive of bullion, amounted to £16,160,808; the bullion imported was £1,988,800—making the total imports £18,149,708; the total exports, exclusive of bullion, amounted to £17,982,056; the bullion, £1,056,372—together, £19,038,428. Of the value of our imports we can give no account, for none is kept; but the value of our exports, exclusive of bullion, of which also no official account is kept, in 1852 was £18,676,854, or four times as much as the exports of Russia, exclusive of bullion. The principal articles of import are—raw cotton, in 1852, 66,008,896 lbs.; cotton twist, 4,184,064 lbs.; raw silk, 408,456 lbs.; sheeps' wool, 2,922,012 lbs.; coffee, 81,237 cwts.; sugar, 605,233 cwts.; machinery value, £318,218; wines and spirits, £1,441,523. Manufactures—cotton, £710,051; silk, £749,438; linen, £156,844; woollen, £261,054; dye-stuffs and fruit together make £1,640,000. The principal articles exported from Russia, including Poland, were, in 1852, hemp, 43,823 tons; flax, 62,555 tons; tallow, 752,630 cwts; potash, 252,741 cwts.; sheeps' wool, 29,111,184 lbs.; bristles, 23,382 cwts. linseed and hempseed, 876,784 qrs.; timber and deals to the value of £641,194; undressed hides, £108,486; red Russia leather, £179,122; and bread-stuffs, £907,426

The total quantity of wheat, we may remark, as this is a subject now of an interesting controversy, exported from Russia in 1852, to all other countries, was 3,175,507 qrs. The quantity imported into this country from Russia in that year was 733,734 qrs. The largest quantity ever exported from Russia, as far as the official accounts hitherto extend, was, in 1847, 4,279,682 qrs., of which we obtained 850,586 qrs. The large exports of 1847 were the stores of several years, and the very high price in the other parts of Europe caused Russia then to be swept clean. Since 1849 the export trade has been regular and free, and there is no reason to suppose that Russia can have more wheat to export in 1854 than in 1852. Instead, therefore, of having 6,000,000 qrs. to export, as Mr. Bright has most unadvisedly and erroneously stated, she has, probably, not above 3,000,000 qrs.; and, instead of 6,000,000 qrs. coming hither to save us from eating each other (as he also asserted the other day at Manchester), there is not the slightest probability that a single 1,000,000 qrs. would find their way hither had the two countries remained at peace. In spite of the war, too, we have received in 1854 more than the half of our usual supplies from Russia; and it must astonish every reasonable person to find a well-accredited member of the House of Commons making such extraordinary, inflammatory, and exaggerated statements as those made by Mr. Bright. We will now compile a table of the total value of the imports and exports of the principal ports of European Russia in 1852 —

	Imports	Exports
Archangel	£50,154 ..	£ 862,264
St. Petersburg	7,776,085 ..	5,110,887
Narva	31,456 ..	5,811
Riga	675,528 ..	2,615,745
Revel	81,972 ..	51,877
Windau	6,691 ..	28,254
Libau	21,900 ..	142,954
Ismail	14,045 ..	291,105
Odessa	1,126,455 ..	3,969,714
Taganrog	208,889 ..	554,914

The number of acres in the Russian empire is 1,688,905,251, or about twenty-two times as many as are contained in Great Britain and Ireland. Of these acres 23,804,743 are domains attached to private residences; 218,287,516 are arable; 107,971,138 are meadow; 241,205,861 are woods belonging to the Crown; 112 853,310 are woods belonging to individuals, and 39,138,242 are woods belonging to municipalities; and 932,052,138 are waste, of which even the quality of more than 600,000 acres is not ascertained. The total crops of bread corn—wheat and rye—was, in 1849, 67,416,156 quarters: and of other kinds of corn, 97,873,272 quarters; with 12,752,573 quarters of potatoes. The number of horses was said to be, in 1849, 17,456,503; of horned cattle, 21,226,240; of sheep—superior, 7,147,717; ordinary, 28,187,946; of swine, 8,862,410, goats, 1,055,122. Russia has latterly produced much gold: in 1847 the quantity was valued at £3,715,016; in 1852, £3,462,154. The average produce of iron is about 311,687 tons; our produce is about 2,860,000 tons. Russia possesses 327 manufactories of beet-root sugar, and produces about 300,000 cwt. As some extravagant statements [illegible] at Odessa, 34s. per quarter; and [illegible] down at 20s. [illegible] at Odessa, 24s. per quarter; and [illegible] count of the highest price of wheat in 1855 at [illegible] and the average of the year was 28s 4½d. The extreme prices which are put forth by a party, in order to exaggerate the losses and sufferings caused by the war, are imaginary, and, were peace to be declared to-morrow, would be found to have no existence.

The population of Sweden, according to the same authentic official tables, was, in 1850, 3,482,541), whereof 1,687,245 were males, and 1,795,295 females; or nearly 107 of the latter to 100 of the former. The number of the town population was 162,107 males, and 188,971 females: together 351,078, or about one-tenth of the whole, and double the proportion of the town population of Russia. In Sweden some attention is paid to education: the number of children of an age to attend school is 4 6,678, and of these only 14,282 are unprovided with education and do not attend school. The Customs duties were, in 1852, £241,257; the total shipping entered and cleared were 14,052, of an aggregate tonnage of 1,332,672. The total value of the imports in 1852 was £2,420,550; and of the exports, £2,304,893. About one-third of the exports are sent to Great Britain, and about one-seventh of the imports go from Great Britain. The principal exports to us are iron, timber, and corn; and the principal imports from us are cottons and woollens, dye-stuffs, coal, coke, and machinery.

Norway, though politically united with Sweden, is commercially and statistically distinct. Its population is not mentioned in the official tables: from another source we state its amount at about 1,400,000. They had, in 1851, 395,...4 tonnage of shipping employed in the carrying trade of foreign countries. In 18..2 the total tonnage entered inwards and cleared outwards was 1,622,026, of which 782,...2 tons were in ballast—a number of ships going to Norway for timber, which find no corresponding heavy cargoes to carry thither. After the Norwegian vessels, Danish vessels and Hamburg vessels have the largest share in the trade of Norway. The principal articles imported are cotton, wool, and manufactures of those materials, earthenware, corn, colonial wares, spices, &c. The exports are timber, fish, skins, horns, iron, copper, &c. Suffering like the greater part of Europe from a short supply of corn, the price of wheat was, at the close of 1855, between 74s. 7d. and 80s. 3d. per quarter—being dearer in Norway than here

The population of Denmark was 1,...,737 in 18.. .. 1,407,547 in 1850; the males at the latter period were [illegible] 715,...67, or in the ratio of 100 to 103. Almost the smallest possible proportion of these people live to be above 100, 0·01 in 1000. Denmark, like some other States, expends, even in times of peace, more than its revenue: in 1854 she expended £2,196,215, and her revenue was £1,952,076; but, as she increased her marine considerably in this year, the war even put her to an additional cost. In this year, too, she increased the interest of her debt from 4,340,286 to 7,434,700 rix bank dollars, the value of each being 2s. 3d.; and the whole increase of her expenditure from £1,481,573 in 1853 to £2,196,215 in 1854 was remarkable. Denmark owns in all 1701 vessels, of 100,595 lasts, equivalent to 201,190 tons, and of these vessels thirty four are steam-vessels of 2193-horse power. The total tonnage employed in her trade, in 1852, was 2,948,3..., and the number of vessels was 1,6...7, exclusive of coasting and small craft. The exports are estimated at £2,265,165, and the exports at £1,871,0... Also 6 one-sixth of the import trade and one-third of her export trade is with Great Britain. The former consists of spices, cotton (raw and manufactured), woollens, earthenware, coals, and all kinds of colonial produce transshipped from hence. The latter consists in bread-stuffs, cattle, wool, provisions, bones, &c.

The total population of the three Northern States, and that of Russia, with their shipping and trade, may now be stated in contrast. -

	Population	Value of Imports and Exports	Tonnage employed in Trade
Russia, including Poland and Finland	59,137,150 ..	37,8...,...4 ..	3,118,400
Sweden, Denmark, and Norway	6,290,288 ..	13,...,...1 ..	6,...,...0

Thus, these three civilised and Protestant countries have little more than a ninth of the population of the barbarous Colossus of the North, but they employ twice as much shipping, and the value of their trade is more than one-third of that of Russia. Such are specimens only of the superiority of our Scandinavian relatives over their Sclavish neighbours—our enemy, and their oppressors

SLAVERY IN JAVA.—Last Wednesday we were witness to a touching scene. In the market place of Gisse a slave family, consisting of father, mother, and eight children, from three to fourteen years of age, were to be publicly and unreservedly sold by auction. They had been the property of a deceased Dutch widow lady, who had always treated them with the greatest kindness; thus they were deeply grieved at being obliged to pass into the hands of a new master, and they gave expression to their great affliction by tears and sobs. The public crier put them up at 6000 florins. Though a crowd of people had assembled, they kept a profound silence. The crier gradually lowered his price to 5,000 florins, but none would buy. Then the father of this slave family, availing himself of the privilege granted by law to slaves put up to sale at a public auction, offered himself five florins, and at the same time, throwing himself on his knees, he besought the spectators not to make a higher bid. Not a word was spoken; a silence of a few moments ensued, and the entire family was adjudged to have been unreservedly sold to itself. It would be difficult to describe the joy experienced by these slaves on hearing the fall of the hammer which thus gave them their liberty, and this joy was further augmented by the presents given them by numbers of the spectators, in order that they might be able to obtain a subsistence until such time as they could procure employment. These are the acts of a noble generosity that deserve to be remembered, and which at the same time testify that the inhabitants of Java begin to abhor the crying injustice of slavery, and are willing to entertain measures for its abolition.—*Letter from Samarang.*

POLITENESS AT SEBASTOPOL. The Crimean correspondent of the *Journal de Constantinople* states that, since the Allies and the Russians are prevented by the season from meeting each other in battle array, they contend who shall overcome the other in courtesy and politeness; and he gives some anecdotes of this contest:—"The Allied troops are strictly forbidden to possess themselves of the money and jewellery of the killed or wounded. The latter and the prisoners retain everything they may have about them. Whatever is found on the persons of the officers among the killed is sent to the Russian head-quarters, with the name of the late possessor, whenever it can be discovered. If an officer is missing at the evening roll-call, a flag of truce is sent into the enemy's camp to inquire if he has been made prisoner; and, if the reply is in the affirmative, his money and effects are forwarded to him. A Colonel of Russian Hussars, having had his horse killed, and falling under the animal, at the battle of Inkerman, lost his sabre. After the action he sent to the French head-quarters to beg that it might be returned to him, on account of the value he attached to it as the gift of his grandfather. Every possible search was made for it. A French officer who accompanied one of the flags of truce after that battle said—'Yes, gentlemen, you won a brilliant victory at the Alma, and for it you may thank your means of attack, which we did not understand. Our soldiers are soon what slow to learn; but only give them time, and you will see that the game will be a little more difficult to play.' In fact, it was remarked that at Inkerman the Russians attempted to attack *en tirailleurs*."

GREAT BANK ROBBERY AT MELBOURNE.—The Metropolitan and City police have received intelligence by the Overland Mail, from the chief of the police at Melbourne, of a great bank robbery of £36,000 at Ballarat, and the probable flight of the thieves to England. From the information sent it appears that the robbery was committed on the Branch Victoria Bank, on the 2nd November last, by four of "those outcast villains" who committed such fearful atrocities at the diggings. With their faces concealed by black crape, and each armed with a revolver, they boldly entered the bank in broad daylight, seized Mr. Buckley, the manager, and Mr Marshall, the chief clerk, the only two who were in the bank at the time, and, having bound them with cords, then rifled the establishment of all it contained, and decamped, previously threatening the lives of those above named if they dared to move. The *Police Gazette* of Sydney furnishes a full description of the thieves, with a partial list of the bank-notes and bags of gold stolen. The value of the notes stolen is nearly £17,000. Several bags of gold, in the whole amounting to £15,000, were among the plunder. The Colonial Government have offered £1000 for the apprehension of the offenders.

EPITOME OF NEWS FOREIGN AND DOMESTIC.

On the nomination of his Royal Highness Prince Albert, Lord Dudley Coutts has been elected a Bencher of the Honourable Society of the Inner Temple and Lincoln's Inn.

The *Hamburg Courier* [illegible] the Emperor Francis Joseph intends to place Hungary [illegible] army in the event of war breaking out with Russia, and that he will [illegible] Field Marshal Haynau.

By a decree dated the 22d of January, the Emperor Nicholas conferred the Order of the White Eagle on Vice-Admiral Nakimoff, commanding the Fifth Division of the fleet

The Duke and Duchess of Wellington will remove from Belgrave-street towards the close of next month, and take up their residence permanently at Apsley-house, which noble mansion has undergone a complete re-furnishment.

By direct orders of the Emperor Nicholas, Prince Paskiewitsch has forbidden the export of brandy and other spirituous liquors.—*Austria*.

It is said in Paris that Prince Napoleon is about to be married to one of the Princesses of the Royal family of Wurtemberg.

Lord Stratford de Redcliffe has given a farewell dinner to Baron Brück, who leaves Constantinople for Vienna.

Preparations are being made at the Palais Royal, the residence of Prince Jerome, who is the members of all the branches of the Napoleon family will assemble.

The *Parma Gazette* states that the Duchess de Berri arrived there on the 3rd, on a visit to her daughter, the reigning Grand Duchess

Sir George Anderson, ex-Governor of Ceylon, arrived at Suez by the *Bengal* on the [illegible] on his return to England.

Lord Cowley is at Cairo for some time to recruit his health

The Foreign European Legion is to be placed under the command of Colonel F. R. Chesney, of the Royal Artillery. A Turkish Legion is to be formed at Constantinople, and officered by the British, who are to receive pay from their own Government.

Letters from Berlin affirm that the Duke of Coburg has refused the mission proposed to him by France and England in the interest of Prussia.

A marriage is in contemplation between the second son of Prince Czartorisky and the eldest daughter of Queen Maria Christina and the Duke de Rianzares. The youthful couple will reside at Paris.

Mr. W. S. Lindsay, M.P., passed through Paris on Saturday en route to Malta, with the object of [illegible] in regular service of [illegible] for the sick direct to Marseilles, and [illegible] ambulances along the coast.

M. Varnavas Pangalos, the oldest of the patriots who struggled for the independence of Greece, and one of those who sacrificed a large fortune to the cause, has just died at Athens, at the age of [illegible] hundred and [illegible] years.

The new statue in bronze of Joan of Arc, and the newly-repaired Hôtel de Ville at Orleans, are to be inaugurated on the 8th of May next

M. Soulé sailed from Cowes on Wednesday, in the *St. Louis*, for the United States

An aide-de-camp of General de Marmora and several other Piedmontese officers arrived two days ago at Lyons from Turin, and embarked on board the steamers of the Rhone, en route to the Crimea.

Mr. Hume is so seriously indisposed as to be unable to leave his seat in Norfolk

Khalil Bey, son of Cherif Pacha, one of the most influential personages in Egypt, is preparing to leave Alexandria for Paris on a mission from the Viceroy. He carries with him various specimens of Egyptian productions for the Universal Exhibition

Sir Edward Blakeney has been appointed Lieutenant-Governor of Chelsea Hospital.

Count Abel Hugo expired on Thursday week, after a few days' illness, at his residence in the Rue de la Madeleine. He was the elder brother of M. Victor Hugo, the poet.

A subscription has been commenced at Hanover for the erection of a statue in commemoration of the late King Ernest

The King of the Belgians was present at the opening on Sunday, at Brussels, of the Exhibition of Works of Ancient Art, organised by the Society of St. Vincent de Paul

On Saturday Mr. Charles Proctor, a gentleman of independent property, entered a shooting-gallery and blew out his brains with a pistol

The *Rotterdamsche Courant* states that a letter has been received from Madame Goldsmid, née Jessy Lind, in which that lady communicates her intention to visit Holland in the course of the present month of May.

The well-known antiquarian and linguist, Professor Lepsius, at the instigation of the Chevalier Bunsen, has completed an almanac containing the sounds and letters of all the languages in the world.

The Crystal Palace at Munich, built for the late Exhibition, is ordered to be entirely emptied, and converted into an extensive ground for drilling and parading the troops

The Board of Trade has hired the extensive and eligible house at No. 14, Rue du Cirque, at Paris, for the offices of the British section of the Universal Exhibition.

The market price of lions at Natal appears to be £7 10s.; at least three "beautiful" and healthy forest kings were sold recently in the market for £22 10s.

A new manifesto of the Emperor Nicholas, published at St Petersburg on the 11th inst., orders a general arming of the people throughout the whole extent of the Russian Empire.

The railway between Alexandria and Cairo, a distance of 130 miles, is now complete, with the exception of the three bridges on the two branches of the Nile and the Delta Canal.

A new loan from the house of Rothschild is said to have been contracted by the Roman Government for that apparently unattainable object, the withdrawing of the paper currency

Amongst the cargo on board the *Solent*, which left Southampton on Sunday with the Brazilian and Lisbon mails, was one of the coal mailboats. This vessel is sent to Lisbon as a model for the mail-packets about to be introduced into Portugal.

The Volga is to be made navigable from Astrakan to the Caspian Sea, by a company to be called the "Golden Fleece" is authorised to work certain mines in Siberia

Calcutta has been visited by one of its periodical droughts, which has continued so long as to be called a "water famine."

The Association for the Vindication of Scottish Rights has very prudently resolved not to press the claims of Scotland on the Legislature at the present time.

The Spanish Minister of Grace and Justice has announced that the newspaper the *Catolico* should be prosecuted for having published the Pope's Bull on the Immaculate Conception before it had received the sanction of the Government.

Two eclipses of the moon will be visible in this country this year—the first on the 2nd of May, when the moon will rise quite obscured; the second on the 28th October, when the moon will set nearly eclipsed.

The Viceroy of Egypt has abolished Customs duties except at Suez

At a meeting of the Crystal Palace Company on Tuesday, the Directors were authorised to raise £150,000 by preferential shares; and an amendment for raising the dividend from 5s. to 5s. per share was carried unanimously

Several able divers from London and Paris have just passed through Berlin on their way to the Crimea. They were there joined by one of the most experienced divers of that city.

The winter in Palestine is of unusual severity: snow covers the mountains to a depth of nearly four feet

The wife of a farmer, residing at Haywood, near Askern, recently purchased for £1 4s. an old-fashioned chest of drawers, in a secret drawer of which she subsequently discovered twenty "spade-nose" guineas.

Our Government is represented to have concluded contracts with various houses in Danzig for the delivery of large quantities of salt meat on terms very favourable to the Dantzigers

The French authorities intend erecting in Constantinople steam-mills, and a baking establishment, with twenty ovens, which will be able to supply 36,000 rations of bread a day.

The number of depositors in saving banks in Switzerland is in the proportion of 1 to every 13 of the population; whilst in Saxony it is 1 in 15, in England 1 to 22, in Hanover 1 in 27, Austria 1 in 40, Prussia 1 in 46, France 1 in 68, and Belgium 1 in 78

"Forty families," says a Hesse Cassel journal, "belonging to Neustadt, a little town of the Electorate, have gone over from the Catholic to the Protestant Evangelical Faith. The Cassel Consistory immediately sent a clergyman to provide for their spiritual wants."

A penal law against the circulation of foreign paper money has been passed in the Prussian Second Chamber

THE BRITISH INSTITUTION

[SECOND NOTICE.]

Our Illustrations of last week afforded very fair examples of what young English artists fast rising into distinction have produced during the past year. Mr. Deane enabled us to supply a clever picture from English domestic life; Mr. Holland wafted us to Venice, and awakened poetic and pictorial associations in our minds; and Mr. T. Danby reconciled us to the snow and cold winds of February by recalling an English season, "atween May and June," amid the mountains and waters of North Wales.

This week our Illustrations are of a somewhat different kind. In "The Park" (No. 245) Mr. Creswick and Mr. Ansdell have worked together with a kindred emulation. Very seldom has Mr. Creswick painted a sweeter landscape; rarely has Mr. Ansdell been truer to Nature and Sir Edwin Landseer. In spirit, execution, and in shape, this is intensely an English picture. It is true to English scenery and animal life. What a charming fireside companion would this picture make! We envy its owner the pleasure he will derive from possession. In one's easy chair we may sit before it, and, while feeling the comforts of a crackling wood fire, breathe the fresh air and partake of the life which animates and pervades the whole composition. This, in a few words, is a picture such as we should wish to carry about with us from country to town, from town to country, just as Sir George Beaumont carried the little Claude that is now in our National Gallery!

From the scenery of an English park, with pleasant peeps into a distant landscape, Mr. Wingfield (No. 316) carries the spectator to the "Artist's Studio," the interior, if we mistake not, of a room in Clipstone-street, familiarly known to many of our London artists. Here the air is evidently not quite so salubrious; and the room itself, it is quite evident, seldom passes more than once a year under the charwoman's scrubbing-brush and the housemaid's duster. That sitter has sat for many parts—for *Miranda* in the "Tempest," and *Olivia* in the "Vicar of Wakefield;" for *Rebecca* in "Ivanhoe," for Queen Elizabeth and for Nell Gwyn. She has sat to Etty and to all the pre-Raphaelites. Those casts have done duty in other studios, and have even figured for a time at more than one sale at Christie and Manson's of the remaining works of an eminent British artist deceased. That black velvet coat, of which the painter has given us the back most elaborately painted, was not designed without a thought to Raphael, and its quality and texture have been minutely copied into the small-clothes of Lord Leicester and the inky garments of Hamlet the Dane. Very carefully indeed is this picture painted. It was sent in unsold—the price £80. Its merits were soon seen, and more than one collector of name competed for its purchase. It was sold at the private view, and is the best work that we have yet seen from Mr. Wingfield's pencil.

"A RUNAWAY KNOCK." PAINTED BY GEORGE CRUIKSHANK.—FROM THE EXHIBITION OF THE BRITISH INSTITUTION.

Of a very different stamp from the solitude of Messrs. Creswick and Ansdell's "Park" and the repose of Mr. Wingfield's "Artist's Studio" is the bustling scene which Mr. George Cruikshank has enabled us to copy and enjoy. He calls it "The Runaway Knock," and very heartily has he entered into the excitement which such an event is apt to occasion in quiet families. As Fielding said of Hogarth's "Enraged Musician," that it made one deaf to look at it, so we may say that Cruikshank's "Runaway Knock" makes the spectator enraged at looking at it. The picture is one whole scene of excitement. The very poodles on the doorstep have an irritated and disappointed look. The runaway knock had the knock and counterfeit sound of the dog's-meat man: the dogs were, therefore, disappointed; the knock had the well-known rat-a-tat of a long-expected friend—all the household are, therefore, disappointed. Delight and disappointment are exhibited in every expressive shape that the fertile pencil of Cruikshank could design.

EXHIBITION OF PHOTOGRAPHS.

[THIRD NOTICE.]

This Exhibition is valuable, not merely on account of its intrinsic excellence, but as marking the rapid progress towards perfection of one of the most fascinating arts of the present day. Hitherto the artists of this country have too much undervalued the assistance which they might derive from the exertions of the photographer; and not a few have looked upon the rapid growth of the art with something like feelings of hostility or jealousy. This prejudice is now, however, rapidly passing away, and we know of nothing better calculated to remove the last lingering remnants of such feelings than a visit to the Photographic Exhibition. Even the most superficial glance will suffice to show the great assistance that artists may derive from the use of Photography, while the specimens of Mr. Lake Price (one of which we have engraved), and some other artists, show that the photographer will very soon be able to form a new school of art to which it would be desirable to see many of our artists lending their assistance and support. Turner, had he been living, would not have been slow to bear his cheerful testimony to the beauty of the atmospheric tints which are be found in some of the best specimens of Mr. Roger Fenton; the value of Mr. Sherlock's studies of clouds will be readily appreciated by every landscape artist; and every person who has the slightest pretension to a taste in art must perceive the beauty and novelty, and rejoice at the extent to which the artistic application of

(*Continued on page 166.*)

THE RUNAWAY KNOCK.

(JOHN THOMAS, Hall Porter, *loquitur.*)

It's a quarter to five, as I am alive! and that knocker's at rest for a wonder;
It's been going all day, as a body may say, like werry good minatur thunder.
I'm used to that now; knockers will make a row; it's their natur, and that there's no helping;
But with every rät tät tät-tät-ä-tät-tät, all Missus's dogs begin yelping!
There's that Hile-o'-Skye all 'air and no heye, like a muff upon legs—as sits up and begs, and turns up his nose at biled chicken;
And that fat wheezy span'nel wot they wraps up in flannel, I'd warm his hold 'ide with a lickin'.

I don't henvy my berth—it's the 'ardest on earth, and it's long since I made the diskivery,
Twenty-five pounds a year, no washing, No BEER! one 'at and but two suits of livery.
My powder is found—(that's to say I've a pound, which I puts profit side of my ledger,
'Cos I'm in the good books *always* of the cooks, and they flours my 'ead with the dredger)
All day in this chair, not a mossel of hair, 'cept when in the square I takes all the dogs out a hairin',
And the little boys chaff and sings out "Wot a calf!" their imperance really's past bearin'.
"Rat-a-tat-tat-a-tat," I wonder who's that? "Rat-a-tat," I'm coming as fast as I can, sir,

What's this! Why, good 'gracious!! Some one—how howdacious!!
Why, there isn't not no one to answer!!! (*Closes the door with a bang*).
Has the world come to that! "Rat-tat-a-tat-tat;" there's all them precious dogs set a-barking
Who was that, ma'am? Why, ma'am, I can't keep myself calm! With our knocker some wagabone's larking!
"*Run* and fetch the police!" "I can't do it, ma'am, please. Natur never intended I *should* run
By the door, ma'am, I'll stand, with a stick in my hand, and I'll give the next scoundrel a good one!"
Rat-a-tat—Yow-how-bow!—"Mercy! what's happened now?" "Why I've just been and trod on *dear* Shock, ma'am.
Why, there's no one! We've miss'd 'em. They'll ruin my system. I shall die of a runaway knock, ma'am!"

"THE PARK." PAINTED BY T. CRESWICK R.A., AND W. ANSDELL.—FROM THE EXHIBITION OF THE BRITISH INSTITUTION.

VALLEY OF THE WHARFE." [illegible] BY ROGER FENTON. FROM THE EXHIBITION OF THE PHOTOGRAPHIC SOCIETY.

"THE PAINTER'S STUDY."—PAINTED BY J. D. WINGFIELD.—FROM THE EXHIBITION OF THE BRITISH INSTITUTION.

Photography, as shown in the works of Mr. Lake Price, may be carried to a degree of perfection which will present with the first exhibition of the society, the greatest advance will be found to have been made in a more careful and artistic selection of subjects by the photographer, and at the same time a much greater command and control over the lights and shades of the picture; resulting, no doubt, from a more intimate acquaintance with the action of the various chemicals employed. Photography, however, would have been doomed to a long and inglorious career, even if it had survived its first ghastly and enfeebled productions, and the glare of the polished silver surfaces of its first plates, had it not been for the discovery of the collodion and paper processes. Between the photographic productions of the present day and the portraits produced by the sun at the bidding of Daguerre and the earliest professors of the art there exists scarcely a point of comparison, and even the very name of Photography appears destined to give place to the more scientifically correct and euphonious one of "Heliography" or "Sun-drawing."

The specimen which we have engraved ("Valley of the Wharfe") illustrates the chief features of the Exhibition. This charming landscape view of Mr Roger Fenton is the type of a very large number of specimens of the same kind, which bear striking evidence to the value of the collodion process. In this and some other specimens the clearness and transparency of the eye of the artist has combined charming effect with the skilful manipulation of the photographer. There is a soft and mellow tone about this picture of Mr. Fenton's, and a richness of atmospheric colour, which has never been surpassed, if equalled, by the previous attempts of any photographer. There are many other works by Mr. Fenton in which an almost equal amount of success has been obtained. We may instance some fine views of Rivaulx Abbey (228), Fountains Abbey (267), and Bolton Abbey (641). Mr Fenton is, we believe, now on his way to the Crimea, and the public may expect in a few months to receive some accounts from the seat of war with respect to the accuracy of which there can exist no doubt or uncertainty. A better selection could not have been made than that of a gentleman so fully conversant with the practical working of all the details of this pleasing and useful art as Mr. Fenton, and we look forward with pleasure to the results of his labours in the East, feeling convinced that his portfolio will be filled with many specimens worthy of his taste and ability. Mr. Fenton is, we believe, no stranger to the scenes which he is about to depict, he having some years since made a very lengthy artistic tour through the principal Russian provinces. Some landscape views by Mr. Cundall are also remarkably successful, more especially a charming rural scene, "Stepping-stones over the Wharfe," Bolton Abbey (418); and some specimens by Mr. Hugh Owen are also deserving of high commendation: we may particularise some charming views from Leigh Woods, near Bristol (39). In landscape scenery, too, M. P. Delamotte has one or two exquisite little gems—"Ewenny," a view in South Wales (315), and a "Pantglas, South Wales" (334). There are few more pleasing objects in the collection than such charming rural and farm scenes by Mr. H. Taylor—the "Cottage at Basbing" (462), "Unstead Farm" (458), "A View from Gosden" (305), and several others. In nearly the whole of the landscape pieces shown there is evidence of a most decided advance in the accurate and picturesque delineation of trees and foliage—the result of the refined and more rapid processes applied to the art

In the large class of architectural specimens to be found in the collection, there is much to interest and astonish the visitor. Perhaps the finest specimens yet produced are the "Hôtel de Ville, Paris" (134 and 142), and the fine old "Church of St. Germain l'Auxerrois, Paris" (152), by Bisson Frères, shown by Sir Hugh Campbell, Bart. There are, too, some fine views of convents and old buildings in Oporto, by Mr Hugh Owen, including the "Kitchen of the Convent of the Serra." Cloisters of the Convent of San Jeronimo, Belem" (20), and others. The striking contrast of light and shade in these views is remarkable, the light entering through the open cloisters, and the dark masses of shadow beneath the rich groining of the roof are most effectively and distinctly rendered. Two large views of the Interior of the Crystal Palace (324 and 362), by Mr. P. Delamotte, show, as in the following as well as in the Smithsonian, an wonderful force for their distinctness of outline and minuteness of detail, and each picture of the multitudinous panes of glass which compose the acres of its crystal roof and sides may be seen and traced. Views such as these suggest the advantageous use which might be made of photography in large engineering works, such as those which were carried on at Sydenham, as views taken daily or weekly would afford to the conductors the means of ascertaining with accuracy the progress made in every part of the undertaking. Some views of the Renaissance and Alhambra Courts of the Crystal Palace (319 and 329) show with marvellous fidelity all the beautiful details of these interesting and instructive portions of the labours of Mr Digby Wyatt and Mr. Owen Jones. A variety of Talbotype views of the works in progress for the great suspension-bridge over the Dwina, in Russia, will serve to convey some idea of the magnitude and extent of this gigantic engineering work.

A VALENTINE FROM THE CRIMEA.

THE SOLDIER TO HIS COUNTRY.

Out, favoured wind! oh, happy wind, that bloweth to the West:
Go, take my sigh, and waft it high above the billows' crest,
And say from me, though slaves may flee, I'll perish ere I part
With the colours fair she bade me bear—the mistress of my heart!

Say, 'tis her name I pledge to Fame, on love's triumphant day
I care not, I, for flashing eye, nor breath that mocks the May;
The accent meek, the lily lung cheek—these boast no charms for me.
While gazing round on hostile ground, I stand amidst the free.

Love of my youth! a patriot's truth I cast before thy shrine:
O England, precious England, to my death-day count me thine!
No sound of cheer can greet my ear like to thy trumpet call,
And I look to thee to rescue me, or weep me when I fall.

This sword I lift—it was her gift, she robed me for the fray,
And the parting smile of my glorious Isle still lights me on my way.
Fair is her word in council heard, but fairer still her deed:
Though worth a throne, she'd give her own for her poor soldier's need.

I see thee stand, O, sacred land! down bending to the sea,
With regal mien, in robe of green, crowned as a Queen should be;
Down-bending low to meet the flow of that maternal wave
Whose circling bound hath clasped thee round, to guard thee and to save.

God keep me true, while here I rue the wild war's raging hell;
God bid it cease, and give her peace, who loveth peace so well!
Who loveth best the sword at rest; and, better than red gold,
The busy mill, the hamlet still, the flocks upon the wold.

Land of free toil! the unfettered soil that never brooked a chain—
O, England, flower of Europe's bower, the rose of all the main!
More blest is he than princes be, who for thy sake shall die:
To England's home who dares to come through ranks of slavery?

If England yield, 'tis in the field where noble souls contend;
And dearer far than brothers are, the foe she makes her friend:
Fair in her sight the cause of right, sacred the heart's brave cry—
"Better than life with fetters rife is death with liberty!"

Take, take from me—I give it thee—this strong right hand and true;
Come weal, come woe, 'twill front the foe, nor claim its guerdon due:
A serf is he who bends the knee, imploring aught of grace
Beyond the gift, unstained to lift his eyes to meet thy face:

Where may be cross, there may be loss, fall, failure, or defeat;
But hearts that rise where glory dies can still with honour beat.
Should victory dawn when life is gone, write this above my dust—
"He saw no free; he died for me; nor wronged a nation's trust."

Come wounds, come death, my latest breath shall be a prayer for thee,
The one true goal of freedom's soul, the sunless sea
When closed my task, I would but ask a grave upon thy breast,
As the dying sun, his day done, sinks proud in the West!

E. L. BLANCHARD.

The affairs of Mr. J. Atwood, late M.P. for Harwich, turn out to be very much worse than was expected. The deficiency is less than £120,000.

NOTES OF THE WEEK.

THE Palmerston Ministry has got its foot in the stirrup; it may be said to have got into the saddle on the meeting of Parliament on Friday. It now remains to be seen if it will be able to maintain itself there, or whether that skittish jade, public opinion, will kick it off at once or allow it to remain for a time, clinging on, John Gilpin like, to mane and tail, until it is finally deposited in the dust of some political Edmonton or Ware. Certainly the future seems doubtful; for the increase of public confidence which was looked for on the coming into power of the ex-Home Secretary has not been realised: Funds have not improved, but rather the contrary; and people seem inclined to doubt if the energy necessary to a successful carrying on of the war is likely to be found in a Ministry the head of which is seventy one, and whose most important member, the Secretary for War, enjoys the two misfortunes (in his position) of gout and goodnature. It certainly will be strange if, with all the outcry that is now going on for young Generals and Admirals, we should rest content that Ministers who have, on the whole, quite as hard work as either should be practically considered unfit for their places till they are over sixty. Mr. Layard was promised as Under-Secretary for War, which did, to some extent, gratify the wishes for new blood. But this is not to be: either, according to the club-like principle on which our Governments are formed, he was held to be not on sufficiently amicable terms with those who would have been his colleagues, or he gave himself credit for a higher power of being disagreeable than ought to be contented with a subordinate position. Mr. F. Peel (popularly known as "the red tapist") is to have the place. As regards the war itself we have no news. The *St. Petersburg Gazette* tells us from time to time that "nothing of importance has occurred since our last, excepting a sortie from the town, when seven French soldiers and a drummer-boy were taken prisoners;" while Lord Raglan sends weekly a curt despatch announcing that the weather, though bad, is better than it has been, and giving a list of accounts which have happened to three rank and file; quite passing over the two or three hundred who have died in hospital during the same period. There has been a pretty general rumour during the past week that both Lord Raglan and Quartermaster General Airey are to come home; the latter half of the story, at least, appears probable. On the whole, the sufferings of our troops, though still bad enough, seem to have diminished. The *Times* this week has made itself the mouthpiece of a curious proposition, which really seems to deserve an attention in high quarters, which it doubtless won't get. It is stated that a very wealthy mercantile firm are willing to contract with Government, under very heavy penalties, to provision the whole of our army in the East, either before Sebastopol, or anywhere else within 200 miles of the sea-coast. When that copy of the *Times* reaches the Crimea the list of delicacies which these enterprising people are willing to provide to our starving soldiers, all for the moderate price of 3s. 3d. a head daily, will read like a fairy tale to them. Fancy the unlucky private now compelled to satisfy nature as best he can on raw salt pork and green coffee, being asked whether, with his cutlet and hot rolls, he would prefer coffee, tea, or cocoa for his breakfast! Fancy fresh beef promised *at least* twice a week, with unlimited vegetables! and every day "a warm and nourishing supper meal"! Yet men of business and capital are willing to engage, under ruinous penalties, to furnish all this, and those best acquainted with the subject (not Government officials) feel assured that it can be done, and so as to leave a large margin of profit.

Whatever else is done, it seems clear that not only a great alteration in the system, but that also a clean sweep of some of the higher officers of the Army Medical Board, must be made. It is a sure sign for plain speaking, so it may be said plainly that Doctor Andrew Smith, Commander-in-Chief of Army medical men, must *go*. It is certain that all the blunders and shortcomings in this department are not to be laid on his shoulders; yet there remains enough for which he is clearly answerable to show that in these times he is unfit for his position. What a position it is second only to that of the actual General in chief! Doctor Smith is the very incarnation of *routine*. Nothing new—no proposition that has not gone through a dozen different offices, waiting half a year *in transitu*—finds favour in his sight. *Le mois gratis*? Seven or eight months ago it was proposed by an eminent waterproofing-house to supply the army with waterproof sheets. Dr. Smith objected to them on the ground of expense and weight. Now, as the price was four and sixpence each, and the weight little more than a pound, this did not appear to the makers to be a valid objection, and they consequently submitted their proposal to the Duke of Cambridge and General Wetherall. They liked the sheets, did not think them dear or heavy, and wrote to Dr. Smith to say so. What does the Doctor? He puts himself into a passion, tears up the letter, and refuses to have anything to do with the sheets, *not* because he disapproved of them, but because he "would not endure foreign interference with his department"!

"Sweet are the uses of adversity." Lord Cardigan, before he left England, was certainly by no means the most popular man in it; but his coolness since his return almost promises to make him so. It has consolidated the good opinion which his proved gallantry had won for him. At the Mansion-house his modest and soldier-like speech was a pleasing contrast to poor Sir Charles Napier's absurd outbreak, and more recently, by his speech at Northampton, he has earned deserved and unanimous applause. Every one feels that Lord Cardigan is to be believed, and no one who read or heard what he said about the splendid, but fatal, cavalry charge at Balaclava can doubt that it was caused by a positive but ill-judged order.

The late appointment of Lord Rokeby to a command in the Crimea has been received at the Clubs and in society with almost unanimous disapprobation. Lord Rokeby is much liked, but he is as deaf as a post; and it is well known that at Chobham this infirmity led to some curious mistakes in the management of the battalion he commanded there.

This week we have not heard much of Sir Benjamin Hall. He has retired to his tent, like Achilles, satisfied for the present with the castigation administered to the Paving and Lighting Boards. We must have him out though, for there is work for him in store. For instance, the other day a house fell down at Islington, killing *eight* persons. Insecure—*illegally* insecure construction was the cause of the accident. The district surveyor—that gentleman who is sure to be down upon you if you put up a dog-kennel without a metal or tile roof to it—where was he? Then, again, there is the state of the streets: there is, or used to be, a regulation that snow should be removed from the pavement before inhabited houses by the occupiers thereof. How far this is carried into effect in the out-of-the-way streets every one who walks much can judge. Then there are the bridges—Blackfriars for instance, the ascent to which is a perfect *Montagne Russe* of ice and hardened snow; while Londonbridge (being flat, and therefore hardly wanting it) has been carefully and continually gravelled.

AN AMERICAN SNOW-STORM.—A great storm of snow and wind raged over the region of the Mississippi on the 26th ult. The train on the Chicago and Mississippi Railroad, with a large number of passengers and several members of the Legislature, was frozen up on the prairie in snow some eight feet deep. The passengers burned the cars, and by the consumption of a consignment of oysters preserved themselves from starvation. Relief was sent to them on the 28th.

Two new regiments of militia are to be raised in Lancashire, to be called the 6th and 7th Royal Lancashire Militia; the first of which, commanded by Colonel the Hon. E. S. Wilbraham, is to be raised in Salford, and the other is to be raised in Manchester. Colonel Wilbraham and Adjutant and Captain Hartshorn have already advertised for volunteers, offering a bounty of £6 for men between eighteen and thirty, but men who have served in the army, if well recommended, are to be received up to forty-five years of age. The establishment of height is five feet and the corps are to be each 1200 strong.

LITERATURE.

MOUNTAINS AND MOLEHILLS; or, Recollections of a Burnt Journal. By FRANK MARRYAT.

The title of this book has the peculiarity of not giving the slightest idea of what the book is about; and what is stranger still, the preface leaves the reader equally in the dark. It is necessary to explain, therefore, that the volume contains the author's experiences during a two-years' residence in California.

This "Eldorado" has lost much of the intense interest it excited in this country before the discovery of the gold fields of Australia came more home to the business and bosoms of the British public. Some few years ago every youth at a loss how to make his way in the world, every broken-down adventurer in every trade, profession, and occupation, sought to begin the battle of life, or to fight it over again after having lost it, by going to California. Now-a-days California is almost forgotten; and, Melbourne, not San Francisco, is the great object of attraction for our sanguine adventurers. Still, however, California, though we think less of it than we did, has lost none of its real interest for growing magnitude and importance. As the nucleus of a great country, whose golden produce is working a gradual change in the condition of the whole world, it keeps pace with our own Australian colonies, and its present rapid progress is a not less striking subject of contemplation. The theme, too, has more freshness, because we are less familiar with it. Mr. Marryat's Californian pictures, therefore, will have the novelty of his readers, the attraction of novelty which cannot now be given to the views, now daily placed before us, of life in Australia.

Of Mr Marryat's antecedents we have little or nothing from his book; but we may mention, *en passant*, that he is the son of the distinguished novelist, Captain Marryat; and our knowledge, even of his proceedings in California, is rather gleaned from passing intimations than obtained from any coherent personal narrative. We gather that he was bred a sailor; that he is a gentleman of amiable manners; and that he went to California with the view of employing his resources in speculations for bettering his fortune. We gather also that he is a person of sanguine temperament and active habits, ready to plunge into schemes and experiments, and equally ready to abandon them when they look compromising; that he is intelligent, acute, and fertile in expedients; but with a love of amusement and a lack of perseverance which sadly disqualified him from running the race of competition with the "go-ahead" adventurers of California. He has written, however, a book which is not only entertaining but instructive. He appears to have unflagging spirits; failure and disappointment have weighed but lightly on his elastic temper. He is always gay and animated, while his lively sketches of Californian life and manners are mingled with much solid information and acute remark, probably not only to those who emigrate, but to those who stay at home.

The slight notices of Mr. Marryat's movements scattered through his book afford amusing illustrations of what we may call his vocation. Arriving at San Francisco some time in 1850 (he is not particular about dates), he first repaired to a district in the interior abounding in game; "my object for the present being to encamp myself in some snug place in the mountains, and there live upon my gun, in all the enjoyment of a free life and the pleasures of the chase." Coming to a pretty valley, full of game, he determined to *squat* there, with his followers; and, as the land belonged to the United States, he took possession of it with sufficiently simple formalities. Delighted with its capabilities, he determined to enclose it, and make it a farm. To procure the necessary articles he returned to San Francisco, where, as his time hung heavy on his hands, he joined a company of actors! "For about a month, under an assumed name, I nightly 'used up' and 'Jeremy Diddled' the Californian audiences, and never having fortunately seen Charles Mathews, did not stone me to death for my presumptuous attempts to personate that unrivalled actor's characters. I became at last so used to seeing my 'last appearance but one' displayed in the enormous posters, that I began to associate myself with the profession altogether, and to believe that my name was Warren; and, what with the excitement of acting in leading parts, and the pleasant parties and picnics with our troupe, I forgot all about Russian River Farm, and became a very fair actor to the bumpkin audience." Duly arrived, however, and returned to his farm, but soon got sick of it. Settlers were beginning to invade his dominions, the game was getting scarce, and his *onions were a failure*. So he gave the farm as it stood to one of the backwoodsmen he had taken for some time.

His next scheme was gold-digging. He started from San Francisco with a party of followers, and settled at a place called Tuttle Town, with the view of testing the value of the quartz vein there. Having collected a considerable quantity of ore, he went down to San Francisco to procure steam power and machinery. He returned with a newly-invented machine which had not been tried but looked promising, and which he transported at great expense. "Its arrival created great sensation, and the town increased in size and importance on the strength of it. A French baker and a butcher established themselves in our main street; and at the first general election a justice of peace and constable were legally elected." The machinery was set up, but broke down immediately; and Mr. Marryat set off to San Francisco in quest of something better. Another machine was set up, but it, too, turned out a signal failure; "whereupon," says Mr. Marryat, "I resolved to abandon my *third* profitless speculation." We should have mentioned that, besides the farm, he had invested money in building an hotel which had likewise turned out a failure. He sold his machinery and effects for what they would bring, and returned to England.

But this was not the end of his adventures. In the winter of 1852 we find him at the island of St. Thomas, "on my way back to the scrofulous pigs, the carpenter judge, and constable Bowie." But he arrived at Tuttle Town. Yellow fever broke out in the vessel in which he and his wife (who now accompanied him) embarked at St. Thomas; he himself was attacked; all their fellow-passengers died but one; and Mr. Marryat alone, of those attacked, recovered. His wife was next attacked, and, after horrible sufferings by sea and land, they at length arrived at San Francisco. Now he seems to have finally abandoned Californian speculation; for he thus concludes his book:—

Again I am leaving San Francisco on a bright Sunday morning. As we glide past the hills, the sound of bells from twenty churches is borne to us over the calm bay; we can see artisans strolling in groups with their families, and schools of children on their way to church, who merrily wave us an adieu.

Soon the bells are heard no more, and now, having passed the Heads, we meet the fat fog which the sun has turned out of the bay.

As we plunge boldly into this, we say farewell to California.

Mr. Marryat sometimes moralises on his own failures. The following reflections are characteristic of the man:

Agriculturally, architecturally, and numerologically, I had been sported with by fate; and the plough in the north, the steam-engine in the south, and the hotel in the middle, had each been accompanied by pecuniary loss. Yet the days I had passed had been very happy, and Philosophy said: "You have had health, and contentment, and warm friendship; and, if these were purchaseable, many would buy them of you for twenty times what you have lost in money!" To which I replied, "Very true, oh, Philosophy! but had I taken my steam-engine to Russia, River, and there applied its power to sawing red-woods, and had I with my plough turned up the fertile hills and valleys at Valley, and further, had I erected in a hotel at Sacramento where a man knew what he wanted, I might have still had the unpurchaseable articles you allude to, and the money too." Upon which Philosophy, seeing me thus unreasonable, retired from the contest.

The author thus speaks of the present magnitude and future growth of gold-mining in California:—

The number of those who are now actually collecting gold by mining in California may be computed at about 140,000 men.

The obstacles that are alike presented by the extremes of the wet and dry seasons will not admit, probably, of these miners working more than 200 days in the year, and the average daily sum amassed by each man may be fairly quoted at three-and-a-half dollars, or fifteen shillings.

This will give an annual yield of twenty-one millions sterling from California, and I see no reason to doubt that this sum will be obtained, although it does not (for many reasons) appear in the reported exports of specie from the country.

Now, if this sum can be annually realised by the exertions of comparatively few hands of men, who have even at the latest dates no better plan of securing the gold than by a rude system of washing, what may we expect when machinery is employed, and labour concentrated!

A QUICKSILVER MINE.—Large quantities of quicksilver are now obtained from the mine of New Almaden, situated about sixty miles from San Francisco. The shipments last year were 9,751 flasks, containing in gross 1,149,000 lbs., being an increase of 39,000 lbs. over the export of 1854. The quantity used in California for the amalgamation of gold is so great, and, as the quartz-miners come to learn their business better, they will use less quicksilver than they do now. This mine is capable of yielding sufficient quicksilver for the consumption of the whole world; but, from its locality, and the competition with the Spanish article, which is better known, its use has hitherto been almost entirely confined to Mexico, Peru, and Chili, for amalgamating silver ores. [illegible] considerable quantity for various purposes.

BOARD of TRADE DEPARTMENT of SCIENCE and ART.—ADDITIONAL PRACTICAL EXAMPLES for ARTISAN INSTRUCTION.—The Lords of the Committee of Privy Council for Trade having resolved to furnish Examples to each class, in accordance with the plan adopted by the Committee of Council on Education, [illegible] practice of keeping a stock of such articles at the Department, notice is hereby given, that on and after the 1st of JANUARY, 1855, Examples will be sent or supplied directly from the Department of Science and Art, as at present, both to such Agents in London and the Provinces [illegible] form of application for, and further information, may be obtained at the Offices, Marlborough House, Pall-mall, London.
Marlborough House, 30th Nov., 1854.

THE GRESHAM FREEHOLD LAND and BUILDING SOCIETY.—A PUBLIC MEETING will be held at EXETER HALL, Bridge-street, Blackfriars, on MONDAY, FEB. 26th, next, at 12 o'clock, for the Principles of the Society to be explained. Rights to Advances Mr. ALDERMAN WIRE, a Trustee of the Society, will take the chair at eight o'clock precisely.
Subscriptions 1s. per Week per Share. Payments suspended in periods of sickness or infirmity, even after receiving advances. One Share, if drawn, will entitle the Member to an advance for the purchase or erection of a house in any locality. All persons paying three months' subscription will be eligible for the Ballot.
[illegible] FRED DAVIES, Managing Director.

LECTURES to WORKING MEN.—The following COURSES of LECTURES will be delivered in the EVENINGS during the present season in the THEATRE of the MUSEUM of PRACTICAL GEOLOGY, Jermyn-street.
1. On GEOLOGY, by A. C. RANSAY, F.R.S.

THE ILLUSTRATED LONDON NEWS

No. 729.—VOL. XXVI.] SATURDAY, FEBRUARY 24, 1855. [WITH A SUPPLEMENT, SIXPENCE.

REFORM OF THE CIVIL AND MILITARY SERVICE.

So great have been the expectations raised by the appointment of Lord Palmerston to the Premiership, that his reputation bids fair to be endangered. It is in the nature of the public mind, at times of peril or anxiety, to expect too much from its favourites Revolutions make short work both of men and character; and War—which is the arch-anarch, the very fountain-head and parent of all other revolutions—consumes many things besides the precious gold and the more precious life-blood of nations. It sets up the new, and knocks down the old. It strips off false pretences, and, being the rudest and most primitive of powers, it appeals to the rudest and most primitive of virtues, and admits of no merits but those of Strength and Success. It tarnishes reputations that seemed as if they would endure in perennial brightness as long as history. It exalts the humble and abases the mighty of the earth. It eats up the bone and sinew of the people, and "uses up" the character of their leaders. It plays for great results, and looks for no other, and thereby confounds the jog-trot calculations of the easy men who would guide it as they would a business, or work at it as regularly as a problem. And among no people does it operate so strongly as among a people accustomed to self-government, proud of their freedom, and familiar with victory. Such a people are the English. Thus, before we have been a year at war; before we have suffered a single defeat; and while we are in the very height of diplomatic as well as of military and naval success; the public, disgusted with delay, and with the loss of a noble force from disease, neglect, and inaction, and unsatisfied with all that has been done—though much of it has been done well—seems as if it would offer up as victims to its anger and impatience not only the good name of its tried and approved servants, but the principles upon which its government is conducted, and a portion of its own liberties. Nothing will stop its craving but brilliant and immediate success. The capture and destruction of Sebastopol, and such other humiliation as will compel the Czar to sue for peace, and consent to the diminution of his power and his territory; —nothing less will stop the complaints of the nation, or allow us to relapse into that comfortable prosperity from which war has so rudely shaken us.

Lord Palmerston's Administration, in succeeding to power at a time like this, assumes responsibilities of no ordinary magnitude. It is next to impossible that he can satisfy the public wishes by any measures which he may personally adopt. He must be aided by fortune, or by the fruition of the seed sown by his predecessors, or he will be just as likely as they were to disappoint the expectations of the multitude. If our arms be successful in the Crimea, he will, without any particular merit of his own, share largely in the glory. But if we fail, or if the Russians gain any signal, although it may be only a temporary, advantage, he will, though he may have done all that man can do to avert the catastrophe, share in the discredit, and forfeit the splendid reputation which it has cost him half a century to erect. If the siege last for three months longer he will cease to be the idol of the people, though he may be quite as worthy to be so as he is at present. It will be discovered that he is too old, too deeply imbued with the habits and notions of a bygone period, too inactive, and in every respect too inefficient for the post of responsibility and danger. Nothing will remain for him but to retire to make room for others, who will suffer in the same way from the same causes, until victory shall atone for all that is past, and restore the people to good humour and to common reason.

The measures recommended and adopted by Lord Palmerston and Lord Panmure, to extricate us from the physical and moral slough of Balaclava, seem well adapted for the end in view. But there is a disposition to treat them as of no avail, though it would be hard to say what more can be done, unless the public liberty be put in abeyance, and a Dictatorship instituted, to lead us through the war. The public, however, is not likely to run its head into that noose. Even Dictators cannot do all they please; or who could withstand Czar Nicholas, whose armies die of disease and starvation just as rapidly as those of a free people? Those who do not cry out for a Dictator insist upon a much larger army. But the malcontents do not ask themselves where it is to come from? They forget that we have no conscription, and that the country would revolt at the bare proposal of such a violent innovation upon our old habits if it were seriously made or entertained by a Minister of the Crown. Enlistment is voluntary in England. Even were our shores in danger of invasion, there would be no need of a conscription; for every Englishman would, in such a case, cheerfully become a soldier, and fight with spade and axe, in default of guns, against the invader; and every Englishwoman would urge him to the duty and cheer him in its fulfilment. They also forget that a large standing army is alien to the character and ideas of our people, and to the letter as well as to the spirit of our free Constitution; and that, consequently, when war breaks out, it must always find us more unprepared than it finds those States of the Continent where large standing armies are maintained by despotic Sovereigns as necessary appendages of their dignity and supporters of their authority. The cry against the Aristocratic system, to which Mr. Layard has lent himself, may be all very well; but misfortune will befall us as a nation if we trust entirely to a reform of that system as a remedy for the present state of things in the Crimea. If it could be abolished in a day by a stroke of Lord Palmerston's pen, the reform thus commenced would not aid us in the taking of Sebastopol

THE FROST.—THE THAMES AT BILLINGSGATE.—(SEE NEXT PAGE.)

The doors of advancement may be opened to merit both in the civil and the military career; but the merit will not work its way upward in a day, or a week, or a twelvemonth. If, from the year 1815, and during the forty years of peace which we have enjoyed since the then settlement of the affairs of Europe, we had endeavoured to make the army a democratic institution, it is possible, though not certain, that we might have had abler Generals than we at present possess; but we very much doubt whether we should have had braver and better men. There is not a word of condemnation against the sale of commissions that is not richly deserved. The old system cannot outlast the war, and when it falls it can never be restored. But should it be superseded to-morrow, the public should be on their guard against expecting too much from the change. Whatever may be the quality of the officers and soldiers who may emerge into daylight and into honour under a new system, we are not likely to have better men under any system, however perfect theoretically, than the noble eight thousand who gained the day of Inkerman against seven times their number; or than Sir Colin Campbell and Lord Cardigan, who did not rise by merit alone. With all our administrative defects, we have yet an army to be justly proud of. Our firm belief is that that army—or the remnant of it—will yet achieve a splendid victory and plant the flag of Great Britain on the walls and forts of Sebastopol. Let us hope that after that day of glory the public will remember its present cry for a reform in the administration of our civil and military services. For forty years the cry has been a feeble one. It only gained strength in the hour of peril and perplexity. Without passion and without prejudice let the people adhere to it after the danger shall have passed away; and the next time we are at war—a time which may Heaven in its mercy long avert from this and succeeding generations the British nation will have something like security that it can command the best services of its best citizens. But it must look to itself, and not to its Government, to make the desired change. And further than this, it must sow good seed in days of peace and prosperity, if it expect to reap good fruit in days of war and danger.

THE FROST.—THE THAMES AT BILLINGSGATE.

THE severity of the weather is nowhere more strikingly seen than upon the Thames, which presents many picturesque scenes for the artist. One of these points is pictured upon the preceding page; and the large illustration at page 177 shows the river with its floating masses of ice at the same time with the conflagration upon its bank.

The Thames is now rendered entirely unnavigable from Richmond to below London-bridge. The river has not been so completely locked up since the memorable winter of 1814; and there can be no doubt that if the channel of the river were now, as then, impaded by the narrow arches of old London-bridge, the whole surface would have been frozen over some time since. The shores on either side the river present a very curious and picturesque appearance, from the accumulation of large masses of frozen snow and ice, in many places from 10 to 12 feet high, and having the fantastical forms of small icebergs. At certain periods of the tide, below Westminster-bridge the whole width of the river is covered with ice

The writer of a letter in the *Morning Post* of Thursday has called attention to the peculiar character of the masses of ice which nearly cover the surface of the river, and are carried backward and forward by the ebbing and flowing of the tide. They are not smooth, solid, and translucent, like the ice which forms on the Serpentine, or any other standing water, but have rather the appearance of sullied snow; and if closely examined they will be found to consist of spongy masses of crystals, as different in texture as in appearance from ordinary ice. This is caused by the great bulk of the ice on the Thames having been formed, not on the surface, but *at the bottom*, of the river. It is one of those curious phenomena of congelation known to a few careful observers of the operations of nature. Thus during the continuance of severe frost, at a few miles up the river, where it runs with a moderately swift but smooth current, on the surface of the stream may be seen, floating down it, a number of masses of ice, of a rounded form, and varying in size from that of an orange to that of a moderately large melon; it consists of a mass of crystals adhering loosely together, and presenting an appearance somewhat similar to that of a sponge. Adhering to the under side of at least one of these masses will be found a stone from the bottom of the river: it is broken from time to time by the rising of similar masses from the bottom, where, if the water were as clear as in most of the streams of the north of England, he would see scores of them adhering to stones, until, as they increase in size, their buoyancy either overcomes their adhesion, or carries the stones with them to the surface.

These spongy masses of ice, floating down with the current, and coming in contact with each other, adhere together, and gradually form larger and larger masses, such as those which now float backward and forward under the bridges of the metropolis; and, if the frost should continue sufficiently long and sufficiently intense, they will eventually become too large to pass beneath the arches, and the river will become frozen over, as it was in the memorable frost of 1814. It is in this way, and from the same causes, that the Elbe, the Scheldt, and other large tidal rivers, are frozen over; though, so far as the writer knows, very little notice has been taken of the fact.

The cause of this seeming anomaly in the laws of congelation has not been very satisfactorily settled; though it may with great probability be referred to the fact discovered by Dalton, that water in a state of rest may be cooled considerably below the ordinary freezing temperature of 32 deg. without congealing, and then, if suddenly agitated, it forms a spongy mass of crystals like those which are now floating in the Thames.

THE "ROYAL ALBERT" BEFORE SEBASTOPOL.—The following letter is from Mr. William Griffith, of Port Madoc, Carnarvonshire, now on board the *Royal Albert*:—"H.M.S. *Royal Albert*, off Sebastopol, Jan. 30.—My dear Cousin,—Ever since we arrived here the weather has been anything but cheering, heavy falls of snow, with awful squalls from the N.E. occurring for the last three days, but this magnificent ship behaves like a yacht, although she had a twist of the rudder from very heavy pitching one night. That was fortunately very shortly put to rights. We are now moored, blockading the fortress to Sebastopol, about three miles distant—that is, within range of our pivot guns, of the same calibre as those we worked from the *Edinburgh's* quarter at Bomarsund. How soon we may have the pleasure of testing our metal here is kept profoundly secret. Something, however, oozed out lately that Admiral Lyons (changing colour he is, if like him uncommonly) had, after a late consultation with the generals, hinted when all was ready at * * * and his complement of screw-ships had arrived * * * he would * * * We are moored opposite their largest three-decker, the *Nicolas Apostles*. You would be amused at the calculation made by our lads as to what she is worth as a prize, for we are at a sad loss to have a tug with her. No doubt that will come sooner or later. Thank God I am happy to say I enjoy excellent health as usual; but, from what I hear and see through my glass occasionally of the country around, my dear kinsmen on shore must be suffering beyond precedent. I have nothing further in the shape of news, but thank you for the letter of Dec. 3, and the papers. My next letter will bring you, I suppose, the tidings of a sea leg or a gold chain.—Your affectionate cousin, WM. GRIFFITH, O.G., H.M.S. *Royal Albert*." [In our last Number we gave an illustration of that vessel.]

OFFICIAL APPOINTMENTS.—The Lord Chancellor has appointed Mr. J. J. Lonsdale, Secretary to the Criminal Law Commissioners, to the vacant County Court judgeship. Mr. J. Mellor, Q.C., of the Midland Circuit, will succeed the late Mr. Hildyard as Recorder of Leicester. The private secretaries of Lord Palmerston in Downing-street are—Mr. C. C. Clifford, who was with his Lordship at the Home-office, and Mr. W. Law, of the Treasury (late private secretary to Mr Wilson, M.P.), who was one of Lord John Russell's private secretaries when he was Prime Minister. Mr. George Russell, of the Treasury, succeeds Mr. Law as private secretary to Mr Wilson. Mr. D. Balhousie Ramsay (of the War-office) is appointed private secretary to Lord Panmure. Mr. Robert Elliot is private secretary to Sir George Grey, in the place of Lord Hobart, who resumes his old place at the Board of Trade, with Lord Stanley of Alderley.

THE MURDERER OF THE WOUNDED.—I am not sure whether I told you before that the Russian Major who was taken prisoner at Inkerman, and convicted of murdering our wounded men, died the other day at Scutari, apparently conscience-stricken. His own brother officers petitioned to be removed from his society, as they would not associate with him, and he pined away and died without any apparent disease.—*Letter from Constantinople.*

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

The report of the intended departure of the Emperor for the Crimea gains so much ground, and the denials of such a project become so faint, that there seems but very little doubt of the veracity of the statement, more especially as so many circumstances exist of a nature to confirm it. The *Reine Hortense*—the favourite vessel of the Emperor, and the one always employed in his maritime excursions—has been ordered to Toulon, M. Merle, Préfet du Palais, has gone to Marseilles, it is said, with instructions to take the lodgings necessary for the Imperial traveller and his suite; a large number of horses have been purchased; a Commission is named—and is, it appears, engaged in the exercise of its functions to arrange on what footing are to be established the military equipments of the Emperor; and it is further asserted that the Manifesto which is to announce the fact of the departure and the wishes and intentions of his Majesty is already written. Altogether, making due allowance for the exaggerations, the false reports and the *canards* that never fail to circulate round the plan of every measure of importance there seems really sufficient grounds to treat the statement as a serious one.

The system of pleasure-trips which has become so general through all the civilis ed parts of Europe is beginning to extend itself beyond these limits, and arrangements are being made to establish a communication of this sort with the Crimea, under a neutral flag; that of Tuscany, we believe, is the one selected. By the same undertaking, voyages are made to Egypt, Syria, and some of the Turkish provinces. The expense of the trip will be 12,000 francs for each person, for three months. It is said that a distinguished French writer is about to join this expedition, and has already made terms with his publisher for the production of a book relating the incidents of his voyage.

The Carnival is over, and people are commencing the austerities of Lent with due strictness. The dreadfully severe weather that for the last fortnight has never for a day relaxed has had little effect on either the out or in door gaieties of the season. The procession of the Bœuf Gras was particularly effective, especially on the Sunday, when the decorations were fresh, and the weather, though intensely cold, fine. On Tuesday a fall of snow and snow crystals a good deal diminished the ardour of actors and spectators.

The ball at the Hôtel de Ville on Saturday went off most brilliantly. On the same night Lady Cowley gave the last of her series of weekly receptions: it was remarkably well attended, and displayed some magnificent toilets—many of the principal English and foreign visitors and residents in Paris appearing there before going to the ball of the Préfet de la Seine

A magnificent dinner was given at the Palais Royal by the Prince Jérôme, at which were present all the members of the Imperial family, with a single exception. The Ministers, the Maréchaux, and nearly all the chief dignitaries of State, were invited either to the dinner or in the course of the evening. After the repast a long and most interesting conversation on the subject of the events of the day took place between the Prince Napoléon and the Minister of War.

On the following day the Princesse Mathilde gave a dinner of adieu to Vely Pacha, who ceases not to lament openly his departure from Paris. The dinner was splendid and extremely gay.

The enrolment and organisation of the Foreign Legion, which is to be composed principally of Swiss troops, is being carried on with vigour Upwards of 1200 young men of the Swiss Militia have already taken the preliminary steps to join this body: the Bernese Jura will, it seems, furnish a very large contingent.

A certain number of arrests have been made here in consequence of reports on the subject of secret societies, but little importance seems to be attached to the facts elicited.

The rumours respecting the revolt of the Zouaves have been ridiculously exaggerated. A certain number were sent back to France in consequence of jealousies displayed by them at the arrival of the Imperial Guard coming, as they considered, at the last moment to reap the laurels for which they had, through the whole campaign, so laboriously toiled: this is, we are assured, the extent of the affair, which has been cited with innumerable enlargements and additions.

On Sunday took place, by order of the Archbishop of Paris, a splendid fête in all the churches of the metropolis in honour of the proclamation of the Immaculate Conception. The Pontiff himself officiated at Notre Dame on the Saturday preceding; and the great bell, or *bourdon*, of the cathedral was rung in honour of the occasion. On the other hand, certain of the principal functionaries and heads of administrations in the departments have received Government *avertissemens* for having mixed themselves up too officially in the demonstrations that have been made on the subject of the proclamation of this dogma.

On Saturday are to appear the last two volumes of the Mémoires of M. Véron: they are looked for with much curiosity. But a work of great and singular interest, as relates to the events of the last half-century, is about to appear from the American press—its contents rendering its publication in France, or even in any of the adjacent nations, impossible. This is the Memoires of M. de Maubreuil, who played so strange a part at the fall of the Emperor Napoleon, and who publicly struck M. de Talleyrand for having disowned him. These volumes are, it is said, to contain an undisguised statement of all the events of the time—events in most of which the author took a part, and all of which he witnessed. M. de Maubreuil, who has long since changed his name, is, we are told, about to proceed to the United States for the purpose of bringing out there the work in question.

The piece of ALEX. DUMAS (*fils*), entitled "Le Demi-Monde" (originally written for the Gymnase, but demanded by the Minister of State for the Français), has, in consequence of another arrangement, returned to its original destination, and is shortly to be represented at the former theatre.

BREAD RIOTS AT WHITECHAPEL.—During the whole of Wednesday evening and Thursday morning the inhabitants of the east end of London were in a state of great excitement and alarm, in consequence of the riotous conduct of a number of unemployed Irish labourers, who not only perambulated the principal thoroughfares for several hours in large numbers, but caused the greatest consternation among the shopkeepers, into whose premises they forcibly entered, and daringly ransacked the contents. In many instances tradesmen were brutally ill-treated and thrown into the street, while their premises were cleared of their contents and carried away by the mob. On Thursday morning, at ten o'clock, orders were sent for an additional force of constables to the vicinity of the workhouse, and accordingly Inspectors Marsh and Smith were in attendance in the neighbourhood. At eleven o'clock there were no fewer than 1200 dock labourers at the doors of the workhouse, waiting for relief; and it required a great number of officers to prevent accidents among the starving applicants. Mr. Freeman and Mr. French, the overseers, were present during the morning rendering the necessary relief. Each man had a quartern loaf given to him, and was told to call again next day.

BREAD RIOTS IN LIVERPOOL.—The great distress among the poor in Liverpool has induced some public disturbances, but as yet nothing serious has occurred. On Monday several bakers' and provision-dealers' shops were entered by gangs of persons, and stripped of their contents; but only a very few of the really necessitous poor appeared to have been seduced into these acts of plunder and aggression. In the course of the day the police succeeded in apprehending about a dozen of the ringleaders in the various attempted shopsackings.

Notwithstanding the severity of the winter, the new works for strengthening the citadel of Warsaw are carried on with spirit, although the thermometer is at 30 deg. Réaumur below the freezing-point; and as of course everything is frozen, the mortar is made with boiling water, the inhabitants having to furnish a cauldron from each house every day.

THE WAR IN THE CRIMEA.

(From our Special Correspondent.)

BEFORE SEBASTOPOL, February 3rd, 1855.

NOTWITHSTANDING eight or nine successive days of a milder temperature and more open sky than our troops have felt and seen for some time past, the army is still labouring under its usual amount of fatigue and sickness. Experience having proved the danger of exposing newly-arrived troops to the inclemency of winter immediately on their arrival in the Crimea, the latest draughts which have come out have been sheltered at night on board the vessels in the harbour, whilst by day they have participated in the labours of road-making and biscuit-carrying. The heat of the sun, although sufficient to melt the greater part of the snow, is not powerful enough to dry up the deeply-trodden roads. Our men having to plod wearily through the mire, whether on fatigue parties or to labour at the trenches, continue to suffer severely. Those who have the good fortune of being kept on board ship do not suffer so much from cold, perhaps; but the impure air of Balaclava, the foul miasmata inhaled in making the roads through the village, are of themselves a cause of fever and disease; and it is difficult to pronounce which is most fatal—the cold and damp of life in camp, or the foul atmosphere which stagnates in Balaclava. It is said, nevertheless, by the medical officers that the few days of fine weather which we have enjoyed have reduced the average of mortality and disease amongst the troops; but to the eye the number of unfortunate beings carried down to the sick pier by the French hospital drivers is not in the least decreased, and the woeful aspect of the greater part tells the suffering which they have been forced to endure before their turn came for discharge to the general hospital. In the ghastly countenances and skeleton appearance of most of them one reads a world of suffering; whilst by the stiffened lineaments of a few, one perceives that the last breath has expired in the transit from the camp to the beach. The wretched survivors have of late found bounteous relief on their entrance to Balaclava in the newly-erected store raised by the care of the officers of the *Caradoc*. There Dr. Skead presides over the distribution of cups of tea and spirituous stimulants to the unfortunates who want them, and gives them strength to bear the transfer from the back of a mule to the boats, and from these to the transports in the harbour.

It may be easily conceived that the reduction of our force by disease and exposure has kept back and paralysed, to a very great extent, every species of labour. The guns have been slow in their transit to the trenches; their weight being too great, and the mud in which they had become imbedded too deep, to permit of their speedy carriage by our weakened force and enfeebled men. But if the want of hands has been severely felt here, how much more so has it not been visible in the transport of provisions and stores of every kind, and in the daily labour required in the harbour of Balaclava. Disease has had its sting in our camp. Our soldiers have perished in some regiments faster than in others; future inquiry may serve to ascertain the causes of this mortality and place the responsibility on the right shoulders; but is it not deplorable to think that the longer the evil is suffered to exist, the smaller becomes the chance of the survivors? In the harbour of Balaclava the greatest evils result from the want of necessary hands. The Commissariat, the Ordnance, almost all the departments suffer from the same want. Might they not have had the foresight to obtain labour from more military sources long since, when they became aware of the difficulties which were entailed on our engineers and generals by the daily decreasing force available for the purely military departments? Was it not already sufficiently distressing to see the trenches and *places d'armes* insufficiently manned and guarded, without adding to that distress by putting soldiers to the fatigue of providing their own food by marching to and fro fourteen or sixteen miles to get it? Was it to be expected that the army, which was insufficient for its own immediate duties on the ground which it occupied, would be capable of carrying up stoves and houses and erect them for themselves? Labourers were required, but no attempt was made to obtain them. A few wretched Tartars from Eupatoria were to be seen now and then moving through the streets, and carrying loads; but what was required men of vigorous frame, for purposes of carriage, carpenters, smiths, working men in fact—of these there were none at hand. The cold weather to which the commissariat cattle were exposed, was from the first moment of its outbreak fatal to animals impoverished by lack of food and over abundance of labour. The pack ponies from Varna, the mules from Barcelona, the camels of the Crimea, and the bullocks of Bulgaria and Roumelia, which might have lived had they been housed, all perished, and a fresh supply became necessary. Ships were sent out to all parts, and cattle of all kinds have been arriving lately from Spain and the coasts of the Black Sea, the Sea of Marmora, and the Archipelago. It was at the very latest moment only that it was thought necessary to house the most tender of the draught animals, namely, the mules from Alicant, Barcelona, and Malta; and the *Trent*, which brought them lay six days in harbour waiting for the necessary cover to be completed before she could land her living freight. But mismanagement in this department of our service went still further; and after the poor beasts were housed, they were taken out to work so early in the morning and returned so late at night, that they must inevitably perish shortly from positive want of properly distributed food and water. As for the wretched Turkish ponies, which are picketed in the open air, their fate cannot long be doubtful; and then the consequence will again be fatigue parties of soldiers for rations whose pluck for fighting must inevitably be taken out of them by the necessity to labour hard for daily sustenance.

The ships in harbour naturally feel also the disadvantages of want of labour. No sooner does a transport arrive than it receives orders to put out boats and load them with the freight consigned to them. The sailors belonging to the ships perform their portion of the task. The boats are laden and taken to the shore; but, once there, the chances are many against their being unladen within a week. The consequence is that the shore is encumbered with ships' boats laden with all kinds of goods—stoves, platforms, wooden planks, parcels, and perishable stuff of all kinds. Ultimately the ships to which the boats belong being ordered away by the transport agent, there is a sudden rush to empty them: the contents are cast out on the shore—in the mud, anywhere, and there they lie. The result generally in these cases is delay of a valuable ship in harbour for days longer than she ought to remain, and a certain damage to the goods or stores.

It is consoling in the midst of all this to notice that the wretched hospital marquee has disappeared entirely from Balaclava; and that the sick, whose cases are not considered sufficiently bad to require transport to Scutari, are warmly housed in some of the wooden huts which lie in such numbers along the beach.

With regard to the positions of the armies there is nothing up to this date to note. The French are ready in their trenches, with their guns in position, and waiting for us. Our engineers have nothing left to do but to put their guns in position; and if the frost, of which there is a good depth to-day, continues to hold, there is no doubt that a renewal of the bombardment may be instantly expected. There are doubts, however, as to whether we shall not be forestalled in our offensive projects by the Russians, whose forces are noticed by our spies to be on their advance in considerable force. Our force at Balaclava has been on the alert in consequence of this intelligence, and the fears which it has occasioned lest a surprise might be attempted.

A new variation in costume is now noticed in the motley crowds which gather upon the shores of Balaclava. The smock-frock and red woollen comforter of the British "navvy" are conspicuous amid the far-clad and

top-booted soldiers, the flat-faced small-eyed Tartar, and the dirty and ragged Greeks and Maltese, who ply their various small trades about the place. The navvies have commenced work in clearing a space for their rails and sleepers. They are ruddy with health, and astonish everybody by the labour which they are enabled to get through; but there is great discontent among them on account of the lack to them of an indispensable element of existence. The "navvies" want their beer. Beer, however, there is none, and each fresh complaint has been therefore met by an additional supply of rum. At this moment they receive no less than four rations of rum per day, and this, so far from satisfying the men, appears to have led to some very mutinous proceedings on board the ships. The Provost-marshal, Captain Johnson, has had to deal with some of the culprits, and probably the distribution of a few dozen will compensate for the effects of the rum; but it may be suggested, I think, with propriety, that the complaints of the navvies should not be met by any further supply of ardent spirits. Our soldiers only receive one ration of rum daily; the navvies, therefore, receive three times more than the soldiers, which ought to satisfy them.

The arrival of reinforcements, both French and English, continues. The drain on our camp from continued sickness does not make these new arrivals swell the numbers of our available force. As regards the French it would be a mistake to suppose that they do not suffer. Their sick are, in proportion to their force distressingly numerous. It is only because our army is so small that we feel the loss severely. I mention this because I find comparisons made between our forces and those of the French, which, if they were true, would tend to show that Englishmen are less fit for work, and of less vigorous constitutions, than the French. This is a mistake. Again, as regards Cavalry. It is perfectly correct that the French Chasseurs d'Afrique have kept their beasts in condition, whilst the chargers of our regiments have all perished. The horses of the Chasseurs d'Afrique are Arabs accustomed from the time they were foaled to the open air, and the vicissitudes of a hot and cold climate, like that of Northern Africa. They have rarely if ever enjoyed the luxury of a stable; but it is by no means the same case as regards the Hussar regiments and the Artillery of France. The horses of the latter are taken care of as are ours, and the result has been the same in the army of General Canrobert as in that of Lord Raglan. Almost all the cattle of those arms in both services have perished.

No great battle had taken place before Sebastopol up to the latest date, nor had any attempt been made to assault the formidable town. Our telegraphic accounts from Balaclava, which come down as far as February 12, repeat the stereotyped phrase that "the siege works are pushed forward with great activity;" and add further, that "the railway from Balaclava to the English Camp is far advanced;" which cannot be correct, as the construction of seven miles of railway, even in the most favourable weather, is not so very easy an affair.

By the steamer *Espérate*, which left Constantinople on the 12th inst., we learn that the approach of a Russian army of 35,000 men, from the Belbec towards Balaclava, took place on the 7th; that the Allied forces were under arms on the 8th and 9th, in apprehension of an attack; but that the Russians did not risk a conflict. They had, however, taken up a threatening position on the 9th, and were throwing up works on the heights near Kamara. The French had bombarded the town on the night of the 10th, but nothing is said as to what the result had been. The Russians still continued to make sorties every evening.

Omer Pacha, instead of going to Eupatoria from Varna, as was reported, had gone to Balaclava, where he arrived on the 9th, on which day a Council of War was held.

Letters from the Camp, of the 5th inst., state that an additional mortar battery was about to be erected on the Inkerman heights—a proceeding which the Russians did not seem to approve. A small steamer of theirs, called the *Spitfire*, and mounting five or six heavy guns, was, therefore, sent from under the shelter of the land every two or three minutes, which gave the working party the whole benefit of the well-directed broadside, and then returned close in shore the instant she had fired. As it is no part of the plan of the Allies to show the enemy the strength and position of their works, the steamer was enabled to do this with almost perfect impunity. In the Careening Creek, which is immediately under the intended battery, the enemy have also constructed two large rafts of solid timber, and mounted each with two 15-inch mortars. These are also rapidly hauled round into the centre of the creek by means of warps, and throw their shells with terrible accuracy upon the Inkerman heights. As yet they were said to have done little mischief beyond rendering the progress of the work slower, by compelling the men to throw themselves on their face the instant the shell falls near. Both the shot and shell practice of the enemy in this direction is described as beautiful, and as quite equalling the best of the kind at Woolwich.

All this time the Russians continue daily to strengthen their defences by all the arts known to modern warfare. Most of the batteries now bristle with stockades and abattis, and are all protected in front with wide and deep ditches. What their resources are inside their lines can only be guessed at, but if they at all resemble the exteriors in any manner the storming of the place will be no easy task.

The bombardment of the town was to begin as soon as all the guns were placed and the ammunition ready. It is said that the English have alone still to throw 420 tons of shot in twelve hours, and the French lines nearly 800 tons; so that any one may calculate the amount required for an incessant bombardment of fifty or sixty hours. The English have already about 1400 tons of shot and shell at Camp, and when about 600 tons more are added to that it was expected that they would commence firing.

The latest accounts represent the position of the English army as much improved. Huttang, warm clothing, and provisions were in abundance; and the arrival of a number of steamships, which will soon be followed by more, enabled the men to obtain supplies from Balaclava more easily.

Nothing of importance had taken place at Eupatoria. It was said that General Osten-Sacken, at the head of 40,000 men, was about to make an assault; but no fear was entertained for the result, should he venture to do so. The place was defended by nearly 30,000 men, and the field works are now sufficient for defence against almost any force which the Russians can bring against the town.

The French journals publish, with expressions of satisfaction, reports of the improving condition of the English army. The *Débats* gives insertion to a letter dated Balaclava, Feb. 2, in which the following passage occurs:

> Our allies are now in full restoration, as they phrase it. Provisions abound, the soldier has already forgotten that he was ever upon half rations, the winter clothing is distributed, and barracks are beginning to cover the quay of Balaclava. Many of the men are dressed in Hungarian fur coats, and wear immense waterproof boots. The improved state of the weather has greatly contributed to these ameliorations. The lately impassable gorge of Balaclava may now be traversed with little difficulty. The land transport service, moreover, is now executed with considerable rapidity, thanks to the reinforcement of 250 mules brought by the steamer *Trent*, magnificent animals from Alicante, under the control of 46 Spanish and Maltese muleteers. I met a file of them yesterday carrying up the materials of the wooden houses.

RUSSIAN PREPARATIONS.

In addition to the different spots on the Russian Baltic coasts that have been strengthened against an attack from the seaside, the two fortresses Narva and Jamburg have during the past year been very considerably fortified, for the purpose of protecting Peterhof and St. Petersburg from the consequences of a landing on the south coast or an inroad from the Prussian frontier. This has been the work of General Von Berg, to whom the Governorship of Revel was entrusted last year; and it is he who has been most conspicuous in organising the force called the Baltic Corps. Now that he has finished his task on the southern coast to the Emperor's perfect satisfaction, he has been removed to Finland, to perform the same on the north coast.

The following extract of a letter from Helsingfors, after stating that the six battalions of Finland Rifles are rapidly advancing in their organisation, and are expected to be ready by March, says: "All the men are crack shots; there is scarcely one that cannot hit the head of the popinjay with their small rifle-balls." The ardour for battle of these "Freischutzen," it is added, is admirable. True or not, there can be no doubt that these battalions are in process of organisation; that they will be armed with the most approved weapons that the Government can procure from Liège or elsewhere; and that their number will amount to about 4000 effectives. In case, therefore, of our fleets being sent to the Baltic, it will be doubly requisite to arm marines and picked sailors exclusively with the Minié muskets and rifles, and to proclaim the men constantly therewith.

The *Cologne Gazette*, in its correspondence from Constantinople, mentions the circulation at Pera and at Galata of Russian proclamations, in which an appeal is made to Sclavonic sentiments. It is Servia which Russia seems to have in view, and she appears to wish to cause the same part to be played by Servia as was lately done by Greece. These anonymous documents point out Austria as being the most dangerous enemy of the Sclavonians.

The *Hamburg Borsenhalle* and other journals confirm a recent telegraphic announcement of a forced loan and heavy requisitions just imposed by the Czar for the purposes of the war. The enactment of extraordinary measures fully confirms our recent accounts of the desperate condition of Russian finances, and must seriously aggravate the previously onerous burdens of the impoverished taxpayer.

The following manifesto, which has been issued by the Emperor, will show that he does not place very much reliance upon the Vienna negotiations:—

> We, by the grace of God, Nicholas I., Emperor and Autocrat of all the Russias, &c., make known—
>
> Our faithful and beloved subjects know how much we desire to obtain, without recourse to the force of arms, without a greater effusion of blood, the object which we have had constantly in view—that of defending the rights of our co-religionists, and in general of all the Christians in the East. That desire is also known to all those who have followed with attention and impartiality the march of events as well as the invariable tendency of our acts. We have been, and will still remain, strangers to any other misspring of action—to any other view in matter of faith or conscience. Even now, true to those principles which we have adopted, we have announced our consent to the opening of negotiations with the Western Powers, who, with the Ottoman Porte, have formed a hostile alliance against us. We think that we are entitled to the same sincerity on their part—to the same disinterestedness of intentions; and we do not lose the hope of obtaining the re-establishment of peace—so much desired, and so precious for the whole of Christianity. Nevertheless, in the presence of the forces which they array against us, and of the other preparations which they are making to contend with us—preparations which, despite the measures taken for the opening of the negotiations, are not discontinued; but, on the contrary, daily assume larger dimensions—we are constrained, on our side, to think of measures to increase the means which God has given us to defend our country—to oppose a firm and powerful barrier to all attempts hostile to Russia—to all projects that menace its safety and its greatness.
>
> This, the first of our duties, we accomplish; and invoking the support of the Most High, with entire faith in His grace, with full confidence in the love of our subjects (animated like ourselves with the same sentiment of devotion for our faith, for the orthodox Church, and for our beloved country), we address this new appeal to all classes of our subjects, ordaining—
>
> The formation of a General Militia of the Empire.
>
> The measures relative to the formation and organisation of this militia have been examined and confirmed by us, and are embodied in detail in special regulations; they will be everywhere carried out with punctuality and zeal.
>
> More than once Russia has been menaced, and has undergone sad and cruel trials; but she always found her salvation in her humble faith in Providence, and in the close and indissoluble bonds which unite the Monarch with his subjects, his devoted children. Let it be so again to-day. May the Almighty, who reads every heart, who blesses pure intentions, grant us His assistance!
>
> Given at St. Petersburg, the 26th of January, of the year of Grace 1855, and in the 30th year of our reign. (Signed) NICHOLAS.

AUSTRIAN MILITARY PREPARATIONS.

According to an order which received the sanction of the Emperor on the 14th inst., the Austrian army corps are to be in their new position by the 15th of March. The dislocations consequent on the order are to commence on the 1st of March, by which day the baggage-waggons are to be in readiness with each division of the troops. The artillery is being increased and improved continually. Every week the iron foundries at Axar deliver a large number of cannon, which are mounted on their carriages in the ordnance department at Vienna, where by imperial command a new and formidable park of artillery is to be collected. The works at Vienna are superintended by the Archduke William, who has bestowed great attention on artillery. All the gun factories are fully employed in the manufacture of the new rifles, with which all the regiments of infantry are to be supplied by March 1. A large convoy of munition was sent off from Vienna to Cracow on the 10th inst., and another was to follow on the 19th, by the Northern Railway. Large quantities of munition are also sent to the Principalities and a convoy left Vienna on the 15th for Bucharest.

DECLARATION OF BELGIAN NEUTRALITY.

In the Belgian Chamber of Representatives, on the 15th inst., M. Orts desired to be informed what course the Belgian Cabinet would pursue if invited to join the Western Alliance against Russia. M. Henri de Brouckere, Minister of Foreign Affairs, replied that no invitation had been made to Belgium by the Western Powers to join their alliance. The articles of the treaties of 1831 and of 1839, which constituted the kingdom of Belgium, imposes on that Power a perpetual and obligatory neutrality. That condition is the very essence of its independence and nationality. The Five great Powers, in imposing on Belgium that obligation, engaged in return to protect her from all attack, at the same time that the treaties in question permitted her to defend herself. From these considerations it was evident that there could be any idea of Belgium intervening in the armed contests of Europe, as on the day on which she would so act, she would cease to be an independent State, and would behold her existence come to a close.

REVOLUTION IN PERU.

The mail just delivered by the West India steamer brings intelligence from Panama of the final overthrow of the Government party in Peru, and the consequent success of Castilla. Particulars are given of the last battle between the two armies, and the entrance of the conqueror into Lima. During the action two entire battalions of the Government forces went over to the Revolutionists, and very shortly after Echenique's army was routed completely, and fled precipitately from the field. Several of the superior officers on both sides were killed or wounded. Upon the entry of the successful party into Callao, it was expected that the castle would make an obstinate resistance, as extensive preparations had been made for defence; but a few moments sufficed to settle all preliminaries, as the castle surrendered without firing a shot, and the utmost quietness and good order immediately prevailed, and universal expressions of admiration of the happy consummation were heard on every side. These events have renewed public confidence greatly, and it is expected that much good will grow out of them.

OUR GENERALS DURING LAST WAR.—Lord Raglan stated before the military committee which sat last year that, with the exception of Lord Lynedoch and Sir Thomas Picton, we had no general officer in command in the late war above 40 years of age. The Duke of Wellington was a Major-General at 28, the Marquis of Anglesey at 34, Lord Dalhousie at 38, Lord Strafford at 36, Lord Hill at 33, Lord Beresford at 39. Sir George Murray at 40, Lord Combermere at 31, Lord Londonderry at 32.

WILLS AND PERSONALTY.—John Garden, Esq., of Redisham-hall, Suffolk, left personalty estimated at £140,000. Henry Miller, Esq., formerly merchant, Fenchurch-street, and of Newsingion-place, Surrey, £120,000. Vicesimus Knox, Esq., Stratford-place, and Writtle Lodge, Chelmsford, £60,000. J. A. Berry, Esq., Record and Writ Office, £50,000. Lieut.-General Thomas Dalmer, £10,000. Frederick Wilmot Horton, Esq., Commander R.N., died intestate, £7000.

CHARITABLE BEQUESTS. William Thorowgood, Esq., who died worth £35,000, among other bequests, has left £1000 to the Infant Orphan Asylum, Wanstead. Mr. Alexander Brand, of Nassau-street, has left £500 to the Benevolent Institution for the Relief of Aged and Infirm Journeymen Tailors. Mrs. Mary Russell Mitford, of Swallowfield, Berks (the poetess), has left the residue of her personalty (sworn under £3000) to her faithful and attached female servant.

A GOOD EXAMPLE TO OUR MEN.—The French and Ottoman soldiers, both of whom are remarkably clean in their personal attire, do not appear to wear woollen under-clothing, but cotton. They may be seen along the side of every stream, especially the Zouaves, at all hours, scrubbing and rubbing away, with their arms up to the elbows in suds. They take down their washing utensils, light a fire on the spot, boil water, and set to work in an artistic manner, and really do not only clean, but bleach, the articles on which they devote their soap and exertion. It was at one time proposed to set apart one or two houses in Balaclava for the purpose of washing and drying such things as could not be properly done by the soldiers in camp, and that the soldiers' wives, many of whom have been brought of late from Varna and elsewhere to the Crimea, should be employed in this useful occupation. But the suggestion has never been carried into effect.

NAVAL AND MILITARY INTELLIGENCE.

DESPATCHES FROM LORD RAGLAN.

(From the *London Gazette* of Tuesday night.)

Before Sebastopol, Feb. 6, 1855.

My Lord Duke,—I mentioned to your Grace on Saturday that the weather had broken. The frost was very severe on that night, and the thermometer down at 19°, and the wind was very high and piercingly cold.

Sunday was rather milder, and yesterday was fine. To-day the glass has fallen, and there is every appearance of rain.

I am happy to state that the medical officers consider that the general condition of the men has improved, although apparently there is no diminution in the number of the sick.

The enemy has made no movement of importance, but great convoys of waggons have been observed to go into Sebastopol, laden either with ammunition or provisions.

I enclose the casualties to the 4th inst.

Lieutenant-Colonel Collingwood Dickson, of the Royal Artillery, an excellent officer, whom I have before had occasion to bring to your notice, was slightly wounded on the 4th instant, when making a reconnaissance in company with some French officers.

I have, &c., RAGLAN.

NOMINAL RETURN OF OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES KILLED AND WOUNDED, FROM JANUARY 28 TO FEB. 4TH, INCLUSIVE.

KILLED.

30th Foot: Lance-Corporal Chas. Douglas. 34th: Private Thomas Greenfield.

WOUNDED.

Royal Artillery: Capt. and Lieut.-Col. (..., slightly. 62d: Private Owen Morrison, slightly.
Do.: Lieut. Royale: Private Bryan Silk, and Peter M'Sweeny, severely. 67th: Private John Mallaby, slightly. 2nd Battalion Rifle Brigade: Sergeant Hoo..., Voke, severely.
7th Foot: Private Thomas Kelly, severely.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

(From the *London Gazette* of Friday night.)

Before Sebastopol, Feb. 10, 1855.

My Lord Duke,—I have nothing material or important to report to your Grace since I addressed you on the 6th.

There was rain yesterday and the day before, and in the course of last night there was a considerable fall of snow, which remains on the ground; but it does not freeze, and the country is again saturated with wet.

It is reported from the front that great activity prevails in the town and harbour of Sebastopol.

Large convoys of apparently sick men were observed to be moving out of the place, and numerous carts, with one horse, to be coming in.

On the enemy appear to be breaking up sulks in the Arsenal Creek, and to be using the material for platforms and *embrasures* for the battery "Du Mat."

We are proceeding with the armament of the works on the right.

The health of the troops continues to improve in some slight degree. They are amply supplied with warm clothing and with provisions.

Forage is our only want, and this arises chiefly from the Commissary-General not receiving from England the supplies of hay upon which he has reckoned.

I inclose the return of casualties to the 5th instant.

I have, &c., RAGLAN.

NOMINAL RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES WOUNDED FROM 5TH TO 8TH FEBRUARY, 1855, INCLUSIVE.

18th Foot: Private William Brown, slightly. 33rd: Private W. Jas. Swift, slightly.
19th.: Private John Kearney, severely. 90th: Private Thomas Young, slightly.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

IT is not intended to send any more regiments from the Mediterranean to the Crimea. It is usual to have five battalions at Gibraltar, five at Malta, and five at the Ionian Islands. There are now but four (the 17th, 54th, 66th, and 92nd) at Gibraltar; two (the 72nd and 91st) at Malta; and three (31st, 46th, and 82nd) at Corfu. These regiments are not numerically strong, and they will be aided in their garrison duties by several regiments of militia.

THE North Lincolnshire Militia are under orders for Aldershott-heath, Hampshire, where a permanent camp of 10,000 men is to be formed. The greater part of the South Lincolnshire Militia have volunteered for foreign service, and are expecting orders for the Mediterranean. It is said they will go to Corfu.

HER MAJESTY having accepted the services of the Militia for duty in the Colonies, the following regiments have received orders to hold themselves in readiness for immediate embarkation, viz.:—The Royal Wilts, Lieutenant-Colonel Lord Methuen, twenty-four officers and 600 men; and the Royal Lancashire, Lieutenant-Colonel Clayton, seventeen officers and 620 men. Both these regiments form part of the garrison of Portsmouth; they are destined for the Ionian Islands—in all probability, Corfu. The former will, it is expected, dine in her Majesty's ship *Neptune*, if not both regiments, as soon as she is ready for them.

THE East Kent Militia, which has been doing garrison duty at Woolwich since the 4th of August last, on Friday and Saturday last opened volunteering for service in the Mediterranean. On those two days 627 men took the oath, and each man received £2. It is anticipated that more than the number will come forward, and make the required amount, 689.

THE four old contractors in Birmingham for military small-arms supplied 10,000 Minié rifles to the Board of Ordnance from December 1 to the 17th of the present month. These numbers are independent of the supplies rendered by the new contractors during the same period.

A TRIAL of a newly-invented self breech-loading and priming cannon has been made at the School of Musketry at Hythe. Sixty shots can be fired from this weapon in seven minutes: out of that number, at a range of 100 yards, 47 struck the bull's eye. Total immersion in water of the carbine, loaded, did not affect its explosive power, the fuse being readily discharged. The rapidity of the firing did not produce the slightest derangement, the piece neither requiring oiling nor cleaning.

IT is rumoured that the command of the large encampment preparing at Aldershott will be entrusted to Sir De Lacy Evans.

THE Reserve Dépôts at Malta are to consist of five battalions, and to be commanded by a Colonel. Two officers have already been selected for this duty.

THE medical department is to be removed from St. James's-place to the house now occupied by the Board of Clothing, at Whitehall.

ON Monday Major-General Sir Frederick Smith traced out the lines of huts at Aldershott for the encampment of 20,000 men, which are expected to be up and serviceable in the course of the ensuing month.—[We shall engrave a View of the Site, with a Plan.]

THE Victoria Rifle Corps will muster for drill every Thursday evening during the next two months at Allen's Riding-school, Seymour-place, Bryanston-square.

IT being in contemplation to station the Royal Sussex Artillery Militia at Eastbourne, preparation has been made in a portion of the martello towers for the reception of the Royal Artillery, who will vacate the Circular Redoubt, to render available the requisite accommodation for the militia. The remainder of the martello towers are understood to be in course of repair, and will soon be ready to receive the number of men necessary to render them effective. As yet the actual means of defence are limited to but few guns; probably as the spring advances each tower will be provided with its full complement. Various other batteries are to be proceeded with as the spring becomes more advanced.

THE INSURGENTS AT NANKING.

THE accompanying View represents the town of Nanking as it appeared in the month of July last, at which time H.M.S. *Rattler* lay for some days close to it. The approaches of the town, as will be perceived, are defended by strong forts, the whole river front being lined with masked batteries, well manned, while a large number of stakes and bamboo points are driven into the ground, so as to prevent any body of men from advancing in line. The masked batteries on both sides of the creek leading to the city gate, called Tung, are shown in the Sketch, together with the look-out towers, which command a view of the surrounding country.

A Correspondent who has recently returned from China describes the appearance of the insurgents as exceedingly grotesque, on account of their following the bent to grow, contrary to the prevailing custom in the Celestial Empire. The most faithful sketches of many of the Chinese soldiers would be taken for gross caricatures in this country. The great chiefs wear a red pasteboard helmet, surmounted by the figure of a lion, and terminating with a tassel. The head-dress of the minor leaders is a yellow cap, which droops behind in rather a picturesque manner. Their arms consist of halberds, short swords, and matchlocks, and are all so wretchedly bad that the returns of killed and wounded amount to a very small figure, notwithstanding all their engagements.

The strange and interesting correspondence which took place last year between the English, the leader of the insurgents, the Eastern King, and the *soi-disant* Holy Ghost, was sent home by her Majesty's Plenipotentiary, but has not yet been made public. Whatever may have been the feeling of the insurgents generally, the leaders did not show the slightest disposition to court the advances of Europeans. The Eastern King is said to have all the hauteur and offensive manner of a Canton Chinese. The general belief that his success would lead to a more cor-

NANKING INSURGENT SOLDIER.

dial commercial intercourse does not, therefore, seem to be well founded. All accounts, however, agree in representing the insurgent King as a very able man Though called an impostor, as all such adventurers are till they have made their position good, he is certainly a very clever one, as is plainly evinced by the wonderful manner in which he contrives to rule his followers

The latest news relating to the Rebels is that the Imperialists, led on by Manchoo officers, had defeated them in Kiang si, Hunan, and Hu-pak, in many encounters, and retaken several important cities on the Yang-tse kiang There is now so large a naval force, British and American, near Canton, that the city is safe from attack, but it is said that trade is at a stand, without a prospect of being resumed until its avenues are cleared of the banditti who infest them. A conclave, consisting of Sir John Bowring, Sir James Stirling, Captain Abbot, Dr Parker, and Mr Consul Robertson was held recently at the Admiral's residence Fighting by the Triad bands against the associated villagers on shore, and against the war junks on the river, still continued, to the utter destruction of commerce.

The appearance of Admiral Stirling's squadron in the river of Canton had caused the rebel chiefs to entertain fears lest they might find our arms turned against them, and has had the effect of temporarily checking their advance Sir James Stirling is very busy surveying the rear of the factories; it being his intention to mark off a certain part of the western suburbs, which shall be considered neutral ground.

THE SUBURBS OF NANKING, AND THE CITY WALL, WITH THE STOCKADES CONSTRUCTED BY THE INSURGENTS.

ARRIVAL OF THE BIRMESE ENVOY AT CALCUTTA, WITH THE LETTER OF THE KING OF AVA.

EMBASSY FROM AVA TO THE GOVERNOR-GENERAL OF INDIA.

According to letters lately received from Calcutta, the topic of the day was the Embassy from Ava:—"The present King of Ava, previous to the revolution which seated him on the throne, bore the title of Prince of Mengdoon. Mengdoon is the name of a little district on the extreme northern frontier of Pegu. At the annexation it was included in the British boundary, and the King feels as William of Nassau felt when Orange was dismantled. His personal vanity is wounded, and he has condescended at last to treat with the Power which has defeated him. He has sent an Envoy to Rangoon, with instructions to proceed to Calcutta, and there obtain from the Governor-General the restitution of Mengdoon. The price offered, it is said, is a treaty recognising the conquest of Pegu, and perhaps some advantages in the way of trade. This is the popular belief, but information direct from the province ascribes to the King a second and somewhat nobler object. He is anxious for the restitution of Bassein, the south-west division of Pegu—a district as large as Suffolk, and comprising the best river and harbour in the province. A glance at a recent map will show that the annexation has completely shut out Birmah Proper from the sea. The deprivation is severely felt by the people, whose pride it wounds, and by the Monarch, whose profits as sole trader in his own dominions are materially diminished. The last request, of course, will never be conceded. It is not merely that in Asia concession is equivalent to weakness—the gift would derange the administration of the province. No duties could be collected while a foreign Power placed its own imposts on the best harbour in the kingdom; and no crime could be repressed while the criminal remained within an hour's journey of immunity."

At the time the above was written the Ambassador was anxiously expected at Calcutta; and, by aid of an obliging Correspondent in that city, we are enabled to illustrate the Envoy's reception. He is an official who was known in the war as the Dalla Woon, or ruler of Dalla—a place which is to Rangoon what Southwark is to London. In that position he showed himself friendly to the British, and more attentive to his word than the majority of his countrymen.

Our own Correspondent states:—"The interview took place in the Marble hall of Government House at Calcutta, on the 13th December, before a crowded assembly of spectators who had been invited to attend. The Envoys were seated on the right of the Governor-General, with Major Phayre, who acted as interpreter during the interview. They were dressed in long dark red velvet chogahs, edged with yellow satin; and curious conical-shaped hats, ornamented with gold. The first introduction being over, a letter from the King of Ava was presented to the Governor-General. It was cased in red velvet, and carried in a gold cup. Presents from the King of Ava were then brought in and placed in front of the Governor-General. They consisted of silks of many patterns, gold cups, rubies of considerable value, ornamental swords, carved ivory and papier-mâché boxes, elephants' tusks, &c. The Governor-General, having presented each of the Envoys with a diamond ring and other articles of value, retired. I send you a Sketch showing the etiquette displayed in conveying the King's letter from place to place. It is under the exclusive charge of one of the Envoys, who, apparently, never lets it out of his hands. He considers it necessary to have a carriage entirely to himself, and can only be moved under the shade of eight umbrellas—the Birmese emblem of Royalty."

CYCLONE AT BOMBAY.

On the 1st ult. Bombay was visited by a cyclone, or hurricane, which commenced about midnight by a gale from the S.E. by E.; the force of the wind on the square foot, as ascertained at the Observatory, being 10lb. At one it had veered round to the S.E., and the pressure had increased to 15lb.; at two it was S.E., and the pressure 21lb., at three it was S.E. by E., and the pressure [illegible] at six to 21lb., and the wind had got round to W.N.W. [illegible] the pressure had fallen to 11lb. on the foot. It is difficult to realise, until having experienced it, the effect of a wind [illegible] of 35lb. on the foot, but it is apparent that nothing living could stand up on open ground against it. A man weighing 13 stone, or 182 lb., presents a surface of about eight square feet, the pressure on which with a wind force of 35lb. to the foot will be 280lb. more than a third greater than his weight; so over he must go.

The night will never be forgotten by those who experienced such a visitation for the first time. The vortex of the cyclone did not pass over the Observatory, and the force of the wind there must have been considerably exceeded on the range of hills forming the Western coast of the island, and covered with the country houses of the richer inhabitants. Next morning the gardens appeared as if a heavy roller had passed over them from the south-west; and the various directions in which the tall Palmyra palms had fallen afforded a palpable indication of the revolving character of the storm.

The following is from the *Telegraph and Courier*:

At five o'clock in the morning the scene at the Apollo Bunder was frightful. Underneath the saluting battery the *débris* of the wrecks was heaped. Pieces of bunder-boats, ropes, spars, and all the *matériel* of the harbour boats were strewed all over the bay. Hundreds and hundreds of cotton bales were floating about, uncared for and unlooked after. The view from the Custom-House Bunder was most terrific. The steamer *Phlox*, sunk beneath the Castle walls, had only her paddle-boxes visible above water; while the peerless of the steamers *Sir Jamsetjee Jeejeebhoy*, *Sir George Russel Clark*, and *Snake* (Government steamer), were only known by their funnels appearing above water. The new Government steamer *Assaye* parted her moorings during the night, and struck the hard ground near the dockyard, and has been much injured. The *Hastings* went on shore early in the morning. The *Margaret* cutter is smashed all to pieces. The *Menalcus* small cutter has also become a total wreck, and four pilot-boats have been entirely lost. The Governor's barge and that of Sir Henry Leeke have totally disappeared. Five large merchantmen are on shore—some masts gone; and about 100 bungalows are lost. The *Nerbuddah* cutter has become a total wreck, and the brig *Palinurus* is much disabled. The fort on the morning of the storm presented a curious appearance. The streets were literally strewed with tiles. Trees which one would have thought could have withstood the tempests of ages were either uprooted or broken in twain like twigs. The crosses of the west side of the Cathedral were blown off, and the police-office was so dismantled that the Court of Petty Sessions had to be held in the magistrate's private room. The theatres and the Supreme Court-house have been more or less injured, and the flag-staff has been entirely blown down.

THE LATE CYCLONE, AT THE APOLLO BUNDER, BOMBAY.

THE CADELL TESTIMONIAL.

This superb gift is a well-merited tribute to the exploratory enterprise in Australia. It consists of a solid centre ornament, executed in gold, with silver figures of the emu, kangaroo, and sheep, surrounding the base; the upper portion of the design consisting of an oak-tree, its branches being fitted for glass dishes or wax lights. The base bears the following Inscription:—

Presented by some of the Settlers of New South Wales, Victoria, and South Australia, to Francis Cadell, Esq., in commemoration of his having first opened the Steam Navigation and Commerce of the River Murray. 1853.

This characteristic piece of plate has been ably executed by Messrs. Smith, Nicholson, and Co., of Duke-street, Lincoln's-Inn-fields.

GOLD CANDELABRUM PRESENTED TO MR. FRANCIS CADELL, THE AUSTRALIAN EXPLORER.

CALENDAR FOR THE WEEK.

SUNDAY, Feb. 25.—1st Sunday in Lent. Sir Christopher Wren died, 1723.
MONDAY, 26.—Napoleon I. embarked from Elba, 1815.
TUESDAY, 27.—Dr. Arbuthnot died, 1735
WEDNESDAY, 28.—Ember Week. Montaigne born, 1533.
THURSDAY, March 1.—St. David.

Just received from our Artists, Messrs. GODALL and GUYS.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, FEBRUARY 24, 1855.

A SINGULAR fate has attended Mr. Roebuck's Committee of Inquiry into the State of the Army before Sebastopol. It drove Lord John Russell from the Cabinet, broke up the Aberdeen Ministry, placed Lord Palmerston in power, and launched Lord John into the new career of diplomacy, where he is very likely to distinguish himself, and be of essential service to his country. But the doings of Mr. Roebuck's Committee, or rather of the mere proposal to institute it, have not ended with these achievements, considerable as they are. We now learn that it has "dislocated" the Palmerston Administration, and deprived it of the services of three of its most prominent, if not its most able, members. Lord Palmerston, with a tact and good sense which are characteristic of his whole public career, was too wise to resist the appointment of a Committee on which it is evident that the country, no less than the House of Commons, had set its mind. He interfered with Mr. Roebuck's independence no further than to stipulate, as the price of his acquiescence, that the Committee should include the names only of such gentlemen as would inspire the public with confidence that the inquiry would be ably as well as honestly and impartially conducted. In other words, he objected to the persons originally designated by Mr. Roebuck, and suggested another list;—to which Mr. Roebuck acceded. But Sir James Graham, Mr. Sidney Herbert, and Mr. Gladstone, disapproved of the appointment of the Committee in any form or shape whatever; a political mistake on their parts, from the effects of which it will take them long to recover. Hereupon issue was joined; and, Lord Palmerston remaining firm to his purpose of consenting to the inquiry, these three gentlemen have ceased to form a part of the Ministry. We shall not seek to depreciate the talents or the services of public men of such high standing and character, or join in the silly outcry against two of them as "Peelites." We acknowledge, and have often acknowledged, the ability and industry of each and of all of them; but we cannot bring ourselves to look upon their secession from the Cabinet as a calamity, or as a circumstance in any way to be deplored. Sir James Graham is thoroughly a man of business. He was an acquisition to the Government, and inspired confidence in all who had transactions with him in his official capacity. But his loss can be easily supplied, and public opinion can designate half-a-dozen or a dozen members of the Lower House who can undertake and perform the duties of Naval Minister at the present time. Mr. Gladstone's secession will not excite much regret. He was respected more than liked; and the people had a suspicion, which may or may not have been well founded, that the war would lag as long as he remained Chancellor of the Exchequer; not from any want of zeal on his part, but from his "crotchet," that in war as well as in peace it is the duty of a great nation to avoid loans, and to pay its expenses from year to year, as they are incurred. Mr. Gladstone was suspected of holding such doctrine, and of endeavouring to act upon it—even at the present moment, when it is necessary for the nation to put forth its whole energies, and to spend within the year twenty, fifty, or even a hundred or two hundred millions of money, to ensure the humiliation and defeat of the enemy. The next Chancellor of the Exchequer will have only to avoid committing himself to a similar heresy to enlist on his behalf the good will of the people; and if Lord Palmerston will select a new man for the office, and avoid encumbering himself in that capacity with Sir Charles Wood or others who have failed in it, there is little fear that his Administration will suffer either in credit or in strength from the loss of Mr. Gladstone. The secession of Mr. Sidney Herbert is still less important. He gave no strength to the Ministry of Lord Aberdeen; and his acceptance of office under Lord Palmerston was the most unfavourable circumstance connected with the new Ministry. In losing the services of Mr. Herbert, Lord Palmerston loses a colleague whose reputation was damaged. We are not of opinion that Mr. Herbert and the Duke of Newcastle deserved all, or any part of, the odium thrown upon them for the mismanagement of the war; but they filled the post of responsibility, and were unsuccessful. For this reason they must be content—even though morally innocent—to bear the blame that always attaches itself to failure. If they have been wronged, they will find an opportunity to right themselves; and Time, the great redresser of injuries and healer of animosities, will do them all the justice they deserve. If in the interval their own consciences absolve them, they can bear the brunt of temporary unpopularity, and be none the worse for it.

At the time at which we go to press we have heard, on no certain authority, the names of the gentlemen selected by the Premier to fill up the three vacancies thus unexpectedly created, but shall publish in later editions such statements as may appear worthy of credence, or as may be officially announced. Upon the whole we see nothing to regret, but much to rejoice at, in the secession. The Parliament, like the country, is thoroughly in earnest. Both demand inquiry as to past mismanagement and present inefficiency; and both are willing to vote all the means, both in men and in money, that are necessary to carry on the war with spirit and success. Lord Palmerston, if equally in earnest—as there can be no reason to doubt—will find strength on every side of him, only awaiting his summons to enter the public service.

THE aspect of affairs is ominous of impending calamity on the cause of the Czar. Notwithstanding all the ravages which disease and mismanagement have made in the gallant army of Great Britain, there remain 10,000 or 12,000 men fit for any enterprise; while the French and the Turks have each a force sufficient to defy the hosts of Menschikoff and Liprandi. From the daily reports that reach us from the Crimea, and from the improvement in the condition of the weather, as well as in the state of the Allied armies, no less than from the movement perceptible in the armies of the Czar, it is evident that a great battle is impending, and that important news may be hourly expected. Whether that battle be fought before Eupatoria against the Turks, or before Sebastopol against the British and French, or whether the assault, so ardently desired by the soldiers of the Allied armies, shall be undertaken, we entertain no doubt that the result will be glorious to our arms, and advantageous to our cause. The Emperor of the French, who in one of those bursts of enthusiasm which on rare and great occasions illuminate the dark and silent but not cold atmosphere of his inner life, had determined to proceed in person to the Crimea, and lead his troops to victory, has foregone his intention; possibly on account of the consternation which the idea excited in France, but more probably because, on cool reflection, he deemed it not unlikely that the great battle might have been fought before his arrival, and that he might lose dignity, as well as incur risk at home, by being, in common parlance, "a day after the fair." Whatever be the cause of the Emperor's change of mind, it is a matter of rejoicing to his best friends that he has not obeyed the impulse that beset him. If his Majesty must place himself at the head of an army—if he must lead his brave soldiers to victory and plant the eagles of France on the towers and towns of an enemy—there is a chance before him which may yield him greater honour and glory than even a campaign, or part of a campaign, in the Crimea. Prussia has not yet joined the Western Alliance. The King still hesitates, and at the last moment he may decide to cast in his fortunes with those of the CZAR. In that case the Emperor Napoleon might well leave the Crimea to the armies and the generals already in possession of it, and take his place as Generalissimo of the French Army of the Rhine. The post would be one of danger and of glory; but with the humiliation of both Prussia and Russia, and the re-establishment of the kingdom of Poland in the perspective, it would be one in which his presence and example, and the enthusiasm excited by his name, would be of more benefit to the common cause than anything which he could accomplish in the Crimea.

In the meantime, the mission of Lord John Russell to Paris, Berlin, and Vienna has filled the friends of Russia with perplexity and discouragement. The Austrian alliance, in case of the refusal of Russia to yield to certain conditions—acceptance of which would amount to a moral as well as physical defect—will become an alliance, not of documents and protocols, but of swords and guns, and half a million of hands ready, and eager to wield them. The Austrian people as well as the Court go heartily with the Western Powers; and Frenchmen are as popular in Vienna, as Englishmen are in Paris. The old jealousy between France and Austria has never existed during the reign of the Emperor Francis-Joseph; and the jealousy which the events of Hungary and Lombardy, in 1848 and 1849, created in the Austrian mind against Englishmen, and especially against Lord Palmerston has been happily removed, and the ancient friendship thoroughly restored. And this good understanding, while it will yield us excellent armies in support of the anti-Russian cause, may perhaps operate to bring the Czar to reason without the necessity of prolonging the contest. The King of Prussia already begins to waver; and if he, backed as such a policy would be by the whole Prussian people, should finally resolve to unite with the Allies, and leave the Czar to his fate, it is scarcely possible to believe that Nicholas would resolve to fight single-handed against all Europe. His last proclamation to his people betrays his sense of impending danger. It is warlike in tone, but conciliatory in spirit; and takes care to impress upon the world that his military preparations are defensive, and not offensive, and have been forced upon him by the hostile attitude assumed towards "Holy Russia" by all Europe. So be it. The Vienna Conference is a reality this time, and not a sham; and the Czar knows it.

THE MINISTERIAL CRISIS. Nothing has yet been positively decided as to the Ministerial arrangements rendered necessary by the secession of Sir James Graham. Mr. Gladstone, Mr. Sidney Herbert, and Mr. Cardwell—whose resignation has to be added to those of his political friends.

THE VIENNA MISSION Lord John Russell left his residence in Chesham-place on Thursday morning, after seven o'clock, for the purpose of proceeding on his diplomatic mission to Vienna. His Lordship was accompanied by Lady John Russell and his two daughters. At eight o'clock his Lordship arrived at the South-Eastern Railway station, where he was received by Mr. Wetherett, the station-master, and conducted to the express-train, in which, accompanied by one of his daughters, he proceeded, at ten minutes past eight, direct to Dover. Lady John Russell and his Lordship's other daughter returned immediately afterwards to Chesham-place. His Lordship first visits Paris, where he will have an interview with the Emperor of the French, after which it is understood that he will go direct to Berlin, so that his arrival at Vienna must necessarily be delayed for a few days.

THE COMMITTEE ON THE ARMY.—The following, we have reason to believe, is the list of the Committee as finally agreed upon for nomination on Mr. Roebuck's motion:—Mr. Roebuck, Mr. Drummond, Sir John Pakington, Mr. Layard, Colonel Lindsay, Mr. Elliot (secr.), Lord Seymour, Sir George Cornewall Lewis, General Peel, Mr. John Ball, Mr. Bramston

MEETING OF CONSERVATIVE MEMBERS OF PARLIAMENT. A very numerous meeting, comprising a large body of peers, and nearly 200 members of the House of Commons, was held at Lord Eglinton's house, in St. James's-square, on Tuesday. Lord Derby addressed the meeting at length. He alluded to the line of conduct pursued by him during the late political crisis, and stated his views and opinions generally upon the position and prospects of the Conservative party. His Lordship's speech was received most enthusiastically; and a vote expressing the entire and continued confidence of the Conservative party in their leader was moved by the Earl of Strathmore, seconded by Mr. R. Palmer, M.P. for Berkshire, and carried unanimously.

MEETING IN FAVOUR OF MR. ROEBUCK'S MOTION. A large meeting of the inhabitants of Marylebone was held at the Literary Institution, Edward-street, Portman-square, on Wednesday evening, for the purpose of "protesting against Mr. Roebuck's Committee being burked." The meeting was addressed by Mr. Mowatt, M.P., Mr. Lewis, Mr. Nicholay, Mr. Bell (late candidate for the borough), and other gentlemen, all of whom spoke strongly in condemnation of the way in which the war has been mismanaged, and urged the necessity of inquiry. To talk of a Government Commission was to stifle inquiry. Resolutions were passed in favour of the appointment of "a fair and impartial Committee," and urging Ministers to prosecute the war with unflinching energy and vigour

CHARLES MACKAY'S SONGS.—The lyrical works of this gentleman—whose success as a writer of songs, patriotic, social, and descriptive, has scarcely been equalled in our time—are at length collected, and will speedily be published in a single volume, which is about to issue from the press of Messrs. Bradbury and Evans. It will be welcomed to every English household.—*Weekly Chronicle*

IMPERIAL PARLIAMENT.

(*Continued from page* 187.)

HOUSE OF LORDS. THURSDAY.

DAY OF PRAYER AND HUMILIATION.

The Earl of RODEN urged upon the Government the propriety of advising her Majesty to order a particular day to be set apart for general humiliation and prayer, to implore the Divine protection for our army in the Crimea

The Earl of ABERDEEN said that when he was in office he was asked by a noble Duke whether he was prepared to recommend the introduction into the Liturgy of a special prayer for ordinary purposes? He stated in reply that he had every objection to such a proceeding; but, so far from having any objection to the appointment of a special day for prayer and humiliation, he was quite in favour of it.

Earl GRANVILLE said that the present Government had already advised her Majesty to order a day to be set apart during the present Lent as one of national humiliation and prayer. He was happy to inform their Lordships that recent accounts from the Crimea led them to suppose that the condition of our army was considerably improved.

HOUSE OF COMMONS. THURSDAY.

Mr. DRUMMOND asked whether it was the intention of the Government to make the army of India a Royal army?

Lord PALMERSTON. No such decision has been come to.

In reply to a question from Mr. Warner, Lord PALMERSTON said that the Commission which was to go out to the East would have the power to rectify, as well as to inquire into, any abuses that might be found existing.

ANOTHER MINISTERIAL CRISIS.

Lord PALMERSTON said he had to state to the House that which he believed they were already aware of—that three members of the Government, all of whom were members of that House, had resigned their offices, and now only held them until their successors were appointed. Those were the first Lord of the Admiralty (Sir J. Graham), the Chancellor of the Exchequer (Mr. Gladstone), and the Secretary for the Colonies (Mr. S. Herbert). He hoped the House would not think he was asking too much in requesting that all public business appointed for that evening be postponed; and that the House would adjourn until to-morrow, when the three right honourable gentlemen referred to would be in their places for the purpose of stating their reasons for the course they had pursued (Hear, hear).

Mr. DISRAELI said that they were in anticipation of a very strong Government, and although the chief obstacle to the formation of such a one appeared to be removed, he yet found at the end of the ten days that it had fallen to pieces. He must say that upon his side of the House the announcement of the noble Lord must be felt with deep regret and some consternation.

Mr. WILSON, on the part of the Government, fixed the nomination of Mr. Roebuck's Committee the first order for to-morrow.

HOUSE OF LORDS. FRIDAY.

Lord PANMURE, in reply to Lord Lyndhurst, said that he was fully aware of the importance of providing summer clothing for our army in the Crimea, and that measures had been taken by the Government to have an adequate supply upon the spot by the month of April next.

HOUSE OF COMMONS.—FRIDAY.

Major REID gave notice that, unless prevented by another Ministerial crisis, he would on an early day move for the appointment of a Select Committee to inquire into the system of promotions in the Army by the purchase of commissions.

Mr. F. PEEL, in reply to Sir F. Baring, stated that the letters from Lord Raglan to the Duke of Newcastle on the subject of newspaper correspondents in the East being of a confidential nature, he (Mr Peel) had no authority for promising their production. This objection would not, however, apply to the letters sent to the editors, which he thought might be produced.

Mr. LAYARD hoped the replies of the editors would be furnished at the same time.

Mr. F. PEEL was not sure whether that would be expedient.

THE NEW MINISTERIAL CRISIS.

Sir J. GRAHAM then rose to explain the reasons which induced him to resign the position he had hitherto had the honour to hold in her Majesty's Government. The Committee moved for by Mr. Roebuck was opposed by the late Administration, but had since been allowed by the present Government, after the hon. and learned member for Bath had amended his list of names to be placed on such Committee. He (Sir J Graham), however, objected to the appointment of a Select Committee upon such a subject at all if the Committee be a secret one, the characters of various persons might be attacked without any opportunity being afforded them for defence. If, on the contrary, it were to be open, its proceedings would be published from day to day, and by this means mis-statements would go forth which might be highly prejudicial to the interests of the public service. Consequently, under any circumstances he was opposed to the motion; nor was he aware of any precedent for such an inquiry. He was not in favour of such an inquiry taking place before the bar of that House than before a Select Committee; but, according to all forms of proceeding, not until the war was over He did not, however, mean to contest the power of the House of Commons to make such an inquiry, even in the absence of precedent. He had himself been from his youth to increase its democratic power, and he knew no limit to its functions, except when, in an ill-advised moment, it attempted to trench upon the Constitution. Having stated to Lord Palmerston whose noble friend was about to form his Administration whether any changes were contemplated in the foreign policy, and any in the terms upon which negotiations were to be conducted at Vienna, and the noble Lord having satisfied him upon those points, he consented to join the noble Lord His friends on the Treasury bench having opposed the motion, had since spiked their guns and abandoned their position. In the painful discharge then, of what he conceived to be his duty, he now appeared before the House. It appeared to him there were indications that the Administration he had left did not possess more confidence than the last. At the same time he felt it his duty to give the noble Lord's Government his humble support, of whatever elements that Government might be composed

Mr. BRIGHT expressed his regret at the retirement of the several right hon. gentlemen from the Government, because he had no desire to see the Administration of Lord Palmerston overthrown. For a month there had been nothing but chaos in the Administration. It therefore became the House of Commons to deliver the country from the embarrassments which surrounded it. Terms of agreement for peace had been offered to Russia, and it was the duty of the House to see that they were adhered to in frankness and goodwill. He applauded to the noble Lord to stop this wasteful outpouring of blood, and to vote to himself a fame purer and greater than any he had as yet been able to secure

Mr. SIDNEY HERBERT gave similar reasons for his secession from the noble Lord's Government as those which had been given by Sir J. Graham.

Mr. MACASKELL strongly insisted upon the necessity for inquiry

Mr. DRUMMOND said that, while our military skill was the laughing-stock of all Europe, and our army was perishing, the late head of the Government, whose mismanagement had produced all the mischief, had been decorated by the Queen with the highest mark of distinction that a subject could receive. This was done in mockery of that House, and in contempt of public opinion (Hear, hear).

DEATH FROM THE COLD AT BEACHY-HEAD. On Friday week two gentlemen proceeded from Southbourne to Beachy-head for the purpose of shooting wild fowl—Mr. Bethell, from Cornfield-terrace, and Mr. Cobb, from the Grand Parade. As night advanced they became much benumbed with cold Mr. Bethell more particularly so. His friend, finding that he was becoming quite overpowered by the severity of the weather, and the tide fast advancing, used the most strenuous exertions to get him away from the vicinity of the water, and succeeded in dragging him a considerable distance, but, from cold and exhaustion, was obliged to desist from his exertions. Mr. Cobb succeeded in obtaining a position in the cliff removed from the water, where he was discovered by a coast-guardsman early on Saturday morning entirely insensible. Assistance being procured he was removed to his residence, where means were immediately applied to restore animation, and on Sunday he became able to articulate, and strong hopes are entertained of his recovery, although he is at present, it is said, quite blind. The body of Mr. Bethell was not recovered till Sunday morning, when it was found at Beachy-head.

MONUMENT TO PROFESSOR WILSON. A meeting of the general committee was held last week, at which it was resolved that the monument to the late Professor Wilson, should be a colossal statue of bronze, to be placed on a pedestal in the open air in some public situation in Edinburgh; and a sub-committee was appointed to make the necessary arrangements. It was stated by Mr. Robert Chambers, the honorary secretary, that the subscriptions already received exceeded £1100, and that the sum required would be about £1500.

An interesting inscription was recently discovered in the excavations around the Pantheon, referring to the corporation of tavern-keepers instituted in Rome during the reign of Arcadius and Honorius, when Lampadius was Prefect of the city, A.D. 366.

MAZZINI ON THE PIEDMONTESE TREATY.—The *Italia e Popolo*, of Genoa, publishes a long letter from Joseph Mazzini, addressed to Count Camillo Cavour, in which he says that the conclusion of the treaty between Piedmont and the Western Powers has caused the doubts which created a division in the Italian party to disappear, and accordingly congratulates the Minister on his success in effecting it

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE far-famed Bernal collection, over which the hammer of Mr. Christie is suspended, for final settlement on the 5th of March, is valued at £50,000, and the Society of Arts has properly petitioned the House of Commons for that sum to secure so choice a collection for the people. This country has made great mistakes in suffering unique collections of real importance to be dispersed. The Lawrence collection of drawings of the ancient masters is a case in point, the whole collection having been offered to the public for scarce a third of what it afterwards produced—for scarce a fourth of what it would now sell for. We trust that, even in these war times, the new Chancellor of the Exchequer will listen to such a proposition as that now made with a favourable ear. Once scattered, it is impossible to bring it together again. Mr. Christie's hammer will divide and waft it no one knows where.

Even in these dull times for literature, a publisher has been found to venture his capital in giving the questionable MS. "Moredun" an appearance in print. Mr. Sampson Low—the London agent for Barnum's Life—is the Quixote of publishers on this occasion; we shall therefore soon be enabled to see what it is like in point of merit; if it is more akin to Ireland's "Vortigern" than Sir Walter's "Waverley." The facsimile that is shown continues to be condemned by those most conversant with Scott's handwriting. Scott always *wrote* for the press on the largest size uncut post, so as to get three or four of his printed pages into one of manuscript. The MS. of "Moredun" is on paper much smaller than Sir Walter was accustomed to use. Here our comments on "Moredun" must cease till it comes before us with Mr. Sampson Low's "imprimatur."

Lord Brougham is about to print in the edition of his works now in course of publication the whole of the correspondence of George III. with his Minister (Lord North) on the subject of the American War. The original letters were lent by Lord Glenbervie to George IV., and never returned. The belief is, that "the first gentleman in Europe" destroyed them. Lord Brougham will print them from copies made from the originals by Sir James Mackintosh.

A curious dispute between the Earl of Ellesmere and the trustees of the British Museum has just been concluded, and the trustees (very much against their will) compelled to relinquish their hold upon some manuscripts belonging to Lord Ellesmere of which they had improperly possessed themselves. The wonder is, not so much that the trustees should have bought stolen goods, but that, when they found that they were stolen, they should have persisted in retaining them. Another singularity in the affair is that several of the manuscripts have been long in print, as from the originals in the collection of Lord Ellesmere; so that the trustees, or those who purchased for them, ought to have been aware that what was privately offered for sale could not be the property of the pretended owner. Still, in the face of this evidence, and in defiance of the positive identification of the documents by the gentleman who printed them some years ago in a volume of which many hundred copies were circulated, the trustees insisted upon keeping them, and thereby really incurred the peril of being treated as the receivers of stolen goods, actually knowing them to be stolen. We have heard the name of the guilty party, but we refrain from publishing it, because it could do no good, and the matter has been sufficiently exposed to prevent his being entrusted in future with any other manuscripts. Lord Ellesmere only sought to re-obtain what beyond dispute was his own property; but the trustees, having done a serious wrong in the first instance, were obstinate in defending it, and it was not until the Law Officers of the Crown (themselves trustees) had given their decided opinion that the authorities of the British Museum could see a leg to stand upon that Lord Ellesmere had his own manuscripts once more put into his own hands. Whoever may have advised the trustees to the commencement, he has in the end caused a good deal of laughter at their expense.

Mr. Samuel Cousins, the distinguished engraver, has been elected (as we hinted he would be, some fortnight ago) a full Royal Academician. He is the first engraver who has been admitted to such an honour; for Bartolozzi was elected, not as an engraver, but as designer. This was capriciously done by the Academy to annoy Sir Robert Strange. There is a talk of admitting another engraver a full Royal Academician, making the number of Academicians forty-two, instead of forty; but certain schoolboy conditions will, it is said, have to be complied with, which the most eminent engravers are unwilling to fulfil. The Academy should not stand on antiquated formalities, but elect into its ranks at once Mr. J. H. Robinson, Mr. Doo, or Mr. Burnet. They have now as a member the most eminent mezzotinto engraver in England; they should, therefore, admit the most eminent line engraver in England. The art of line engraving in its perfection is fast dying out amongst us. Mr. Robinson, Mr. Doo, and Mr. Burnet are not likely to have any fitting successors. It is more than time, therefore, to render full honour to those who are still among us.

It says something for the growing taste for art in this country that the picture which brought the largest price at the recent sale at Messrs. Foster's should have been the best work in the collection; and that, ten years ago, the picture in question would not have sold for a third of the sum it now realised. The picture to which we allude was "The Lock," by Constable. The sum it sold for was 860 guineas. Mr. Leslie, who has done so much to make the merits of Constable known, must rejoice at the tardy justice rendered to his favourite landscape-painter. "The Lock" is, indeed, a very fine picture—every year is mellowing it into harmony and adding to its beauties.

Artists are laughing at a critic in the *Spectator*, who learnedly refers "The Lock," by Turner (sold at the same sale for 600 guineas), to a period in Turner's art dating some *twenty* years ago—that is, to the year 1832 or 1833. Now, the picture has no one token about it of Turner's particular characteristics at that period. It is a picture rather of forty than of twenty years ago—in fact, it is a *liber studiorum* picture, ranging between 1808 and 1812.

Mr. S. A Hart, the newly-elected Professor of Painting in the Royal Academy, has commenced a series of lectures. He succeeds Mr. Leslie, and will give another turn to the mind of the student. He is no wild admirer of the pre-Raphaelites, but is absorbed in well-grounded and well-considered admiration of the great painters of the Italian school Hi predecessor, Mr Leslie, has never had the advantage of being in Italy; and, though his pictures have not suffered by his home-keeping propensities, his lectures would, we think, have gained by a greater intimacy with the best works of the best masters. Mr. Hart has been trained to artistic criticism in the public prints, and his hand is now seriously missed by those who can detect and appreciate.

INLAND BOOK POST.—GENERAL POST-OFFICE, FEB. 1855. On and from the 1st March next the following alterations will be made in the regulations of the Inland Book Post:—If a book packet be found to contain any enclosure which is sealed, or otherwise closed against inspection, or any letter whether sealed or not, the letter or other enclosure will be taken out and forwarded to the address on the packet, charged with full postage as an unpaid letter, together with an additional rate of 6d.; the remainder of the packet, if duly prepaid, being forwarded as heretofore. If a packet be not sufficiently prepaid according to its weight, but nevertheless bear stamps of the value of 6d., it will not, as heretofore, become liable to the letter rate of postage, but will be forwarded charged with the deficient book postage and an addition of 6d.—ROWLAND HILL, Secretary.

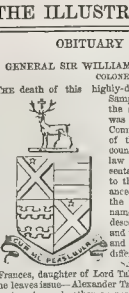
The Government of Holland is preparing to send an extraordinary Embassy to the Emperor of Japan, in order to take advantage of his friendly dispositions towards Europeans. The Dutch Government hopes to obtain a treaty of commerce more advantageous than any it has hitherto had.

The English authorities have engaged at Constantinople 800 labourers—Croats or Mussulmans, all subjects of the Sublime Porte—to work on the construction of the railroad at Balaclava. Each man is to receive three shillings a day, and ration of biscuit.

OBITUARY OF EMINENT PERSONS.

GENERAL SIR WILLIAM CORNWALLIS EUSTACE, C.B., K.C.H., COLONEL OF 60TH ROYAL RIFLES

THE death of this highly-distinguished officer took place at his seat, Sampford Hall, Essex, on the 9th instant, in the seventy-second year of his age. Sir William was the third son of the late General Eustace, Commander of the Forces in Ireland, and brother of the Rev. Charles Eustace, of Robertstown, county Kildare, who has been recognised by the law officers of the Crown as heir and representative of the Viscounts of Baltinglass, and entitled to that peerage if the attainder were removed. An ancestor of this ancient family accompanied William the Conqueror to this country, and enrolled his name in the celebrated list at Battle Abbey. His descendants crossed over to Ireland temp. Henry II., and were always remarkable for military prowess, and there established several branches under different titles.



Sir William married, first, in 1809, Catherine-Frances, daughter of Lord Talbot de Malahide; by whom (who died in 1816) he leaves issue—Alexander Talbot (who assumed the surname and arms of his maternal grandmother on succeeding to the Malpas estates); and a daughter, Catherine Frances, married to the Rev. S. W. Lloyd, of Vine House, near Sevenoaks; secondly, Caroline, daughter of the late John King, Esq., of Great Stanmore-place; by whom (who died 1827) he leaves John Thomas, Captain West Essex Militia; and Robert, Rector of Sampford- and thirdly, Emma, daughter and coheir of the late Admiral Sir Eliab Harvey, G.C.H., M.P. He then accompanied Sir James Craig to Naples, from thence to Sicily and Calabria, and was present at the action on landing in St. Euphemia Bay, the battle of Maida, and siege of Scylla. He was on board the *Leora* frigate when she captured the *Granamedie*; commanded the Chasseurs Britanniques at the battle of Fuentes d'Onor, the siege of Ciudad Rodrigo, battle of Salamanca, capture of Madrid, defence of Gimos in front of Burgos, various engagements on the retreat from thence, actions in the Pyrenees (severely wounded 31st August), and various other engagements, in one of which he was again wounded, and in another he had a horse killed under him. Sir William received the gold medal and one clasp for Fuentes d'Onor and Salamanca, and the silver war medal and two clasps for Maida and the Pyrenees, and was created a Companion of the Bath, and a Knight-Commander of the Royal Hanoverian Guelphic Order.

JOSEPH HUME, ESQ., M.P.

JOSEPH HUME—one, if not of the most brilliant, certainly of the most sterling men of his age and country—is no more. He dies leaving behind him a name for ever memorable in our Parliamentary annals; and there are few, be their party, their principles, or their prejudices what they may, who will not regret the loss of this great genius of public economy.

The career of Joseph Hume has been, from beginning to end, a course of unceasing industry, perseverance, and utility: he was at work from his youth to his death. His long life of labour, all real and unromantic as it was, may be briefly told. Joseph Hume was born at Montrose, in Scotland, in 1777: he was a younger son of a master of a trading vessel, who had a large family, and who died while Hume was yet an infant. Like most men of remarkable intellect, Hume had in his mother a lady of superior education and intelligence, and she secured his being well taught from his earliest years, and when still very young he was apprenticed to a Dr. Bate, a provincial physician of considerable celebrity. Having served his time with him, he finished his regular course of physical and anatomical knowledge in the University of Edinburgh. He then made several voyages to India in the Company's service, and was, in 1799, appointed Assistant-Surgeon to the Indian army, and joined the forces commanded by Lord Lake. Amid the arduous duties of his profession, he contrived to find time to master the Persic language, and so laid on his fortune and his fame. Colonel Achunty, at that time the military interpreter, died, and the only one that could be found to fill his place was the obscure assistant-surgeon, Joseph Hume, who was appointed Achunty's successor; and to the task of interpreting, as, indeed, to every toil he undertook, Hume devoted himself with such wonderful assiduity, that the commanding officer of the district, finding that he could do almost anything, and was never tired, gave him other appointments of importance and profit. A service of eight years made Hume a rich man, and he returned to England in August, 1808, bearing with him the highest recommendations from the Commander-in-Chief, and, what was still more valuable, his own faculties ripe, and fit for business beyond those of most men. Shortly after coming back he set out, for the improvement of his impaired health, upon a lengthened tour on the Continent, where he, like Ulysses,

> Wand'ring from clime to clime, observant strayed,
> Their manners noted and their states surveyed.

In 1811 he came again to England, and his long Parliamentary career began by his entering the House in 1812, as member for Melcombe Regis. He did not, however, then remain long a senator, and he was out of Parliament till 1818. During this interval he laboured diligently, as a proprietor of East India Stock, to correct the errors and reform the abuses of the Indian system. He was elected member for Montrose in 1818, and continued to represent the Montrose burghs until his election for Middlesex in 1830, from which time (with the exception of one session, when he represented Kilkenny) he sat for Middlesex till 1842. In 1842, and from thence to the time of his demise, he represented his native burgh of Montrose. Of what Joseph Hume has done in Parliament it is needless here to give any detail, for it is known far and wide to all. It may, indeed, without fear of contradiction, be asserted that no member of the Houses of Parliament has done the country more essential service than Mr. Hume, in carefully watching over the national expenditure, and in pointing out the most effectual modes of reducing taxation. He was always in his place, incessantly—night after night, from session to session—grappling with Herculean force the most difficult calculations, and impress by his measures of economy on his hearers in language, though not eloquent, impressive and invincible from its very truth and earnestness. His struggles and his success in his great task form part of the history of this country. Mr. Hume was a public man of that stamp which has proved so beneficial in setting the fortunes of the United States of America; he was a man of the class and of the utility of Penn, and Franklin, and Washington—men to be respected for ever for their sagacity and sense.

In private life Mr. Hume, to all who knew him, endeared himself from his sound worth, his unswerving integrity, his amiability, and his benevolence. Joseph Hume breathed his last at his seat, Burnley-hall, Norfolk, on the 20th inst. He was married, and leaves a family.

W. E. CAMPBELL, ESQ.

THE death has just occurred in Normandy of Walter Frederick Campbell, Esq., of Islay, and Woodhall, N.B., who represented for many years Argyllshire in Parliament. He was the elder son of the late Colonel John Campbell, by his wife, Lady Charlotte Campbell, youngest daughter of James, fifth Duke of Argyll, since better known as Lady Charlotte Bury. Mr. Walter Frederick Campbell's sisters were Lady Cumming, the late Countess of Usbridge, the late Countess of Charleville, Mrs. William Russell, Lady Arthur Lennox, and Mrs. Brooke, of Mere-hall, Cheshire. His mother, who survives him, is the distinguished authoress, Lady Charlotte Bury; having, after the death of Colonel Campbell, married secondly, in 1816, the Rev. Edward S. Bury. Mr. Walter Frederick Campbell, the subject of this notice, was Deputy-Lieutenant of the counties of Argyll and Lanark. He married first, in 1820, Lady Ellinor Charteris, eldest daughter of Francis Earl of Wemyss and March, by whom (who died in 1832) he leaves issue a son and a daughter. By his second wife, whom he married in 1837, and who survives him, Catherine, daughter of Stephen Thomas Cole, by his wife, Lady Elizabeth Stanley, he has had no issue. Mr. Campbell was, in 1816, the successor of his grandfather, Walter Campbell of Shawfield.

LADY COLBORNE, widow of the late Lord Colborne, whom she has survived but a few months, died on the 17th instant, at her house in Hill-street, Berkeley-square. Lady Colborne was the eldest daughter of the late Right Hon. Thomas Steele, and was married, in 1816, to Nicholas, first Lord Colborne, brother of Sir Matthew White Ridley, Bart. Her Ladyship leaves issue four married daughters, viz., Mrs. Gurdon, of Letton; Lady Nugent; Mrs. Heathcote, of Conington Castle; and Mrs. Farquhar.

CAPTAIN ARTHUR LOWTHER, second son of Colonel the Hon. Henry Cecil Lowther, M.P., by his wife the late Lady Eleanor Lowther, and nephew of the present Earl of Lonsdale, died on the 14th inst., at his father's residence in Bruton-street, Berkeley-square, in his thirty-fifth year.

The *Panama Star* states it as tolerably positive that the railroad would be opened through to Panama by the end of last month.

LATEST INTELLIGENCE.

REPORTED RESIGNATION OF LORD RAGLAN.

A telegraphic despatch from Constantinople of the 15th inst., brings the following items:—

It is reported that Lord Raglan has tendered his resignation. On the 12th General Pelissier sent a message to Paris stating that no successful attempt could be made on Sebastopol for a month to come. The inclination of Persia in favour of Russia becomes daily more evident. Turkey and Greece have not yet come to an understanding.

THE WAR IN THE CRIMEA.

From St. Petersburgh we learn that, under date of the 12th inst., Prince Menschikoff had sent the following despatch to his Government:—

On the 30th we succeeded in discovering subterraneous works of the French leading towards the fortifications. With the aid of artillery we destroyed, on the 2nd, a portion of the enemy's gallery. On the 5th the French, by firing three mines, attempted our counter-works. The attempt turned to their own disadvantage. On the 8th the play of a new mine enabled us to make a sortie by the enemy's works. Meantime our artillery successfully replied to the fire of the besiegers. At night detachments of volunteers continually harass the enemy in their trenches, and, by obliging them to beat to arms, compel them to suspend their works.

THE FRENCH EMPEROR'S VISIT TO THE CRIMEA.

On Wednesday it was generally believed in Paris that if his Majesty ever contemplated such a journey it had been postponed to some distant day, if not entirely relinquished; but on Thursday the rumour was again current that the Emperor was determined to take his departure for the East, and to witness the storming of Sebastopol with his own eyes, which was to be accomplished by a very powerful body of troops equipped in armour, manufactured on a new principle, light in construction, and specially expressly for the purpose. The Paris correspondent of the *Globe*, writing on Thursday evening, says:—

That it is his determination to make the journey I am as firmly convinced as ever; all that remains to be fixed is the day, and that will be known to no one until the very last moment. Every arrangement has been completed, even to the most minute detail; the Guides have been ordered to hold themselves in readiness to start at a moment's notice; a brigade of the Imperial Guard, under the command of St. Jean d'Angely, has received similar orders; the Cent Gardes have had a change made in their dress and equipments; the Ladies of Honour who are to accompany the Empress to Constantinople are fixed on, and a complete printing apparatus has been fitted up, to be conveyed in a military baggage waggon, so that despatches and decrees may be printed and issued just the same as if his Majesty were in Paris. All these arrangements would look as if something real were intended, and, as I said before, nothing remains but to have the day fixed. It is said that a Commissary of Police, specially appointed to attend on their Majesties, has already left for the south.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—*Rectories:* The Rev. F. Salter to Hethe, Oxfordshire; Rev. F. Lucas to Rhossily, Glamorgan; Rev. R. Jarrett to Bourton-on-the-Hill; Rev. A. Williams to Prior's Portion, Tiverton; Rev. C. S. F. Fanshawe to Upham, near Bishop's Waltham; Rev. H. Carey to All Saints', Southampton; Rev. J. Yolland to Timberland, near Sleaford, Lincolnshire. *Vicarage:* The Rev. T. Scard to Durley. *Incumbency:* The Rev. G. H. Newman to Tenton hall, near Yeovil, Somerset.

TESTIMONIAL.—The Rev. Robert Morewood, M.A., Vicar of Burton, Westmoreland, has been recently presented by his congregation with an elegant silver tea-kettle, as a testimonial of their respect and affection, and the high sense they entertain of the exemplary performance of his duties during a period of twelve years.

A SCENE ON THE SERPENTINE.—On Thursday, after the Royal Humane Society's men had finished the duty of the day, music was heard, and a splendid brass band went upon the ice, attended by upwards of a thousand persons, each holding a lighted flambeau. In the course of a few minutes these were stretched upon the ice, numerous cake fires were made, barrels of beer and other creature comforts were publicly exposed for sale, which gave the appearance of a great fair. Several hundred gentlemen, with lamps tackled in front of their coats, led the way, apparently for the purpose of examining the ice, surrounded by the torch-bearers, and the band at the same time playing "Cheer, boys, cheer." After passing from the railings to the Kensington-gardens bridge, the persons turned round, when, almost *en masse*, the whole of the Park became brilliantly illuminated, as hundreds of rockets, serpents, roman-lights, squibs, catherine-wheels, and other descriptions of fireworks were ignited.

INDEPENDENCE OF POLAND.—A public meeting was held in the Town-hall of Birmingham on Wednesday, to consider the question of the restoration of Polish independence. Resolutions in favour of the object of the meeting, and recommending the formation of a Polish Legion for service in the present war, were adopted. Upwards of 4000 persons were present, and much enthusiasm in the Polish cause was manifested.

TRADE AND NAVIGATION RETURNS.—The Trade and Navigation returns just published show that the enumerated articles of British produce exported during the month ending the 5th of January, amounted in value to £6,428,000. The amount for the corresponding month of 1854 was £5,572,000, and for that of 1853, £6,418,414. For the year ending the 5th of January last, our exports of native produce were estimated at £97,092,008, being a falling off of more than a million and three-quarters from the previous year.

MISS NIGHTINGALE.

ALTHOUGH the public have been presented with several portrait-sketches of the lady who has so generously left this country to attend to the sufferings of the sick and wounded at Constantinople, we have assurance that such pictures are "singularly and painfully unlike." We have, therefore, taken the most direct means of obtaining a sketch of this excellent lady, in the dress she now wears, in one of "the corridors of the sick," in the Hospital at Scutari. A recent letter in the *Times* bears the following testimony to the humane services of Miss Nightingale

Wherever there is disease in its most dangerous form, and the hand of the spoiler distressingly nigh, there is that incomparable woman sure to be seen; her benignant presence as an influence for good comfort even amid the struggles of expiring nature. She as a "ministering angel" without any exaggeration of expiring nature. She as a "ministering angel" without any exaggeration of expression, is in those hospitals, and, as her slender form glides quietly along each corridor, every poor fellow's face softens with gratitude at the sight of her. When all the medical officers have retired for the night, and silence and darkness have settled down upon those miles of gloomy sick, she may be observed alone, with a little lamp in her hand, making her solitary rounds. The popular instinct was not mistaken which, when she set out from England on her mission of mercy, hailed her as a heroine; I trust that she may not earn her title to a higher though sadder appellation. No one who has observed her fragile figure and delicate health can avoid misgivings lest these should fail. With the heart of a true woman, and the manners of a lady, accomplished and refined beyond most of her sex, she combines a surprising calmness of judgment and promptitude and decision of character. I have hesitated to speak of her hitherto as she deserves, because I well knew that no praise of mine could do justice to her merits, while it might have tended to embarrass the frankness with which she has always accepted the aid furnished her through the Fund. As that source of supply is now nearly exhausted, and my mission approaches its close, I can express myself with more freedom on this subject; and I confidently assert, that but for Miss Nightingale the people of England would scarcely, with all their solicitude, have been spared the additional pang of knowing, which they must have done sooner or later, that their soldiers, even in hospital, had found scanty refuge and relief from the unparalleled miseries with which this war has hitherto been attended.

DESTRUCTION OF THE STEAM-SHIP "MAURITIUS."

ONE of the most fearful conflagrations which has ever been known at Southampton occurred at the Docks on Friday morning week, causing the total destruction of the fine steam-ship *Mauritius*, belonging to the General Screw Steam Shipping Company. She was of 1800 tons burden, and 400-horse power, and cost about £70,000. On the return of the *Mauritius* from the Crimea she arrived at Southampton, and had during the last few days been lying in the new graving-dock undergoing some necessary repairs previous to her return to the duties of the transport service. About five o'clock several persons connected with the docks were aroused by the alarm of "Fire!" and Mr. Hedger, superintendent to the Dock Company, and Mr. Levy, together with other officials, were immediately upon the spot, in conjunction with several officers connected with the Royal Mail and Peninsular and Oriental Companies' service, and also a strong body of men, under the charge of the second officer of the United States mail steam-ship *Hermann*, at Southampton, who had been ordered to render

MISS NIGHTINGALE, IN THE HOSPITAL AT SCUTARI.—(SEE PRECEDING PAGE.)

assistance by Capt. Higgins, commander of that vessel. Shortly after the alarm had been made known a strong detachment of Sappers and Miners from the barracks, with their engines, were on the spot; but the fearful rapidity with which the flames extended defeated the hopes of all in the possibility of saving the vessel. No sooner had the fire become visible, than it burst out into one immense mass, almost instantly extending itself over three parts of the vessel. However, every exertion was made by those in attendance, but unfortunately with no beneficial result, for the *Mauritius* now lies in the new graving-dock totally destroyed, and, beyond the iron with which she was built—the whole of which has been twisted into a thousand different shapes—and her bowsprit, jib-boom, and outwater, not a vestige of this once noble ship remains. It is stated, that a considerable quantity of gunpowder remained on board, and this rendered the danger of assistance imminent to many persons who were otherwise willing to have volunteered their services. But had such not been the case, with such rapidity did the flames travel throughout the vessel, that hardly any time was left after the arrival of a sufficient number of persons to save anything of material value. It is fortunate that, although a large quantity of the officers' kit, together with the plate, &c., of the ship, has been totally destroyed, the ship's papers were removed on shore the day before, and thereby saved. For about three hours the fire raged furiously, and a strong breeze springing up from the eastward considerably assisted the progress of the flames. About eight o'clock the mizen and main masts fell over the port side with a tremendous crash, and were shortly afterwards followed by the foremast, the whole forming a tangled and burning heap of spars and cordage. Fortunately, no damage either to the docks or the mass of people assembled occurred. For some considerable time great fear was exhibited in reference to the powder magazine, and many persons left the docks or retired to some distant part.

The water had reached a sufficient height to lead many to presume that the portion of the ship containing the ammunition was entirely inundated, and that any danger from the explosion of gunpowder was rendered thereby utterly futile; but about half-past ten o'clock a terrific explosion took place, and large fragments of the burning wreck were scattered in all directions—fortunately, without doing any injury. Some fear existed in consequence of there being several pieces of loose timber and a large quantity of shavings lying on the dock quay, some of which took fire.

A very strong opinion exists among many persons that the fire was more the result of design than accident. This opinion has justly been excited from many circumstances. At the commencement of the week a charge was preferred by the company against several seamen connected with the ship for having broken faith with the company, by the non-fulfilment of the articles they had signed previously to her departure for the Black Sea, by deserting on her arrival at Portsmouth. This, it is presumed, has greatly increased the men against the company, and we have been told that one of the crew was heard to express his intention of putting the "—— ship in flames."

Independently of the severe loss occasioned to the General Screw Company by the destruction of this splendid ship, the inconvenience to the Government will be considerable, as the *Mauritius* was to have been ready in eight or ten days to embark 1200 men for the seat of war in the East. In the present posture of affairs the services of such a ship can ill be spared by the country.

BURNING OF THE "MAURITIUS," AT SOUTHAMPTON.

THE GREAT FIRE AT BANKSIDE, ON FRIDAY NIGHT, FEBRUARY 16, 1855, SKETCHED FROM THE NORTH BANK OF THE THAMES.—SEE NEXT PAGE.

DESTRUCTIVE FIRE IN SOUTHWARK.

ON Friday night (last week), between ten and eleven o'clock, a fire, attended with the destruction of property valued at several thousand pounds sterling, and by which Mr. Thomas Jackson, stepson of Mr. Braidwood, superintendent of the London fire-engine establishment, lost his life, occurred in the extensive premises belonging to Messrs. Routledge, the steam saw-mill proprietors, situate in Holland street, Blackfriars-road. Adjoining these premises were others considerably larger, belonging to Sir John Rennie, the engineer, and also the bottle-warehouses belonging to Messrs. Rickman. The whole of these premises formed a portion of the Albion-wharf, and they extended to within 100 yards of the edge of the river. The timber-yard of Messrs. Routledge extended from Holland-street almost to the water side, the granaries of Messrs Water and Steel, flour-factors, almost abutting on them, and forming the wharf. In addition to the many hundreds of loads of timber piled in stacks to a considerable height, there were spacious steam saw-mills, engine and boiler house, with workshops and other buildings. The steam mills are understood to have been at work on Friday, and the workpeople assert that when they left off work at eight o'clock at night the place was apparently safe. No one appears to have had charge of it after the doors were locked, and the keys given over to a party in the neighbourhood. Nothing happened to excite alarm until about twenty minutes after ten o'clock, when the wife of one of the labouring men in the employment of Messrs. Water and Steel saw a glimmering light in the timber-yard, soon after which the whole yard appeared to burst into flames. The arrival of the brigade force and other engines was most prompt; but the engineers were unable to get their engines into play for a long time after they were on the spot. The plugs of the water mains were found up, and even when thawed the supply of water was so scanty that not a third of the engines present could be put in motion. The large steam floating engine of the brigade was brought up the river, and got into immediate play; but in the meantime the flames had gained the mastery over the whole of the property in the vicinity of the Albion-wharf, including the warehouses and granaries of Messrs. Water and Steel; those of Messrs. Rosher and Co., lime-burners, and their dwelling-houses; the warehouses of Messrs. Rickman and Co., bottle-merchants; of Messrs. Radley and Co., and the main building of the extensive engineering works of Sir J. Rennie. For hours after it raged tremendously. In the timber-yard and steam saw-mills of Messrs Routledge huge stacks of timber were burning, and pile after pile of timber, in a thorough state of ignition, kept falling. The first stack which fell buried Mr. Thomas Jackson, who was assisting in extinguishing the flames; and up to two o'clock on Sunday morning, so great was the intensity of the heat, it was impossible to make the least search for the body. It was the largest watersido fire that has occurred in the metropolis for several years. The whole metropolis was vividly illuminated: for some hours St. Paul's and every tower and steeple in London were brought out in brilliant relief; while the appearance of the Thames from far below London-bridge to above Westminster, and the reflection of the flames on the floating ice which covered the surface, added to the remarkable character of the scene. The frost was intense, upwards of 16 deg. below the freezing point. Many of the firemen were actually coated in ice from head to foot, with icicles hanging from their uniform and helmets. At times the engines were "set," in consequence of the severity of the frost, and had to be thawed ere they could be again put into requisition. It was nearly four o'clock in the morning before the fire was arrested. It continued, however, to rage the whole of Saturday, and was still burning on Sunday night—more than forty-eight hours after it broke out, but no further mischief was apprehended. The total loss of property is computed at not less than £150,000.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS
TAKEN DURING THE WEEK ENDING THURSDAY, FEB 22

Month and Day.	Corrected Reading of Barometer at 9 A.M.	Thermometer. Highest Reading.	Thermometer. Lowest Reading.	Mean Temperature of the Day.	Departure of Temperature from Average	Degree of Humidity.	Prevailing Wind	Rain in Inches.

Note.—The signs denotes below the average

The reading of the barometer decreased from 29.93 in. at the beginning of the week, to 29.84 in. by the afternoon of the 16th; increased to 30.01 in. by the 18th; decreased to 29.07 by the 20th; and increased to 29.95 in. by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29.90 inches.

The weather throughout the week has been as rigorous as in previous weeks. The mean temperature of the week was 24·3°, which is 14·0° below the average. The mean daily temperature was 18·3° below the average on the 18th, and was 17·8° below on the 19th; the least depression was 12·1° below on the 20th.

The reading of the thermometer in air on the 19th, in the morning, was as low as 8°.

There has been no week ending Feb. 22 of so low a temperature on record as that of the past week.

The Thames is now almost entirely unnavigable at Greenwich: at high water the river is completely covered by ice.

JAMES GLAISHER.

HEALTH OF LONDON. The births of 903 boys and 912 girls were registered within the metropolitan districts within the week ending Feb. 17. In all 1815 children. The deaths of 741 males, and of 734 females, were registered within the same time: in all 1475 persons—a number exceeding the calculated amount by 280, and which has been caused by the long continuance of severe weather.

REPEAL OF THE TAXES ON KNOWLEDGE. The annual meeting of the Association for Promoting the Repeal of the Taxes on Knowledge was held on Wednesday night in the large room, Exeter-hall. The apartment was densely crowded, there being about 4000 persons present. The chair was taken at eight o'clock by Mr. Milner Gibson, M.P. Amongst the gentlemen on the platform were Mr. Cobden, M.P., Mr. Bright, M.P., Mr. A. Fuller, M.P., &c. The Chairman, after alluding to what had already been effected by the association, said he had now to congratulate them on the important fact that the Government had agreed to abolish the newspaper stamp. The bill had been printed and circulated; but, having had an opportunity of seeing the manuscript, he stated what the provisions of the measure were:—The bill was introduced by Mr. Gladstone, the then Chancellor of the Exchequer, for it was reported that he had resigned his office from differences and dissensions in the Cabinet. The bill proposed, in the first place, to abolish the compulsory stamp altogether, and to repeal the tax on news. It proposed that all printed matter, up to the weight of four ounces, should be capable of being transmitted through the Post-office at a charge of 1d. for each transmission. The bill abolished the security system, and repealed those disgraceful statutes enacted by Lord Castlereagh in times gone by, and known by the name of the Six Acts. These propositions might be considered to be the leading features of the measure, but there were also clauses in the bill which were evidently introduced out of regard to what might be called the vested interests of the established press. It had been contended that the right of retransmission without an additional charge was a privilege highly valued by the established press. The bill offered, in consequence of that claim, to the established press, that if they chose to print a portion of their impression upon stamped paper, that portion of the impression shall be transmitted and retransmitted without any additional charge for a period of seven days. As it was considered that there were some large papers—he believed there was one in that metropolis well known to them all, which exceeded the given weight—there was a clause that papers of a certain size of superficial square inches, even though they exceed the weight of four ounces, should have the privilege of retransmission during seven days without any additional charge. That latter provision was to be in operation for a period of ten years. After expressing his opinion that the proposed measure would be a great boon to the people, he went on to say that the association would not be satisfied until the Paper-duty was repealed also. That was the natural result of the repeal of the Newspaper Stamp-duty; and he had great hopes that they would ere long succeed in repealing the remaining tax on knowledge. Mr. Cobden, Mr. Bright, Dr. Watts, and Mr. George Dawson, afterwards addressed the meeting in favour of resolutions for the abolition of the duty on paper, and expressing satisfaction at the determination of Government to abolish the newspaper stamp.

The Rev. Mr. Chichester, who succeeds to the vast estates of the last Lord O'Neil (valued at £40,000 per annum, and wholly free from incumbrances), is at present Incumbent of St. Michin's, one of the poorest parishes in Dublin, and to which he was but recently promoted from the still poorer incumbency of St. Michael's.

CHANGES IN THE WAR EXECUTIVE.

LORD PALMERSTON, with a not very felicitous illustration of the position of Government in regard to the House of Commons, described the Cabinet as the King Richard who would take the head of the "rebels," if the Wat Tyler were stricken down. He did not precisely apportion the part of Tyler, but the insurgent may be supposed to be represented by Mr. Roebuck's committee. The Sir William Walworth, who is to deal the *coup de grâce*, has, while we write, yet to be discovered, but assuredly the character will not be claimed by Mr. Layard. On the whole, we have heard better historical parallels, and have been a little reminded of Perrault's hint to avoid "comparisons with a long tail." But the "rebels" themselves took no special umbrage; and, as the nomenclature was for them and not for the public, the latter is not called upon for protest.

Proceeding to detail the arrangements by the proffer of which Lord Palmerston proposed to induce the House to forego the Roebuck Committee, he stated that the Government and Parliament had a common object, namely, the effecting such administrative improvements as would restore vigour to our military system. The first step he designed was the reunion of the two divisions of the War Department, recently severed upon the same plea of improved efficiency. The experiment having failed, and two heads not being better than one, the office of Secretary at War, abandoned by Mr. Sidney Herbert, is to be amalgamated with that of the Secretary for War. There is, therefore, one War Minister, Lord Panmure, under whose control the civil branches of the Artillery and Ordnance services are placed. But the military discipline of those services is to be transferred to the Commander-in-Chief—an arrangement so rational and obvious that every one wonders why it had to be made in the middle of a great war. Then came another change, which, had it been made a few years ago, might have worked signal improvement. The scandals of our Transport System are to be borne no longer, and Sir James Graham's successor is charged with the establishment of a special board to organise and superintend the transport service. If this board does but work with the ordinary practical method demanded by a railway company of one of its departments, there is hope that when we obtain some more soldiers, and some more horses, they will be forwarded to their destination with reasonable care and precaution.

The next great scandal, the Commissariat system, of which Lord Palmerston stated that complaints had been made—"not," he was good enough to fear, "without reason"—is to be dealt with by commission. Sir J. M'Neill—from whose long and strong anti-Russian efforts the best auguries are deduced for his zealous action—is to be the head of this Commission. But we do not gather from Lord Palmerston's speech, or from that of Lord Panmure, that Sir J. M'Neill is to be invested with powers of reforming and controlling, but that he is merely to investigate, and to suggest to the Government. Surely, if this be so, the proposal is mere trifling. Sir J. M'Neill is a man to be trusted. Why are not powers conferred upon him which shall enable him not only to recommend, but to make, the improvements for which there is really no time to wait? Then, Lord Palmerston stated that, in order to relieve the Commander-in-Chief from the necessity of attending to details which divert his mind from the larger duties of his situation, a new officer is to be created, to be called the Chief of the Staff. The necessity of this appointment has long been too notorious, and its character is perfectly well understood. Perhaps, in itself, the arrangement has its advantages; and, upon the whole, this mode of dealing with a difficulty which has acquired almost a proverbial importance is as straightforward as could have been expected from friends of the Commander-in-Chief.

Another set of inquirers is to be sent to the Crimea, in order to examine into the sanatory condition of the ships, the hospitals, the barracks, and the Camp generally. This is sensible enough; but what a satire it is upon our system that officials charged with those duties have not for years been permanently attached to the Army, and expected to proceed to work as regularly as any other portion of the service? Well, this is an age of discoveries; and we discover, in 1855, that 50,000 men, thrown into a camp in a strange country, require some sanatory attention. It is almost as gratifying to see that Lord Raglan has ordered up an army of scavengers from Constantinople; and, if the officials at Balaclava will permit the innovation, it is probable that the efforts of these allies will enable the sanatory commissioners to report more favourably than they could have done before the discovery in question. A hospital at Smyrna and improvements in the military hospitals at home are also promised. The "Crown of Ionia" is a delicious place for a convalescent, and even an official could hardly select a bad site for an hospital there. Moreover, there is one of the largest of leech-nurseries within a short distance of the place; a piece of information which we are happy to tender to the authorities it would be too much to suppose it already in their possession.

So much for investigation and reform; there was one other announcement made by Lord Palmerston, namely, that a bill was to be introduced for the enlistment of men more advanced in age than recruits under the present system may be, and also for enlisting them for a shorter term than at present. This, of course, indicates the difficulty of procuring soldiers; and we may remark while upon the subject that Lord Palmerston apprised the House on Monday that the Foreign Enlistment Act had proved inoperative. The reason he assigned was manifestly an insufficient one, namely, that the lower classes on the Continent had felt so insulted by the tone of English newspapers and English senators in reference to mercenaries, that they had refused to sell their swords to so uncivil a nation; but the fact that we are not to have a foreign legion remains the same, and hence an increased necessity for home reinforcements.

In all that Lord Palmerston has proposed there is good, and in some of the propositions immediate and large advantage, and the bargain he offered to the House deserved full consideration. But the people of England are too reasonable not to bear in mind that few or none of these reforms can have any effect upon the present state of affairs in the Crimea. Lord Palmerston has come into office as the popular War Minister, and his name and character are a guarantee against retrogression; but it would be absurd and unjust to expect that Sebastopol should fall one hour the sooner because he is Premier. If it fall it will be despite the old system; and Lord Palmerston will have had nothing to do with the exploit, and if it stand he must not be charged with disappointing the nation's desire. He appears to be going to work in thorough earnest, and deserves all support within and without the House; but these reforms of his we shall upon our next war, assuredly they will produce a scarcely appreciable effect upon the conduct of that we are now waging. Nothing is fairer or more desirable than to know exactly what we have a right to expect from a man, as in that case we are just judges of his merits and shortcomings. It will be no merit of Lord Palmerston if the English flag wave beside that of France on the Cathedral of Sebastopol and on the Star Fort, but he will not deserve to lose a jot of his popularity should the state of our army have compelled us—*about women*—to relinquish the task to our gallant allies.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Three Irish Peerages being now extinct, Lord Palmerston has the power of conferring one. Mr. Henry Herbert, of Muckruss, is spoken of as likely to be the person selected for the honour.

The Emperor of Austria at the present moment is dedicating his time almost exclusively to the army. The greatest activity prevails in all the departments of the War-office, to which the Emperor gives his personal attention. Francis Joseph has signified his intention to head his army in case of a general European war.

Mr. W. F. Campbell, of Islay, who represented for many years Argyllshire in the House of Commons, and who lately resided in Normandy, died last week.

The King of Prussia has conferred the star of the Red Eagle, second class, with oak leaves, on M. de Hinckeldy, General Police Director of Berlin.

His Excellency Baron Von Usedom, on a mission from the Court of Berlin, and Madame Von Usedom, have arrived in London, after a detention at Brussels arising from the indisposition of his Excellency.

The pay of General Ochsenbein in the French service is to be 20,000 f. a year; and in case of his being killed at battle a pension of 10,000 f. a year is to be ensured to his widow.

Riza Pacha, who is to take part in the approaching conferences at Vienna, landed at Trieste on Thursday week.

The Earl and Countess Delawarr gave a luncheon upon the frozen lake in Buckhurst-park, last week, to a large party of the neighbouring gentry; and afterwards about 150 school children were regaled with a hot dinner on the ice by the liberality of the noble Earl and Countess.

The King of Bavaria has conferred the Grand Cross of the Order of Merit of St. Michael on General Count de Schramm, Senator and President of the Committee of Infantry.

Colonel Chevalier Lanati, the president of the permanent court-martial at Parma, was stabbed on the night of the 11th inst., while returning home, a few steps from his own door. He received five wounds, none of which are mortal.

Sir Moses Montefiore has left Paris for Jerusalem, with the object of founding a hospital in that city. He has obtained funds from the Jews of London and the Jews of Australia.

There is a report in Vienna that the body of the Duke of Reichstadt is to be removed from thence to Paris. A functionary is to be sent from Paris to this end.

A monument is about to be erected in the parish church of Mount Shannon to the memory of the late Lord Fitzgibbon, of the 8th Hussars, who fell at the battle of Alma.

The Prefect of the Seine gave a magnificent ball at the Hôtel de Ville on Saturday evening. There were upwards of 6000 guests present, including Queen Christina of Spain and her family, the Ministers, and great public functionaries, &c.

Mr. Hadfield, late Secretary to the South American Liverpool Company, has left London, *viâ* Marseilles, for Constantinople, to take charge there of the fleet of steamers of his company chartered by the Government.

Catherine Hayes is in Calcutta, having sailed thither after great success in California and Australia. She will give a few concerts in our Indian metropolis, where great expectation is raised to hear her, and then return home—having encircled the globe on a singing mission.

In consequence of the great success obtained at Dresden by the "Etoile du Nord," M. Meyerbeer was, on the 9th inst., called to the Royal box, and received the cross of Commander of the Order of Albert.

Amongst the English Catholics who bore tapers before his Holiness at St. Peters on Candlemas-day were Lord Lovat, Sir James Fitzgerald, and Mr. Stourton. Sir James's sister took the veil at the Convent of the Sagre Cuore the same morning.

On Monday evening Mrs. Fanny Kemble gave a reading of Shakespeare's play of "Henry V." in the Town-hall at Oxford, to a large and brilliant assemblage.

Hallé, the eminent pianist, has been compelled to renounce engagements in Manchester and London, owing to an accident, which has injured one of his fingers.

The Earl of Cardigan, having been elected an honorary member of the Senior United Service Club a few days since, was entertained at dinner on Tuesday evening at the Club-house, by a select circle of the leading members.

For three days in the first week in June there will be a grand meeting of archers-players at Leamington, at which Lord Leyeton is to act as president. Many matches between players of celebrity and between London and provincial clubs will come off.

Prince Ghika, Hospodar of Moldavia, has been compelled to borrow 2,400,000 piastres, at 10 per cent interest, to make head against the difficulties caused by the Russian occupation. A banker at Vienna leads the money.

Early in the spring a large camp will be formed in the Phœnix-park, Dublin, under the command of Lord Seaton.

A strong shock of an earthquake was felt at Callao on the 6th ult., which, however, did very little damage.

Several valuable beds of excellent coal have recently been discovered on the estates of the Earl of Wilton, at Heaton, near Manchester.

The *New York Churchman* states that, taking the whole United States together, much more money is expended in the single article of cigars than upon all the common schools in the Union.

A schism has occurred among the members of the far-famed Cologne Choral Society, which has on two or three occasions visited England. The unpleasantness, it is said, threatens to break up the society.

The Committee who conducted the Patriotic Fund Ball at Guildhall have published their accounts, which show a balance of £503 9s. in aid of the Fund, after the payment of all expenses.

A letter from Berne says that the English Government has given an order in that town for ten thousand military uniforms.

Since April, 1853, there has been paid to the Ecclesiastical Commissioners the sum of £30,103 1s. 6d. on account of suspended stalls in cathedral and collegiate churches.

An open iron bridge is to be constructed on the Rhine. The site appropriated for the bridge lies between the square known as the Frankenplatz, in Cologne, and the present wharf close to the railroad terminus at Deutz. The height of the arches will more than admit of the steamers passing.

A large quantity of wires for the telegraph with the Crimea has been landed at Varna, so that we may now soon expect to have a direct communication established between the seat of war and France and England.

The Pope's bull inaugurating the immaculate conception as a dogma of the Roman Catholic faith was read on Sunday, with all the appliances of ecclesiastical pomp, at St. Nicholas Church, Liverpool.

A fine swan was found on Tuesday week in the Plain of St. Denis, alive, but much exhausted. It had round its neck a silver collar, with an inscription engraved on it, stating that the bird belonged to the domain of Prince Holenlohe, in Germany.

Between 30,000 and 40,000 tons of guano are said to be now on the way to this country from American shippers.

A fatal collision took place on the Manchester, Sheffield, and Lincolnshire Railway, last week, a pilot-engine having dashed against a passenger train. One person was killed.

The Corporation of Hull have agreed to a resolution authorising the formation of Reformatory Schools, and have appointed a committee to carry out the same.

Twelve thousand cuirasses, intended for the Sappers who are to lead the French assault on Sebastopol, have been forwarded to the Crimea.

In some parts of Ireland the people cannot procure food even for money, in consequence of the roads being blocked up with snow; in some parts as much as from twelve to twenty feet of it lies on the ground.

The following is the copy of a bill posted on the walls of a village in the vicinity of Cupar:—"A lecture on total abstinence will be delivered in the *open air*, and a collection will be made at the *door* to defray the expenses."

A company has undertaken to convey the mails from Calais to Dover, and from Dover to Calais, every day for fifteen years, commencing on the first of next month, for 190,000*l.* a year.

The *Perseverance*, iron screw steam-ship, which turned over in the East Dock, at Woolwich, on Saturday, Jan. 20, was raised to nearly a perpendicular position on Saturday last.

In Tuscany seventy Mazzinists have been apprehended. In the Pontifical States several political arrests have likewise been made.

Khosrew Pacha, who died on the 2nd inst., was the oldest servant of the Turkish empire. He had served under five Sultans, and had filled in succession all the first posts in the State. He was very vain of having been born in the same year as Napoleon the Great, Chateaubriand, the Duke of Wellington, Marshal Soult, Mehemet Ali, and other remarkable men.

Upwards of 200 joiners are out on strike in Glasgow this week; the difference arising from an alteration in the number of daily hours of work.

THE PARIS UNIVERSAL EXHIBITION.

(From our Special Correspondent.)

PARIS, Thursday.

THE distribution of space will hardly please English exhibitors. England has not the place of honour: this prominence is given to the United States. On entering the building by the grand entrance the visitor at once advances into the American part of the Exhibition; to the right is that devoted to Great Britain; opposite Great Britain lies the French space, with the Great Hall between. In the Fine Art department discontent is certain to be felt, and, I fear, justly felt. Certain masters who pretend to the leadership of modern art have already made extravagant demands. The dignity of some of these gentlemen requires a distinct and separate room. Against such demands the humbler artists clamour loudly, and bewail the degenerate days of art, handed over to the tyranny of men high in place. Wonderful are the contrasts drawn between the number of pictures inscribed and the number admissible within the limited space. Still all the young artists of Paris are at work vigorously: models never had a more prosperous time, I should think. Yet even the excitement among artists is not equalled by that which reigns in the restaurants and hotels. Already the Dîner de l'Exposition is open for the suppers of the opera-maskers; already the Palais de l'Industrie is open upon the Boulevards, in the shape of a conspicuous tailoring establishment. All commercial enterprises point to the 1st of May next. People of a prudent turn have been lately trying to engage apartments beforehand; but they have found lodging-house keepers most extravagant in their ideas, and generally disinclined to pledge themselves. A shower of gold is to fall upon the Parisian capital during the approaching summer. Meanwhile it cannot be said that the Imperial Commissioners are very active. To endeavour to obtain information from them is a Quixotic expedition which people will rapidly abandon. In the building itself there appears to be no representative of the authorities at all. There is the old *concierge* still in his little sentry-box, and there are the little, low offices of the Company; but there is no appearance of business about the place; and the Commissioners meet—or ought to meet—in their offices near the Invalides! Let the earnest inquirer, who is not satisfied with the information he may obtain in the Exhibition building, direct his energetic steps towards the Rue Grenelle St. Germain; and the end of his journey will probably be complete disappointment. The Secretary will be absent, and, in his absence, Monsieur will perhaps have the kindness to call again. People will be seen to enter the office; wait half an hour; gossip with the *garçons de bureaux*; and, finally, give up all idea of meeting the gentleman who alone can satisfy their inquiries. While I was waiting, on one occasion, with two or three impatient people, an official amused our circle with an account of a workman from the *banlieue*, who had been to the office with a saucepan. He had neither applied for space nor passed through committees; but, having just heard that an Exhibition would be held, had started off with his newly-invented saucepan, as his contribution. His simplicity amused the officials exceedingly. It must have appeared almost madness to gentlemen accustomed to arrive at a result after having made their way through the mazes of infinite *bureaux*; but it is not clear that the workman had not a very sound idea of the manner in which public business might be managed. At any rate, the indirect ways by which the employés of a public department arrive at the simplest result are as notorious as they are detrimental to the vigorous conduct of business.

Paragraphs are beginning to promise the early arrival of goods from all parts of the world. I am certain that it will be in the interests of all foreign exhibitors to ensure the proper treatment of their goods by the appointment of watchful guardians over them. Unless some vigorous head be set to work here without loss of time, I am persuaded that the arrival of contributions will be marked by the utmost disorder. The scene that will take place, on the 15th of next month, at the doors of the art-galleries will be beyond all anticipation. There is hardly an artist in Paris who will not leave the painting of his *atelier* until the 14th promises, that he may have the opportunity of finally touching them. Imagine some thousands of excited artists, making a procession of cabs, loaded with pictures, across the Place de la Concorde! Some, however, must have caravans! There is the excited gentleman, for instance, who is engaged upon the colossal representation of the battle of Alma; and there are others equally great in the extent of surface they cover. It is believed that this Exhibition will do English art great good, raising it in the esteem of Continental nations. Our landscape paintings, particularly, will surprise the French, who are only now beginning to rival us in this department of art. The coast-scenes of Jeauron, with their wonderful atmospherical effects, and the charms of Rosa Bonheur's pencil, tend at the present moment to free French art from the classic fetters in which its Academy has endeavoured to array it. In a department which is rather scientific than artistic, but which requires for its perfect application the artist's eye and power—I allude to photography—the French will exhibit, I believe some wonderful productions. Of these, the Louvre photographs by Dolfus will be perhaps the most remarkable specimens.

There are vague reports about also of wonderful inventions to be included in the Exhibition Catalogue, but it would be dangerous to rely upon the unsupported promises of enthusiasts. I may, however, remark that the Company, in whose hands the Palace of Industry will remain, have aroused the hostility of the Parisian tradesmen, by assuming a right to sell the exclusive power of publishing drawings of their building. This right is about to be disputed by some eminent tradesmen, in consequence of prosecutions instituted by the Company. The importance of the question involved can hardly be overrated. If the right claimed by the Company be allowed, there is an end to illustration in France. No artist could make a drawing of a street without having obtained the permission of every proprietor owning property in the said street; views of Paris would become the property of the municipal authorities; and the artist's hand might be paralysed by the heavy claims of avaricious men upon its fruit. The question involved in the claim therefore justifies Susse and others in combining to bring it to a final issue. Should the legal verdict favour the Committee, the Imperial Government will, probably, in the obvious interest of art, rescind any statute which enables commercial men to oppress the painter. I may add here that, not frightened by the combination of Susse and others, the Company have lately announced that they have appointed their photographers. Seeing this spirit in the administration of an organisation specially designed to foster art and industry, foreigners will be wary in their approaches. They will be surprised and disappointed, moreover, to find such a spirit existing in the midst of a nation so generous as the French in all matters relating to art, science, or literature.

In my next communication, I shall fully describe the condition of the Exhibition building; and give the relative quantity of space allotted to each competing nation. W. B. J.

NATIONAL FREEHOLD LAND SOCIETY.—At the fifth annual meeting of the members of the National Freehold Land Society, held at the London Tavern last week, it was reported that the receipts during the past year amounted to £331,797 15s. 6d.—a sum considerably larger than that of any former year, and more by £20,000 than was received during the first three years of the society's existence. There were 21,688 shares taken up during the year, and the sales of land amount to £26,193 11s. 7d.

ILLUSTRATIONS FROM THE HISTORY OF THE MAID OF ORLEANS. (Dean and Son, Ludgate-hill.)—This is a series of *tableaux* from the wonderful story of "Joan of Arc," designed and etched by Miss Cecelia Macerone, a daughter of Colonel Macerone, well known in the world of invention and letters. The illustrations are twelve in number, ranging from the childhood of the Maid of Orleans to her death upon the pyre. The composition of the several groups is surprising for the age of the artist—we are assured not exceeding fourteen years. Altogether, this is a most interesting indication of early performance, as well as promise, in illustrative art.

CHESS.

TO CORRESPONDENTS.

J. GROVE, Birmingham. The title of the *brochure* with which you have favoured us is a misnomer. Instead of "Chess Made Easy," it would be more appropriate to call it work "Chess Made Difficult;" for he must indeed be a human being who could work the game from the meagre yet confused description of Mr. "Lord." As a sample of the author's mode of rendering Chess "easy," we give his concluding remarks on the Pawns. "When advanced across the board into any of the squares occupied at the commencement of the game by the enemy's King or Queen, or their Castles, Knights, and Bishops, they (the Pawns) may be replaced *by any of the Pieces previously lost*—which is called Queening the Pawn."

EVANGELIST.—In the position you give, were it to take have pieces and Pawns the first move law does not apply. Black may win as he can, and having two pieces superiority he ought to it easily.

VOX H. DE L.—Many thanks. Our letters crossed.

J. A. M.—We will endeavour to find the solutions you require.

J. Stonehouse, R. B., M. F. of C., F. T. Barry. They shall be examined.

R. B., Bennington. No one of the works mentioned has been translated into English, except a portion of "Calvi's Elementary Lessons."

ANDY.—They are neat, but very deficient in point and strategy.

Mr. F. L., Bedlington.—You may procure the Rules for Double Chess at Lenchars's in Piccadilly.

LEGOS.—We have no doubt the projected revision of the Laws of Chess will form a prominent topic of consideration at the forthcoming meeting at Leamington.

ONE OF THE ALLIES.—The proposed match by telegraph between Paris and London was unavoidably postponed, the Telegraph Company being unable to spare the means of communication.

F. H.—They shall be submitted to the authors of the Enquiries in question.

DELTA, Durham.—We shall be glad to hear something more of the Durham University Chess-club.

SOLUTIONS OF PROBLEM No. 573, by Ellen, Tarleton, Omicron, R. B., W. G., D. D., T. J., of Hawworth; J. Stonehouse; R. Lambert, are correct.

SOLUTIONS OF PROBLEM No. 574, by T. J., Sigma, L. L. D., Rugby-boy, J. A. M., W. G., Fersaldo, F. R. S., Medicus, T. W. P., Omega; M. F., of C.; E. H., Norwich; J. Stonehouse, Dereven, F. R., of Norwich, J. P. M., A. J., True Blue, Ernest, Novice, L. L., B. A., Cambridge, Alex. Pedagogue, Derwent, Admirer, S. S. L., Spectator, Harvard Man, Beddoe, Strickland, Mrs Pillsbo-by, L. M., W. C. C., Zeta, are correct. All others are wrong.

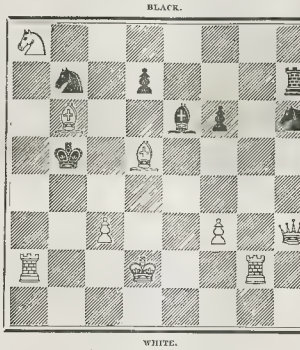
SOLUTION OF PROBLEM No. 574

WHITE.	BLACK.
1 R takes Kt	What he will.
2. R to Q 8th	
3 B mates.	

PROBLEM No. 575.

By Mr. J. G. C.

BLACK.



WHITE.

White to play, and mate in three moves.

A CHESS MANUSCRIPT.

(Continued from page 156.)

"In the sixteenth century they often played an opening still doubtless well known, but now neglected, and of which the name is even forgotten. I allude to the Giuoco *Pegatello*. The *solfatta* of this game consisted of the sacrifice of the K Kt, which they first played to his 5th, and then took the adverse K B Pawn. The King, after taking this Kt, found himself, after some moves, in a dangerous position. This opening may be found in Greco, but without the many ingenious variations which occur in the present MS. I take at hazard the following from among the many examples which the MS. contains. It will be seen that the chief variation is in the way Black plays his Q Kt at the 8th move. The old Italian and Spanish players, instead of retreating it to the King's 2nd sq., frequently marched it to his 6th, and endeavoured to establish a counter-attack.

(Pegatello di G.co. Domenico.)*

WHITE.	BLACK.	WHITE.	BLACK
1 P to K 4th	P to K 4th	8 Q Kt to Q B 3rd	Q Kt to his 5th,
2. K Kt to K B 3rd	Q Kt to Q B 3rd		menacing the
3 K B to Q B 4th	K Kt to K B 3rd		double check of
4. Kt to K Kt 5th	P to Q 4th		King and Rook
5 P takes P	K Kt takes P	9. P to Q R 3rd	Kt tks Q B P (ch)
	(a)	10 K to his B sq	Kt takes R
6. Kt takes K B P	K takes Kt	11. B takes Kt (ch)	K to Q 3rd
7. Q to K B 3rd (ch)	K to his 3rd	12. Kt to K 4th (ch)	K takes B
		13. Q to her 3rd (ch)	

White wins the Queen.

At the eleventh move Black may move his King to his 2nd, or to Q 2nd. If the first, White plays Q to K B 7th (ch), and mates next moves with the Kt. If the 2nd White checks with his Queen at K B 5th and wins in a few moves.

(Notes by the Editor.)

(a) The favourite defence now is—

		Or.	
5	Q Kt to Q R 4th	5	Q Kt to Q R 4th
6. B to Q Kt 5th (ch)	P to Q B 3rd	6. B to Q Kt 5th (ch)	P to Q B 3rd
7. P takes P	P takes P	7. P takes P	P takes P
8. Q to K B 3rd	Q to Q R 4th	8. Q to K B 3rd	Q to Q K. 3rd
&c., &c.		&c., &c.	

(Another Pegatello† of Giulio Cesare Polerno.)

WHITE.	BLACK.	WHITE.	BLACK.
1 P to K 4th	P to K 4th	12. Castles (on Q's side)	K R to K B sq
2 K Kt to K B 3rd	Q Kt to Q B 3rd	13 Q to K 4th	K R tks K P(b)
3 K B to Q B 4th	K Kt to K B 3rd	14 P takes K P	K B checks
4 Kt to K Kt 5th	P to Q 4th	15 K to Q Kt sq	K R to Q 7th
5 P takes P	K Kt takes P	16 P to K R 4th	R takes R (ch)
6. Kt takes K B P	K takes Kt	17. K takes R	B takes K P
7. Q to K B 3rd (ch)	K to his 3rd	18 K Kt takes Kt	P takes Kt
8 Q Kt to Q B 3rd	Q Kt to K 2nd	19 R takes P	Q to K Kt 4th
9. P to Q 4th	P to Q B 3rd (a)	20. R to Q 6th (double ch)	K to his 2nd
10. Q B to K Kt 5th	P to K R 3rd	21. R to K Kt 6th	
11. Q B takes Kt	K B takes B		

White must win.

Notes by the Editor

(a) In a note to this move, in the French magazine, it is observed that Black should now have played to K R 3rd, and that his not playing so is the fault of the *partie*. In Chess, as in greater things, doctors differ. The author of the English "Handbook" seems to think the one move as good or as bad as the other; and proceeds the following "variation," as the result of P to K R 3rd:—

9.	P to K R 3rd	13. B takes Kt	Kt takes B
10. Castles	P to Q B 3rd	14. Kt takes Kt	P takes Kt
11. K to R sq	P to K Kt 4th	15. R takes P (ch)	B to Q 3rd
12. R takes P (ch)	K to Q Sq (best)	16. P to Q 4th	

He dismisses the game at this point as in White's favour. But in the German "Handbook," which gives the same variation, Black is now said to have the advantage. We certainly should take White's game for choice. He has three pawns for his piece; and his adversary will find it extremely difficult to escape from his present exigency without further loss.

(b) Q to her 3rd, though laudable, to save the game, is better play than taking this Pawn.

"Unfortunately, I have neither sufficient skill nor patience to select judiciously from the games contained in the MS. I hope, however, that those I have extracted may possess sufficient interest to induce our leading players to analyse and modify this opening.

"For the sake of variety I shall now give an End-Game, which is taken from the last division, and forms, I think, a very neat and instructive Problem:—

WHITE.	BLACK.	WHITE.	BLACK.
K at his 4th	K at his 8th	R at K B 2nd	P at K B 6th

White is to Mate *without taking the Pawn*; for, in former times, a player was not allowed to deprive the adverse King of every man, and in the present case this interdiction augments the difficulty considerably, because the Pawn is near Queening." White has the first move."

* This is the opening known by us as the "Two Knights' Game."—EDITOR

† *The word* PEGATELLO, *though it presents an image somewhat vulgar, is not inapting in vigour and appropriateness. It signifies literally a piece of liver enveloped in a greasy skin; and the Italian poets have employed the expression figuratively, as applicable to a warrior surrounded by his enemies.*

THE COURT.

The Queen and the Prince Consort, with the Royal children, continue in the enjoyment of excellent health. Her Majesty has given dinner parties thrice during the week, and on several occasions, taking advantage of the severity of the weather, has enjoyed driving exercise in a sledge.

On Sunday the Queen and Prince Albert, with the Prince of Wales, the Princess Royal, Prince Alfred, and the Princess Alice, the ladies and gentlemen of the Court, and the domestic household, attended Divine service in the private chapel of Buckingham Palace. The Hon. and Very Rev. the Dean of Windsor officiated.

On Monday the Queen and Prince Albert, with the Princess Alice, drove out in a sledge. Lord Alfred Paget, with the Maids of Honour, followed in a second sledge. The Prince Consort, in the course of the day, visited the Wellington Barracks, for the purpose of seeing some of the wounded men of the Grenadier Guards (of which regiment his Royal Highness is Colonel) lately returned from the Crimea. In the evening the Queen had a dinner party, the company at which included his Serene Highness Prince Nicholas of Nassau, the Portuguese Minister (the Count de Lavradio), Earl Grey, Viscount and Viscountess Canning, Lord and Lady Wodehouse, and Lord Seaton.

On Tuesday Prince Albert presided at a meeting of the Council for the Management of the Duchy of Cornwall, held at the office in St. James's-square. In the evening the Queen and his Royal Highness honoured the Olympic Theatre with their presence.

On Wednesday the Queen and the Prince drove out in a sledge. The Princess Royal, Prince Arthur, with the Hon. Mary Seymour and the Equerry in Waiting, were out in a second sledge during the afternoon. In the evening the Royal dinner party included Viscount and Viscountess Palmerston, Lord Panmure, Lady Alfred Paget, Lady Elizabeth De Ros, and the Right Hon. the Speaker.

A party of invalids, twenty six in number, of the Coldstream Regiment of Guards, wounded at Alma, Inkerman, and during the siege operations before Sebastopol were inspected by the Queen on Thursday afternoon, in Buckingham Palace. The Queen was accompanied by the Duchess of Cambridge and the Princess Mary, and also by the elder Princes of the Royal Family. The Princesses, with the Ladies and Gentlemen in Waiting, also witnessed the inspection. The men were afterwards provided with an excellent dinner at the Palace, and then conveyed back to the hospital highly gratified at the interest evinced by her Majesty. His Royal Highness Prince Albert skated in the garden of Buckingham Palace during the day, attended by the Gentlemen in Waiting. In the evening her Majesty and Prince Albert, accompanied by the Princess Royal and Prince Alfred, honoured the Haymarket Theatre with their presence.

Last evening (Friday) the Queen gave a grand dinner to his Royal Highness the Duke of Cambridge, General Sir De Lacy Evans, the Earl of Cardigan, and a distinguished party.

The Countess Colloredo had an afternoon reception at Chandos-house on Thursday.

NATIONAL SPORTS.

ALTHOUGH some of the more sanguine of the sporting world try to persuade themselves that the frost is beginning to "give" a little, the skaters and the drivers quite expect that their delicious carnival will last for another week. Her Majesty has been foremost in the ranks of the latter, and her three sleighs, with their grey ponies, cause no small interest as they slip merrily on their tinkling way through the Parks and down the quiet cross roads between Fulham and Kensington.

In Lincolnshire, perhaps, more than any other county, skating is entered into with real enthusiasm. The combatants in the great matches are drawn against each other, grey hound fashion; and such is the excitement among them, that, even with a thermometer ten degrees below freezing-point, very little raiment is left on the last few couples as they near the goal. The sight is so unique and exhilarating on a great prize day, that, if the Londoners had the slightest idea of it, a Great Northern train, running special to the scene of action, would never lack a freight.

While hound and horn have been silent the gunners have had no small amount of sport. A bittern has fallen before one of them; and an eagle, measuring eight feet from tip to tip of his wings, before another. The latter was a "prize bird" in more senses than one, as he had been seen in the neighbourhood of Balcombe, Sussex, for some weeks, and boded such dire evils to the lambs that a spirited price was set on his head. The Solent is said to be alive with wild-fowl; and a flock of at least 5000 wild geese were observed by the men of Kent "sailing with supreme dominion through the azure fields of air," far out of the reach of any minié.

The steeplechase and race-meeting fixtures for the ensuing week are so huddled together that it is almost hopeless to reduce them to anything like order. Wednesday must also open with the Cambridge Hunt claim Monday, and Bishop Stortford Tuesday. The Grand National at Liverpool, with four flat races to boot, stands for Wednesday; and, we believe, Lincoln Meeting for Thursday and Friday. Westbury and Derby are not yet refixed, to our knowledge. Harrow is fixed for Friday; and Oundle for Friday and Saturday. The Croix de Berny Steeplechase has thirty-four nominations, among whom are British Yeoman, Miss Moubray, and Peter Simple; and thirty-three have accepted in the Doncaster one.

Of Coursing we must also speak with the same uncertainty. The Southern (Cork) and Southminster are at present on the cards for Tuesday; The Waterloo, for Tuesday and Thursday; Hordley (Salop), for Thursday; Huggate, for Friday; and the Border Meeting, for Friday and Saturday. The Newmarket Champion was originally adjourned till Monday and the following days.

SALVATOR ROSA.

SALVATOR ROSA was a man of original and versatile genius—painter, musician, poet, and humorist, he carved out his own road to eminence, and has left behind him a name entitled to classic fame. He was the son of a surveyor residing near Naples, and was originally intended for the law; but, showing a fixed bent for the Arts, was suffered to adopt them as a profession.

Salvator had a versatile pencil—painting History, Genre, Landscape, and Portrait, in turn. History was his ambition, but in Landscape and Portraiture lay his chief strength. Not that he was unsuccessful in the higher walks, in which the large picture in the Church Della Morte, at Viterbo, and that of "The Conspiracy of Catiline" are fair examples. In the latter he displays considerable dramatic effect, "with figures taken immediately from the excitable Neapolitan life, dressed in old Roman costume," as Kugler somewhat disparagingly remarks. His portraits are highly characteristic, and his landscape style entirely his own—except in rare instances after his visit to Florence, where he appears, slightly however, to betray the influence of Claude. Where he was most at home was in the wild mountain pass, the bold sea-coast, the forest's inmost gloom, and the lonely, inhospitable defile; the suggestive terrors of which he heightened by the introduction of representations of robber life, and battles, with strange groupings of brigands, ferocious-looking soldiers, and now and then a hermit. Salvator is said in early life to have spent some time amongst the brigands of Calabria; and hence his predilection for these subjects. The truthfulness of their conception, and the vigour of treatment thrown into them, are unmistakable, and not easily to be rivalled. The artist's colouring, also, though sometimes purposely cold, is never monotonous nor inharmonious; his skies are remarkable for aerial truth.

Fuseli, in his lectures, is very hard upon Salvator; harder, we think, than the case warranted. But Fuseli could not understand nor tolerate anything out of the Grand Michaelangeolesque line; and Salvator was of the *naturalisti* class; and moreover, in his satires he had the audacity to criticise "the nudities of Michael Angelo and the anachronisms of Raphael." Whatever may be said of the contrast between "the classic regularity of Poussin," and the "wildness of Salvator," and wherever we might be inclined to give our preference, Fuseli's onslaught against the Neapolitan artist, in his own studio, is a little too strong:

Terrific and grand in his conception of inanimate nature, he was reduced to attempt the delineation of the human form, his inability of exhibiting her impassioned, or in the dignity of character; his line is vulgar; his magic visions, less founded on principles of terror than on mythologic trash and caprice, are to the probable combinations of nature what the paroxysms of a fever are to the flights of a vigorous fancy. Though so much extolled, and so assiduously imitated, the bandits are a medley made up of starveling models, shreds, and bits of armour from his lumber-room, brushed into notice by a daring pencil.

Fuseli, we think, should have been the last man to talk of the paroxysms of a feverish imagination, "brushed into notice by a daring pencil"—but let that pass. Though not an artist of the highest walk, Salvator Rosa was an original artist of undoubted power, and will always command attention and admiration.

The picture which we engrave is one of two very admirable specimens in the Bridgewater Gallery. It is of small dimensions, 3 ft. 6 in. wide, by 2 ft. high, and remarkable as being one of the most highly-finished and brilliantly-painted works of the artist. It was purchased by the late Duke of Bridgewater from the Prasin Collection,

F I N E A R T S.

"A LANDSCAPE."—BY SALVATOR ROSA.—IN THE BRIDGEWATER GALLERY.

where it was known under the name "Les Augures," or the "Soothsayers." The scene is on the bold rocky coast in Calabria, a small arm of the sea stretching across the picture; in the middle distance is a small fishing town, where a group of men are seen busily employed tarring a boat. Another group of spirited figures, two of whom have the bearing of men in authority, enriches the foreground

BRITISH INSTITUTION.

(THIRD NOTICE.)

Among the contributors to the Institution whose pictures are hung not altogether according to the real merits of the works they have sent, we would mention Mr. F. Underhill, the painter of two pictures called "Free Sittings," and "The Wheatsheaf." The former is of that class of composition which has grown somewhat into fashion of late among painters, the latter (engraved in our present Number) has long been a favourite subject with them, and will continue to be so long as Nature is looked to with a reverential eye by students anxious to transfer her beauties to their canvas.

If we turn over the Catalogues of our Exhibitions of Pictures from the first London Exhibition to the present time—a period now nearly approaching to a century—we shall see how fruitful a subject the wheatsheaf has been to English artists. We could reckon up some sixty pictures on the subject of Boaz and Ruth; and a still greater number on the subject of Palemon and Lavinia; but none that we can call to mind that have taken a place among the best engravings, or among pictures of known reputation. Nor is Mr. Underhill's "Wheatsheaf," with its many merits, likely to take rank among pictures destined to live. He has not been ambitious. He has sought to render a frequent incident in English autumnal life, and has given us a wheat-field peopled with children, gracefully playing among its newly-cut corn. We are not altogether pleased with the colouring which Mr Underhill has adopted, but he has, at any rate, given us a picture which few will look on without pleasure.

Mr. G. Smith who contributes two small pictures of merit, and, better still, of promise—is a young artist of whom we wish to speak well. Mr. Sheepshanks, the great collector, was, it is said, the first person attracted by his merits, and the first, we believe, who gave him a commission. Mr Sheepshanks has evidently advised him to give his nights and days to the study of Mulready; and Mr. Smith has followed his patron's advice with so much fidelity that we can trace Mulready's care and finish, and some of his peculiarities, in the two pictures he has sent to the British Institution. Having caught many of the characteristic excellences of one great painter, Mr. Smith will now, we hope, desert his first love and take on with a new. We would recommend the early works of Wilkie to his attention, as a change for the better—above all, we would suggest the careful study of Teniers as a part of an artist's education which Mr. Smith would do wrong to neglect. Wilkie painted whenever he could with a Teniers by his side, and caught inspiration from the crisp touches and pearly tints of the illustrious Dutchman. Mr. Smith, in imitation of Webster, Goodall, and others, is too apt to smooth over his flesh, and to be content with an appearance of enamel: Teniers, in his best pictures, leaves the sharp but harmonious touches of a master's brush.

THE WHEATSHEAF."—PAINTED BY F. UNDERHILL.—FROM THE EXHIBITION OF THE BRITISH INSTITUTION.

SIR SAMUEL BIGNOLD, M.P FOR NORWICH.—FROM A DUST BY G. G. ADAMS.

NEW MEMBERS OF THE HOUSE OF COMMONS.

Every interval between Session and Session sees changes in the representation of the kind to furnish fresh occupation to the indefatigable Mr. Dod. Out of nearly 700 members of the House of Commons, death and the ordinary chances of human life take annual tribute. At the present epoch, when so many of the flower of our aristocracy are in active service, and when the benches of either House of Parliament are shadowed with the sorrow of those who have lost relatives in battle, it was to be expected that the vacancies would be more numerous, and that there would be a more than ordinary substitution of new for old members. Nor is the list of new elections complete even while we write; so that we profess only to give a notice (and that a very brief one) of some of the gentlemen who have been returned to Parliament since the close of the last Session of Parliament.

The most important of these, whether as regards the constituency represented, or the personal merit of the representative, is Lord Ebrington; of whom we have so recently given a memoir that it is unnecessary to repeat here the incidents of his life.

An honourable gentleman, who will figure on the list of "useful" members, is Sir Samuel Bignold, the newly-elected member for Norwich. A native of that city, where the greater part of his life has been spent, he has acquired the respect, the confidence, and even the affection of his fellow citizens, in spite of the strong political feelings by which they are agitated. Sir Samuel Bignold was born in 1791, third and youngest son of Thomas Bignold, Esq., founder of two of the largest and most prosperous insurance-offices in the country. Sir Samuel succeeded his father in his appointments, and has presided over the Fire-office since the year 1814, and over the Life-office since 1818. The former society now ensures upwards of 63 millions of property, and the latter between 5 and 6 millions on lives. Sir Samuel is likewise an active supporter of most of the public institutions in the eastern district of the kingdom. He is also an active member of the Corporation; having served the office of Sheriff in 1830, and of Mayor in 1832, 1843, and 1853. Sir Samuel received the honour of knighthood on the occasion of presenting an address to her Majesty on the 3rd of May, 1853, on the subject of the Russian War. When the exigencies of the British army in the Crimea led the Government to effect the railway contract with Mr. Peto, which obliged that gentleman to resign his seat, Sir Samuel Bignold was put forward as a candidate likely to unite the suffrages of the moderate Liberals with those of the Conservatives. He is himself a Conservative, but of a very moderate and Liberal cast; and he is a general favourite with his fellow-citizens, from the probity of his conduct and the amenity of his manners. His competitor had not a chance. His long experience as a man of affairs, and the clear good sense by which he is characterised, will give him much weight in the House as a practical man on practical questions. The accompanying Portrait is from a bust by Mr G. G. Adams, of Sloane-street.

Mr. John Henry Gurney, the new member for King's Lynn, is also a Norwich man, where he is a banker. He married the daughter of Richard Hanbury Gurney, of Thickthorn, who was for so many years member for Norwich. He is a magistrate for the city and county, and exactly one of those men who, under a healthy operation of the representative system, would be elected for the locality in which they are known, to the exclusion of mere strangers, speculating upon political excitement and the lower order of electioneering arts. It is creditable to these two Norfolk towns—Norwich and King's Lynn—that they should have selected such men as Mr Gurney and Sir Samuel Bignold. Mr. Gurney is the son of the late Joseph John Gurney, of Earlham Hall, Norwich, by a daughter of John Birkbeck, Esq., of King's Lynn. He is a Liberal, of the moderate school; favourable to Parliamentary Reform, but not to the Ballot; opposed to Maynooth, but ready to admit the Jews to Parliament: he also objects to unnecessary Government interference with the education of the people. Mr Gurney was born in 1819.

MR. J. H. GURNEY, M.P. FOR KING'S LYNN.

CURIOSITIES FROM THE COLLECTION OF THE LATE MR. T. WINDUS, F.S.A.

THE WINDUS COLLECTION.

Such of our readers as are familiar with the pleasant suburban locality of Stamford-hill may recollect that on the east side is a building in the Tudor style. Mr. Paterson, "the Murray" of other days, records the edifice as "Gothic Hall"—a designation sufficiently exact for popular identification among the villas of Stamford-hill. This building was the Museum of the late Mr. Thomas Windus, one of the oldest Fellows of the Society of Antiquaries; and here he assembled a large collection of "Curiosities," principally of Mediæval art; which, in consequence of the recent death of the proprietor, are to be dispersed by auction next week, by Messrs. Christie and Manson, the sale commencing on the 27th inst.

As the Collection comprised several articles of historic interest, and may hereafter be lost sight of, we have illustrated a few specimens. It is very rich in rare gems, intaglios, fine ivory and other carvings, bronzes, chasings, extremely rare illuminated missals (among which is the celebrated Blandford Missal), coins and medals, Etruscan pottery, and other miscellaneous antiquities. There are also some fine drawings by old masters.

Foremost in the Collection, as well as in the group of objects we have engraved, stands the renowned Shakspearean relic of the Boar's Head. It is carved in boxwood, and set in a frame formed of two tusks, mounted in silver. An inscription is pricked at the back, which reads thus: "Wm. Broke: Landlord of the Bore's Hedde Estchepe A.D. 1566." This interesting work was found in removing a mound in Whitechapel formed from the rubbish of the Great Fire.

Next in point of rarity and value must be ranked the very celebrated bust of Augustus, sculptured by Dioscorides, the head and neck of which are formed of one magnificent opal; the drapery of silver, beautifully chased; the Imperial toga, fastened with a head of Jupiter, of emerald sculptured in cameo. This has been generally considered one of the finest and most unique gems in Europe, and originally came from the Jennings Collection. A representation of it will be found in our Engraving. The small Ring in our Illustration is set with an extremely fine Greek cameo of a head of Aspasia, as Minerva, in a helmet ornamented with masks of Pericles, Socrates, and Alcibiades, onyx of four strata. The other ring represented is a massive Papal one of brass gilt, chased with the arms of Pope Pius II., of the Piccolomini family, with Papal tiara, set with a large white topaz, and the emblems of the Evangelists.

In the centre of the Group is a very beautiful oval Ivory Casket, carved in high relief, with a frieze of Tritons and Sea Nymphs, and surmounted with a Cupid on a Dolphin, the whole mounted and lined with silver gilt. It was presented to Lord Hawke, on his victory in 1759, and purchased at the sale of his effects. There is also an extremely fine carved Ivory Tankard, of extraordinary size, by Fiamingo, which our space would not allow us to engrave.

In the background of our Engraving will be seen a fine Ivory Tankard carved with a combat of marine deities, &c., and on the bottom of which is engraved the arms of Matthias Corvinus, King of Hungary, anno 1460. There is also represented a highly-interesting relic, consisting of an oval box made from the wood of the Boscobel oak, with a chasing of Charles in the Oak on the lid, and an inscription round the sides. It is mounted and lined with silver.

REVERSE OF THE SHAKSPEAREAN "BORE'S HEAD" RELIC.

Turkish Patriotism.—The example of our ladies at home has borne fruit in the harems of Pera and Stamboul. The prison rooms of these sacred recesses are plying every nerve and needle in making up *kharkas* (warm jackets) for the Turkish troops in the Crimea. Patriotism has all at once become fashionable and rose-water drunches, who never before knew severer toil than the thrumming of a guitar or the patting of a pacha's cheek, are now working "over-time" at all the drudgeries of slop-work. A public subscription, also on the model of our English one, though of course comparatively trifling in the amount of its proceeds, has procured the funds for the purchase of the materials which are being thus rapidly made up by the paris of the capital, and in a short time the soldiers of the Sultan will be fortified against the Crimean climate as well as the best of their infidel fellow warriors. After this, who will say that there is not hope of the Turks—when the influence of Western example penetrates within even the jealously-guarded and conservative recesses of the harem, and bears fruit in such praiseworthy and womanly results?—*Letter from Constantinople, Feb.* 1.

MUSIC.

MR. ELLA has begun his admirable chamber concerts, which he calls "Musical Winter Evenings." The first took place at Willis's Rooms on Thursday week, and (notwithstanding the severe weather) attracted a very fashionable and musical audience, who enjoyed one of the most classical and refined entertainments that can be imagined. The programme included Mozart's quartet in B flat; a new quintet by Pauer, for the pianoforte and wind instruments; Mendelssohn's quartet in E flat; and Stephen Heller's "Pensées Fugitives," for the piano and violin. The performers were, first and second violins, Ernst and Gr. ßie, viola, Hill; violoncello, Piatti; oboe, Barret; clarinet, Lazarus; bassoon, Snelling; and pianoforte, Pauer. The new quintet by this eminent pianist was admirably played by himself and the above-named wind-instrument performers, and did great honour to his talents as a composer.

OUR young countrywoman, Miss Arabella Goddard, is making quite a "triumphal progress" throughout Germany. She has already appeared in most of the principal cities of that musical land, and has everywhere been received (with if possible) even greater favour than in England; the highest musical celebrities joining in the general enthusiasm. Two young Englishwomen, too, are gaining distinction as vocalists in Italy. They are sisters, named Alexander, and are pupils of the late lamented Signor Arnaldi, and Signora Enrichetta Alessandri. At Padua in particular, where the public is exceedingly critical, they have achieved immense success; and have also gathered laurels at Milan, Turin, and other places in the north of Italy. One sister is a soprano, the other a contralto

MR. ALLCROFT, as is his wont, availing himself of the closing of the theatres on Ash-Wednesday, gave his annual "monster concert" on that evening at the Lyceum. It was of the usual dimensions, consisting of an immense melange, sung and played by a host of performers. There was no novelty of any interest—there never is on such occasions. Mr. Sims Reeves (who was the great object of attraction), Madame Anna Thillon, Miss Rebecca Isaacs, Madame F. Lablache, Miss Poole, Mr. Stabbach, and other vocalists, sang their most favourite and popular songs and ballads; and since everybody well knows were played by Ernst, Lazarus, Richardson, the Distins, and other eminent instrumentalists. The theatre, notwithstanding the weather, was a bumper; and, the audience not being fastidious, every thing went off to the satisfaction of everybody.

THE Welsh and other provincial papers speak highly of the musical genius of Miss E. L. Williams (a native of the principality), who is about to make her appearance before a London audience as that rarest of vocalists—a true English song and ballad singer To a voice of great compass, clearness, and sweetness Miss Williams adds much force of expression, tenderness, and taste. In her gayer songs she displays considerable archness humour and point; she articulates clearly, so that the listener has the advantage of hearing words as well as sounds. Some philosopher asserted that "the use of language was to disguise the thoughts;" and, from the inarticulate utterance of many of our popular vocalists, one might be led to conjecture that the use of singing was to stifle the words —

Though music be
Almost a passion of my being, still
The verse, like to a silver swan, should float
Upon the stream of melody; and clear
Its graceful presence should be borne along,
Defined and perfect in its loveliness
Note following note, like wave succeeding wave,
Should lift its theme still higher than itself;
Not drown it in the tide of harmony,
Lose it in billows of ambitious sounds,
As thou dost now.

Trespassing sweet I own;
But there were *words as sweet*, the which I lost,
And should be glad to hear

Miss Williams adds the charm of verbal distinctness to her other eminent qualifications; and we trust that her merit in this, and in other respects, may be warmly appreciated and encouraged by lovers of music and the public generally.

THE THEATRES.

ST. JAMES'S. The management of Mrs. Seymour continues, and the theatre reopened on Saturday last. Neither the pieces nor performers, however, are of great pretensions, and we must accept both as composing an humble endeavour, intended perhaps to serve as prologue to higher efforts. "Clarisse," a drama in two acts, relates to the heroine and a foster-sister exchanging names, by which one obtains a long-lost father, and the other a scapegrace husband. The interest was of the slightest, and the acting merely *amateurish*; in two words, utterly inadequate. Mr. C. Reade has also contributed another version of "The Tragedy Queen," under the title of "Art." The celebrated *Mrs. Oldfield*, personated by Mrs. Seymour herself, is the heroine. This lively actress most laudably emulates the merit of Helen Faucit and Rachel, by refusing to the part and performs it with infinite spirit and vivacity; nor is she wanting either in the requisite grace and dignity which pertain to the more tragic *dénouement* of the brief but peculiar and strongly interesting action. The house was numerously attended.

ADELPHI.—The drama of "Janet Pride" amply merits the success which it appears to be achieving. The first prologue is, in particular, highly exciting, and brings out some of the finest points of the acting of Madame Celeste. The patient forbearance of the suffering wife with an habitually drunken husband is, in the earliest scenes, unostentatiously but effectively portrayed: the interest grows when we find her voluntarily dying of starvation, in order to save up the means of procuring safety for her child. The agony of the mother at the prospect of parting with her infant could not be more powerfully delineated; and when, at length, she finds herself compelled to surrender her little delight to the mysterious custody of the Foundling Hospital, her pain, distress, and hesitation, her sorrow, her despair, and madness, were successively depicted with a potency and a passion in which the whole resources of the acting art were combined. Nature was rent, and the heart broke, when the poor victim sinks beneath the snow in the streets of Paris, at midnight; sounds of revelry approach, and with them her criminal husband—the cause of her misery and death. The act-drop never fell on a *tableau* more striking and instructive.

ROYAL PANOPTICON, LEICESTER-SQUARE. The directors of the Panopticon—anxious to procure for their undertaking the stamp of literary and scientific approbation, as a recommendation to the general public—issued cards for a conversazione on Saturday evening, at which the various features of the establishment were to be submitted to the criticism of the leading members of various learned societies, and the more prominent representatives of the literary world. Notwithstanding the almost unparalleled severity of the weather, the invitations was very generally responded to, and the handsome saloons rapidly filled at an early hour with a fashionable and discriminating company. During the evening some very interesting experiments were given by Dr. Noad with the great electrical machine, one of the finest in England; a series of dissolving views of the events in the Crimea were exhibited; and the powers of the oxy-hydrogen microscope were brought to bear on a series of entomological objects. the wonderful structure of which, when thus magnified and illuminated, excited the greatest wonder and applause. A selection of music was performed by Mr. Best on the grand organ, and the evening's entertainments concluded with the play of the humorous and characteristic features in the exhibition which must be seen to be duly appreciated. (We engraved the fountain in No. 711 of our Journal.) The extraordinary force of the jet, rising to the very roof of the lofty building, and the beautiful effect of the prismatic colours, render this fountain one of the most attractive sights in London, and are in themselves sufficient to attract crowded audiences; but when to this hydraulic wonder is added the magnificent organ playing of Mr. Best, the attractions of the complete and scientific apparatus, the optical and astronomical lectures, and, lastly, the unique beauty of the building itself, it is hardly too much to augur for the Panopticon a long and successful career. The following days and evening of Saturday evening expressed their entire satisfaction with everything that had been provided for their entertainment. The programme of the conversazione is, we understand, to form the staple of the Easter entertainments, and will, no doubt, prove attractive to that large section of the public who disapprove of the lighter and more trivial class of public amusements at that particular season

TESTIMONIAL TO MR. LILWALL, THE HON. SECRETARY OF THE METROPOLITAN EARLY CLOSING ASSOCIATION.—The services which Mr. Lilwall has rendered the Early Closing movement are too well known to require comment. To his zealous and indefatigable exertions, aided by the advocacy of the press, the pulpit, and public sympathy, is to be ascribed the success of this philanthropic cause. A deserved tribute was paid to this gentleman last week by the presentation of a handsome silver tea-service, bearing the following inscription:—"Presented to J. LILWALL, Esq., Hon. Secretary to the Early Closing Association, by the Warehousemen of the city of London, as a mark of their esteem and grateful recognition of his successful efforts in the abridgment of the hours of business generally; and especially for his having so essentially contributed to the closing of wholesale drapery warehouses on Saturday afternoon."

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

As has been the case for many weeks past, the Consol Market, since we last wrote, has been in a very inactive—tho-gh not to say unsatisfactory—state. Flu.tuations in particular have been numerous; but they have resulted more from a few speculative purchases and sales than from actual money business. The principal feature in favour of prices being supported is the extremely small supplies of stock at the banks of jobbers; and, as large accounts open and have not been entered into, very few fears are entertained as to the next settlement. Against an improved price, has been the resignation of a portion of the Ministry, and the pretty generally received impression that Mr Gladstone's successor—whoever he may be—will deem it necessary to apply to the Stock Exchange for a loan. The abundance of money, and the extreme difficulty in finding profitable employment for it, are certainly in favour of a loan upon easy terms. From the state of the Government Exchequer, and from the necessity that exists of devising some means to meet the heavy expenses of the war, some efforts in the direction of a loan appear very probable, and we need scarcely say that it would be met with much favour in the City.

On Monday there was some firmness in Consols, and prices were well supported. The Three per Cents were done at 91¾, 90¾, to 91¼; the Three per Cents Reduced, 91¼ ⅜; the New Three per Cents, 91¼ ⅜ ⅛; Consols for Account, 90⅞ to 91¼; Long Annuities, 1860, 4 5-16; Ditto, 1859, 4⅛; India Stock, 259; India Bonds, 1st., Exchequer-bills, 6s to 9s.; Ditto, Small, 6s to 9s.; Ditto, Advertised, 4s to 8s. prem.; Exchequer Bonds, 99⅛; Very little business took place in the quotations on Tuesday. The Three per Cents Reduced were 91¼ ⅜ the Three per Cent Consols, 91 to 91⅛; the New Three per Cents, 91⅛ to 91⅜; and the New Two-and-a-Half per Cents, 76½; Long Annuities, 1860, 4 5-16; Ditto, 1859, 4 3-16; Bank Stock, 214; India Stock, 259; India Bonds, 12s.; Exchequer Bills, 6s to 9s. prem.; Ditto Advertised, 4s. prem.; Exchequer Bonds, 1859, 99⅛. There were very few transactions reported on Wednesday, yet very little change took place in the quotations. The Three per Cents Reduced were 91¼ ⅜; the Three per Cent Consols, 91¼ to 90⅞; the New Three per Cents, 91⅛ ⅜; Consols for Account, 90⅞ to 91⅛; Long Annuities 4 5-16 ⅜. India Bonds, 12s.; Exchequer Bills, 8s.; Ditto, advertised, 7s. to 4s. prem. On Thursday the Consol Market was steady. The Three per Cents were 90⅞ to 91⅛; the Three per Cents Reduced, 90⅞ to 91⅜; and the New Three per Cents, 91⅜ ⅝. Long Annuities, 4 5-16. India Bonds, 12s.; Exchequer Bills, 6s to 9s. prem.

We have scarcely any imports of bullion to notice, and the shipments have been limited. The Stock in the Bank of England is now about £12,600,000. Money for commercial purposes has been in good request, and upon fair good bills.

In the Foreign House no change of moment has taken place. Brazilian Five per Cents have been done at 100⅛; Ditto, New Four-and-a-Half per Cents, 1852, 90¼; Ditto, Six per Cents, 1855, 100⅛; Buenos Ayres Six per Cents, 71. Russian Five per Cents, 99; Turkish Bonds, 7s; French Three per Cents, 66f. 50c.; French Scrip, Three per Cent, 2f. prem.; Dutch Two-and-a-Half per Cents, 61⅜; Ditto Four per Cents, 95; Three per Cents, 39¾; Spanish New Deferred, 17¾; Spanish Commutes Certificate of Coupon, not funded, 4¾ per cent; Danish Three per Cents, 82; Peruvian Three per Cents, 49; Sardinian Five per Cents, 88; Belgian Four-and-a-Half per Cents, 97¼.

Joint Stock Bank Shares have been very firm, and prices have ruled steady. Australasian have marked 82; English, Scottish, and Australian Chartered, 1⅞; London Chartered of Australia, 20; London and Westminster, 40¾; Ditto 5l. ex div.; Provincial of Ireland, 4¾; Union of Australia, 34; Ditto, New, 6¾. Miscellaneous Securities have been fixt, yet we have very little change to notice in them value: Canada Six per Cent Bonds have realised 107⅞; Crystal Palace, 2⅝ ex div.; General Screw Steam Shipping Company, 16; East and West India Docks, 113¾; Netherlands Land, 4¾; Peninsular and Oriental Steam, 54; Royal Mail Steam, 66. In Canal Shares, scarcely any sales have taken place:—Ashton and Oldham, 197½, ex div.; Birmingham, 91¾, ex div.; Coventry, 209, Derby, 84; Grand Surrey, 48; Leicester, 59; Loughborough, 575; Neath, 150; Oxford, 110; Regent's, 18¾, ex div.; Rochdale, 90; Trent and Mersey, 420; Shrewsbury, 235; Worcester and Birmingham, 25. Waterworks Shares have been dull: Berlin, 7; Grand Junction, 66 to 68, ex div.; Ditto, New, 21, ex div.; Kent, 75½; Southwark and Vauxhall, 88¾; New River Company, 55; West Middlesex, 95, ex div. Gaslight and Coke Companies Shares have sold as follows: British Provincial, 20; Commercial, 8⅝, ex div.; Equitable, 20; European, 12; Great Central, 10⅝; Imperial Continental Gas Association, 15 ex div.; Independent, 50; Phœnix, 2⅞; Ratcliff, 70; United General, 19; Westminster Chartered. Telegraphic Companies Shares have been in very moderate request:—Globe, 12⅝ ex div.; Ditto, York, and Warcester, 20; Shorrland, 3⅜; Ditto, Life, 18; Law Life, 56; London, 29½; Pelican, 46; Sun Life, 87½; Victoria Life, 5⅝. Bridge Shares have been dull: Hungerford, 12; Vauxhall, 20; Waterloo, 4¼; Ditto, Old Annuities of £23, 21; Ditto, New of £27, 28.

The cancellation of the private and joint-stock banks in England and Wales during the four weeks ending the 20th ult. was £7,045,755, being an increase of £1,262,960 when compared with the previous month. These banks are now below their fixed issues £887.

Railway Shares have met a dull market, yet jobbers have not shown any anxiety to give way. The dividends declared upon most lines for the last half-year differ but little from those in the corresponding period. The following are the official closing prices on Thursday:

ORDINARY SHARES AND STOCKS.—Eastern Counties, 11⅜; Eastern Union 8 Stock, 20½; East Lancashire, 74; Great Northern A Stock, 71; Great Western, 66¾; Lancashire and Yorkshire, 74⅜; London and Brighton, 97½; London and North-Western, 101; Ditto, 10 Shares, 8l. and 9l., 9¾; London and Blackwall, 8⅜; Manchester, Sheffield, and Lincolnshire, 23; Midland, 69⅜; Ditto, Birmingham and Derby, 41⅜; North British, 23½; North-Eastern, Berwick, 74; Ditto G.N.E. Purchase, 74; Ditto, York, 80¾; North Staffordshire, 12¾; South Wales, 29⅝; Taff Vale, 210 Shares, 12¾.

LINES LEASED AT FIXED RENTALS.—East Lincolnshire Six per Cent, 135; Hull and Selby, 120; London and Greenwich, 23; London, Tilbury and Southend, 11; Wear Valley, 31½.

PREFERENCE SHARES.—Aberdeen, 100; Caledonian, £10, 9⅝. Eastern Counties (No. 2), 2¾; Ditto, Consolidated Five per Cent, 9⅝; Ditto, Eastern Four-and-a-Half per Cent, 97; Ditto, Birmingham, 10; Ditto, Chester, 1 per Cent, 16½; Ditto, Birmingham Stock, 70; London and North-Western, Five per Cent, 111; Midland, Bristol, and Birmingham, Six per Cent, 153; Ditto, Worcester, and Wolverhampton, Six per Cent, 112; South Devon, 11, Scotch, and Darlington, Five per Cent, 15½.

FOREIGN.—Antwerp and Rotterdam, 6¾; East Indian Guaranteed Five per Cent, 21½; Great Luxembourg Shares, 2⅜; Ditto, Obligations, 2⅜; Great Western of Canada, 96, Hamilton and Toronto, 19; Ditto, Six per Cent, 99

Mining Shares have been tolerably steady:—St. John del Rey have been done at 29; Cobre Copper, 47⅛; Copiago, 18; English and Australian Copper, 1¼; Linares, 7⅛

Friday Evening

The Consol Market has ruled dull to-day, and prices have had a downward tendency. The Three per Cents have marked 91 to 91¼; the Three per Cents Reduced, 91¼ ⅜; and the New Three per Cents, 91⅛ ¼. Exchequer bills, 6s. to 9s. premium. In Foreign Bonds and Railway Shares very little has been doing

THE MARKETS.

CORN EXCHANGE.—Friday.—In water-carriage no addition has been made to our supply of English wheat during the week. The land-carriage trade is at a stand-still, scarcely any wheat of home produce came to hand. As no supply was on sale no business was done, and prices were nominally the same as on Monday. There was no alteration shown in harvest in foreign wheat in granary In the quotations no change took place Barley was excessively heavy, and there was scarcely any demand for malt. Oats, beans, peas, and flour continued

ARRIVALS.—English: barley, 500; malt, 20; oats, 2310; flour, 1010. Irish: oats, 1050 Foreign: wheat (190) barley, 280; oats, 505

English.—Wheat, Essex and Kent red, 62s to 70s; ditto white, 68s. to 84s; Norfolk and Suffolk red, 66s to 74s; ditto white 72s. to 78s; rye, 43s. to 44s.; grinding barley, 29s. to 31s.; Stilling ditto, 29s. to 32s.; malting ditto, 36s. to 40s.; Lincoln and Norfolk malt, 56s. to 58s.; brown ditto, 48s to 50s.; Kingston and Ware, 58s to 70s. Devonshire, 51s. to 52s.; Yorkshire and Lincolnshire feed oats, 24s to 25s.; potato ditto, 25s to 26s.; Youghal and Cork black, 22s. to 23s.; ditto white, 23s to 25s.; Sligo ditto, 24s to 25s.; grey peas, 36s to 37s. maple, 39s to 42s.; white 39s to 43s., boilers 42s. to 44s per quarter. Town made flour, 65s. to 72s.; Suffolk, Essex, and Kent sacks, 37s. to 39s. per 280 lbs.

American, 36s to 44s. per barrel

Irish.—Limerick and Waterford have sold at full quotations In all other articles very little is passing

Danzig, English, and Prussian.—Wheat, 70s to 72s. Mediterranean and Odessa, 66s to 70s. Hempseed 50s. to 52s. per quarter Coriander, 17s. to 18s. per cwt. Brown Mustard seed, 12s. to 14s.; white ditto, 8s. to 10s. Tares, 11s. to 12s. per bushel. English rapeseed, 42l. to 43l. per last of 10 quarters. Linseed, 54s. to 56s. per quarter. Hay, during January, sold to 2l 12s per ton; rape cakes, 5l 5s to 5l 10s. per ton Canary, 44s to 50s per quarter

Seeds.—The prices of seeds remain the same as given in No. 711, p. 144, of household duties, 9d. to 9s 6d per 4 lb loaf

Imported Provisions.—Wheat, 70s 3d; barley, 31s. 9d; oats, 22s. 7d.; rye, 45s 1d; beans, 43s. 1d.; peas, 41s 9d

The Six Weeks' Average.—Wheat, 74s 4d.; barley, 33s. 9d.; oats, 23s. 6d.; rye, 41s. 0d.; beans 47s 2d.; peas, 42s. 9d.

English Grain sold per week.—Wheat, 83,873 bush.; 79,759 cwt.; oats, 19,328 yrs. 10s.; 2,501 bush.; peas, 1739 quarters

Teas.—The public sales held this week have gone off slowly, on former terms. Privately, very little business is done, and the quotations are barely supported. Common souchi 10½d. to 10½d per lb.

Sugars.—Our market has ruled heavy this week. In the quotations, however, no material change has taken place Barbadoes has sold at 32s. to 38s.; Mauritius, 34s. 6d to 39s 6d. Bengal, 27s. 6d to 28s. Madras, 26s. to 27s. 6d. Refined goods move off very slowly, and scarcely any business is doing. Refined goods move off sawly, at 42s. 6d to 43s. 6d. per cwt. The total imports into the metropolis are from 1st Jan. to 14th inst. 687,596 cwts. of brownfield ditto, 9d. to 9s 6d per 4 lb loaf

Imported Provisions.—Wheat, 70s 3d; barley, 31s. 9d; oats, 22s. 7d.; rye, 45s 1d; beans, 43s. 1d.; peas, 41s 9d

The Six Weeks' Average.—Wheat, 74s 4d.; barley, 33s. 9d.; oats, 23s. 6d.; rye, 41s. 0d.; beans 47s 2d.; peas, 42s. 9d.

English Grain sold per week.—Wheat, 83,873 bush.; 79,759 cwt.; oats, 19,328 yrs. 10s.; 2,501 bush.; peas, 1739 quarters

Teas.—The public sales held this week have gone off slowly, on former terms. Privately, very little business is done, and the quotations are barely supported. Common souchi 10½d. to 10½d per lb.

Sugars.—Our market has ruled heavy this week. In the quotations, however, no material change has taken place Barbadoes has sold at 32s. to 38s.; Mauritius, 34s. 6d to 39s 6d. Bengal, 27s. 6d to 28s. Madras, 26s. to 27s. 6d. Refined goods move off very slowly, at 42s. 6d to 43s. 6d. per cwt. The total imports into the metropolis are from 1st Jan. to 14th inst. 687,596 cwts. of brownfield ditto, 9d. to 9s 6d per 4 lb loaf

Coffee.—All kinds have moved off slowly, on former terms Good ord native has realised 56s. to 60s. 6d. per cwt.

Hay and Straw.—Meadow hay, £3 10s. to £5; clover, ditto, £3 10s. to £5 5s.; and straw, £1 5s. to £1 10s. per load

Wool. The public sales are progressing steadily, yet prices show a decline, compared with the previous series of 5d. per lb

Potatoes. The supplies are very moderate; nevertheless the trade is heavy, at prices varying from 80s. to 120s. per ton

Liquor (Friday).—There is a good inquiry for fine hops—the show of which is very limited at full prices. All other kinds move off slowly, on former terms. At public sale Mr. Gaskins (in behalf of Mr. Gaskins) changed hands at £7 17s. 6d. per cwt. The imports it's week are 307 bales from New York New Mid and East Kent Pockets, 4l to 5l; Sussex Pockets, 3l 10s to 4l 10s; New Yearlings, 2l 10s to 3l; Old ditto, 4l to 5l 10s; Weald of Kent ditto, 5l 10s to 6l 10s; Yearlings, 2l 5s to 3l 5s; Sussex (in bond), 2l 5s. to 3l 5s per cwt.

Coals (Friday).—Walker Primrose, 18s. 6d.; West Hartley (Braces, 18s.; Stewart's, 18s.; Haswell, 18s.; Eden Main, 20s. 6d.; Hartlepool, 22s.; Hetton Hall, 23s.; South Kelton, 23s.

Cattle (Friday).—The supply of beasts was on offer in to-day's market of fair average quality, for all sorts ruled very heavily, at Monday's decline in quotations. Prime Scots, 4s. 6d. per 8 lb The number of sheep was small, but quite equal to the demand In prices no change took place The few calves on sale changed hands at 4s. per 8 lb. Pigs were very dull, but not on lower Milch cows with calf, 2l to 2l 15s. each, sold at from 21l to 21l 10s. each.

PER 8 LBS. TO SINK THE OFFAL.—Coarse and inferior beasts, 3s 8d to 3s. 8d.; second quality ditto, 3s. 8d. to 4s. 0d.; prime large oxen 4s. 2d to 4s 4d.; prime Scots 4s., 4s 6d to 4s. 8d.; coarse and inferior sheep, 3s. 4d. to 3s. 8d.; second quality ditto, 3s. 10d to 4s. 2d.; prime coarse woolled sheep, 4s 4d to 4s. 8d.; prime Southdown ditto, 4s. 10d to 5s. 0d large coarse calves, 4s. 2d. to 4s. 8d.; prime small ditto, 4s 10d to 5s. 4d.; large hogs, 3s. 6d to 4s. 0d.; neat small porkers, 4s. 2d to 4s. 4d.; suckling calves, 5s to 6s.; and quarter old store pigs, 20s to 27s each. Total supply: beasts, 850; oxen, 36; sheep, 3000; calves, 92; pigs, 330. Foreign: beasts, 39; calves 0

Newgate and Leadenhall (Friday).—The trade ruled very dull, and prices were barely supported

Per 8 lbs. by the carcase:—Inferior beef, 3s. 0d to 3s. 4d.; middling ditto, 3s 6d to 4s. 0d prime large ditto 3s 10d to 4s 0d; ditto small ditto, 4s 0d to 4s 2d Large pork, 3s 6d. to 3s. 8d; inferior mutton, 3s. 2d to 3s. 6d.; middling ditto, 3s. 8d to 4s 0d; prime ditto, 4s 0d to 4s. 8d; veal, 3s. 10d to 4s. 10d; small pork, 4s. 0d. to 4s. 6d.

T., the original maker of a 25-guinea Pianoforte, has, as he has devoted to all branches of the manufacture, obtained the highest reputation throughout the universe for his Minuto Pianos, unequalled in durability and delicacy of touch, more especially for their excellency in standing in tune in the various climates of every quarter of the world, numerous testimonials and missionary Cases packed for abroad for £3 10s. extra.—H. Tolkien's Manufactory, 27, 28, and 29, King William-street, London-bridge.

MUSICAL-BOX REPOSITORY, 32, Ludgate-street (opposite Everington's), London.—WALES and MCCULLOCH are direct importers of Nicole Frères celebrated MUSICAL-BOXES, playing, with unrivalled brilliancy of tone, the best Overtures, Operatic, and Sacred Music. Large tunes, four airs, 24 in. six, £6 6s.; eight, £8; twelve airs, £12 12s. Small-boxes, two tunes, 16s 6d. and 25s.; three, 30s.; four tunes, 40s. Catalogue of tunes, &c., gratis, and post-free, on application.

MUSICAL BOX DEPOT, 54, Cornhill, London, for the sale of SWISS MUSICAL INSTRUMENTS, made by the celebrated Messrs. NICOLE FRÈRES, of Geneva. Large sizes, four airs, 14 in. long, £3 3s.; six airs, 16 in. long, £5 5s.; eight airs, 20 in. long, £8; and 12 airs, 30 in long, £12 12s., containing several additional tunes, including Rossini's overtures, with drum, tambourine, and operatic airs, together with hymns, and other sacred music. Also a variety of other musical snuff-boxes, from 10s. 6d. to £5 5s. each, and 14s., three tunes, 30s.; and four tunes, 40s. each. Printed lists of tunes, &c., may be had gratis and post free on application.

IF YOU REQUIRE FAMILY ARMS, send Name and County to the HERALDIC OFFICE. Fee, search and sketch, 2s. 6d.; or stamps. Arms painted, quartered, &c.—Observe, 21, HALL, Heraldic Office, Great Turnstile, Lincoln's-inn

SILBERBERG'S celebrated BREMEN CIGARS, per lb 10s. per lb., the finest imported Havannah Cigars, from 24s. to 32s. per lb.; at LOUIS SILBERBERG'S, 194, Fleet-street, and 19, St. Martin's-le-Grand. The trade supplied on liberal terms. Goods sent to all parts on receipt of Post-office order.

THE PEN SUPERSEDED. MARK your LINEN with the most cheap, permanent and best method of Marking Linen, Silk, or Books, is with the NEW PATENT SILVER PLATES. With these Plates a Child can produce the marked in a minute. Any person can use them. Initial Plate, 1s.; Name, 2s.; Crest, 3s. Numbers per set, 2s. Sent free (with Directions) on receipt of the Amount in Postage Stamps. Patentee, T. CULLETON, 2, Long-acre, Covent-garden, Martin's-lane.

BY HER MAJESTY'S ROYAL LETTERS PATENT for a valuable and extraordinary improvement in the most powerful and brilliant TELESCOPES, Camp, Race-course, Opera, and Reconnoitering Glasses, to know the distance, at Messrs and B. SOLOMONS', opticians, 39, Albemarle-street, Piccadilly, opposite the Royal Hotel (persons of small means have their power thus some, from 5s to 6 inches with an extra eye-piece will show distinctly the satellites, Jupiter's belts, and Saturn's ring, the mountains in the moon, and the double stars. With the same Telescopes can be seen a person's countenance at the distance and a half in six miles (fixed), and six miles from sixteen to twenty-five miles, for the waistcoat pocket, and are of larger size and power, with increasing power. The Royal Exhibition, 1851. Valuable very small powerful waistcoat-pocket glass, the size of a walnut, by which a person can be seen and known one mile and a half distant; country scenery and ships are clearly seen at twelve to fourteen miles. They are invaluable for shooting deerstalking, sporting, gentlemen, gentlemen, gamekeepers, and ladies. Newly-invented spectacle lenses of the greatest transparent power. The valuable discovery that the vision is strengthened, but when becoming impaired is preserved and strengthened, and very aged persons can read the finest print at the most distance minute occupation—can see with these lenses of a much less magnifying power—and they do not require the frequent changes to the dangerous effects of further powerful assistance.

DEAFNESS. The ORGANIC VIBRATOR, an extraordinarily powerful, small, newly-invented instrument, for deafness, entirely different from all others, to surpass anything of the kind that has been, or probably ever can be, produced. Being of the same colour as the skin, it is not perceptible. It can the deaf persons to hear distinctly at church and at public assemblies. The unpleasant sensation of singing noises in the ears is entirely removed, and it affords all the assistance that could possibly be desired. 30, Albemarle-street, Piccadilly. Observe, opposite the York Hotel

INDIA, CHINA, AUSTRALIA, and CAPE of GOOD HOPE.—W. O. YOUNG will dispatch the following fast-sailing A 1 Clipper SHIPS at the dates named as under:—

Ships	Tons.	Commanders.	Destination.	Docks.	To Sail.
Mary Ann	498	Wm. M'Guire	Calcutta	London	Mar 5
Telliott

[illegible] ...ssion, and the high ground which overlooks it on the south-ea[illegible] ...ion, present a series of such abrupt and sinuous undulations, that it is [illegible] ...t even with a perfect glass and a commanding position to gain a [illegible] ...t idea of them. Hitherto we have had no plan which faithfully [illegible] ...ndered the peculiar features of the place, and there was much conse[illegible] ...nent difficulty for those interested in the operations of the Allies in finding the correct positions of divisions, regiments, roads, batteries, and works. The Plan which appears in our present Number will be found to represent with the utmost accuracy the "lie" of the ground on the plateau, or elevated plain which forms the strength of the Allied positions, and the precipitous valley which intersect it in a south-westerly direction, carrying to the bay or harbour the various streamlets that rise in their higher part.

The perfect nature of the British encampment may be judged by a glance at the steep and rugged precipices which arrest the progress of an enemy advancing from the plain of the Tchernaya; the French army of observation alone, without the numerous redoubts and works which line the brow of those precipices, might, it would seem, have sufficed to check any attempt in that quarter. The Russians knew this and have never ventured even within long gunshot of that portion of the ground, but in the northern extremity of the chain of heights the forces were intersected by convenient ravines, through which the Russians, at the battle of Inkerman, were enabled to penetrate without being seen, and with the aid of that thick fog which proved so fatal to our pickets. Notwithstanding the remonstrances of Sir De Lacy Evans, the valley of the ravines was left into the vale of the Tchernaya on each side of the Ravine des Zouaves had been left unprotected, which permitted the enemy to train his guns against us on the very spot where now stands the great redoubt on the right of the Second Division; and the carelessness of the parties in the Right Attack, near Five-gun Battery, in not reporting the noise of carts which they heard in the night, gave the Russians time to place a powerful battery which, firing from the high ground north of the Second Division, placed our troops as they came into action, under the murderous effect of a cross fire, which ceased but once for half an hour during the whole day

The position of the several divisions to the southward of Inkerman on the plains how it happened that the Third and Fourth took little part in the action that others. The Sailors' Camp, which during many months was perched at the top of the ravine leading down to Gordon's Battery, was moved lately, and will be found close to the Artillery Park behind the Third Division. It was at the quarry, in front of the same division, that Lord Raglan had his field head quarters, his permanent residence being a comfortable house at Khutor. There were not wanting invidious comparisons, even at this early period of the attack, between the warmth and pleasantness of Lord Raglan's residence and the tents at no great distance, which were the head quarters of General Canrobert. But Canrobert is young and can bear hard weather better than our old leader

The position of Chapman's, Gordon's, and the Lancaster Batteries shows how distant we were from the town at the commencement of the fire on the 17th of October. Yet, though distant, they were effective works, by their strength, their height, and breadth. Had the works of the French been as well constructed at the first moment, we might possibly have a different aspect of affairs from that which meets the eye at this time. The failure of our attacks, however, rendered fresh works necessary, and the plan before us gives an idea of the zig-zag lines made with so much labour by our men to approach the enemy's position. The French, it will be seen by the forwardness of their third parallel, are within 300 yards of the walls, and within 150 of the salient angle of one of the works

Formidable as the outer system of the Russian defence appears, it is evident that they anticipate being forced in it. It has been impossible to ascertain the form of the works which make up the *ensemble* of the so called line of defence, but it has been difficult to trace the general "lie" of those works, which are likely to be remarkably strong and formidable on the side of the French attack. It is, believed, however, that the co-operation of our fleet, whose blockading positions we have marked, will counterbalance these difficulties.

The southern side of Sebastopol being once taken from the enemy, it will be observed that the Allies will have some considerable labour still on hand to reduce the northern, of which the batteries are heavily armed, whilst the approach to them is rendered additionally hazardous by the earthen lines which the Russians have made to the north of the road leading to Mackenzie's Farm. The difficulty of getting up to these positions, as well as to those which are occupied by the batteries of Inkerman rules, is almost as great for us as would be the attack by the Russians of the steep chain opposite to it, which the French corps, under General Bosquet, defends

The superiority of the French in organisation and numbers has enabled them to make a macadamised road from Kamiesch to the siege works. On the English side no such road is visible, and carts and drays and mules' hoofs follow a track, and nothing else. The navvies, however, are at work, and we may have to add shortly a line of railway to our plan of Sebastopol.

A PICKET ADVENTURE.—As I was riding out towards the Camp this afternoon, with an officer of the Scots Fusilier Guards, I witnessed a refreshing instance of the vigilance of our men. We rode out along the valley towards the Woronzoff road, and kept a little too much to our right, so that, happening to look towards the top of a mound about 300 yards distant, the first thing that struck us was the head of a Cossack as he crouched down to escape observation, in the hope that with the aid of his picket he could make us prisoners. It was just as well, as bullet had not struck either of us, but a rule, and I keeping towards the stragglers passing within range. A little in advance of, and keeping towards the mound on our right, was an English soldier; behind him, at the distance of some 400 yards, another soldier was seen running, shouting at the top of his voice, with his frock at the present. The first man kept walking rapidly on. The other halted and fired, and the ball knocked the earth up close to him. Still the fellow kept on, and we were riding up to see what he was, when a Henry Dragoon started at a gallop from the cavalry picket-house, and rode between the man and the hill. The foot soldier turned back at once with the Dragoon, who marched him to the picket-house, and then went up to the other man. We found this poor fellow was a sentry from the hill in front of the Highland Battery, and that he had run all the distance after the other man, whom he had seen edging up towards the Russian lines along the plain. He returned at once to his post, and in a quarter of an hour more he was on his bleak beat, pacing up and down, with his eye fixed on the enemy. It was amusing to watch the Cossack all the time. Nothing could be seen of him for the bone but his little bullet head every now and then, evidently imagined that by lying close he might get one of us; but he was disappointed, for the Dragoon requested us to go more to the left, and thus debarred us the path which many of the men of the regiments of the right of the Camp had been in the habit of taking for a long time past. It is now known, however, as the Cossacks seem to have picked their videttes somewhat closer than they have been for several past. *Letter from the Camp, Feb. 5.*

RED TAPE IN THE CRIMEA.—A friend who came down yesterday from Balaclava gives me sad accounts of the continued hardships of our troops. The severe weather had to some degree lessened the intensity of the cold, and had somewhat mitigated the temperature was still at a painfully low point, and there was almost none. Many of the wooden huts which are, and have been, for some time, lying on the beach at Balaclava for want of means to transport them to the Camp, are being broken up by the soldiers and used as firewood —a better use than that they should continue to lie there doing good to nobody. This, however, only reminds me of another instance of commissariat neglect, which is even more to be wondered at and less excused than many others with which the public are already familiar. From the mouth of the Bosphorus, round along the southern shores of the Black Sea, to Trebizond and Batoum—a distance of some 500 miles—there are constantly great flows in the very shore, offering facilities for the procurement of any amount of firewood which the Allied armies could require. The sailing distance is not much above a week or ten days thence to the Crimea; and why, with hundreds of transports at our disposal, we have not drawn supplies of fuel from these vast woods so conveniently at hand, I profess myself unable to understand. This source of supply was suggested to the Commissary General many weeks ago, but without any result following from the turned back at once with the Dragoon, who marched him to the picket-house, and then went up to the other man. We found this poor fellow was a sentry from the hill in front of the Highland Battery, and that he had run all the distance after the other man, whom he had seen edging up towards the Russian lines along the plain. He returned at once to his post, and in a quarter of an hour more he was on his bleak beat, pacing up and down, with his eye fixed on the enemy. It was amusing to watch the Cossack all the time. Nothing could be seen of him for the bone but his little bullet head every now and then, evidently imagined that by lying close he might get one of us; but he was disappointed, for the Dragoon requested us to go more to the left, and thus debarred us the path which many of the men of the regiments of the right of the Camp had been in the habit of taking for a long time past. It is now known, however, as the Cossacks seem to have picked their videttes somewhat closer than they have been for several past. *Letter from the Camp, Feb. 5.*

IMPERIAL PARLIAMENT

HOUSE OF LORDS - MONDAY.

Lord ELLENBOROUGH moved for the production of the papers relating to the constitution of the Land Transport Corps. After a short discussion, the motion was agreed to. Some other business was then disposed of, and their Lordships adjourned at an early hour.

HOUSE OF COMMONS MONDAY.

LONDON DOCK BILLS.

A debate of some length arose upon the three London Dock Bills which stood for a second reading, but which were thrown out on a division by a very large majority.

BEER ACT.

In answer to Mr. H. Berkeley, Sir G. GREY said, it was not his intention to propose the repeal of the Act passed last session for the regulation of the sale of beer on the Sabbath

LORD LUCAN

In reply to Mr. C. Berkeley, Lord PALMERSTON said, it was true that Lord Lucan was recalled some time ago from the Crimea, in consequence of differences between him and the Commander-in-Chief—differences which rendered it quite impossible for them to act together

THE NEW ADMINISTRATION

On the motion that the Speaker leave the chair upon the order of the day for going into Committee on the Army Estimates,

Mr. LAYARD rose to call attention to the present state of affairs, and to the actual condition of the country, which was supposed, he said, to be standing almost upon the brink of ruin. He advanced first to the composition of the Government, to which was to be confided the conduct of one of the greatest wars ever entrusted to any Administration. That Government was almost identical with that late Cabinet, the beloved Parliament therefore to consider what the late Government had done, and how far those members who remained were worthy of its confidence. After glancing at the alleged extortions, the conduct of the administration in regard to their diplomacy, the blockade of the Russian ports, and the Foreign Enlistment Act, he observed that what was proposed by the present Ministry was not to repeal all incompetent measures, but to send out a series of commissions; what the country wanted, however, was not commissions, but men, or a man, fit for the emergency. Among the present measures enumerated by Lord Palmerston nothing was said about the Horse Guards; yet, unless the Government were determined to remodel that branch of the military administration, and to do away with the system of favouritism, the country would not be satisfied. After referring to the great victories which our Indian army had achieved, Mr. Layard proceeded to condemn the system which neglected to employ the Governors who had governed those colonies—

Through a mean and paltry jealousy you do not employ men who have saved your Colonies, who have maintained the dignity of the country, and who have safely extricated some of the most difficult questions of foreign policy. And why not? Because they are not in the service of the Crown, but take pay from the East India Company. And for that reason you pass by men who have led their troops to glory, who have seen great campaigns, and you send out men of seventy years of age, who have never seen war, and who scarcely know how to put a regiment through its evolutions, but who happen to possess Parliamentary influence or family connection (Hear, hear). Such a state of things in the present age is monstrous—it is intolerable. I am told that by making this course I am pulling down the aristocracy. That is not the case. I want to save the aristocracy. What did one of the ablest men in the country write three months ago? He wrote, "If this army perishes, depend upon it it will be the greatest blow ever struck at the aristocracy of this country." This country is coming to the opinion that you have sacrificed yourselves because you will not allow men of talent to come between you and your nobility, and you have passed a vote that will take more trouble to allay than you may think. It is said by some that the *Times* is raising this cry, as if there was magic in Printing-house-square. Perhaps Charles I. said that the revolution which he thought was ruining the country was the result of the Puritan preachers, not seeing that it was the opinion which made the Puritan preachers. It was not Rousseau or Voltaire who made the general feeling of the French people, but it was the general feeling of the French people that made them; and so now, it is not the *Times* which is causing the public indignation of the people of this country, but it is the public indignation of the people of this country which has forced the *Times* to adopt the course it has adopted. No, Sir, it is not the *Times* which has caused this indignation, it is the misgovernment and mismanagement which have taken place (Cheers). To you think that the *Times* would be powerful as it is if it not your views—if it deceived the country as you deceive the country? If you want to have the position the *Times* has—if you want to be backed by the people of this country—do as the *Times* has done. Come forward boldly, and tell us what you yourselves think of the present state of affairs, not what you want others to think (Cheers). There are many other points upon which I should like to hear the opinion of the Government. We are told—and I believe the statement to be well founded—that a noble Lord the leader of the late Government in this House is going on a mission to Vienna; that he is to be joined there by the noble Lord Castlereagh, but is he going upon the same principles as Lord Castlereagh? Are the "four points" to be the basis of negotiations? Do the Government now take the same views they took a few weeks ago, when an address was filled by Lord Castlereagh, whether the country was going to engage in any prolonged hostilities—whether it was proposed to engage on our behalf oppressed nationalities—whether the Circassians would be assisted by us or not—he might, in short, have conveyed some notion to the House of his foreign policy. That question is of such immense importance that we have a right to ask for plain and distinct information upon these points

After a few remarks on the French Alliance, and the importance of acting in such a manner as to secure the co-operation of the French people, he referred to Lord Palmerston's highly responsible position as Premier.—

I hope the noble Lord will not consider me impertinent if I refer to his present position. No man had more general sympathy throughout England, or throughout Europe, than the noble Lord. As I have previously told him, I have heard his name repeated in every variety of form throughout Europe, that name was a tragic name, as the representative of the great principles of liberty. That reputation was so bright that even the betrayed Sicilians of 1848 could not tarnish it; it had passed through every storm in this House unblemished, and the wish of this House was ready to support the noble Lord when he took office, because it was felt that in a moment of national difficulty he had undertaken a national task. Will the people of England now be satisfied with what has been done? It is the nature of the English people to be patient and long-suffering; but the time comes when public feeling, with the force of a torrent, causes itself to be heard. It was so in the case of Roman Catholic Emancipation, of the Reform Bill, and of Free Trade. You may [illegible] ...the people, and the lake is still, but [illegible] ...arise, and, unless [illegible] ...

[illegible] ...ve to be one which [illegible] ...with [illegible] ...and pain by those who sit in this House (Hear). The country is not satisfied (Hear). The country, irrespective of men's qualifications at this moment, I believe, want to see what power is to be exercised by a Government new ("Hear," and a laugh). They don't wish to see the same parties in power over and over again (Hear, hear). I have no doubt that a Cavendish in the Cabinet is a very important thing, but the public think one of 20,000 lives like a Cavendish, a Cavendish. (Cheers). It will not do. The people of England want thorough and complete reform; and, if the noble Lord had thought of the wishes of Englishmen, we should have had a Cabinet that might have inspired confidence to the House of Commons with some confidence for its support. I entreat the noble Lord to reflect once more, for his own sake and for the sake of the people of this country. By coming to the House he would at least meet with courtesy and all support. By turning from it he will save his own reputation and save this great nation (Loud cheers).

Lord Palmerston and General Peel rose together to address the House, but his Lordship, in compliance with some calls for the gallant officer, gave way.

General PEEL said, he had voted against Mr. Roebuck's motion, not because he denied the evils in question, or because he did not regret the motion as a vote of non-confidence in the Government, but because he had no confidence in the tribunal, believing a Committee of that House to be the worst tribunal for trying such a question. He had the army, and he admitted that those sufferings had been aggravated by want of management on the part of those who had the administration of the details. But these mistakes had not been confined to the British troops, he had pretty good ground for asserting that the sick and wounded in the camp of the Russians amounted to 70,000 men. Those sufferings arose from physical causes in the power of no man to control. After a brief reply in some parts to the Marquess of Clanricarde's speech, Lord Palmerston added that he was satisfied that the people of this country looked more deeply into these things than that gentleman supposed, and that when they saw a Government established in consequence of the failure of two attempts, they would feel that men who undertook the conduct of affairs in such circumstances from a sense of public duty, and from honourable motives, were entitled to the confidence of being actuated by a desire to perform a public duty, and that they would give their support to such men, not forcing themselves upon the country, but coming forward at an emergency. The Government threw themselves upon the generosity of Parliament and the country, and he was convinced that, with their support, in spite of trifling reverses, they would carry the contest to a successful issue, and whether by an honourable peace now, or by force of arms hereafter, place the country upon a proud footing of security.

THE ARMY ESTIMATES.

After some remarks by Mr. J. Phillimore, Mr. Warner, and Major Reid, the House went into Committee of Supply upon the Army Estimates.

Mr. F. PEEL prefaced the details of the Estimates by remarking that they differed from the Estimates of the current year—first, in the increased number of men—namely, 178,648 (exclusive of the troops in India) of the foreign corps, and the embodied militia) which exceeded the vote of last year by 36,800 men; secondly, in the large augmentation of many of the services heretofore included in the Estimates, and in the creation of new departments, such as the Land Transport Corps. He then stated the manner in which the increase was distributed over the entire Army, and explained the various items. The charge for the effective land forces was £7,353,600—an excess over the charge of last year of £2,640,000. The charge for the embodied militia was £2,812,000. The total amount for effective and non-effective services was £13,781,600. The total strength of the Army for the consolidation of artillery, engineers, and the troops in India, was 193,305 of all ranks, of which number 14,550 consisted of foreigners; and this formed the first vote submitted to the Committee; the discussion of which, embracing various matters connected with the prosecution of the war, occupied the rest of the evening.

Lord PALMERSTON, in the course of a general reply to objections, vindicated the policy of the Government in the conduct of hostilities; their main object being, he observed, to cripple the Russian power in the Black Sea, where alone an effectual blow could be struck, leaving the land frontier of Turkey to the protection of Austria. He stated, likewise, as the reason why the Government had not hitherto succeeded in putting the Foreign Enlistment Act in operation, that the language used in the debates in Parliament had created such a feeling of indignation throughout the Continent, that persons who had been prepared to take letters of service in Germany had thrown them up, declaring that they would have no more to do with a service in which there appeared to be, he added, they arose not from want of supplies, but from want of arrangements for conveying to the men and horses the things sent out for them; these deficiencies would be remedied by the new Government.

Mr. WILSON gave explanations respecting the coffee sent to the Crimea, in reply to some severe remarks by Colonel North.

The vote, the amount for the year of which was £7,353,804, having been agreed to, the Chairman was ordered to report progress.

NEWSPAPER-STAMP RESOLUTIONS.

The House then went into Committee on the Newspaper, &c., Postage and Stamp Duties, when

The CHANCELLOR of the EXCHEQUER moved the following resolutions:—"That it is expedient to repeal the exemption of newspapers from postage-duty, and to charge on newspapers and printed books and papers transmitted by the post a rate of postage not exceeding 1d. for every four ounces in weight, and for any fractional part of four ounces;" and "That it is expedient to alter and amend the laws relating to the stamp-duties on newspapers, the printing and publishing of newspapers, and registration, and giving securities in connection therewith, and the regulation of the duties of postage on printed papers," which were agreed to.

The report of the Committee of Supply was brought up and agreed to. The Consolidated Fund Bill was read a second time

HOUSE OF LORDS.—TUESDAY.

ARMY SERVICE ACT AMENDMENT BILL.

On the motion that the Army Service Act Amendment Bill should be read a second time, the Earl of ELLENBOROUGH entered into an elaborate criticism on the regulations, the amount of recruits, which he estimated at 60,000 men. He argued that an efficient army could only be maintained upon the basis of a complete and full militia, and he recommended the exercise of coercion to obtain the requisite number. The noble Earl then referred to the war in Asia, and gave it as his opinion that, as the interests and safety of India were at stake, the Government of that country should send an army to act on the frontier of Turkey and Georgia.

The Earl of HARROWBY, while concurring in the views laid down by the noble Earl, wished to inquire whether the Government were or were not prepared to appeal to the patriotism of the Poles?

Lord PANMURE reviewed the criticism of the noble Earl, and expressed his belief that the Government would be able to obtain the requisite number of recruits. As to the Indian army, he observed, he could not give a pledge upon that subject until he had communicated with the Governor-General of India.

The Earl of MALMESBURY and Earl GREY drew attention to the ill effects of having enrolled the militia under one Act of Parliament and embodying them under another. A prejudice had thereby been done to the service, and the men themselves had been unfairly dealt with.

After some conversation the bill was read a second and then a third time, and was passed.

HOUSE OF COMMONS.—TUESDAY.

TENANT RIGHT.

Mr. Serjeant SHEE brought forward his annual measure on the subject of tenant right in Ireland, which, he said, was similar to the one introduced by Lord Lucan's government last year, but which they had not persisted in passing through the House. The bill provides compensation for improving tenants, and to consolidate and amend the laws relating to leasing powers in Ireland

Sir J. YOUNG commended the forbearance and moderation of the hon. and learned member in bringing forward a measure differing in so few particulars from the bills he had himself introduced last session. Under these circumstances, he should certainly offer no opposition to the introduction of the measure.

Leave was given accordingly to introduce the bill.

Mr. DUNLOP obtained leave to bring in a Bill to Facilitate the Erection of Dwelling-houses for the Working Classes in Scotland.

Mr. J. G. PHILLIMORE obtained leave to bring a Bill for the Appointment of Public Prosecutors.

PROMOTIONS IN THE ARMY.

At the request of Lord Palmerston, Lord Goderich postponed his motion on this subject till the last of March.

TRADE WITH RUSSIA.

Mr. COLLIER called attention to the conditions of the trade formerly and still carried on between this country and Russia. The staple commerce of that empire consisted chiefly of raw produce, and when the war commenced, it was believed that it would inflict a heavier injury upon our enemy by stopping his trade even than by our efforts in the field. The result had disappointed our hopes in both directions. As far as the commercial attack on Russia was concerned, it had failed altogether. Ten millions of British money had been paid in gold within the last twelvemonths for Russian produce; and the result, that pulse of the Russian commerce, which had fallen to one on the first outbreak of war, had since risen to par. The fact was that no effectual blockade had ever been established, nor could now be said to exist over the Russian ports in the Black Sea. Documents, which he had in his possession, would clearly proved that the exports from Russia had increased rather than diminished since the beginning of the war. For the omission to establish a blockade in the Black Sea he considered the Government accountable, and challenged an explanation of their neglect. In the Baltic, a blockade had indeed been maintained by sea; but its effect was evaded by a system of land-carriage, carried on through Prussia. This state of things, he contended, was disgraceful. We should either render our blockade effectual or abandon it altogether. Recommending the former alternative, he urged the necessity of stopping the transit trade through the Prussian territory, and argued on the question of international law, that this trade was of a character which belligerent nations were entitled to regard, if necessary, in order to compel neutral powers to abandon, declaring that a practical stoppage of his trade would seriously cripple the resources of the Czar, and was worth the efforts and sacrifices which might be required to accomplish it. Mr. Collier pointed out some of the means whereby that result would be brought about. The damage to our own trade and manufactures by the loss of Russian commodities would, he believed, be insignificant. He concluded by moving for a return of the Russian exports from Archangel to this country during 1854.

Mr. MITCHELL adduced a multitude of facts and details corroborating the statements submitted by Mr. Collier.

Mr. CARDWELL said, the Government had no objection to give the papers moved for. With regard to the general question, the Government had refused to entertain Mr. Collier's proposal because they believed that a practical stoppage of his trade would have inflicted injury upon British commerce without appreciably injuring the trade of Russia. That would have been the case if the blockade had been vigorously enforced, as he presumed it would be, by rendering the produce them in the Russian ports was the property of British merchants. Considering the blockade in the Black Sea, he admitted that it had been ineffectual, for the fact had been established that the Russians were covering the expedition to the Crimea. But, in spite of these defects in the blockade, the Russian mercantile navy had been annihilated. Her manufactures had materially suffered from inability to obtain supplies of the raw material. Of her exportations the decrease on the first nine months in 1854 as compared with 1853 was 12 per cent; on hemp the decrease was 38 per cent. last year as compared with 1853. Other circumstances as well as these indicated that the blockade had produced a considerable pressure upon the trade of Russia. The next question was, could the Government have taken other steps to injure Russia? His hon friend recommended the prohibition of Russian produce into England. The Government preferred the mode of throwing obstacles in the way of getting the produce out of Russia. In that way the maximum of pressure fell upon Russia, and the minimum of pressure upon us. An opposite course would reverse this process. At present the advantage of the British over the German linen manufacturers was small; the course recommended would destroy it altogether, and it was to be remembered that the linen trade

of this country was equal to the whole external commerce of Russia. It intimated that France would not have concurred with us in this attempt to prohibit Russian produce, and he regretted the mode suggested by the honourable gentleman to ascertain the Russian origin of the produce. He hoped he had satisfied the House that the Government did wish vigorously to prosecute the war; and that if they had declined to adopt the course recommended by his honourable friends, it was because they believed that such a course would inflict a blow upon British commerce out of all proportion heavier than that inflicted upon the trade of Russia.

Mr. Rice also agreed in the view so ably stated by the Right Honourable President of the Board of Trade, but which he said ought to have led the right honourable gentleman to the only tenable position on this subject—that of not undertaking the blockade altogether. The profit upon the whole Russian trade would not amount to a million sterling, and it was absurd in the extreme to suppose that the loss of that sum would induce Russia to sue for peace. The Emperor of Russia, in fact, had little or no motive to bury upon the trade of England by his prohibition of the exportation of corn from his dominions at a time when the dearness of bread had already led to riots in this country.

Lord DUNCAN read letters to show the distress endured in Russia by the system of blockade. At the same time the county of Forfar endured no small amount of suffering from the impediments thrown in the way of the Russian trade; but he was glad to find that the Government refused to prohibit the importation of Russian produce altogether.

Mr. WYNDHAM, in the name of his constituents at Hull, complained of the non enforcement of the blockade; and Mr. Headlam made a similar complaint on behalf of his constituents at Newcastle.

Sir J. GRAHAM explained the proceedings with regard to the blockade of the Black Sea. The orders for that blockade were given in May. The French and English Admirals consulted as to the best mode of giving effect to that blockade, and they decided on blockading the mouth of the Borysthenes. That mode of blockade was found to be illegal, but three months were lost in these discussions. Then came the invasion of the Crimea, when every vessel of the fleet was employed to cover the transports. Since then circumstances which it was not convenient to mention had interfered with the blockade, but orders had now been sent out to blockade every port in the Black Sea except the mouths of the Danube. The blockade of which had been raised because the military reasons which led to its institution had now ceased to exist. Every port in the Baltic and the White Sea would also be blockaded at the earliest possible period.

Mr DUNCAN, in the name of his constituents of Dundee, thanked the First Lord of the Admiralty for the protection he had afforded to British trade with Russia.

Mr COLLIER replied, and the returns were ordered.

HOUSE OF COMMONS. WEDNESDAY.

Sir S. BIGNOLD presented a petition from Norwich, praying that no further grants be made to the College of Maynooth.

NUISANCES REMOVAL AND DISEASES PREVENTION ACTS CONSOLIDATION AND AMENDMENT BILL.

Sir B. HALL moved the second reading of this bill

Lord SEYMOUR thought that two other bills which Sir B. Hall intended to introduce should all be taken together.

After observations from several members, the bill was read a second time and ordered to be committed

PUBLIC HEALTH BILL.

Sir B. HALL, in moving the second reading of this bill, said he would afford the fullest opportunity to all persons interested in it, as well as in the bill which preceded it, to offer opinions and suggestions to the Select Committee to whom the measures would be referred.

The bill was read a second time, and ordered to be referred to a Select Committee.

The Common Law Procedure Act Amendment (Ireland) Bill went into Committee. The clauses having been agreed to, the House resumed.

SUPPLY.

Mr. WILSON moved that a sum not exceeding £17,183,000 be granted to her Majesty to defray and discharge Exchequer-bills charged on the aids of 1855, unprovided for in Committee of Supply.—Agreed to.

WAYS AND MEANS.

On the motion of Mr. WILSON, the following resolutions were agreed to, and were ordered to be reported to the House:—

That, towards making good the supply granted to her Majesty, the sum of £30,000,000 be granted out of the Consolidated Fund of the United Kingdom of Great Britain and Ireland.

That, towards making good the supply granted to her Majesty, for the deficiency in the grant for the service of the year ending the 31st day of March, 1855, the sum of £1,300,000 be granted out of the Consolidated Fund of the United Kingdom of Great Britain and Ireland.

The House then resumed.

ARMY SERVICE ACT AMENDMENT BILL.

Mr. PEEL moved the second reading of this bill, the object of which was to enable the Government to accept the services of soldiers for a less period, and at an age when they were better able to withstand the changes of climate.

The bill was read a second time, and committed.

The Marine Mutiny Bill and the Mutiny Bill were read a second time, and ordered to be committed.

COURT OF CHANCERY (IRELAND)

Mr. WHITESIDE moved for leave to bring in bills to abolish the Master's office in the Court of Chancery, to amend the proceedings of the Court, to regulate the practice in relation to the appointment of receivers, to facilitate the sale of estates, to remove the causes of delay, expense, and other obstacles incidental to appeals, and to render the public charges payable by suitors conformable to the proposed modification.

Leave was given to bring in the bills, which were read a first time.

THE FOREIGN LEVIES. A notification has been issued from the War Department, that military officers who have offered themselves, and have been noted for service with the Turkish army, or with irregular levies attached to the British army during the present war, are requested to communicate their present addresses to that department without delay. The Government of Great Britain have entered into a Convention with the Sultan, empowering them to raise a military force not exceeding 20,000 men from amongst the subjects of the Ottoman Porte, to be employed in conjunction with the Allied armies in the East. Steps have already been taken, and officers dispatched to the Turkish provinces to raise 15,000 men. That force is to be armed, clothed, fed, and paid by England, and to be entirely under her command. It will consist of two divisions of infantry and a corresponding force of Cavalry and Artillery, and will probably be employed in Asia as the Contingent of Germany was intended to interfere with the peculiar discipline of so many of this contingent as shall happen to be Mussulmans, who will probably be under the command of regimental officers of their own faith and country. The chief direction will be entrusted to British or foreign officers of experience. Government are desirous to obtain for this service experienced officers, who are not otherwise employed. It is understood that arrangements are in progress by which officers who have served in the East India Company's service will be enabled to join the corps on better conditions than they have hitherto been enabled to obtain. The Sardinian contingent of 15,000 men will be under the immediate command of the British Commander-in-Chief. They are nearly ready for embarkation in Bri'ish ships, and will prove a most useful addition to our force in the Crimea. It is said that a Spanish and a Portuguese legion will be embodied under our command. The Northern Legion will be mustered and drilled on our own island of Heligoland, where every preparation is now making for their reception.

THE FRENCH CIVIL SERVICE.—When I was Minister, I used constantly to find my orders forgotten, or neglected, or misinterpreted. As I have often said to you, men are naturally idle, false, timid (*menteurs, paresseux*). Whenever I found an *entorse* supposed that, because an order had been given, it had been executed, or that, because he had been told a thing, it was true—I gave him up as an imbecile. Bonaparte nearly lost the battle of Marengo by supposing that the Austrians had no bridge over the Bormida. Three Generals assured him that they had carefully examined the river, and that there was none. It turned out that there were two, and our army was surprised. When I was preparing for war in 1840, I sat every day for eight hours with the Ministers of War, of Marine, and of the Interior. I always began by ascertaining the state of the executive of our previous determinations. I never trusted to any assurances, if better evidence could be procured. If I was told that letters had been dispatched, I required a certificate from the clerk who had copied them or delivered them to the courier. If answers had been received, I required their production. I punished inexorably every negligence, and even every delay. I kept my colleagues and my bureau at work all day, and almost all night. We were all of us half-killed. Such a tension of mind wearies more than the hardest bodily work. At night my servants undressed me, took me by the feet and shoulders, and placed me in bed as if I lay there like a corpse till the morning. Even my dreams, when I dreamt, were administrative. To do all this a man must have an iron will and iron body, and, what is rarer than either, indifference to the likes and dislikes of those about him, for he is sure to be hated. There is only one ex eption, and that is in the case of a general. A good military administrator is the idol of his troops, because they feel that their comfort, and even their safety, is the result of his care and of his energy he is their providence. But the labours of the civilian are unknown to those who profit by them. The sailors at Toulon did not know that it was owing to me that their ships were well stored and well-aired. My subordinates respected me, perhaps admired me; but they looked on me as a severe taskmaster, whose exigences no exertions could satisfy. *Thiers.*

PUTTING IN A GOOD WORD FOR AN OLD FRIEND.—The *Journal de St. Petersbourg* of the 8th inst. publishes a number of opinions collated from notorious reactionary newspapers respecting Lord John Russell's secession from the Aberdeen Ministry. The noble Lord is found to have covered himself with disgrace; while the conduct of Lord Aberdeen is dignified, loyal, and firm.

FOOT-MARKS ON THE SNOW, IN DEVON.

(From a Correspondent.)

As many of your readers have perused, I have no doubt, with much interest, the paragraph which appeared in several of the papers of last week, relative to the mysterious foot-marks left upon the snow during the night of Thursday, the 8th, in the parishes of Exmouth, Lympstone, and Woodbury, as well as on the estuary, Topsham, Exeter, and other places on the other side of the estuary of the Exe, in the county of Devon, extending over a tract of country of thirty or forty miles, or probably more: and as the paragraph alluded to does not fully detail the mysterious affair, it may probably be interesting to many to have a more particular account — which I think this unusual occurrence wel, deserves.

The marks which appeared on the snow (which lay very thinly on the ground at the time), and which were seen on the Friday morning, to all appearance were the perfect impression of a donkey's hoof the length 4 inches by 2½ inches; but, instead of progressing as that animal would have done (or indeed as any other would have done), feet right and left, it appeared that feet had followed feet, in a *single line*; the distance from each print being eight inches, or rather more—the foot-marks in every parish being exactly the same size, and the steps the same length. This mysterious visitor generally only passed *once* down or across each garden or courtyard, and did so in nearly all the houses in many parts of the several towns above mentioned, as also in the farms scattered about; this regular track passing in some instances over the roofs of houses, and haystacks, and very high walls (one fourteen feet), without displacing the snow on either side or altering the distance between the feet, and passing on as if the wall had not been any impediment. The gardens with high fences or walls, and gates locked, were equally visited as those open and unprotected. Now, when we consider the distance that must have been gone over to have left these marks—I may say in almost every garden, on door-steps, through the extensive woods of Lympstone, upon commons, in enclosures and farms—the actual progress must have exceeded a hundred miles. It is very easy for people to laugh at these appearances, and account for them in an idle way. At present no satisfactory solution has been given. No known animal could have traversed this extent of country in one night, besides having to cross an estuary of the sea two miles broad. Neither does any known animal walk in a *line* of single footsteps, not even man.

Birds could not have left these marks, as no bird's foot leaves the impression of a hoof, or, even were there a bird capable of doing so, could it proceed in the direct manner above stated—nor would birds, even had they donkeys' feet, confine themselves to one direct line, but hop here and there; but the nature of the mark at once sets aside its being the track of a bird. The effect of the atmosphere upon these marks is given by many as a solution; but how could it be possible for the atmosphere to affect one impression and not another? On the morning that the above was observed the snow bore the fresh marks of cats, dogs, rabbits, birds, and men clearly defined—so clearly, even, that the raising in the centre of the frog of the foot could be plainly seen—why then should this particular mark be the only one which was affected by the atmosphere, and all the others left as they were! Besides, the most singular circumstance connected with it was, that this particular mark appeared the same wherever it appeared, clear, as if cut with a diamond or branded with a hot iron;—of course I am not alluding to its appearance after having been trampled on, or meddled with by the curious in and about the thoroughfares of the towns. In one instance this track entered a covered shed, and passed through it out of a broken part of the wall at the other end, where the atmosphere could not affect it.

The writer of the above has passed a five months' winter in the backwoods of Canada, and has had much experience in tracking wild animals and birds upon the snow, and can safely say, he has never seen or heard of anything like this track, or one that appeared to be less altered by the atmosphere than the one in question. Marks left upon thin snow especially may after a time blur a little, but never lose their distinctive character, as every one will know who has been accustomed to follow the track of the American partridge.

Should you think the above likely to interest your readers, or draw from any of them a better solution of the most singular occurrence than has at present been given, perhaps you will allow it a place in your most interesting journal. I send you a copy of one foot, taken from the snow, and also a succession of the steps, to show you the manner of progressing. SOUTH DEVON

OUR ENERGETIC ALLIES.—If the Turks are active, what shall be said of the French! Activity is no word for the ceaseless and all-pervading energy with which they are providing for all present and possible demands for animate and inanimate supplies. To enumerate the countless agencies they have here at work, and the astonishing rapidity that the successes of the war may give rise to, would in itself fill a column of your space; while not one letter—nor ten—would be sufficient to describe in detail the admirable completeness and efficiency of every one of their departments. Public exposure has lashed our own hospital management at Scutari into comparative excellence; but even yet it lacks the clock-work beauty and regularity which pervade even the smallest of the French establishments. Our energetic Allies have laid hands on a very large proportion of the public buildings on this side of the Golden Horn, and have agencies at work which are in themselves nearly sufficient to supply every current want of their Government and people. The leaden weights of routine clogging their official movements: what they want they take, and what they take they make the most of. Their latest appropriation has been the splendid palace of the Russian Embassy, which they are about to devote to the reception of their wounded Russian prisoners; a medical staff has been already organised for it, and before another week has elapsed, the once magnificent saloons of Prince Menschikoff will be peopled with his unwilling countrymen scattered throughout the other eight or nine French hospitals in Pera. Our own Commissariat has at length tardily concluded a contract for 1500 mules, to be ready for delivery at any

FROST FAIR UPON THE THAMES, IN THE REIGN OF CHARLES II.—FROM A PRINT OF THE TIME.

An exact and lively Mapp or Representation of Booths and all the varieties of Shaves and Humours upon the ICE on the River of Thames, by London, during that Memorable Frost in the 35th year of the reign of his Sacred Majesty King Charles the 2d, anno Domini MDCLXXXIII. *With an Alphabetical Explanation of the most remarkable Figures. Printed for and sold by William Warren, Stationer, at the signe o the Talbott, under the Mitre Tavern, in Fleet-street, London*

A. Temple stairs with people going upon the ice to Temple-street
B. Duke of York's Coffeehouse
C Seeing Booth.
D Booth with a Phœnix on it, and insured as long as the foundation stands.
E Roast Beef Booth. F. Half-way House.
G. Bear Garden—Booth
H. Music Booth. I. Printing Booth.
K. Lottery Booth. L. Horse Tavern Booth.
M. Temple Gardens, with crowds of people looking over the walls
N. Boat drawn with a Hors. O. Drawn Boat.
P. Boat drawn on Wheels. Q. Bull Baiting.
R. Chair-sliding in the Ring.
S Boys Sliding
T. Ninepin Playing.
V Sliding upon Skates.
W Sledges Drawing Coals from the other side of the Thames.
X Boys Climbing up the Tree to get a sight of the Bull baiting
Y Toy Shops
Z. London Bridge

THE ROYAL SLEDGE-DRIVE IN HYDE-PARK.

sheep was roasted whole before sixpenny spectators, and the "Lapland mutton" sold at a shilling a slice! Printing-presses were set up, and among other records was printed the following:—

FROST FAIR.
Amidst the Arts which on the THAMES appear,
To tell the wonders of this icy year,
PRINTING claims prior place, which at one view
Erects a monument of THAT and YOU
Printed on the River Thames, February 4, in the 34th year of the reign of King George III. Anno Domini 1814.

One of the invitations ran thus:—

You that walk here, and do design to tell
Your children a child's a what they say befell,
Come, say this true, and then it will be seen
That such a year as this has seldom been

In the Fair were swings, book-stalls, dancing in a large, suttling-booths, playing at skittles, fry ng sausages, &c. The ice and snow, in upheaved masses, as a foreground to St. Paul's and the City, had a striking effect, and the scene, by moonlight, was singularly picturesque. On Feb. 5 the ice cracked, and floated away with booths, printing-presses, &c., the last document printed being a *jeu-de-mots* by Madame Tussaud's Thaw." Among the many journals as a duodecimo volume, pp. 124, now before us. It is entitled "*Frostiana; or, a History of the River Thames in a frozen state, with an Account of the late Severe Frost, &c., to which is added the Art of Skating.* London: Printed and published on the Ice on the River *Thames, February* 5, 1814, by G. Davis;" the title-page was worked upon a large ice-island between Blackfriars and Westminster Bridges. In the ILLUSTRATED LONDON NEWS, No. 178, is an engraving of the Frost Fair of 1814, sketched near London Bridge, by Luke Clenard

"THE STREETS AND THE WEATHER."

THE FROST, THE WEATHER AND THE PARKS.

ON Saturday a number of sleighs were driven on the ice, but, on account of the vast number of persons there, and the fear of the masses congregating to one spot, it was considered dangerous, and was prohibited. In St. James's-park the number of sliders and skaters was very great; during the day, upwards of forty persons met with accidents from falls—principally cut eyes and contusions. On the Long Water and Round Pond thousands of persons amused themselves on the ice, many of the gentlemen belonging to the Royal Skating Club being present, but no accident of a serious nature occurred. In the Regent's park an enormous number of sliders and skaters availed themselves of the solidity of the ice. The Regent's-canal and Surrey-canal, and other open waters, now ice-bound, round the metropolis, all had their quota.

On Sunday, owing to the extraordinary fineness of the weather, an enormous number of persons congregated on the Serpentine, in St. James's-park, and in Kensington-gardens. Numerous accidents took place during the day: no less than six persons fractured their limbs, and upwards of thirty received severe contusions and bruises on the face and head. They received prompt attendance at the Receiving-house of the Royal Humane Society

On Monday morning much excitement was produced in Hyde park by the appearance of the Queen and Prince Albert, with the Princess [illegible] in a sledge. Her Majesty and his Royal Highness were followed by the Hon. Mary Seymour, the Hon. Matilda Paget, and Lord Alfred Paget, in a second sledge. Captain the Hon. de Ros attended on horseback.

Since the year 1814, when the Thames was frozen over for many miles below the bridges, so severe a winter as the present has not been known. The frost in London, including the suburbs, has been as much as from 15 deg. to 27 deg., the thermometer having ranged from 17 deg. to 5 deg.; whilst in some parts of the country it has been as low as 6 deg. below zero, or 38 deg. below freezing-point. The Parks have presented all the appearance of a fair, the crowd consisting generally of a large proportion of the nobility and gentry

The Thames may be said to be nearly frozen over; from the immense quantity of ice above bridge and in many places below bridge, all steam traffic, and, in fact, all navigation is suspended from Greenwich to London-bridge, and thence to Richmond. So large a quantity of thick ice has not been seen on the river for many years. During the whole of Saturday crowds of persons assembled on London-bridge and the various wharfs opposite Billingsgate market to view the extraordinary spectacle of persons skating on the Thames near Pickle-herring-stairs. For some days previously the crews of the various vessels in the Pool had been enabled to walk across the ice to the shore; but on Saturday the men belonging to a Dutch brig, after carefully sweeping a large area of ice, commenced skating, much to the astonishment of the spectators.

The destruction of floating property on the river has been very great. On Tuesday morning, at half-past three o'clock, two coal brigs, laden with coals, and moored off Mr. Wohlgemuth's coal-wharf, in Wapping, broke adrift from their moorings in consequence of the pressure of the ice, and carried away piles, boats, mooring chains, and everything with which they came in contact. Proceeding upwards with a strong flood-tide, the two ships came in contact with Messrs. Thompson's, the coal merchants, Barge-road, sweeping the craft laden with coals before them, sinking some and crushing others, and tearing away part of Messrs. Thompson's premises. The sides of many coal-lighters were torn out by the ice and the pressure of the ships upon them. The brigs next came in collision with the Aberdeen steam-ship *Royal Victoria*, of 800 tons burden, and moored off the Thames police-station. The steamer was soon carried away from her moorings—chains, anchor, and gear snapping to pieces. The piles which sustain the floating pier, and the huge floating pier and its massive timbers at the Aberdeen Wharf, were carried away. The whole was sunk below the ice, and in a few hours not a vestige of the pier was to be seen. The steamer and brigs, after overcoming the impediment, drifted towards the Newcastle Wharf, and the floating pier and piles were in an instant destroyed. The steamer and ships were carried by the tide as far as the Union-stairs tier, about half a mile from Wohlgemuth's Wharf, where they were stopped about five o'clock, when it was nearly high water. On the ebbing of the tide the three vessels floated down the river, and, having cleared all obstacles in their way up, were driven on shore at Execution Dock.

THE [illegible] FROZEN SKETCHED NEAR SHAD THAMES

Quantities of ice are reported to be drifting in the Channel, more particularly in the Downs—a circumstance which the pilots seldom remember to have witnessed. It is computed that the frost has thrown as many as 10,000 dock labourers out of employment. For the last fortnight or more, a large fleet of homeward-bound ships have been locked out in the chops of the Channel by the easterly wind, while the frozen state of the river prevents the coasters coming up to discharge at the wharfs. There is the same dearth in the arrival of colliers from the north. The wind has prevented them leaving the Tyne, Wear, Tees, &c., and in the meanwhile they have been frozen in. During the week scarcely half-a-dozen ships have entered the docks to discharge, and the trade alongside the river is almost at a standstill

The accounts from the country announce the complete stoppage of the canal traffic by reason of twelve to fifteen inches of firm, unbroken ice; and the rivers are in much the same state

The Downs are partially covered with large fields of floating hummocky ice, about a foot thick, upon which several parties have been walking, presenting such an appearance as has not been seen for the last sixty years or more.

In Liverpool the number of corn-porters out of work is about 2000, and there are about double that number of cotton-porters and dock labourers partially unemployed, while it is estimated that the number of labourers of all kinds, in the town, who are unwillingly eating the bread

TORCHLIGHT SKATING IN HYDE-PARK.

of idleness, is not less than 15,000 or 20,000. When the frost disappears, however, every branch of trade will be resumed with unwonted activity. As an illustration of the extent to which the weather has interfered with the ordinary trade of the port, it is said that in the item of the usual Customs receipt of from £500 to £2000, for duties on goods from the ship, the amount received from this source in one day recently did not reach £50

In the docks at Southampton, where ships have been lying for some time without being disturbed, they have become completely frozen in. In the inner dock there has been a great accumulation of fish, consisting principally of the grey mullet. Owing to the severity of the weather, these fish have become completely benumbed by the cold, rendered entirely powerless, and by the strength of the tide have been washed into the dock, where they have become an easy prey.

The scene represented in the cut entitled "Skating by Torchlight," took place at a late hour on Thursday night week. A great number of gentlemen, not wishing to mingle with the crowd, proceeded in a body to the Serpentine after the regular skating hours had finished, and, each with a lighted torch in hand and a policeman's lamp buckled in front, amused themselves on the ice until nearly midnight. Mr. Superintendent Williams, on being informed of what was going on on the river, proceeded to the spot, and fortunately no accident took place.

THE STREETS AND THE WEATHER.

WHAT MR. JOHN RATTLER (BADGE NO. 5---9) THINKS OF THE MATTER.

THESE here lines come hopping that you're not as cold as I am, which is werry severe.
Hoats is at nobody knows what price, and coals and other wedgetables is equally dear.
The streets is downright hawful, that they is, all snowy and icy,
Without no signs of a change, but, on the con-tra-ry, quite seems wice.
As to keeping a hanimal up to his work, I'm whipped if you can this sliddery weather,
He's up and down like a rocking hoss, and never on four legs together!
Driving's bad enough, but my whiskers! aint it the North Pole on the carck:
Yet a hungrateful public pulled up Tom Smith to-day for only axing three-and-six from Charing X to the Bank!
Why, there's Conky Joe—him with the Wellington nose—went to sleep on his box, and nobody saw him.
When we lifted him off he was like a harm-chair, and it took eighteen glasses of hot rum-and-water to thaw him.
Wot's to come of us all I don't know! Our best riders all walking! It's killing!
I should starve if my hanimals warn't so cold that I *can't* never give nobody change for a sixpunny.
"What's my charge, Ma'am, for you and them five leetle dears to Park-lane? Why, the roads is so bad,
And the weather's so aggrawatingly cold, a sober driver, Ma'am, 's scarce to be had;
So we'll just say five shillin'. Not more than two mile! Werry true, in ordinary weather;
But now, with slipping up, and slipping down, and sliding back, it's a matter of five mile altog-ther:
But as you seem to have got a lot of 'em, Ma'am, and they're all on 'em so remarkable pretty,
I'll take the old biling for four-and-six; and if that isn't cheap, it's a pity.
I'll be careful, on course! Mind, Ma'am, you don't slip: the straw's dry, though it has been a-snowing.
Sam Wiggins, just lift up my hoss's forelegs and give him a shove, and set us a-going!"

ESCAPE OF THREE CONVICTS FROM NEWGATE. On Saturday an event, which occasioned considerable excitement in the neighborhood of Newgate, and is likely to give rise to a searching inquiry into the nature of the practices and discipline of that prison, took place. The day-yard appropriated to male felons was being white-washed, and on Saturday morning, immediately upon leaving the sleeping cell, three prisoners—John Bury, under sentence of fourteen years' transportation for passing forged £5 notes; Speers, the bank-clerk, who was sentenced to fifteen years' transportation, for committing a forgery on Spooner and Attwood's bank; and Brown, under sentence of four years' penal servitude, for committing a burglary in Skinner-street, Bishopsgate, were sent into the yard to consider the whitewashing, accompanied by a turnkey, whose duty it was to remain on the spot. After the men had been at work about half an hour, the turnkey left the yard, and when he returned shortly afterwards looked in vain for the prisoners, not one of them being visible. It appears that the prisoners had become possessed of some rope, and, when they found themselves left alone in the yard, threw it over the parapet of the prison wall, and, having climbed to the top by its assistance, drew it up, and then descended to the roof of an unoccupied building formerly a coffee-house, Warwick-square, into which they obtained an entrance by the attic-window, and, thus making their way into the street, were soon lost to view. Several persons saw them descend, but did not give any alarm, as having white Guernsey frocks over the prison dress, and being much splashed by whitening, they resembled bricklayer's labourers. It is supposed that the prisoners kept back a part of the oakum given them to pick, and had manufactured it into a sort of rough rope, sufficiently strong for their purpose.

"FROZEN-OUT BARGEMEN."

NOTES OF THE WEEK.

Much canvassing of the Ministry and its prospects this week at the clubs, in the streets, at dinner tables the result of which appears to be the opinion that unless some piece of luck befalls them they will not be able to go on as they are. Most of the new appointments seem to have been made on the old system that of believing that no man is fit for a post, where activity of body and mind are imperatively demanded, till he has passed the climacteric. There is, for instance, Sir John Macneil, allowed to be a man of great talent, but elderly and sickly to such an extent that he has on several occasions been compelled to refuse appointments at home, where little besides desk work was required. Sent to the Crimea, charged with the duty of reorganising the Commissariat, it is not likely that he will have the physical strength to visit personally, as his duty requires him, all the pestiferous holes and corners of Balaclava and the Camp. Of course he must see entirely through the eyes of younger and stronger men, and there will begin again the old system of reports and references, which never ends in anything but a Blue-book. In place of Admiral Dundas, appointed to command the Baltic fleet (an appointment which seems popular among naval men), Henry Eden, late Commodore at Woolwich, has been named as Second Naval Lord of the Admiralty. The best friends of this most amiable gentleman are the most astonished at his nomination. The Secretaryship for Ireland is still vacant. Mr. Lowe was spoken of for this post; but the Irish members rose *en masse*, and threatened mutiny if the honourable member for Kidderminster (whose tone and manner of speaking do not make him very popular in the House) was appointed. One thing is certain; the public are not satisfied with the restricted orbit within which offices are distributed and appointments made; and above all, they do not like the system existent of shifting about responsibility till no man can tell on what shoulders it should repose. Moreover—speaking more particularly on the unfortunate Crimean question people think that what is wanted to set matters straight is not Commissions to find out faults and then write home for instructions, but honest, clear headed men, invested with full powers to set right at once that which their own sense tells them is wrong. There seems to be little doubt that the advantages of a special education have been in many cases harshly exaggerated. Mr. Macdonald, sent to the East for the purpose of managing the *Times*' subscription Fund, has, *consensu omnium*, done his very complicated work most admirably. What training had he to fit him for his post?—a reporter and writer for newspapers; a man of the pen and the study? What preliminary knowledge of tea and arrowroot, blankets and hospital management, had he? The *Times* sent him on no better recommendation than the knowledge that he was an active, sensible man, who was sure to do the best possible with the funds entrusted to him; and he has done it. Does any one suppose that if Mr. Macdonald had held Mr. Filder's place, our Commissariat would have been *worse* managed? Verily there are many supposed Eleusinian mysteries which, when the light of day is allowed to fall upon them, turn out to be simple matters enough. Lord Lucan and Sir John Burgoyne are recalled, having disagreed with the Commander-in-Chief; and it is understood that Lord Cardigan is to take the command of the cavalry as soon as we have one.

The long frost, which makes the Serpentine and the Regent's park so gay, saddens Islington and Seven-dials. In the country, the agricultural labourer—in the town, all connected with the water trade, the canals the barges, the river—are out of work. There is starvation in our streets and it is melancholy to reflect that, just when plentiful food and fuel are most wanted by the poor man, to enable him to resist the effects of the temperature, is the time when the means to procure them fail him most completely. It is to be regretted that in the great parish of St. Pancras the directors of the poor seem not to have thought it necessary to make the smallest preparation against a calamity which in the winter ought never to be an unexpected one. One is horrified to read in the report of the inspector that on the 24th of January (that is before the very severe weather had set in) there were found in one moderate-sized room 21 by 22 feet, and 10 feet high—forty-six men and boys. Here, on straw beds, sheetless, swarming with vermin, averaging three to each miserable couch, the sick and the whole, the sound and the infected, slept and lived. We are told further that in the so-called "day-room for casuals" as many as fifteen men slept without bedding of any kind. In addition to this it appears that there was not the slightest attempt at classification; in one common room the virtuous and the vicious, the clean and the dirty, the tramp and the street-walker, with the respectable but reduced ratepayer, were indiscriminately herded together. It was no wonder that with such a state of things the Poor-law Board thought it necessary to interfere; but how did the directors receive the interference, conveyed courteously enough, in a letter from Lord Courtenay to the board? Why, by pouring out the vials of their wrath upon the heads of the Poor-law Board who dared to interfere with them. Little enough was said of the suffering, the misery, the contamination, resulting from their own defective and negligent management, but much of those who were impertinent enough to offend, even by advice, the dignity of Bumbledom. Two sensible men, indeed, were found to propose and second a motion that Lord Courtenay's communication should be referred to the House Committee; but up gets the model vestryman, the pet of the parish, raging like the Telamonian Ajax, and declares "that he looked upon the document just read as nothing less than a peremptory order and piece of dictation on the part of the Poor-law Board, which, if the resolution were carried, they, as a board, would be at once yielding to. He moved, therefore, that they should merely acknowledge the receipt of the letter." Of course Ajax carried his point by a large majority. All this is rather too bad, and proves that State interference with the autocracy of local governing bodies must go farther than Sir Benjamin Hall's onslaught on the paving and lighting boards

Lent has arrived, the season at which, in ordinary times, we look for the opening of the Opera-house as surely as for pantomimes at Christmas, or partridge shooting in September. But these are not ordinary times: war, disease, and taxation press hardly upon speculators in public amusements. The before Easter season, too, has always been unprofitable, so this year Mr. Gye has wisely determined not to open Covent-garden till the end of April. There will be a strong company—on the whole, quite as strong as last year. Mario and Grisi have returned from America, after a trip which cannot be said to have been altogether successful, in consequence of their lessee having failed to complete the money part of his agreement. The former has accepted a positive engagement at Covent-garden; and it is probable that the latter, notwithstanding the leave-taking of last year, may be induced to favour us with six or twelve nights more, "positively the last time." Then there is Bosio, indubitably now the first of prima donnas; and Mdlle. Nye, or some such name, from Dresden, of whom report speaks highly. Formes, too, sick of his Drury-lane, and other infelicities, has come back, partly moved thereto by M. Meyerbeer's refusal to entrust the basso part in "L'Etoile du Nord" to any one else; and Cerito is to take the lead in the lucidental ballet

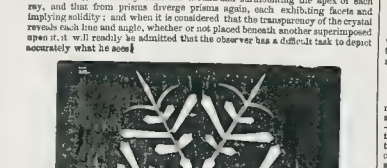
The trial of King, the detective, who had organised a regular body of thieves, that he might profit by their peculations, is to come on at the next session of the Central Criminal Court. In the preliminary examination before Mr. Hall, one or two facts with regard to the conduct of the police have come out which deserve comment. It can hardly be denied that the London "Blues" are not now so efficient or respectable a body as they were ten years ago. It appears that the same spirit of favouritism which has been the bane of our army is doing mischief in Scotland-yard. There is no difference in the choice of the A division from that of the rest; but that division having the superintendence of the Houses of Parliament, the Ministers, &c.—what may be called the home circuit of the force—are, of course, more constantly under the eyes of their superiors; and it is asserted that, upon the average four out of five of the superior appointments are given to this favoured division. Here is a new case, where "something must be done;" but, if it be true, as is reported, that there exist at the head office grave dissensions between the Commissioners, it is not from them, but from the superior authority of the Home Office that we must look for an improvement.

SNOW CRYSTALS.

To the Editor of the ILLUSTRATED LONDON NEWS

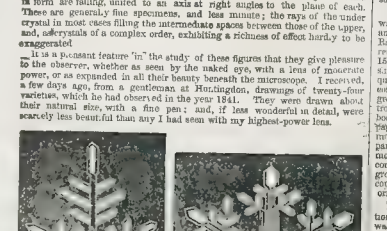
I now forward to you a few highly-magnified drawings of Snow Crystals which I observed on February 8, with, it will be remembered, a temperature of from 29 deg. to 31 deg. By those of your readers who have perused my former communication on the subject, it will be perceived that the comparatively simple figures which are there exhibited have in the present instance become the nucleus of a far more complicated arrangement. The engraved figure, consisting of a group of eight prisms on each ray, surmounted with a crown of leaves, was seen by Mrs. King of Greenwich, under a microscope. This lady, whose accuracy of observation is to be relied on, described it as exhibiting the utmost grace and beauty of structure to which the drawing by no means does justice. The crown of leaves I imagine to be the gradual dissolving of the upper prisms, which, breaking up whilst under observation, presented a leaflike appearance of great intricacy, purely crystalline, and which Mrs. King assures me the drawing but imperfectly represents. The natural object of the draughtsman to represent with his pencil the overwhelming mass of intricate detail, unfolded by the aid of a good lens, is no little matter of regret to the observer, who would record for the general benefit an appropriate idea of the real structure of these beautiful formations.

My own observations have been made for the most part with the aid of a good Coddington lens, which discloses as much of the crystalline formation of these bodies as is commensurate with my power of representing accurately. I have been much struck with the complicated arrangement of the nuclei, composed as they are of an almost endless combination of simple lines and prisms. These last, I should mention, are raised—some varieties exhibiting an arrangement of numerous facets, which give great solidity to the prism. It may easily be imagined that when these prisms are thickly grouped around the centres of these six-rayed stars (the primitive form of each figure, it will be remembered), and thickly clustered around and surmounting the apex of each ray, and that from prisms diverge prisms again, each exhibiting facets and implying solidity; and when it is considered that the transparency of the crystal reveals each line and angle, whether or not placed beneath another superimposed upon it, it will readily be admitted that the observer has a difficult task to depict accurately what he sees.



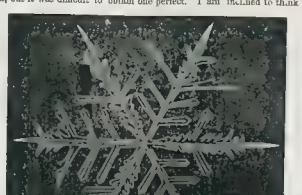
This morning, Feb. 21, with a temperature of 21 deg., they are falling, sparingly, but more intensely beautiful: they are also minute, and highly crystalline. Up to the present time, 9h. 30m., all that I have observed are made up of prisms of six facets; and many are double, that is, two crystals alike in form are falling, united to an axis at right angles to the plane of each. These are generally fine specimens, and less minute; the rays of the under crystal in most cases filling the intermediate spaces between those of the upper, and, as crystals of a complex order, exhibiting a richness of effect hardly to be exaggerated.

It is a pleasant feature in the study of these figures that they give pleasure to the observer, whether as seen by the naked eye, with a lens of moderate power, or as expanded in all their beauty beneath the microscope. I received, a few days ago, from a gentleman at Huntingdon, drawings of twenty-four varieties, which he had observed in the year 1841. They were drawn about their natural size, with a fine pen; and, if less wonderful in detail, were scarcely less beautiful than any I had seen with my highest-power lens.



My own observations of some of the more simple forms have been very satisfactorily confirmed by a lady, residing at Richmond, who has obligingly forwarded to me several of her sketches, made at the same time with many of my own. I have, likewise, to acknowledge my obligations for many communications of a similar character. Among them are drawings which I received in an earlier date than those I have just referred to, from T. G. Hylands, Esq., of Warrington, an experienced and careful observer. A collection of snow crystals as observed, and accurately recorded, would be an interesting feature in meteorological investigation. At the same time, it is probable that the conditions of their formation are more complex than might be imagined, familiar as we are with the conditions relating to the crystallisation of water on the earth's surface. Dr. Smallwood, of Isle Jesus, Canada East, has traced an interesting connection between the form of the compound varieties of snow crystals and the electrical condition of the atmosphere, whether negative or positive; and, as he informs me, instituting experiments on this latter interesting subject.

In conclusion, I may be forgiven if I remark, for the benefit of short-sighted persons, that the crystals, when seen at the same time, under the influence of the proximity of the observer, not unfrequently alter in form before it sensibly begins to melt. I have myself more than once drawn a specimen on its first descent, verified it to my satisfaction, and passed on to others: after the lapse of perhaps a quarter of an hour or more, I have been surprised by witnessing, as I imagined, a new specimen occupying the precise spot of the former. In each case, however, careful observation proved to me that it was no other than the crystal I had already drawn, and that the dissimilarity arose from a general simplification of the figure caused by the subsidence of the groups of prisms surmounting the apex of the rays, the rounding of the edges of those prisms which remained, the subsiding of two or more prisms into one, and the elongation of spicules which formerly served as the axes of prisms. Drawings of crystals in this state are only partially satisfactory. Sir Edward Belcher, in a letter I received from him lately on the subject of snow crystals, remarks that many of these seen by him in the Arctic Seas had radii of *one inch* and more in length, but it was difficult to obtain one perfect. I am inclined to think that



we have as great complexity of arrangement in our crystals as those belonging to colder latitudes, the difference mainly consisting in the comparative minuteness of our own.

JAMES GLAISHER.

THE NEW POST-OFFICE REGULATIONS.—The arrangements with respect to the new scales of salary for the whole of the employés in the General and London district Post-offices are now nearly completed; the interior officers—those in the letter-carrying department—having been informed, on Monday, that the new scale affecting them would be forthwith put into practical operation. The sub-sorters, letter-carriers, stampers, porters, mail messengers, and all classes of officers of this distinctive kind in the lower departments of the inland and district post-offices, are henceforth to be amalgamated, and formed into a body, to be denominated "Sorters and Letter-Carriers." This body is to be divided into four classes—the lowest to begin at 19s. per week, and to rise by an annual increasement of 1s. a week to 20s.; the next class to begin at 22s. and to rise to 30s.; the class above them to begin at 32s. and to rise to 38s.; and the highest class to begin at 40s., and to rise to 50s. In future, also, it is provided, in accordance with the Report of the Royal Commissioners, that the promotion from class to class shall be "according to qualification and merit in all cases." The inspectors of letter-carriers have been divided into two classes, the salaries of the lower class commencing at £118, and rising by £5 a year to £200; and the salaries of the higher to begin at £210 and to rise by £10 a year to £300. These appointments are, in all cases, to be filled in future by the most deserving of those who have served as sorters and letter-carriers. Prior to the new arrangement their ranks were filled by mail inspectors, but the commissioners being of opinion that such a mail should be replaced by a smaller body of more highly-paid officers, capable of undertaking the authority of the Post-office in dealing with the railway companies, and of enquiring them to adopt such measures as may from time to time appear to be necessary for the fulfilment of their several contracts—four such mail inspectors have been appointed, their salaries commencing at £300 a year, and rising by an annual increase of £20 to £500, in addition to which they are to be allowed the sum of 15s. per day for travelling expenses.

COFFEE FOR THE CRIMEA.—On Saturday a Parliamentary paper was published, containing the correspondence upon the subject of the roasting and grinding of coffee, as also the letters between the Public Department, Lord Raglan, and the War Department. The document is of some importance, with respect to the supply of coffee to the troops in the East. It appears that from the 15th March, 1854, to the 19th February instant, the quantity of unroasted coffee supplied by the naval department for the army in the East, according to the returns made by the Commissariat Department, was 200,914 lbs. of roasted coffee, 211,230 lbs., whole, was shipped; and of ground coffee, 30,059 lbs. No ground coffee was sent until the 15th ult. Complaints have been made that the troops were supplied with unground coffee; and there is a notice on the clerk's book of the House of Commons on the subject. The first communication in the paper is dated the 24th February, 1854, and the last on the 9th of the present month. The last letter is to the Secretary of the Admiralty from the War Department, requesting that the Lords Commissioners of the Admiralty were to be moved to give directions for the shipment during the present month (February), consigned to the Senior Commissariat Office in the Crimea, of 40,000 lbs. of ground coffee, carefully packed in tin canisters, and a similar quantity in the course of next month. "These quantities to be considered as an addition to all former requisitions for supplies of this article."

THE PRICE OF RUSSIAN FIVE PER CENTS.—A Royal Proclamation, dated the 8th instant, and which appeared in our columns of the day after, was directed against "uttering to, assisting, aiding, or abetting the Queen's enemies" by certain acts specified, "or otherwise." We submit the question whether the comprehensive clause "or otherwise" might not be considered to include a method of "abetting the Queen's enemies" which we are now about to mention. It has for some time passed the unrivalled to account for the daily quotations of the Russian Five per Cents in our Stock-market so nearly at par. There are surely no buyers for these securities? Yes, there is one, and that solves the mystery. A certain firm in London is commissioned by the Russian Government to buy a few thousands of Russian Five per Cents from time to time in our market. A fancy price for the commodity no objection! And these Imperial purchasers "coolly furnish forth" the operations, which figure so respectably, from day to day, amongst the prices of fine stocks.—*Globe*

RUSSIA AND HER TRADE.—The probability of the overland traffic being at length prohibited suggests to us the propriety of submitting to you a few statistics in connection with the trade of Russia. We think you will see that the consideration is calculated to inspire the hope that the Czar will not be able to continue an active struggle for any considerable period. The revenue of Russia is twenty-five millions per annum. Small as is the amount when compared with her population of sixty millions, still it is large when compared with the condition of the people. Neither their condition nor [illegible] the lower than it is, and her revenue must decline almost pari passu. Now, are profits dependent on the trade and prosperity of the country. Her exports may be stated at eighteen millions sterling per annum, and her imports at seventeen millions. Prohibit her trade, and you cut off five millions of Customs revenue, and render the people incapable of paying the remaining twenty millions. But this twenty-five millions is required in times of peace and [illegible] great European war it would not be unreasonable to double that amount [illegible] to obtain it. Not [illegible] loan, for those are [illegible] resort must be the issue of paper money [illegible] of the war. To this she has already [illegible] trade is unprecedented [illegible] may be able to do this. But destroy her trade and the exchange sinks to par [illegible] to 35d., to 30d., to 25d., and so on to 20d., at which point [illegible] gold being required for the payment of duties, there would [illegible] million left in circulation. At about 8 orders would [illegible] millions. Such a monument [illegible] transit "commerce of Russia" is to be stopped—plugged, as it speedily would be, in the position of a certain union of old, that [illegible] having "to make bricks without straw;" and seeing, as we do, that it [illegible] that there, to a cry for mercy.—*St.*

OPINIONS OF THE SILENT MEMBER. (No. V.)

I NEVER look at a long list of Notices of Motion without regarding them as so many notices of obstruction to all rapid motion in the business of Parliament. Every member who has a hobby of his own is naturally anxious to ride it; but how much better it would be if there were a sort of riding-school attached to the Houses of Parliament, in which these hobbies might be exercised. A great deal of time is lost by the capering and plunging about of the "gentlemen riders," in a species of Parliamentary equestrianism, the chief talent of which seems to consist in so managing the hobby as to bestow a kick on the Ministry. A list of Parliamentary notices generally includes a variety of questions, some of which are only asked because it is known that they cannot be answered, or because, if answered at all, the replies would be calculated to throw the public business into confusion by embarrassing the Government. Sometimes a notice of motion is given, which lays down a proposition so obviously true, that we are perfectly aware nobody will dispute it, though we are equally convinced that a whole night will be consumed in talking about it. The subject, however, is selected with a view to causing some embarrassment; and if this object be effected, the proposer is satisfied, though he takes nothing by his motion. Sometimes the notice of motion includes a proposal for the supply of certain returns, which, if granted, will never be looked at, and which, though often supplied at a very considerable expense to the country, are turned into a still further source of extravagance by their being employed as pegs on which to hang a long string of words that have no other effect than to waste the time of Parliament and so impede the business of the nation. The Legislature would do well to check the "fatal facility" with which some of these motions for returns are allowed to prevail; for it often happens that the very largest returns produce the very smallest profits.

I often admire Colonel Sibthorp's anxiety to reduce Public Expenditure; but I wish he were as great an economist of the public time as heis of the public money. It is true that his speeches are not very long, but they are very frequent; and I would therefore suggest that, if the idea of the riding-school for the exercise of legislative hobbies should be carried out, Colonel Sibthorp ought to be requested to join the company as Clown to the ring, or in any other suitable capacity. One of the gallant Colonel's latest "little bits" of the facetiæ with which he intersperses the duller portions of a night in the House of Commons, was an inquiry as to how much salary Lord John Russell would receive for his services on a special mission to Vienna? The answer of Lord Palmerston was that his noble friend is "to receive no salary, and that his expenses only will be paid." On this Colonel Sibthorp expressed a hope that they will not be heavy—a remark that indicates one to ask the gallant Colonel whether he would wish our special Envoy to travel second-class, or proceed in any other way to cut down the expenses of his journey. In the present day Lord John, with all his faults, has the right to be regarded as a first-class man; and it must be hoped that, whatever may be the style in which he travels, he will outstrip the old Parliamentary or Government train that has hitherto met with so many delays and experienced so many accidents. I am no advocate for the gratuitous system, and always feel that "the labourer is worthy of his hire;" but there can be no objection to Lord John's going to Vienna without pay, unless the event should prove that he, in every sense, goes for nothing, If the performance should be crowned with success, a very minute portion of the profits would be represented by the salary of the chief actor; and if the affair should be a failure, there would be very small satisfaction in the reflection that if a good part has been spoiled, the unskilful performer got no more than he merited.

When some people fall out, some other people are said to get their due; but the troops in the Crimea do not seem, as yet, to have got their proper treatment which is, fairly their due, notwithstanding the fact that Lord Raglan and Lord Lucan have quarrelled. Lord Palmerston explained that the latter had been recalled because there were differences between himself and the Commander-in-Chief; but it may be premised that, instead of differences, there is, perhaps, a strong resemblance—for their Lordships will probably be a good deal alike if Lord Lucan is recalled on the ground of unfitness for his position.

Whenever a man of high position happens to be suffering the penalty of imprisonment for some offence he has been found guilty of, the chances are that the public will soon be informed of his failing health, in consideration of which we are soon afterwards told "Mr. So-and-so has been set at liberty." It is natural that the coarse fare and the absence of luxuries incidental to prison life may be repugnant to aristocratic or even gentlemanly taste; but we ought not to lose sight of the convict in the so-called gentleman, if a man is too particular to eat prison food, he should be sufficiently fastidious to avoid criminal habits. I have been led into these reflections by having seen the announcement in the papers that Mr. John Carden, who is a prisoner in an Irish gaol for a serious offence, has been visited by the Surgeon-General (Sir Philip Crampton), who finds that confinement in gaol is deleterious to the health of the prisoner. It is probable that if John Stokes, who assaulted Policeman-X, could afford to receive such distinguished visitors as a Surgeon-General, it would be ascertained that Stokes's health is by no means so safe or satisfactory when his exercise is limited within four walls, as when he is in the full enjoyment of his liberty. If a gentleman, by birth and position, violates the law and gets into prison, his incarceration is not intended to "do him good" in a medical but in a moral sense; and he has no more right than John Stokes would have to complain at finding himself "not quite so well" when deprived of his customary supply of air and exercise.

Nobody looks for a very high standard of morality in the practice of the law, or if he does look for it, he seldom finds it; but every body expects that there will be an approach at least to sound views on the question of right and wrong among those invested with high judicial authority. Sharing this expectation, I have been rather startled by the following passage in the judgment delivered by the Lords Justices of Appeal on a case in dispute between the provisional committee and allottees of a defunct railway company. The judgment contains the following passage, which I quote verbatim that I may be accurate. Their Lordships decided—

That representations had been made by the managing committee, or some of them, that one gentleman of station and influence was one of their body, while, in point of fact, the truth was otherwise; that as to two other gentlemen there was a similar misrepresentation; that, at the time these representations were made they were known to be untrue, although those Lordships did not attribute any intention of dishonesty.

The code of Equity has, no doubt, been correctly followed in this judgment; but I do not quite understand the code of morality according to which the Lords Justices find that though there has been falsehood, and misrepresentations which were known to be untrue, their Lordships did not attribute any intention of dishonesty." How falsehood can exist without dishonesty would puzzle the mere man of common sense; and it is, perhaps, one of those mysteries requiring all the acuteness of a Chancery Judge to penetrate.

Lord Palmerston is inaugurating his career as War Minister with a show, at least, of energy, which proves that the good has not yet shut him up in his room for a period of three weeks, as it is said sometimes to do. While he is [illegible] to speak in the Lords [illegible], the Silent Member [illegible] of leaving a few words with him. The narrow house to the [illegible] invites the assistance of professional men, proposes to employ physicians at two guineas a [illegible] who have a daily average of one or two cases. Pleurisy at 4s. Phthisis at 5s. Very consultations at 2s. Fever, that the infection of Smithfield is only [illegible] to [illegible] Scutari is [illegible] Cholera [illegible] almost courtesy to withdraw for Lord Palmerston. It is to be hoped that the question will not remain [illegible] ment the difficulty of the old [illegible] only hope that the [illegible] Lordship's polite hint, a [illegible] from a scene where [illegible] desired.

Gold, plain, watches and diamonds, purchased for cash. Watches, clocks, chronometers, clocks, and watches, cleaned, rated, and adjusted by scientific workmen

CAUTION.—For above reasons Mr. MORDAN and CO have been compelled to caution the public against the various imitations of their EXCELSIOR POINTED PENCILS.
The celebrity which this article obtained when the letters patent was first granted has steadily and uninterruptedly increased, and the years that have elapsed since the expiration of the patent, through the exertions of the Patentees have been directed to justify the confidence in connexion with every article of good reputation. The result has been that numerous imitations have been produced, and the vendors enabled, for the sake of inferior goods, to realise a larger immediate profit

Under these circumstances, S. Mordan and Co. are induced to issue this notification, and to request the public, when desirous of purchasing their Pencil-cases, to observe that they are guaranteed those on which the words "S. Mordan and Co." are stamped

As in every case in Great Britain respectable houses are found who have a stock of S. Mordan and Co.'s goods no difficulty need be experienced in carrying this recommendation into effect

Perhaps the most desirable, as well as more strictly necessary when Cumberland lead Pencils are purchased for refilling the pencil-cases (Unless these have been most accurately gauged), is that each of the pencil point, they will be found utterly useless

Each pure Cumberland lead pencil is stamped "Warranted. S. Mordan and Co"

SOLAR PENCILS made from the Cumberland Lead, purified by Mr Brockeden's Patent Process S. Mordan and Co. have no hesitation in asserting that such solar pencils in every respect are only to be obtained from the Black Lead from the Borrodale Mines In consequence of the Cumberland Company having disposed of the whole of their stock of crude black lead to the patentee, S Mordan and Co are enabled to offer their Solar Pencils, made from the only pure lead in existence, with the assurance that their superiority will be readily appreciated by the public The highest encomiums have been pronounced on these Pencils by eminent engineers, architects engineers, and draughtsmen of the greatest eminence in their several professions, and whose testimonials have been published in detail. The following names are selected

Charles Barry, Esq., R.A.
C. L. Eastlake, Esq., P.R.A.
E. M. Barry, Esq., R.A.
Clarkson Stanfield, Esq., R.A.
R. Westmacott, jun., Esq., R.A.
S. Prout, Esq., R.A.
Philip Hardwick, Esq., R.A.
Each Pencil is stamped "Warranted Pure Cumberland Lead. S. Mordan and Co., London

Copley Fielding, Esq., R.W.S.
W. Tyon, Esq., R.A.
David Roberts, Esq., R.A
J. T. Willmore, Esq., A.R.A.
M. G. Wilson, Esq., Director, Government School of Design

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

THE WESTMINSTER SOUP SOCIETY are now supplying a large quantity of soup, and affording relief to a great number of the poor, twice a week; but, in consequence of the present severity of the weather, and the numerous applicants whom they are obliged to refuse, the Society have determined upon opening their kitchen three times instead of twice a week, which will entail a considerable additional expense. The public are, therefore, earnestly solicited to assist by their subscriptions in the good work.
Soup tickets will be thankfully received by the Treasurers: and for each subscription a corresponding number of tickets will be supplied.
J. C. WOOD, Victoria-street,
W. FRENCH, Millbank-street, } Treasurers.
J. J. MILLER, Millbank-street, Westminster,

THE ILLUSTRATED LONDON NEWS

No. 730.—VOL. XXVI.] SATURDAY, MARCH 3, 1855. [WITH A SUPPLEMENT, SIXPENCE.

THE RECONSTITUTED MINISTRY.

THE bombshell thrown by Mr. Roebuck into the councils of the nation is still fizzing. Lord John Russell, who was the first to get out of its way, determined not to share the peril in company with Lord Aberdeen and the Duke of Newcastle, speedily lost his dread of it when these were removed. And now that it has scared away Sir James Graham, Mr. Sidney Herbert, Mr. Gladstone, and a few minor members of the Peel party, he has so far recovered his self-possession as to face it, not perhaps without repugnance, but with the hope, or the certainty, that Lord Palmerston will throw cold water over it; soak its powder in wet; —neutralise its powers of ignition, combustion, and explosion; — and thus prevent it from scattering confusion and dismay on every side of it. Whether it will be allowed to do any execution at all remains to be seen; and if it should happen, in its portentous course, to dash against nothing more formidable or more valuable than the Peelites as a party, it will have done no irreparable, if any, harm. But whether it shall work to any good end depends not so much upon the Committee itself, or the Government, as upon the people. It is for them to decide whether the inquiry shall mean and do business, or whether it shall be a make-believe and a delusion. It is clear, however, that if no reform be introduced into the administration of the War until the Committee shall have given in its report, it might as well be non-existent for all the good it can effect in the state of the army before Sebastopol. Whatever reforms may be desirable to effect in that quarter must be operated by a more rapid agency. The Government must, on its own responsibility, conceive and execute the proper remedies for the gross mismanagement which seems to have pervaded every branch of the military, and no small portion of the civil, service, or, in spite of Mr. Roebuck and his Committee, the nation will continue to be disgraced in the eyes of Europe, and weakened in the estimation of its allies. It is for Lord Palmerston and his colleagues to rescue the country from this evil plight. The question remains—Has the Administration the sagacity, the will, and the power to do what is expected of it?

It can scarcely be said that the Government excites any great admiration for the genius of its chiefs or subordinates. No Minister is considered "heaven-born" until he have done his work. Contemporary praise or prejudice rarely allows the highest order of merit in any one. A Wellington and a Napoleon may snatch the verdict of applause and approval in their life-time; but men smaller than these giants by no more than a hair's-breadth must trust to posterity, rather than to their contemporaries, for the justice which they may deserve. It is, therefore, too soon to judge the present Ministry either in whole or in part. All that the wise can do is to bespeak it a fair hearing. Lord Palmerston is freed from the clog of the Peelites. He is not at the head of a Coalition—a thing, or the name of a thing, which excites mistrust and ill-will in the minds of many respectable persons who, scarcely know what it means, but who feel that they dislike it. The Ministry is as purely a Whig Ministry as it is possible to form, and includes names that command the respect, if not the enthusiasm, of the country. But if it is to stand the wear and tear of the war, Lord Palmerston must justify by his acts in power the splendid reputation which he has so honourably won in subordinate spheres. It is on his shoulders chiefly that the burden will rest; and it is around his head if, as we hope, he shall prove successful that the glory of success will gather. With colleagues such as Lord John Russell and Lord Clarendon, his Government will be respected abroad, whatever may be its character at home; and, with a homogeneous band of working colleagues in the principal as well as minor departments of Office, he may surmount the unpopularity that at present attaches to the somewhat too aristocratic and exclusive composition of his Cabinet. The country having reason to suppose that the recent secessions have rendered Lord Palmerston's Administration as good and compact as it is possible to make it, he will have a fair but not a protracted trial. Much is expected at his hands; and what he has to do must be done speedily and successfully. The best intentions in the world will not save the present from falling, like the last Government, and being consigned to the limbo of all departed vanities and vexations, and vanishing, as Mr. Carlyle would phrase it, into "infinite space" and darkness.

The country is in a peculiar temper; and looks for VICTORY. Until that be achieved it will be difficult for any statesman, or set of statesmen, however great their genius, or pure their characters, to conduct its affairs with much profit or satisfaction. Sebastopol must be taken, or discontent will grow into danger; and many things more precious than the existence of a Ministry or of a Parliament will be called into question. The nation hungers and thirsts for Sebastopol. Its capture may atone for the mistakes which have been committed both by the Government and by the people; but, if that be not sufficient to allay the

SENTRY OF THE 4TH CHASSEURS D'AFRIQUE BEFORE SEBASTOPOL. (SEE NEXT PAGE.)

evil spirit that has been raised, we shall yet have a dreary and a dangerous crisis to travel through. The great and original mistake is now sufficiently obvious. The expedition started too late in the year for any enterprise—except for a *coup-de-main*. As that was not attempted—though its success might, in the opinion of competent judges, have been easy—it became necessary to winter in the enemy's territory. For such a result no person whatsoever, in or out of power, was prepared. Marshal St. Arnaud expected it no more than Marshal Raglan; and the sagacious and far-seeing Emperor of the French counted upon it as little as the Earl of Aberdeen. Hence the scandalous breakdown of our administrative system, the loss of more than one-half of the bravest and noblest army that ever fought in the service of this or any other nation, and the discredit of our name and Government in every part of Europe. Our Allies the French—whose armies are organised on a far superior system, and the whole functionaryism of whose Government is one vast coherent, cohesive, and central autocracy—suffered from the same blunder. They may have suffered less; and their shortcomings and calamities, whatever may have been their actual amount, may have been concealed by the judicious determination of the French General to admit no newspaper correspondents into the Camp; but the fact is notorious that British mismanagement has not been the only source of evil in the Crimea. The Russians, who are on their own ground, defending their own stronghold, and whose military system has absolute power at its summit, and a nation of serfs as its foundation and material, have suffered even more greatly than the French and British. We do not underrate what our own brave men have endured from causes which good statesmanship, no less than good generalship, might have prevented; but where, in the doleful record of the months that followed the glorious day of Inkerman, is to be found a calamity like that which has overtaken a Russian army 35,000 strong—more than 20,000 of whom have perished, and been utterly lost and consumed, in the snows of the dreary and barren steppes between Simpheropol and Perekop? The calamity will not much trouble the Emperor Nicholas; but, if a disaster half as serious had befallen a British army, what would have become of the British Constitution? and what would have been the character of the Revolution that might have been attempted by our outraged and offended people?

The nation, having opened its eyes to the real source of the evils it has had to lament, will cordially support any honest Ministers who shall efficiently and zealously commence the work of reform. The discouragement lately prevalent—and which has not merely surprised but annoyed the gallant remnant of our army in the East—will pass away. The immediate success of the Allies against Sebastopol is by no means improbable. Their ultimate success no one who knows anything of the matter has ever ventured to doubt. But, immediate or remote, Lord Palmerston must so work as to ensure it, or his Ministry will be wrecked amid a storm of discontent without parallel in our history. Those, however, who look beyond the Ministry to the Army itself and its brave allies at the post of danger and glory—may find abundant justification for the hope that the possession of Sebastopol by France and Great Britain will soon cease to be matter of speculation. Victory on that spot will clear away a whole wilderness of difficulties. Such a victory we confidently believe we shall not have long to wait for.

A SENTRY OF THE FOURTH CHASSEURS D'AFRIQUE.

THIS specimen of Crimean costume is not very elegant, perhaps, but it seems admirably adapted for the purpose of keeping the poor sentries warm. The capote, with cape and collar; the sheepskin gaiters reaching above the knee, and well strapped to the leg, and the sturdy wooden shoes, impervious to damp, must make the men feel tolerably comfortable, even amidst snow, especially after such a hearty meal of warm nourishing soup as the French generally have one.

The horses are tied up to the rope behind, by the right hind leg, and are protected in front by an earthen mound, with a ditch behind it, which keeps the place dry. The 4th Regiment of Chasseurs d'Afrique numbers 800 sabres, and has lost only three horses since October last.

DAY OF HUMILIATION.

A Supplement to the *London Gazette* of Tuesday, contains the following order for a day of fasting and prayer:—

BY THE QUEEN - A PROCLAMATION

FOR A DAY OF SOLEMN FAST, HUMILIATION, AND PRAYER.

VICTORIA REGINA,—We, taking into our most serious consideration the last and necessary war in which we are engaged, and putting our trust in Almighty God that he will graciously bless our armies both by sea and land, have resolved, and do, by and with the advice of our Privy-council, hereby command that a public day of solemn fast, humiliation, and prayer, be observed throughout our United Kingdom called England and Ireland, on Wednesday, the 21st day of March next, that so both we and our people may humble ourselves before Almighty God, in order to obtain pardon of our sins, and in the most devout and solemn manner send up our prayers and supplications to the Divine Majesty, for imploring His blessing and assistance on our arms, for the restoration of peace to us and our dominions. And we do strictly charge and command that the said day be reverently and devoutly observed by all our loving subjects in England and Ireland, as they tender the favour of Almighty God, and would avoid his wrath and indignation. And, for the better and more orderly solemnising the same, we have given directions to the most reverend the Archbishops and the right reverend the Bishops of England and Ireland to compose a form of prayer suitable to this occasion, to be used in all churches, chapels, and places of public worship, and to take care the same be timely dispersed throughout their respective dioceses

Given at our Court at Buckingham Palace, this 28th day of February, in the year of our Lord 1855, and in the eighteenth year of our reign.

GOD SAVE THE QUEEN.

The proclamation for Scotland is the same as the one for England, except as regards the mode of proclamation, which is as follows:

Our will is, therefore, and we charge that, this our proclamation seen, ye forthwith proceed to the Market Cross of Edinburgh, and all other places needful, and there, in our name and authority, make publication thereof, that none pretend ignorance. And our will and pleasure is, that our solicitor do cause printed copies hereof to be sent to the Sheriffs of the several shires, stewarts of stewartries, and bailies of regalities, and their clerks, whom we ordain to see the same published; and we do appoint them to send copies hereof to the several parish churches within their bounds, that, upon the Lord's Day immediately preceding the day above mentioned, the same may be published and read from the pulpits immediately after Divine service.

SALE OF THE SOUTH-SEA HOUSE. The sale by auction of this important property took place at the Auction Mart, on Tuesday, and attracted an extremely crowded attendance. The biddings commenced at £20,000, and after a spirited competition the hammer fell at £36,750. The purchaser was Mr. Marsh Nelson, the architect, but whether on his own behalf, or for a society, did not transpire.

The *Agra Citizen* publishes a curious case of a man named James Massey, who had formerly enlisted for the 98th Regiment and deserted, being claimed by an East India Company's sergeant—stationed to India—discovered not to be the real Simon Pure after all, and is now thrown adrift on the world to find his way home, without a penny in his pocket, the best way he can.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

The reports relative to the expedition of the Emperor vary so continually that it is impossible to form any positive opinion on the subject of his departure. That the plan is seriously contemplated, and every preparation made, there is, of course, no doubt; but *reste a savoir* if circumstances will not so modify these arrangements as to defer, or even entirely prevent, their execution. It is now said that if the expedition take place: it will probably start, *at latest*, within the first fortnight of March. The number of the Garde Impériale destined to accompany his Majesty is augmented from 3500 to 7000 men: they are to be commanded by the General St. Jean d'Angely. The Cent Gardes, who are also to form a part of the expedition, have had a new outrass provided, to replace that worn on home service; and a portable printing-press, attended by compositors, &c., selected from the best workmen of the Imprimerie Impériale, has been fitted up for the occasion. It is reported that M. Piétri, Préfet de Police, is to be admitted to the Council during the absence of the Emperor, and that the Baron Larrochère Lenoury, a naval officer of considerable merit and distinction, and who took and brought back the Prince Napoléon in the late expedition, will probably be the officer appointed to command the vessel which is to convey the Emperor to the Crimea. It appears certain that if the voyage takes place the Empress will join it. Mesdames de Pierres and Montebello are the Ladies of Honour named as likely to attend her Majesty; and Dr. Rayer, one of the most skilful of the medical faculty, and the physician to the Emperor, is to accompany her to Constantinople. M. Hervoix, the Commissaire de Police, charged especially to watch over the personal security of the Empress, has started for the south to prepare his mission.

A letter written from Vienna states that the mortal remains of the Duc de Reichstadt are to be almost immediately transported thence to Paris, and that instructions have already been given to the Administration of the Austrian railroads to take such measures as may be necessary for the facilitation of the transfer. The immediate accordance of the Emperor of Austria with the demand of the French Sovereign is looked upon here with much satisfaction

M. Thiers has met with an accident which has caused him much suffering, and his friends no less uneasiness. Returning home through the Place St. Georges, close to his residence, the celebrated historian slipped on the ice, which, a few days since, rendered the circulation both dangerous and difficult, and, falling, broke his arm in two places; the fever however, having been kept down, it is hoped that no very serious consequences will result from the accident

The sudden thaw, following on the severe frost and snow, is, we regret to state, productive of most disastrous consequences in many parts. The bursting of the ice, the inundations, and the evil effects of the alternate frost and thaw on the plantations and fruit-trees, which, in many places, have lost quantities of their branches, have been most deplorable, and it is feared the ensuing season will, in various respects, suffer from the results of these most unfortunate accidents. In several of the provincial towns it was impossible, during some days, to supply the markets; and in Paris the price of certain provisions—poultry and vegetables more especially—has risen to a most embarrassing extent. A quantity of wild-fowl, swans, teal, wild ducks, &c., have been shot, and sold in the markets.

A great sensation has been created by the entrance and discourse of M. Berryer, at the Academy; the latter was most successful, and the orator was, on several occasions, obliged to pause, in consequence of the bursts of applause which greeted him. The reply of M. de Salvandy was far from being equally well received; it was found to be long, tedious, and nearly a repetition of a discourse made by him on a previous occasion of a similar nature—that, if we mistake not, of the reception of M. Dupanloup, Bishop of Orleans. The Princess Mathilde assisted at the audience.

It appears that, on his return from Paris, Vely Pacha is to go to Vienna as Minister Plenipotentiary—a post for which his talents, tact, education, and intelligence render him peculiarly fitted in the present delicate position of affairs; and that Riza-Bey, who was recently named to take a part, as Counsellor of the Embassy at the Conference at Vienna, is to come to Paris in the same capacity.

The new volumes of the "Mémoires d'un Bourgeois de Paris" (V. and VI), forming the conclusion of the series) exceed in interest any of the preceding numbers. They relate principally to the events of the reign of Louis Philippe, and to those that have succeeded it. Nothing can be more interesting, more graphic, or more intimate than the details of this most exciting phase of French history. One of the striking points in the narration before us is the collection of letters, notes, reports, and revelations, true and false, respecting plots, real and pretended, against the life and government of the Citizen King. Hardly a day, hardly a night passed, that General Athalin, whose personal devotion to Louis Philippe and his family, was extreme, and into whose functions entered that of supreme director of the private police, did not receive announcements of some freshly-devised conspiracy, many of these coupled with the names of some of the most eminent and best-known men in France. Love-letters from obscure adorers to the Princesses abound among these curious documents; and some of the most interesting private letters from various members of the house of Orléans, addressed to their personal friends, and to each other, enrich the collection: those of the ill-fated Duc d'Orléans to the Duc de Nemours, give a particularly exalted opinion of the head and heart of the Prince; and one in especial, written on the subject of the latter's marriage, is a *chef-d'œuvre* of feeling, morality, and delicacy. "Marriage," he says in conclusion, "is all or nothing. There is no possible division of affection or intimate intercourse. When a breach in this is made, however small it be, it is like an air-cushion pierced by a pin—all oozes out by this invisible opening; the burden alone remains, and all that rendered it light and easy is withdrawn for ever." Various documents and letters of the Duchess d'Orleans—many of them relative to the education of her sons, and all displaying this Princess in the highest and noblest point of view—exist in the collection; with some most curious anecdotes and appreciations of the character and career of M. de Talleyrand; and a variety of hitherto unknown details respecting the events of the end of December. Altogether this work forms perhaps the most singular and interesting collection of *memoires a servir* for the history of France within a certain period that can possibly exist.

HAYTI.

(From our own Correspondent.)

By the arrival of the United States mail steam-ship *Union* we have dates from Hayti to the 30th January. The question as to who is to be the successor of Emperor Soulouque has been the subject of conversation, and General Count de Dal Marie has been proposed, but rejected by the north and south part of the island, and it is supposed that he will not have any better success in the west

The Chancellor is not of opinion that peace should be made with the Dominicans, and he will leave the country in April or May next for Paris, where a very handsome residence has been purchased for his reception Unfettered by this influence, it is fully expected that Emperor Soulouque will yield to the recommendations of the English and French Consuls, and sign the treaty of peace with the Spanish part of the island, and thereby remove the only impediment to the prosperity of the country.

THE WAR IN THE CRIMEA.

The most recent letters from the Camp before Sebastopol bring very little definite intelligence relating to the projected operations of the Allies, Lord Raglan having ordered the utmost secrecy to be observed on the matter. Artillery and Engineer officers are forbidden to give information respecting the works to any one but officers entitled to demand it, and Infantry officers are not allowed to get any details concerning the works and armaments. These orders are so stringent that no officer, unless he be known to the sentries, is allowed to go through the English lines above Balaclava, and the regulations apply even to naval officers, and to all officers of regiments not actually stationed on the spot.

It is gratifying, however, to know that the condition of the troops had very much improved, and that the ground was likely to be dry enough before long to admit of military operations on a large scale. Even so early as the 6th ult. the only traces of winter remaining were patches of snow on the hillsides and in the ravines. The thermometer was at that date up to 52 in the day time, and since then it has sometimes risen above 70. There have been, indeed, several rainy days, but to all appearance the worst of the season is now fairly over, so that we may soon expect to hear of something important having been done.

It is said that General Niel, in his report to the French Emperor, recommends a change in the mode of attack. Hitherto the principal points of attack by the besiegers have been the south-eastern portion of the exterior line of defence of Sebastopol, the Quarantine Fort, and the Flagstaff bastion. It has been resolved that the direction of the attack shall be changed. The principal point of attack chosen by General Niel is Fort Malakoff. Four batteries are to be erected at the distance of 600 metres from that bastion, which will completely unite the French and English works, and enable them to concentrate an overwhelming force against the place, and render it untenable. It is calculated that these works will be completed about the 10th of March, or, in allowing for accidents of weather and unforeseen delays, at all events by the 20th. By that time the Allied forces will be prepared to open a fire, which it is to be hoped will be decisive, with no less than 600 heavy guns

As to the French Emperor's journey, and the part he is to take in the operations of the siege, the following is the calculation:—In leaving Paris on the 7th, and proceeding direct to Toulon, it is supposed he will be able to reach Constantinople on the 14th or 15th, and Kamiesch by the 17th, or at all events by the 18th. By that time the works will be ready, or nearly so, and it is consequently believed that the formidable and irresistible attack which is in preparation will be made in his presence.

As regards the amount of the Allied forces before Sebastopol, it is difficult to obtain precise information. The following official return, however, shows the English army to be in a better condition than is commonly supposed:—

The grand total of our army in the East on February 6, was 44,948 men, thus composed:

Officers	1,242	
Sergeants	2,536	
Drummers	735	
Rank and File	40,439	
Grand Total		44,948
Of these, there were in hospital in Camp	5,778	
And sick at Scutari	12,344	
Making a total of sick	18,122	
There were missing as prisoners of war	134	
There were on command	2,498	
Deduct		20,754
And there were present as an effective force 24,194 men, thus composed		
Officers	1,343	
Sergeants	1,655	
Drummers	535	
Rank and file	20,762	
Total effective force		24,194

And this was exclusive of the naval brigade. Our effective force before Sebastopol was, therefore, on the 6th of February, in round numbers, twenty-six thousand men. Of the 18,000 sick, a large number will, it is said, be fit for service when the weather becomes milder.

RUSSIAN PREPARATIONS FOR A GREAT WAR.

Prince Gortschakoff continues to affirm that his Imperial master entertains the most peaceful intentions, but still all the news received from Russia bears a warlike character. Telegraphic intelligence reached Vienna this week that 40,000 men are to occupy Revel and the neighbourhood. Troops coming from the interior of Russia will be concentrated along the coast from Riga, in order to prevent a landing on the part of the Allies.

Immense works of defence are being likewise erected all along the military road leading from Helsingfors to St. Petersburg, and which crosses on several points marshy grounds of a certain depth, impassable even during summer. An invading army may thus be continually stopped in its march through the country. Since last year Sveaborg has been considerably fortified on the land side. Between the fortress and Helsingfors there are, independently of an intrenched camp occupied by a division of Grenadiers, two parallel lines of fortifications, to which a regular siege must be laid before an Allied army can venture into the country.

The Grand Duke Constantine has lately paid several visits to Cronstadt, where military works are in course of execution, and several new batteries are being constructed. The Czar himself has also made several excursions there, in order to satisfy himself that the armament of the forts in and around St. Petersburg is being proceeded with. Nothing has been neglected on the Austrian side, between Volhynia and Galicia, in order to complete the necessary preparations. Among other works going on is the arming of the fortress of Michaelograd, and the ground which will probably serve as the the theatre of war has been carefully surveyed and fortified with earthworks. For this purpose, all the militia between Mohilew and Witepsk has been provided with shovels and pickaxes, and set to work, the ground in those districts being now clear and open. For the future, the naval force of Russia is not to be increased by the sailing-vessels, but by steamers only. The Czar has ordered the organisation of two new corps of sailors, constituted in a military manner, although they are to be composed of civil engineers and workmen intended for service with steam-engines. The effective strength of these corps is not yet fixed, as that will be regulated according to the number of steam-vessels; but their formation, as well as their organisation, has been already approved by the Czar. One division of these men is to be formed on the Black Sea and the other to the Baltic; and the whole will be under the orders of the Minister of Marine, the Grand Duke Constantine.

Recent advices from Warsaw are filled with accounts of the immense deliveries of provisions to the Polish fortresses. Vast magazines are formed at Ostrolenka. The writers mention, with undisguised admiration, the great quantities of spirituous liquors which the care of the Czar has provided for his soldiery, and which are daily conveyed to the central depôts. From this it is inferred that Poland is expected to become the theatre of a great war. General Dekn, Inspector of Fortresses, reports that the three lines of defence, extending from Cronstadt to the Vistula, are in a complete and effective state.

The *Bourdin Buse* publishes the regulation prepared by the Directing Senate, and ratified by the Czar, for the organisation of the "Imperial Mobile Militia," as the new corps decreed in the recent manifesto is to be called. The first clause of the document declares that the corps is raised for temporary service, in defence of the faith, the throne, and the fatherland. It is enacted that exemptions from military service hitherto permitted shall not apply in the present case, but that whoever is liable to the capitation tax, or its equivalent, shall be liable to be called upon to serve in this corps. Merchants, Jews, and foreign colonists, who have been encouraged to settle in Russia, and received grants of land from the Crown, are excepted. To meet the expenses of the new corps, special "voluntary" subscriptions are to be made, for which the committees will open lists, and to which all persons are summoned to contribute. The subjects of the Emperor are abjured by their love of their country to make sacrifices corresponding to the occasion, and it is announced that the names and subscriptions of all persons will be published. The nobles, as soon as they have deliberated according to the directions foregoing, are to equip for their several localities, and exert themselves in forwarding the enrolment. The soldiers must not be younger than twenty, nor older than forty five years of age. In the formation of companies, inhabitants of the same village are to be kept together as far as possible. Those who have no fire-arms of their own are to be furnished with a musket and bayonet. The employment of the militia is to be at the pleasure of the Czar, and upon the termination of the war all persons serving in the corps will be allowed to go back to their homes. Should any fall in battle, their families will receive a certificate absolving them from obligation to furnish a recruit at the next levy.

THE TURKISH VICTORY AT EUPATORIA.

The defeat of the Russians at Eupatoria, of which we gave a telegraphic notice in part of last Saturday's Impression, is confirmed by a despatch of Prince Menschikoff, who admits that the General in command had found it prudent to "withdraw out of range, which was effected in the best order." This is the vague and modest style in which most of the Russian replies at Silistria were chronicled by the General who found himself worsted there by the despised Turks.

Lord Raglan's telegraphic despatch gives the following brief account of the affair:

BEFORE SEBASTOPOL, Feb. 18, 1855.

A force, said to be 40,000, of Russians, with a large number of guns, attacked Eupatoria at daylight on the 17th, and was repulsed with loss by Omer Pacha. The Turkish loss is said to be inconsiderable, but Selim Pacha, commanding Egyptian Brigade, was killed. The British men of war, under the Hon. Captain Hastings, covered both flanks with great effect. The action terminated at ten A.M., when the Russians retired a few miles.

Let this be compared with Prince Menschikoff's bulletin, and there will be no doubt as to the fact of the Russians having been soundly beaten. The Russian Commander writes from Sebastopol on the 19th:—

On the 17th the troops cantoned in the vicinity of Eupatoria were employed in a reconnaissance against the town, at a distance of 250 toises. They opened a cross fire, and the artillery in a very short time dismounted some of the enemy's guns, and also blew up five chests of ammunition

General Chrulef, who commanded, knowing that Eupatoria had a garrison of 40,000 men and 100 guns, ordered his detachment to withdraw out of range, which was effected in the best order.

The *Moniteur* of Thursday gives the following account of the affair, which differs somewhat from Lord Raglan's despatch:—

The Russians had eighty pieces of artillery, six regiments of cavalry, and twelve regiments of infantry. The combat lasted five hours and a half. The loss of the Russians was 600 killed, with wounded in proportion. The Turks had eighty-eight killed and 250 wounded; they lost seventy horses. Selim Pacha and Rusten Bey were killed. The attack has not been renewed. The town is in a good state of defence. On the night following the Russians bivouacked without fires or tents during intense cold. On the following morning they withdrew towards Simpheropol. Four vessels of war took part in the action.

The position of Eupatoria has, from the commencement of the campaign in the Crimea, been justly regarded as a point of extreme importance if hostilities extended to the northern districts of the peninsula. It was occupied without difficulty by the Allies on the 14th of September; for some time the garrison thrown into it consisted only of a few seamen and marines, who looked to the guns of their ships as their most effectual protection. Gradually, however, by the energy of the officers in command, the place was made to assume the aspect of an intrenched town. A regular line of defence and field-works was traced round it, and when the Turkish army of Omer Pacha was conveyed there in detachments from Varna it found a complete system of fortification, rudely executed, but skilfully planned, and not easily to be wrested from the troops which had defended Kalafat and Silistria. This Ottoman army now amounts to 30,000, or even by some accounts to 40,000 men; and, as its operations have of course been concerted with the Allied Generals before Sebastopol, the presence of such an army on the right flank of the Russians must be a source of great embarrassment to Prince Menschikoff and his condjutors. The attempt to force the lines of Eupatoria on the 18th has, however, signally failed, though it is said to have been undertaken by a large division of Russian troops and 70 guns. Should the operations of this corps be continued, it may not be unreasonable to expect that General Canrobert and Sir Colin Campbell will seize the opportunity to act against the advanced posts of the Russian army, which are once more thrown forward and intrenched in our rear at the village of Kamara. If the statements last received from the seat of war are correct, the Russian forces are divided into three distinct corps—the garrison of Sebastopol, the army which is watching our rear from the valley of Baidar to Inkerman, and the corps which has just attacked the Turks at Eupatoria. If it be correct that there are 35,000 Russian soldiers in the hospitals, there can be no doubt that the enemy has suffered very severely, and that their effective force is as much reduced as that of the Allies. Indeed, were it otherwise, the Russians would doubtless long ago have renewed the attack on Balaclava. It is, moreover, reported that several thousands of Russian troops, on their way to reinforce the army, have recently perished in the snow which covers the vast steppes in the north of the Crimea. If these circumstances are correctly stated, the Allies will no doubt take the earliest opportunity of availing themselves of this dissemination of the Russian forces, and of beating them in detail.

One of the greatest of many errors committed by the Russian commander is that he attached no importance to the possession of Eupatoria whilst merely defended by a handful of men. If he had exhibited boldness to rush to the battle of Inkerman, Dannenberg's corps, coming from Perekop, might have attacked and probably put to flight the place at the end of October, and put an end to further consolidation there. Nothing, most probably, would have been required for that purpose but to have sent a strong detachment of this corps a short distance out of the direct route. The place, as every one knows, Eupatoria is not retaken, be much lamed, and kept in check. Nor is it a little discouraging for that army that the campaign should be reopened, as the campaign against the Turks opened and closed, by the defeat of the Russian troops before a Turkish intrenched camp. If Liprandi, instead of Osten-Sacken, had commanded the assailing corps, not only nearly all the same troops, but the same commanders, would have been opposed to each other, as was the case last year at Kalafat. Omer Pacha embarked from Varna on the 7th instant for Eupatoria, and therefore commanded in person.

RUSSIAN DECLARATION OF WAR AGAINST SARDINIA.

The following circular has been addressed by the Russian Government to its foreign agents, in reference to the entrance of Sardinia into the Western alliance —

The Court of —— will no doubt share in the opinion of the Emperor as to the policy of his Majesty the King of Sardinia, on learning that this Sovereign, without any avowed motive or legitimate grievance, without the appearance even of the least injury to the direct interests of his country, has placed a corps d'armée of 15,000 men at the service of England for the invasion of the Crimea.

In coming to this determination, the Sardinian Government appears to have lost to the public prints the task of informing us of an aggression which it has not undertaken to justify by a declaration of war

We understand the motive of this silence

The Court of Turin, we admit, would have found it difficult to reconcile its duty with the national feeling of its country. It would have found an equal difficulty in placing its present conduct in accordance with the old reminiscences of the House of Savoy

By consulting the annals of its history, it might cite an instance of a Russian army passing the Alps; but, it is true, for the defence of Piedmont, and not to invade it

In the councils of the Cabinets of Europe, under the reign of the Emperor Alexander of glorious memory, Russia still lent her faithful support to the independence of Sardinia, at the re-establishment of the House of Savoy on the throne of its ancestors.

Must we add, also, that if Genoa was at the same epoch reunited to the kingdom of Sardinia, it was because the Imperial Cabinet recognised the necessity of ensuring at once the greatness and the commercial prosperity of a country which the arms of Russia had contributed to liberate from a foreign yoke?

At the present moment, forgetting the lessons of the past, the Court of Turin going to direct against us, from this very port of Genoa, an enterprise of hostility that Russia is conscious of not having provoked.

The attitude thus taken by the Sardinian Government, without, as we have said, a formal declaration of war, would leave us even in doubt as to the line to be given to an auxiliary force destined for the invasion of our frontiers, after the flag of a country with which we have hitherto contained to live peace.

However, if the Court of Turin loses sight of the principles and usages contained by the law of nations as the immutable standard of the international relations of States, the Emperor, for his part, holds himself bound to preserve them.

With this purpose, his Imperial Majesty feels he must declare peace to have been broken in law and fact by this act of flagrant hostility, the sin of both falls on the Sardinian Government.

We leave it to bear the responsibility before the opinion of its own country and the whole of Europe.

Moreover, it is for the Allied Powers to appreciate the conduct of the Court Sardinia, seeing that it has deemed it proper and honest to turn its arms against us at the very moment that the Imperial Cabinet was entering, as we shall see, on deliberations destined to open a path to the re-establishment of peace.

The sentiments that tend to the accomplishment of this work of pacification would appear to have been strangely misconceived by the Cabinet of Turin. In fact, whilst the Governments of Central Europe wisely interposed their legitimate authority to hinder one of the belligerent Powers from recruiting its legions in the bosom of States that desired to have their neutrality and entire independence respected, the Sardinian Government, less sparing of the blood of Italy, consents to shed it in a cause foreign to the political and religious interests of its nation. For, most certainly, it will not be pretended that the House of Savoy holds it honourable to serve the cause of Christianity, when it displays its banner by the side of that of the Crescent. Neither can it be said that she has at heart the defence of the weak against the strong, when she unites her armies to those of France and England.

This latter Power it is, if our information is correct, that takes the Sardinian troops under its command; we say not into its pay, for we abstain from wounding the national feeling of a country with which we regret to find ourselves at war

Notwithstanding this necessity, the Emperor will still know how to protect the private interests of Sardinian subjects maintaining with Russia old commercial connections. The fault of their Government shall not be visited on them. Their property shall be respected; they shall be free to remain in the empire, in full security, under the protection of our laws, as long as they conform to them. But the Sardinian flag will henceforth cease to enjoy the prerogatives that exclusively belong to the mercantile marine of neutral Powers.

A term will be fixed for the departure of such Sardinian vessels as may at present be lying in the ports of the empire. The *exequatur* is immediately withdrawn from the Consuls of Sardinia in Russia.

The Russian agents resident at Genoa and Nice in like manner receive orders to suspend the exercise of their functions: the peace between the two countries having been broken by the Court of Sardinia from the moment she acceded to the treaty of alliance concluded on the 10th April, 1854, between England and France.

The Emperor has deigned to charge me with the communication of these determinations to all friendly Powers

NESSELRODE.

AMERICA.

By the arrival of the steam-ship *Africa* at Liverpool on Tuesday, we have news from Boston to the 14th ult

A statement which required confirmation had been published to the effect that a portion of an expedition against Cuba had left New Orleans and other southern ports. The total enlistment in this enterprise, it was said, amounted to 3500 men.

Letters from Havannah, of the 1st ult., state that the Captain-General was on the *qui vive*, after having heard that an expedition of invasion was about to sail from the United States. Two British men-of-war, one bearing an Admiral's flag, were seen steering into Havannah.

The House of Representatives has passed the Texas Debt Bill, with an amendment, reducing the indemnity to the creditors to 6,350,000 dollars, being the principal, accrued interest, and present market worth of the 5,000,000 Public Stock reserved for this object under the compromise measures of 1850. Mr. Houston, of the Ways and Means Committee, succeeded in getting a test vote to go into Committee of the whole House on his proposed amendment of the tariff—yeas 104, nays 97. But, on going into Committee, the House decided by another close vote to take up a different bill, which virtually negatived the previous proposition.

Mr. Breckinridge has stated in the Senate that he had declined the appointment of Minister to Spain.

The Government of Washington has remitted the order made by Judge Ingersoll to condemn to the United States the British steam-ship *Argo* for smuggling. The penalty to which Captain Nye, of the steam-ship *Pacific*, was rendered liable in consequence of his steward being convicted of smuggling watches, has also been remitted.

Proceedings have been commenced against the Spanish Consul in New York—damages laid at 10,000 dols., for an assault and battery on the young Cuban, Hernandez, in the late attempt to remove him from America to Cuba. Carnobell, the agent who acted in the affair, has been arrested for the same offence, and held to bail in the sum of 2000 dols.

The Chicago and Mississippi Railroad was to be opened on the 9th ult. The Illinois Central Railroad would also, probably, be opened the same day.

The United States' mail steam-ship *North Star* arrived at New York on the 8th ult., one week's later news from California, and specie value 1,259,209 dols. The Panama Railroad is an length completed. On the 28th of January a train passed over the Isthmus, from Aspinwall to Panama, for the first time. Its arrival caused a great excitement at Panama.

It was reported by the *North Star* that a part of Santa Anna's army, 2000 in number, had deserted and gone over to Alvarez. A portion of them, with some of the officers, reached Acapulco on the 23rd of January.

DISTURBANCES IN AUSTRALIA.

Accounts from Melbourne to the 2nd of December state that serious disturbances had taken place at Ballarat, and that things still wore a threatening aspect at the departure of these advices. The riots sprang out of an attempt to arrest a digger for the non-payment of his licence. Rumours of disturbances had reached Melbourne as early as the 27th of November, and before any actual overt act; and it would appear that the Government had already taken precautionary measures by moving down small parties of the 12th and 40th Regiments, under the command of Captains Atkinson and Wise. On the 30th November, however, the diggers still persisted in refusing to pay their licences, on Mr. Commissioner Rede attempting to collect them, supported by a body of foot and mounted police, and the armed party of military before mentioned. Unfortunately a collision took place, but without loss of life. Some of the diggers were made prisoners; and it was feared that an attempt would be made at a forcible rescue by their companions. The *Melbourne Argus* of the 2nd says:

The Government is thoroughly aroused, and is concentrating the whole military and police force of the colony at Ballarat. All the available men of the 40th and 12th Regiments have left town for that locality. A body of 300 rank and file of the former regiment, with their band, were marched out yesterday afternoon, under the command of Lieut.-Col. Valliant and the whole of the officers of the regiment. They took with them four field-pieces, and two 6 and two 12-pounders. All the officers and men of the 12th Regiment, with the exception of Captain Vereker, and the necessary guard, have left for the same place. They number about 300. Twenty-four more-of-war's-men and about twenty marines from her Majesty's ship *Electra* have also been sent off. Fifty horse and about the same number of foot police were to be despatched yesterday afternoon. A large number of baggage and ammunition waggons were sent with the military. We also hear that Sir Robert Nickle, Commander-in-Chief of the Forces, and Colonel M'Cartney, Adjutant-General, intended to start for Ballarat at three o'clock this morning. The amount of the force, military and police, to be assembled at these diggings will be little short of 1000 men.

INDIA AND CHINA

The steamer *Calcutta* arrived at Trieste on Tuesday morning, at six o'clock. An expedition was about to proceed from Mahsowr into the Mecranzaie valley, a long narrow deep defile parallel to the Kohat valley, and through which the principal trade to Cabul used to be conducted. Nominally a portion of the Punjaub, it became British territory in 1849, but the inhabitants of it in reality never owned a master, and have lived the lives of robbers and freebooters. Now that our hands are at leisure, it has been resolved to bring them into subjection. The 10th Hussars, with their horses, nearly 400 strong, had quitted the presidency for Suez, and it is thought will be at the scene of action by April. Large detachments of infantry and cavalry were to follow. There are at present 27,000 Queen's troops in India, or 7000 more than the Act of Parliament allows; with peace so universal as it is at present, and prospects of tranquility so favourable, 10,000 or 12,000 might be spared with inconvenience.

In China the civil war rages as fiercely as ever. Trade at Canton is almost stopped.

MR. ROEBUCK'S COMMITTEE.—This committee, consisting of Mr. Roebuck, Mr. Drummond, Sir John Paddington, Colonel Lindsay, Mr. Layard, Mr. Ellice, Lord Seymour, Sir George Cornewall Lewis, General Peel, Mr. Bramston, and Mr. John Ball, met on Monday, at half-past three, for the first time, for the purpose of choosing a chairman, and considering what course they should adopt in prosecuting this important inquiry.

THE election for the Cardigan burghs has terminated in the return of Mr. Lloyd Davies, who polled 298 votes, against Mr. Evans's 216.

WEST RIDING REPRESENTATION.—We are informed that there is not the smallest authority for announcing that Mr. John Parker, the late member for Sheffield, would be proposed for the West Riding in case of a vacancy or an election, and that such a thing is altogether improbable.—*Leeds Mercury*

THE TURKISH CONTINGENT.—Major-General Vivian, of the Madras army, who was for many years Adjutant-General of that Presidency, has been appointed by Lord Panmure to command the Turkish contingent. The officers will be selected principally from the Indian army. Lieut. E. B. Rumsay, of the Madras army, has been appointed Aide-de-Camp. General Vivian will leave London next week. These are the only appointments which have been yet made. The contingent will consist of 20,000 men of all arms, the full number authorised by the convention between Great Britain and the Ottoman Porte.

NAVAL AND MILITARY INTELLIGENCE.

DESPATCHES FROM LORD RAGLAN.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Grace the Duke of Newcastle by Field-Marshal the Lord Raglan, G.C.B.:—

War Department, Feb. 27, 1855.

Before Sebastopol, Feb. 18, 1855.

My Lord Duke,—I mentioned to your Grace, in my despatch of the 10th inst., that there had been a return of bad weather, and that the country was again saturated with wet.

On Sunday it rained or snowed from morning till night, and the wind was very high; and though it was fine yesterday, still the ground was in a worse state than I had seen it for some time.

The enemy has made no movement.

Major-General Jones, Royal Engineers, arrived a few days ago, and is busily engaged in making himself acquainted with the position occupied by both armies.

Lieutenant-General Sir George Brown has also returned, and I have great satisfaction in adding, in excellent health. His wound is healed, and, with the exception of not having entirely regained the full use of his elbow, he no longer suffers any inconvenience from it. He will resume the command of his division without loss of time.

I enclose the return of the casualties to the 11th instant.

I have, &c.,

RAGLAN.

His Grace the Duke of Newcastle, &c.

NOMINAL RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES KILLED AND WOUNDED, FROM 9TH TO 11TH FEBRUARY, 1855, INCLUSIVE

KILLED

47th Foot: Sergeant Joseph Godfray.

WOUNDED.

88th Foot: Private Dan. McMahon, severely.
54th Foot: Lance Corporal Jos. Bliss, slightly.

J. B. BUCKNALL ESTCOURT, Adjutant-General.

War Department, March 2.

Lord Panmure yesterday received a despatch and its enclosures, of which the following are copies, addressed to his Grace the Duke of Newcastle, by Field-Marshal the Lord Raglan, G.C.B.

Before Sebastopol, Feb. 17.

My Lord Duke,—I have the satisfaction to acquaint your Grace that the weather has improved since I last addressed you, and the country is becoming drier.

Two days ago the thermometer was up at 60. It was somewhat lower yesterday, and this early this morning it was down below freezing point, and at his moment it is snowing.

I mention these particulars in order to show your Grace how variable this climate is.

No movement has been made upon the part of the enemy. The garrison of Sebastopol is engaged in deepening the ditches, and improving the defences of the south front, and in constructing works on the north side of the harbour.

I have received information that the Russian army, in the neighbourhood of Bagtchesarai and Simpheropol is suffering much from the want of provisions, and from privations of all kinds.

I am happy to be able to say that the railway is making considerable progress, and that every hope is entertained that in the course of a very short time it will be available for transit as far as Kadikoi, which will accelerate the conveyance of stores up to the Camp.

I enclose the return of casualties up to the 16th inst.

I have great pleasure in stating that Colonel Bell of the Royal Regiment, who received a slight wound in the side from a musket-ball, when commanding the left in the trenches, on the night of the 14th inst., experiences very little inconvenience from it, and has felt well enough to continue to discharge his duty with his accustomed zeal.

I have, &c.

RAGLAN.

His Grace the Duke of Newcastle, &c.

NOMINAL LIST OF OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES WHO HAVE BEEN WOUNDED FROM THE 9TH TO THE 15TH OF FEB., 1855

1st Royals: Colonel George Bell, slightly
13th Foot: Private Maurice Bannah, severely
28th Private Thomas Collins, severely
44th Sergeant Isaac M'Leary, slightly.
47th Private John White, slightly.
54th Private Thomas M'Enright and Daniel Barden, dangerously
88th: Private William Murray, severely.
90th. Private James Hobbs, severely

J. B. BUCKNALL ESTCOURT, Adjutant-General.

THE BALTIC FLEET.

As far as can be ascertained at present, the fleet about to be despatched to the Baltic will thus be composed:—

Commander-in-Chief—Rear-Admiral of the Blue, the Hon. R. S. Dundas, C.B.

Second in Command—Rear-Admiral of the Blue M. Seymour.

Third in Command—Rear-Admiral of the Blue, R. L. Baynes, C.B.

Captain of the Fleet—The Hon. F. T. Pelham.

Duke of Wellington (flag), 131 guns, 700 horse-power.

	Guns.	H.-P.		Guns.	H.-P.		Guns.	H.-P.

The *Belleisle*, 24, Commander Hosken, hospital ship.

The *Sphinx*, 42 ammunition magazine.

The *Perseverance*, storeship.

The *Volcano*, floating engineers' factory, Master Commander Dyer.

Rear-Admiral Seymour has hoisted his flag (*pro tem.*) as second in command of the Baltic Fleet on board the *Ajax*, at Plymouth.

THE Oxfordshire Militia, having obtained the required number of volunteers, are to proceed immediately on foreign service.

THE Government has entered into an extensive contract for the supply of Minié rifles for the use of the Rifle Brigade and 60th Royal Rifle Regiment, and rifled carbines for two cavalry regiments, which will be designated "Mounted Riflemen." This latter branch of the service was found to be most efficient in the campaign on the Rhine in the years 1793 and 1794. A large contract for cavalry sabres, holster pistols, and lances has also been agreed to, in order to place the cavalry arm of the service on the most efficient footing. A quantity of manguetons, pistols, cutlasses, boarding-pikes and tomahawks, have also been ordered for the Navy, the greater portion of which are to be delivered into store at the Tower by the middle of this month

RECRUITING FOR THE ARMY.—"HORSE GUARDS.—At the instance of the General Commanding-in-Chief, the Secretary-at-War has concluded to an arrangement by which soldiers who have purchased their discharge, or obtained it free discharge by indulgence, and who subsequently re-enlist within two years after their discharge, shall be allowed to reckon their former service towards pension; which indulgence, however, is only to apply to men who have never deserted, or may re-enlist, after the 31st December, 1854. Directions have been given for altering the Royal warrant accordingly. By command of the General Commanding-in-Chief.—G. A. WETHERALL, A.G."

THE *Great Britain* screw-steamer is now complete for troops. She is victualled for ten weeks for 1500 men and 56 officers. She has 1350 hammocks and 162 berths; total, below and under cover, 1521. She is also complete with the usual medical requirements. The *Alma* (also a screw) is completely fitted in the first style of comfort for 200 cavalry horses. She stows twenty days' water for them, and, taken altogether, is a most desirable vessel for horses. She will also carry out 300 men, and has superior accommodation for about fifty officers. The new screw-steamer *Indian* is also fitting at Liverpool, for 120 horses. The *Cambria*, recently returned from the Crimea, is having a thorough overhaul, and being fitted up for the conveyance to the seat of war of 100 horses.

ON Saturday a number of the medical officers attached to the Government Civil Hospital at Smyrna, left the London-bridge station for Marseilles, en route for Paris for Marseilles. They were accompanied by a body of forty orderlies. It is expected that the nurses will be sent out immediately by the same route

THE LATE MR. HUME.

In our last Number we gave a memoir of the late member for the Montrose burghs, and we have this week given a Portrait of him from a recent type by Mayall. In the House of Commons last Monday evening Lord Palmerston paid a high tribute to the memory of the deceased politician. After moving that the Speaker do issue his warrant to the Clerk of the Crown for a new writ for the election of a member to fill the vacancy, he went on to say:—

Sir, I cannot simply confine myself to the bare motion that I have just put into your hands (Cheers). I should not be doing justice to the feelings of the House if I were not to express the feelings of regret that are shared, I am sure, by all who hear me (Loud Cheers), and the feelings of respect that we entertain for the memory of the colleague—the member—whose loss we have now to replace. Sir, it has been said of an eminent man of former times that he "gave up to party what was meant for mankind." Sir, the reverse of that may be said of our late colleague, Mr. Hume (Cheers), for the party to which he devoted the labours of his life was his country, and, beyond his country, the general interests of mankind at large (Cheers). Sir, many men have obtained an eminent position in this House by placing themselves at the head of a faithful band of friends whose object has been to acquire political power to enable them to govern the country. Mr. Hume was a remarkable instance of a man who gained an eminent position in this House and the country, who established himself a name which, I may say, was not only known throughout Europe, but whose reputation passed beyond those limits, by exertions that were wholly disinterested, as far as he himself was concerned, and totally separate from any attempt to acquire, by his own exertions or those of his friends, political power in the country (Cheers). He was a man of whom it may be said that he took the lead in almost every measure of improvement which has of late years been carried into practical application. He had industry that nothing could tire or overcome. His acquirements spread over the whole range of those matters which concern the interests of the country and the general interests of the community at large (Cheers). He had perseverance that was baffled by no obstacle; and it is due to him to say that, although during the whole course of his proceedings and of his attempts to carry out his own opinions he had frequently many opposed to him, and was frequently exposed to those rough conflicts which are the necessary consequences to a man who is trying to enforce his opinions in this House, yet nothing that ever passed between him and those most opposed to him ever left one trace of resentment, one particle of bitterness on his mind (Cheers). And while I remember to have heard it said of one person who held a high position in this House that whatever acrimony might have been created by party conflicts never went with him beyond the doors of this House, I may say that no feelings excited by party conflict ever went with Mr. Hume to the doors of this House (Hear, hear). A man with greater industry, a man who devoted his whole life with greater consistency to the good and service of his country, has never sat within these walls (Cheers). I am persuaded that those who differed from him in opinion upon the matters which he felt it his duty to bring before this House, and to recommend for the adoption of Parliament must do him the justice to say that he acted from the purest motives of a sincere desire for the welfare of the country. Those who differ from him must do justice to the integrity of his character, and we must all say—those who agree with him, as well as those who differ from him—that the death of a man possessing his abilities, his industry, and his disinterested character must at all times be a great loss to this House. He was a man peculiarly belonging to the age in which he lived. He had party feelings—that is, he was associated with those who agreed with him in the objects he sought to accomplish; but his party feelings were totally independent of the attempt to acquire political ascendancy (Cheers). He endeavoured to do what he thought his duty to the country. Where he succeeded he was proud of his achievements; where he failed he did not relax his efforts, and still continued his career of public usefulness (Hear, hear). Sir, I am sure we all look back to his loss with regret, and no man feels more sincerely than I do the regret with which every person must have proposed the motion which I now move (Cheers).

Sir J. Walmsley, having enjoyed the confidence and friendship of Mr. Hume, wished to add one sentence to the well-merited tribute just paid to his memory (Hear). Mr. Hume's public labours were only exceeded by his private worth. He never made an enemy or lost a friend; and he trusted that a grateful people would not let the opportunity pass without some fitting memorial worthy of himself and the country (Hear, hear).

Mr. Brotherton wished to be permitted to pay a humble tribute of respect to the memory of Mr. Hume. He had been for twenty-one years a witness of his labours, and he never saw a man less actuated by feelings of party than Mr. Hume, or who had more claims to the respect and veneration of the country. If ever there were an honest member of Parliament, Mr Hume was one (Cheers).

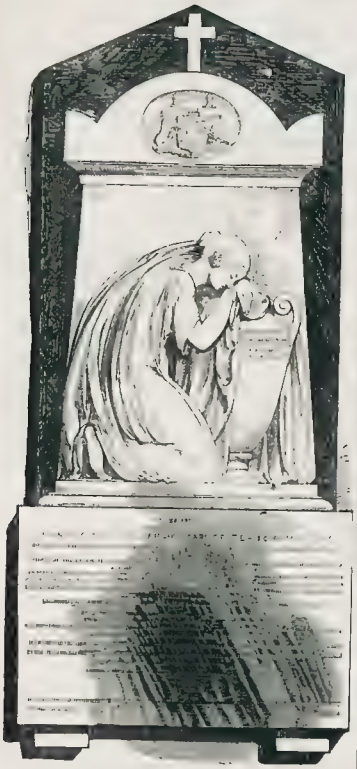
THE LATE MR. JOSEPH HUME, M.P.—FROM A PHOTOGRAPH BY MAYALL.

Men Wanted in Russia. Letters from the Polish frontiers mention as a fact that the Customs and other authorities have received orders to let in all emigrants applying for admission into Poland, whether they left the kingdom from political or any other motives. What sort of reception awaits those who may be induced to return deponent saveth not. At the same time orders have been given to the frontier custom-houses to give to every German surgeon who arrives and reports himself as willing to enter the Russian military service the sum of 20 silver roubles to defray his travelling expenses as far as Warsaw. The authorities at the frontier stations of Lieb-bitsch and Szuzwo have, however, not yet had an opportunity of obeying these orders; and, after it has become known how German surgeons are treated in Russia, it is supposed that the custom-house people will be much inconvenienced and overrun by German army surgeons requiring the 20 roubles to carry them to Warsaw. If the order were reversed there can be no doubt that many would avail themselves of it.

DAMAGE TO THE SOUTH DEVON RAILWAY, NEAR DAWLISH.

Early on Friday morning the 16th ult., considerable damage occured to the line near Dawlish, owing to the violence of the sea, when more than thirty yards of the wall adjoining the line was destroyed, the waves tearing up also a considerable portion of the embankment under the romantic cliffs, forming a sort of chasm, and destroying the line. The train has been consequently impeded, and the passengers obliged to alight and carry their luggage some distance, crossing a temporary platform, to the carriages waiting their arrival. The scene, although a melancholy one, has a picturesque appearance, especially at night time, as many workmen are employed, and work by fire-light, while the raging sea is threatening them with destruction. Amidst the waves, near the cliffs, is a very curious mass of rock called "the Parson," which has withstood the storms for ages, though another mass, called "the Clerk," has long since disappeared. The cliffs at this part of the coast are highly picturesque, and the distant ones are visible for many miles; and, with the addition of vessels, the prospect is perhaps, not to be surpassed for pictorial effect. For the sketch we are indebted to Mr. F. W. L. Stockdale.

ACCIDENT TO THE SOUTH DEVON RAILWAY, AT DAWLISH.



TOMB OF THE EARL OF BEAUCHAMP, JUST ERECTED IN THE PARISH CHURCH OF ST. MARYLEBONE, NEW ROAD.

This very interesting memorial has lately been placed in the parish church of St Marylebone, to the memory of the late Earl of Beauchamp, by his widow, Catherine, Countess of Beauchamp. The tablet consists of a bas-relief, which has been executed in Italy, and is a fine work of art. The urn bears in Greek, "He is not dead, but sleepeth" Above are the arms of the Earl and Countess (his second wife), in their proper colours; the whole surmounted by a white marble cross. The following is the inscription:—

Sacred to the memory of JOHN REGINALD PINDAR, third Earl of Beauchamp, [illegible] Viscount Elmley and Baron of Powyke, county of Worcester, who for he was beloved and respected for thirty years as a landlord and [illegible] as well as a consistent politician. He was endowed with rare common sense, and superior abilities for business. He attained great knowledge in agriculture, in the pursuits of which he took pleasure. He was remarkable for the constancy of his attachment to the friends of his youth, and he never forgot a kindness. He bequeathed £60,000 for the erection and endowment of almshouses at Newland, Worcestershire, for the benefit of the agricultural poor. The last act of his life was to rebuild, at his sole expense, the church at Madresfield. He died January 2nd, 1853, aged sixty-nine years, after a long illness, borne with exemplary resignation, placidity, and gentleness. His widow Catherine, Countess of Beauchamp (third daughter of the Baroness Braye), received his last sigh and mourned his loss. She erects this monument as a tribute of affection to his memory.—Jesu Mercy!

"I am the resurrection and the life. He that believeth in me, though he were dead, yet he shall live." St. John, c. ii., v. 25

SKATING IN THE REGENT'S CANAL TUNNEL.

SKATING UNDERGROUND.

This Illustration is another remarkable scene consequent upon the intense frost. During the whole of last week, the canal from Regent's-park Basin to Paddington, presented a scene of much animation and bustle, from the number of skaters and sliders upon it. The Illustration is taken from the Regent's-park end of the tunnel, through which the canal runs under Aberdeen-place and Maida-hill (about a quarter of a mile long) which throughout each day was traversed by hundreds of skaters, who went through and through, in imitation of express trains, with appropriate noises and whistlings, as of engines letting off the steam, &c.; the ice being considered good from there having been no snow upon it, and the bargemen being unable to draw the ice-barge through to break it, at the commencement of the frost. The icicles from the roof gave a very picturesque appearance to the scene. On Sunday the 18th ult., there was such a concourse of people at one time going through, it was considered dangerous; so that a number of policemen were very properly stationed at each end to stop them, as it was feared they might accumulate in the middle, and cause the ice to give way. Next day, the police were withdrawn, and "the trains" were allowed to run as usual.

THE THAMES FROZEN OVER AT RICHMOND.

Among the memorabilia of the recent frost was the freezing of the entire width of the river Thames at Richmond, which had not occurred for seventeen years. Many persons crossed the ice by two paths—one from opposite the villa of the Duke of Buccleuch, and the other just above the bridge, where the ice was much rougher; both paths were strewed with sand, for the safety of the passengers. Some of the Richmond skaters took advantage of this rare state of the river; but the greater number, including a few ladies, preferred the smoother ice of the large ponds in Richmond-park

Our Artist has sketched the frozen Thames as seen through one of the arches of Paine's Bridge, which forms a constituent feature in many beautiful views from surrounding points—

To where the silver Thames first rural grows

We miss the luxuriance of the pendent woods and deep masses of shade which are the poetical characteristics of the resplendent river scenery; but we enjoy in their stead the beautiful forms of the bare bough trees to delight the student of nature, and the sports on the ice to break the silence of the wintry landscape.

THE THAMES FROZEN OVER AT RICHMOND

CALENDAR FOR THE WEEK.

SUNDAY, March 4.—2nd Sunday in Lent.
MONDAY, 5.—Battle of Barossa, 1811. Dr. Parr died, 1825.
TUESDAY, 6.—Michael Angelo born, 1475.
WEDNESDAY, 7.—St. Perpetua.
THURSDAY, 8.—Raphael born, 1483. William III. died, 1702.
FRIDAY, 9.—David Rizzio assassinated, 1566.
SATURDAY, 10.—Sir Hugh Myddelton died, 1589.

TIMES OF HIGH WATER AT LONDON-BRIDGE,

TO CORRESPONDENTS.

*** We have received a sheet of rubbish from New York, called an *American cheap Newspaper*, purporting to give the personal history of the Press of London. To our own knowledge the newspaper is full of inaccuracies and grossly personal impertinence; and with regard to what is said about the commencement of the ILLUSTRATED LONDON NEWS, we give the flattest contradiction to its statements. If any alteration in the stamp of newspapers were to produce such journals in England as this American specimen, no calamity we have of late experienced, would equal the nuisance. We are bound in justice to state that many of these offensive journals are not conducted by Americans, but by expatriated Irishmen, and the effusions of the London press, who for legal and other reasons dare not show their faces in Great Britain. Still, we regret that the people of the United States should encourage such publications.

CLERICUS, Liverpool, asks when was the first payment of Income-tax on incomes of £100 a year due? Ans. The autumn quarter of 1853. 2. When was the amount raised from 5d. in the pound to 10d.—Ans. In March, 1854. 3. Is not the interest of money borrowed for the purpose of carrying on trade legally exempt from Income-tax? Ans. No.

PHILIPPE DE——The passage in question is from Shakspeare's "As You Like it."
A Subscriber, Hackney, should apply to Messrs. Reeve, Natural History publishers, Henrietta-street, Covent-garden.
O. H., Rochdale.—The Earl of Derby's son, Lord Stanley, sits in Parliament for King's Lynn.
T. H. S is thanked. We have not room for his letter.
VOLUNTEER.—A History of the Hon Artillery Company, &c, has been published.
J. B. D. B., Lowestoft, had better send his letter, under cover, to the French Ambassador
A POLPLAR'S DAUGHTER. We regret that we have not room for the lines.
C. G and P.—The lines are inadmissible. INCOME-TAX, Newport, is liable.
M. C. GUERNEY.—Declined. R. P., Balaclava, is thanked.
F. A. Donegal.—Address: Kensington. W. B., Cork.—Received

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, MARCH 3, 1855.

THERE is no doubt a peace party in Russia—if that can be called a party which has no organisation, or means of intercommunion. We may suppose that the Russian lovers of peace, whom the Czar will not allow to speak, are composed not only of the widows and orphans of those who have fallen under the fire of the British and French legions, or who have miserably perished in the snows of the Crimea, but of the lordly owners of the serfs who supply the human nutriment for the grim and bloody Moloch of war, and who, in the absence of a great and thriving middle class, pay the whole cost of the present struggle. No doubt they are lovers of peace; and would, if they had an opportunity, make their wishes heard in the Imperial presence. But, whatever be their strength or weakness, no voice from them reaches outer Europe. In like manner there is doubtless a party in France which hates war for its derangement of commerce and industry, and for the countless national as well as private evils which it produces; but Europe hears little of its sentiments, for France is dumb, except for approval. The Turks, too, may have a peace party amongst them, which would rather yield to the Czar than be at the trouble of fighting against him; though we doubt whether there is one such man in the Turkish dominions who is not a Greek by birth and religion. It thus happens that a portion of the English are the only peace-mongers who can manage to make their opinions heard in the world. But we must not overrate their importance on that account. Strictly speaking, the British Government, and the large bulk of the sound-hearted British people, are friends of peace—peace at all price—peace even at the heavy price of war. It is for peace that we are fighting;—peace so solid, and so well secured by victory, that not even Nicholas and his hordes shall dare, or be able, to break it.

But we have another peace party which is in reality the party of war—the party of submission to wrong, because it is inconvenient and troublesome to enforce the right; the party which would yield to the strong ruffian's demands, rather than put on an attitude of manliness, and defy him; the party which would invite war by the very means which it foolishly employs to prevent it; the party of silly sheep that bleat with virtuous unconcern when the wolf has seized the youngling of the flock, and is devouring it before their eyes. As long as this party avoids argument and sticks to its dogma, that war is, under all circumstances, a crime, and that it is just as wicked to resist evil as to commit it, the only feeling that honest and sensible men can entertain towards its members is one of pity that amiable sentiment and misjudging philanthropy should lead estimable citizens so far astray. But it appears that we have an offshoot from this party—not composed of members of the Society of Friends alone—who make Manchester their head-quarters, and are determined to keep up an agitation in favour of immediate peace. We gather from their speeches that any kind of peace would suit them—even a dishonourable one. So intensely do they hate—or pretend to hate—war, that they would barter everything for peace, except their money. When they endeavour to act upon public opinion by mis-statements of fact, they cease to be harmless enthusiasts, like the Sturges and the Brights, and become mischievous agitators who but ill conceal the cunning of the serpent under the guise of the meekness of the dove. At a meeting of ex-members of the Anti-Corn-Law League, held at Newall's-buildings, on Tuesday evening last, and under the presidency of Mr. George Wilson, the well-known ex-chairman of that defunct Association, it was stated in effect, if not in express terms, that this country cannot afford to go to war in support of any principle or of any cause whatever. If the various gentlemen who urged these views spoke the truth, there would speedily be an end of the British empire, and with it of that commercial prosperity which they one and all seem to consider the only earthly object for which states or individuals ought to strive. Mr. George Wilson said that if "we looked around us we should see provisions at a high price—the bankrupt list increased—shopkeepers complaining of the absence of customers—very many more empty houses than could be found a few years ago—a reduction of wages and men working short time—men discharged and becoming competitors for work with those still employed, by which means the value of labour was brought down—and an amount of general suffering almost unparalleled staring us in the face for many years to come, if the war should continue." Mr. Hyde Gregg was equally lugubrious. The interruption of our trade with Russia—though Moldavia and Wallachia are far better customers for our manufactures, and consume twice or thrice as much of them—was held by this gentleman to be absolutely fatal to our national existence. "In a commercial country like England," said this gentleman, "the wheat we shut out raised the price at home; the flax and hemp not arriving, the mills of Belfast, Dundee, and Leeds were stopped: the people were left without food, and perhaps there were tumults in consequence. As to hemp, with our Royal and commercial marine, we could not do without it. In such countries as Russia or Spain there might be civil war or invasion, and yet all ordinary occupations might proceed—everybody might be fed and clothed. But our working classes were improvident; they were distressed if they did not receive their wages at the end of a week they began to be tumultuous at the end of a fortnight—and in less than a month, with civil war or foreign invasion, everything would be in a state of confusion, and all would be going to ruin." Mr. Thomasson, of Bolton, said, "It was, no doubt, an excellent thing to adjust the balance of power in Europe, and to civilise Turkey; but were we prepared to do it at the cost of the civilisation of our countrymen? That was the practical question before us. Upon full consideration, he thought it premature to say more of the condition of the population in his own district (Bolton) than that he regarded the immediate future with the utmost alarm and almost with dismay." All the speeches were to the same tune; and Mr. Wilson, without calling for a vote, wound up the proceedings by the expression of his belief that, if Lord John Russell did not succeed in making peace at Vienna, "fearful consequences would result to this country." In our opinion, consequences infinitely more fearful would result if the condition of this great country was really such as Mr. Wilson and his friends represent it to be. Let them take heart of grace. War is a bad thing, as every one knew before they arose to teach it; and so are fevers, and many other things which humanity must endure, and profit by. There is wisdom out of Manchester as well as in it; and there are at least one or two, if not a dozen, things better than money; and among them, justice, and honour, and self-respect. But the ex-chairman and ex-members of the League, though once in advance of their countrymen on the question of Free-trade, are on other subjects lamentably in arrear with the world's intelligence. They lag behind the common sense of the people; and no more represent the truth of contemporary history, or the sentiments of the masses, than the Mormons of Manchester and Liverpool represent the religious feeling and conviction of the British nation. Their policy, if adopted—which we trust it never will be—would sacrifice honour for peace, and everything for money. As a necessary consequence it would secure neither peace nor money. We should lose our place in the world; become a prey to the ambition of our neighbours, and owe our existence to other States, as Turkey owes hers to us. And then, with more rapidity than would suit the comfort of Manchester and Manchester men, down would crumble that fine fabric of commercial prosperity which these gentlemen so much love, and for the sake of which they would make such large but unavailing sacrifice of national honour.

PARLIAMENT grudges no money for the war. It votes with alacrity all that is asked. But the debates on the Estimates form an entirely distinct feature in Parliamentary discussion. Debates, indeed, they are hardly entitled, or let us say hardly deserve, to be called, for, instead of the regular parallels and batteries of set oratory, they assume the more practical form of independent conversational firing. Much more of good sense and real fact is brought up in the course of three or four hours of a Committee on the Estimates than in a week of adjourned debating on a second reading. The public knows comparatively little of these discussions, for it is impossible to report them fully, or at least the conductors of the London press have not yet deemed it needful to adopt the custom of their provincial contemporaries, who jot down every syllable of twaddle or flippancy uttered by town councillors and such-like celebrities, until, on taking up a country journal, one's marvel is divided between the absurdity of the reporter and of the reported. Hitherto the Parliamentary gallery has abstained from more than a condensed summary of Committee work, though, no doubt, a large portion of the speakers would be better pleased were every "aside" noted; every explanation, mistake, and retractation recorded, every "Yes, I did," and "No, you didn't," "O, I dare say," and "Ah, it's all very well," registered after the fashion of the provinces.

In Committee few "speeches" are made. Anybody may speak as often as he pleases, and therefore everybody usually speaks to the matter in hand at the time, without deeming it necessary to take large theoretical or party views. Now and then, however, a prepared address is introduced, but it is usually of a practical character, and is heard with advantage as where the history of a certain abuse, connected with a particular item in the Estimates, precedes a motion that such item be passed over, or where a particular reform is urged in regard to the employment of the special sum at which the Committee has arrived. On these occasions the speech is more elaborated, and is fully reported; at other times the stenographer skilfully packs a speaker's chief point into three or four lines, and omits all his apologies for speaking, his *facetiæ*, and the conversational portion of his observations. Many members rise in Committee whose names seldom or never occur in the reports of the regular debate—generally quiet, sensible men, who "happen to know" something about the one item, either personally, or through their constituents; who watch, sometimes a little nervously, until the Chairman of Committees begins to put it, and then, with a hurried "Mr. Bouverie, Sir," make their complaint. A Minister usually attends respectfully to a man of this kind, and listens with a manner in strong contrast to that with which he waits until any hack caviller, any professional grumbler, has done, in order to rise and give the stereotyped taunt and answer.

During the discussion of Army Estimates there are usually three or four exchanges of something like personalities. There are a few civilians in the House who have a particular dislike for the fashionable part of the Army, and seldom lose an opportunity of taking a fling at the Guards. The "service" is, however, quite adequately represented, and the missile has not long been flung when some honourable and gallant member rises to reply, and he is sometimes a chivalrous "heavy," sometimes a highly-ornamental Guardsman, sometimes a nobleman who "has served," for *esprit de corps* calls up any volunteer who may be within hearing. In such case, according to the nature of the man, you either hear the civilian indignantly assailed or loftily rebuked, occasionally the intimation that he is "utt'ly ignorant of what he is talkin' 'bout," conveyed in a rich imitation of the dialogue supplied by Mr. Leech to his "swells," and with that contempt of expletives which is taught by first-rate claret.

Two or three topics of importance were brought up during the Estimate discussions in the earlier part of the week. Mr. Lindsay, a shrewd man of business, contrasted, in a practical way, the different working of our military administration and that of France, with which he had, in some measure, acquainted himself, and he dwelt upon the importance of simple system. It may be remembered that, some short time ago, it was announced in the House of Lords that three officers had been sent over to Paris to examine into the system which has worked so much better than ours; and it is to be hoped that Parliament will insist upon some report of the result being given to the public: mere communications to the authorities will not be satisfactory. Then Mr. Layard (who, by the way, has been addressing his constituents, and explaining that he is out of office because he refused to take any office in which he did not believe his specialities would be useful) commented upon the course adopted in the Crimea in regard to forage. Horses were starving, and the officials sent to England for forage, when, said the member for Nineveh (speaking from knowledge of the countries), any quantity could have been obtained at three days' sailing distance. The advantage of the Committee discussions—which enable an informed man to pitch a single hard, damaging fact into the midst of a discussion in routine, and thus to show the ignorance of officialism—is self evident.

Colonel Knox also addressed himself to the question of the proposed Order of Merit for the private soldier. Although it was clear that the gallant Colonel spoke the sentiments of that section of the Army, which has a refined horror of any large infusion of officers who have risen from the ranks; and, although no doubt, this class regard the order of merit as rather an ingenious device for parrying the popular demand upon the subject, he talked rationally enough as to the mockery of making the distinction a mere honour. Our soldiers are not so well paid and cared for that we can afford to tie a piece of tinselled ribbon upon their coat, in full of all demands upon our gratitude for extraordinary exertions. If the position of a soldier were what it should be, the mere honour might suffice, but under existing arrangements the prize ought to be something tangible. Double pay and double pension was Colonel Knox's not unreasonable suggestion as accompaniments of the Order of Merit, and, if it be desired that the soldier shall habitually aspire to the decoration, the poor fellow ought to know that it is weighted, and that in his old age he shall have something else to keep him warm than the faint reflex of the fires of glory which is seen in a red ribbon.

It was also satisfactory to hear, from all sides of the Committee, the most unsparing denunciations of routine. The Conservatives vied with the Liberals in denouncing it; and, if this newly-awakened and most laudable hatred can be kept alive, there is some hope that our *next* war may be conducted upon a system affording reasonable hope of vigorous action.

THE NEW MINISTRY.

The following is the composition of the new Ministry, so far as it had been arranged up to the latest accounts:—

Lord Palmerston	First Lord of the Treasury.
Lord Cranworth	Lord Chancellor.
Lord Clarendon	Secretary for Foreign Affairs.
Lord Panmure	Secretary for the War Department.
Sir G. Grey	Secretary for the Home Department.
Lord John Russell	Secretary for the Colonies
Sir G. C. Lewis	Chancellor of the Exchequer.
Sir C. Wood	First Lord of the Admiralty
Sir W Molesworth	Chief Commissioner of Woods and Works.
Lord Granville	President of the Council.
Lord Canning	Postmaster General.
Duke of Argyll	Lord Privy Seal.
Lord Carlisle	Lord Lieutenant of Ireland.
Mr Horsman	Chief Secretary for Ireland
Lord Duncan	Lord of the Treasury, in the room of Lord Echo.
Lord Stanley of Alderley	President of the Board of Trade.
Mr. Vernon Smith	President of the Board of Control.
Mr. Denby Seymour	Secretary to the Board of Control.

Mr. Villiers, who was offered the Vice-Presidency of the Board of Trade, declines that office, and retains his present post of Judge-Advocate-General. Mr. W. Cowper succeeds Mr. Fitzroy as Under-Secretary of State for the Home Department; and Sir Robert Peel will, it is said, go to the Colonial-office as Under-Secretary. Mr. Monckton Milnes has declined the Secretaryship of the Treasury—rendered vacant by the resignation of Lord Alfred Hervey. In filling the Secretaryship of the Ordnance, Lord Palmerston was anxious to avail himself of the business experience of Mr. Laing, but the extent of that gentleman's undertakings obliged him to decline the office. The Secretaryship of the Ordnance, as well as the office of Vice-President of the Board of Trade, a Lordship of the Treasury, and a Lordship of the Admiralty, remain vacant.

The Attorney-General for Ireland, Mr. Brewster, has tendered his resignation, and it has been accepted. The Solicitor-General, Mr. Keogh, will succeed Mr. Brewster as Attorney-General. Mr. John David Fitzgerald, Q.C., has been appointed Solicitor-General, in succession to Mr. Keogh.

ADDRESS OF LORD JOHN RUSSELL.—Lord John Russell has issued the following address to the electors of London:—

Paris, Friday.

Gentlemen,—Her Majesty having been pleased to confide to me a mission of the highest importance, involving the interests of Europe, and affording hopes of an honourable termination of the present war, I felt it my duty to withdraw for a time from my service to you in Parliament. Whilst in this capital, intelligence has reached me of the resignation of three of the principal Ministers of the Crown, and Lord Palmerston has asked for my assistance in carrying on the Government. In the difficult circumstances in which the country is placed, I have not thought myself justified in withholding from the Queen any aid which it might be in my power to afford. I have, therefore, accepted office; and, on my return from Vienna, shall be prepared to assume its duties and responsibilities. In these circumstances I humbly place myself in your hands as a candidate for the renewal of your confidence.—I have the honour to be, gentlemen, your obedient servant, (Signed) J. RUSSELL.

Lord John Russell left Paris on Sunday morning for Berlin, where he would be met with the latest documents of the Foreign office relating to the subject of his mission, and where he would probably make a short stay *en route* for Vienna

THE COURT.

On Saturday the Prince Consort and the two young Princes skated on the ice within Buckingham Palace gardens, while the Queen and the Royal Princesses promenaded on the banks of the lake. Afterwards Her Majesty received a visit from the Duke and Duchess de Nemours. In the evening the Queen had a dinner party; the company at which included their Royal Highnesses the Duchess of Cambridge, the Princess Mary, and the Duke of Cambridge, the French Ambassador and the Countess Walewska, the Marquis of Lansdowne, the Earl and Countess of Derby, the Earl of Carlisle, Viscount and Viscountess Mahon, the Bishop of London and Mrs. Blomfield, and Vice-Admiral Deans Dundas.

On Sunday the Queen and Prince Albert, with the Prince of Wales, the Princess Royal, Prince Alfred, and the Princess Alice, attended Divine service in the private chapel of Buckingham Palace.

On Monday the Queen and Prince Albert, attended by Lord Alfred Paget and Captain the Hon Dudley De Ros, visited her Royal Highness the Duchess of Gloucester, at her residence, Gloucester-house. Her Majesty had a dinner-party. During the evening the "Allied Army March," composed by Miss A. M. Cooper for the benefit of the Patriotic Fund, was performed by the band of the Coldstream Guards.

On Tuesday the Queen and Prince Albert, accompanied by the Duke of Cambridge, and attended by the Viscountess Canning, the Hon. Mary Seymour, and Capt. the Hon. D. De Ros, inspected the Model of Sebastopol, and also the Great Globe, in Leicester-square. In the evening her Majesty honoured the Haymarket Theatre with her presence.

On Wednesday, after the Court, the Queen gave a dinner party, the company at which included the Duke of Argyll, the Duke and Duchess of Wellington, the Turkish Minister and Madame Musurus, the Prussian Minister and Countess Bernstorff, Lord and Lady Seymour, Lord and Lady Ernest Bruce, the Right Hon. Sir George Grey, the Right Hon. Sir John and Lady Young, Rear-Admiral Chads, and Major-General Cator.

Earl Somers and Colonel the Hon. A. N. Hood have relieved Lord De Tabley and Mr. F. Cavendish as the Lord and Groom in Waiting to her Majesty. Viscountess Canning has succeeded the Countess of Desart as the Lady in Waiting on the Queen.

Her Majesty will hold Levees at St. James's Palace on the following days, at two o'clock:—Wednesday, the 7th of March next; Wednesday, the 14th of March next.

The Countess Walewska held an assembly on Tuesday evening, at the residence of the French Embassy, Albert-gate House. His Serene Highness the Prince of Nassau honoured the reunion with his presence as did also General de la Marmora, Commander-in-Chief of the Sardinian Contingent.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS
TAKEN DURING THE WEEK ENDING THURSDAY, MARCH 1.

Month and Day.	Barometer at 9 A.M.	Thermometer. Highest Reading.	Thermometer. Lowest Reading.	Mean Temperature of the Day.	Departure of Temperature from Average.	Degree of Humidity.	Direction of Wind.	Melted Snow in Inches.

Mar. 1	29.540	54.0	35·1	42·2	+ 2·2	93	W.	0·14

Note.—The sign - denotes below the average, and the sign + above the average.

The reading of the barometer decreased from 29.87 inches at the beginning of the week to 29.32 inches by the 26th; increased to 29.80 inches by the 27th; and decreased to 29.53 inches by the end of the week. The mean for the week was 29.648 inches

The mean daily temperature has varied from 10° below to 4° above their average values. They were below the averages on every day from Jan. 14 to Feb. 24, varying from 0·8° to 18·9° in defect; the mean defect for the whole period being 9·6° daily.

The mean temperature of the week was 37·4°, being 2·3° below the average of the corresponding week during thirty-eight years.

The range of temperature during the week was 30·4°.

The weather—On the first day of this week snow fell till 11 a.m.; there was many showers of sleet, and for a short time in the afternoon it thickly 32°. On Saturday the morning was gloomy and dull till 11 a.m., the sun then shone brightly, and a rapid thaw set in, and on Sunday, the temperature was in excess above the average, being the first day since January 13. On Tuesday the temperature again fell to 32, and snow in the form of crystals fell. After this day the thaw continued uninterruptedly till the end of the week.

For the month of February the mean reading of the barometer at the level of the sea was 29.770 inches. The highest temperature during the month was 54° on the 28th, and the lowest was 7° on the 11th; the range of temperature during the month was therefore 42·5°. The mean of all the highest temperatures by day was 35·6°, and of all the lowest by night was 23·1°; the daily range of temperature during the month was therefore 12·5°. The mean temperature of the air during the month was 29·5°, being 0·5° below the average of the corresponding month during thirty-eight years, and the coldest February on record, the register extending back to the year 1814; the nearest approach was in the corresponding month of 1814, when the mean temperature was 32·4°. The mean temperature of evaporation for the month was 28·4°. The mean temperature of the dew point was 26·3°. The mean degree of humidity was 87 (complete saturation being represented by 100), and the fall of rain during the month was one inch nearly.

Lewisham, March 2, 1855. JAMES GLAISHER

HEALTH OF LONDON.—Within the week ending February 24, the births of 916 boys, and of 871 girls, were registered in the metropolitan districts—in all, 1787 children. Within the same interval of time the deaths of 791 males, and of 813 females, were registered—in all, 1604 persons; exceeding the calculated number for the week by 337. The late rigorous weather showed only slight signs of mitigation till Saturday last, when a rapid thaw set in, and the season of extreme cold passed over. Its effects are shown in the preceding six weeks in the number of deaths reaching 9468, a number exceeding the average by 1696, which for the most part were the indirect results of the low temperature. The deaths weekly were nearly 100 in excess above the average for every degree the weekly temperature was below 32°.

MANSION HOUSE. This evening (Saturday) the Lord Mayor will entertain at dinner the Garrick Club, of which his Lordship is a member

ALTERATION OF THE CITY POLICE DUTY. On Monday morning an alteration took place with regard to the duty of the London police. In future the men will be placed on day duty for four hours, be relieved for four hours, and then commence their second four hours; thus affording them more relief than by the old system, that of having every other day a long duty of nine hours. The night officers will be placed on duty for eight and not nine hours, as heretofore, much to the comfort of those placed on the "bridge" or "marked" duty.

BREAKING UP OF THE FROST.—The River Thames, which, up to last Saturday, was blocked up by immense fields of floating ice, is now completely free. From the surveys that have already been made, £200,000, at the least, will be required to repair the damage done to sailing craft, small wherries, and the various steam-boat piers—even Blackfriars bridge pier had to be held together with heavy iron chains Westminster-pier has had most of the ponderous timber piles snapped asunder by the accumulated masses of ice floating against them. Such was the force of the ice running against the timbers that piles of wood as thick as a man's body were broken in twain as easily as any one could separate a mere match.

THE ROYAL MEDICAL COLLEGE. The third annual festival of the "Medical Benevolent College" (hence forward to be styled, in accordance with the gracious permission of her Majesty, the "Royal Medical College") was celebrated on Wednesday evening, at the London Tavern. The Right Hon. the Earl of Carlisle presided. The noble Earl was supported by Viscount Ebrington, M.P., the Rev. Dr. Croly, Rev. Sir J. Hay, Bart., Mr. J. Lloyd Davies, M.P., Major Palmer, Sir C. Stanniforth, Mr. J. Phillips, M.P., Dr. Wilson, Dr. Babington, &c. After the usual loyal toasts, the toast of the evening, "Prosperity to the Royal Medical College," was proposed by the noble Chairman in a most eloquent and feeling speech, in which his Lordship ably advocated the claims of the institution, which has come to public support and sympathy, and fore ably explained the objects and commemoration of medical officers under the Royal Charter and Founder, Mr. Propert, then rose and gave a very interesting account of the institution, which is to be opened in the course of the ensuing summer, for the reception of 100 pupils, the sons of medical men, and a certain number of decayed medical men or their widows and orphans. The list of subscriptions announced by Mr. Propert in the course of the evening amounted to upwards of £2100. The Rev. Dr. Croly afterwards delivered an eloquent speech in favour of the medical profession, in which he urged the expediency of blending medical with theological education, especially for missionaries. The health of the noble Chairman was proposed by Lord Ebrington, under the style and title of "The new Lord-Lieutenant of Ireland. This toast was enthusiastically received; and the noble Earl, in returning thanks, acknowledged the high honour of the office. After this toast, the festivities of the evening were prolonged to a late hour. The musical arrangements were under the direction of Mr. Benson, and Mr. Harker was a most efficient toastmaster.

OBITUARY OF EMINENT PERSONS.

JOHN, VISCOUNT PONSONBY, G.C.B.

THIS distinguished diplomatist died at Brighton on the 21st ult., aged eighty-four. His Lordship—a scion of the noble house of Bessborough—was son and heir of William Brabazon, first Baron Ponsonby, of Imokilly, and grandson of the Right Hon. John Ponsonby, Speaker of the Irish House of Commons, who was second son of the first Earl of Bessborough. He succeeded his father 6th November, 1806, and obtained the Viscounty, by creation, in 1839.

In 1826 Lord Ponsonby was appointed Envoy Extraordinary and Minister Plenipotentiary to Buenos Ayres; and in 1828 to Rio Janeiro. In 1830 he proceeded on a special mission to Belgium. In 1832 he became Envoy at Naples; and at the close of the same year was constituted Ambassador to the Sublime Porte, in which important station he continued until October, 1841. From 1846 to 1851 his Lordship was Ambassador to the Court of Austria. For his eminent services he was given the Grand Cross of the Bath in 1834; and in 1839 raised to the degree of Viscount.

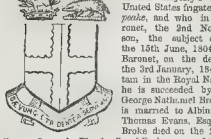
He married, 13th January, 1803, Lady Frances Villiers, daughter of George Bussey, fourth Earl of Jersey, but had no issue. His Viscounty becomes, consequently, extinct; but the Barony of Ponsonby devolves on his nephew, William, the posthumous son of the late gallant Sir William Ponsonby, who fell at Waterloo.

LORD KENYON.

GEORGE KENYON, LL.D., F.S.A., Lord Kenyon, Baron of Gredington, in the county of Flint, and a Baronet, was the second son of the well-known lawyer, Sir Lloyd Kenyon, who was successively Attorney-General, Master of the Rolls, and Chief Justice of the King's Bench, and who was elevated to the Peerage the 9th June, 1788. George Kenyon was born the 22nd July, 1776; and (his elder brother having died unmarried *vitâ patris*) succeeded his father as second Baron on the 4th April, 1802. He married, on the 1st Feb., 1803, Margaret Emma, only daughter of Sir Thomas Hanmer, Bart., by whom (who died the 24th Feb., 1815) he has had issue two sons and three daughters. Of the daughters, Margaret, wife of the Hon. Captain Thomas Best, alone survives her father. Lord Kenyon died at his seat, Gredington-hall, Flintshire, on the 28th ult. He is succeeded in his honours by his elder son, Lloyd, now the third Baron.

SIR PHILIP BROKE, BART.

SIR PHILIP BROKE, second Baronet, of Broke-hall, Suffolk, was the eldest son of one of our naval heroes, Rear-Admiral Sir Philip Bowes Vere Broke, who, as Captain of her Majesty's ship *Shannon*, defeated the United States frigate of superior force, the *Chesapeake*, and for which reward was created a Baronet, the 2nd November, 1813. His eldest son, the subject of this notice, was born the 15th June, 1804, and succeeded, as second Baronet, on the demise of his gallant father, the 3rd January, 1841. He was himself a Captain in the Royal Navy. Having never married, he is succeeded by his next brother, now Sir George Nathaniel Broke, also a Captain R.N., who is married to Albinia Maria, second daughter of Thomas Evans, Esq., of Lymister. Sir Philip Broke died on the 24th ult., at his seat, Broke-hall, near Ipswich. The family of Broke is one of the most ancient in the realm.



J. DENNISTOUN, ESQ.

THIS accomplished gentleman died on the 13th ult. James Dennistoun, Esq., of Dennistoun and Colgrain, N.B., a magistrate and Deputy-Lieutenant, and a member of the Faculty of Advocates, was born in 1803; he was descended from the knightly, noble, and kingly house of Dannelstoun, of Dannelstoun, in Renfrewshire

Mr Dennistoun was educated for the legal profession, and passed advocate in 1824; but his favourite bent was not the law, but the antiquities of his country. As an antiquarian writer he became early distinguished by his learned and interesting contributions to the Bannantyne and Maitland Clubs. A subsequent residence in Italy gave rise to his able papers on the Stuarts, published in the *Quarterly Review* of December, 1846, and also to his more considerable work, the "Memoirs of the Dukes of Urbino," published in three volumes, in 1852. The latter production met with merited success as an able exposition of a somewhat perplexed and obscure period of the annals of Italy. Mr. Dennistoun's last books, which he lived to complete, if not to publish, were two volumes of the "Memoirs of Sir Robert Strange," engraver, illustrating his artistic life; and the "Memoirs of Strange's brother-in-law, Andrew Lumsden," private secretary to the Stuart Princes. Mr. Dennistoun's wife (whom he married in 1836), Isabella Katharine, eldest daughter of the Hon. James Wolfe Murray, Lord Cringeltie, an eminent Scottish Judge, was granddaughter of this famous Jacobite engraver, Sir Robert Strange, the subject of her husband's biographical labours.

MR. DOD.

CHARLES R. DOD, Esq., a gentleman of high and merited reputation in journalism and literature, died on the 21st ultimo, at his residence at Brixton. Mr. Dod was the only son of the Rev. Roger Dod, who was Vicar of Drumlease, in the county of Leitrim, and he represented a junior branch of the family of Dod, of Cloverly, the head of which is the present John Whitehall Dod, Esq., M.P., for North Shropshire. Inheriting a small patrimony, of which actual possession was long acquired after a Chancery suit, Mr. Dod turned his early attention to the bar as a profession, and with that view entered as the King's-inns, Dublin. He, however, soon relinquished his legal studies, and devoted to literature an undivided attention. After having been part proprietor and editor of a provincial journal, he eventually settled in London, where for thirty-seven years he has been unceasingly employed; for twenty-three of those years he has been engaged on the *Times*. Mr. D. J was originally superintendent of the corps of gentlemen who report the debates for that paper. Mr. Dod also contributed to the *Times* for many years those well-known and interesting memoirs of distinguished persons as their deaths occurred. Mr. Dod is further creditably known to the public as the author of those useful and meritorious publications, the "Parliamentary Companion," and the "Peerage, Baronetage, and Knightage." Latterly his increasing duties in connection with the *Times* prevented his actual execution of any portion of those books. They have for more than twelve years been in the hands of his son, under whose able editorship they of course remain. Mr. Dod dies deeply and deservedly lamented. "He passed," observes the *Times*, "a life crowded with deeds of virtues, and leaves a name of unspotted integrity."

WILLS AND PERSONALTY. Lieut.-Col. the Hon. John Brown, [illegible] £40,000 Major-General H. R. Major, £18,000 Admiral Hon. [illegible] The Rev. F. J. Lutyens, B.C.L., Prebendary of Lincoln and Rector of Bishops Hatfield, £25,000 Joseph Cook, jun., merchant, Portsmouth, £25,000. Joseph Oliver, ironmonger, Shadwell, £160,000. James Cockle, the surgeon, £30,000.

CHARITABLE BEQUESTS.—Mr. Henry Holland, of Montague-square, who died worth £35,000, has bequeathed £500 to St. Mary's Hospital, Paddington; also Martha Ann Weale, of Milton-street, Dorset-square, has left to the London Missionary Society £200; British and Foreign Bible Society, £200; Home Missionary Society, £100; and legacies to other charities.

THE LATE ESCAPE FROM NEWGATE.—John Brown, one of the three convicts who escaped from Newgate under extraordinary circumstances a few days ago, was captured on Wednesday morning, in Petticoat-lane, and taken back to Newgate. On Thursday, John Berry, another of the trio, was retaken and again lodged in Newgate.

LATEST INTELLIGENCE.

DEATH OF THE EMPEROR OF RUSSIA.

The Emperor Nicholas is dead. Information of the fact was received by our Foreign-office yesterday (Friday) afternoon. The event took place, we believe, at St. Petersburg the same day about noon. The Emperor died under an attack of pulmonary apoplexy.

THE WAR IN THE CRIMEA.

EUPATORIA, Feb. 21

Since the 17th no new attempt has been made against Eupatoria. To-day we have seen Russian infantry columns and trains of waggons moving away in the direction of Simpheropol. Several villages in the neighbourhood are now burning. Three heavy guns have been landed, and new works of fortification are in course of construction.

VIENNA, Friday, March 2

Intelligence has been received from Constantinople up to the 22nd of February. The last sortie of the Russians had been victoriously repulsed. The Russians had demolished the Malakoff tower. Information has been received by General Bosquet of an intended attack on Balaclava. Preparations had been accordingly made to receive the enemy. Baron Koller had been honoured with an audience by the Sultan. The raising of the blockade of the Danube has been officially notified. The exportation of corn from the Turkish provinces will, it is expected, be prohibited. The following telegraphic despatch has been received by way of Trieste:—

ATHENS, Feb. 24.

M. de Bruck has left, after having had an audience of the King. Baron Mercier, the new Ambassador from France, has been presented to his Majesty. The French Artillery has left the Piræus, and embarked for the Crimea. A battalion of Marine Infantry is all we have left here. The English troops are preparing to take their departure for the Crimea.

BOULOGNE, Thursday, 5 o'Clock.

The Emperor of the French has this moment arrived at the Imperial Pavilion Hotel from the Camp at St. Omer.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE chief topic of conversation in literary circles during the week has been the appointment of the editor of the *Edinburgh Review* to the important office of Chancellor of the Exchequer. The Right Honourable Sir George Cornewall Lewis has the keys and seal of the Exchequer in his hands; the editor of the *Edinburgh Review* has now to settle "ways and means" for imposing new taxes that will yield large sums, and yet not press heavily on the people. The successor of Jeffrey has now to divide his time between buff-and-blue articles for his forthcoming number, and tariffs and taxes for his forthcoming Budget. Sir George Cornewall Lewis is an able man: he is not a brilliant speaker, but he is a matter-of-fact narrator of what he has to tell; he is not a sparkling writer, but he has proved an excellent editor. His training for his Chancellorship has been first-rate: he was long, and in stirring times, the best financial Secretary that the Treasury has had for many a day. Able editors of reviews and papers are becoming, we are glad to think, candidates for serving in high offices out of the fourth estate. Gifford—the well-known editor of the *Quarterly*—held no higher public office than that of Paymaster of the Band of Gentlemen Pensioners; and Mr. Lockhart, his successor, was thought to be well rewarded with the office of Auditor of the Duchy of Lancaster. Two editors of the *Quarterly* barely divided five hundred a year between them, their State influence being confined to a few gentlemen in livery, and to a portion of the incomes of a youth under age: here we have the editor of the *Edinburgh* with five thousand a year, and his hand in the pockets of every person in Great Britain and Ireland.

Another, and even more pleasing, subject of conversation is the steady rise to political distinction which Mr. Layard is making from day to day. The country is more than feeling an interest in his career in the Commons. He is naturally able; has had great advantages both from books and men; has seen the world with observing eyes; is a clear reasoner, a fearless speaker; detects omissions at a glance, and has the activity of mind to supply their deficiencies. Few people, it is said, are enabled at once to command the ear of the House. This Mr. Layard has done. And why? Because he never speaks but when he has something to say that is new, and of moment, on a subject about which the House wishes to be informed. Distinguished now and hereafter for the inestimable value of his Scriptural and archæological discoveries, as well as for the spirit with which he narrates travels and adventures, he has now another and more useful course before him. Let him act as he is now acting, and the highest honours of the State will be his, and while he is yet young.

The Boar's Head relic, engraved in our last number, was bought, we are glad to think, by Mr. Halliwell, whose collection of curiosities connected with Shakspeare and his works is becoming every day more important. The price at which Mr Halliwell obtained it was £25 4s

The original MS. of Sir Walter Scott's "Kenilworth" was sold on Monday last for £41, and has been most properly secured for the British Museum. The sum its last possessor gave for it was only £16.

The first publication of the Philobiblon Society (and a very interesting and handsome one it is) has just been issued to the subscribers. As our readers may not have heard of this society, we shall tell them what we know about it. It is a club of thirty-five members, with Prince Albert as patron, Lord Gosford as President, and M. Van de Weyer and Mr. Monckton Milnes as Honorary Secretaries. Among the members we may mention the names of his Royal Highness the Duc d'Aumale, the Earl of Ellesmere, Mr. Labouchere, the Dean of St. Paul's, the Provost of Eton; Mr. Ford, author of the well-known book about Spain; Mr. Stirling, M.P., author of an excellent volume on the last days of Charles V.; Mr. Cureton, author of a most valuable volume on the Monasteries of the Levant; Mr. Peter Cunningham; Sir Charles Eastlake, P.R.A.; and the two publishers, Mr. Murray and Mr. Longman. In the first volume the Dean of St. Paul's contributes some curious particulars about Sir Michael Scott, the wizard. By Mr. Curzon we have a most valuable paper on the MSS. in the public libraries of Italy; and Mr. Milnes supplies some unpublished letters of importance written by the great Lord Strafford to his third wife. In short, we have seldom seen a more readable Miscellany; while in point of paper and print a more exquisite volume has never appeared. The printer is Whittingham, of Chiswick.

Death has taken from among us Mr. C. R. Dod, author of "The Parliamentary Companion," and of many clever biographies in the *Times* on many whose breath was but newly extinct in their bodies. Mr. Dod's mind was stored with biographical matter about his distinguished contemporaries. He was a kind of Herald in his way for genealogies, and was a species of parish clerk for his knowledge of births, baptisms, and deaths. It was almost impossible to mention a man of any mark but what Mr. Dod could tell you at once all about him.

To whom related or by whom begot.

Of course, in addition to his matter-of-fact knowledge, he had many family secrets, and a fair share of scandal. Much curious information has died with poor Mr. Dod. On the press he was known, from his living on the dead, as *Raven* Dod. The *Times* knew his value, and has paid a well-merited compliment to its old assistant. The undertaker himself requires at last a hearse—the tomb-maker a monument—and the biographer of the dead a biography for himself.

How little we see what is before us—a young author of five-and-thirty years of age had prepared two years ago an elaborate memoir of Mr. Rogers the poet, and was only waiting for the poet's death to give it to the public the next day in the columns of a widely spread journal. Mr. Rogers is still, happily, alive. The youth who had prepared his life, in expectation of his friend's death, has been nearly a year in his grave.

The best-laid schemes of mice and men
Gang aft agley.

HUTS AND TENTS OF THE RIFLES AND ROYAL MARINES, ON THE HEIGHTS OF BALACLAVA.—(SEE PAGE 242)

THE BAND PLAYING IN THE FRENCH CAMP.—(SEE NEXT PAGE.)

IMPERIAL PARLIAMENT.

(*Continued from page 211.*)

HOUSE OF LORDS. THURSDAY.

The Lunacy Regulation Act (1853) Amendment Bill, the Consolidated Fund (£8,500,000) Bill, the Consolidated Fund (£20,000,000), Bill, and the Common Law Procedure Act Amendment (Ireland) Bill, were severally read a second time.

HOUSE OF COMMONS. THURSDAY.

THE NEW MINISTERIAL APPOINTMENTS.

Mr. HAYTER moved for the issue of new writs for the respective constituencies lately represented by Mr. Horsman, Mr. Keogh, and Mr. J. D. Fitzgerald—the first having accepted the office of Chief Secretary to the Lord Lieutenant of Ireland; the second having been appointed Attorney-General for Ireland; and the third having accepted the office of Solicitor-General for Ireland.

THE SEBASTOPOL COMMITTEE.

Mr. ROEBUCK moved that the Select Committee appointed to inquire into the state of the army before Sebastopol have leave to make reports to the House.—Agreed to.

Mr Roebuck then having laid the report upon the table, the SPEAKER read from it the following resolution viz., "Resolved, that, in the opinion of this Committee, the objects for which they have been appointed will be best attained, danger and injustice to individuals best prevented, and the public interest best protected if the Committee be a Committee of Secrecy."

Mr. F. FEEL, in reply to Mr. Otway, said that an agreement had been entered into between her Majesty's Government and the Sublime Porte by which the English Government would provide food and forage for the Turkish cavalry in the Crimea.

ARMY PROMOTION

Lord GODERICH then rose to move that an Address be presented to her Majesty, praying her Majesty to take into consideration the present unjust system of Army promotion. The noble Lord said that the system of buying and selling commissions was, in his opinion, inconsistent with those sound principles of administration which ought to guide the Government of this country, and which therefore called for the interposition of the House of Commons. He contended that merit should be the test of promotion; but, instead of such being the test, promotion in the Army became a matter of money, and was claimed, he would not say to the aristocratic, but to the wealthy classes of the community. In illustration of the cruelty and injustice of such a system, he referred to the case of Sergeant Sullivan, who had so distinguished himself in the Crimea, yet who was, notwithstanding, sacrificed to a puerile sense of etiquette, and who had had the mortification of seeing twelve gentlemen placed over him in his own regiment without purchase. He did not propose by his motion that the Army should be officered exclusively, or even mainly, by men raised from the ranks, but he strongly impressed upon the House the necessity of altering the present disproportion between those who were promoted for merit and those who obtained commissions by influence or by purchase.

A discussion then took place, in the course of which Lord Lovaine, Colonel Sibthorpe, Sir John Walsh, Lord Seymour, and Lord Elcho, spoke against the motion; and Mr. Otway, Mr. Warner, Captain Scobell, and Mr. J. Ball, addressed the House in favour of the motion

Sir DE LACY EVANS (who was loudly cheered) said he had come down to the House for the especial purpose of supporting the motion, and of denouncing the system of purchase in the Army, as being fraught with the grossest injustice, most detrimental to our interests, and tending to discourage the exertions of our brave soldiers in times of battle and of difficulty.

Mr. S. HERBERT argued in favour of the existing system; but said that all due encouragement should be given to promotion from the ranks whenever great merit was distinguishable.

Sir E. PERRY supported the motion.

Lord PALMERSTON admitted the evils of the present system, but thought it unwise to commit the House to a resolution which would compel them at once to change a system that had been established for such a long period of time in the country.

The House having divided, the numbers were –

For the motion	.. ..	114
Against it	.. ..	158
Majority against the motion	.. ..	44

HOUSE OF LORDS. FRIDAY.

DEATH OF THE EMPEROR OF RUSSIA.

The Earl of CLARENDON rose and said,—My Lords, I think it my duty to communicate to your Lordships the contents of a telegraphic despatch I received half an hour ago from her Majesty's Minister at the Hague—"The Emperor of Russia died this morning between the hours of twelve and one a.m., of apoplexy, after an attack of influenza." I have also received a despatch from her Majesty's Minister at Berlin also stating that the Emperor of Russia had died about the time already mentioned. And one hour before the arrival of these despatches I received an account from Lord J. Russell, who is in Berlin, stating that the Emperor of Russia was at the point of death, and was surrounded by his family.

Lord LYNDHURST, under the circumstances, postponed his motion in reference to our relations with Prussia.

The Earl of LUCAN, who had just arrived from the Crimea, then asked the indulgence of the House while he read the correspondence that had taken place between Lord Raglan, the Home authorities and himself in reference to the order of the Cavalry charge at Balaclava. The noble Earl stated that immediately upon his arrival in London he communicated with the Commander in Chief, and asked his Lordship to have his conduct investigated by court martial. So long as he entertained a hope that such an inquiry would be granted, he should maintain silence in that House. He then read the correspondence referred to, with a view of showing that he had not misconstrued the order of Lord Raglan; and had no discretion in the matter

Earl GRANVILLE said that he would not at that time enter into the subject.

The following Bills were then read a third time and passed, viz, the Lunacy Regulation Act, 1853, Amendment Bill, the Consolidated Fund £8,500,000 Bill, the Consolidated Fund £20,000,000 Bill, and the Common Law Procedure Act Amendment (Ireland) Bill.

HOUSE OF COMMONS.—FRIDAY.

The report of the Barnstaple Election Committee stated that Mr. Guinness had been duly elected, and that the last election was void so far as Mr Laurie was concerned

Mr. F. FEEL, in reply to Mr. Maguire, said that it had been decided by the authorities to supply our forces with a breech-loading musket.

DEATH OF THE EMPEROR OF RUSSIA.

Lord PALMERSTON, in reply to a question from Mr. F. French, said, I have to say that two telegraphic despatches have been received by her Majesty's Government, one from the Hague, and the other from Berlin to the effect that the Emperor of Russia expired in the course of the last night (great sensation in the House).

Lord R. CECIL asked whether it was the intention of her Majesty's Government to adopt Lord J. Russell's Education Bill for England and Wales; and, if so, was it their intention to postpone the measure -

Sir G. GREY said that the measure would be postponed until after Easter.

SEBASTOPOL INQUIRY COMMITTEE

Mr. ROEBUCK moved that the Committee of Inquiry into the management of the war be a secret Committee, as it was most desirable that nothing should be done to affect our present alliance with France. He thought that the daily proceedings of that Committee should not be made public.

Lord SEYMOUR opposed the motion, as one of the members of the Committee, who dissented from the course proposed in the report. Free access ought to be allowed to the members of that House, although it might be desirable to exclude the public. A Secret Committee would excite suspicion and create inconvenience.

Sir J. PAKINGTON said, that the Committee were unanimous in thinking that the public should be excluded; but the majority thought that members of Parliament should be also excluded. He prayed the House to support the Committee in their decision

Sir J. GRAHAM said that, as the Committee had been appointed, his belief was that the public interest would be best promoted by the Committee conducting its operations in public. If the House sanctioned the proposition to make this a secret tribunal, it would loose all power over its proceedings. He entreated the House to weigh well the consequences of a conflict with the press. In such a conflict, they would not succeed unless backed by public opinion, and public opinion would not support a secret inquiry. He stigmatised the secrecy asked as an inquisition, and the members of the Committee as inquisitors, and he demanded that if the country required more sacrifices those sacrifices should be made in the light of day

Mr. LAYARD supported the recommendation of the Committee.

Sir B HALL said, although he had voted against the appointment of the Committee, yet as the House granted it, he was of opinion that these proceedings should be conducted in the face of the public.

After some further discussion, in the course of which Lord Palmerston and Mr. Disraeli severally expressed an opinion in favour of the Committee being open, and Mr. H. Drummond in support of the Committee being secret,

Mr ROEBUCK said, that seeing the preponderance of feeling against his motion, he would ask leave to withdraw it.

The motion was then withdrawn

The remainder of the night was occupied by a consideration of the Army Estimates.

THE REORGANISATION OF THE CIVIL SERVICE.

A THICK Parliamentary volume has recently been published, called "Papers relating to the Reorganisation of the Civil Service," which contains a collection of the opinions of nearly forty distinguished persons on the plan and the report of Sir Stafford Northcote and Sir C. Trevelyan for the reorganisation of this service. To this collection Mr. Chadwick has contributed the most elaborate paper in the volume, especially intended to show "the results already obtained by competitive examinations for appointments, and the necessity of further securities to insure promotion for merit in the public service," which has been issued in a separate form. These publications induce us to advert to the subject. It has for a considerable time occupied the attention of official men; and, as many of the sufferings in the Crimea are attributed to the inefficient co-operation of the Civil Service, its reorganisation is now, or as speedily as the more urgent affairs of the war will permit, likely to be pressed forward.

In society at large there is a natural principle of growth. One generation is more numerous than its predecessor, and has all the advantages of its predecessor's experience. It is older, though born of the other, and wiser. As men increase in numbers and in knowledge, division of labour continually extends, individuals become more and more dependent on one another, competition sharpens the faculties of all, and all are mutually improved. If one tradesman is uncivil, sells his goods dear, and keeps a dirty shop, he loses his business. In every street the shopkeepers vie with each other who shall serve his customers best and be most obliging. A similar spirit pervades every class of industrious men. Labourers compete with one another who shall do their work best and get most money. Manufacturers compete in the making of clothing, engineers in constructing railways, and authors in writing books, and all striving to do the best they can, there is from natural causes continual and general improvement in society. There is nothing similar in Governments. They are not the sources of social progress. They have in them no inherent principle of improvement, and never compete against each other for the obedience and respect of the people.

In modern times there has been a contest of opinions as to which of several forms of Government is the best; but the Emperor of the French, the Czar of Russia, the Parliament of England, or the Congress of the United States has never offered to the world any article government on the cheapest and best terms to a world just now very desirous of being well and properly governed. So in the different departments of our Government and every other Government, there is no competition as to which of them shall do its duty towards the people and get the greatest rewards. The Horse Guards does not offer a cheaper and better article than the Treasury, nor the Treasury a cheaper and better article than the Home-office, but each and all work together, without much or any regard to endeavours, the people whom they serve. They are organised for a particular purpose, and have their duty regulated by one office or power—the Treasury or the Ministry, which is again nominally responsible to Parliament. As things are now managed, however, the Minister competing in the main the organ of Parliament, for purposes of responsibility these two bodies are nearly identical. The heads of different departments may intrigue against each other, and sometimes bid for popular support, but obviously the public departments are wholly deficient of that principle of competition in relation to the public, which in society at large is the source of general improvement. Duke Sir Stafford Northcote and Sir C. Trevelyan, in their report on the Organisation of the Permanent Civil Service, describe the absence of competition as "one of the *natural* difficulties under which the Civil Service labours" in contradistinction from all the professions and all the businesses of life, and which makes the Civil Service at all times, in comparison with them, slothful, apathetic, negligent, and behind general society. No means are, or perhaps can be, provided to keep watchers awake to take care of those who should take care of others. *Quis custodiet ipsos custodes.* They slumber at their posts, utterly fail to see shoals and rocks ahead, squalls brewing, and hurricanes that beset the path of the nation, and often when danger has now arrises, they must be disregarded or put aside by the public to ensure its safety.

The two gentlemen just referred to officially and solemnly declare that the entrance into the Civil Service is chiefly sought after by the unambitious, the indolent, or those who have failed to cannot succeed elsewhere placed on the Civil Service," which is burdened with persons below the average of society in industry and ability. Sir James Stephen, for a long period Under-Secretary of State for the Colonies, says "The majority of the men that the Colonial Office has had, in my time, possessed only in a low degree—and some of them in a degree almost incredibly low—either the talents or the habits of men of business, or the industry, the zeal, or the knowledge required for the effective performance of their appropriate functions." Mr. Chadwick, who quotes the passage, confirms it by the testimony of Sir Robert Peel, and sometimes "that the inefficiency of the Civil Service, as compared with *rude* private service, constitutes an argument for amendment." He shows, too, that a similar kind of inefficiency pervades the Civil Service of the United States, and has pervaded or still pervades several branches of the Civil Service in Germany and France; though he infers the possibility, by dint of regulations and a superior organisation, to make the Civil Service, of which competition never is or threatens to be the living principle, though it may be partially and locally acted on, superior to what he calls "rude private service." An examination, however, of his elaborate paper, and of all that has been written on the subject, shows that the principle which he and all the others rely on for improvement is the principle of competition as it exists in general society; and that neither he nor any other person has found out or imagined motives for diligence and care other than or superior to those motives which ensure success in private life, and which involve every man's fortune and fame. If they can only produce "rude" service, no regulations can produce any better, for all regulations must in their effects fall short of the motives which in the competition of general society continually spur men on to excellence.

Every person who has investigated the subject agrees in the opinion that the Civil Service is essentially defective. In considering the means of improvement, we must remember that the bulk of the improvements already from time to time introduced into it sprang from men whose minds had been formed outside of it. Even Sir Charles Trevelyan was educated in the East India Company's service, which was never wholly shut out, like the service of Government, from competition. It had, in fact, always to compete with Government for its existence; and all its members shared to some extent in the advantages of the principle. The other great reformers of the Civil Service—Mr. Porter, at the Board of Trade, whose influence was felt through all the statistics of the empire; Mr. Finlayson, who introduced reform into the Annuity department of the finances; Mr. Farr, the chief author of all the details of the system of registration; Mr. Rowland Hill, to whom the public is indebted for Post-office improvement; Mr. Wilson, the present Secretary of the Treasury, who has simplified and improved the Revenue accounts; and even Mr. Chadwick himself, the author of many improvements in the Civil Service, were all formed by the competition of general society. The first was a wine-merchant, the second an actuary of an insurance office, the third a private medical practitioner, the fourth a schoolmaster, the fifth a hatter, and the sixth a frequent contributor to the press, or what is called a penny-a-liner, and a public writer for any party who would employ his pen. By far the most valuable improvements which have latterly, or at any time, been made in the Civil Service, have originated with men who have not been formed in it and by it, but outside of it, in that general society which has in it a principle of growth and improvement; and not in the Civil Service, which, of itself, is naturally and thoroughly conservative, stationary, torpid, and stagnant.

It is now proposed to improve it by competitive examinations, to be made the bases of all future appointments; but these can be at best only poor substitutes for the actual active competition which, in general society, begins at school, follows the youth into the counting-house, the workshop, or the surgery, and builds up the man through life, till he transcends all other men, or sinks into a humble and forgotten grave. It is impossible that the utmost skill of all the Chadwicks and Trevelyans can by their regulations make the Civil Service of the Crown superior to the general society; and they might think themselves but too successful could they approximate it even to that which Mr. Chadwick has very strangely called "rude private service."

One of the great means relied on to improve the Civil Service is examination by boards of examiners. There must be a special examination for every office, so that examination would frequently be more onerous and costly than of the Civil Service. How inefficient this would be, however carefully devised, is shown by Mr. Chadwick. He objects to the academic examination recommended by the two official Baronets, that it would have excluded from the public service more than one recent Lord Chancellor and Chief Justice, who began life as young clerks in attorneys' offices. We have a thorough conviction, too, that it would have excluded from the Civil Service every one of the reformers, including Mr. Chadwick himself, we have above referred to. It would have excluded (he says) the late Duke of Wellington from the Army, and Nelson from the Navy. It would have placed, according to him, at the top of all competitors, a late superintendent of machinery at Woolwich, who from his mathematical education, declared that if a locomotive were made to drag without cogs, he would undertake to eat the engine, and the rails into the bargain. It would have bestowed honours on those who decided that the screw propeller was impossible, on the principle that action and reaction are equal and contrary, and have excluded from the Government service, those who have made it the great instrument of modern navigation. It would have received with acclamation the Astronomer Royal, who proved mathematically that the Crystal Palace could not stand; and would have turned away Sir Joseph Paxton, who made it the ornament of the land and introduced by it great structural improvements. Thus Mr. Chadwick demolishes the artificial examinations he recommends, and leaves us without any rational hope of effecting any great improvement in a service founded on a principle thoroughly in opposition to competition. Destitute of this principle, as it must essentially remain, the Civil Service, however much it may be momentarily improved, will for ever lag behind general society, except in cases—as in Germany and France—where the Civil Service becomes so vast and multifarious, and is so cunningly organised, as to embrace the whole nation, and suppress every improvement but that which springs from itself. Then, however, it runs counter to nature; and the more admirable and complete it is, the more certain and speedily does it lead to revolution. We differ, with regret and with much diffidence, from the great authorities we have before us; but, while we take them as unexceptionable witnesses to the present imperfect state of our national contrivances, we are compelled to conclude against them that the remedies they propose, though not to be rejected, would be only temporary, partial, and incomplete. They aim at making the Civil Service permanently superior to general society, or what they call "rude private service," which they can only accomplish by rooting out from this the great natural spring of improvement. To no man nor men is the power given to accomplish this except by extirpating the human race. The Civil Service must remain inferior to general society.

THE BAND PLAYING IN THE FRENCH CAMP.

THE French have shown their superiority to the English in the attention they have paid to the maintenance of their military bands, as in everything else. While the English Camp has been for weeks, if not months, without any attempt to cheer the hearts of the men with inspiriting martial airs, our more mercurial neighbours have kept up the regular practice of the bands, which has had an excellent effect upon the soldiers.

The Illustration which our Artist has given of the French Camp has a much more cheerful air than that of any portion of our Cantonments. In the foreground, towards the left, General Canrobert is returning from a ride, followed by an aide-de-camp and two *hussards*. The huts are intermixed with tents, and the place altogether has much the appearance of a Bulgarian village. The English soldiers on their way from the lines pass through this encampment, and generally make a halt there on their way to and from Balaclava, especially when the band is playing. Occasionally the English visitors crowd round the musicians, and frequently some one pulls a bottle of brandy out of his pocket, and insists on the Frenchmen taking a glass, to keep the cold out of their stomachs. Sometimes a couple of Irish soldiers dance a jig, to the great amusement of the bystanders. When the band has finished playing, off go a number of the men with their English visitors arm-in-arm to the canteen (which may be seen on the left, with a cart and several barrels near it), where they will no doubt do their best to counteract the evil effects of cold in the trenches.

MR. LAYARD AND HIS CONSTITUENTS.

ON Wednesday, pursuant to invitation, the County-hall at Aylesbury was densely filled with the electors of the borough and hundred, to hear from Mr. Layard an account of his Parliamentary conduct since his election, and his opinion on the state of affairs in the East. On the platform were several of the more influential Liberals of the borough, and the chair was taken by Mr. Acton Tindall, the Clerk of the Peace. Mr. Layard and his friends entered the hall at half past three o'clock; immediately after which the Chairman briefly opened the proceedings.

Mr Layard, in the opening of his speech, was at some pains to defend himself from the charge of having betrayed confidence in publishing an attack upon Admiral Dundas. In doing so he denied that he had reported to the *Times*, or that he had any political connection with that journal. As regards the offers which had been made to him by Government, he said —

Lord Palmerston offered to appoint me Clerk of the Ordnance; but I felt that, having voted only two days before that no confidence ought to be placed in the late Government, I could not consistently take office in another composed chiefly of the same materials ("Hear," and cheers). Secondly, I recollected that I had stated it to be Government to reply men in the right places, and I was in no way connected with the Ordnance. I felt, therefore, that I should betray my own principle if I accepted an office in which I could not serve the public. The consequence was that I refused office, and made a speech of which you are aware. In the new Government Lord Aberdeen formed, three of its most important members retired, and Lord Palmerston attempted to form a new Government. On Friday last his Lordship sent for me, and offered me the office of Under-Secretary at War. Now, although not anxious for office, and having expressed my opinion, as I felt that I should not be doing my duty to the public did I shrink from accepting such office when offered. It would look as if I feared to incur the criticism of which I had been so unsparing. Therefore, when Lord Palmerston offered me the office, I simply made some conditions as to being allowed to speak and vote as I pleased, and accepted it. But on the following day Lord Palmerston sent for me again, and said that for certain important reasons he was obliged to withdraw his offer, but that at Lord John Russell's request I could have the office of Under-Secretary for the Colonies. I now felt that I was in the same position as I had been a few days before I was not acquainted with the Colonies, and although, in time of peace, I might have had time for learning, I felt that, at a moment of great national emergency, public men, when called on to act, would betray themselves if they attempted to do that for which they had had no previous preparation. I, therefore, declined the office, at the same time informing Lord Palmerston, that if he succeeded in forming a Government worthy of the public confidence, and of my confidence, he should have my independent support.

Mr. Layard then proceeded to criticise the conduct of Ministers from the commencement of the Russian aggression, condemning in strong terms the indecision of the Aberdeen Cabinet. If we had exhibited a bold front at the beginning there would have been no war. It was our timid policy, the timid result of a divided Cabinet, which led the Emperor of Russia to persist in his aggression. The same increase used by Lord Clarendon in the summer of 1853, that we were "drifting into war," showed how much Ministers had been to blame. That was not a word for a statesman to employ to control the destinies of a country. A ship drifted into danger; only when she had no oar in the hands of her pilot. After glancing at the various blunders committed by Government since the war began, he said he disapproved of the appointment of a Committee of Inquiry. He had voted for it merely as a vote of censure against the Government. He thought that its inquiries prosecuted strictly may be dangerous to the country, and what was more, might have been prevented (Hear, hear). If Lord Palmerston had come forward with a vigorous programme of reform, and asked the House to release him from this committee, they would have done so; but now it was too late, and it would be impossible to do so without it. After one or two further observations, the hon. member concluded by calling on all who heard him to sign the petition in favour of Lord Goderich's motion.

Resolutions were passed approving of Mr. Layard's Parliamentary conduct, and in favour of Lord Goderich's motion.

SOCIETY OF ANTIQUARIES.—On Thursday week Mr. R. N. Philipps, LL.B, of the Inner Temple, was elected a Fellow.

THE ROYAL INSTITUTE OF BRITISH ARCHITECTS, on Monday last, paid a graceful and well-deserved compliment to the French school, by unanimously recommending that her Majesty should be pleased to confer the Royal Gold Medal of the Institute upon Monsieur Hittorff, architect, of Paris, Member of the French Institut, and Honorary and Corresponding Member of the British Institute. The many fine buildings erected by that gentleman at Paris, and his numerous published works upon the art, eminently entitled M. Hittorff to the testimony thus gracefully borne to his merits by his English professional brethren.

M. SOYER has left London for Scutari, viâ Marseilles, where he intends to "be enabled to render some service to our poor suffering brethren, and, with the cordial co-operation of the authorities there, to place the *cuisine* in such a perfect state that will supply all future wants with comfort, economy, and order."

COMMERCIAL EMBARRASSMENT IN RUSSIA.—A letter from Moscow states that trade is completely dead there. Four great failures took place in a single day, and other disasters of a similar kind have taken place in other parts of the Russian empire.

M. Lecomte's "Arabian Night" concerning Mdlle. Rachel's American engagement has been denounced as a fabrication by M. Raphael Felix, brother to the lady, and manager of her tours. M. Raphael Felix has addressed to the journals a letter declaring that the contract, the emolument, and all the other incidents of "the wondrous tale," are only so many falsehoods.

MUSIC.

"THE STAR OF THE NORH," AT DRURY-LANE THEATRE.

Mr. Smith, of Drury Lane, has forestalled Mr. Gye in the production of Meyerbeer's comic opera. "L'Etoile du Nord"—the latest work of that renowned musician, beyond comparison the greatest dramatic composer now living. It was Mr. Gye's intention, could he have accomplished it, to bring out this opera at Covent Garden last season, immediately after its original production at Paris; and there seems no doubt that he will do so during the season about to begin. In using the word "forestalled," we do not impute any blame to the manager of Drury Lane. He has done what he doubtless had a good right to do The opera has already been performed at many theatres, in France, Belgium, and Germany; the right of representing it is public property, and a correct version of the piece can be obtained without recourse to any surreptitious means. But, certainly, Mr. Smith has taken from the work something of its bloom, and given, to those to whom it was new, an impression of it differing considerably from what would have been produced by witnessing its first representation with all the "appliances and means to boot" of the Royal Italian Opera. But, on the other hand, he has made it known to many who do not visit that high-priced theatre, and who are satisfied with a lower standard of excellence. On the whole, indeed, he may be said to have done wonders, having contrived to get up the opera with a completeness and splendour, which, considering his limited means, we could scarcely have believed possible. When he undertook to bring it out, he had to create a whole establishment for that express purpose. He had to form an entire company of vocal performers; to provide an instrumental orchestra, and a chorus; together with the numberless items required for a musical theatre; and all this he had to do in such a way as to give his speculation a reasonable prospect of success, and not of certain and ruinous loss. He has succeeded; and, we think, has deserved to succeed.

It would be tedious and useless to detail the subject of this drama. "*The North* is the Empress Catherine, the wife of Peter the Great, who (according to M. Scribe's version of her history) gained the Emperor's affections while he was working as a journeyman carpenter in a Finland dockyard, and she was one of the *ouvrières* who supplied the workmen with brandy and provisions. She afterwards discovers and saves him from a dangerous conspiracy among his officers, and nearly sacrifices her life in his cause, undergoing sufferings which for a time deprive her of reason. Recovering her senses through the attentions of her Royal lover, she finds herself at last raised by him to the Imperial throne. These incidents are developed in a manner well calculated for dramatic and musical effect. There are strong situations and passionate scenes; but the general tone of the piece is gay and lively; *Peter* himself being decidedly a comic character,—blunt, homely, and familiar, -with the Russian propensity to get drunk. There are some capital sketches of camp-life, in which Meyerbeer has made use of the music originally written for his much-talked of but little-known opera, the "Camp of Silesia."

The music, like that of "Robert le Diable," the "Huguenots," and the "Prophète," must be familiarised to the ear by repeated hearing before it can be thoroughly understood and appreciated. Indeed, it is more strongly marked with his peculiarities than any of his previous works. It departs even more from recognised and conventional forms. It appears to be less melodious (but is not really so), because the melodies, from their novelty of rhythm and style, are more difficult to be caught by the ear; but, when once caught, make a deeper and more enduring impression than more familiar strains. In this work, as in the "Prophète," Meyerbeer affords no facilities to the singers; he expects them to take the most chromatic and unvocal intervals with the certainty of an instrument. His concerted music is full of unusual combinations and transitions, which appear harsh and rugged because they are unusual; for when once we are used to them their harshness disappears. The taste, in short, for music of this kind is not like the taste for a national tune, which (like the taste for honey) the child possesses as well as the artist; it is the *acquired taste* which is the result of art, and which like the taste for things at first bitter in the mouth) at last becomes the strongest of all. We feel by degrees that such music has a purpose beyond merely pleasing the ear—that it speaks, not to the sense alone, but to the mind and the heart. But its difficulty is in proportion to its power. To produce its full effect it demands a perfection of execution which is rarely obtained, while it generally happens that the music bears the blame due to the performance

The performance of Monday evening was necessarily and unavoidably full of imperfections, but yet (as has been said) much more satisfactory than could have been expected. It was a great advantage that the part of the *Empress* was sustained by Mrs Harrison Drayton, a musical musician, and an excellent performer. Mdlle. Jenny Baur, a singer newly arrived from Germany, who appeared in the character of *Catherine*, showed a considerable degree of vocal power and fluency of execution; but she fored her voice too much, and sang out of tune. If she would use a little less effort she would sing better. The second female part—an interesting country girl was well acted, and sung by Mrs Drayton; and, in the principal tenor part, Mr. Miranda acquitted himself respectably. In the concerted music, the choruses, and the orchestral parts, there was great room for improvement. They were confused, incorrect, and often intolerably noisy. But these faults, it may be hoped, will diminish with repetition. The spectacle, and general *mise en scène*, left nothing to be desired. It was not only *gorgeous* and magnificent, but in excellent taste. The house was crowded from the floor to the ceiling, and the performance was received with enthusiastic applause. It was impossible that a great miscellaneous audience could fully appreciate the beauties of such a work, through the medium of an imperfect performance; but, with every drawback, it had a general effect of beauty and power sufficient to account for the impression it made.

We shall Engrave a scene next week.

HANOVER-SQUARE ROOMS. Mendelssohn's "Lobgesang," and ROSSINI'S "Stabat Mater," are to be performed at the next concert of the Harmonic Union, which is fixed for Wednesday evening. The latter work is new to our great London choral society. Le Jeune of Essendelle presiding its performance in that building. Mrs. Sims Reeves, Miss Lascelles, Mr. Sims Reeves, and Mr. Weiss, are announced as the principal vocalists, the conductor being Herr Molique.

THE THEATRES.

SADLER'S WELLS. "Macbeth" was revived on Saturday and was well received by a very numerous audience. The cast was considerably varied. Mr. Robinson, a performer who has been gradually improving in his profession, was advanced to the *rôle of Macduff*, and performed it with elegance and spirit. Miss Atkinson, also, was tried as *Lady Macduff*. With many qualities of natural force, this young lady has yet to acquire steadiness and weight. It cannot be said that she has yet formed a decided conception of character, or fixed the exact reading of the part. Much is yet accidental, or tentative; the acquirement of Essendelle preaching are both sternly requisite, in order to the cultivation of taste and to enable her to vary as well as to facilitate the execution of the tragic high class of abstract histrionic impersonations; nevertheless, under proper direction there is hope for the future in the energy at present developed. Mr Phelps paid especial attention to the psychological scene in the third act, in which, while conscious of having secured the assassination of *Banquo*, the new-made monarch, mystifies his Queen, having now recovered the mental supremacy, and assumed the independent direction of affairs, without counsel or aid from his wife, whom he would wish henceforward to be ignorant of the crimes that destiny and his position may compel him to commit. The triumph and finesse, with the superstitious half-incredulity and disguise, the well imagined and tinted secret hypocrisy—all these elements were carefully embodied. This performance of the tragedy (into which Lock's music and the melodramatic crowd of witches are not admitted) powerfully affects the imagination with a sense of reality, and intensifies the passions of pity and terror which it was the poet's purpose to awaken.

HAYMARKET.—Senora Pepea Nena, with an entirely new group of attendants, reappeared on Monday at this theatre. The management has signalised her return by improved stage decorations; and the impression made on the Senora's dancing is likely to increase, for the machinery now displayed in her *pas* even exceeds that of former seasons Two new ballets have been introduced, of indescribable plots, but full of interest, motion, novelty, and dashing effect: particularly a Gallician *pas de deux* with Senor Marcos Diaz, which was wonderful.

LYCEUM.—This theatre closed on Saturday, but reopened on Monday, when we witnessed the performance of the new piece entitled "Too Much of a Good Thing." The fabric of the drama is slight, and the development merely technical, aiming at no probability, and satisfied with any small effect, anyhow obtained. A dummy performs an important part in it; first, occupying the bed of a pretended invalid husband, during his nocturnal absences at Cremorne; and next that of his too-loving wife, after the trick has been discovered. *Captain Hector Montgomery* (Mr. Roxby) had resorted to the ruse in order to get some time to himself from the excessive attentions of his over-affectionate spouse; but the expedient has a tendency to lead to inebriety and dissipation. The cure is effected by the lady affecting indifference, and the husband's jealousy being excited by the presence of his own lay figure in her chamber. Mr. Roxby acted with his usual animation; and Miss Hughes, as his wife, *Isabel*, evinced much retiring grace which was well enough contrasted by the dashing conduct of *Mrs. Diana Brandycnap* (Mrs. F. Matthews), the friendly medium for effecting the required change in the situation of the married couple. The attraction of trifles like this, however well acted, is evidently on the wane; for the house, we regret to say, was indifferently attended. The spirit of the times is in favour of sterner realities; and Mr. C. Mathews would, we think, do well to provide a weightier and more elaborate kind of drama, in stricter accordance with the prevailing mood of the public mind.

Mrs. HOWARD PAUL (late Miss Featherstone) gave a musical entertainment at the Theatre Royal, Lincoln, on Monday evening, which was fashionably attended. At the request of Lieut.-Colonel Ellison and the officers of the North Lincoln Militia (who bestowed their patronage) a vaudeville was also performed, in which Mr. and Mrs. Howard Paul performed with much satisfaction.

CHESS.

TO CORRESPONDENTS

I. H. A., Liverpool.—1. The tablet of the two pieces, the top of which forms the regal British crown, is a relative to the King. 2. Your solution is altogether wrong

LILLAWATI.—In such a position the King cannot take the Bishop.

CHESSICUS, Bath.—It shall have attention

HASTINGS.—Nos. 1 and 2 are quite correct

A. K., Dublin.—Your solution is not duly examined

J. P. and J. P. S., R.B.—All very much below our standard

YORK, Russia.—We are, indeed, very greatly obliged by the offer, and in return shall have sincere pleasure in placing the works mentioned at your disposal

E. H. C., New Jersey.—The question whether a player *is compelled* to take an adverse Pawn en passant, when he has no other move at command, still remains a moot point, and will continue so until the whole code of Chess laws undergoes authoritative revision. Your view is the popular and plausible one, and is supported by considerable ingenuity; but we still adhere, for, to the persuasion that, when a player has once advanced the Pawn to the 4th square, it is optional with his opponent to take that Pawn *en passant* or not

M. DE K., Paris.—Your last has been replied to by letter.

VIGIL.—You will find some account of the chief metropolitan chess-clubs, &c., in Mr. John Timbs's recently-published "Curiosities of London" a work, we must take leave to say, which, for the extent and accuracy of its research, and the encyclopedic variety of its information, is entitled to rank among the most remarkable of the many interesting books, from the times of Speght and Stow to those of Knight and Cunningham, which have treated of that inexhaustible theme.—the Modern Babylon

J. R. CROSS, Avon.—The "Chess-Player's Handbook," published by Bohn. Price 5s.

T. R. C.—We know nothing of the game.

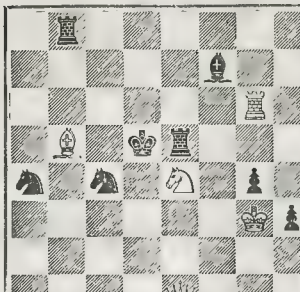
SOLUTIONS OF PROBLEM No. 574 by REV. F. T. F., Temple, J. M., F. T., Derby; Short, Sheffield, are correct

SOLUTIONS OF PROBLEM No. 575 by W. C Streatham, E. H., F. T., Derby; F. R., Norwich, Persico, Rev. Shamrock, Philo Mechus, H. H. A. Z., Admer, S. P. Q. R., Deverell, R. F., Royal Artillery, Argus, Tubbs, Clement, Farrer, F. C., G. B., Wynstay, Clerieus, M. P., Hull, Stanley, are correct. All others are wrong

PROBLEM No. 576.

By J. B., of Bridport.

BLACK.



WHITE.

White to play, and mate in three moves.

A CHESS MANUSCRIPT.

(Continued from page 179.)

"The editor of "Le Palamède," M. St. Amant, in his analysis of the fourth game played by him against Mr. Staunton, appears to condemn himself for the defence of *Q to K 2nd* at the fourth move of the Guioco Piano. The most superficial examination, however, suffices to prove that it was not this move which lost the game, and M. St. Amant, indeed, clearly shows this in his examination. I was curious to see what the old masters thought of this same defence, and, opening my ancient MS. I discovered the following début, expressly calculated, it would seem, to paralyse the move of *Q to K 2nd*:—

WHITE.	BLACK.	WHITE	BLACK
1. P to K 4th	P to K 4th	5. Q to K 2nd	What he will (*a*)
2. Kt to K B 3rd	Q Kt to Q B 3rd	6. P to Q Kt 4th	K B to Q Kt 3rd
3. Kt to Q B 4th	K B to Q B 4th	7. P to Q R 4th	What he will
4. P to Q B 3rd	Q to K 2nd	8. Q B to Q R 3rd	

(*a*) *Sic* in original

"The position of White is certainly very fine. Amateurs should examine whether Black at the 7th move could not do something to enfeeble it. We here see that Leonardo, to oppose advantageously the defence of Q to K 2nd, thinks proper to reply with the same move.

"The following is another opening of Leonardo, in which he himself adopts the defence of Q to K 2nd, successfully; but in this case the first player moves the P to Q B 3rd, before bringing out his K Kt.

WHITE.	BLACK.	WHITE.	BLACK.	WHITE.
1. P to K 4th	P to K 4th	6. Q B to K Kt 5th	B takes K B P (ch)	
2. K B to Q B 4th	K B to Q B 4th	7. K takes B	Kt to K 4th (ch)	
3. P to Q B 3rd	Q to K 2nd		K takes B	
4. K Kt to K 2nd	K Kt to K B 3rd	8. K retires	Q takes B	
5. P to Q 3rd	P to Q 3rd			

White has now *gained* Black and gained a Pawn.

"The next is a Game of G. Cesare Polerio, which would seem to prove that Q to K 2nd on the 4th move, is a bad defence; but I doubt whether the play, especially on Black's part, is altogether irreproachable. However, if Black's defence is feeble, the attack of White appears to me sufficiently vigorous, and the game may probably on that account prove not without interest.

WHITE.	BLACK.	WHITE	BLACK
1. P to K 4th	P to K 4th	12. K Kt to Kt 5th	K Kt to K R 3rd
2. K Kt to K B 3rd	Q Kt to Q B 3rd	13. Q Kt to Q 5th	P takes P
3. K B to Q B 4th	K B to Q B 4th	14. P takes P	Q takes P
4. P to Q B 3rd	Q to K 2nd	15. Q B to K B 4th	Q to her 2d th
5. Castles	K Kt to K B 3rd (*c*)	16. Kt takes B	Q takes Kt
6. P to Q 4th*	P takes P (*d*)	17. R to K sq (ch)	K to Q sq
7. P takes P	K B to Q Kt 3rd	18. B takes K B P	K B to K B sq
8. P to K 5th	K Kt to his sq	19. Kt to K 6th (ch)	K to his 2nd
9. P to Q 5th	Q Kt to his sq	20. Q to her 6th (ch)	K takes B
10. P to Q 6th	Q to K B sq	21. Q takes K B (ch)	K to Kt 3rd
11. Q Kt to Q B 3rd	Q Kt to Q 3rd	22. Q takes Kt P (ch)	And White wins.

(*Notes by the Editor*)

(*a*) Better to play P to Q 3rd.

(*b*) Here the second player should rather have retreated his Bishop to Q Kt 3rd

* In the game referred to, Mr. Staunton played P to Q 4th at the fifth move, which makes every difference. The moves then proceeded as follows:—

6. P to Q 4th	P takes P	13. P to K B 5th	Q to K B 3rd
7. Castles	Q Kt to K 4th	14. P to K 5th	Q to K R 5th
8. Kt takes Kt	Q takes Kt	15. Q B takes Kt	Q takes B
9. P to K B 4th	P takes Q B P (dis ch)	16. Kt to K 4th	B to Q 5th
10. K to R sq	Q to her 5th	17. Kt to Q 6th	Q to K R 4th
11. Q to her Kt 3rd	Kt to K B 3rd	18. B takes K B P (ch)	B takes B
12. Q Kt takes P	Castles	19. P to K Kt 4th—	
13. P to K R 3rd	P to Q B 3rd	And White won easily.	

(*To be Continued.*)

THE AUSTRIAN "SCHACHZEITUNG."

For the following game, and the instructive comments accompanying it, we have much pleasure in acknowledging our obligation to M. von Heydebrand. The *partie* itself is extracted from a new Chess magazine, under the direction of an eminent Austrian player, Mr Falkbeer, that has just made its appearance in Vienna, and of which we shall take occasion to speak more at large when the opening numbers re ach us.

Between HERR SCHLESMIN and another Viennese Amateur.

(*Notes by Von H. d. L.*)

(*a*) This gambit, though called the "Allgaier Gambit," was not Allgaier's invention. It was, however, he who first analysed it; and he remarked that he had not discovered any satisfactory and invariably winning defence against this attack, but that he felt convinced such a defence was possible, and might be found

(*b*) Allgaier makes no mention of this check, he played

7. Q takes Kt P	Kt to K B 3rd
But Mr Horny's reply of	
8.	K R to Q 3rd

having come into vogue against that mode of play, Mr Jacob Vitz introduced the above check in his edition of Allgaier's treatise at 824, p. 26*

(*c*) If the second player be inclined to win the game, he should now play the King back to his own square. See "Bilguer's Handbuch (second edition), p. 16, where it is observed that the consequence of Black's playing K to Kt 2nd would be

9. B takes Q P	B takes B	[10 Q takes K Kt P (ch, &c.)

The Vienna game is continued in this way: but Mr Falkbeer remarks that it would be better play for Black not to take the Bishop, but to try

9.	K to Q 2nd	[11 P takes P K B to K Kt 4th (ch)
10. B takes Q R	P to K B 6th	12. K to B sq

And Mr Falkbeer "think has decidedly the better game, though he have lost the exchange and some Pawns I must confess I doubt this assertion. and think Black has the disadvantage

RAILWAY MEETINGS.

EASTERN COUNTIES The half-yearly meeting of this company was held at the London Tavern on Tuesday—Mr. DAVID WADDINGTON, M.P., in the chair The chairman, in moving the adoption of the report and statement of accounts, said he would like the opportunity of congratulating the shareholders upon the fact that, upon the second half-year of the joint working of the Eastern Counties and the Eastern Union, the directors were enabled to place before them a balance sheet, showing an increase in the returns, upon the half-year, of £77,342; whilst the increase in the expenditure was only £8772; the increase in the dividend being from 4 6d. to 7s. per share. Looking at the high rate that had been paid for materials and labour, by which their expenditure had been much increased, he did not think this at all an unsatisfactory result. A long discussion ensued, principally in reference to the impolicy of further extensions, and whether the company did not lose by low excursion fares; which having been briefly answered by the chairman, an amendment was put on the report, that the dividend should be paid free of income-tax, but negatived by an overpowering majority. The report was then adopted; the retiring directors and auditors re-elected; and a vote of thanks given to the chairman.

EAST LANCASHIRE.—The proprietors at the ordinary meeting, on Friday (last week), declared a dividend at the rate of 4 per cent per annum for the half-year; and authorised the directors to raise £100,000 by the issue of 4, per cent £5 preference shares to that amount, and also to renew £2,000 on debenture

SOUTH STAFFORDSHIRE.—The report of the directors submitted to the proprietors on Saturday last stated that the chief disbursements on capital account amounted to £86,893, for carrying stock for the new Wichnor branch and the Dudley station. The contracts for the Norton and Cannock branches were let. A dividend at the rate of four per cent, less Income-tax, was declared.

SOUTH WALES.—The half-yearly meeting was held on Tuesday, at the Great Western Hotel, Paddington; Mr. C. R. M. Talbot, M.P., was in the chair. From the report of the directors it appeared that the revenue receipts of the past half year continued to indicate a steady increase in the traffic. The earnings during that period amount to £561 per mile as compared with £510 per mile during the corresponding period of 1853. After making allowance for all the charges in respect of rolling stock which remained unadjusted at the period of the last half-yearly meeting, a dividend at the rate of three per cent per annum was declared, which leaves a balance of £833 os. 9d. to be carried forward to the credit of the revenue account for the current half-year. The report having been adopted, a resolution was passed authorising the directors to create preference shares or stock to the amount of £320,000. This capital is required to meet the expenditure on the line between Haverfordwest and Milford Haven, and on the extended sidings and other works of accommodation in course of construction at various parts of the line.

CITY OF LONDON ELECTION. A meeting of the Liberal Registration Association was held at the London Tavern on Thursday afternoon, in reference to the election for the City, which takes place today. After some discussion, in which Baron Rothschild, Mr. Williams, M.P., Mr. Wilkinson, M.P., Mr. S. Morley, Mr. P. A. Taylor, and other gentlemen took part, the following resolution was passed with much applause:—"That it is the opinion of this meeting that Lord Palmerston, in undertaking the responsibility of forming an Administration and conferring on the Government in the present circumstances of the country, is entitled to the confidence of the nation, and this meeting pledges itself to support the return of Lord John Russell, a member of his Cabinet, as representative for the city of London, and to use its best exertions for that purpose. In so doing it expresses the hope that his Lordship's return to office may be regarded as a guarantee that such arrangements as he may make as will effectually prevent a recurrence of the lamentable disasters which have disgraced the late campaign; and further, this meeting considers it to be its duty not to allow the re-election of Lord John Russell to pass without declaring its continued interest in that civil and religious progress which in times past has secured to him the support of the citizens of London."

FUNERAL OF THE LATE MR. JOSEPH HUME.—On Thursday morning the remains of this gentleman were removed from his town house, Brunston square, Marylebone, to Kensal-green Cemetery, Harrow road, according to the wish of the deceased. The funeral arrangements were of the most unostentatious character.

FRENCH AND ENGLISH COOKERY.—In cooking I need not say our neighbours beat us hollow. I partook of a sumptuous banquet in the tent of an officer of the Guards the other night, the staple of which was a goose, purchased for a golden egg in Balaclava; but which assumed so many forms, and was so much and strange in all—now coming upon you as a *pièce de resistance*, again assuming the shape of a *gibelotte* that would do credit to Philippe, and again turning up as a delicate little *pâté* with the bones of woodcocks—that the name of the goose was at once demanded He was a grisly-headed Zouave, who stood at the door of the tent, prouder of the compliments which were paid to him than of the few francs he was to get for his services. "Jent," as he was, by the Captain's company for the day. A few days after—these were Christmas times, or were meant to be—there was a dinner in another friendly tent. A Samaritan sea captain had presented a mess with a "clear of English fowls as ever quacked." The guests were seated—the cover was placed on the table—it was removed with enthusiasm—and lo! there lay the duck burnt black, and dry as charcoal, in the centre of a mound of turnips. "I hear rowls were always a vurk," was the polite defence of the wretched criminal as he removed the sacrifice for the time. Then he brought in the soup, which was excellent, especially the broth; but we could not eat soup all night, especially when the caution was wanting. "Now, then, Banks, bring in the leg of mutton." "The wa-al, sur!" "The leg of mutton: and look sharp, do you hear? I hope you've not spoiled *that*, too." "Wy, sur, these been 'ship rowls!" The miserable being had actually *boiled* down the leg of mutton in the soup, having cut it large slices off to make it fit the pot! *Letter from the Camp, Feb.* 12

PEACE MEETING AT MANCHESTER.—A meeting, convened by private circular, was held the offices of the Peace Society, Newall's-buildings, Manchester, at seven o'clock on Tuesday evening. "To consider the general policy and the commercial and social effects of the present war." The circular bore the signatures of Messrs. George Wilson, R. H. Gregg, Thos. Thompson, Wm. Rawson, Edmund Ashworth, W. B. Watkins, Wm. Harvey, Wm. Bickham, and Sir Elkanah Armitage; and, in addition to these gentlemen, about seventy to eighty others were present. No resolutions were proposed, the chairman explaining the object of the meeting to be "to prepare the public mind for the conclusion of the negotiations." The speakers, besides the chairman, were Mr. R. H Gregg, who argued that Russia could not give a material guarantee, and that the fall of Sebastopol would be a hindrance to peace; Mr. Thomas Thomason, of Bolton; and Mr. E. Ashworth, of Turton. The latter gentleman expressed a fervent hope that "we should be satisfied with the war successes already gained."

A number of trees near the principal entrance of the Palais de l'Industrie, in the Champs Elysées, are being cut down, in order to afford a better view of the edifice, and at other parts of the building trees are to be cut down for the same purpose. Some of the trees are very large, and date from 1770, when the plantation of the Champs Elysées, which was commanded by Catherine de Médicis in 1616, and completed in 1670, was renewed

THE BRITISH INSTITUTION.

(FOURTH NOTICE.)

We resume this week our illustrations and our comments. Our Engravings are taken from the contributions of two young artists, whose works afford abundant proofs that at least they are on some miles in the high road to future distinction. Mr. Hemsley supplies us with one of the two pictures he has sent—a scene from rustic life, which tells its own story, but which the Catalogue conceals in the general title of "Expectation." It would be easy to give it a name far more applicable, and doubtless [illegible] at a glance, soon [illegible] much more appropriate. A [illegible] paper might be written on what pictures are like from the titles given them in catalogues. We doubt if any imaginative, or even matter-of-fact critic would, from "Expectation," guess at [illegible] Mr. Hemsley has painted, and so [illegible]. Let us add that Mr Hemsley is a conscientious painter: he does not shirk his work; and though his canvas is small, he knows how much excellence a few inches of panel may be made to [illegible].

The [illegible] of the week is Mr. [illegible] "Dream of the Shepherd's Dog" (No. 464) is by far the best work that we have seen from his hand. Here is a healthy Highland boy asleep in his roughly-made wooden cradle, watched by a collie with which he has evidently gambolled till he fell asleep. Almost his last thoughts turned upon this dog, and the artist has poetically shown what the boy-thoughts are as he sleeps soundly in his cradle. He is dreaming of future years, when, with his faithful collie by his side, he shall be a lad and able to watch his sheep on the sides of his native mountains. The present and the future of childhood and *lad*hood (if we may be allowed the expression) have seldom been more suggestively indicated. Here is a sweet picture of the Pleasures and not of the sorrows of Hope (Campbell rather than Crabbe), built, no doubt, [illegible] of Landseer's Highland [illegible] and in some degree on them. "Soldiers Dreaming" is Mr Goodall, but in no way [illegible] to detract from the [illegible] of the idea. With such a subject Landseer would have added some touches of truth to the coat of the dog, but he would not have told the future so poetically, if, indeed, he ever sees further than the scenes actually and unmistakeably before him. Mr. Earl's other [illegible] in the Exhibition are [illegible] no means so good as this. After the picture we have engraved of his, we would prefer to possess "Interior of a Cottage near Stratford-upon-Avon" (No. 130), of which the general effect is excellent, though the details are too general.

In renewing our acquaintance with the Exhibition we wish to repair two slight omissions on our part. Mr. Carmichael's "View of the Great Harbour of Malta from the Corladino" (No. 154), painted from a sketch by Captain Hotham, merits to be named for the skilful manner in which the artist has embodied the rude outlines of an amateur, and [illegible] but for the [illegible] of the crews of all her Majesty's ships that ever touched at Malta would believe at once was painted on the spot. Our other omission is one of the same character, and relates to Mr. Glass's picture, "A Border Spoil"—a picture that would have delighted the heart of Sir Walter Scott, so true is it to times of border warfare, when at all seasons of the year, the Howards and Musgraves on the English side, and the Scotts and Armstrongs on the Scottish side, made bold and bloody forays one upon the other. Mr. Glass has given us what we could almost call the famous ride in "The Lay of the Last Minstrel."

"EXPECTATION."—PAINTED BY W. HEMSLEY.—FROM THE EXHIBITION OF THE BRITISH INSTITUTION.

HAYTER'S PICTURE OF "WELLINGTON [illegible]." Engraved by James [illegible] and Co.—Sir George Hayter's historical picture of "The Duke of Wellington Contemplating the Napoleon Relics," at Madame Tussaud's, has been engraved in the finest style of art by Mr. James Scott. The subject is extremely striking and suggestive [illegible] hero surveying with a feeling of sympathy and sadness the humble remains of his defeated rival, whose effigy lies before him in all the calmness of sleep. The various details of costume, furniture, arms, &c., are also historically interesting. Mr. Scott has done ample justice to these varied materials.

ART COLLECTION IN BIRMINGHAM.—The collection of objects in metal, glass, china, &c., selected from the museum at Marlborough House, was opened in Birmingham on Saturday, when upwards of 500 of the inhabitants of the town visited the rooms of the Society of Artists, where the collection is to be exhibited. Many of the leading manufacturers were present during the day, and all the visitors expressed themselves delighted with the collection. The exhibition has been supplemented by contributions from gentlemen of the town and district.

REWARDS FOR DISTINGUISHED SERVICES.—Sergeant-Major Thomas, of the Grenadier Guards, has received an annuity of £20, with 2s. per diem, in reward for his distinguished services at Inkerman, where, in conjunction with Private Lee, he saved the regimental colours. The latter has been advanced to the rank of sergeant, with a similar pecuniary reward.

"THE DREAM OF THE SHEPHERD'S DOG."—PAINTED BY T. EARL.—FROM THE EXHIBITION OF THE BRITISH INSTITUTION.

PARIS FASHIONS FOR MARCH.

At the approach of the London season we cannot do better than speak of ball dresses and toilets. We have had four brilliant *réunions* this winter; the war, and the mourning into which numbers of families have been thrown, having prevented many *salons* from being opened, or fêtes given. England is, unhappily, in the same condition.

Rose is the favourite colour for balls in the coming season. The ball of the Préfect of the Seine has presented us with an example, although it is not cited as one at which the ladies displayed their freshest toilets: for few persons in so numerous and crowded a *réunion* care to wear a dress that has not lost its gloss: we know ladies who remained prisoners until eight o'clock in the morning waiting for their pelisses in the robing-room. The Emperor loudly expressed his displeasure at this want of foresight in his Préfect.

Ball dresses are nearly all double-skirted, with two lace flounces; but a graceful novelty, worthy of notice, was a skirt made with bands of rose velvet, *épinglé*, five inches wide, and separated by a band of the same width, puffed up with rose tulle, and so on; the whole skirt was made in this manner, the corsage being alternated in the same way with trimmings of white blonde for the berthe and around the sleeves. A charming toilet at one of the recent balls was a velvet robe *épinglé*, yellow, with three flounces, covered with white English lace; the upper part of the flounces bore a raised plait of black lace one inch high: on each side of the skirt, and forming a sort of apron, was, on the upper part of each flounce, a black velvet bow, the ends of which hung down to the next flounce; the corsage was made to match these three shades—the lace, the black velvet, and the *épinglé* velvet of the robe. Another charming toilet was composed of bands of white moire and bands of rose velvet. The bands of velvet were attached to those of moire by a garland of pinks worked in silk, half white, half rose; the white part upon the rose ground, and the rose part upon the white ground. Taffetas is always in fashion, and mostly covered with lace. Such are the most remarkable toilets, and their adoption remains with London.

There is nothing new in walking dresses, unless it be that the Scotch plaid has given place to bands of alternating shades, and even materials. Thus, we see dresses of bands of velvet, reps, satin, and *gros de tours* in the same fabric. The success in this material of weaving will figure at the approaching Exhibition. The bands are of different widths, according to the figure. This pattern is advantageous for the skirts; but the large stripe does not become the corsage.

PARIS FASHIONS FOR MARCH.

THE ILLUSTRATIONS.

White Robe of India Muslin, with two skirts joined to a large surlet at the bottom, of the same material, or of gold or silver. The trimmings of the corsage is of Mechlin lace, forming a berthe.

Head-dress of White Azaleas. Upon the front of the head is a low diadem, with diamonds placed upon a circle, which loses itself in the bands of the hair.

Toilette of Rose Taffetas, with a skirt of two *volants d'Angleterre*, with a berthe at the corsage of the same. Bouquet of natural flowers—roses and white camellias. Head dress of similar flowers, placed very low at the back of the hair, disappearing on each side in a bandeau of puffings.

Robe en Moiré Antique en Bleu Celadon, covered with two lace ounces; corsage with berthe of Mechlin. Head-dress *en folle avoine*, or *en herbes d'eau vive*, with the ends hanging on the shoulders.

The Girl's Dress is a Taffetas Skirt, white ground, with two stripes *a la Pompadour*; the first skirt ending in a *ruche a la vieille*, made of the same stuff, the second skirt of plain white taffetas, and hanging about two inches below the first skirt, and showing the scallops of a petticoat *en percale*, worked *à l'Anglaise*. A rose ribbon passes over the head, and loses itself in the bandeau behind, and comes, after having made a large bow, over the comb, to fall in long ends upon the shoulders.

THE IMPERIAL PALACE, PRAGUE.

By a telegraphic despatch received from Vienna on the 20th ult., we learn that since an early hour in the morning of that day, the Imperial Palace on the Hradschin, at Prague, had been burning. It was the residence of the ex-Emperor and Empress Maria-Anna, who, the account adds, were in safety. The reigning Emperor, on the news of the conflagration being received at Vienna, immediately sent Prince Charles Lichtenstein, the Lord High Steward, to their Majesties.

The Palace, situated in the fourth quarter, called the Hradschin (pronounced Radshin), is built on the Schlossberg, or Palace Hill. The Artist who has favoured us with the accompanying View of the fine old Place from a recent sketch, describes the Hradschin, the capital of Prague, the Kremlin of Bohemia, as a singular agglomeration of buildings of different dates and styles of architecture. Within its precincts it contains a cathedral, a religious establishment, and vast Palaces belonging to the Emperor and to other noble families; besides a treasure-house stored with far-sought relics, prisons, dungeons, torture-chambers; and a pious foundation somewhat akin to that of the Military Knights of Windsor, but with this difference, that its objects are not Knights, but Dames, generally reduced members of the nobility. A lower ward contains some ordinary dwelling houses and barracks for the garrison.

That side of the citadel which faces the old town, and contains the

THE HRADSCHIN PALACE, AT PRAGUE.—FROM AN ORIGINAL SKETCH.

Imperial Palace, is very unattractive;—the whitewashed walls, and total want of architectural embellishment, destroy all the advantages of its lofty position; and are extremely disappointing to an artist's eye. But when, after winding round its base, and rising towards the fortified lines which defend the north-east side of the town, he loses sight of these modern excrescences, and sees nothing less picturesque than the unsymmetrical towers, towers, and spires of the lower ward; he may carry his imagination to the time when blind old Zizka, the Bohemian General, encamped his forces on that distant hill, where the eye can still trace his crenelated wall, and ultimately defeated the Imperial army. The beleaguered city lies in the depression between the Hradschin and the Zizkaberg, still pointing upwards many Kremlin-like cupolas and many-pointed towers, which survived those religious feuds, and cast their quaint mediæval outlines over the waters of the Moldau The ground, deserted Palace of Wallenstein, sheltered almost under the shadow of the Hradschin, recalls another period of Bohemia's glory. Each pinnacle and spire tells some tale of departed grandeur. Even that leaden spire of the cathedral only replaces a more ancient tower, which, previous to its destruction by fire in 1541, surpassed in height that of Strasburg itself. Besieged and held in turns by Hussites and Catholics, Swedes, Poles, Prussians, French, Bavarians, and Austrians, its greatest wonder may perhaps be that it should still exhibit any part of the original fortress. In our days it has afforded a retreat to Charles X. of France, and to the Count de Chambord; more recently it has been the residence of the Emperor Ferdinand since his abdication. The recent fire, which brings this palace more especially under our notice at the present moment, is stated in the latest accounts to have originated in that part of the castle inhabited by the Imperial and Royal family, and has totally destroyed the apartments of the ex-Empress.

NATIONAL SPORTS.

After a dreary Lapland-like existence, which even skates and sleighs could do very little towards sweetening, the steeple and flat-race jockeys are again commencing to "take silk," and the huntsman's cheery shout is heard in the cover-riding. Notwithstanding a series of postponements, in which even Liverpool had to participate, the mud seems at last pretty clear for the spring and steeplechase meetings. Wolverhampton claims "the first favourable Monday," and Coventry and Chipping-Norton, both with good lists, are settled for Tuesday. Nottingham spring stands for Wednesday and Thursday; Moreton-in-the-Marsh, for Thursday; and Waltham Abbey, for Friday. Westbury is not fixed, to our knowledge, and Lincoln seems to be lost sight of for the present The amateur handicapping there gave great offence to the sporting world, but confidence has been restored by the announcement that Mr. Richard Windham's invaluable services are once more to be secured. The Craven handicap at Coventry will be the great steeplechase of the week: Bourton, 12 st. 5lbs., heads the list, out of twenty-one subscribers only one has declared: This is a good handicap omen for Mr. Merry.

Coursing secretaries have hardly had time to refix their meetings; but, as at present arranged, Sundorne (Salop) has one on Tuesday and Wednesday; Border (Roxburghshire) and Spiddal (Meath), on Wednesday and Thursday; Ridgway, on Wednesday, Thursday, and Friday; Chorley (open), on Thursday; Baldock (Club), on Wednesday and Friday; and Hewell (Worcestershire) and Ashton (Cheshire), on Friday. The Biggar meeting will consist of both March 20th, &c., and the Great Champion Cup will be contested between thirty-two Scotch and thirty-two English or Irish dogs, the winner to receive £300, the runner up £100, and so on.

Wild-fowl shooters have been remarkably successful, and one of them lately bagged forty-two wild geese at a shot on the shores of the Solent, and forty-seven widgeon at another. The birds are generally very tenaciously hungry, on alighting after their long flight, that the disciples of Peter Hawker can stalk up to them, and make fearful slaughter with the first two three shots. A enormous swan has also formed part of the unusually rich booty, besides bean goose, elder duck, &c., and almost every other kind of wading bird, which invariably migrate toward ward in a severe winter. *Apropos* of shooting, we may mention that Manchester claims to have the pigeon-shooting as well as the billiard champion, seeing that one of her townsmen, Mr. S. Shaw, has challenged the whole world to shoot at pigeons for anything between £100 and £500 a side, the gun to be held below the elbow or in any way most convenient. The number of birds and the weight of shot is not yet agreed upon, and it is equally uncertain who will take up the glove.

The Tattersall lounger has not had much to gladden his eyes in the way of sales this year. St. Hilary, Hatbox, Cervus, and several other steeplechasers and hunters, are to be sold on Monday; and on that day fortnight Count Batthyany, are to be sold, and the property of Sir H. Beach's kennel of fifteen pointers, two setters, and four retrievers, will come to the hammer. Three packs of foxhounds and one of beagles, besides two saplings Bedlamite (who is producing his owner between £200 and £300 annually), as well as Ephesus and Guy Mannering, are also in the market

Only nine Newmarket matches have as yet been made for the ensuing racing season, and ten for 1856-57—in nearly all of which the Earl of Glasgow takes part. Doncaster has put forth a very tempting autumn broadsheet, which comprises 28 events and £1775 of added money. The principal feature in this amended list is the Portland Handicap Plate of 200 sovs., for all ages; but the new conditions of the Cup are not yet fixed on. The town gives in all about £2310 of added money to its fat races, besides £125 to steeplechases; whereas seven years ago it only gave £1000. Nothing but a potent fear of York could have effected so great a change.

CONDUCT OF THE WAR.—A public meeting of the working classes of Nottingham was held on Tuesday evening, in the Assembly Rooms, Nottingham. Resolutions urging the Government to pursue an inquiry into the cause of the disastrous state of the army, &c., were adopted.—A crowded meeting was held at Preston, on Tuesday evening, for the purpose of denouncing the gross mismanagement which has been displayed in connection with the war, and demanding a searching revision of our military system, and an inquiry into the causes of the decimation of one of the finest armies that ever left England." The chair was taken by Mr. W. Livesey. The speeches and resolutions were of a vigorous character, and a petition to Parliament was adopted praying for an effective prosecution of the war, and a complete reform in our military system.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

We have again to report a very limited business in the Market for all Nations Securities. In prices, however, there has been some firmness, but it may be almost wholly traced to the unusually small quantity of stock on offer. For many weeks past the jobbers have had little, if nothing, to do, and they are extremely anxious to ascertain whether the new Chancellor of the Exchequer is likely to apply to the City for a loan. Amongst numerous parties it would be very desirable to see the end, or nothing, to do, and they are extremely anxious to ascertain whether the new Chancellor of the Exchequer is likely to apply to the City for a loan. Amongst numerous parties it is supposed that nearly the whole of the next arrivals will be forwarded to the Bank of England.

The Consol Market was flat on Monday; but its inactivity did not lead to any material change in price. The Three per Cents Reduced were done at 91⅞ ⅞, the Three per Cent Consols, 91¾ to 91; Consols for Account, 91⅞ ⅞; the New Three per Cents, 91⅝ ⅞; Long Annuities, 7 7-16; Bank Stock, 215; Exchequer-bills, 6s. to 8s.; Ditto, Advertised, 6s. to 4s. prem.; Exchequer-bonds, 98½ ⅝; India Bonds, 1s. to 2s. prem.; Exchequer-bills, 98 ⅝; Ditto, marked 91⅝ to 91⅞; the Three per Cent Consols, 91⅝ 80⅝ ⅞; Consols for Account, 91⅝ ⅞; New Three per Cents, 91⅝ ⅞; Long Annuities, 1860, 4⅜; Bank Stock, 215 to 213½; India Bonds, 1½ to 1⅜; Exchequer-bills, 98 to 98 prem; Exchequer-bonds, 99⅛ ⅜. A very limited business was transacted on Wednesday. Bank Stock, 215 to 213½. The Three per Cents Reduced were 91⅛ ⅜; the Three per Cent Consols, 91⅛ 90⅝ 91; Consols for Account, 91⅛ 91; New Three per Cents, 91⅜ ⅝; Long Annuities, 1860, 4 5-16; India Stock, 225. Exchequer-bills, 6s. to 9s. premium; Exchequer-bonds, 99⅛ ⅜. There was more doing in Consols on Thursday, and prices were on the advance. The Three per Cents were 91⅛ ⅜; the New Three per Cents, 91⅛ to 92, and the Reduced, 91⅛ ⅜. Exchequer-bills, 6s. to 9s.; and India Bonds, 1½ to 1⅝ prem

The dealings in the Foreign House have been extremely restricted, yet we have scarcely any change to notice in the quotations. Brazilian Four-and-a-Half per Cents have realized 94½; Ecuador Bonds, 3⅞; Grenada One-and-a-Half per Cents, 18⅞; Mexican Three per Cents, 20¼; Peruvian Four-and-a-Half per Cents, 73; Ditto, Three per Cents, 50; Russian Five per Cents, 104; Ditto, Small, 87½; Sardinian Five per Cents; 85; Spanish Three per Cents, 36; Ditto, New Deferred, 17⅜; Turkish Six per Cents, 75½; Belgian Four-and-a-Half per Cents, 89⅛; Dutch Two-and-a-Half per Cents, 61½; Dutch Four per Cents, 93½; Swedish Four per Cents, 82½; Portuguese Four per Cents, 41.

There has been a brisk demand for railway shares and in Joint-Stock Banks. The prices of which have risen probably from —Australasia have realised 81, Chartered of Asia, 1 dis., English, Scotch, and Australian Chartered, 15½, London Chartered of Australia, 1½; London Joint-Stock, 17½; London and County, 37; New South Wales, 34½; Union of Australia, 64½; Union of London, 26; Miscellaneous Securities have continued to rise—Australian Royal Mail, 4, Canada Roads, 11½, Ditto, Government Six per Cents, 107½; Crystal Palace, 2⅞; Ditto, Preference, 3⅞; East and West India Docks, 118; London, 106; Victoria, 15½; Peel River Land and Mineral, 2½. Peninsular and Oriental Steam, 59½; Royal Mail Steam, 65; Scottish Australian Investment, New, 4½; Van Diemen's Land, 12½. Canal Shares have still been in request, but any change of moment is unquotable—Ashton and Oldham, 145 ex div.; Birmingham, 91; Ditto, New, 4½; London and Brighton, 55; Great Western, 65; Great Surrey, 48; Lancaster, 29; Loughborough, 27½; Neath, 182; Oxford, 110; Rochdale, 16; Stafford and Worcester, 425; Stourbridge, 285; Warwick and Birmingham, 23 to 24. Water-works Shares have ruled the following rates—Bristol, 23; Grand Junction, 96 ex div.; Ditto New, 21 ex div.; Kent, 72½; Southwark and Vauxhall, 93; New River Annuities, 160; West Middlesex, 84; to 86 ex div. Ditto, New, 84 ex div.; Ditto, A Stock, 86

AMUSEMENTS, &c.

March 1st, 1855. LEWIS POCOCK, } Secretaries

INSTRUCTION in ART GENERAL and SPECIAL, as afforded at the General School of the Department of Science and Art Marlborough House, Pall-mall; the Metropolitan Schools in Nottingham, Spitalfields, and the District Schools in connection with the Department. The Spring Session will commence on the 1st March

For Information and prospectuses, apply at Marlborough House, Pall-mall.

LECTURES to WORKING MEN. The following COURSES of LECTURES will be delivered in the EVENINGS during the present Session in the THEATRE of the MUSEUM of PRACTICAL GEOLOGY, Jermyn-street:

1. On GEOLOGY, by A. C. RAMSAY, F.R.S.
2. On MECHANISM, by R. WILLIS, M.A., F.R.S.
3. On NATURAL HISTORY, by T. H. HUXLEY, F.R.S.

The First Course of Six Lectures on the Geology of the British Rocks used in the Arts and Manufactures commenced at Eight o'Clock on MONDAY, the 26th of JANUARY, and will be continued on each succeeding Monday Evening at the same hour.

The Second Course, on Mechanics, by Professor Willis, will be commenced after the conclusion of the first.

Tickets are available, by working men only, upon payment of a registration fee of 6d. for the course of Six Lectures; and due notice will be given of the day on which they are issued.

HENRAM REEKS, Registrar.

SUFFOLK.—To LET, within a few miles of Bury St. Edmunds, a compact FAMILY RESIDENCE, in good repair, with nine acres of grass land. Rent moderate.—Address, post paid, M S., care of Mr George Thompson, Bury St. Edmunds

A CAMBRIDGE UNDERGRADUATE is open to an engagement as travelling TUTOR in a Nobleman's or Gentleman's family, during the months of June, July, August, and September.—Address W. J., the care of Dolphin, Bell, and Co., Booksellers, Trinity-street, Cambridge.

TO PARENTS and GUARDIANS. Wanted a respectable Youth, Fifteen Years of age, as an Articled Pupil to the Old-established BUILDING BUSINESS, he will be one of the family. A premium is expected. Apply to Wm Pilcher's Manufactory, 23, Upper Belgrave-place, Pimlico, London.—Established thirty years.

TO PARENTS and GUARDIANS.—There is an OPPORTUNITY of placing a well educated Youth as an ARTICLED PUPIL (rent-free) in the estate cabinet of a firm of extensive Auctioneers, Valuers, Land and Estate Agents, Surveyors, Architects, Surveyors, Valuers, Land and Estate Agents. Premium required. Address to Messrs. Marshall, Auctioneers and Surveyors, 154, Regent-square, or, 19, Burdett-place, Cornhill.

HOME EDUCATION. A Clergyman and his Wife, residing in a healthy part of Berkshire, and fully competent to the care and management of children, wish to receive into their family TWO or THREE LITTLE GIRLS, who will be treated as their own and thoroughly instructed in the usual branches of a sound English Education, with Music, French, and Drawing.—Address, for further particulars, to Messrs. Rivington, Waterloo-place, Pall-mall, London, who can give references given and required.

NAVIGATION.—Mrs. JANET TAYLOR'S NAUTICAL ACADEMY, 101, Minories, offers superior advantages to Masters intending Apprentices for the Sea. References can be given to all the large Steam Companies and all the leading Shipowners in London. Terms moderate, and forwarded on application.

THE LONDON SCHOOL of PHOTOGRAPHY, 75, Newgate-street. The Art of Taking Portraits may be learned in a few days. All necessary Apparatus chosen for £5. A guinea is made for the Instruction Book and Specimen Portraits from 1s. to £5 5s. Stereoscopes from 1s. to £1 1s. Number 75

DIATONIC FLUTE. By Royal Letters Patent. This Instrument is played by Mr. Richardson, Soutist to Her Majesty and the Royal Princesses. Full particulars forwarded free.—Manufactory, 135, Fleet-street. A. SUCAMA, Patentee.

THE only PRIZE FLUTES. These beautiful-toned Instruments may be seen and heard daily from twelve till two at the Patentees and Manufacturers, RUDALL, ROSE, CARTE, and CO.'s, 100, New Bond-street, where Mr. Carte will be in attendance to explain their peculiar excellences, which are based upon the new and old systems. Carte's Shakth, price 3l., by post 3l. 5s. 6d.; gives a full description.—Manufactory, 26, Charing-cross.

PIANOFORTES, Twenty-five Guineas each.—PALMAINE and CO'S Unique Royal Pianofortes, in Rosewood and Mahogany (6 octaves). Distinguished by purity and volume of tone, perfection of construction, excellence of material, elasticity of touch, and elegance of appearance, commended and adopted by the most eminent musicians, and suited for home or continental climates. Every instrument warranted. PALMAINE and Co., 28, Bishopsgate-street Within.

TOLKIEN'S 25-GUINEA ROYAL MINUTO PIANOFORTE.—H. T., the original maker of a 25-Guinea Pianoforte, has the honour to announce that he has just completed for his instruments, unequalled in durability and [illegible] elasticity of touch, and sweetness of tone, in the various climates of our colonies. In elegant walnut, rosewood, and mahogany cases, packed for abroad for £3 10s. extra. H. TOLKIEN'S Manufactory, 27, 28, and 29, King William-street, London-bridge.

THE BANK OF LONDON.
Capital, £500,000
(With power of extension to £2,000,000)
In 6000 Shares of £100 each. £50 payable per Share,
Viz., £10 upon allotment, and the remainder before or upon Incorporation; in pursuance of the previsions of the Statute for Regulating Joint Stock Banks

BOARD OF DIRECTORS
CHAIRMAN
Sir JOHN VILLIERS SHELLEY, Bart., M.P., 72, Park-lane, and Penshurst Place, Kent
VICE CHAIRMAN
(To be appointed by and from the Directors)
John Edmund Anderton, Esq., 10, Devonshire-terrace, Hyde-park.
Thomas Gooch, Esq. (Gooch and Cousens, London-wall, Britain-place Brewhouse, Greatorex, Esq. (Bradbury, Greatorex, and Co., Aldermanbury), Spring-hill House, Upper Clapton
Alexander Constantine Londino, Esq., Consul-General of Greece (firm of Charles Scott, Esq. (firm of Charles Joyce and Co., Moorgate-street), 16, Leicester-gardens, Hyde-park.
Henry Morris, Esq., late of the Madras Civil Service, 25, Marklane, City
Henry Waggridge, Esq., Alderman and Sheriff of London, St. Andrew's-hill, City, and Streatham common, Surrey
Alfred Wilson, Esq. (Venables, Wilson, and Tyler, Queenhithe), Fir Grove, Weybridge, Surrey.
(With power to add to their number, until the first General Meeting.)
BANKER
(The Bank Manager will not be appointed until the Directors shall have had the amplest opportunity of selecting for that important position a gentleman of first-class qualifications.)
SECRETARY AND PROVISIONAL MANAGER, Benjamin Scott, Esq.
SOLICITORS.—Messrs. Tyrrell, Paine, and Layton, Guildhall-yard.
AUDITORS
Messrs J W and S. R. Bosanquet, 73, Old Broad-street
Francis Cope and Co., 7, Lothbury
BANKERS
(To be selected by and from the body of Proprietors.)
Offices (temporary)—81, Moorgate-street, City

The Bank of London has been projected for the purpose of affording increased facilities for banking in London and the Provinces, upon safe, moderate principles

Its promoters do not contemplate the introduction of any novel modes of banking. It will rather be their object to follow in the steps of those soundly conducted and well-regulated establishments whose management has contributed to place Joint-Stock Banks amongst the most popular and flourishing of metropolitan institutions. Every branch of legitimate banking business will be comprehended within the scope of its operations.

Accounts, both current and on deposit, will be received, and interest allowed.

Dividends, annuities, pay of officers (military, naval, and civil), and other sources of income, will be received in the provinces; purchases, sales, and transfers in the public funds and other stocks, will be effected, and sundries sorts of profitable business, such as custody of title-deeds and securities belonging to customers, with convenient access, will form a prominent feature in the arrangements of the Bank.

The grounds on which justify the establishment of this Bank must be manifestly self-evident

MEETING OF THE ROYAL COMMISSIONERS FOR THE PATRIOTIC FUND, IN THE GUARD-CHAMBER OF THE NEW PALACE, WESTMINSTER.—(SEE PAGE 208.)

RUSSIAN ARMS, &c.

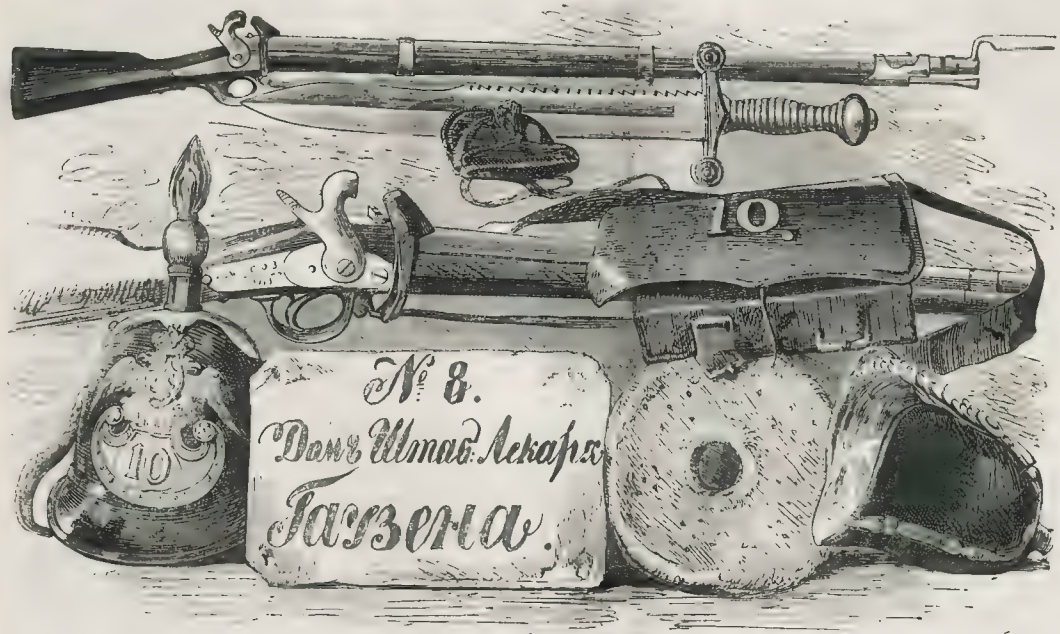
During a recent visit of one of our Artists to Portsmouth, he sketched the accompanying group of memorials of the War, which have been brought from the battle fields of the Alma and Inkerman.

First we have a Russian musket, with its leather covering, to keep the percussion-cap dry—a contrivance which has been, we believe, adopted in our own army. On the right is a specimen of the bread provided for the Russian soldiers: through the holes were passed the strap by which the bread was fastened to the knapsack. The small tablet was taken from over the door of a village in Bomarsund: the inscription in English is, "No. 8. This house belongs to Dr. Gausen."

We have to thank Mr. Galt, of the High-street, Portsmouth, for permission to sketch the above objects, which are in his possession.

It may be interesting to add that the Armouries of the Tower of London received, some time since, the first spoils of the Russian war, in 2000 stands of arms, from Bomarsund.

Paris papers announce that a literary trophy from Bomarsund has just been added to the Bibliothèque Impériale in that city. It is a collection of the offices of the Saints' Days of the Greek Church for every day in the year, and is divided into twelve volumes, one for each month. As a specimen of typographical art it does no credit to Russia, though it was produced so recently as 1841. It is preceded by a permission to print, given "in the name of the Most Holy Trinity, by the "most pious" Emperor Alexander, and his "most pious" wife, and the "most orthodox" Princes of the Imperial family and their "most orthodox" wives



RUSSIAN ARMS, ETC., FROM THE ALMA AND INKERMAN, AND BOMARSUND.

TURKISH SOLDIERS AND TARTAR CHILDREN. PHOTOGRAPHED AT EUPATORIA.

TARTAR CHILDREN.—PHOTOGRAPHED AT EUPATORIA.

TURKISH SOLDIERS AND TARTAR CHILDREN, AT EUPATORIA.

We have to thank a Correspondent at Eupatoria for the accompanying groups, photographed at Eupatoria during the month of January. The man in the lower smaller group wears a Tartar sheepskin dress. Of the characteristics of the Tartars in the Crimea, we find the following very interesting picture in Dr. Koch's "Journal of his Tour in the Crimea and Odessa," just published:—

The Tartars or Noghais here have retained much of the original stamp in their physiognomy and in the structure of their bodies. Their figures, without exception, are short and stumpy; they have round, full faces, straight black hair without any gloss, and but little beard. Their eyes are slit, and the pupil is scarcely distinguishable from the dark iris—both which circumstances form a disagreeable contrast with the yellowish-white of the rest of the eye. The short stunted nose, somewhat pouting lips, and the scarcely projecting chin, contribute as little to the embellishment of their persons (which average little more than five feet high) as their short necks and puffy limbs. Nevertheless

THE [illegible] PASS ON THE ROAD TO ERZEROUM. (SEE NEXT PAGE.)

FROZEN-OUT DOCK LABOURERS, AT THE LONDON DOCKS.

especially among the girls between the ages of seventeen and twenty, though they in general differ little from their countrymen, we find some who not alone have pretensions to beauty, but who even actually merit the title. As the usual yellow colour of the skin assumes in them a delicate tint, with a slight tinge of crimson, they do not strike one as by any means so disagreeable as other women [illegible]; so that even, when once accustomed to the slit eyes, their mild expression is sufficient to gain the heart of one of the fair European race; but, when a young and beautiful woman has had four or two children, she not only loses her charms rapidly, but soon exhibits an extreme of ugliness such as we scarcely ever meet with among ourselves. Old women of the age of thirty look as if they were matrons who had undergone many hardships. It is a curious fact that the Tartars here do not speak the same dialect as their countrymen upon the Caucasus, but have a pronunciation which differs but little from that spoken in Constantinople.

The mode of life pursued by the Tartars formed the greatest contrast with that of the vulgar Russian. The money which they earned was brought home to their families, with whom their leisure hours were spent; not a copeck was consumed out of the house. The domestic life of the Crim Tartar is said to be quite unexceptionable. I have spoken with several people who had passed considerable time in the Tartar villages, especially on the southern coast, and who had had opportunities of becoming acquainted with them, and they could not say enough to one of the harmony prevailing among the members of families, the love of order and activity of the women, and the industry of the men. Mr. von Hilmer stated to me that one Tartar works on an average as much as two Russians. A Tartar village on the southern coast strikes one immediately on entering it, by the cleanliness of the streets and houses. No naked or ragged children are running about, as we see in Asia, among those belonging to the Christians and Mussulmans. The women on the coast also have not the same anxiety to conceal themselves from the gaze of strangers: they are treated better by the men—not, as in Asia among their countrymen and fellow-believers, as if they were mere goods.

TREBIZOND

(From a Correspondent)

Among the many events of the present stirring period worthy of note may be observed the proclamation from the Turkish Government of the Firman abolishing the slave traffic, the purchase of two Circassian slave-dealers, and the detention of the slaves at the port of Trebizond, through the instrumentality of H.B.M.'s Vice-Consul, Mr F. Stevens, due support being given to Mr Stevens by the presence of H.M.S. *Fingal*, *Vulcan*.

It has often been my lot to visit the interesting port of Trebizond, and sufficient importance has not been paid to the valuable supplies which might have been drawn from this place for the use of the Allied army at Varna and in the Crimea. Xenophon, in his history of the retreat of the 10,000 Greeks, gives due credit to the inhabitants for a valuable market provided in the Greek camp, and for presents of oxen, barley meal, and wine. The only misadventure which the Greeks met with here was eating honey, possessing intoxicating properties of temporary duration, which is described by Moore in his "Lalla Rookh." The honey of the country to this day retains the same qualities, derived, it was supposed by Pliny, from the flowers of the "rhododendros," abounding in the vicinity. Indeed, a Turkish law at the present day prohibits the use of honey from that country. Having mentioned Xenophon's remarkable history of the retreat of the 10,000, may we not justly refer Generals of our day to the sagacity displayed in that ever-memorable retreat, performed through an enemy's country, and partly during the depth of winter, in a severe climate?

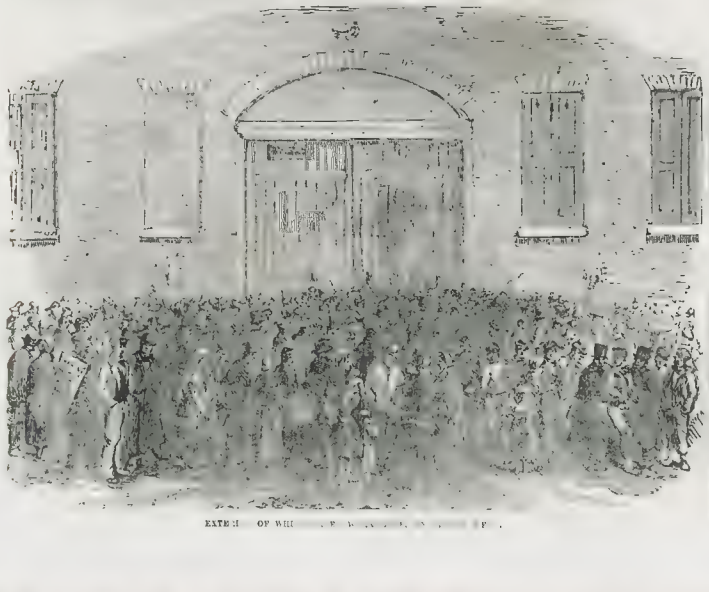
In conclusion, may we not look forward to better things arising out of the present calamitous war than an awful destruction of human life and its other attendant evils, and hope that the proclamation of the abolition of traffic in human beings in that eastern port of the Turkish territory may be the forerunner of other advantages to the human race?

THE FROZEN-OUTS. DOCK LABOURERS.

The sudden departure of frost at the end of last week happened most seasonably for the poorer classes, and especially for those who are employed on the Thames. The long suspension of business in the waterside premises, docks, and shipping had reduced thousands of the men and their families to starvation; and in spite of all that was done for them at Whitechapel and other workhouses, where outdoor relief was administered, the amount of sufferings must have been very great.

The relief granted by the parochial authorities has been aided by liberal donations from benevolent individuals. On Friday and Saturday £400 was raised at the Stock Exchange and immediately transmitted, in sums of £25 and upwards, to clergymen in various parts of London, especially the poorer localities, with a request that it should be laid out in the purchase of food for the necessitous.

In addition to £1000, which the Coal, Corn, and Finance Committee of the London Corporation distributed last week among the destitute population, Mr. Julius H. Thompson, shipbroker, of Billiter-street, City, raised a sum of £300 and upwards from his friends and the charitable community in aid of the distressed dock labourers. The amount (£300) he paid over to the London Dock Company and the St. Katharine Dock Company, which each contributed a large sum for the like purpose, which has been distributed to the most necessitous by the parochial clergy, who readily undertook the task, and by the servants of the dock companies—the donations being apportioned to the exigences of each case. During the excitement and rioting in the east of London, many of the coalwhippers and labourers offered to assist the police and magistrates in the protection of the property of the shopkeepers in the neighbourhood.



EXTERIOR OF WHI[illegible]

GLEANINGS OF SILENT MEN.—No. VI.

[illegible]

A whole night was occupied in the House of Commons with harangues from two or three speakers whom the public would have been quite satisfied to get rid of without any apology on the part of the individuals who had resolved on resigning their offices into, let us hope, better hands. It would be far more satisfactory if those who are about quitting the public service would "stand not upon the reasons for their going, but go at once." There is not yet any difficulty in finding men to fill the vacant places; and we ought not to call on a public servant to apologise for his retirement until we find we have no one else fitted to do the work. One would think, however, that the country must be rather hard put to it for a Colonial Minister, or else that the Colonial-office has the valuable quality of self-management, when a nobleman who has just started for Vienna is selected as the head of the department. How the Colonies will like the arrangement remains to be seen. Perhaps, as there has been a great deal of grumbling on the part of the colonists against the Home Government, it is thought that they may find pleasure in variety; and if novelty is indeed delightful, they ought to be delighted at having had four Colonial Ministers within the last twelve months. If three statesmen in succession have failed to give satisfaction, it is possible that a fourth may be more fortunate; and, at all events, he can scarcely run the risk of giving offence, for he is away on his travels; and if he could do no good in Downing-street, he is not there to do any harm. It was suggested that it would be as well for a Colonial Minister to be at his post; but it was said, in reply, that somebody or other had guaranteed that the public should not be put to any inconvenience, and with this vague assurance, the House of Commons, if not the Colonies, would seem to have been content. The Premier, when questioned on the subject, reminded his questioner that there is a permanent Under Secretary, who would do all that is necessary; but nobody asked Why, if there is a lower officer at a lower salary, who is sufficient for the object required, a higher officer at a higher salary need be appointed at all? Mr. Roebuck mentioned the case of a gentleman from Newfoundland, who had already related his case to four Colonial Ministers, and who will, probably have the pleasure of repeating the "old, old story" to a fifth, on the return of Lord John Russell from his duties abroad

I may be accused of wishing to check the flow of public benevolence; but I am satisfied that the practice of sending money to the metropolitan police-courts is very much overdone. It is neither practicable nor proper that the magistrates should be interrupted in their ordinary duties, to perform the task of relieving-officers, for which they have neither the time nor the machinery at their disposal. If they give indiscriminately they do much more harm than good, and it is impossible that they can inquire personally, or by the help of the police, into the cases of the thousands of applicants that are found besieging the police-courts from a knowledge that the magistrates have money to give away. The possibility of relief being afforded at a police-court to a casual applicant may also have the effect of making relieving-officers neglectful of their duty, and thus the legal provision made for poverty is sometimes rendered inoperative; and the sense of responsibility is weakened among those with whom responsibility ought to rest. The only legitimate cases for the interference of magistrates are those arising out of the business before them, and these are so rare that a very moderate amount of contribution to the poor-box would amply suffice for every proper object. If special cases should arise a special appeal might easily be made, and would always be successful; but, under the present system of lavish contribution to the poor-boxes, there must be the utmost difficulty in knowing how to deal with the funds, unless the police-courts are to be opened as relieving establishments to all applicants. One of the magistrates (Mr. Yardley) has, according to report, found it necessary to appeal to the public to refrain from sending more money; and his colleague (Mr. Ingham) is stated in the papers to have been compelled to leave his court by a private door to avoid the danger of being mobbed by a large crowd of persons demanding relief, which the parish authorities are, in all cases of real necessity, legally bound to bestow. If the public wish to make provision for the poor, beyond that which the law renders imperative, it would be easy to entrust their contributions to some of the clergy of every denomination, without regard to differences of creed or sect, or to some of those visiting and relief societies which abound in every district of the metropolis. In the quarters here indicated poverty is the subject of constant watchfulness, and imposition would be generally avoided, as the societies alluded to are composed of individuals who visit their poorer neighbours, and know where assistance would be well applied. This course is far better than conducting inquiries into the private circumstances of the poor through the means of the police—a mode which must be as distasteful to the honest needy as it is inquisitorial and likely to be abused. Enough of odium has already been brought on the police by the practice of withdrawing them in some instances from their legitimate duties, and it is not advisable to run the risk of any further demoralisation by engaging them in the delicate task of assisting in the dispensation of the funds sent for the relief of distress. I hope these observations will be well weighed by all who read them, and tend to check a practice which is growing into a very serious evil, of which all the bad results are not yet foreseen. Already have courts of justice been converted into scenes of confusion by demands which ought to be complied with; and it is said that the well-meant, but ill judged, distribution of relief at the Liverpool Exchange was the cause of those bread riots in that town, which furnished the example for those lawless acts that were commenced, but promptly suppressed, in the metropolis.

If any further reasons were needed for not employing the police in what may be called extra-official duties, it is supplied in the fact that the force has already quite as much as it can do, and that its hours of labour have recently been curtailed. The practice of allowing men to remain on their beats for nine hours in succession is to be discontinued, and not without good reason, for it was almost impossible that the energies could, during so long a period, be sustained at that point of vigilance which is essential to the proper performance of a policeman's duty.

Though the Government has found it difficult to win the confidence of the Legislature, M. Soyer has had the good fortune to obtain what he terms "the confidence of the Government," and is going out—or has probably gone already to Scutari as *chef de cuisine*. His *batterie* will, it is to be hoped, prove a source of strength to our army, and he will in all probability be welcomed as a great gun. His abilities must not be disparaged in adding to the variety of his side-dishes at the tables of the staff officers, but in providing for the humbler necessities of the men. Happily, though he possesses a genius which can cope with all the difficulties of the most elaborate *entrée*, he can condescend to the simplest cookery, or give attractiveness to the very coarsest fare.

Every one who offers his services to the Government is not so lucky as M. Soyer in getting them accepted, though there are men who aspire to something loftier than cookery, and who are found advertising their capacity for statesmanship, and their readiness to accept employment in that line. As it is not yet the practice for politicians to solicit employment in so many words in the advertising columns of a newspaper, it is the fashion among candidates for office to call their constituents together and make long speeches, which are, in fact, prospectuses or circulars addressed to those entrusted with the office of Government, and who have places to give away. I will not be so invidious as to mention [illegible] practice is altogether to be condemned [illegible] more, for a desire to serve one's own [illegible] of an honest ambition. There may be [illegible] adopted for making one's pretensions known [illegible] in these days of competition, and taking [illegible] the loud demand of the nation to be served by the ablest men, it may be excusable to resort to the advertising medium in the political as well as in any other business in which a party may be engaged.

PARLIAMENTARY PAPERS

HOUSE OF LORDS. Monday.

The order for the second reading of the Criminal Justice Bill and the Summary Trial of Offenders Bill elicited some discussion, relative to the working of the existing law in cases of felony, in which the Lord Chancellor, Lord Brougham, Lord Campbell, and the Earl of Desart took part. The bills were read a second time.

The Registration of Judgments Bill was read a third time and passed.

HOUSE OF COMMONS. Monday.

MINISTERIAL CHANGE.

On the motion of Mr. Hayter, a new writ was ordered for the city of London, the county of Forfar, and the boroughs of Radnor and Halifax, to supply the vacancies caused by the acceptance of office by the late representatives.—Lord J. Russell having been appointed Colonial Secretary; Lord Duncan, Lord of the Treasury; Sir G. C. Lewis, Chancellor of the Exchequer; and Sir C. Wood, First Lord of the Admiralty.

Replying to Sir J. Pakington, Lord Palmerston stated that, in the absence of Lord J. Russell, the necessary business of the Colonial Department would be provided for by his right hon. friend (Sir G. Grey), who was recently Secretary for the Colonies. He had, however, no reason to apprehend that the noble Lord would be long detained from his official duties.

ARMY MANAGEMENT

On the motion for going into Committee of Supply,

Mr. F. French called attention to the gallantry displayed by Sergeant Sullivan in successive engagements in the Crimea, and inquired why the deserts of that brave soldier had not been recognised by the award of a commission?

Lord Palmerston remarked that a certain number of commissions had been placed at the disposal of Lord Raglan, for the reward of distinguished merit among the non-commissioned officers, but that the Government had no intention of interfering with his selection of the persons who were to be so recompensed.

Mr. Lindsay commented upon the extravagance and mismanagement displayed in many departments of the British military system, and especially in the transport service. The hon. member illustrated his criticisms by drawing comparisons between the British and the French administrations in this branch of the service.

A discussion of a very miscellaneous character followed, in which a multitude of questions and details relating to the Army and its organisation, formed the subjects for censure or vindication by many hon. members.

The House then went into Committee of Supply, and proceeded to discuss and pass the remaining votes of the series for the Army expenditure.

In Committee of Ways and Means a resolution was afterwards passed, authorising a sum of £17,183,000 to be raised by Exchequer Bills, to meet the service of the ensuing year.

The Militia (Ireland) Bill and the Commons Inclosure Bill were respectively read a second time.

HOUSE OF LORDS.—Tuesday.

MAJOR-GENERAL VIVIAN.

The Earl of Ellenborough inquired whether the reported appointment of Major-General Vivian to command the Turkish contingent under British pay was actually completed, expressing some doubts of that gallant officer's experience for so delicate a service?

Lord Panmure stated that Major-General Vivian had occupied very similar positions in India, and had received the highest testimonials from the authorities in that country. His appointment to the Turkish command had been determined on upon the evidences of capacity, and the Government were considered that his services were likely to prove highly useful in the post to which he had been nominated.

After a few words from Lord Vivian, the subject dropped.

The Criminal Justice Bill and the Speedy Trial of Offenders Bill respectively passed through committee.

THE TRANSPORT SERVICE.

The Earl of Hardwicke, in moving for certain returns respecting transport, took occasion to comment upon the manner in which the transport service had been performed during the past campaign

Lord Panmure gave some explanation touching certain points remarked upon by the noble Earl, and, after some observations from the Earls of Derby and Ellenborough, the returns were ordered to be produced.

HOUSE OF COMMONS. Tuesday.

A new writ was issued for the borough of Northampton, in the room of Mr. Vernon Smith, who has accepted the office of President of the Board of Control.

ECCLESIASTICAL COURTS.

In answer to Mr. Hadfield, the Solicitor-General stated that a bill for the entire abolition of the jurisdiction of the Ecclesiastical Courts was in preparation, but he could not say when it would be laid before the House. He hoped, however, that a bill for removing the testamentary jurisdiction of the Ecclesiastical Courts to another tribunal would soon be laid on the table. His own opinion was, that probate in one court ought to be available in all parts of her Majesty's dominions.

MR. KENNEDY'S DISMISSAL

In answer to Mr Bland, Mr. J. Wilson explained that, though Mr Kennedy had been removed from his Commissionership of the Woods and Forests, yet, as his successor had not been appointed, he was entitled to and had received his salary up to last quarter-day.

Sir J. Shelley moved for the appointment of a Select Committee, to inquire into the grounds on which Mr. Kennedy was removed from his office as a Commissioner of the Woods and Forests. He entered into a lengthened narrative of the circumstances connected with the case, the substance of which was that Mr. Kennedy, having been appointed to the office of Woods and Forests, had employed a Mr. Brown to work under him without the sanction of the Lords of the Treasury. Other causes of difference ensued, but that out of which arose Mr. Kennedy's dismissal was a difference on a matter of fact between Mr. Brown and Mr. Higinbothom, the Deputy-Surveyor, on the management of the Alice Holt Forest, in which Mr. Kennedy took part with Mr. Brown, and made certain grave reflections on the integrity of the Deputy-Surveyor. This gave rise to a long series of correspondence and investigation, which ended in the removal of Mr Brown first and afterwards of Mr. Kennedy. As the honourable member felt that this was harsh and unjust treatment, he moved for a Select Committee to inquire into the whole circumstances of the case

Mr. Gladstone, in commencing his reply, adverted to words used by the hon. member, that the ostensible reason for Mr. Kennedy's dismissal was not the real reason, but because he was too zealous and too active for certain members of the Government. If the hon. member would reduce that charge to writing, and undertake to make it good, he would withdraw all further opposition, and consent to the Committee at once. Would the hon. member accept that challenge?

Sir J. Shelley fell back upon some conversation which he understood Mr Kennedy had with Mr. Wilson, the Secretary to the Treasury, which led him to form that opinion.

Mr Gladstone said this was virtually refusing to stand by his words; and he must, therefore, go on to state certain circumstances which would enable the House to form its own judgment on the motion. Though he himself would not vote on the question. The whole charge against him resolved into this—that he had committed an error in judgment. Now, if the House of Commons was determined to appoint a committee to inquire into every case of alleged error of Ministerial judgment—if they were to tell Ministers whom they should appoint and whom they should dismiss from appointments—they would effectually put an end to Ministerial responsibility. He would not rest, however, upon these general principles; he would enter at once into the merits of the case, and he would state that Mr. removed Mr. Kennedy because it was impossible to carry on the public business with him, and because he (Mr. Gladstone) considered himself the protector of the characters of the inferior officers as well as of Mr. Kennedy. The grounds on which Mr. Kennedy was removed were chiefly two—those affecting Mr. Brown, and those affecting Mr. Higinbothom. It was unnecessary to enter into all the causes of his dissatisfaction as respected Mr. Brown. As respected Mr. Higinbothom, he contended that Mr. Kennedy had made a deliberate charge of falsehood against Mr. Higinbothom, on account of which he intimated his intention to dismiss him. That his charge against Mr. Higinbothom was totally unfounded he contended from the evidence of disinterested parties called in to report upon the facts. But, as Mr. Kennedy refused to retract his charge, it became necessary to remove either Mr. Kennedy or Mr. Higinbothom. He chose the former.

Lord Stanley contended that the system of governing the civil service which the right hon. gentleman had put forth was more despotic than that which prevailed either in the military or the naval services. In these professions no officer could be dismissed without a trial; but the right hon. gentleman claimed the right of dismissing a civil servant without trial and without appeal. Even upon the showing of the right honourable gentleman, Mr Kennedy's offence amounted to no more than an error of judgment. That, according to the right hon. gentleman, was a very venial offence in a Cabinet Minister; but it amounted, in his eyes, to a very serious crime when it appeared in a subordinate officer. His impression was that Mr. Kennedy had not had a fair trial, and, thinking so, he was in favour of the Committee.

Mr. Drummond objected to the motion because it usurped the powers of the Executive, and because it introduced personal matters into the debates of this House. He praised the conduct and management of the Woods under Mr. Higinbothom; and, though he admitted the zeal of Mr Kennedy, he must hold that that gentleman was unfit to have the control of men as good as himself.

Mr. Malins complained of Mr Gladstone having dismissed Mr. Kennedy without consulting Lord John Russell, who had appointed him, or any other member of the Cabinet. That was a degree of despotism which he trusted that House would not sanction.

Lord Seymour objected to the appointment of that Committee would latter the action of the Government in future in dealing with the civil servants of the public.

Mr. Sidney Herbert said that if a Committee as the only means of removing the imputation on Mr Kennedy's honour and veracity

Mr. Wilson denied that any charge on Mr. Kennedy's honour or veracity was ever implied. He justified the course pursued by the Government towards Mr. Kennedy, and declared that the only feeling in the Treasury entertained throughout the whole transaction was one of tenderness towards Mr. Kennedy

After a few words from Mr. Whiteside in favour of the Committee, Lord Palmerston urged the friends of Mr. Kennedy to be satisfied with the result of this discussion, where all imputations upon Mr. Kennedy's character, if any such were ever cast upon him, had now been altogether repudiated. He pointed out the inconvenience of appointing a Committee, as subversive of all discipline among the civil servants of the Crown.

Sir J. Shelley asked that the passages in the Treasury minute which Mr. Kennedy considered to cast imputations on his honour and veracity should be rescinded

Lord Palmerston had no objection to this, and the motion was then withdrawn.

Mr R. Phillimore obtained leave to bring in a bill to abolish the jurisdiction of the Ecclesiastical Courts in suits for defamation of character.

HOUSE OF COMMONS.—Wednesday.

SECOND READINGS.

The following bills were read a second time.—Executor and Trustee Society Bill; Great Northern Railway (Church and Schools at Doncaster) Bill; Oxford, Worcester, and Wolverhampton Railway (Improvements and Branches) Bill; Westminster Land Company Bill; and Westminster Improvements Bill

EPISCOPAL AND CAPITULAR ESTATES BILL.

The Marquis of Blandford moved the second reading of this bill, which proposes, among other arrangements, to vest in the "Church Estates Commissioners, appointed under the Act 13th and 14th Vic., cap. 94, all the profits, emoluments, and revenues of episcopal and capitular estates as respects any see in which no avoidance has happened since the 1st of Jan., 1848, and the Bishop whereof does not already receive a fixed income, from and after the first avoidance of such see, and as respects all other ecclesiastical corporations from the commencement of this Act, with a proviso that this investiture is solely for the purposes of this Act." The noble Lord contended that the House was bound to promote the efficiency of the Church of England, which was a solemn trust committed to us from generation to generation. It was highly necessary that the Church should be extended by the formation of new parishes, and the erection of new buildings, and this could only be effected by a judicious distribution of ecclesiastical property.

Mr. H. G. Liddell moved as an amendment that the bill be read a second time that day six months, on the ground that it was opposed to the whole tenor of our cathedral statutes, and that its principle would be dangerous to the ultimate integrity of those institutions

Mr Headlam said it would not be for the credit of the House to assent to the second reading of the bill without any serious intention of going on with it, as had been the case on former occasions. He should feel it his duty to vote for the amendment.

Mr. Ingham supported the amendment.

Mr. H. T. Liddell moved the adjournment of the debate until it might be convenient for some members of her Majesty's Government to attend.

Mr. H. S. Herbert said that was a most unreasonable complaint. The members of the Government were, no doubt, occupied in the consideration of matters of grave importance

Sir B Hall said he had been instructed by the Secretary of State for the Home Department to say that he was anxious that the second reading of the bill should pass, upon the understanding that the Committee should be postponed until the commission now sitting presented its report.

After a short discussion the bill was read a second time, and ordered to be committed on the 23rd of May

The Commons Inclosure Bill was read a third time and passed.

A Maltese Conspiracy.—About five or six weeks ago the police at Milan noticed the presence of some suspicious characters, who were arrested, and the authorities were then put on the trace of a vast Maltese conspiracy, of which ample proofs were soon discovered. In the short space of four or five days there were arrested quietly in Milan and the neighbourhood about sixty persons, some of whom belonged to the upper classes of society. They were all conveyed to Mantua, where the tribunal charged to take cognisance of acts of high treason holds its sittings. The ramifications of the Maltese plot do not appear to extend over the Venetian territory, but only to the Duchies and in the States of the Church. The late attempts at Parma, Carrara, Fabriano, Forli, and Bologna had a certain connection with the great blow which the ex-tyrannus washed to strike in Italy at the commencement of this month.—*Trieste Gazette*

Cookery for the Sick. Miss Nightingale and her assistants, ten days after their arrival, got up a sort of impromptu kitchen. In a case like this, where but one person is entertained of its utility, does it not appear extraordinary that the commanding officer, engineer, quartermaster, and whoever else it may concern, should, with unlimited means, have taken three months to do three times the work these ladies did in ten days? The Commandant said, "It was a very good thing, indeed, but we could not be expected to be an engineer," and look after it. The engineer passed it on to some one else, and that some one else did not think it was his department. In short, it was nobody's business, and so the poor things nearly got ready. And will it be so this week, is quite wonderful. When I see and hear these things I often think if her Majesty's service would suffer, or what would be the shock to the military discipline of the British army, if the commanding officer were to make over the responsibility to some one of having a useful thing like this floated off in a reasonable length of time. From the one hastily-constructed kitchen, eight hundred men are daily supplied with a greater or less quantity of well-cooked food. Of the amount of beef-tea served out no account is kept. Those who are acquainted with the plan of cookery pursued in barracks, where all a company's meat and vegetables are boiled in one copper, the portions belonging to messes being kept in separate nets, will know how that food is likely to suit the delicate appetite of a fevered patient; but the means for doing even as well as this are wanting here No blame is to be attached to the cook, who, of course, is picked at random from any number of men available; and in this case, and to supply this want, the nurses and Miss Sellon's Sisters of Charity (who, as well as in otherwise attending to the wants of the unfortunate sick, They step into a berth absolutely vacant, and assist the surgeons, not only by seeing that the food ordered is well prepared, but by personal attendance A sick man's appetite is fickle, and a hospital orderly, having many duties to perform, cannot give that immediate attention which the case may require. At the best of times such delay occurs that when the food is brought the appetite is gone. As it now stands the orderly has only to tell off the nurses, and immediate attention is paid.—*Letter from Constantinople, Feb. 14.*

The War of the Three Emperors.—If the Conference of Vienna should fail, at last, in its efforts to re-establish a general peace, everything will be ready, in England, in France, and in Austria, for the campaign of the spring, a campaign so important that it will embrace, in all probability, three great theatres, and in which will be engaged at once against Russia, as allies of Turkey, the great nations. If we can place confidence in the revelations of the foreign press, France and England will act in the Baltic, not only with their fleets, but with their armies. Austria and Prance will be found combating side by side, on the upper part of the Vistula, in a common struggle, which may prolong itself to the frontiers of Poland, as well as to the bank of the Danube. In fine, France and England will be together in the Crimea, supported by Turkey and Sardinia, all gloriously united under the banners of civilisation and European independence. We do not wish to go before events, which may change with the necessity of the moment, nor to hazard conjectures which the future may destroy, as it may realise. Nevertheless, we cannot remain altogether strangers, nor even indifferent to the universal anticipations of the public. We can no more confirm than we can deny the rumours which attribute equally to the two Sovereigns of France and Austria the intention of taking the command in person of their armies. But already, in anticipation of this great event, which would be only conformable to the noblest traditions of the reigning families of Europe, the people, whose instincts are rarely at fault, has chosen its hero, in its own picturesque language, the forthcoming spring campaign in calling it the War of the Three Emperors. In this way, which will give to Europe a durable and solid peace, beneath the shadow of which she shall thenceforward march in the way of progress and the paths of civilisation, and with a new impulse, France shall be seen everywhere with her fleets and her armies. She shall be seen in the Baltic, in the Crimea, on the Vistula. What an immense ascendant does not this glorious *rôle* which she has taken in the Eastern question guarantee to her future position in the world!—*From a semi-official article in the Constitutionnel.*

Consumption of Spirits in New South Wales. The quantity of imported spirits upon which duty was paid in New South Wales in the quarter ending September 1854, comprised 202,106 gallons; to which adding the quantity of colonial spirits, 53,962 gallons, we have an aggregate for the quarter's consumption of 256,068 gallons, or between four and five gallons per head per annum of the whole population. Comparing the amount of duty paid in the quarter on ardent spirits, malt liquors, and wine, with the amount paid on coffee, we find the former had increased about £1500 over the corresponding quarter of 1853, and the latter had decreased by nearly £4000

A Russian Spy. The police in Paris are said to be in search of a person who has passed some time in the East, and particularly at Constantinople, where he became closely intimate with more than one high functionary. He has been for some few months in Paris, where he made himself remarked by his large expenditure, though possessing no ostensible means of livelihood. It is added that he was formerly in the pay of the French police, and the reason of his being now sought after is his alleged connection with the Russian police, several of whose secret agents are said in Paris

---

[illegible] has the erection of a girls' [illegible] and upper class of ladies in [illegible]

The Khedive of Egypt has left for Constantinople to do honour the Paris Exhibition [illegible]

M. Martin Van Buren, formerly President of the United States, has arrived in Paris, from Italy

The Queen and Prince Albert have forwarded to the Bishop of London £500 as a joint contribution to the Association for Promoting the Relief of Destitution in the Metropolis.

M. Merle, orderly officer of the French Emperor, embarked at Marseilles a few days since, on board the *Grange* steamer, for the Crimea; and several other officers are on the point of departing to prepare the way for a new army.

It is said that Lord John Russell would arrive at Vienna on the 24th (yesterday), and that the sittings of the Congress would begin three or four days afterwards.

Letters from Paris speak of the likelihood of the French Emperor first paying a visit to Vienna, and embarking at Trieste for the seat of war. The Empress, it is said, will not accompany the Emperor, but remain in Paris, on the urgent representations of her medical advisers.

The King of the Belgians went to Brussels from the Palace of Laeken on Sunday morning, and gave a private audience to Lord J. Russell, who had just arrived, in company with Lord Dufferin, Mr. Eliot, and Mr. Byng. The interview between the King and Lord J. Russell lasted a considerable time, after which he Majesty returned to Laeken.

The Emperor of Austria, as a mark of his admiration for Lieut. Gerard, the celebrated lion-killer, has just sent him (through the Austrian Embassy at Paris) a very handsome double-barrelled rifle carabine and superb hunting-knife

Lord Haddo, at the date of the last letters received at the Earl of Aberdeen's, was still at Cairo, in Upper Egypt. His Lordship had derived much benefit by the change of climate, and intends to prolong his residence in the East, probably until the spring.

M Porro, formerly a superior officer of engineers in the Austrian army, had, a few days ago, the honour of presenting to the French Emperor a military spy-glass invented by him. The Emperor, considering the glass likely to be exceedingly useful for military purposes, has authorised M Porro to call it "the spy-glass of Napoleon III."

The Right Rev. Bishop of London proposes to hold his confirmation in Paris on Friday in the Easter week.

The news of the approaching marriage of the Countess de Vista Alegre, eldest daughter of Queen Christina and the Duke de Riansares, with France Ladislas Czartoryski, is confirmed

The Earl of Portarlington has been elected a Representative Peer of Ireland, in the room of the late Viscount Lorton.

The New York papers deny that Colonel Colt has been losing money by his invention It was shown by the Commissioner of Patents that he had already made a million dollars by it.

The newly-appointed Governor of South Australia has received the honour of Knighthood from her Majesty. Sir Richard M'Donald has been Governor of the British possessions on the west coast of Africa, of St. Lucia, and of St. Vincent.

Admiral Nachimoff has received from the Czar the Order of the White Eagle, as a reward for his services at Sebastopol.

The Americans residing in Paris gave a grand ball on the evening of the 22nd ult., in Herz's great room, in honour of Washington's birthday. Amongst the personages of distinction present were the Minister of Foreign Affairs and Madame Drouyn de Lhuys, Lord and Lady Cowley, several Ministers, and most of the Corps Diplomatique.

Lord Lucan arrived at Marseilles from the Crimea on Tuesday, and left that morning by a special train for London. He will demand a court-martial

General Mansuroff, who not long since made his appearance in Brussels, in the bearer of a treaty by which Russia cedes to the United States, for the sum of 40,000,000 of silver roubles, or 30,000,000 of dollars, her possessions in North America. Some American statesmen are to meet the Russian General at Brussels.

Commodore Perry's account of his expedition to Japan is to be published by Congress. The documents, maps, scientific reports, plates, &c., will fill three quarto volumes

Kamehameha III., King of the Sandwich Islands, has died, at the age of forty-one years and nine months. He is succeeded by Prince Alexander Liholiho, his nephew, a very fine copper-coloured gentleman of some education, who assumes the title of Kamehameha IV.

Mr. Macready gave a reading from the English poets last week, for the benefit of the infirmary, at Bradford.

The *Siècle* has been ordered not to go on with M. Eugene Sue's *feuilleton*, the "Diable Médecin;" and the *Presse*, which is now publishing Madame George Sands' memoirs, is enjoined to omit all that relates to 1812, and the retreat from Moscow.

Mrs. Fanny Kemble has been giving readings from Shakspeare in Cheltenham, but the local papers say there was little to show that the reading possessed sufficient interest to induce the fashionables to abandon for an hour their habitual pursuits.

At the late reception of M. Berryer at the French Academy, it was remarked that M. Thiers and Count Molé were absent. M. Thiers has had his term reduced to two years in exile, and Count Molé has for some days been confined to his house by indisposition.

It is expected that Mr. Layard will be the new Lord Rector of Marischal College, Aberdeen. He has intimated that he will be able to visit Aberdeen to be inaugurated into office.

Alexander Smith, the author of the poem entitled "A Life Drama," is about to make his appearance in the character of a lecturer, at the Darwin Mechanics' Institution, taking for his subject "The Life and Poetry of Burns."

The French Minister of War, having remarked that, in consequence of the dearness of provisions at Toulon, the allowance of food to the Russian prisoners was not sufficient, has given orders to have an augmentation of rations for them put up to public auction.

Companies of firemen are to be sent off immediately to Constantinople to prevent accidents, as it is said that Russian agents are employed to burn the arsenals, &c., of the Allies.

The great Highland road, as well as the road from Huntly to Inverness, has been so blocked up with the snow that the ordinary mail coaches were stopped for several days, and the mails were carried by dogs or saddle-horses.

The treaty for the settlement of the disputed frontier line between Switzerland and Baden has been ratified. The dispute dated from 1623.

Seventeen Austrian merchant vessels are frozen up in the Sea of Azof. The Commander of the Allied blockading squadron has received instructions to release them any assistance they may require, when they can manage to get through the Straits of Yenikalé.

The colliers and labourers employed at several large collieries in the neighbourhood of Wigan have been reduced to three days' work a week.

The Florence, Pisa, and Leghorn Railroad received considerable damage a few days ago, on the 16th ult., by the inundation caused by the Arno, in consequence of which the trains have ceased to run.

An attempt is being made by the workmen engaged at the Crystal Palace, Sydenham, to establish for their own use a free library. Lord Carlisle has sent the projectors £5; and a reprint house has offered its books to the workmen at the trade price—that is, at a discount of thirty per cent.

The Plenipotentiary of the Sublime Porte appointed to represent Turkey at the approaching Conferences is instructed to demand an indemnification for war expenses of 300,000,000 piastres.

Colonel Jarnell, of the second battalion of the Coldstream Guards, has presented the regimental library with upwards of 400 volumes He has also procured for his men free admissions for the leading exhibitions of the metropolis.

The *Ericsson* has had the caloric engines taken out of her, and she is at New York taking in engines of the present construction The caloric principle may, therefore, be said to have failed for the present.

The Maine Liquor Law has passed the Senate of Indiana by a majority of ten. A prohibitory liquor law has passed both branches of the Illinois Legislature.

At a wedding in the neighbourhood of Garstang, on Shrove Tuesday, the bridegroom was presented with a pancake garnished with a white silk purse containing a thousand sovereigns.

Lieutenant-Colonel Beamish, the historiographer of the Hanoverian German Legion, is now engaged in compiling a new work on the same subject. He has issued an address to the still surviving officers of that distinguished corps who may be in possession of papers and original documents having reference to the Legion, and not hitherto published, to communicate them to him, either in the original manuscript or by duly attested copies.

H.M. STEAMER "SNAKE" DEFENDING HERSELF FROM THE FIRE OF THE RUSSIAN BATTERY AT KERTCH.

SHARP FIRE BETWEEN H.M. STEAM-SHIP "SNAKE" AND A RUSSIAN BATTERY

This spirited affair took place on February 2nd, when the *Snake*, in reconnoitring the shipping lying under the batteries of Kertch, got on shore on the edge of the spit of the town, about 3000 yards from the battery, remained nearly two hours exposed to a sharp fire from the Russians, who, thinking to capture the steam-ship, manned their large boats and pushed off; but were speedily saluted with a shower of shot and shell, which at once compelled them to retreat. The ship was got off without having sustained any damage, the ground being soft sand, and the water smooth at the time.

We have to thank an obliging Correspondent for the accompanying Sketch of the above affair

Kertch is the eastern peninsula of the Crimea. The town is a mixture of the Italian and Russian; but presents a more pleasing aspect than most Little Russian towns afford. It is said to contain 10,000 inhabitants; but it does not promise to be a place of much importance until the provinces about the Don enjoy higher civilisation. Thus, Kertch is even now the medium of communication between the provinces and the south; but the products of the Don lands are still insignificant. The Don Cossacks, who occupy the most important lower portion of the territory of the Don, only cultivate as much corn as they require for their own maintenance. They live, besides, simply; and the common people, at least, have few or no wants. The material for their clothing is chiefly made by themselves, or they obtain it from Russian factories. Thus, the chief traffic is confined to the products of the immediate neighbourhood, fish and salt, both of which are exchanged, in places north of the Sea of Azof, for corn. There is a good deal of traffic, especially with Taganrog, a town which, above twenty years ago, promised to become of some consequence, but since Kertch has risen, has lost its importance. The salt is obtained from small lakes, which occur to the south of Kertch Much fish is dried, and salted like herrings; several thousand tons of these are exported annually to the south of Russia. Caviar is also prepared.

The town stands on the eastern extremity of the small peninsula where, several hundred years before the Christian era, flourished Panticapæum, the Royal metropolis of the Bosphoranic sovereigns. The importance of this Grecian colony has only been recognised of late, and the opinion will gain ground the more we turn our attention to the remains still extant, a multitude of proofs from the earliest times having been recently discovered

We abridge these interesting details from Dr. Koch's "Journal of a Tour in the Crimea and Southern Russia," a translation of which has been published within the past week.

SKETCHES AT BALACLAVA.

(*From our own Artist.*)

I send two Sketches. 1. The Interior of an Officer's Hut on the Heights of Balaclava, occupied by five officers of the 1st battalion of Royal Marines. This hut was constructed by Mr. Elliot, one of the occupants, assisted by four privates of the same corps. The whole of the woodwork of the roof was picked up on the rocks, from the wrecks of the English transports lost at Balaclava on the 14th November, 1854. The iron of the fireplace was also from the same wrecks; and the canvas used as the roof was an old sail belonging to the *Lady Pelham*, an English transport dismasted in the same storm. The hut was commenced soon after the gale of the 14th November, and was finished and taken possession of on the 5th December.

The second Sketch (see page 200) shows the Exterior of the Huts, Tents, &c., of the Rifles and 1st Royal Marines, encamped on the heights of Balaclava; and the battery with a fatigue party of French soldiers of the line crossing the hills with wood for the manufacture of gabions, fascines, &c., &c. In the ravine is a French encampment near the plains of Balaclava. In the foreground is one of the Rifles, in a long sheepskin coat with the wool inside, a cap with the wool outside, waterproof leggings, &c.; the other is one of the Royal Marines, in his grey great-coat, fraternising with a French soldier of the line. In the extreme distance, on the horizon, may be seen a few of the topmasts of our fleet off Cape Chersonese. The Russians are ascending again in great force towards the valley of the Inkerman, throwing out videttes, &c.; and Balaclava is momentarily expected to be attacked, the war vessels in the harbour are drawn across in order to protect our shipping. We are endeavouring to procure horses, without which we can do very little, as the roads are in a dreadful state and it is impossible to go up to the Camp without being on horseback.

INTERIOR OF AN OFFICER'S HUT AT BALACLAVA.

CARRYING THE WOUNDED TO BALACLAVA.

CARRYING THE SICK AND FROST-BITTEN TO BALACLAVA.

One Sketch represents the melancholy procession of a band of frost-bitten patients from the heights to Balaclava; the other a party of soldiers harnessed to a car, in which are four sick men, whom their comrades are dragging painfully along to the hospital. In the latter Sketch a long file of men may be seen in the distance struggling up the hill with planks on their shoulders. Such was the state of affairs, as seen by our Artist, on the 7th of February. Since that time matters are said to have improved, but there are still great complaints of want of management. One correspondent, writing from Balaclava, on the 10th ult., says:

I regret to state that sickness does not diminish in the Camp. Scurvy and low fever extend their action every day. Now, scurvy is mainly caused among debilitated men by the use of salt meat and the want of vegetables. Even fresh meat alone will develop it among men worn out by excessive labour, should they have no leguminous diet. I believe there has been only one cargo exclusively of vegetables ever sent up here, and that came in the *Harbinger*, which lay in Balaclava for weeks, till her load of potatoes and onions began to rot and become putrid, so that much of it was unfit for use and had to be thrown away. Whoever had an order got a sack of potatoes: but who could carry a sack of potatoes to the front? Meantime, ships chartered by Government for the use of the service come in day after day to Balaclava with quantities of vegetables *for sale*, and with stores of provisions to be sold for the private profit of the stewards and adventurers at great prices, though the charter-party of these vessels expressly forbids any such use to be made of any ship, or any private property to be conveyed in her, while she is in the employment of the Government. The commissariat ought to avail themselves of the supplies brought in by these means, and should purchase them at a reasonable rate—a proposition the owners cannot object to, seeing that the articles they have imported in this way are all liable, if I am rightly informed, to instant seizure.

It is, however, so far encouraging that there is a diminution in the rate of mortality at Scutari. On the 8th of February there were fifty-two burials; on the 9th, forty-nine; on the 10th, forty-eight; on the 11th, fifty-three; on the 12th, forty-two; on the 13th, thirty-two; and on the 14th, thirty-nine—making in seven days a total of 316, of whom two were military surgeons. On the morning of the 14th there were in hospital 5328 non-commissioned officers and privates, and eighty-seven officers. There had arrived from the Crimea on the 7th the *Robert Lowe*, with 174 invalids, of whom five died. On the 8th the *Adelaide* and the *Emu*: the forming carrying 154, of whom one died; and the latter 147, of whom none died. On the 11th the *Melbourne*, with 150, of whom two died; and the *Brandon*, with 118, of whom one died. Most of these steamers have taken their sick to Smyrna, and a detachment of orderlies, recently organised in England, was conveyed there from Scutari on the 11th, to assist in establishing the new hospital. On the 9th the *Malacca* sailed for England with forty invalids, and on the 15th the *Arabia* took her departure with 200.

The great increase of fever in the hospitals at Scutari has been the chief point of remark lately. For weeks it has been gaining strength, and now rages with a destructive vigour which is in the highest degree alarming. Some of the medical men give it one name and some another, but all are agreed as to its malignant character, and in a greater or less degree, as to its origin and progress. On the former point no more decisive evidence can be given than the fact, that in less than a month it has swept away no less than seven surgeons, while eight more were, according to the last accounts, prostrate under its influence. Struthers, Newman, Watson, Langham, Macartney, Aibert, and Marshall, had died of it, after very short illnesses, and M'Ilree, Johnson, Muirhead, Hooper, Guy, Summers, Graham, and Price were more or less seriously ill. Others have been affected, but have struggled through their duties notwithstanding, and it is to be hoped may suffer no bad consequences from their imprudent zeal. Three of the nurses had been attacked, and fears were entertained for the recovery of one of them. On board the transport ships and in the hospitals the mortality among the orderlies was very great, while the nurses and surgeons were still comparatively exempt. As, however, the numbers of sick increased, the infectious and malignant character of the fever had become more marked and decided. The Barrack Hospital and Kululee have both been overcrowded, and there, as might be expected, it was committing the greatest ravages. The General Hospital has been more fortunate or better managed in this respect, and in consequence had suffered less.

Although fever was on the increase in the hospitals, and their overcrowded state and the want of surgeons had led to the derangement of some plans from which good results were expected to flow, other improvements are described as being in progress which promise to yield beneficial fruits. Dr. Cumming is in the full exercise of authority as Inspector-General, and will, it is thought, rectify many things that should have been put straight long ago. Under his sanction extra diet kitchens are being provided at convenient points, the orderlies enabled to sleep and eat out of the wards; and it is said that he is likely to approve of an arrangement by which some of the medical officers may be relieved from constant residence in the poisonous atmosphere of the hospitals. What, however, may be considered as the most satisfactory news regarding the hospitals at Scutari, is the reported arrival, in the *Eagle*, and in another steamer, of large stocks of things indispensable to a well-ordered hospital establishment, and which, it was thought, would afford an opportunity of something being done to make each ward and bed complete in its own furniture and equipment.

CARRYING THE FROST-BITTEN TO BALACLAVA.

...S OF THE WEEK.

THE frost is gone at last, after five weeks' persistence. London has come back to its usual winter state of fog, mud, and slop. Carnival has ceased to be held on the Seven Dials, and the *employés* of the Humane Society are congratulating themselves on the arrival of the blissful season when they have nothing to do but smoke their pipes and eat their meals—when there is no ice for skating, and it is too cold to bathe, except for such hardened philalcutics as the late Sir Lancelot Shadwell, who used to jump into the nearest river every day in the year, even when it was necessary to break the ice with a pole, as a preliminary to the immersion. But, on the whole, the balance of profit strongly inclines on the side of the sloppy thaw, against the crisp, bracing frost which made the parks so gay, and the pulse of the active pedestrian tingle in every vein; for now the docks will be free from the ice which, like an aneurism in the human frame, has for several weeks impeded their commercial circulation; the winter-bound ships will now get clear from their moorings, lighters and barges can now go on their accustomed journeys; even *Citizen A* and *Waterman 7* will soon recommence their interrupted plying between Chelsea and Greenwich; oysters will again become eatable, and codfish cease to be woolly; the navvy will be able to get his pick into the softened earth, and the costermonger will rejoice to find that it is no longer too cold for people to eat oranges. A dozen degrees of higher temperature, a few hours of drizzling rain, mean bread for tens of thousands. It was high time—ten days ago that bread was beginning to be terribly wanted. For weeks whole regiments of working men—navvies, dock-labourers, bargemen, gardeners—had been unemployed. Luckily, the great prosperity which the labouring class have enjoyed, in general, during the last two years, had given to most some funds which they could draw upon; but, with the present high price of provisions, these did not last long; and when they were exhausted starvation came on. It does not seem as if the "constituted authorities"—that is, the vestries, the directors of the poor, &c.—were altogether as active or as forseeing as they should have been, and perhaps even that marvellous flood of English private charity ran shallower this year (just at first, at least,) than it is wont to do; but, somehow, starvation there was, even among those who, from their ability in ordinary times to earn good wages, were unused to it; and, consequently, bread riots. They broke out first at Liverpool, then in a very few other towns in the north and west, and finally at the east end of London. Perhaps I rate the check of morality too low, but it has occurred to me that it is wonderful that hungry men should, in the streets of a city, allow themselves to hunger, when bread is to be had for the taking, and the only result of detection would be the removal to a place where food and warmth are sure to be obtained Perhaps the reason is that the very poor, those in whose minds the craving for nourishment might be supposed to overpower all other feelings, have been brought down to this pass by slow degrees, so that when the loaf in the baker's shop is most tempting, they actually want the energy to take it; but, with strong men, accustomed to good feeding, brought by a dispensation of Providence, almost suddenly, to the verge of starvation, the case is very different. Clemming, as the Lancashire folk call it, is not so unbearable when you are used to it; but, when you are not, the chances are that you do as the poor dock labourers and gardeners did at Whitechapel last week—you break into a baker's shop and take the bread which you cannot buy, and have not the courage to want. It was robbery, of course, yet surely of the most venial kind. On the whole, too, the robbers (though, of course, there were some samples among them, with whom hunger was only a pretext) behaved remarkably well, taking from the shops little besides food, and committing hardly any personal injury or unnecessary violence. It is all over now; almost with the first drip from the housetops the bakers, butchers, cheesemongers, and buttermen, raised their state of siege, and that large exposition of doubtful eatables which usually graces the Whitechapel-road is now as showy and odoriferous as ever.

In several of the great towns, and in the borough of Marylebone, "war-meetings" have been held. Strong speeches, reading like *Times* leading articles put into bad English, have been made; and, setting aside all traits of grammar and style, the making due allowance for that unfortunate disease of speech making under which so large a number of her Majesty's subjects are known to suffer, and which prompts them to welcome a grievance and make the most of it, as of a positive blessing, there can be little doubt that the conviction of these meetings has been the TRUTH that our administration of military affairs has been notoriously and scandalously defective; and that it may be presumed that the vice of mal-administration is not confined to the War Department and the Admiralty. Of course our unlucky Commissariat has been the chief object of attack; but it is odd that one of the strongest arguments as to the inefficiency of its constitution has not been hit upon by any of the speakers—that which may be drawn from the superior condition of our Artillery force to that of the rest of the Army. "We are all nearly starved here," writes an officer of the Guards, "excepting the fellows in the Artillery, who are as fat as pigs." And this is true, taken *cum grano*—that is, the "fellows in the Artillery, though they would not be good models for bacon, have not really suffered more than troops under canvas in a winter campaign might expect to do. And why? Because the Artillery enjoy the advantages of a special organisation, have their own staff—who are not necessarily the General's nephews and cousins, and to a certain extent (so far at least as the means of transport are concerned) their own commissariat. The question of promotion by purchase, too, is getting to be very generally agitated. Now this is just one of the subjects upon which it is most easy to sophisticate a man's reason. The first view any one would take of it is, that, as you certainly would like to promote the best soldier, it is unwise to put it out of your power to do so unless he has got money. Thinking a little longer, and, as you fancy, a little deeper, on the subject, it occurs to you that, as few ensigns or lieutenants are likely (especially in peace time) to have the occasion to distinguish themselves so particularly that the expedency of their promotion out of their turn would become self-evident, it follows that, doing away with purchase, you will have to fall back upon the system of seniority, and that grey-haired captains and gouty majors would become unpleasantly plentiful in the ranks of the Army. You don't want to be perpetually promoting the good boy of the regiment, who never gets into scrapes, and stands well with the Colonel and the Divisional General, because you have an idea that that estimable character, like the first-class man at Oxford is apt to be something of a "muff" when it comes to real hard work; in short, you see a difficulty—you see, too, that in common justice you can't change the system without paying the price of forfeiture commissions to the present holders, which would cost a vast sum of money, so you begin to think that the present system may not be so bad after all; and you content yourself with it on the pleas, not that it is the best possible, but the best that can be thought of (that is, that you can think of) "under the circumstances." A little deeper thought—a little more consideration of what might be done by a different administration of the Army would lead you back to the first superficial view of the question, and verify Talleyrand's maxim, "Qu'il faut se defier du premier mouvement, attendu que c'est presque toujours le bon." How often has it been said that the superior efficiency of the French Army to ours is to be attributed to their constant state of warfare in Algiers, which has hardened and instructed men and subalterns in the arts and sciences of campaigning, and educated a succession of officers, still youthful, in whom both soldiers and Government know by experience they can trust. Have we, then, no Indis, where we are always at war with somebody or another? Here is a practical training-ground for military experience far more complete than the plains of the Metidja or the defiles of the Atlas. Note, too, that our wars in India are nearly always successful, unless when, as in the Cabul expedition, the Home Government interferes too directly with their management; and note, too, that the East India Company, though a good deal hampered by rather stringent rules of seniority, do manage to promote comparatively young men who show they have "the stuff in them"—witness Outram, and Mayne, and Edwardes

There is manna in the wilderness—one bright spot in the desert of uncertain politics and unpleasant despatches. The "great Kennedy case" (who that has read "Redgauntlet" but remembers the great case of "Peebles *v* Plainstanes," and who that does but must be struck with the resemblance between the tedious pleadings of poor Peter and the tedious speech of Sir John Shelley, and the more tedious answer of Mr. Gladstone?)—the great Kennedy case is disposed of. Long suffering, indeed, is the House of Commons which did not allow itself to be counted out. Sir John Shelley, thinking Mr. Kennedy ill-used, was quite right to bring the case before the House, yet surely he might have done it in a shorter form; and Mr. Gladstone might with advantage have imitated the good example. The whole matter might have been settled (in fact after all nothing was done) in half an hour, and it was allowed to occupy the entire evening.

PROFESSOR OWEN ON THE FOOT-MARKS IN THE SNOW IN DEVON.

(*To the Editor of the* ILLUSTRATED LONDON NEWS.)

AN esteemed zoological friend has submitted to me a carefully-executed drawing of one of the more perfect impressions left in the snow at Luscombe, South Devon, on or about the 8th of last month. It was of the hind-foot of a Badger. This is almost the only plantigrade quadruped we have in this island, and leaves a foot-print larger than would be supposed from its size. The Sketch, of which you have given a Cut in p. 197 (Feb. 24th), gives a correct general idea of the shape and proportions of these foot-prints, but without the indications of the pads on the sole, and the five small claws, which the drawing sent to me exhibited. Such perfect foot-prints were rare: because those of the fore and hind-foot are commonly more or less blended together, producing the appearance of a line of single footsteps; which appearance, if a bear had been abroad in the five winter months spent by your Correspondent in Canada, would have shown him was not peculiar to the foot-steps of man, but characteristic of other plantigrade mammalia, though they may be quadrupedal. The badger sleeps a good deal in his winter retreat, but does not hibernate so regularly and completely as the bear does in the severer climate of Canada. The badger is nocturnal, and comes abroad occasionally in the winter when hard-pressed by cold and hunger: it is a stealthy prowler, and most active and enduring in its quest of food.

That one and the same animal should have gone over 100 miles of a most devious and irregular route in one night is as improbable as that one badger only should have been awake and hungry out of the number concealed in the 100 miles of rocky and bosky Devonshire which has been startled by the impressions revealed by the rarely-spread carpet of snow in that beautiful county.

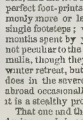
The onus of the proof that one creature made them in one night rests with the assertor, who ought to have gone over the same ground, with a power of acute and unbiassed observation, which seems not to have been exercised by him who failed to distinguish the truly single from the blended foot-prints in question.

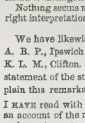
Nothing seems more difficult than to see a thing as it really is, unless it be the right interpretation of observed phenomena.

RICHARD OWEN.

We have likewise received communications upon the above subject from A. B. P., Ipswich; A CONSTANT READER, Burgh; A. A.; I. S., Jersey; K. L. M., Clifton. W. W., Somerset, will perhaps state the authority for the statement of the above Correspondent. The following are ingenious attempts to explain this remarkable appearance:—

I HAVE read with great interest the paragraph in your last publication giving an account of the most extraordinary prints in the snow, which have occasioned such excitement and fomented so melancholy a mass of superstitious folly in the villages lying southward of Exeter, on either side of the river Exe. Permit me, however, to state that the outline accompanying your intelligent Correspondent's recital of the circumstances hardly conveys a correct idea of the prints in question. As an amateur accustomed to make most accurate drawings from nature, I set to work soon after these remarkable prints appeared and completed the accompanying exact fac-simile of those that were visible on the lawn of our clergyman's garden in this parish. He and I traced them through a low privet hedge, by the usual opening of one foot diameter. On applying a rule, the interval between each impression was found to be undeviatingly eight inches and a half. On the same day a mutual acquaintance, familiar with natural history, and not long since returned from the Pacific Ocean, measured the intervals between similar prints in his garden, above a mile and a half distant from the Rectory, and found it to be exactly eight inches and a half. This, in my opinion, is one of the most remarkable and confounding circumstances we have to deal with. In the course of a few days a report was circulated that a couple of kangaroos had got loose from a private menagerie (Mr. Cross's, I believe) at Sidmouth. Few of us had had opportunities of seeing the impression made on sand or loam by the hinder feet, or hocks rather, on which this animal sits: and we were not unwilling to give credence to the suggestion that the exotic quadruped (walking, when it does walk, as a biped; but bounding over vast lengths of space more like a chamois) might have been loose and vagrant in the neighbourhood, and left the strange impress here referred to. Still, it was quite inexplicable that the animal, considering the scale of the foot, should leave, in single file, one print only, and, as has been already observed, with intervals as exactly preserved as if the prints had been made by a drill, or any other mechanical frame. A scientific acquaintance informed me of his having traced the same prints across a field up to a hay-stack. The surface of the stack was wholly free from marks of any kind, but on the opposite side of the stack, in a direction exactly correspond ing with the track thus traced, the prints began again! The same fact has been ascertained in respect of a wall intervening.





No animal with cushion paw, such as the feline tribe—diminutive or large (cat or tiger)—exhibit, could have made these marks; for the two feet of most quadrupeds tread in parallel lines more widely characterised, others approximating very closely. The ass, especially, among the animals daily seen, approaches the single line. The fox leaves round dots in a single line; the stoat two and one alternately. Moreover, the feline tribe leave concave prints, whereas, in each of these mystic prints, the space enclosed by the bounding line was convex, as in the prints of a pattern.

Early in the week we were informed that two cranes had been shot at Otterton, below Budleigh Salterton, and that these were the mystical printers; but the well-informed in zoology at once rejected this official explanation. Within the last four-and-twenty hours, a very shrewd and intellectual neighbour of mine, about six miles distant, wrote me word that a gentleman in the parish adjoining his own had traced these peculiar prints through his garden-walks into a six-inch privet, and there he saw the marks of *claws*. This has induced some to suppose them to be the track of a catamountain. Two other gentlemen, resident in the same parish, pursued a line of prints during three hours and a half, marking their progress under gooseberry-bushes, under fruit-trees; and then, musing them, regained sight of the impression on the roofs of some houses to which their march of investigation brought them. These gentlemen "swear to claws." Upon which my correspondent (a member of the Society of Antiquaries) observes, "We incline to believe they must be otters, driven out in quest of food. Our friend felt toe-marks at the contracted part of the print, though they were not discernible by the eye."

Some "chief mourner" in the congregation where I was discoursing three Sundays since had evidently been "taking notes, and, faith! he pented them" (as Burns would say); and though, without incurring the charge of the slightest approach to irreverence, I find a very apt opportunity to mention the name of kangaroo, in allusion to the report then current, I certainly did not pin my faith to that version of the mystery, nor call upon others to receive it *ex cathedrâ*; but the state of the public mind of the villagers, the labourers, their wives and children, and old crones, and trembling old men, dreading to stir out after sunset, or to go out half a mile into lanes or byways, on a call or message, under the conviction that this was the Devil's walk, and none other, and that it was wicked to trifle with such a manifest proof of the Great Enemy's immediate presence, rendered it very desirable that a turn should be given to such degrading and vitiated notion of a superintending Divine Providence; and I was thankful that a kangaroo was "in the wind," as we should say, and serving to disperse ideas so derogatory to a christian sod, but assuredly most unenlightened community. I was reminded, nevertheless, by one pernacious recusant, that it is written that Satan should be unchained for a thousand years, and that the latter days are at hand. Still, mum was a word in due season, and did good.

The generality of such of us as can reason dispassionately on view of a phenomenon which seems, as yet, to be without precedent or parallel, incline to believe it must be a bird of some unfamiliar tribe, wandering and hopping over this region; but all inquiry seems to be fruitless. I have addressed communications to the British Museum, to the Zoological Society, to the keepers of birds and beasts in the Regent's-park menageries; and the universal reply is, they are utterly unable to form any conjecture on the subject, however correctly the impressions had been copied.

I am emboldened to address you with more than the ordinary confidence of a correspondent "well up in his facts," inasmuch as I am living in the centre of the district where the alarm, so to speak, was first given. Sir L. Newman's Park, at Mamhead, is exactly opposite to my own residence. Starcross Tower is an object of the picturesque, and beautiful to gaze upon from my study window: and Powderham Castle gleams in the sunshine, half a mile further on. These are on the other side (west) of the river Exe, two miles in its breadth; and the marks were as abundant throughout the places just specified, and their neighbourhood—Kenton, Dawlish, Newton, &c.—as here at Exmouth, Withycombe Raleigh, Lympstone, Woodbury, Topsham, and the vicinity of Bicton, and Budleigh. There are many "travelled men," and deep-thinkers, too, among us, far from being

Credulous to false prints

(*as Isabella says to Angelo*); but—eager as we are to ascertain the exact point of knowledge in natural history at which the elucidation of this unprecedented mystery might commence—our anxiety as zoologists, or as students or connoisseurs in any one of the λογοι (or sciences), is a feeling of apathetic indifference in comparison with our regret for the prevalence and evil-working of that gross and incredible superstition which is raging like endemic disease among the lowest class in every direction; and I shall have every cause to rejoice, if, on view of what has now been laid before you by pen and pencil, any one of your numerous readers and other contributors should succeed in solving the difficulty, and remove thereby a dangerous, degrading, and false impression.

Withycombe, near Exmouth. G. M. M.

As much interest has been excited by these extraordinary foot-tracks, I beg to offer you a few remarks in explanation of what I have observed in the neighbourhood (Topsham). Myself and another medical friend bestowed considerable time in endeavouring to discover the peculiarities of this most singular impression. The outline, certainly, in all cases resembles that of a hoof, which has given rise to the idea of the supernatural origin among the ignorant; but, on more minute examination of the tracks, we could distinctly see the impressions of the toes and pad of the foot of an animal: a rough draft of which I showed to a friend of mine in Exeter, and, without any communication on my part, he recognised it as that of the otter, being well acquainted with that animal and its habits.

I have enclosed you a rough Diagram of the impressions which we observed within the hoof-like tracks; the outside toes were larger than the rest. I am not acquainted with the otter myself; but of this I am fully convinced, that the animal, be it what it may, is of low stature, from the tracks having shown it to have passed uninterruptedly under the branches of shrubs, &c., not more than eight or nine inches from the ground; and in a neighbouring village it went through a six-inch pipe drain. It must be borne in mind that most rivers have been frozen over for some weeks, and therefore the otters have thus been prevented from obtaining their usual food—namely fish; and when such is the case, they ramble many miles in search of other food.

The otter is not a rare animal in this neighbourhood, and frequents the streams near Exmouth, Lympstone, Woodbury, Budleigh, Topsham, Clyst, the river Exe (in all which parishes tracks have been seen), as well as Dawlish, Torquay, Totnes, &c. The tracks in this parish we observed going in contrary directions; we did not notice any in a direct line, but in alternate steps, forming two parallel lines of steps. We also saw tracks on a low wall, and over the tiles of a linhay, and in several instances it had visited the summer-houses and out-houses of gardens; in all of which portions of the same characteristics were more or less traceable, the ball or pad in the centre being more frequent than the others. Its visits have been repeated in some localities of this town.

Topsham, Feb. 26th, 1855.

Let your Correspondent, "South Devon," who furnished the accounts of footmarks published in your Number of Feb 24th inst. know that if he, as any future occurrence may, should see such footmarks, he may, on accurate examination, discover a hedgerow and three toemarks—made probably by the foot of the Great Bustard (*Otis tarda*). The two ends of the asinine shoeprints in your Number of last week are probably those of the two outer toes; and the ragge rounded end, the confounded junction of the toes at the heel end. I saw marks of this sort on Saturday, the 24th inst, after the commencement of the thaw on the Friday, and do not doubt of their being such as I have named. What I saw had evidently (although the thaw had partially obliterated them) a central third linear impression. ORNITHER.

RUSSIAN INTRIGUE.—Brussels has been selected by the CZAR as a focus for intrigues, carried on by a well-organised party of both sexes entitled to leading positions in society. Orleanists and Republicans, Legitimists and Mazzinists, Orangeists and Catholics, are all made use of in their turn. Ready pens and ready dollars are found for getting up pamphlets, which are either sent back to Germany for distribution and translation, or are smuggled into France for perusal in the original. Brussels was a sort of quiescent English colony, which never troubled itself with political questions. It is now converted into a sort of little Rome, where the Czar's subjects are located for no other purpose than political machinations. Each, whether male or female, has his or her part to play, with the full knowledge and sanction of the St. Petersburg police and Foreign-office, and under special instructions and for special purposes. The grand objects committed to their furtherance are to vilify and ridicule the French Emperor; to cast discredit upon his Government; to misrepresent and distort all acts and intentions of the British Cabinet and nation, after the principle of the Pan-Russian Berlin party; to spread rumours of Russian successes and Allied disasters, even to extremities; to exhibit the Czar as a model of peaceful disinterestedness, the archkey of Christendom, the sole barrier against demagogy, and the sole guardian of property and possession; to assert that Russia is impregnable and her finances inexhaustible; to affirm that her sixty-four millions of serf population is as a giant to a pigmy, when compared with sixty-three millions of united French and English. Thus it is that the ramifications of Russian intrigues are extended throughout the whole so-called "neutral" land from the Memel to the Danube, and thence to the Scheldt and Sambre. Nor is money spared. The sum devoted by [illegible] purposes is only equal to that expended annually on her legitimate diplomacy.—*Letter from Berlin.*

WHY MUST THE ARMY EAT SALT PORK?—We have had great fun with the recipes for cooking rations which appear in the papers. M. Soyer's were good and simple, but every one of them had been found out by experiment months ago, and were familiar, however little used, to every camp cook. The recipes which teach the men how to make rations palatable by the help of a "sliced turkey," nutmegs, butter, flour, spices, and suet, are cruel mockeries. The men have all the will in the way the army must eat salt pork. Why is that the only meat except beef that is served out? The lean is always very hard and tough, and requires great care and trouble in cooking to make it masticable—the fat is in under proportion to the lean, and is far too "rich" for a debilitated stomach. Are "pigs" a national institution, to be maintained at any cost? Is the flesh of the ball a part of the Constitution? A soldier is a very dear animal. A crop of them is most difficult to raise, and, once they have been fully grown, and have become ripe soldiers, they are beyond all price. Have we not got abundance of meats in our warehouses, of vegetables, of all kinds of nutritious preparations to bestow on those who are left to us, and who are really "veterans," for in the nurture finally of the fine young men, they have to fill the horses, the dragers, and the triumphs of war? The nation, with its accessories of sugar, tea or coffee, tobacco, and rice, was sufficient as long as it was unfeeling, and while the army was in full health; but it is not sufficient for either, it is not suitable, when the men are debilitated from excessive weakness.—*Letter from the Camp, Feb.* 12.

COAL IN THE CRIMEA.—The British Government have contracted with that of Turkey to render available for the supply of the English steamers the coal-fields of Eskoli or Heraclea, which may be reached by the Euxine. A considerable reinforcement of miners was nearly expected from England to strengthen the hands of the staff now on the spot, who, with their present means, have been able to deliver coals of excellent quality at a cost under 15*s.* per ton for actual working expenses. In the meantime it is satisfactory to know that our fleet will experience no difficulty in obtaining fuel for some time to come, the southerly breeze which has lately prevailed having brought into Constantinople several score of coal-laden vessels which had been impeded by contrary winds in the Mediterranean.

CONSUMPTION OF COTTON IN 1854. Notwithstanding the strikes and short-coals of the past year, it appears that a larger consumption of cotton has taken place in Great Britain than at any previous period, the quantity in 1854 being 350,000,000 lb. weight; in 1845, 307,000,000; in 1852, 745,000,000; in 1853, 734,000,000; and in 1854, 780,000,000. The increase upon last year's deliveries to the trade of Great Britain, Messrs Du Fay and Co. observe, is 6·2-5ths per cent; to Russia, Germany, Holland, and Belgium, an increase of 3½ per cent; to France of 2½ per cent; to Spain of 3 per cent; and a decrease to the trade of the United States of America of 8 per cent. The increase of consumption in this country, in the face of strikes and bad trade, is accounted for by the fact that manufacturers have been much more generally engaged on heavy fabrics—fabrics in which more raw material and less labour are employed

M. MINIE.

It is strange that the career of a man whose inventions have revolutionised warfare should have remained, up to the present time, an untold story. Circumstances have afforded the writer an opportunity of communicating to the public an outline of the picture that, at a future time, must show to the world the claims which M. Minié has upon its gratitude. His weapon has borne his name into every quarter of the globe. At this moment it protects the besiegers of Sebastopol; at this moment it is being copied for the use of the American army; at this moment a ship is on her voyage to the Crimea, with 4,000,000 Minié cartridges. No impediment has been placed in the way of the general adoption of an invention calculated to serve the Allied armies. With unerring aim the French *tirailleurs* drive the Russians from their guns—thanks to the Minié rifle.

We may turn from the Crimean battle field to the fortress of Vincennes. Passing under the heavy gateways guarded by the celebrated Chasseurs (named after the building) we enter the citadel. Without pausing long to notice the pyramids of cannon-balls, to examine the hundreds of thousands of muskets in the arsenal, to remark the marble France weeping over the bones of the Duke d'Enghien, we turn to a long line of plain buildings on the right, where the *chef du tir* resides. Here, quietly doing his work, unnoticed, teaching literally "the young idea how to shoot," and in his leisure time shut up in his little workshop, lives the *chef d'escadron*, Minié. For fourteen years he has been at Vincennes; and under his eye those terrible regiments which are now the glory of the French army have been drilled. He began life as a private soldier, having volunteered at an early age. By degrees, under the frown of power often, he has passed the various grades which lie between the private and the *chef d'escadron*. His inventions have, however, brought him his share of mockery, but not half his proper share of honours. Under Louis Philippe, when the tricolor bade fair to become a pudding-cloth or at best a pocket handkerchief for the convenience of an *agent de change*, and when the sentimental felt a strong inclination to turn bayonets into ploughshares, Minié could not hope to find encouragement in high quarters. He began his career by learning, with a passionate love of his one idea, all that had been done before him in the matter of arms. He made many, many failures before he achieved a single success. He had to bear up against an Artillery Committee composed of Generals who hated changes and probably enjoyed a notion that it was contrary to the Articles of War for a subaltern to exhibit a genius above that of his superior officer. His war with the lovers of routine grew hot; at last, it reached a climax, and the inventor of the Minié rifle heard that his dismissal from the service of his country had been actually signed. At this critical period of his history M. Minié enjoyed the protection of a man now cast from power, but who was then a Prince of the reigning house, and, I believe, resident at Vincennes. I allude to the Duke of Montpensier. To the influence of this Prince M. Minié owed the withdrawal of his degradation; and at the present time it becomes a duty doubly onerous to acknowledge heartily such a service. This incident does infinite honour to Louis Philippe's youngest son.

M. MINIE, INVENTOR OF "THE MINIE RIFLE."

Assured of his position, M. Minié now resumed his studies. Established in the fortress of Vincennes, he gave up his time to the shooting gallery and the experiments he loved to make in arms. It was not, however, till the year 1848 that he disclosed improvements of an important nature. From that time up to the present, the improvements he had then effected in rifle, the conical ball, the Minié cartridge, &c., have successively engaged the attention of all inquiring military men. The value of his practical ingenuity was soon appreciated abroad. Offers, some of them very tempting, reached the commandant at Vincennes. Speculators were ready to assure him fortune; agents were willing to give him tempting terms. He declined every offer. Among the tempters were Russian agents, who offered him the rank of Lieut.-Colonel, an establishment, &c., to live in, and a good salary, if he would proceed to St. Petersburg. This offer was made to him two years successively; and to the honour of M. Minié it should be added that he firmly declined the bargain on both occasions. He declared that he was a soldier and a Frenchman; that he was not a commercial man who followed out his experiments for the sole purpose of realising so much money, but that it was his intention to offer any improvements he might make in arms to his Sovereign. It was his belief that his inventions belonged, by right, to the head of the State.

The Portrait which accompanies this sketch was taken a few days ago in M. Minié's atelier, where he was surrounded by all kinds of unfinished arms, heaps of bullets and bullet-moulds, tools of all kinds, &c. Of the engines of war likely to issue shortly from this atelier, I am, of course, not permitted to speak at length. If his adopted rifle be regarded, however, as a wonderful arm, what will be said of the terrible instrument he is about to present to the Emperor? Holding it in his hand, he pointed to its mechanism, and assured me that he had fired twenty rounds of ball-cartridge with it, in the course of a single minute. He also showed me the wonderful series of balls he had tried; they are of every form and weight, conical, circular, with grooves, &c. The ball with which the Imperial Guard is provided is about the size, and closely resembles the form, of a filbert. He proved the excellence of another (not yet made known), calculated to offer the least possible resistance to the air. The force of the breath through a tube sufficed to lodge it in the wall of the room.

It is just to add that France has treated Minié as France treats every man who serves her. The inventor carried one of his rifles to the Emperor; the Emperor's verdict on the weapon was expressed by a twenty-thousand franc note. There was a discussion on the arming of the Imperial Guard; and the Emperor sent for the man whose studies best enabled him to give sound advice. Minié went to the Tuileries. He gave his reasons for the adoption of his own arm. These reasons were found to be good; whereupon the order for his rifles was at once issued. There was no filtering of powers through endless offices; no delays of artillery committees. The accompanying Portrait will show that the inventor of the rifle now in course of adoption in the armies of Europe has been included in the Legion of Honour. The great Stephenson went to his grave an unrecognised man. Minié lives to enjoy the reward of his services—a reward which his country is proud to give him.

B. J.

THE COST OF THE GUARDS. What has been the cost to the country of the men of the brigade of Guards who died in their tents or in hospital of exhaustion, overwork, and deficient or improper nutriment? The brigade musters now very little over 400 men fit for duty. It would have been *cheap* to have fed those men who are gone on turtle and venison, if it could have kept them alive—and not only those, but the poor fellows whom the battle spared, but whom disease has taken from us out of every regiment in the expedition. It is the *men* who are to be pitied—the officers can take care of themselves. they have their bat-horses to go over to Kamiesch and to Balaclava for luxuries; their servants to send for poultry, vegetables, wines, preserved meats, sheep, and all the luxuries of the sutlers' shops; they have abundance of money, for the pay of the subaltern is ample what he is in the field. An artillery officer the other day told me he was quite disgusted with the grumbling of some men, and the spirit of discontent which existed. "I dine as well every day," said he, "as I could dine in the Palais Royal. I send my servant over to Kamiesch, where things are far cheaper than at Balaclava. I get excellent wine, meat, game, and vegetables there, and my servant, who is a Frenchman, is a first-rate cook." No wonder he could see no reason for grumbling. A few days with Bombardier Smith might have taught him that all did not fare as luxuriously as himself. He expended a man and horse per diem in maintaining his belly in a comfortable state, and of course he looked at everything through the medium of a good dinner and easy digestion, especially as he belonged to a corps which has been fortunate in being able to use the public horses to get up their huts and to provide themselves with food and forage. Generally the officers, at some expense, cater very well, and what is the result? How many deaths do we see among the officers from "gelatic, diarrhœa, scurvy, dysentery," and all the horrid army of diseases which attack and destroy the common soldier! Take them *pro rata*, and the difference is seen at once; and yet the officer undergoes the inclemency of the weather the same as his men. Many of them do not waste all their substance on themselves. Many a generous fellow lays out his last shilling to buy some little comfort for his company, or to soothe the sufferings of his sick men in hospital. As may be expected, considering their presumed wealth and command of money, the officers of the Guards have been distinguished for their kindness to their men, and for the care they have taken of them. The consciences of all these good men will reward them, and they would blush to see their names blazoned to the world. It is strange to see the pride which the best of our aristocracy and autocracy take in catering. They have an ostentatious pleasure in surrounding themselves with strings of onions and cantering off to the Camp with a live sheep tied round their waists, and a couple of plaintive turkeys or sulky geese pendent from their saddle-bows, and holsters filled with pistols of cognac, and their energy in "boarding" vessels as they arrive is startling. However, it is for their messmates and their friends they take all this trouble, and no man ever goes hungry or thirsty away from the tent of a British officer. *Letter from the Camp, Feb.* 10.

THE WAR IN THE CRIMEA.

THE NAVAL BRIGADE DRAWING SIEGE-GUNS.

IN the several accounts of the siege operations from time to time we read of the Naval Brigade drawing siege-guns down into the trenches; for the accompanying Sketch we have to thank a Correspondent from "the heights above Sebastopol." This arduous duty is thus described. "Every morning the sailors drag down about three or four 24 and 32 pounders, and leave them behind a hill about half-way down, and at dusk they take them the remaining half under cover of the night. It generally requires about sixty men for each gun."

THE NAVAL BRIGADE DRAGGING A HEAVY SIEGE-GUN TO THE GREEN-HILL (CHAPMAN'S) BATTERY.

THE ILLUSTRATED LONDON NEWS.

No. 731.—VOL. XXVI.] SATURDAY, MARCH 10, 1855. [WITH A SUPPLEMENT, SIXPENCE.

DEATH OF THE EMPEROR NICHOLAS.

THE Czar Nicholas has gone to his account. The disturber of the nations is at rest. The absolute lord and master of sixty millions of human beings—the inheritor of the largest empire on the globe—the man whose will was law; upon whose lips hung the issues of destiny; who, but yesterday, convulsed Europe, and troubled Asia, and brought into collision the forces of Barbarism and Civilisation;—the scourge of the world the pest of humanity—the most selfish, the most cunning, the most majestic of despots, has been suddenly stricken down, in the plenitude of his power and splendour. He whose vast ambition threw a shadow of portentous darkness over the globe has been removed, and there is sunshine among the nations within the whole circle of his influence. The world feels that an evil thing has been taken out of its way, and hopes that his like may never again arise to trouble and perplex it. Few, indeed, imagined that this great Potentate would so soon have followed to the grave the countless victims of his ambition; and that the murdered Turks of Sinope the brave British and French soldiers who fell resisting his oppression, and his own 20,000 miserable serfs who perished but yesterday in the snows of Simpheropol, would so speedily find a companion in that insatiable tomb which spares neither the high nor the lowly, and stand on an equality with their destroyer before the judgment-seat of God. On an equality? Perhaps not. The greater the power, the more condign the punishment of him who abuses it. But on such a point we forbear to dwell. The curtain of the grave is between the Czar Nicholas and all living men, and it is not for them to mete out his punishment. His memory alone remains for their verdict. Pity for the sake of one so mighty but now so small and mean, must not blind their eyes to the wickedness he committed. The moralist must condemn his conduct while he deplores his fate; and must judge the actions of the dead for the sake of the living, and for the example and the warning of posterity. There has been too much of false sympathy for the dead and of spurious philosophy in the judgment of their actions. Why should the living forego their just indignation because he who deserved it is in the grave? If Nicholas was a curse to the world while he moved and breathed upon it, it is neither unjust nor ungenerous to remember the fact while the results of his wickedness are still active and fruitful. He has been the cause of more misery and evil than any man of his day; and woe betide the world if it forget such actions as he committed, or cease to disapprove of such sanguinary and remorseless ambition as that of which he was guilty.

It is not easy to describe the awe, not unmingled with a feeling of satisfaction and relief, which pervaded all ranks and classes of society when the authentic intelligence was first received in London. A sensation as profound was created in every other capital in Europe; in every household, and in every haunt and assemblage of men. The proudest and the meanest humbled themselves in spirit before the Great Disposer of Events; and many thousands, if not millions of people, regarded the catastrophe as a direct interposition of Heaven to rescue the nations from the oppression and wrong which the continued life of the despot seemed but too likely to inflict upon them. The impression will not be soon effaced. Even in the extraordinary times in which the lot of this generation has been cast, when great events succeed each other with such marvellous rapidity, and in such unexpected combinations—the downfal of Nicholas will long stand pre-eminent in the imagination of the people. The awful lesson goes direct to the heart of the multitude. Not even a visible sign and portent in the sky, or an audible voice from the heavens, proclaiming the vanity and littleness of all earthly things—if such revelations of the Divine will were vouchsafed in our day—could have spoken more solemnly to the reason and the conscience of mankind. As a moral lesson, this age has seen nothing which can equal it. Belshazzar has gone, and none but the sons and daughters of Belshazzar have a tear for his fate, or would recall him from the tomb, where the wicked cease from troubling; and where he—both weary and wicked—lies at rest.

THE LATE EMPEROR OF RUSSIA.—(SEE SUPPLEMENT, PAGE

The first impression on almost every mind was that the Czar had been poisoned or strangled. Such catastrophes are familiar things in Russian history, and they are the natural results of an ultra-despotism. If the tyrant had not the spectral fear of assassination present in his thoughts by day and in his dreams by night, the great law of compensation would cease to be universal. There would be nothing to temper his evil passions no check upon his caprice—no limit to his self-indulgence—no inevitable Nemesis to avenge the wrongs he might commit, and teach him that he, too, was but flesh and blood, and frail as the meanest and most abject of his victims. So probable did such a termination of the Czar's career appear to his own household, that it is known to have embittered the life of the Empress, and has been openly predicted hundreds of times within the last twelvemonth as certain to follow the first great discomfiture of his arms. Yet circumstances would seem to show that the death was natural, and that it was mainly produced by mental agony consequent upon baffled hopes and defeated projects. But in this case "the balances of Heaven are just." The Avenging Angel treads in the footsteps of guilt. The misdeed carries its punishment in its own bosom. No man, not even a King, can fly from him-

self, and avoid the consequences of his transgressions. It is neither physically safe nor mentally wholesome to possess unlimited power. To be the uncontrolled master of the lives of millions—to be the foremost man of all the earth—to hold in one's hand the destiny of the present, and, perhaps, of a future generation to rank as a god or a demi-god in the estimation of myriads of obsequious slaves and superstitious barbarians—to be surrounded with sycophants and flatterers, with panders and with parasites, is perilous to the soul and the body of the strongest and the wisest of men. The fine mechanism of the nerves and brain cannot endure such stress and strain. By jealousy, and suspicion, by daily and hourly caution, by coat of mail, by armed guards, by tasters of his meat and of his drink, by a life of misery and anxiety, the tyrant may foil the assassin; but the very fierceness of the combat evokes a new and more insidious enemy. In the heart and in the brain lurks the demon of disease or madness—slowly and imperceptibly at work on those delicate tissues which guard the reason and the life. We may imagine the pangs which that proud spirit endured during the last six months, when his character, long before damaged to the outer world, was imperilled among his own people; when his armies were defeated, not only by the bravery of two great and powerful allies, but by the Turks, whom he despised; when his territory was desecrated by invasion, his fleets rende red useless, his maritime commerce annihilated, his dependants shaken in their allegiance, his friends converted into foes, and his foes rendered strong by combination and enthusiasm. It is not wonderful that nature should give way in so unequal a struggle.

The question is asked in every resort of men—what are the consequences which are likely to flow from this unexpected catastrophe? The new Czar, Alexander II., who has succeeded peacefully to his father's throne, is believed to be a man of moderate views and enlightened character. But his proclamation on assuming power is warlike in the extreme. He asserts Poland and Finland to be inseparably united with Russia; thereby defying the Allies to restore the independe nce of the one, or re-establish the connection of the other with the Power to which it rightfully belongs. He also declares his policy to be that of Peter, of Catherine, of Alexander, and of Nich olas; in other words, the policy of war, of aggression, and of conquest. The Grand Duke Alexander may have been wise and just; but the Czar is the Czar. As such he is the representative of a system, the heir of a policy as well as of a principle, the custodian of a nation's prejudices, passions, ambitions, and hopes; and part of agrand machine with which he must work, or be crushed beneath its wheels. It is natural that the Emperors and people of Russia should strive to extend their frontiers to the sea; it is quite as natural and more just that the other States of Europe should strive to prevent the realisation of the project. Between Russia and the rest of Europe there is necessary and inevitable hostility. Russia will never lose sight of her object. She pursues it in peace no less vigorously, and perhaps more successfully, than in war. Patient, perfidious, and persevering, the great object is never absent from the mind and councils of her Czars;—and Europe has not, and cannot have, any real security against their aggression, other than the security which can be exacted at the cannon's mouth. Had the proclamation of the new Czar been more pacific, the policy of the Allies ought to have been exactly the same as it must now be, when he has sounded the war-trumpet, and defied the world by hurling in its face the significant names of such Sovereigns as Peter and Catherine the Great. Europe thus knows what it has to expect. To the fears, and not to the sense of justice, of the Czars must the appeal be made. Treaties do not bind them; considerations of honour and humanity have no place in their councils. Whenever the moment arrives, when a portion of Turkish or any other territory can be stolen or conquered they are prepared to strike. We believe, for many reasons, that the death of the late Czar is a calamity; and that the unwise politicians and Sovereigns of Germany—aided, perhaps, by the timid, the ignorant, and the selfish nearer home—may endeavour, in consequence to bring the present war to a premature conclusion, by patching up a precarious and dishonourable peace. But even Manchester itself, as well as Vienna and Berlin, may be assured that a peace hastily made, without a "material guarantee"—without the capture of Sebastopol and without the payment by Russia of the whole expenses of the present war, would be a peace that would not last a moment beyond the time when it might suit the whim or the policy of Russia to break it. So far from believing "that nothing is changed," by the death of Nicholas, we believe that the position of Europe has been rendered still more perilous by that event. There is only one contingency that would improve it, and that is the absolute and unconditional surrender of the new Emperor. Unless—and until—that event happens, the policy of the Allies should be WAR with redoubled energy; WAR in the Baltic and in the Black Sea—WAR on every side of the Russian dominions.

COPIES OF PICTURES.—An application of a novel nature was made by Mr. Darvill, solicitor, at Marlborough-street Police-court on Monday. In 1851 Mr. Ward, the well-known artist, painted a picture known as "James the Second Receiving the Intelligence of the Landing of the Prince of Orange." The painting was purchased by Mr. Jacob Bell, of Langham-place, who gave Mr. Ward the usual permission to make an artist's copy. This copy was subsequently sold to Messrs. Melton and Clarke, picture-dealers, who again sold it to a person named Pinkall, residing near Preston. Some short time ago, Mr. Ward was informed that a picture was in the market which he was asserted to have painted. Mr. Ward made inquiry, and ascertained that the picture was a copy of the artist's copy of the "James the Second" painting sold to Messrs. Melton and Clarke. A copy, therefore, of the artist's copy had been made by an inferior artist, and an attempt was made to palm it off as an original, whereby an injury was inflicted on Mr. Ward's artistic reputation, and a fraud committed on the purchaser. Now, as Mr. Ward was unable to tell how far this manufacture had proceeded, and how many spurious works were in existence, he had instructed his (Mr. Darvill) to come to that Court, and to detail the facts, in the hope that some way would be pointed out by which Mr. Ward would be protected from this kind of injury and injustice. The public, also, ought to be put on their guard against the system of spurious copies, as, if he was correctly instructed, many other cases of spurious paintings foisted on the public as original were likely to come to light. He was not sure that it would not be necessary, owing to the defective state of the law, to seek the aid of Parliament for an enactment that should provide means to check and punish fraud; possibly that end might be attained by declaring that original paintings should be taken to some public body—the Society of Arts, for instance—and be then stamped and authenticated in such a way as to give force and validity to the genuineness of the painting. Mr. Hardwick admitted that, as the law stood, it was a serious matter to artists. An inferior copy sold as an original was certainly calculated to damage the reputation of the most eminent artist. Mr. Darvill thanked the magistrate for his attention. He hoped, however, that an exposure of the frauds on artists by the public press would put the public on its guard, and at the same time afford some protection to artists.

Statistical returns prove that Paris is the place where the greatest number of imprisonments for debt take place; there are as many in the capital alone as throughout the whole of France

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

Every particle of public attention is, of course, so engrossed by the intelligence of the death of the Emperor Nicholas, and the speculations that arise therefrom—the results, probable and possible—the influences and the interests connected with, and likely to be acted upon by, the new state of things—that there is little or nothing else attended to, or considered worthy of interest. The prevalent idea that unfair means had been resorted to to produce this result seems entirely to have given way before the details published of the last hours of the Autocrat. The presumptuous —leaning partly on the present changed position of affairs, partly on the more tranquil, reasonable, and pacific character of the new Emperor—are here all for peace; but of course everything must, as yet, be mere speculation.

The projected expedition of the Emperor and Empress remains wholly in abeyance, until further particulars of the progress of events ar known; much to the regret of the latter, who has all along earnestly desired the voyage, and has been with much interest engaged in superintending the arrangement of her wardrobe and other preparations—including a variety of purchases destined for presents—for the journey. It appears that the ladies designed to accompany her Majesty were directed to include in their travelling baggage a certain number of ball-dresses. What an astonishment for the natives of Constantinople! what an occasion for enlarging the views of the harem on the subject of feminine attire!

The absurd rumour which attributed to M. Emile de Girardin the authorship of the *brochure* lately published in Belgium on the subject of the conduct of the War in the East, and the Crimea, and signed "Un Officier Général," had gained such force—notwithstanding its evident falsity that for nearly a week the door of the eminent *publiciste* was besieged by persons crowding to inquire as to the truth of the report which resulted from it—whether he had not exchanged his domicile in the Champs Elysées for a less commodious one within the walls of a State prison. In consequence of the importance attached to both rumours, M. de Girardin found it necessary to publish in the *Presse* a formal denial of a statement which, at its first circulation, he considered as unworthy of attention.

The ranks of the Legitimist party have just lost one of their oldest, and personally firmest adherents, the Duc de Grammont, who, after an illness of many years' standing, expired almost suddenly and without a struggle, at his residence in the Rue de la Ville l'Evêque, on Saturday night. The Duc de Grammont was one of the best specimens of a class now nearly extinct in France as a personal type. Possessed of one of the proudest names that belonged to the list of the *ancienne noblesse*, great beauty, singular grace and distinction of manner, and instinct with the most chivalric ideas of right and honour, he sacrificed fortune, condition, ease—all that most men prize so highly—to follow, with his family, into exile a Sovereign who felt or, at all events, showed little sense of the extent of the devotion. The Duc de Grammont—who, in consequence of the well-known and constantly-avowed principle of his family, found in his early youth no honourable opening of a career in his native country was principally educated in England; to which country his sympathies were so warmly bound, that he entered the British Army, attained the grade of Captain in the 7th or 10th Hussars, and served with distinction through all the Peninsular War. At the downfal of the Bourbons, the Duc de Grammont entirely retired from all participation in the events or politics of the day. Upwards of ten years since, he was seized with the distressing and complicated malady which gave him neither rest nor respite during its continuance, weekly threatened to terminate his existence, and finally brought him to the grave. The Duc de Grammont married the beautiful and only sister of the Comte d'Orsay, then but sixteen, and leaves three sons—the present Duc, now Minister at Turin; and two daughters—the elder married to the Marquis du Prat, the representative of another of the ancient noble families of France.

Last week took place, at the Malmaison, the marriage of young Prince Czartorisky with the eldest daughter of the Queen Christina—the same who, last year, was on the point of a union with the Duc de Casigliano, whose untimely death interrupted the realisation of the project. The bridal ceremony took place, with considerable éclat, in the Chapel of the Malmaison, and was performed by the Cardinal Donnet. On the following day was given a splendid reception at the residence of the Prince Czartorisky, at which were present the bride and bridegroom the former blazing with diamonds.

Madame George Sand, whose declining health requires a complete change of air and scene, is about to make a voyage into Italy, it is reported with the intention of finding materials for a new work; but, whatever may be her ultimate design in this respect, the restoration of her health is the present object of the expedition.

A recent book sale of considerable interest has attracted much attention from the reading public: this is the collection of Pierre Didot, the celebrated *typographe*; among which were found a number of the most valuable and curious books which have been out of print for years, and unattainable in the trade. A copy of the "Roman de la Rose" sold for 2448 francs; the finest edition existing of Racine, for 15,778 francs; a Virgil and Horace, for 8628 francs; and a variety of other books at proportional prices. The sale altogether brought nearly 70,000 francs.

Great complaints are made by the Paris merchants of the insufficiency of the extent of the Palais d'Industrie, which, in order to give due hospitality to the foreign exhibitors, leaves so little space for the home produce, that some branches of French commerce find themselves wholly excluded. Upwards of 6000 demands from persons wishing to exhibit have, perforce, been refused by the Commission; and it is said some of the excluded propose to address a petition to the Emperor in hopes that some means may be found to remedy this state of things.

The theatres give little of interest. At the Français appeared on Tuesday the first representation of a pretty and *spirituelle* one-act piece by Méry, "L'Essai du Mariage." The plot is slight and impossible; but the writing, like everything of its author, sparkling with wit, brilliancy, and finesse, and the rôle of the heroine is gracefully and intelligently per formed by Mdlle. Denain. Concerts, of all degrees of excellence and mediocrity, abound, as they are wont, at this season. Nadaud has just composed a charming opéra-comique, words and music, called "La Volière:" it has been performed in private only.

MINISTERIAL CRISIS IN BELGIUM.

At the commencement of the sitting of the Belgian Chamber of Representatives on Friday, the 2nd inst., M. de Brouckère, Minister of Foreign Affairs, rose and said:—"Several recent votes of this House have decided the Minister of the Interior to withdraw from the Cabinet. Another Minister at the same time declared that his personal situation would not permit him to continue longer in the Government, and he also tendered his resignation. In presence of this double withdrawal, the other members of the Cabinet, not wishing to separate from their two colleagues, who possess all their confidence and sympathy, considered it their duty to place their resignation in the King's hands." After some conversation as to whether the Chamber should continue its sitting or not, the question was decided in the negative, and the Chamber adjourned indefinitely in the midst of considerable agitation. The principal reason of the resignation is that the Chamber voted against the Administration of the Interior on various questions, and especially on that relative to the University Jury. The *Indépendance* of Brussels of Wednesday says:—"We are assured that M. Delfosse, President of the Chamber of Representatives, who is at present at Liège, has been summoned to Brussels, and is to be received this day by the King."

THE WAR IN THE CRIMEA.

Another reverse in the weather—just about the time that people at home were suffering from extreme cold—had rather hindered active operations before Sebastopol; so that the latest authentic intelligence, which comes down to the 24th ult., brings no information of much importance. The accounts, however, still continue highly encouraging. The troops were in excellent spirits, and sickness was decreasing. Fresh reinforcements were pouring in daily, and the physical necessities of the army were duly supplied. That the Allied Generals are impressed with the necessity of pushing the campaign with vigour, is proved by the embarkation of every available man at Constantinople, by the assault in question, and by the activity displayed along the British lines at Balaclava.

During the night of the 23rd of February the second corps of the French army assulted the works of counter-approach in course of construction by the enemy, and carried them, but not without sustaining a serious loss. This auspicious commencement will, no doubt, encourage fresh nocturnal attacks, which may even be directed with success against the Russian redoubts. The advantage possessed by a cool and determined assailant in similar assaults is immense, as was demonstrated even in the weak and ill-directed sorties of the Russian garrison of Sebastopol on the Allied lines.

A despatch from Vice-Admiral Bruat, dated Kamiesch, Feb. 24th, gives the following account of the affair:—

In the night of the 22nd the garrisons of Sebastopol established important works of counter-approach in front of our works, on the slope of the plateau which descends towards the small careening bay. General Canrobert caused these works to be carried on the night of the 23th, by the troops of the second corps. This affair has done the greatest credit to our army, and if possible augmented the ascendancy which it has never ceased to hold over the enemy. Our loss is said to amount to 100 wounded.

The works referred to in this despatch are in another described as having been constructed near the Malakoff tower. Prince Menschikoff, in reporting on the French attack, says that it was mainly directed against a redoubt which his troops had built, and that the assailants were repulsed with a loss of 600 men.

A reconnaissance, attempted by Sir Colin Campbell, on the morning of the 19th ult., proved unsuccessful on account of a severe snow storm.

The troops which turned out on our side consisted of nearly all the available men of the Cavalry Division, under General Scarlett, the remains of the Heavy Brigade numbering about 350, and consisting of Royals, Scots Greys, Inniskillings, 4th Dragoon Guards, and 5th Dragoon Guards; of the Light Cavalry Brigade, under Colonel Doherty, mustering just sixty-eight men, being the fragments of the 4th Light Dragoons, the 8th Royal Irish Hussars, the 11th Hussars, the 13th Light Dragoons, and the 17th Lancers, one troop Royal Horse Artillery, and one nine-pounder battery of the Royal Marines over the heights; a portion of the 2nd Battalion Rifle Brigade, under Major Macdonnell; and of the 42nd, 79th, 71st, and 93rd Highlanders. They were also accompanied by the Zouaves on the heights. These troops were under arms soon after midnight, and ere four o'clock they were moved down towards the plain, and proceeded towards Kamara and Tchorgunn through the snow-storm, which increased in violence and severity as the morning dawned, and protracted the darkness of night. The Rifles preceded the advance, with the Highland Light Infantry, in skirmishing order. Strict orders were given that there was to be no firing in case the troops came upon the enemy, and it was hoped that we might surprise them, but the density of the falling snow prevented our seeing them even more than a few yards, and after daylight it was impossible to make out an object six feet in advance. However, the skirmishers managed to get hold of three Russian sentries, belonging probably to the picket at Kamara, and their comrades gave the alarm, for as our troops advanced the Cossacks and infantry videttes fell back, firing their carbines and muskets into the darkness. The drums of the enemy were heard beating, and they had time to turn out while we were making our way towards them. Through rifts in the veil of snow their columns could be observed slowly moving back towards the heights over the Tchernays, and it was quite impossible to form a notion of their strength or position, but it is thought they mustered about 5000 men. By their movements it was as if they had large reserves in their rear. By this time our men had began to suffer greatly from the cold, to which they had been exposed for several hours. Their fingers were so cold that they could not "fix bayonets" when the word was given, and could scarcely keep their rifles in their hands. The cavalry horses refused to face the snow—frost-bites began to occur, and men's ears, noses, and fingers gave symptoms of being attacked. The Highlanders, who had been ordered to take off their comfortable fur caps, and to put on their becoming but less suitable Scotch bonnets, suffered especially, and some of them were severely frost-bitten in the ears—indeed, there was not a regiment out in which cases of gelatio, chiefly of the ears and fingers, did not occur. Scarcely had the enemy appeared in sight before the snow fell more heavily than ever, and hid them from our view. The French were not visible—one company could not see its neighbour—each regiment was hidden from the other. The men were becoming momentarily less able to advance. The order was no reserves to fall back on in case of a check. The ground between Tchorgunn and our lines was considerable, and the strength of the enemy was unknown. Under these circumstances it would have been exceedingly unwise to proceed with the reconnaissance. The attempt had been defeated by the weather; it was a *coup manqué*, and the best thing that could be done was to retire as soon as possible. Sir Colin very unwillingly gave the order to return, and the men arrived at their quarters at eleven o'clock a.m. very much fatigued and exhausted by the cold, with no other result than the capture of three prisoners and the exchange of some random volleys, in which no mischief to us was occasioned by the Russians, or in all probability to them by us. The enemy were, however, put on the alert, and must have spent a very unpleasant day and night afterwards. Had the movement succeeded the greater part of their force might have fallen into our hands.

The defence of Eupatoria in the affair of the 18th has restored the Turks to something of their former reputation. It seems to have been a most gallant affair, and the Ottoman troops deserve great credit for the coolness with which they received the assault, and the energy with which they repulsed it. From a letter written on the spot it appears that the Russian force was 30,000 strong, with from 70 to 100 guns, and five thousand of cavalry. It appears to have been that of Liprandi, and thus the Turks have created a diversion, which has delivered Balaclava from the danger by which it has been so long threatened. The storming force of the Russians consisted of two fine regiments, who came up with great spirit. The Turks lay down until the enemy were quite close, and then jumped up and poured in a murderous volley, which threw the Russians into confusion. The gun-boats assisted most actively, the long Lancasters throwing balls to a distance of nearly two miles into the enemy's columns

The loss of the Russians is much greater than was at first stated; no less than 453 bodies were found on the field, and many are said to have been removed. The Turks are to be joined by an adequate French force, which they will march southward and intrench themselves on the north of Sebastopol, so as to prevent the introduction of those supplies, the failure of which gives the best hope of a speedy surrender of the fortress. Even should they remain inactive they will render much service in employing a large force to watch them. Eupatoria is not far distant from the great road along which all the troops and supplies of the enemy must be brought. It will be necessary for the Russian Generals always to keep a large body of men in that neighbourhood, in order that their communications may not be intercepted. The recent attack on the place shows how greatly the enemy feels the danger of such a force in the rear, and it is singular that the Muscovite Generals should have allowed the Ottoman troops to establish themselves in such force before striking a blow.

The blockade of the Russian ports in the Black Sea has been notified by the Admirals. Odessa is blockaded by the French steamer *Mogador* and the British frigate *Gladiator*; Anapa, Soujouk Kalé, Kertsch, and Kaffa are watched by the *Leopard* and *Berthollet*.

THE VIENNA NEGOTIATIONS.

The negotiations have begun at last. Lord John Russell arrived at Vienna on Sunday evening, and the first conference of the Ambassadors took place on Tuesday. The subject discussed is said to have been the precise meaning of "the third of the guarantee points." As regards the result of their discussion the telegraph is silent. The discussions and the resolutions which may now be taken will determine whether we are to regard the young Emperor of Russia as the antagonist of Europe, the assailant of the Ottoman Empire, and the disturber of the public peace, isolated from almost every other State, and unsupported by a single declared ally; or whether the Cabinet of St. Petersburg will seize this opportunity to bury its hostilities in the tomb which is not yet closed, and to renew on equitable terms those pacific relations with the rest of Europe without which no empire can be prosperous or secure

The *German Journal of Frankfort* has a letter from Vienna, which states that Lord John Russell and M. de Bourqueney have agreed upon an identic memorandum to be submitted to the Vienna Conference on the part of England and France. The interpretation of the third point is indicated as distinctly including the transformation of Sebastopol into a simple commercial port—the fortresses thereof being destroyed. The proceedings of the conference are to be circumscribed within fifteen days; within which period the Russian Envoy must give in his reply to the proposition of the Allies.

ILLNESS AND DEATH OF THE CZAR.

Although the death of the Emperor of Russia has taken the public by surprise, it is now said that his own family were quite aware of his health having been in a critical state for some time. Letters from St. Petersburg of the 19th ult. state that the Emperor then kept his bed by order of his first physician, M. Mandt. The Empress was also ill, and confined to her bed; and, as the apartments occupied by the Emperor and Empress are situated on the ground floor and the other on the first floor of the Palace, they had no direct communication, and did not see each other. The Emperor, however, must have called the Empress to him, as it appears from one of the bulletins that before his death he had assembled round him all the members of his family present at St. Petersburg, in order to give them his blessing. It is said that the illness of the Emperor was owing to a cold. Notwithstanding the severity of the weather, he continued his usual occupations; he was desirous to see everything for himself, and in the most minute details. He visited the soldiers in their barracks; he passed long and frequent reviews, forgetting the precautions which his age required in such a climate and in such a severe season. To all the observations made to him by his children and by his most devoted servants he replied that he had something else to do besides taking care of his health. He had, however, attended to it for more than a year past, and at times felt some uneasiness. He said that he had reached, and even exceeded, the number of years which God had allowed to others of his race, and that his end was not far distant. He had treated himself according to his own ideas; he had insisted on his physician putting him on a regimen which would prevent his getting corpulent, of which he had a singular dread.

On the 27th ult., the Imperial physician in attendance, seeing that his Majesty was suffering severely from influenza, earnestly begged him not to expose himself to the cold air on parade, with the thermometer at 12 deg. below zero. To which the Emperor replied: "My dear doctor, you have done your duty; now I will do mine;" and then, calling for his cloak, he proceeded to parade, and remained above an hour.

A bulletin, dated shortly after the catastrophe, announced that the Emperor Nicholas I expired, after a short struggle, at ten minutes after midday, March 2. A short time before his death he desired the Empress to announce to his Royal brother-in-law of Prussia that he (the Emperor) "bequeathed to his friendly solicitude his family and the Russian people, and bade him not forget their late father's will." This message, received by telegraph at Berlin, was instantly replied to, it is added, by assurances in the same sense

Immediately after the receipt of the news at Berlin of the Emperor's death the King commissioned the Prince of Prussia to set off at once to St. Petersburg, to express the condolence of the Royal Family with the Empress, and to be present at the Emperor's funeral. The Prince's travelling equipages were accordingly immediately got ready, but his physician advised so strongly against the journey in the Prince's present state of health, that the king found it better to commission Prince Charles to go instead. He accordingly left on Sunday morning, accompanied by his sister, the Grand Duchess Alexandrine of Mecklenburg-Schwerin. The Crown Prince of Wurtemburg and the Grand Duchess Olga arrived at Berlin on Saturday afternoon, and were met by their Majesties, and conducted to the Russian Legation, whence they continued their route to St. Petersburg that night. Duke George of Strelitz and the Grand Duchess Catherina proceeded direct from New Strelitz, viâ Stettin. It is understood that the Grand Dukes Nicholas and Michael were ordered back to St. Petersburg as soon as their father's malady assumed a serious aspect

THE NEW EMPEROR, ALEXANDER II.

On Friday afternoon, a few hours after the death of his father, the Czarowitch proclaimed his assumption of the throne under the name of Alexander II. Nicolaiewitch, and received the homage of the dignitaries of the realm. The whole garrison was to perform the same ceremony on the 3rd. On the 2nd, Count Panin, the Minister of Justice, put seals upon the private cabinet of the late Emperor, in presence of the heir. The Empress, though much affected by the death of her husband, is said to have been better than might have been expected after the shock she had received

A despatch from Königsberg, dated the 7th inst., gives the following summary of the manifesto of the new Emperor of Russia:

The manifesto of Alexander II. has arrived. After announcing the sudden and severe illness of the Emperor Nicholas, which terminated in his death, it says that, as the deceased devoted himself incessantly for the welfare of his subjects, "so do we also, on ascending the throne of Russia, and of Poland the throne of Finland, inseparable from it, take a solemn oath before God to regard the welfare of our Empire as our only object. May Providence, which has selected us for so high a calling, be our guide and protector, that we may maintain Russia on the highest standard of power and glory, and in our person accomplish the incessant wishes and views of Peter, of Catherine, of Alexander, and of our father. May the zeal of our subjects assist us therein. We invoke and command the oath of allegiance to us and to the heir to the throne, our son Nicholas Alexandrowitsch

The accession of a new Czar being in Russia almost always accompanied by some political commotion, fears are entertained that, in the present state of excitement in Russia, the sanguinary scenes which took place when the Emperor Nicholas ascended the Throne may possibly be renewed. The Grand Duke Constantine is likely to become the chief of the party of resistance, represented by the old Muscovite party, against the party of moderation, of which the new Czar has always been considered as the centre of gravitation. The Russian Ambassador at Vienna affirms that there are no grounds for any such fear. According to him the late Emperor was quite aware of the opposite directions to which the Hereditary Grand Duke and Grand Duke Constantine tended. Foreseeing that the might produce, sooner or later, positive conflicts, he took the resolution to make the Grand Duke Constantine take in his presence on the Holy Gospels, an oath of fidelity and obedience to the heir of the Throne. No oath was said to have been taken on the occasion of the birth of the first son of the Hereditary Grand Duke by his marriage with the Princess Mary of Hesse. It is added that when the Czar saw that his end was approaching, he called the two Princes to his bedside, and before giving them his blessing, made the Grand Duke Constantine, in presence of his august mother, renew the oath of fidelity to his elder brother; and he obtained from both of them a solemn promise to remain for ever closely united, in order to save the country, which is threatened by the European coalition.

So far as can be ascertained the young Czar is very popular in Russia, and the general expectation is that he will not exercise the great authority of his father, as he does not inherit either his hauteur or his inflexibility He will rather please, it is said by those who know him, as the Emperor Alexander I. did, by his mildness and his affability, and between the uncle and the nephew there is a very great similarity of character in numerous ways.

The reigning Empress of Russia, Maria Alexandrowna, daughter of the deceased Grand Duke Lewis II., of Hesse-Darmstadt, and born in 1824, is said to be a woman of strong sense and character, of amiable qualities, and possessing much influence over her consort They have five children—four sons and one daughter. The present Czarewitch and eldest son, Nicholas Alexandrowitch, was born in 1843.

AMERICA.

By the steamer *Atlantic*, which arrived at Liverpool on Sunday, we have advices from New York to the 21st ult

The Senate has passed the bill for a railroad from the Mississippi to the Pacific by a vote of 24 to 21.

The President had vetoed the French Spoliation Bill.

The Navy Department had issued orders to New York, New Orleans, and Boston, to keep in a state of readiness certain steam-vessels chartered by Government for demand; it was understood they were to be against a Filibustering expedition to Cuba.

THE FRENCH EMPEROR AT BOULOGNE.

On Friday last the general and superior officers of the troops encamped in the neighbourhood of Boulogne, had the honour of dining with the Emperor, and in the evening his Majesty announced to his guests the death of the Emperor of Russia, which had reached him in two successive despatches—the one forwarded from Stuttgard and the other from the Hague. Shortly afterwards a despatch was received from London, stating that Lord Clarendon would leave on Saturday morning for Boulogne, to have an interview with the Emperor. The orders issued for the visit of his Majesty to the camps of Ambleteuse, Wimereux, and Honvault, were accordingly countermanded. At one o'clock on Saturday an Ostend mail-steamer, placed at the disposal of Lord Clarendon, have in sight of Boulogne, and the Emperor immediately dispatched one of his Aides-de-Camp to receive the English Minister at the entrance of the harbour. Lord Clarendon got into the carriage with the Aide-de-Camp, and alighted at the Hôtel du Pavillon, where the Emperor awaited him. Lord Cowley and M. Drouyn de Lhuys arrived in the afternoon. A long conference took place between the Emperor and Lord Clarendon. The former, accompanied by Lord Cowley and M. Drouyn de Lhuys, left Boulogne on Sunday afternoon, and arrived in Paris at half-past six. The Empress went to the Boulogne railway-station, in the Place Lafayette, to meet his Majesty, and threw herself into his arms as he alighted from the train. Their Majesties then proceeded, without any escort, to the Tuileries, where they arrived about seven o'clock.

DANGEROUS CONSPIRACY IN CUBA.

By the arrival of the steam-ship *Atrato* at Southampton, on Monday, we have intelligence from Cuba of a conspiracy against the Government. On the 7th ult., numerous persons had been arrested at Havannah, charged with the intention of assassinating the Governor-General. Among those taken into custody were—Dr. Ramon Pinto, Dr. Jose Echeverria, Administrator of the Havannah Railroad; and M. Cadalzo, Administrator of the Court of Penalvs. At a meeting of the conspirators, it was proposed to establish the constitution of Spain with the cry of "Long live the Queen," when Pinto objected, and said that "the tree of liberty, to become fruitful, must be watered with blood, and that he would strike the first blow by assassinating the Captain-General in his box at the Opera. On the evening of the arrest of Pinto, he had only a short time before paid a visit to General Concha, by whom he was then, as always, received as an intimate friend. Pinto, it is said, could have had no reason to complain of the Spanish Government, and much less of Concha, as he had always been well treated and assisted, particularly by the latter. Information was given to General Concha from the United States by one of the conspirators who was dissatisfied. It was not believed at first, but soon afterwards the General received information to the same effect from a planter in the island, also one of the party, but who repented having joined it. Information was given that three expeditions would sail from the United States, and arrive on the coasts of Cuba simultaneously with the assassination of General Concha. It was said at Havannah that one part of the American expedition had left Baltimore. Numerous Spanish men-of-war were cruising on and off the coasts for the purpose of intercepting them; and, should they effect a landing, certain death awaits them, as the Government were well prepared to give them a warm reception. Besides the large army and numerous ships of war at Cuba, the Government could count on at least 70,000 or 80,000 men—old Spaniards—the greater part of whom have carried arms in the civil war of Spain, and who, in Cuba, have something to lose, and would fight to the last man.

By the steam-ship *Black Warrior*, which had arrived at New Orleans, when the last American steamer sailed for England, we have Havannah dates to the 15th of February. Great excitement prevailed, and new militia companies were being formed. The whole island had been declared in a state of siege, and a proclamation had been issued ordering the enlistment of all volunteers between the ages of eighteen and fifty who were capable of bearing arms. A military commission had been created for the eastern part of the island. It was reported that General Concha had sent to Porto Rico for more troops; that the British ship of the line *Boscawen* had left Havannah, and that she and the steamer *Medea* were engaged in conveying troops

The British Rear-Admiral reviewed the troops with General Concha on the 12th ult. A decree was being enforced prohibiting the sale of firearms and ammunition. Her Majesty's ships *Sapphire* and *Fatal* were in port. The *Colossus* had left. The British Admiral had been received with great honour.

RIOTS IN AUSTRALIA.

The disturbances of the Ballarat gold diggings, of which we gave a brief notice last week, had not terminated when the last mail left Australia. On Sunday morning (December 3) about four o'clock, the military surrounded the camp formed by the armed diggers at Eureka, in which there were about 500 men. A body of cavalry fired over the heads of the diggers, which had no effect. The troops then poured in repeated volleys, which were returned by the diggers. After firing for about ten minutes the insurgents pulled down their banner—the Southern Cross—and surrendered. The troops captured 120 prisoners, and took several of the leaders prisoners. Altogether 123 prisoners were taken, and about twenty-six killed. A large number of tents in the vicinity of the battle-field were burned. The casualties on the part of the soldiers were:—one private of the 12th, two ditto of the 40th, killed; Captain Wise, dangerously wounded; Lieutenant Paul, severely ditto; about thirty rank and file wounded.

NAVAL AND MILITARY INTELLIGENCE.

It having been ascertained from the returns that the 10th Hussars, now en route for the Crimea from Bombay, can scarcely muster 600 efficient men, including those at the dépôt in Maidstone, orders have been issued to complete the strength to 800 sabres.

Government having agreed to take into service for the East such officers in the United kingdom of the Company's service as are willing to act in command of the Turkish Contingent, the applications have been very numerous—something about 300. The number required for the present—about 120—have been selected from the most intelligent. It is stated that each officer will be allowed fifty-one days' pay in advance.

Active measures are about being taken in reference to the formation of a camp at the Curragh of Kildare. Announcements have been made to the effect that the Commanding Royal Engineer in Ireland will receive proposals for the construction and erection of 430 wooden buildings, to accommodate 12 battalions of infantry, with ten others for staff purposes, and cavalry officers' stables, at the Curragh of Kildare, in the Dublin district. The whole of the buildings are to be completed within 60 days after the acceptance of the tender. It is expected that the work will be completed by the end of May or beginning of June.

Two Lieutenant-Colonels of Royal Marines will, it is expected, be embarked this year for service in the Baltic fleet—one from the Artillery, and one from the Light Infantry branch; with two Captains to attend to the duties of the first-named branch when disembarked for shore operations

The fleet now assembling at Portsmouth is daily becoming of more interest and importance. There appears likely to be a Channel squadron as well as a Baltic fleet, if report may be trusted. Sundry ships have been ordered to refit "for Channel service." Two more arrivals (the *Nile*, 91, and *Euryalus*, 51, from Plymouth) have augmented the force at Spithead, which will now be hourly swelling towards its fully-intended proportions of "one hundred pennants." The *Impérieuse*, 51, also joined the gathering on Saturday. The utmost activity pervades every department of the dockyard. The ships still in hand are the *James Watt*, 91, Captain Elliott; the *Blenheim*, 60, Captain Hall, which will leave the basin this day; the *Hogue*, 60, Captain Ramsay; the *Pembroke*, 60, Captain G. H. Seymour; the *Hastings*, 60, Captain Caffin; the *Edinburgh*, 60, Captain Hewlett; the *Retribution*, 28, Captain Fishor; the *Penelope*, 18, Captain Sir W. Wiseman; the *Centaur*, 6, Captain Clifford; and the *Ironside*, 6, Commander the Hon. F. Egerton. The *Arrogant*, 46, Captain Yelverton, is ready for Spithead.

Colonel R. G. Wilson having retired from the service on promotion, Lieut.-Colonel Mitchell has been appointed to command the Royal Artillery at Shoeburyness, which command Colonel Wilson held since his return from a West India station.

Lieut.-Colonel Dunlop is to proceed to China by the next mail, to relieve Colonel Griffin, in command of Hong-Kong.

The preparations for the encampment at Aldershott-heath, are now being pushed forward vigorously; several hundred labourers are daily employed in forming concrete roads and footways, and forming the foundation of the temporary wooden buildings. The ground is to be ready for the troops about the 20th inst.

Restoration of Poland.—A very crowded meeting was held at the Manchester Town-hall on Monday evening, to consider the importance of the kingdom of Poland as an independent State in her relations to Europe. Mr. William Martin presided. Mr. J. Aspinall Turner briefly moved a resolution expressive of sympathy with the Polish nation, and the desire of the meeting that it should be reconstituted as an independent State. Mr. Absalom Watkin seconded the resolution, which was carried unanimously. The Rev. Dr. Vaughan moved the adoption of a petition to Parliament in favour of the reconstitution of Poland. The rev. gentleman concluded an eloquent speech by moving the adoption of a petitionpraying that as much favour might be shown for Poland as for Turkey.

Mr. Horsman, who has been appointed Secretary for Ireland, was re-elected for the borough of Stroud, on Tuesday, without opposition. In his speech to the electors, he dilated on the blundering management of the war at some length, and of the glorious deeds achieved by our army in spite of this blundering.

THE SILENT MEMBER.—(No. VII.)

It is creditable to the good taste and the good feeling of England that there has been little sign of exultation over the fall of the Emperor Nicholas. Even in the mixed and excitable throng of a theatrical audience, the announcement from the stage of the death of the great enemy of England was received without any expression of feeling beyond a profound sensation. There has been nothing in the shape of triumph in the tone of the public or the press; but the awfully sudden event has been received with a consciousness of a Divine interposition which, it is humbly hoped, is designed to restore, at an early period, the peace of the European world, and give a fresh impetus to the advance of civilisation, by removing the most powerful opponent of its progress.

Though one topic has absorbed the public mind, there are other subjects that should not be lost sight of, and there are many matters that must not be smuggled out of reach of the public ear during the buzz of general conversation on the one great event that all are now speaking of. The Committee of Inquiry into the Mismanagement of the War is, after all, to be an open one, and the nation is not to be guilty of the folly of affecting to keep secret the details of those gross errors which are already notorious. The verdict of "mismanagement" has already been pronounced on the faith of newspaper reports, which are being verified every day that the Committee sits, and the effect of the inquiry will be to substantiate the verdict by giving a formal shape to the evidence. I would, however, warn the witnesses against a too frequent use of the words "I heard," or "I was given to understand," or "I was told;" for whatever has been talked about has probably been seen, and the proof of the alleged fact must in strictness proceed from an eye-witness. Mr. Stafford gave some valuable information to the Committee of facts within his own knowledge, but he gave a great deal that was not so valuable, because it was founded on mere hearsay. I would caution the Committee against receiving, and the public against forming a judgment upon any evidence, but that which relates to facts within the knowledge of the witnesses. Sir De Lacy Evans spoke with an admirable regard to the truth as it had come under his own observation, and refused to be drawn into statements founded on rumours that had reached him, however generally they might have been circulated and credited.

Literature—or at all events part literature—has received a compliment in the appointment of the editor of the *Edinburgh Review* to the Chancellorship of the Exchequer. It is rather strange that the two literary men who have recently been admitted to high office should both have been entrusted with the Chancellorship of the Exchequer. The selection has perhaps been made on the perverse principle of putting right men in the wrong places; for the literary mind, having generally a leaning to the imaginative and the unreal, would seem to be adapted for anything better than the realities of facts and figures. Sir G. C. Lewis is not, however, a writer of fiction like his predecessor the popular novelist; and, indeed, his productions hitherto have had all the dryness that the hardest matter of fact can require. It is said that he resigns the editorship of the *Edinburgh*, not out of regard to his official position, which would be strengthened rather than weakened by his control of a powerful review; but it is felt due to the impartiality of literature that he should not exercise the high office he has held in its republic while fettered by official trammels.

Talking of "official trammels," reminds one of the unpopularity which almost always falls upon a popular man directly he accepts a place in the Government. This arises from the general belief that the Government must be always opposed to the popular interest; and, indeed, it is always likely to be, if no man who has devoted himself to the public cause is permitted, without incurring odium and abuse, to enter the public service. Mr. Vernon Smith was hooted the other day, on his re-election, because he had become President of the Board of Control, as if his duties as a member of Parliament and a public servant were incompatible. Liberal constituencies are always complaining that we are not governed by the right men; but, if one who has been chosen by one of these Liberal constituencies to represent themselves, should accept the offer of a place in the Government, he is generally assailed by his own constituents, and charged with every motive but a pure and honest one for the course he has taken. Either there is something in the sphere of office that corrupts everything within it, or great injustice has been done to nearly every popular politician who has ever accepted office. An unpopular man frequently becomes popular by becoming a Minister—as in the instance of Sir Robert Peel, and of many others; but there is scarcely an instance in which a popular man has not, by entering office, lost his popularity.

The moral sense of the judicial bench is a topic which every now and then presents itself to the attention in a rather disagreeable manner. Professional morality, which, unfortunately, does not stand very high, will stand even lower than it did before in the estimation of every one who reads thoughtfully a report of the trial of a clergyman at the recent assizes, for forging the entry of a marriage in the parish register. The offence was proved, and the unfortunate offender urged in mitigation the fact that "he had entered the Church, a vocation for which he was wholly unfit, in obedience to the wishes of his father." This was only admitting that he had been a hypocrite from his youth, and had undertaken a most sacred office with a weak and unworthy motive. In further extenuation he took occasion to insult literature, by saying that "a devotion to its pursuits had rendered him unfit for the common affairs of life"; or, in other words, that his being a literary man is in some measure an excuse for his having committed a crime, and outraged the laws of honour and morality. Lord Campbell should have been the last person to throw a slur on that profession to which he owes the foundation of the position he now enjoys, but I cannot see how there is anything short of an insult to literature in the following passage from the sentence pronounced by his Lordship. He said, "The prisoner had flagrantly violated the law of the land, had violated truth in his letters, and had called on his female servant to state what he knew to be false." But he (Lord Campbell), nevertheless, went on to express a hope that the prisoner would yet "become an ornament to the literary world:" as if the literary world could possibly derive any embellishment from one who had been imprisoned for an offence, in which falsehood was a principal ingredient. If the culprit had been a barrister, would Lord Campbell, in committing him to prison, have expressed a hope that the convict would some day "do honour to the Bench," which he the judge at that moment occupied? What right, then, has he to presume that a condemned criminal may one day be accepted by the literary profession any more than such an adjunct would be hailed by the Bench or the Bar as one of its ornaments? It is possible that the respectable delinquent may not remain sufficiently long for contamination within a prison walls; for, if he follows the example of Mr. Carden, he will soon send for his physician, and, as confinement will very probably be prejudicial to his health, he may get a certificate to that effect; and, perhaps, like his respectable fellow-culprit, he may obtain a curtailment of his punishment. There may be no objection to this course; but surely the whole of the inmates of a gaol have an equal right to medical advice; and if there are any humbler culprits whose health may be equally prejudiced by incarceration, they surely have as much right as their betters—if those can be called their betters who are as bad as themselves—to be set at liberty. It is our boast that we have equal laws; but the source of congratulation is not complete, unless they are equally carried out. Equal justice is an excellent thing, but equal mercy is no less to be desired.

MM. Masquelier and Dupré of Saint-Maur, to whom a premium of 20,000f. was lately awarded as an encouragement for their exertions in the cultivation of cotton in Algeria, have offered half that sum towards building a church in the commune of Saint-Denis du Sig, near Oran, where their plantations are situated.

PRINCIPAL SQUARE OF AREQUIPA, IN PERU.

THE REVOLUTION IN PERU.

(From a Correspondent.)

The Republic of Peru has now been involved in a civil war for a whole year, and one of the most sanguinary scenes since its commencement has just been enacted in Arequipa, the second city of importance in the Republic. This city has generally taken a leading part in the many revolutions which periodically infest the country, and its occupation by the troops of either of the contending parties ensures the whole of the southern portion of the Republic.

The troops of the party opposed to the Government having been defeated at a city called Moquegua by the Government force, under General Moran, fell back upon Arequipa, and there intrenched themselves. The city, although not fortified, being built in regular squares of solid masonry can, by barricading the streets at the entrances, be turned into a pretty strong place of defence, as has just been seen. The Government forces, following up their advantage at Moquegua, attacked the city of Arequipa on the night of the 30th of November; and, after a severe struggle, which lasted until the following morning at eight o'clock, were repulsed. General Moran was made prisoner, and shot in the public square of the city within three hours of the victory.

Arequipa is situated among the Andes at the foot of a volcano, seventy-five English miles from the coast, in lat. 16.25 S., and long. 71.35 W., at the height of 7280 feet above the level of the sea, and contains, including some villages in its vicinity, 40,000 inhabitants. No wheeled vehicle exists in the town, all carriage being by beasts of burden, among which the llama is conspicuous. The accompanying Sketch is of the principal square of the city.

The port of Islay is interesting, as being the only port in the world from which is exported the far-famed Alpaca wool; although a few bales annually may find their way to some of the other ports of the Republic for export. The alpaca is a semi-domesticated animal, only existing among the Andes; large flocks of which are owned by Indians, who shear the wool annually, and sell it. By a law of the Republic, no live alpaca is allowed to be exported from the country, so that no competition may arise in the article of wool; and, as the animal is never seen near the coast, it is almost impossible to evade the law. Several vessels have come over from Australia to Peru, for the purpose of obtaining alpacas but have not succeeded in procuring a single animal.

There were a few specimens in the collection of the late Earl of Derby, which were purchased by Titus Salt, Esq., of Crow-nest, near Bradford the gentleman who introduced the wool as an article of manufacture), and which are now living in his park, and appear to be quite naturalised to this climate.

M. Duvernoy, member of the French Academy of Sciences and Professor at the Museum of Natural History, has just died, having nearly attained the age of eighty. He was the friend and *collaborateur* of Cuvier, and was particularly distinguished for his co-operation in the great work of that celebrated man on "Comparative Anatomy," and at M. Cuvier's death succeeded to his chair at the Museum.

THE PORT OF ISLAY, IN PERU.

MAJOR-GENERAL WILLIAM HENRY ADAMS, C.B.

This distinguished officer died at Scutari, on the 19th December, 1854, in his fiftieth year, from wounds received at the battle of Inkermann. His constitution had been greatly impaired from his previous campaigns in China, where he commanded the 18th or Royal Irish, at Canton and elsewhere. He served in the Crimea as one of the Brigadier-Generals of the Second Division, commanded by Sir De Lacy Evans. He was the representative of an ancient

THE LATE MAJOR-GENERAL W. H. ADAMS, C.B. —FROM A FAMILY PORTRAIT.

family in Warwickshire, and his remains have been brought to England, and interred at Ansty, the family residence. He was the nephew of Mr. Serjeant Adams. He married his cousin Catharine Adams, who survives him; but leaving no issue, his estates devolve on his next brother, George Adams, Capt. R.N.

DESTRUCTION OF KELHAM-BRIDGE.

Among the devastations occasioned by the late frost, we have to record the destruction, last week, of Kelham-bridge, erected over the river Trent, about three miles from Newark, at a cost of £3000. The Bridge was constructed of wood, and supported by wrought-iron screw piles and girders, with stone abutments. The river at Kelham is very wide and deep, and the current exceedingly rapid. It appears that on the morning of the accident, fears were entertained respecting the safety of the Bridge, and, by desire of the deputy clerk of the peace, a surveyor and a staff of men went down to the river, and proceeded to break the ice around the Bridge, and clear it away. When they had succeeded in removing a greater part of it, an immense sheet of ice, several tons weight, was seen floating rapidly down the Trent; the men found it impossible to withstand the force, and in a short time it came in violent collision with the piles which supported the end of the Bridge near Kelham. Four of the piles were instantly snapped asunder, and half the Bridge fell into the river. Fortunately, no persons were injured, although several men had just crossed it. On Wednesday the remaining portion was knocked down by a large piece of ice driven against the piles, which instantly snapped them; so that the whole will have to be rebuilt.

The two sons of Burns have been promoted. William Nichol Burns is now a Colonel, and James Glencairn Burns a Lieutenant-Colonel

LARCH IN THE GROUNDS OF KILLYMOON CASTLE, COUNTY TYRONE.

This estate has been for many generations the property and residence of the Stewarts of Killymoon, whose estate in the county of Tyrone at one time almost extended to a principality. They were amongst the first and most important of those adventurous families, who, driven from their native hills and islands of Scotland, by political feuds and animosities, crossed the stormy Channel, and formed a powerful Protestant confederacy in the north of Ireland. Colonel Stewart, the last proprietor, and almost the last representative of this distinguished family, died just at the time when it was decreed that the castle, demesne, and the last portion of the estate must pass through the melancholy ordeal of the Encumbered Estates Court. The castle was built by Nash, under his personal superintendence; and some idea may be formed of the lavish expense at which it was erected, when it is stated that the stone was imported for the purpose from Portland. It stands upon a slight eminence, just above the confluence of two rapid, sparkling rivers, such as anglers love, famed for the enormous trout which run up from Lough Neagh, and which are not unfrequently taken from ten to fifteen pounds each. The demesne containing, amongst other objects of interest, old Danish and Roman forts, and the ruins of the first Presbyterian church erected in Ireland, is justly the pride and pleasure of the North. The hanging banks are planted with hundreds of acres of laurels,

LARCH IN THE GROUNDS OF KILLYMOON CASTLE.

interspersed with the finest timber in the country. The drives and walks through the woods are many miles in extent, and are the daily resort in summer of most of the pleasure-seekers within the circuit of the adjoining counties—all classes of whom are liberally admitted by the present proprietor, J. Douglas Cooper, Esq.

The Larch in the accompanying Sketch, which stands upon the west lawn, and whose trunk is about 16 feet in circumference, is interesting from the circumstance that it was brought by the father of the late Colonel Stewart, in a small flower-pot, from Italy, and is said to be the first Larch introduced into Ireland, the soil of which is so favourable to the growth of all the Conifera, as attested by the enormous stems of pines occasionally exhumed from the deep bogs, and which are of almost fabulous dimensions.

THE LATE REV. G. FLETCHER.

The death of this venerable centenarian, in his 108th year, took place on the 2nd ult. His protracted length of days is marked by many

THE LATE REV. G. FLETCHER, AGED 104.—FROM A PHOTOGRAPH BY BEARD.

noteworthy circumstances. Mr. Fletcher was born on Feb. 2, 1747, at Clarborough, in Nottinghamshire. From six years of age he had been brought up in the tenets of Wesley, and remained a member of that body till his death. He spent eighty-three years of his life in active pursuits. He was twenty-one years a farmer, twenty-six years he served his Sovereign in the Army—was at the battle of Bunker's-hill, and followed Abercrombie into Egypt, where he gained the respect and esteem of his officers. He then entered the West India Dock Company's service, where he continued thirty-six years, when he retired on their bounty, still preserving, up to within six months of his decease, that astonishing activity of mind and body for which he was so remarkable: often travelling great distances by rail, and pursuing his holy calling, preaching two or three times a day, regardless of personal inconvenience, for the objects of charity and benevolence.

The accompanying Portrait of Mr. Fletcher was taken on his 104th birthday, four years since. He walked for this purpose from Poplar to Messrs. Beard's Photographic establishment, in King William-street, City; and after the sitting he walked back to Poplar—refusing to ride, although a conveyance was placed at his service.

Paper from Shavings.—Before us lies a copy of the *Albany Evening Journal* printed on paper made from basswood shavings. It is also of good substance—perhaps, if anything, a little too heavy, which can no doubt be easily remedied—and it is tougher than the great bulk of news paper made from rags.—*New York Tribune.*

Cost of Convicts.—The expense of keeping our convicts is increasing. Comparing 1854-5 with 1853-4, the victualling charge was £3 19s. per head, as compared with £7 1s. 10d. for 1853-4; clothing is estimated at £2 19s. 5d., as against £2 13s. 10d. for each prisoner; and clothing and travelling expenses of prisoners "on liberation," 15s. 3d. against 4s. 2d.

KELHAM BRIDGE, NEAR NEWARK, DESTROYED BY THE ICE.

CALENDAR FOR THE WEEK

Sunday, March 11.—3rd Sunday in Lent. Benjamin West died, 1820.
Monday, 12.—St. Gregory. Chelsea Hospital founded, 1662.
Tuesday, 13.—Earl Grey born, 1764. Dr. Priestley born, 1738
Wednesday, 14.—Klopstock died, 1803.
Thursday, 15.—New London Bridge commenced, 1824.
Friday, 16.—Battle of Culloden, 1746.
Saturday, 17.—St. Patrick

Newspaper Stamps.

From a Return just presented to Parliament of Penny Stamps issued to the various Newspapers during the year 1854, it appears that the

ILLUSTRATED LONDON NEWS

made use of

5,627,866,

being an average of upwards of One Hundred and Eight Thousand Copies each publication.

The *Times* is returned as using 15,975,739 for the same period, or Fifty-One Thousand each publication being a circulation less than *one-half* of that of the Illustrated London News.

Since the commencement of the year 1855 the weekly sale of the Illustrated London News has been upwards of One Hundred and Thirty Thousand Copies.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, MARCH 10, 1855.

A portion of the press and a very large portion of the public seem to be agreed that the system of promotion by purchase in the Army should be abolished; and that in the military, as in other professions, merit alone should be the road to success and to distinction. There can be no doubt that the principle is just. The theory is perfect, and defies all hostile attempt to propound or construct a better. But is the British public prepared to carry it out? Has it fully considered the subject in all its ramifications? and would the system, if established, conduce to the satisfaction of the people, or to the welfare of the country? Before we are led away by theory—however noble and unexceptionable it seem—it is well to look at existing facts. Certainly merit ought to be rewarded. Certainly the common soldier ought to have it in his power to carve his way to the highest ranks of the Army. Such illustrious soldiers as Bernadotte and Murat began at the very beginning, and reached the ultimate gaol—a throne; but is this the prize to be offered up to the ambition of the common soldier in peaceful times and in a peaceful country? In war which is an exceptional time—it is right as well as expedient to elicit the best services of the best men in the military career; but how would the system of promotion by merit work in times of peace? That is in reality the question for the British public to answer before they consent to republicanise the military service. The Continental nations have large standing armies. Great Britain has not; and we think it would be a most unfortunate thing for this country, if it were ever compelled to tolerate the infliction of such armed legions as are maintained by the military States of the Continent for the defence of their territory. Our frontiers have other and better guardians. The seas that mark our boundaries prescribe the nature of our defences. Our sailors and ships perform the duties which fall to the lot of the standing armies of such countries as France, Austria, and Prussia. In peace or in war, our naval force ought to be maintained at the highest point of efficiency; and so essential has it been found to our security, that no one has ever dreamed of introducing into that service the system of promotion by purchase. But in the Army the case is different. We do not on ordinary occasions need a large army. We trust we never shall. We are a brave people but we are not a military nation in the sense in which the term is generally understood. We are strictly and essentially a naval power. The sea is our element. It is the source of our wealth and of our greatness; and the military service—noble as it is, and all important as it may sometimes become—is for the most part but secondary to our maritime force. And if inducement is to be held out to the democracy of Great Britain—not only to the artizan and to the brave peasant, but to the far-seeing, enterprising, pushing, vigorous youth of the middle classes—to enter the military profession and aspire to its highest prizes, we must make the prizes of some value. If a brave soldier is promoted from the ranks, he requires more money than his pay, if he would mingle on fair terms with his new companions. Is the country prepared to double or treble the pay of the subaltern and superior officers of the Army? And if prepared in time of war to do so, will it be equally ready and willing in times of peace? And if equally ready and willing, would such a policy be wise? And would it not, as an inevitable consequence, lead to the establishment of that which England has always hated and protested against—a large standing army?

We do not pretend to answer these questions. We only throw them out as suggestions for those who are captivated by a fine, compact, and apparently unexceptionable theory. If the pay of a Cardigan, a De Lacy Evans, or a Colin Campbell were thrice or ten times as great as it is, we think it impossible that these truly noble men would have proved in the slightest degree more chivalrous and heroic; or if every soldier who fought at the Alma or at Inkerman [illegible] he had a chance of becoming a Field Marshal, we should [illegible] he would have fought a whit more gallantly [illegible] than he did on those ever-memorable days. The British Army has often earned the eternal gratitude of the British people, and officers who have bought their commissions, and soldiers who have had no greater prize in view than promotion to the rank of Sergeant-Major, or a home in Chelsea Hospital, have fought as well as Bernadotte or Murat. With all our admiration for the Army, and its gallant deeds, we must confess that we should not like it to become in times of peace a profession and an institution sufficiently lucrative to tempt men from the professions of law, literature, medicine, or commerce. Such an army would, we think, be dangerous to the public liberty. At all events the subject is one that requires earnest and careful consideration, or we may run ourselves into Republicanism, and emerge from it into a Military Despotism, before we know what we are about.

Mr. Roebuck's Committee on the state of the Army before Sebastopol is now sitting *de die in diem*. The Committee itself will have an historical fame, entirely apart from any of the good which sanguine people expect it to produce. It will be remembered as the tribunal whose establishment cost two Governments. As some Oriental nations had a custom, before planting a throne for their King, to throw sacrifices into the hole dug for the foundation, Mr. Roebuck has immolated two sets of Ministers as a foundation for the chairs of his Committee of Public Safety. We hope—doubtingly, however—that the results may be worthy of the preliminaries.

The Committee sustained a defeat in its attempt to make the inquiry private and confidential. Its appeal to the House for authority to sit in secret was unceremoniously rejected. Sir James Graham—who, for reasons of his own, seems to have a wholesome dread of the interference of the press—fairly told the House that secrecy would be impossible, and that the journals *would* have reports, and he hinted that a collision between the Third and Fourth Estates of the realm was a thing not to be risked unnecessarily. Now this was one way of putting the matter. There is not the least doubt that the leading journals would have obtained reports, and would have risked Parliamentary wrath by publishing them. But the leading journals would have done so in no spirit of arrogant independence, or vulgar desire to fly in the face of constitutional authority, but because the nation which demanded the inquiry would not have borne to be mocked by that inquiry being secret. The press does but represent the national feeling, as the House of Commons affects to do; and the decision of the latter upon this very question shows that the House understood the popular wish as well as the press did. Sir James Graham, therefore, might as well have said that the people *would* have reports. However, it comes much to the same thing.

While we are speaking of the House of Commons as a representative of the feelings of the people, we will just allude to an observation which dropped from Mr. Gladstone, when reasserting his conviction that the Committee was a mistake. He said that he believed, if the votes of the House could be taken by ballot, that the Committee would have been "thrown over," after the motion had disposed of the preceding Government. The great admiration in which Mr. Gladstone's talents and character are held gives to an observation of this kind no ordinary significance. He certainly uttered what, at the mildest, was a stinging satire. Did he mean to say that the Commons of England merely voted for the inquiry out of fear of their constituents; and would have voted the other way, could they have done so in the safety of secrecy? The accomplished member for Oxford has more than once rebuked young senators for giving utterance to that conventional depreciation of the value of Parliamentary discussions which is learned "out of doors," but which a member decorously forgets after his maiden session. But no flippant or self-complacent ornament of a debating society ever said anything so severe of the House of Commons as was said upon this occasion by the ex-Chancellor of the Exchequer.

The Committee has already examined Sir De Lacy Evans, Mr. G. Dundas, General Bentinck, Captain Wrottesley, and Mr. Owen (the only surviving officer of the wrecked *Resolute*), and other gentlemen. Its managers have not begun in Ciceronian order—"Primum mihi videtur de genere Belli, deinde de magnitudine, tum de imperatore deligendo esse dicendum;" though that Manilian text might furnish some of our orators of the Phillimore school with an excellent theme. It has plunged at once into questions of littered hay, scattered boards, bad drainage, cumbrous medicine chests, ruined horses, green coffee, and incapable harbour-masters. Mr. Layard is bringing to bear upon the witnesses the knowledge which he acquired when with the army; and his previous acquaintance with the habits and resources of the East enables him to direct his examinations to the points upon which he especially desires to accumulate damaging testimony. But so far as we have yet seen, the witnesses tell no more than our own Correspondents and those of the other journals have told us. We hear now, as we have previously read, of sufferings and privations, of want of organisation and order, of officials either helplessly or actively in the way; and we have one pervading impression of a peaceful nation suddenly set to make war, and decidedly making it badly. Those who expected startling details will be disappointed; the details are mournful rather than startling, but they are not novel. Those who expect any immediate benefit from the inquiry will be equally disappointed; but, inasmuch as the record and publication of truth must always produce good, sooner or later, advantage may arise, both from special details elicited by the Committee, and from certain general considerations and results which thinking men will deduce from a digest of the whole mass. The work of improvement before Sebastopol will be entirely distinct from anything that is done No. 17 Committee-room, and the conviction that this will be so is he less disconcerting, seeing that such improvement is already going on. We learn, from the latest letters, that the trenches are dry, the men get all they want, provisions are plentiful, hay has arrived, fresh vegetables have been sent to the front, the railway is progressing rapidly, and Balaclava has been cleansed and rendered wholesome. This sounds more cheerfully than anything which has been connected with the name of the Crimea for many and many a day. We trust such reports may continue to arrive and balance those from No. 17.

Halifax Election.—The vacancy created in the representation of the borough of Halifax, in consequence of Sir Charles Wood's acceptance of the post of First Lord of the Admiralty in the reconstructed Government, was duly filled up on Saturday last by the re-election of the right hon. Baronet without opposition. There had indeed been some talk, when the intelligence first arrived that the vacancy had arisen, of Major Edwards, who figured so formidably at previous elections for the borough, being again started to contest the seat with Sir Charles, but subsequently the friends of the gallant Major met and resolved that it was inexpedient for him, in the present critical aspect of affairs, to press his claims on the suffrages of the constituency; and all idea of offering opposition to the right hon. Baronet's return was therefore abandoned.

ETIQUETTE OF COURT MOURNING.

The sudden death of the Emperor of Russia, the intelligence of which was so rapidly conveyed by the telegraph recently established, has not yet been officially notified in the ordinary manner to the Western Courts; and we have heard in some quarters doubts expressed whether, under the circumstances—those Courts being at war with Russia—any intimation of the kind will be sent to them; and, as a consequence, whether any official notice will be taken by them of the event. Referring to past precedents, we think we are justified in anticipating that this important event will be notified by the Court of Russia to those of Great Britain and France, in the same way as if no war existed, and that the usual complimentary mourning will be ordered to be worn at the latter Courts.

The principle of international law is, that all the crowned heads of Christian Europe constitute amongst themselves one family; and this theory is further strengthened in fact by numberless marriages and intermarriages between the Royal houses, which scarcely leave it possible for one to lose a member without all losing a kinsman or close connection. Another principle of public law, sanctioning and sanctifying what is due to the natural ties of relationship, is that Kings are never supposed to be personally at enmity. The amicable relations between them are never interrupted; the fairest motives are attributed to them, personally, in all their actions; and the courtesies incidental to such relative conditions subsist, as occasion requires, under all circumstances. War itself only affects States, without in the slightest degree affecting the sentiments of personal regard between Sovereigns.

Amongst the civilities *en règle* in the family of Sovereigns is the custom of notifying to one another the events of importance, whether sorrowful or agreeable, which occur to themselves or their respective families; such as deaths, marriages, and births, and even the probability of such approaching addition to the family. These notifications are made in writing by a Minister either ordinary or extraordinary, and the Court to which they are delivered returns a complimentary message in the same manner; and, in the case of death, testifies its sympathy in the event by putting on mourning. Amongst the instances of these courtesies being continued, even in a time of war, Martens ("Esprit du Droit des Gens") refers to the following:—"At the moment of the rupture of the negotiations for peace which had been commenced between England and France, the English King (George III.) caused his marriage to be notified to the King of France, and the latter, in reply, expressed his lively congratulation upon the auspicious occurrence. On the same principle, Louis XIV. put on mourning for the Emperor Leopold and for Joseph I., who died in the midst of the war between the two States; and Charles VI., being still at war with the French Monarch, held solemn obsequies in his memory at his decease."

THE COURT.

The Queen commenced the courtly receptions of the present season with a Levee on Wednesday last. Her Majesty, who was remarked to be looking exceedingly well, went through the fatigues inseparable from the ceremonial with her accustomed grace and dignity.

On Sunday the Queen and Prince Albert, the Prince of Wales, the Princess Royal, Prince Alfred, and the Princess Alice, with the ladies and gentlemen of the Court, and the domestic household, attended Divine service in the private chapel of Buckingham Palace. The Hon. and Very Rev. the Dean of Windsor officiated.

On Monday the Earl of Clarendon had an audience of the Queen on his return from Boulogne, where the noble Earl had been on a mission to the Emperor Louis Napoleon. The Prince Consort and Prince Ernest of Leiningen visited the Crystal Palace in the course of the morning.

On Tuesday Prince Ernest of Leiningen left Buckingham Palace, where his Serene Highness had been staying with the Duchess of Kent, on a visit to her Majesty—for Portsmouth. Prince Nicholas of Nassau visited the Duchess of Kent at Buckingham Palace during the day. In the evening the Queen and the Prince honoured the Olympic Theatre with their presence.

On Wednesday her Majesty held her first Levee of the season; and in the evening dined with the Duke of Cambridge, at St. James's Palace.

The Hon. Lucy Kerr and the Hon. Mary Bulteel have succeeded the Hon. Matilda Paget and the Hon. Mary Seymour in their duties as the Maids of Honour in Waiting to the Queen.

THE LEVEE.

The Queen held her first Levee this season on Wednesday, at St. James's Palace. Her Majesty and the Prince Consort arrived from Buckingham Palace, attended by the Lords in Waiting and Gentlemen in Waiting, and escorted by a detachment of Life Guards.

His Royal Highness the Duke of Cambridge, the Prince Nicholas of Nassau, and the Maharajah Dhuleep Singh were present.

Her Majesty wore a train of white poplin, embroidered with a running pattern of flowers in gold, trimmed with gold blonde and white satin ribbon. The petticoat was white satin, trimmed with gold blonde and white satin ribbon to correspond. The Queen wore a diadem composed of emeralds and diamonds.

The Foreign Ministers were the first introduced, and afterwards the general circle. The following were among the more noticeable presentations:—

Major-General the Earl of Cardigan, on appointment to be Inspecting-General of Cavalry, by Lieutenant-General Viscount Hardinge

Rear-Admiral the Hon Richard S. Dundas, on appointment to be Commander-in-Chief of her Majesty's ships on a particular service, by Sir James Graham

Major-General Henry Bentinck, on promotion, return from foreign service and appointment to the Staff in England

Lord Mayor, on succeeding to his title, by the Earl of Zetland

Lord Mayor, by Viscount Palmerston

Lieut.-Colonel Harry Jones, on his appointment by the Archbishop of Canterbury

Lieutenant-Colonel Charles [illegible] Esq., Royal Marine Artillery, on promotion, and on the regiment being made a Rifle corps, by Earl Cowper

The Duchess of Leinster is lying in a very precarious state at Carton.

The Earl and Countess of Clarendon gave a dinner on Monday evening, at their mansion, in Grosvenor-crescent, to his Royal Highness the Duke of Cambridge and a distinguished party.

The Earl of Carlisle will leave London for Ireland in the course of the ensuing week, in order to enter upon the duties of the Viceregal Government.

Northampton Election.—Mr. Vernon Smith was returned for Northampton on Monday. Mr. Lockhart was also proposed, and had the show of hands in his favour but declined going to the poll. In the course of Mr. Vernon Smith's address, delivered in the circumstances under which he assumed office at Lord Palmerston's request, "He was not," he said, "so vain as not to be aware that he should not have been asked to accept office if they could have got a yeoboy else. He made no secret of saying that he was the last man asked." Referring to his vote on Mr. Roebuck's motion, the right hon. gentleman said "he had opposed the appointment of a Committee, although strongly in favour of inquiry, because he was satisfied that a Committee of the House of Commons was not the best agency for accomplishing the object. With regard to the war, he told them in his address that with the origin of the war he had nothing to do. He was not in office at the time, and therefore [illegible] responsible for the conduct of the Government. He might say, however, that as Parliament and the Government were at present constituted, it was a most difficult matter to ascertain whether the Government was going to war or to interfere with it, on any question whatever. No matter at what stage of proceedings a member [illegible] questions, the invariable reply was 'Hush, hush, hush.' He was told at one time to be quiet, lest his question might lead to war; on another, lest it might embarrass negotiations, and so on. To a great extent he admitted that for a representative Government to carry on war was a difficult task. Representative government, however, was now upon its trial; and it was for the country to show that it was, at the same time, able to maintain its free institutions and to wage successful war."

Stirling Election.—On Monday last Mr. Peter Blackburn, of Killearn, was elected, without opposition, to represent the county of Stirling in Parliament, in the room of the late Mr. Forbes, of Callander. The hon. member said that he would give Lord Palmerston his support and a fair trial, believing that all parties should sink all minor differences, and give an honest and hearty support to those who would most energetically carry on the war.

Wills and Personalty.—Dowager Lady Cooper, of Portland-place and Isleworth house, has left £100,000 in personalty, and £300,000 real estates. Thomas Kinnersley, Esq., of Cloughfield, Newcastle, £200,000. General George Carpenter, H.E.I.C., £180,000. Richard Jolliffe, Esq., Newcross, £70,000. James Salter, Esq., of Heaviree, £40,000. Sir George Wombwell, Bart., of Newburgh-park and Wombwell, Yorkshire, and of Kensington-gore, London, £30,000 within the province of Canterbury. Mr W. Simpson, of Southam, Warwickshire, has been somewhat peculiar in his bequests, leaving to each bearer of his corpse ten shillings, and directing five guineas to be expended in bread and distributed among the poor of his parish on the Sunday after his decease; and two guineas to [illegible] ringers and singers on the decease or second marriage of his [illegible] property to charitable uses.

THE BATTLE AT EUPATORIA.

OFFICIAL DESPATCHES FROM FIELD-MARSHAL LORD RAGLAN.

(From a Supplement to Tuesday's *Gazette*.)

War Department, March 8.

Lord Panmure has this day received despatches and enclosures, of which the following are copies, addressed to his Grace the Duke of Newcastle, and to his Lordship, by Field-Marshal the Lord Raglan, G.C.B.

Before Sebastopol, Feb. 20.

My Lord Duke,—Your Grace will have learnt, by my telegraphic despatch of the 18th inst., that the enemy had on the previous morning, at daylight, attacked Eupatoria with a very large force, and a powerful body of artillery, and had been repulsed, after an engagement which terminated with their retirement at 10 a.m.

I have now the honour to lay before your Grace copies of two letters which I have received from Colonel Simmons, who is attached to the head-quarters of Omer Pacha, containing the details of the action; and, whilst your Grace will rejoice to see that the Turkish troops which have been landed at Eupatoria have availed themselves of the earliest opportunity to show that the character they acquired on the Danube was well merited and remained unimpaired, you will join in the regret which I feel that they have suffered so considerable a loss, and that among the killed is numbered the General of Division, Selim Pacha (an Egyptian), and among the wounded is General of Brigade (also an Egyptian). This loss, however, and particularly that sustained by a battery of artillery, afford ample proof of the gallant and determined conduct of the troops, and of the serious nature of the attack made upon them, as well as their being worthy of their illustrious chief.

I have great satisfaction in drawing your Grace's attention to that part of Lieutenant-Colonel Simmons' despatch, in which he bears testimony to the efficient assistance rendered to the Ottoman army by her Majesty's ships in the bay, under the command of the Honourable Captain Hastings, of the *Curacoa*.—I have, &c.,

RAGLAN.

His Grace the Duke of Newcastle, &c.

Eupatoria, Feb. 17, 1855, 1 p.m.

My Lord,—I have the honour to inform your Lordship that on the 15th instant, several large convoys and arrivals of troops were seen moving along the north shore of the Sasik Putrid Lake, from the eastward.

This caused on the part of the enemy caused Omer Pacha to place the garrison on the alert. No further movement, however, was seen yesterday on the part of the enemy; but this morning, at daylight, they advanced in great force, and opened with artillery upon the intrenchments which enclose the town. The advanced line of works, which I informed your Lordship it was his Highness's intention to erect, were not yet commenced.

The enemy's artillery opened their fire about 1200 yards from the place, covered by cuirassiers, and supported by heavy masses of infantry in their rear, and cavalry on their flanks. The artillery subsequently took up a second position more in advance, about 400 yards from a small crown-work which is being erected in front of the mills to the north-east of the town, and after continuing their fire for some time, the infantry advanced to the attack, having formed under the cover of a wall about 600 yards from the right of the town. They were repulsed at this point, leaving from 150 to 200 dead on the field. On other points of the field a number of horses were left dead, but the killed men were removed. At length, about ten a.m., the whole force retired, covered by the artillery and cavalry

I am not able as yet to ascertain the number of men engaged, but I should think there were not less than 40,000 of all arms, with a very powerful artillery. A portion of the enemy's guns must have been firing at one time, amongst them some 32-pounders. Prisoners report that they were accompanied by 100 guns. As yet, all the particulars I have been able positively to ascertain is, that Liprandi's division (the 12th) was present.

At present I understand that they are in position about five miles north from this, their left leaning on the Sasik Putrid Lake.

It is with much pleasure I have to inform your Lordship that the portion of her Majesty's fleet under the Hon. Captain Hastings, have rendered most efficient assistance. The *Valorous* threw some well-directed shells, and completely covered our left; whilst the *Viper* gun-boat, which was at first stationed on the left, with the *Valorous*, by Captain Hastings' directions, moved, and took up a flanking position on the right, near the mills

I cannot at present give your Lordship any details of the killed and wounded on the side of the Turks. I regret to say, however that Selim Pacha, commanding the Egyptian Brigade, is amongst the former. One battery of Turkish Artillery is completely disabled, every gun having been struck, and a great number (nearly one-third) of the horses killed

I am desirous your Lordship should receive a report of the action, with as little delay as possible, by the *Queen of the South*; so I must beg your Lordship to excuse further details, which shall be sent by a future occasion.—I am, &c.,

(Signed) JOHN SIMMONS,
Captain Royal Engineers, Brevet-Major

Field-Marshal Lord Raglan, G.C.B., &c.

P.S. A prisoner informs us that a Prince commanded, but he could not remember his name.

I am happy to say that there are no casualties among the English or French officers. Two French sous-officers are among the killed, and two private wounded.

Eupatoria, Feb. 18, six p.m.

My Lord,—I have the honour to inform your Lordship that nothing of importance has taken place here since the enemy retired yesterday.

Owing to the deficiency of cavalry with the army of his Highness Omer Pacha, we are not able to obtain exact information as to the position of the enemy, who have entirely disappeared, so far as we can see, with the exception of the usual cavalry advanced posts.

Convoys of waggons, however, have been seen from the fleet moving along the north shore of the Sasik Putrid Lake from the eastward. I am inclined, however, to believe that they are bringing forage and provisions for the cavalry which surround us.

In the meantime, however, his Highness is taking every precaution, by adding to the defences of the place, to provide against any further attempts of the enemy. Fortunately the two transports (sailing), containing artillery and materials for constructing works have arrived, and, in the course of the night we shall have twelve or fourteen more guns in position than yesterday. The parapets also have been raised, so that we may hope that our loss will not be so heavy on a future occasion.

The total loss yesterday amounted to as follows, of all ranks:—Turks, 97 killed; 377 wounded. French, 4 killed; 9 wounded. Total combatants, 101 killed; 386 wounded. Tartar population, 13 killed; 11 wounded. Horses of the Turkish army, 78 killed; 13 wounded.

Amongst the killed of the Turks were—1 General of Division, Selim Pacha (Egyptian); 1 Colonel, and 5 subaltern officers; and amongst the wounded 1 General of Brigade (Egyptian); 4 superior, and 5 subaltern officers. Amongst the French wounded was an officer of the *Henri IV.*, who was serving ashore in a land battery.

A greater portion of the horses of one battery were killed, and nineteen men of the same battery, the whole of the guns being disabled

I have not been able to obtain any further positive details of the enemy's force.—I am, &c., (Signed) JOHN SIMMONS,
Capt., Royal Engineers, Brevet-Major

Field Marshal the Lord Raglan, G.C.B

Before Sebastopol, Feb. 24, 1855

My Lord, The weather has improved since I wrote my despatch of the 20th instant

The snow is still on the ground, and the nights are cold; but the wind has subsided, and we have to day a bright sunshine.

Considerable activity continues to prevail in the movement of the enemy's troops on the north side of the harbour, and convoys of waggons are constantly arriving, and the object of the Russians would appear to be to fortify the heights extending to their left, and looking upon the valley of the Tchernaya.

The troops of the garrison having lodged themselves on the point of the spur of the ridge from Inkerman over the Careenage Bay, at about 300 yards from the new French parallel, on the extreme right, General Canrobert determined to dislodge them; and this was gallantly effected at two o'clock this morning by 1500 men, under the immediate command of General Monet, and the direction of General Mayran, with, however, I regret to say, some loss, the consequence of the heavy fire which was brought to bear upon them from the enemy's batteries and the shipping whilst they were engaged in demolishing the works. When this object was accomplished they withdrew to the trenches, as had been their intention.

The gallant General Monet is, I am much concerned to have to add, amongst the wounded

I enclose a return of casualties to the 22nd instant

Lieutenant-General Sir George Brown has, I am happy to say, resumed the command of the Light Division in perfect health. The railway is getting on remarkably well, and the exertions of Mr. Beattie, who is superintending the work, are unremitting, and entitle him to great praise.—I have, &c.

The Lord Panmure, &c. RAGLAN

(Translation.)

Head-quarters, Eupatoria, February, 185[illegible]

My Lord, I have the honour to inform your Lordship that the enemy attacked Eupatoria on the morning of the 17th instant

The troops intended for this attack had left the camp before Sebastopol six days ago, and other troops from Perekop and Simpheropol had joined them in the night of the 16th, and the morning of the 17th, in the flat ground that lies behind the heights that are before Eupatoria

As far as one could guess, and according to the information furnished by prisoners, the enemy mustered thirty-six battalions of infantry, six regiments of cavalry, four hundred Cossacks, eighty pieces of artillery in position, and some troops of horse-artillery, which were in reserve.

The attack commenced at daylight by a strong cannonade, during which the enemy used even 32-pounders. At first the Russians showed themselves in great force along our whole position; but, seeing that our left was protected by men-of-war, which went there when the first shot was fired, they concentrated against our centre and right.

I then requested the senior officer of the English Royal Navy to send the gun-boat *Viper* to the right, and to take up a position near the French steamer *Vélace*, and the Turkish steamer *Schehfaer*, on board of which was the Vice-Admiral, Ahmed Pacha. At the same time I reinforced the right with some battalions of infantry and some pieces of artillery, which I withdrew from the left.

The enemy continued his fire, without ceasing, from the position held by his artillery, supported by a powerful fire of skirmishers, and then his infantry, carrying planks and ladders, three times tried to storm the works. Each time it was repulsed, and obliged to retire under our fire, but it was enabled to effect this retrograde movement under cover of its artillery, and of heavy masses of cavalry

Our cavalry, which at the present moment only musters about 200 or 300 horses, and which charged the Russian infantry at the commencement of its retreat, did not dare to pursue it in the face of such heavy masses.

Their superiority in artillery and cavalry prevented our disturbing the Russians on their retreat. After four hours and a half fighting, they commenced retiring in three different directions, towards the bridge of Lake Sasik, towards Top Mamai, and towards the Perekop road.

I have every reason to be satisfied with the conduct of my troops during the day. Although behind works only half finished, and not fully armed, they showed a bold front and were very steady.

Our losses are not very numerous, but they are to be deplored. We regret the death of Selim Pacha, Lieut.-General, commanding the Egyptian troops. We had, moreover, 87 killed, 277 wounded; 79 horses killed, and 18 wounded.

Amongst the killed there are seven officers, and ten wounded, amongst them Suleiman Pachu; thirteen inhabitants of the town have been killed, and eleven wounded.

I consider it my duty to make honourable mention of the French detachment that is here, and of the English men-of-war, *Curaçoa*, *Rinaldo*, *Valorous*, *Viper*, of the Turkish steamer *Schehfaer*, and of the energetic co-operation of the French steamer *Vélace*, who all contributed greatly towards frustrating the efforts of the enemy. The French detachment had 4 men killed and 9 wounded—amongst the latter a naval officer

The Russians must have suffered a heavy loss. According to the report of the civil authorities of the town, who had to bury the dead, their number of killed amounts to 453; their artillery lost 300 horses. They carried away a great many of their dead, and almost all their wounded. We have taken 7 prisoners.—I have, &c., (Signed) OMER.

His Excellency the Lord Raglan, &c.

NOMINAL RETURN OF OFFICERS, NON COMMISSIONED OFFICERS, AND PRIVATES KILLED AND WOUNDED FROM THE 17TH TO THE 22ND FEBRUARY, 1855, INCLUSIVE.

KILLED

77th Foot. Private Wm. James Brown.

WOUNDED

30th Foot.—Lieut. Constantine S Gaynor, severely.
17th Foot.—Private Michael Begley and Peter Heddleston, severely.
41st Foot. Private Patrick Burke, severely
47th Foot Private Philip Clarke, slightly
4th Foot —Private Daniel Smith, slightly
96th Foot.—Private John Hartell, severely (since dead)

J. B. BUCHNALL ESTCOURT, Adjutant-General.

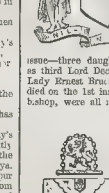
OBITUARY OF EMINENT PERSONS.

PHILIP-HENRY, FOURTH EARL STANHOPE, F.R.S. AND F.S.A.

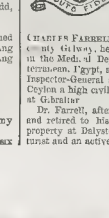
THE death of this nobleman took place at his seat, Chevening, near Sevenoaks, on the 2nd inst. His Lordship was born 7th Dec., 1781, the eldest son of Charles, third Earl Stanhope (so distinguished for his mechanical genius and scientific researches), by Louisa, his second wife, daughter and heiress of the Hon. Henry Grenville, Governor of Barbadoes. He married, 19th Nov., 1803, Catherine-Lucy, daughter of Robert, Lord Carrington: and by her (who died 1st Oct., 1843) had issue—one surviving son, Philip-Henry, now third Earl Stanhope (the well-known historian, under his courtesy title of Viscount Mahon); and one daughter, Catherine-Lucy-Wilhelmina, married, first, in 1846, to Lord Dalmeny, and secondly, in 1854, to Lord Harry George Vane.

The first peer of this branch of the noble house of Stanhope was James Stanhope, grandson of Philip, first Earl of Chesterfield. He was a distinguished Commander, of the reign of Queen Anne, served with great gallantry in Spain, and gained considerable renown by the reduction of Port Mahon in the island of Minorca. In the reign of George I. he became Secretary of State and First Lord of the Treasury, and was advanced to the Barony and Earldom of Stanhope. The celebrated Lady Hester Stanhope (who died in Syria 23rd June, 1839) was half sister of the nobleman whose death we record—having been daughter of the third Earl Stanhope by his first wife, Lady Hester Pitt, daughter of William, first Earl of Chatham

LORD DECIES



THE Rev. John de-la-Poer Horsley Beresford, second Baron Decies, of the county of Waterford, in the Peerage of Ireland, was the eldest son of the Most Rev. William Beresford, Archbishop of Tuam and first Baron Decies, by his wife, Elizabeth, second daughter of John Fitzgibbon, Esq., and niece of the Earl of Clare, Lord Chancellor of Ireland The second Baron Decies, the subject of this notice, was born 20th Jan., 1777, and succeeded his father, the Archbishop, on the 6th September, 1819 He married, the 26th July, 1810, Charlotte-Philadelphia, only daughter of the late Robert Horsley, Esq., of Balmo House, Northumberland, and assumed in consequence the additional surname of Horsley. By this lady (who died the 9th of March, 1832) he leaves issue—three daughters and a son, William Robert John, who succeeds as third Lord Decies; the three daughters are Mrs. Henry Edward's Brown, Lady Ernest Bruce, and the Duchess of Montrose. The second Baron Decies died on the 1st inst. He and his two brothers, the three sons of the Archbishop, were all in Holy Orders of the Church of England.



SIR JOHN MORRIS, BART

SIR JOHN MORRIS, second Baronet of Claremont, Glamorganshire, was the elder son of Sir John Morris, the first Baronet, by his wife, Henrietta, daughter of Sir Philip Musgrave, Bart., of Eden-hall. He was born the 14th July, 1775, and married, the 5th October, 1809, Lucy Julians, youngest daughter of the fifth Earl of Torrington, by whom he leaves four sons and five daughters. The eldest son, John Armine, is now the third Baronet; three of the daughters are married—viz., Mrs. Albert Jenner, of Wenvoe Castle, Glamorganshire; Mrs. Hyde Leaver, and Mrs. Lavington-stone. Sir John, who succeeded his father as second Baronet, the 25th June, 1819, died on the 24th ult. at Southsea-house, Hants

DR. FARRELL

CHARLES FARRELL, Esq., M.D., who died on the 15th January at Dalystou, county Galway, held a high position as a physician. He entered the Army in the Medical Department in 1799; and served many years in the Mediterranean, Egypt, and the Peninsula, as Physician; and in Ceylon as Deputy Inspector-General and as Inspector-General of Hospitals. He further held in Ceylon a high civil appointment. He was also several years Inspector-General at Gibraltar

Dr. Farrell, after a long and meritorious career, quitted professional life, and retired to his native country, to enjoy there the possession of a fine property at Dalystou, county Galway, and to become an enterprising agriculturist and an active magistrate.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

JEWS are standing aghast at the heavy prices given by noblemen, gentlemen, and Jew dealers themselves, for the choicer acquisitions at the Bernal sale. War seems to have had no effect upon the pockets of those present; and even the news of the fall of Sebastopol could hardly send some of the lots to higher prices. We are glad to observe that a young English nobleman, the Marquis of Bath, is among the spirited bidders for the better things, and that he has already secured more than one lot, of equal beauty and rarity—

Which Jews might kiss, and infidels adore—

for the stately Longleat.

Antiquaries and artists are waging a very idle and, therefore, unnecessary war about the purchase for the nation of two well-known collections of curiosities. "Buy the Roach Smith Collection of London Antiquities," exclaims the antiquary and F.S.A.; "Buy the Bernal Collection of Mediæval Art," exclaims not less loudly the painter and R.A. Both advocates have strong claims to be heard; but why, let us ask, do they quarrel with one another? Why does counsel for the Roach Smith Museum disparage the Bernal Collection? Why does *his* for Bernal discredit the importance of the Roach Smith Museum? We have long been intimate with both collections, and can see much, very much indeed, to admire in both. That the trustees of the British Museum should secure Mr. Smith's Collection was our conviction the moment we heard that he was willing to part with it; and surely we felt that Government would be very remiss if it failed to obtain for the people all that was good in the Bernal sale. The antiquary who contends for Mr. Smith contrasts triumphantly three thousand pounds (Mr. Smith's price for his Museum) with the fifty thousand pounds required to obtain the Bernal Collection; but neither price (they are appraiser's prices) seems too large. Mr. Smith's Collection contains much that is very curious, and much (better still) that is curiously illustrative of London. No one has ever seen it without carrying away from it, not a coin or a curiosity, but some fresh certainty, from seeing it, of what London must have been like, and how our forefathers dressed who had sons to send to Crecy and Agincourt. "It would be ten thousand pities," says our F.S.A. friend, "that Mr. Smith's Museum should be lost to the nation." To which we would reply—"That securing it, my learned F.S.A., would be three thousand pounds well spent."

The Right Honourable the Lord Mayor—we are not, we believe, betraying a secret—gave a most admirable dinner last Saturday to his fellow members of the Garrick Club, and to a few other men of mark and fame that he thought (not untruly) would be glad to meet one another. There was a thick gathering of authors, artists, actors, M.P.'s, barristers, and of gentlemen at large. His Lordship looked and did his best. No £5000 profit on a plate after Landseer or Roberts could have given him, it was clear, so much satisfaction as the result of the £500 he was spending on the intelligent and merry lips before him. Lord Tenterden replied for the Club (he is its Vice-President) in a way that suggested a regret that he does not favour the House of Lords with his practical good sense and earnest eloquence. Lord Carlisle spoke for his relative, the noble President (his Grace of Devonshire), and Mr. Thackeray replied for authors generally in a way (a little sarcasm excepted) that gave more than satisfaction to his many admirers. Mr. Buckstone acknowledged the honour his Lordship had been pleased to pay to actors, and Mr. David Roberts the honour he had conferred on artists. There was but one omission, it is said—the Messrs. Staples should have been thanked for the excellence for their cookery and the choice character of their wines.

The death of Earl Stanhope has carried a well-known and able author into the House of Peers. Lord Mahon, the historian of England under the House of Hanover, is, by his father's death, Earl Stanhope. Those who know him best assure us that the dignity he has succeeded to will not lessen his love of letters, or his desire to appear once more as a faithful and able historian.

We have been touched by an anecdote (recently related in the House by Mr. Lowe) of the growing love for books which is now distinguishing not only our manufacturing towns, but our agricultural districts as well. Mr. Lowe is one of the members for Kidderminster—a town, he tells us, at the present moment not very flourishing in its manufactures, and unwilling, we thought, to contribute to the formation of a free library of its own. When the proposition for the levying of a halfpenny rate for a free library was publicly announced at Kidderminster, cards were issued calling upon the people not to throw away their money, or to tax themselves at a moment when so many of the inhabitants were without work. The appeal was fruitless, and the original proposition was carried, as Mr. Lowe tells us, by a large majority:—"Only about twenty persons voted against a free library; and those persons (he said it with every respect) were persons whose calling in life pointed to the supposition that they thought there was a better way of spending an evening than in reading-rooms and libraries."

Another letter, and one to the point, on the subject of "Moredun," deserves insertion. Here it is:—

52, Upper Norton-street, March 6th, 1855.

It is not my intention to take part in the controversy whether or not Sir Walter Scott wrote the romance of "Moredun." I merely wish to make a passing remark on the assertion that Scott *never used initials* in signing his letters, made by Mr. Huntly Gordon and Mr. Shena.

I have in my collection eighteen letters of Sir Walter's; some are signed "W. Scott," others "Walter Scott," *and one* "*W. S.*" The may be an isolated fact, a single exception, but so it is.

Mr. Gordon also says that Scott, in signing his name always *turned up* the bottom of the final letter t. Three of my letters prove the contrary.

The letter A is, however, throughout the whole of the eighteen letters (with only one exception) *without* the loop. That to which I allude is in a letter about a haunch of venison, and Lockhart's carving it, in which he says, "he hack'd and Hew'd it well enough." Yours, faithfully,

ROBERT COLE.

We observe, in the obituaries of the week, and with regret, that Copley Fielding, the celebrated painter in water-colours, died at Worthing on Saturday last, aged sixty-eight. He was at the very head of his profession, no artist ever having excelled him in his matchless rendering of English scenery—such as downs, waste lands, moors, &c. He was a most prolific painter, seldom allowing a season to pass by without at least a dozen exhibited works. He had, as he deserved, large prices, and his drawings will continue to be placed with the best examples of Girtin and Turner. Sussex was his favourite county.

SIR ROBERT PEEL has accepted the office of a Lord of the Admiralty, vacant by the appointment of the Hon. W. Cowper to the Under-Secretaryship for the Home Department

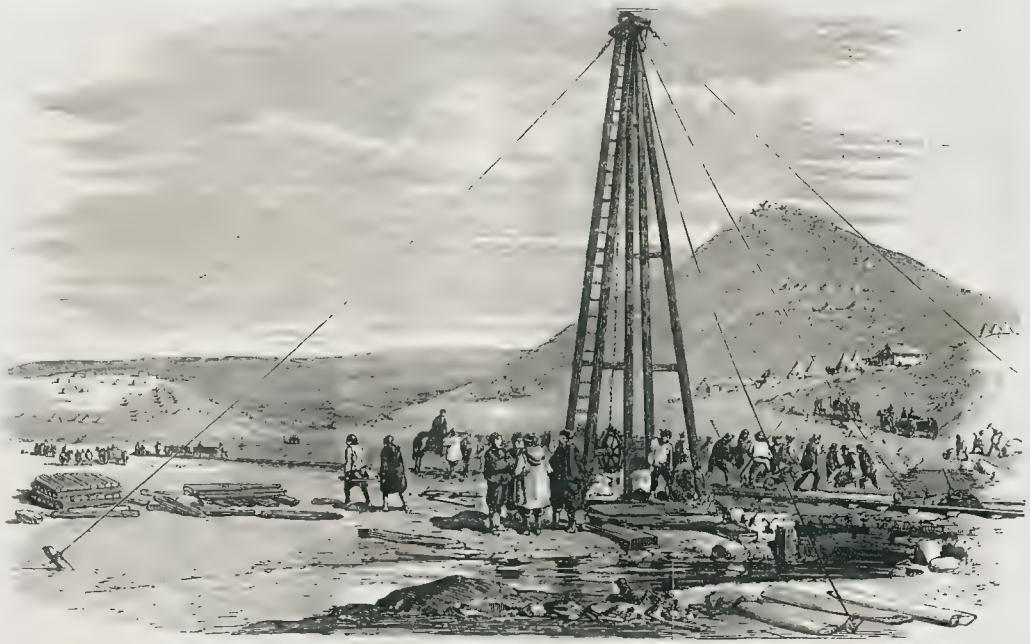
THE Solicitor-General for Ireland was returned for Ennis on Thursday without opposition.

MR. BAXTER has been returned for the Montrose Burghs by a majority of 44 over Sir John Ogilvy. The number were—for Baxter, 473; for Ogilvy, 429 Both were Liberals

PORTSMOUTH ELECTION.—Viscount Monck, who has accepted office as Lord of the Treasury, is to be opposed by Mr. Serjeant Gaselee, who has announced himself as a candidate for the representation upon Radical principles

FIRES AND LOSS OF LIFE.—There have been two fires this week, attended with loss of life. Both of them took place on Thursday: one between twelve and one in the morning, at No. 2, Clipstone-street, Portland-road; the other about noon, in a building called the Farringdon-Market Rel-ple House, Farringdon-street. In the latter the fire extended so rapidly as to cut off the retreat of two young women in the upper part of the house, one of whom, in desperation, threw herself from the window into the street, killing herself upon the spot. A Mrs. Hayward, with two of her daughters and a Miss Kelso, were burned to death at the fire in Clipstone-street

COMMENCEMENT OF THE RAILWAY WORKS AT BALACLAVA.



KADIKOI, THE HEAD-QUARTERS OF SIR COLIN CAMPBELL, BEFORE SEBASTOPOL.

THE NAVVIES AT BALACLAVA.

It ought to be consolatory to Mr. Carlyle and the mourners over the degeneracy of these our latter days, that there is at least one institution, and that a pre-eminently English one, which, despite innate drawbacks and all sorts of deteriorating influences, exhibits all its original stamina and pristine healthiness—to wit, the British Navvy. Everything we hear and read, from every quarter, testifies to the energetic skill, and matured progression of the great undertaking now advancing between Balaclava and the cannon-bristling heights of Sebastopol; and there cannot be a doubt that, when it has reached its terminus, those engaged upon it may safely adopt the motto of their honoured chief, Sir Morton Peto—"Ad Finem Fidelis."

It is already known that about 1¼ mile of the road from Balaclava was completed on the 16th of February; and it was expected that Kadikoi the first dépôt would be reached on the 19th. The whole distance from the harbour to the trenches is about 6½ miles. To render the first four promptly available is the primary and important object. The statement made by Mr. Dundas, M.P., on Monday last, before the Roebuck Committee of Inquiry, as to the state of Balaclava and the approaches around, is fully corroborated by letters before us, coming down to a much later date than the experience of the member for Linlithgow extends. The roads were frightful, the men working up to their middles in mud, while dead horses strewed the ground in every direction. The anticipation of the atmospheric consequences of this state of things had produced serious forebodings; and naturally so, when the reader hears that complaints had been made of the sultriness of the weather in the middle of last month, the thermometer being then 58 deg., though a few days previously 16 deg below freezing-point. It is this extraordinary vicissitude which renders the climate of the Crimea so difficult to be provided against, and therefore so trying to the constitution. But before the apprehended pollution from these decomposing carcases can set in, it is hoped that Mr. Rawlinson, the able engineering head of the Sanitary Commission, and whose great experience in the operation of the Health of Towns' measures pointed him out as peculiarly eligible for the present service, will have caused the removal of those accumulations which have long rendered the vicinage of Balaclava a synonym in every vocabulary for every abomination.

The want of horses has hitherto been the great drawback to the speedy realisation of the advantages expected to accrue from the railway. These were quite sufficient for all the purposes they were originally expected to be called on to fulfil; for in that, as in every other respect, the provision made by Captain Andrews, of the North of Europe Steam Company, under whose supervision the whole of the arrangements of the expedition were conducted, amply met all legitimate requirements. But, owing to the total deficiency of resources on the spot, the horses had not merely to be employed in making the line, but in working it, as far and as fast as it could be made; and hence the cry for more and more live-draught power. Eighty more, with thirty drivers, are on their way to Balaclava in the *City of Norwich* steamer, followed by the *Propeller*, carrying a large supply of fodder, of which there is great want in the Crimea. Both these steamers are paddles, and in the selection of these, and the total exclusion of screws, the heads of the Navvy expedition have shown infinite sagacity, as compared with Government officials. Screw steamers, even of the very largest burden, as was exemplified in the case of the leviathan *Himalaya*, are quite unfitted for horse conveyance. With the very first puff of wind they begin to roll, and do not right themselves so long as the least wind continues, for the horses, being placed athwart, necessarily roll

THE RAILWAY WORKS AT BALACLAVA.

with the ship, and, in endeavouring to preserve their own perpendicular, cause her to sway. So great is the effect from the latter cause, that even in the case of a paddle steamer, though she may have run perfectly level across an ocean, yet, when she comes into smooth water, say in the Thames, the motion of the cattle communicates an oscillation to her, and they often suffer more from a brief detention in smooth water from this cause than in a fortnight's steaming in colerably rough weather. The tendency of the paddles, in addition to the low sails, is to keep the steamer upright, and, of course to keep the cattle straight on their legs; whereas a screw has all the disadvantages of a sailer, and the horses are literally knocked to pieces during a boisterous voyage. Numerous costly illustrations of this truism have been afforded during the present "chartering" crisis; but the North of Europe Steam Navigation Company steered clear of the blunder, because of the experience Captain Andrews derived from the Danish shippers of horses and cattle between Tonning and Lowestoft, who would not now put a ton of live freight aboard a screw, knowing the deterioration that is caused as compared with what results from a voyage in a paddle. Fortunate had it been had the same species of disciplined judgment and business-like aptitude been availed of in the general fulfilment of governmental intentions! At the same time it is but the merest justice to the Duke of Newcastle to state, that, so far as he was personally concerned, all the practical capacity attainable was secured; and, when secured, was left unthwarted and unchecked by official intervention or routine immobility. Over whatever operation he could exercise undivided individual control, he exercised it wisely and well, and chiefly by guaranteeing it immunity from the hindrances of precedent and the hamperings of pedantry. In respect to this railroad expedition, for instance—the sole governmental merit of which belongs exclusively to his Grace—he placed it unreservedly in the hands of those to whom he had originally committed it; he ensured them the full exercise of their discretion—not only here, but in the Crimea—which he was wholly unable to do in other matters and with other bodies; and he is certainly deserving of a large share of the éclat which now accompanies its successful and invaluable prosecution. The *Times* has suggested the superiority of a plank-road; but the rail has this advantage, that the materials are far easier to convey to the spot: a plank-road of twenty feet wide would require fifty feet bulk per yard, while a railroad requires only about four feet bulk per yard.

The total number of workmen employed on the line, including those sent from Constantinople, is now nearly 900; and it is most gratifying to be able to add, that out of so large a number, drawn from a class not remarkable for habits of self-control, and placed in a sphere of novelty where great irregularities might be reasonably looked for, not a single instance has occurred demanding the Provost Marshal, though in the ranks of the Army that functionary finds no such sinecure. A great deal of this must be attributed to the presence of the Rev. Mr. Gyngle, Chaplain of the (Navvy) Forces, who has had a place of worship erected, and also the excellent example of Captain Lyon and zeal set them by the officers of the corps, viz:—Mr. Beatty, Mr. Kellock, Mr. Lance, Mr. Campbell, Mr. Raymond, Mr Shawse, and Mr. Camidge, the secretary and paymaster. Mr. Alfred Hawse, the surgeon to the corps, has given every satisfaction to those who have needed his services—fortunately very few so far, and of these none have been seriously ill.

Our first Illustration shows the commencement of the railway works, at Balaclava. In the foreground are a party of navvies loading a truck with rails; on the left is the shipping in the harbour; and, so far as the Crimean railway expedition is concerned, is under the excellent superintendence of Captain Raymond, R.N. Above the town, on a dry gravelly soil, are the wooden huts erected for the accommodation of the workmen: and on the highest eminence is the signal-post. As the huts are put up, the navvies give names, conspicuously emblazoned, to the buildings, calling one Peto-terrace, another Preston-hall, others Napoleon, Victoria, Blackwall, Suffolk, London, and so on. The second Illustration is a view near Kadikoi (head-quarters of Sir Colin Campbell), up to which point the railway is by this time completed, and in the hands of the military authorities; who, we may again take the opportunity of stating, are most favourable to the enterprise, and most courteous and considerate to all engaged in its promotion.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS

NOTE.—The sign + denotes above the average, and the sign — below the average

The *reading of the barometer* decreased from 29.32 inches at the beginning of the week, to 28.88 inches by the 3rd; increased to 29.86 inches by the 5th; decreased to 29.69 inches by the 7th; and increased to 30.07 inches by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29.610 inches.

The mean temperature of the week was 39·8°, being 0·9° below the average of the corresponding week during thirty-eight years.

The range of temperature during the week was 27·5° being the difference between the highest reading on the 5th, and the lowest on the 8th.

The mean daily range of temperature during the week was 19·2°. The least was 13.1° on the 2nd, and the greatest 24·9° on the 6th.

Rain fell during the week to the depth of four-tenths of an inch.

The weather has been for the most part fine. Some rain fell on the first three days of the week, and fog has recently been prevalent. The nights have been cold.

Lewisham, March 9, 1855 JAMES GLAISHER

HEALTH OF LONDON.—The number of births within the metropolitan districts in the week ending March 3, was 1726: of these, 838 were boys, and 888 girls. The average numbers from the preceding 10 years in the month of the year, were 793 boys and 757 girls. The number of deaths registered within the same time was 1560, exceeding the calculated number for the week by no less than 384: indicating clearly, that though the rigorous weather has passed away, its effects still continue to be felt. The deaths in the last seven weeks were 10,968, and have exceeded the average for the period by 2285. The effect of the temperature on the colds:—

The average deaths from pneumonia, bronchitis, and asthma, in six weeks, are 961: the number from other causes rose to 2349 in six weeks. The cold, therefore, quickly brings to a fatal termination many chronic diseases which, are not induced by the cold.

CITY OF LONDON ELECTION.—On Saturday morning the election for the city of London, rendered necessary by the acceptance of office of Lord John Russell, took place in the Guildhall. Lord John Russell having been proposed and seconded, Mr. Alderman and Sheriff Muggeridge asked whether any elector had another candidate to propose: Mr J. Stonor proposed Sir Charles Napier; but the nomination not being seconded, Alderman and Sheriff Muggeridge declared Lord John Russell duly elected, amidst loud cheers. Mr. Samuel Morley then came forward to propose the following resolution.

That, at a period like the present, when, by gross mismanagement on the part of the Executive Government, the high position of this country in the scale of nations has been in danger of being compromised, the citizens of London, in common hall, having elected as their representative in Parliament the noble Lord who has accepted office as one of her Majesty's principal secretaries of State, desire to place upon record the fact, that they have discharged this duty in the confident hope and trust that the Government, of which the noble Lord is so important a member, will immediately and firmly grapple with, and effectually remove, the causes of that disastrous mismanagement which has been displayed in the conduct of the war, and by which, whether it has arisen from adherence to routine in the departments, from the incapacity of the men presiding over and employed in them, or from the overwhelming influence of political patronage, must, if left unremedied, involve the honour, the safety, and the free institutions of this country in extreme peril.

The resolution having been unanimously agreed to, Mr. P. A. Taylor declared that the four points, on the basis of which Lord John Russell had gone to Vienna to negotiate, were disgraceful and traitorous. Having declared that the British people would have been delighted with a movement in favour of the depressed nationalities of Hungary, Poland, and Italy, he concluded by moving the adoption of the following resolution:—

That in the opinion of this meeting no treaty with Russia will be satisfactory that does not enforce some material territorial clause.

The Sheriff declined to put the resolution, and Mr. Taylor then said he would submit it himself. He did so; and a large number of hands were held up in its favour.

IMPERIAL PARLIAMENT.

(Continued from page 235.)

HOUSE OF LORDS.—THURSDAY.

The Earl of ORKNEY called attention to the reported want of aptitude for their situations in the junior officers of her Majesty's service now on duty in the Crimea. The noble Earl proceeded at some length to vindicate their conduct from the charge that all the evils that had arisen to our army were attributable to the fact of the war in which we are engaged being treated by the Government as "a little war."

Lord PANMURE said that there were no grounds whatever for any such charges against the junior officers, whose conduct from the commencement of the war had been most gallant and honourable.

Their Lordships then granted permission to the Duke of Cambridge, the Earl of Lucan, the Earl of Cardigan, and Viscount Hardinge, to attend and give evidence before the Sebastopol Inquiry Committee.

HOUSE OF COMMONS.—THURSDAY.

Lord A. PAGET gave notice that on the 22nd inst. he would move an address to the Queen that the widows of officers killed in the Crimea would receive the value of their commissions, and that while on actual service no Income-tax should be deducted from the officers' pay.

THE NEWSPAPER-STAMP.

The CHANCELLOR of the EXCHEQUER, in reply to Mr. M. Gibson, said that, as he had so recently acceded to office, he had had no time to consider the provisions of the Newspaper-stamp Bill; and that, therefore, it would be impossible for him to proceed with it to-morrow (Friday). He would, however, endeavour to bring the matter forward before Friday week.

Mr. F. PEEL, in reply to Mr. Bramley Moore, stated that no order had been issued from the Horse Guards to the effect that officers must be on the sick list fourteen days before they could be removed from the Camp.

PUBLIC SCHOOLS AND UNIVERSITIES.

Mr. HEYWOOD moved for a Select Committee to inquire into the best means of affording to the nation a full and equal participation in all the advantages which are now exclusively or especially of an ecclesiastical character in the public schools and universities of England and Ireland, and of improving the Educational system in those great seats of learning, with a view to enlarge their course of instruction, in conformity with the requirements of the public service.

Mr. J. WART seconded the motion.

Lord PALMERSTON opposed it; and, after some discussion the motion was withdrawn.

WAGES (HOSIERY).

Sir H. HALFORD asked for leave to introduce a bill to restrain stoppages from wages in the hosiery manufacture.

Sir G. GREY opposed the motion, on the ground that the object was impracticable and merely tended to encourage a delusion. He would not, however, object to the reappointment of the Committee of last session.

Mr. FAGE, Sir J. Walmsley, and Mr. Booker supported the motion, on the ground that a measure of the kind was absolutely necessary for the welfare of the labouring classes.

Mr. GARDNER opposed the motion as an attempt by the Legislation to raise the wages of the operatives.

Mr. W. FOX denied that that was the object of the bill, but merely to compel the manufacturer to pay to the operative the wages he had honestly earned.

After some further discussion the House divided For the motion, 58; against it, 96: majority against the motion, 38.

VICE-ADMIRAL SIR CHARLES NAPIER

Mr MALINS called the attention of the House to the naval operations in the Baltic under Vice-Admiral Sir Charles Napier, and moved for a copy of any correspondence which had passed between the Board of Admiralty, or any member of her Majesty's Government, and Sir Charles Napier since the 20th day of December last. The hon. and learned gentleman read extracts from the correspondence which had taken place between the gallant Admiral and Sir James Graham, with the view of showing that Admiral Napier was actually dismissed for not attacking and destroying Sveaborg with his own fleet alone at the end of October—an operation which had been unanimously pronounced impracticable at so late a period as the month of September by the French and English Admirals at a conference held upon the subject on board the *Duke of Wellington*.

Sir T. HERBERT seconded the motion

Sir J. GRAHAM denied that Sir Charles Napier had been dismissed from his command of the fleet in the Baltic. However, since the return of the gallant Admiral to this country he had conducted himself so indiscreet, and his correspondence with the Admiralty from the outset had been so turbulent and insubordinate, that the Board of Admiralty felt they could not in justice order him to return to the Baltic. On the 24th of September Sir C. Napier wrote to the Admiralty that, in his opinion, Sveaborg was attackable by sea; and he (Sir J. Graham), in his reply on the 4th October, stated to his making the attack, but still expressed a hope that he would be guided by a sound discretion. Sir J. Graham then proceeded to censure the gallant Admiral for making disclosures of a confidential nature to the Swedish and learned gentleman who had undertaken his defence in that House.

Admiral WALCOTT justified the conduct of Sir C. Napier in the Baltic

Sir C. WOOD was opposed to the production of the papers, inasmuch as he thought that their publication would be injurious to the public service.

In the course of some further discussion, Lord PALMERSTON stated that he had then as high an opinion as he had ever entertained of Admiral Napier's abilities, and he was not disposed to retract a word he had uttered at the Reform dinner in praise of the gallant Admiral.

The motion was ultimately withdrawn.

HOUSE OF LORDS.—FRIDAY.

Lord St. LEONARDS asked whether the Government had any new schemes in contemplation in respect to the granting of tickets of leave to convicts?

Earl GRANVILLE said that the Government regretted the defects of the present system, but it had been found impossible to adhere to the old plan of transportation. The present scheme had been resorted to as a choice of evils, and he was not prepared to say that the Government had any other system under consideration.

Earl GREY was of opinion that the old system of transportation, though defective, was on some respects preferable to that now in use.

The Lord CHANCELLOR defended the Bill he had introduced under which the present system of tickets of leave was established.

The Exchequer Bills (£17,185,000) Bill was read a second time.

The Earl of DERBY asked whether the Government intended to make any arrangement for carrying on the business of the Colonial Department, which was the more necessary in the event of the prolonged absence of Lord John Russell?

Earl GRANVILLE said that measures had been taken by the Government to prevent any inconvenience being suffered by the public in consequence of the absence of Lord John Russell. The present Secretary for the Home Department, Sir G. Grey, who had so recently discharged the duties of Colonial Secretary, had undertaken the business of the Colonial-office until the return of Lord J. Russell, who would not be delayed beyond Easter.

HOUSE OF COMMONS.—FRIDAY.

MINISTERIAL APPOINTMENT.

On the motion of Mr. HAYTER a new writ was ordered to issue for TRURO, in the room of Sir Robert Peel, who has accepted the office of one of the Lords of the Admiralty.

Lord ELCHO asked the hon. member for Bristol whether it was his intention to bring forward the motion respecting the conduct of Lord Raglan which he had given notice of to the country, felt it his duty to demand immediate inquiry into the grave charges made against his professional character by Lord Raglan?

Mr. H. BERKELEY thought that such an inquiry should be instituted but he was unwilling to postpone his motion until after the inquiry, sought for—should it take place.

THE NEWSPAPER-STAMP BILL.

The CHANCELLOR of the EXCHEQUER, in reply to Mr. Ricardo, said he would bring on the Newspaper-stamp Bill on Monday week.

VOLUNTEER RIFLE CORPS.

Mr WILLIAMS called the attention of the Government to the discouragement which had been offered to volunteer Rifle Corps.

Lord PALMERSTON said when he was in the House office, he received a great many offers of the character referred to, but he did not consider that such corps would be of much service to the country

Mr. MAGUIRE brought forward the petition of the House certain improvements made in breach loading arms by Mr. Sharp, an American gentleman, by which the weapon could be loaded and discharged fourteen times in one minute.

Mr. MONSELL said that the improvements were still under the consideration of the Government.

The House resolved itself into a Committee of Supply upon the Ordnance Estimates; and the remainder of the night was occupied by a consideration of the votes

A ROMAN ELECTIONEERING PLACARD.—In an establishment of ancient baths, discovered some time since among the ruins of Pompeii, in the street called the Odeon, there have lately been uncovered several grated windows looking into the street, and a door flanked by two pilasters, above which is painted this inscription:—"P. FVR. II. V.V.B. O. VF. Publium Furium duumvirum virum bonum oro vos fanatis" ("I beg you to name as duumvir P Furius, an honest man"). This is evidently a sort of placard made at the moment of an election

MUSIC.

A SERIES of Vocal Concerts, consisting of glees, quartets, and concerted pieces, selected entirely from the numerous works of Sir Henry Bishop, has been commenced at the Hanover-square rooms, under the management of Mr. Mitchell, of Bond-street. They are afternoon concerts: the first took place on Tuesday last, commencing at half-past three o'clock and ending before five; a judicious brevity, sufficient for the full enjoyment of a highly refined and classical entertainment, and entirely avoiding the satiety which may be produced by the finest music, when it belongs entirely to one class, and is all from the pen of one composer. These concerts, as might have been expected, have excited much interest. Bishop is a great and honoured name in English music; and, indeed, we doubt whether the whole history of the art in this country furnishes the name of another musician who has exercised a greater influence on its state and progress, or has earned a more solid and enduring reputation. Music, more than any other art, is liable to the vicissitudes of taste and fashion; and this is especially the case with dramatic music—that branch of the art which Bishop has chiefly cultivated. The entertainments of the stage are continually undergoing changes in form and structure. The old pass away, and are succeeded by new, which grow old, and pass away in their turn. There is not a single dramatic work of our old English composers—not even of the greatest of them—which now keeps its place on the stage. All the pieces of our Purcells, Arnes, Shields, Arnolds, Linleys—pieces so charming, and once so popular—have disappeared, and are forgotten. But the composers themselves are not forgotten. Their operas, which formed the enchantment of our youthful days, are no more represented; but the beautiful songs, and duets, and glees, and concerted pieces with which they were enriched have not perished with them. They still live, and will still be heard with delight, so long as the English people retain the taste for the pure, natural, and expressive melody of their country. Among these older English composers Bishop must now be classed; for, though he happily lives among us in the enjoyment of a green old age, his chief works have existed these thirty or forty years—some of them—long period in the history of the stage. But, though Bishop's dramatic pieces, like those of his predecessors, have passed away, yet the gems they contain are imperishable, and time will have no effect in dimming their lustre. His vocal pieces are now transferred from the theatre to the chamber; and, in our social and domestic circles, will ever continue to delight every one whose taste preserves its wholesome nationality, and is not vitiated by the foreign affectations of the day. In speaking thus, we would not be misunderstood as indulging a vulgar prejudice against the foreign schools of music, from which the English musician may derive the greatest benefit. Purcell himself, the most thoroughly national of all our musicians, was an assiduous student of the Italian composers of his day. In his own words, he "faithfully endeavoured a just imitation of the most far-famed Italian masters; and he adds, that "though unskilful in the Italian language, he thinks he may warrantably affirm that he is not mistaken in the power of the Italian notes, or the elegancy of their compositions." Bishop, in like manner, studied in the Italian school. He had an Italian education, and learned to engraft the grace and smoothness of Italy upon the native melody of his own country. It has always been remarked that the great charm of Bishop's music lies in its *naturalness*—as if it were the simple effusion of feeling flowing in an easy and copious stream from a "well of music undefiled." Limpid transparency is a character of Bishop's music; it is never rendered turbid by elaboration, and its seeming artlessness is really the consummation of art. Such music will grow old, but cannot grow antiquated. The melodies of Bishop (like those of Purcell and Arne) will be as fresh a century hence as they are now.

The concert of Tuesday last consisted of a selection of glees and concerted pieces, chiefly taken from Bishop's theatrical works; care being taken to choose such as are most independent of the action and accessories of the stage. They were sung by Masters Sullivan, Cooke, Malsch, and Norman; Messrs. Frances, Benson, Lawler, Buckland, and Land. These dramatic pieces were to be accompanied on the pianoforte, and this was done by the composer himself; the glees, not originally written for the theatre, were of course sung without any instrumental accompaniment. Every piece in the programme had its own peculiar interest; those which appeared to make the strongest impression on the audience were, "Sleep, gentle lady" (one of Bishop's most popular compositions), composed for the opera of "Clari;" "Though he be now a grey, grey Friar, from "Maid Marian;" "The Savoyard," written for Sheridan Knowles's "William Tell;" the glees, "Hark, Apollo strikes the lyre," and the sextet, "Stay, prythee stay, the night is dark," from the "Miller and his Men" a piece which contains some of Bishop's very finest productions. All the music was admirably sung and warmly applauded, several things being loudly encored. The audience were very numerous, and of a highly musical cast; many "familiar faces" of our most distinguished musicians and lovers of music being visible in all parts of the room.

The second concert is announced for this day (Saturday). A full chorus is to be introduced; and the programme includes "The Clough and Crow," "The Tiger Crouches," "Fill, boys, fill," and several others of Bishop's most favourite choral pieces. This is a great improvement on the plan of the concerts, and we should have recommended it had not the suggestion been anticipated.

The HARMONIC UNION had their second concert at the Hanover-square Rooms, on Wednesday evening. It consisted of the "Lobgesang" (Hymn of Praise) of Mendelssohn, and the "Stabat Mater" of Rossini. The performance, as on the previous occasion, suffered from unavoidable causes. Mr. Sims Reeves was so much indisposed that, after singing for a part of the evening with a degree of effort painful to himself and the audience, he was forced to retire, and was replaced by Mr. Herberte; and Mrs. Reeves, from a similar cause was unable to appear at all. She was to have sustained the principal soprano part in the "Stabat Mater," which was taken by Madame Weiss in such a manner as to leave nothing to be desired. The second soprano part was excellently sung by Miss Lascelles, a young vocalist who is making great progress in her art. Mr. Herberte sung very well, but omitted the principal tenor air, "Cujus animam," for which, under the circumstances, he could not be blamed. The bass part was given by Mr. Weiss with an effect which no other singer of his class could have surpassed. The instrumental orchestra was very good, but the chorus was deficient in strength. The performance was conducted with great assiduity by Herr Molique, and, on the whole, was received with approbation by a large audience.

JENNY LIND—or, as she was named in the announcement, Jenny Lind-Goldsmidt, sang at the Hall of the Park, Amsterdam, on Wednesday and Saturday last. The Hall, though one of the largest in the city, was crowded to excess; and on Saturday morning not a single ticket could be had, and many paid three and four florins for the privilege of standing along the passages. Jenny Lind Goldsmidt was encored in all the songs, two of which she very good-naturedly repeated. Two or three of her magnificent cadenzas in "Quand je quittais," brought down thunders of applause; but nothing could have satisfied an audience more than her performance of a Norwegian echo-song. It took the quiet Dutch ladies and gentlemen by storm. Herr Goldsmidt's performance on the piano was also of the best, and earned immense applause. *From a Correspondent.*

On Wednesday evening the Master and Wardens of the Society of Apothecaries held a microscopical *conversazione*, at Apothecaries'-hall. The rooms were very well filled, and among those present were Professor Faraday, Dr. Carpenter, Dr. Graham, Mr. James Yates, Mr. Appold, and many eminent medical men.

ROYAL GALLERY OF ILLUSTRATION.—The Duke of Cambridge, with the Duchess of Cambridge and the Princess Mary, attended by the Hon. Miss Cocks and the Baroness Bunsen, honoured the Royal Gallery of Illustration with a visit on Wednesday evening. The Duke of Cambridge paid a second visit to the Gallery of Illustration on Wednesday afternoon.

A RUSSIAN PROPAGANDIST ORGAN.—About the middle of this month we expect to see a new journal, in the French language, started in Berlin by the Russian government, to be entitled, *Journal du Nord*. The funds are to be drawn from the Ministry of Foreign Affairs in St. Petersburg, and the paper will be conducted under the management of a member of the Russian Embassy here. The chief editor will be M. Cretzeanu-Joky, known in the literary world as a zealous defender of the order of Jesus. Two sub-editors will be supplied from the head-quarters of the Russian propaganda in Brussels, and a third from St. Petersburg.—*Letter from Berlin*

THE IRISH ARBORTION CASE.—An Irish paper states that the recognizances will, Mr Crampton says, be largely from imprisonment the attempted abduction of Miss Arbuthnot are as follows:—"That he shall enter into a bond, himself in £20,000, and two sureties in £5000 each, to keep the peace towards all her Majesty's subjects for ten years, and that, on liberation from gaol, he will quit the country until the term of his imprisonment shall have expired Mr. Carden, agreeing to those stipulations, will be released at the approaching assizes of Clonmel, when he will depart for Brussels to recruit his health

THE SUPPRESSED PAMPHLET ON THE CONDUCT OF THE WAR.

NEVER was a war more discussed, -the subject of greater diversity of opinions, both as regards its policy and conduct, its general objects and its details, than that in which we are now engaged. Even before the first campaign is over we find military men, officers high in command, quitting the scene of action, and returning home to express opinions, or, more ominously, to assume an expressive silence upon past events, and to speculate vaguely upon the future; whilst others, who have hitherto taken no part in the war, have been even more forward to canvass the dispositions made by the Commanders. These discussions, or rather the occasion for them, are to be regretted; but it is impossible in these days of freedom of opinion and of expression to interdict them. The French Government, however, has attempted to do so, and the consequence has been that a pamphlet, entitled "De la Conduite de la Guerre d'Orient, Expédition de Crimée"—being a memoir addressed to the Government of the Emperor Napoleon III., and purporting to be written by a General Officer, in the French service—having been suppressed in France, has been taken to Brussels to be printed, where it is now being disseminated over all parts of Europe. France alone excepted. Whether this pamphlet be, as has been noised about, from the pen of Prince Napoleon, or from that of some underling retainer in his suite, it is impossible too strongly to denounce the evident bad spirit in which it has been got up; and the unscrupulous inaccuracies (many of them too flagrant to have been accidental) with which it abounds. That a Prince of the new Imperial House of France should, under the influence of personal pique, deliberately sit down to malign his Sovereign, his friend, his patron—to misrepresent his policy, and to pervert his motives—to blacken, also, the character of his superior in military rank, under whom, at his own urgent request, he served, and who fell a glorious but painful death in the midst of the execution of his duty, is hardly to be credited; and we would gladly see his Highness's character cleared of the foul imputation.* Meantime, however, the Pamphlet is sure to be read; and although, in its general tendencies, a mischievous purpose is too clearly perceptible, there are some matters which, in a military point of view, and particularly in reference to the strategy of the present campaign, it may be curious to speculate upon. In now examining some of these points, we need hardly caution the reader that we do so simply as a matter of abstract criticism, and without at all pinning faith to the statements of the author—some of which are probably correct, but many of which are unquestionably apocryphal.

Supposing the revelations of the "General Officer" as to the ruling policy of the campaign to be correct, the conclusion forced upon all readers must be, that never was a great military expedition, so brilliant in its external aspect, undertaken under more unfavourable circumstances, as regarded its *morale* and its internal organisation, than that of the Allied armies to the Crimea, in September, 1854. We say this irrespectively of abstract considerations of the wisdom and expediency of the undertaking itself. Two circumstances are to be noted in respect of this expedition, which might have defeated the wisest and best-laid plans:—First, it was undertaken against the inward conviction of a very large minority, if not actually of the majority of the principal Generals commanding; and, secondly, the officer commanding-in-chief in deference to whose views it was undertaken, was, from physical ailment, incapacitated from superintending its conduct, and was removed by death before the preliminary stages of the campaign were completed.

With regard to the Expedition itself, the writer paints in lively colours the enthusiasm of the troops, British and French, as they successively landed at Gallipoli, to the blended sounds of "God Save the Queen," and the "Marseillaise," and their high hopes of speedily engaging the common enemy, with the certainty of conquering. On the 21st of May the Allied Generals held a conference with Omer Pacha, at Varna, at which a combined plan of operations was agreed upon—the field of action being the Danube, which the "General Officer" insists was the only proper one. By the middle of June there were at Varna 38,000 or 40,000 of the Allied troops, who commanded to march on Schoumla and Silistria." The treaty of June 20th was signed between Austria and the Porte, by which the Principalities were put into the hands of the former Power, conferring upon Russia "the advantage of collecting all her forces upon any point that she (the Allies) might think proper to menace."

"The sorrow which the notification of the treaty of the 20th of June caused amongst the Generals and superior officers of the army was indescribable. The Prince Napoleon manifested the most lively indignation at it. The French General muttered something about treason (trahison), the Turks were absolutely at a loss to understand anything in the matter. "The English were silent—gave no expression of opinion, in accordance with their military habits. General Scarlett, on being spoken to on the subject, called his interlocutor, and left him on the plea of urgent business. It were vain to interrogate Lord Raglan and the Duke of Cambridge, they would have given no reply." Marshal St. Arnaud alone appeared to be satisfied, and to understand what was going on.

The invasion of Russia by the three Allied armies, by land, by which the Crimea might have been cut off like a wen, at the isthmus of Perekop, was abandoned; and the descent upon the Crimea, and siege of Sebastopol determined upon. The former was the plan of the Generals on the spot; the latter of the Emperor Napoleon himself. "It was in the Cabinet of the Tuileries that originated the idea of this expedition; it was conceived in solitude. The Emperor, bending over a map with attentive eye, the compasses in his hand, passed many long hours in elaborating this scheme, and he forwarded it to Constantinople entirely written out in his own hand, and without having previously communicated it to any one." These instructions reached Marshal St. Arnaud in the course of July; he accepted and adopted them without reserve or hesitation. A reconnaissance of the south-western coast of the Crimea was made by General Canrobert, General Brown, Admiral Lyons, and some other officers, from on board the *Furious*; but the observations so made were confined to the selection of a convenient place for landing, and the best route thence to Sebastopol; and had nothing to do with the position or resources of the enemy in the Crimea.

On the 10th of August a Council of War was held at Varna, at which the Marshal explained the idea of the projected expedition. The plan was to select a proper landing-place, effect the landing of the troops under the protection of the guns of the fleet, defeat the Russians in an engagement, and then "march straight upon Sebastopol and carry it by a *coup-de-main*." "All eyes were now turned towards Lord Raglan. He had a thoughtful aspect, and his face during some minutes past had expressed all the incredulity of his mind. Lord Raglan objected to the want of information as to the forces of the Russians, and the condition of the place on the land side. The maps furnished no indications upon the latter point. The roads, rivers, and natural obstacles were unknown. It was an unfavourable field for battle. The English General objected, above all, that the army was deficient in cavalry, whilst the Russians are well supplied with excellent horses.

"Vice-Admiral Hamelin spoke with some warmth. In his opinion the expedition, undertaken under such circumstances, resembled very much an adventure. The forces of the Allies appeared to him to be insufficient for the purpose." He then went on to point out that the fleet, though they might do good service in covering the landing of the troops, might afterwards, by stress of weather, be prevented from co-operating; and he pointed out with emphasis the treacherous character of the sea and winds in the autumn and winter months. Marshal St. Arnaud replied briefly, but with energy:—"He reiterated his former arguments with greater force;" and concluded by "resting on the very competent authority of the Emperor." Prince Napoleon spoke for three-quarters of an hour in opposition to the project:—"The authority of the Emperor," he insisted, "was no doubt very high in this matter; but the Emperor at Biarritz (whence the instructions had been dispatched) was not in a position to take account of the practical difficulties of the enterprise." He then went on to argue in favour of an expedition crossing the Danube and the Pruth for the capture of Perekop.

The account of this memorable Council thus concludes:—

"What will happen," asked Lord Raglan, "if the place resists, and if it should be well fortified?"

The Marshal replied that, in that case, they would have to lay a siege to it, and that, by occupying the fortifications on the northern side, they would necessarily become masters of the town. If the fortifications on the north presented too serious obstacles, it would be easy to pass to the south, turning the position, and to undertake a regular siege with the co-operation and protection of the fleets, which would find good anchorage on the coast, especially at Balaclava, already inspected by Sir Edmund Lyons.

The details of the expedition were then minutely entered into; and the proposal, upon being put to the vote, obtained the approbation of a large majority in the Council. Notwithstanding the very sensible objections expressed by him, Lord Raglan in the end gave an affirmative vote, thereby, Bosquet, the like; this was an error. The four who remained to the last in opposition to the scheme, were the Vice-Admiral Hamelin, Vice-Admiral Dundas, the Duke of Cambridge, and Prince Napoleon.

The events which followed are too fresh in our minds to need repetition. The fruitless bombardment of the town during seven consecutive days, from the 17th to the 24th of October, virtually brought the first campaign to a close; and at one time, particularly after the affair of Inkerman, it was seriously under discussion to end the affair, either by venturing an assault or re-embarking the troops. Neither course, however, was practicable, in face of the position held by the enemy.

To sum up, the "General Officer" says:—"Could we have taken Sebastopol by a *coup de main* on the northern side after the battle of Alma? Perhaps so; in any case it ought to have been attempted. Once arrived on the southern side, was it possible to reduce the place by bombardment and breaching? This is more questionable; the position was reversed, and to our disadvantage; for, after carrying the place, we should not, under any hypothesis, have been able to retain possession of it." As previously stated by Marshal St. Arnaud, the northern fortifications command the town; and one of these alone the Severna Fort—is armed with 300 pieces of large calibre, defended by a garrison of 3000 men:—"It is useless to make siege to the town of Sebastopol without the possession of that culminating point; and the place, supposing it to be reduced, would not be tenable as long as the Severna Fort is in the hands of the enemy."

We have only to add that, whilst we fully appreciate the disastrous commencement of this great expedition, we do not participate in the writer's discouraging expectations for the future

* The *Post* Correspondent of Paris writes:—

"I can assure you that Prince Napoleon indignantly repudiates the authorship of the pamphlet (the suppressed Pamphlet on the War) which has been attributed to him. At the same time the Prince allows that there are certain specific facts which may have derived their authority from letters or conversations of his. The moment the Prince heard of the Pamphlet he went to the Tuileries, and begged that inquiries might be instituted, and, for his own part, gave every possible facility in order to discover the real author."

CHESS.

TO CORRESPONDENTS.

C W., of S.—The following is the world-famed "Indian" Problem:—White: K at Q R sq, R at Q sq, Bs at K R 6th and K Kt 2nd; P s at K Kt 4th, K B 2nd, Q Kt 3rd, and Q R 2nd. Black: K at K 5th, Kt at K B 6th, Kt at K B 5th, P s at K 4th, Q K 3rd and 4th. White to play, and mate in four moves. Your Solution is correct.

J. Rose-house.—In Section of D Orville's beautiful End-game is the true one

F. S. of Norwich.—Contributors should always send their address. It is impossible to reply at our end of the Problem's submitted to us, through the medium of the paper.

F. H. H.—Your Solution should send the Solution. The position, if we mistake not, is an old one.

J. LEDGER, Rome.—A reply shall be forwarded in a few days. Meanwhile accept our cordial thanks.

R. M. D.—Any comment in a Problem, by and the ordinary one of White or Black to mate in as many moves as it contains, in our opinion, throws doubt on the position.

B. H.—A little study or attention would have shown you that the key to Enigma 910 is 1—1, Kt to K 5th (ch), &c. But, if 1, Kt to B 5th, the first move is Q to K 8th.

M. P., of C.—Too obvious.

J. GOLDER.—We are very sorry to say we cannot approve either of the design or execution. The compiler, it is evident from the antiquated blunder pointed out about Queening the Pawns, knows little or nothing of his subject, and the attempt to teach Chess as he would the game of Fox and Geese is a signal failure. Chess is essentially complex and scientific: diversified as these characteristics are, it would be no longer Chess—mysterious one—but a mere schoolboy's sport, utterly unworthy the regard of grave and studious minds.

A. M.—The key move to Judy's charming Problem, "Stella," is White. K to Q B 3rd.

21.—Your move in that by E. A. M. M. is—White P to Q B 3rd.

A. A. W. C.—Any shall be carefully examined.

CHESS.—In answers of blank Chess engravers, from Kent's, of Paternoster-row; and you can by return your manuscript in a fourth of the time.

M. C.—We do not think the operation of Castling is fairly allowable in a Chess problem.

A. J. Hendon.—Our wishes respecting your last most interesting and opportune discovery shall be made known to you by letter in a few days.

DELTA.—Try your skill upon the famous Indian Problem which we give in the present Number. This stranger is considered the first four-move position known.

VON H. d. L., Brussels.—The promised communications were duly dispatched through the channel indicated, on the 1st inst.

G. T. M.—Unpublished games of the late M. Kieseritzky are somewhat rare. A few, however, have recently been forwarded to this Journal by a distinguished French player, and are now nearly ready for the press.

SOLUTIONS OF PROBLEM NO. 675, by Rev. J. Abbatt, C. W. of S., Cymon, F. P. of N., Philo-Chess, Melios, M. T., J. H. of Hull, and A. A. W. C., are correct.

SOLUTIONS OF PROBLEM No. 676, by Dorcon, J. Stonehouse, F. T. Derby, E. H. Norwich, Pescia, D. D., Omega, F. D. Norwich, W. M. W., W. C. C. Oxford, Sherborn, E. S., Hagworth, J. A. M. of Bakewell, Ombron, Derby, R. T. L., Cantab, True Blue, Phiz, Alpha, An Old Soldier, are right. All others are wrong.

SOLUTION OF PROBLEM No. 675.

White to play, and mate in four moves.

ENAMELOID PHOTOGRAPHY.—We have just seen some portraits consisting of the usual paper photographs, cemented upon glass with gelatine by a method which has been practised for some months past by Mr. John Stone, of Clifton road, Brighton. Its superiority consists in making the uneven surface of paper acquire the appearance of enamel, bringing out the minute details of the picture with greatly increased distinctness, and giving a brilliancy of effect not hitherto obtained. To the photographs thus treated, Mr. Stone applies the name of enameloid, as it conveys at once an idea of their character.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Lord John Russell and suite arrived at Vienna on Sunday evening, at eight o'clock. Apartments have been taken for the noble Lord and his suite at the Hotel de Russie, Vienna, while the Russian Plenipotentiary to the Vienna Conferences, Councillor Von Titoff, is staying at the British Hotel in the same city.

The Empress of Austria was delivered of a daughter on Monday last.

The French Emperor and Empress drove in an open carriage, without escort of any kind, along the Boulevards on Tuesday afternoon. They alighted at a house on the Italian Boulevards, where they remained about an hour, and then proceeded on their promenade to the Champs Elysées.

The Right Hon. the Speaker gave his fourth Parliamentary dinner on Saturday, at his mansion in Eaton-square. The Speaker will hold two levees this season—the first on Saturday (to-day), the second on Saturday, March 17th, both at two o'clock.

The Emperor of Austria has addressed an autograph letter to King Victor Emmanuel, expressing his sincere condolence on the losses recently experienced by the Royal Family of Sardinia.

The Court of Directors of the East India Company have invited a distinguished party to meet at dinner on Saturday (to-day), at the London Tavern, Major-General Vivian and the officers of the Turkish Contingent, about to take their departure for the East.

The Archduke William, the personal friend of the new Emperor of Russia, left Vienna on Saturday last, with an autograph letter from the Emperor of Austria to the Emperor Alexander.

General the Marquis Alphonse de la Marmora, Commander-in-Chief of the Sardinian Contingent for the Crimea, accompanied by Lord Hatherton, visited Portsmouth on Saturday, and inspected the *Hannibal*, the fortifications, &c., and also the fortifications at Sconce Point, Isle of Wight.

The King of Denmark is seriously ill. On Monday the symptoms were alarming. The bulletins say that the cough is violent and fever severe, with great restlessness.

General Regnet, Aide-de-Camp to the French Emperor, has been nominated Commander of the First Division of Infantry of the Army of Paris, in the room of General Levasseur, who has been placed on the reserve.

Sir James Graham is making preparations for removing from the Admiralty to his mansion in Grosvenor-place; and Sir Charles Wood is about to vacate his residence in Belgrave-square, for the official residence attached to the post he has assumed in the new Ministry.

A letter from Vienna of the 23rd ult., states that the Grand Duchess Sophia is so indisposed as to be obliged to keep her room. It is also said that the Duke of Brunswick is seriously indisposed.

The gold medal annually granted by the English Government to an architect of distinguished merit, has been this year awarded to M. Hittorf, member of the Institute of France. This is the third time since its institution that this medal has been awarded to a foreigner.

The Earl of Gifford is appointed additional private secretary to Lord Panmure.

Prince Frederic Oscar has been named Commander of the Norwegian fleet.

The Chancellor of the Exchequer has appointed Sir Alexander Duff Gordon, Bart., of the Treasury, to be his private secretary.

Major Gowne, who was sent to the Crimea some time ago by the Piedmontese Government, has returned to Turin.

Mr. Layard has been elected Lord Rector of the Aberdeen University, by a majority of three out of the four nations over Col. Sykes.

M. Egger, member of the Académie des Inscriptions et Belles-Lettres, found in an Egyptian papyrus brought to France by M. Mariette, an unpublished fragment of a lost tragedy of Euripides.

Sir John Young, the late Irish Secretary, who has been appointed Lord High Commissioner of the Ionian Islands, will take his departure for Corfu about the end of the month.

The French Emperor has caused a number of fine horses to be purchased in the Calvados. The Prince Jerome has also just purchased four beautiful black carriage horses at Caen.

The Duke of Argyll has intimated his intention to be in Glasgow about the end of March or the beginning of April, for the purpose of being installed as Lord Rector of the University.

On the same day, and nearly at the same hour, that the Emperor of Russia died at St. Petersburg, the veteran Republican, Dupont (de l'Eure) breathed his last at Rougeperrier, in Normandy.

A bas-relief in white marble, representing Esculapius at the bedside of a patient, has just been brought over by the *Peluse* from Cyprus, in Asia Minor, for the museum of the Louvre.

Workmen have commenced the removal of the raised grass-plot in the centre of the court of the Louvre; and a pedestal is to be built on the site for an equestrian statue of Francis I., by Cognet.

Sir J. Liddell, G.C.B., and the members of the Sanitary Commission appointed to examine the state of the British military hospitals in the East, together with several civil engineers, sailed from Marseilles for Constantinople in the steam packet *Tamise* on the 26th ult.

The important office of Master of the Mint is now vacant, Sir John Herschel having tendered his resignation.

A Republican notability, named Bernard, who was the gravedigger of the French Executive Government in 1793, has just died in a village near Lyons. It was he who received from the hands of the Abbé Sylvain Renaud, the first Vicar of the church of St. Médéricus, for the purpose of burial, the bodies of King Louis XVI. and Marie Antoinette, which were both placed in open coffins.

The number of members of the French Academy is at present only thirty-nine—the chair formerly occupied by M. Baour-Lormain not having yet been filled up.

A banquet is to be given to Captain M'Clure, discoverer of the North-West Passage, in the borough of Wexford, on the 23rd of March, when a number of the neighbouring nobility and gentry are expected to be present.

On the 14th ult. the port of Odessa was frozen up to a distance of two versts from the shore; the thermometer registered twelve degrees of Réaumer below zero.

A Liverpool firm has been prosecuted for fraudulently obtaining the register of a Russian vessel as an English one, by pretending that it had changed owners. Decision on the case has been adjourned.

Shocks of an earthquake in Mexico were experienced on the 1st and 2nd of February, which caused some damage to the city.

Notwithstanding the demand for small-arms, the gunmakers of Birmingham connected with the Tower work are not fully employed. This arises partly from an inadequate supply of bayonets and other materials.

Several cases of cholera have occurred within the last fortnight at Berlin, although the average temperature has been about 8 deg. below zero, Réaumur. At St. Petersburg, with an average of 15 to 18 deg., the disease has increased.

At the last meeting of the Leicester board of guardians, the number relieved was stated by the clerk to be—Out-door, 2732; in-door, 826. Corresponding period last year—Out-door, 203; indoor, 503.

The glass trade in Birmingham is more than usually flat, and one of the principal firms in the town have reduced their workpeople to three days' employment per week.

While Europe has been undergoing so severe a winter, at Algeria, says the *Akhbar*, the thermometer has never been lower than eight degrees above zero Centigrade (47 Fah.), and that only for two days.

The project of arranging special direct trains from Berlin to Paris, during the Exhibition, is being matured into a plan.

Last week the licensing magistrates, at their meeting at Croydon, granted a spirit licence to Messrs. Staples for the Crystal Palace. In support of the application, evidence was given by Mr. Grove, the secretary, that 1,200,000 persons had been admitted to the Palace since its opening, and that £61,000 had been taken for refreshments.

The fire which broke out lately in the Imperial Palace at Prague destroyed twenty-two rooms, including two large saloons. The damage is estimated at about 1,500,000f.

An order for 20,000 spindles is now being completed in Preston, for a large manufacturing establishment at Bombay.

The committee of the Danish Volksthing has resolved not to admit the excess illegally charged on the national budget by the late Cabinet for military, naval, and other purposes. The ex-Ministers are to be impeached.

The annual account published on Saturday, shows that the receipts of the governors of Queen Anne's Bounty for the year 1853, amounted to £212,341, and the disbursements to £213,398.

A large fourgon, containing a printing-press for the Army of the Crimea, was embarked the other day on board the *Express* steamer at Lyons. On it was to be seen this inscription—*Armée d'Orient—Imprimerie Impériale*. Two of the best compositors of the Imperial printing establishment of Paris accompany it.

SALE OF THE BERNAL COLLECTION.

GROUP OF MAJOLICA FAENZA OR RAPHAEL WARE.

Doubtless many of our readers will be desirous to know somewhat concerning this celebrated Collection (now on the eve of dispersion, and which forms, perhaps, the most complete illustration of French art ever made by a private individual; including, besides, a great quantity of works of other nations, collected with such a union of zeal and refined taste as are rarely to be found combined.

Having been formed almost entirely during the last thirty years, of course falls short of the Strawberry-hill and Stowe collections in point of historical interest; but this is compensated for by its containing many interesting and beautiful examples from these and nearly all the other important cabinets both at home and abroad which have been dispersed during that period.

To do more than notice the most remarkable objects would require greater space than we can spare; and as numbers of our readers will doubtless have the pleasure of inspecting the entire Collection, it will be only necessary for us to point out the principal features, to assist them in doing so.

First amongst the most interesting portion are the Paintings and Miniatures, of which there are upwards of six hundred, many of them valuable not only as works of art, but as representing great historical celebrities, both English and foreign, of the last three centuries, terminating with the reign of Louis XVI. It is particularly rich in portraits of the sixteenth century, including many genuine works by Holbein, though not perhaps of the highest order of his productions. Of these "Nicholas Lord Vaux" (the poet), "Lady Johanna Abergavenny" (from Strawberry-hill), and "Ann of Cleves," are decidedly the best. The works of Francis Clouet, called Janet, are seldom seen to so great advantage as in the portraits of "Isabella, Queen of Charles IX." (which we have engraved), and "Eleanor, Queen of Francis I., and sister of Charles V.," which two gems appear to have escaped the touch of the restorer. A noble portrait of the "Cardinal Chatillon," by Primaticcio, is so fine that, spite of the signature and date, it has been attributed by Dr. Waagen and others to Holbein—an error which may well be excused. The "Duke of Saxony and his Court," and a portrait of "Sybilla, Duchess of Saxony," by Lucas Cranach; the "Earl of Leicester and Queen Elizabeth," by Zucchero; and "Lucy, Countess of Bedford," and "Jane, Marchioness of Winchester," by Mark Gerrard, are worthy of notice. A portrait of "Edward IV.," from the collection of the Leighs of Adlington, is one of great interest. The portraits of "Anna Maria of Austria, Queen of Philip II. of Spain," by Coello, and "Marie Louise d'Orleans, Queen of Charles II. of Spain," by Velasquez, are very fine. The "Czar Peter Dining with the Mayor of Dorkum," is a curious work of Gerard Wigmanna, the self-styled Raphael of Friesland. There are most capital portraits of "Mieris," "Ludolph," "Backhuyzen," and "Karel du Jardin," by their own hands. The Collection contains some of Rigaud's best works: amongst which may be noticed a small whole-length of "Louis XIV.," "The Comtesse de la Briffe" (known by the engraving of Drevet, &c.), "Mesdames La Vallière and Maintenon," by Mignard (the latter), from Quintin Craufurd's collection. "Maria Leckzinski, Queen of Louis XV." (by Nattier), "Madame de Pompadour" (by Greuze), and "Nell Gwynne" (by Lely), are extremely elegant. A small equestrian portrait of "William II. of Orange," by Cuyp, is genuine and carefully painted. Amongst the subject pictures—which are few, but of high quality—may be mentioned "The Annunciation," by Fra Angelica da Fiesole; "The Virgin and Infant Christ" (seated on a throne, with the Hospital of St. John at Bruges in the background), one of Hemmelinck's finest works; "The Ripoeo of the Holy Family and The Virgin with Infant," by Jean de Mabense, is of similar high character, and finished equal to the most laborious works of the later Dutch masters. "The Adoration of the Name of Jesus," attributed to Albert Durer, is interesting as containing portraits of Charles V. and other celebrated characters of that period.

Under the head of Miniatures, which include works nearly all the best painters, may be noticed "James I. and Anne of Denmark, by Hillyard; "Faulconberg" (Cromwell's son-in law), by Samuel Cooper· "Frederick, King of Bohemia," by Petitot; and a large elaborate subject by H. Bol, dated 1549.

Next in point of interest is the collection of Faenza Ware (or Majolica as it is sometimes called, from having originated in the island of Majorca) and Raphael Ware, from the Urbino manufactory, frequently representing the designs of that master. Of this there are about four hundred pieces; and it is believed that no other cabinet can at all compete with this either in the quantity or quality of its specimens, presenting a rare opportunity for the directors of our own Museum. Among them is the celebrated Stowe plate, and fine specimens with the monogramm of Fra Xanto and Maestro Giorgio, which are very uncommon. Of this ware we have engraved a group of Vases. There are also a few fine specimens of the fine ware of Bernard de Palissy.

Since her Majesty has been graciously pleased to allow the superb specimens of Sèvres porcelain contained in the Royal collections to be exhibited at Marlborough-house, the public have become familiarised with some of the most beautiful objects which have emanated from that renowned manufactory. In this particular, however, the Bernal Collection will not disappoint them, containing as it does about twenty vases of very great importance, and several hundred other specimens of the highest quality,—forming, doubtless,

GROUP OF VENETIAN AND GERMAN GLASS.

PORTRAIT OF ISABELLA, QUEEN OF CHARLES IX.

GROUP OF MEDIEVAL PLATE

as complete an illustration of this celebrated fabrique as is to be found in Europe.

The several German manufactures, as also the Oriental and Old Chelsea, are represented by superb examples; and the collection of Old Dresden can only be compared with the Sèvres, both in magnificence and extent;—in addition to which there are two hundred snuff-boxes of the same material, probably the largest and most varied assemblage ever brought together.

Next in rotation comes the cabinet of Venetian and German Glass, which includes all the rare varieties, and numbers many hundred pieces. Of these we have engraved a group. The Enamelled German Glass is particularly interesting and fine, most of the specimens bearing dates.

The assemblage of Cologne Ware and Gris de Flandres is extensive and interesting, as illustrating the costume of the period. One jug has the arms of Queen Elizabeth.

The collection of Works of Mediæval Art, of silver and other metal, cannot fail to excite great interest, including as it does very pure specimens of ecclesiastical ornaments, some of which it will be remembered formed part of the beautiful Exhibition at the Society of Arts in 1850, and a very fine assemblage of argenterie of the sixteenth and seventeenth centuries, with several fine works of the Byzantine period. Of this portion of the Collection we have also engraved some specimens

The cabinet of Limoges Enamels is very complete, and numbers above a hundred specimens by the Laudins, Courtois, Limousin, and other celebrated enamellers. We engrave a group

The Collection of Armour and Arms, both European and Oriental, is very perfect, including a complete *cap-à-pie* suit of elaborately-chased Italian work, of the early part of the sixteenth century; and another of German globose armour, equally fine. A breast-plate is of russet steel, most elaborately chased and inlaid with gold, quite equal to the works of Cellini, though said to be of Spanish workmanship, of about 1560. A pair of pistols and dagger, of the time and style of Louis XVI., may rival the manufacture of any age. A court jester's helmet, with nose and moustache, in relief, is very curious.

There are also above one hundred watches and clocks, the sixteenth and seventeenth centuries: one of the watches is said to have been presented by Charles I. to Colonel Hammond.

The magnificent apartments are decorated with the choicest productions of the French ateliers of the last century which supply the place of furniture. The names of Buhl, Reisner, Gouttere, and Chippendale will speak for themselves.

The sale, which is entrusted to Messrs. Christie and Manson, commenced at their rooms on Monday, and will continue thirty-two days We shall illustrate a few more specimens.

EWER AND TAZZA OF LIMOGES ENAMEL.

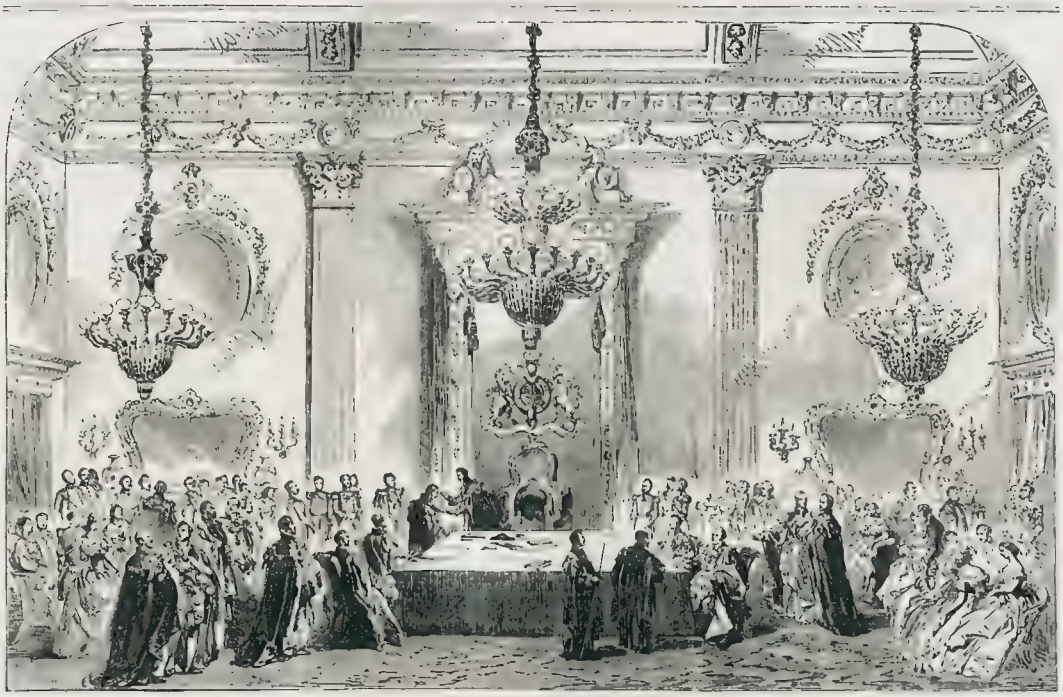
PHOTOGRAPHS OF PICTURES.

(*To the Editor of the* Illustrated London News)

I observe by several late issues of your paper that artists in England are taking Photography in hand, and with considerable success, judging from the woodcut copies of their productions in your Journal. It may be interesting to your readers to know that the subject is pursued with considerable vigour in some parts of the Continent; but, as far as my opportunities of observation have gone, it is brought to a greater pitch of perfection—at least, in one branch of the art—at Dresden than elsewhere. In the "Artistisch-Photographisches Institut, von E. and O. Brockmann, Albrechtgasse, No. 7," I lately had the pleasure of looking over a portfolio of Photographs, taken on glass and afterwards transferred to paper, from the magnificent collection of pictures in the Gallery of that city. Here I saw produced, with the fidelity of a pencil that could not err, the chefs-d'œuvre of Raphael, Rubens, Guido Reni, Holbein, Vanderwerft, Murillo, &c., which on the day previous I had admired in original on the walls of the Gallery. The beauty of execution generally, the delicacy and softness with which flesh and drapery were rendered, the clearness even to the very edges of the picture, and, lastly, the identity as it were of the copy and the original, claimed my warmest terms of praise. I purchased ten of the best specimens, and, on my return home, showed them to artists (painters) in Paris and to photographers in London. My judgment was fully confirmed by both, and they at once confessed that there was nothing produced in either of those capitals that could be compared to them. I made diligent inquiry in every shop where photographs were exposed for sale, if any copies of the originals in the Galleries at either capital were procurable. Sometimes the reply was in the affirmative, at others in the negative; but when in the former case the specimens came to be examined it was at once clear that they were photographs from *engravings* of the originals. In London, I was told, some attempts had been made on one occasion, which ended in an injury to one of the originals in the National Gallery, and that in consequence further experiments of such a nature were forbidden. However, Sir, I am a witness to the fact that the thing can be done most successfully without removing or touching the originals, provided there be sufficient light (a doubtful matter under the pepper-boxes of Trafalgar-square), and that the pictures are not too strong in certain colours which are antagonistic to the photographer's art.

I need not remind you or your artistic readers of the advantage that would accrue to the world if the great originals which enrich the Galleries of the different capitals of Europe could be reproduced in such quantities and on so diminutive a scale, that an artist might have duplicates of them in his studio, and that the traveller might bring away with him from every Gallery he visited absolutely accurate copies of the particular paintings that have won his admiration.

Zigkunks.



INVESTITURE OF THE ORDER OF ST. PATRICK, AT DUBLIN CASTLE.

INVESTITURE OF THE ORDER OF ST. PATRICK.

The accompanying Illustration represents the Investiture of Lord Cremorne and the Earl of Gosford with the Order of St Patrick, as described in our Journal of last week. This Order was first established by George III. in 1783—an act of justice no less than of policy, as there were two Orders of England and one of Scotland, and it was essential to conciliate Ireland by some manifestation of the King's favour. The Royal warrant was issued in the February of the year above named, commanding Letters Patent to pass under the Great Seal of Ireland, "for creating *a Society or Brotherhood*, to be called KNIGHTS OF THE MOST ILLUSTRIOUS ORDER OF ST. PATRICK." The Cross of St Patrick (a red Saltire), and a Golden Harp (the ancient Irish Ensign, together with the national badge, the Shamrock or Trefoil (to which the Saint had given celebrity, were made its principal symbols.

The new Order consisted of the Sovereign a Grand Master, and fifteen Knights; and of six officers, viz.—a Chancellor, Registrar, Secretary, Genealogist, Usher, and King of Arms; to which number a Prelate was immediately afterwards added. His Majesty, his heirs and successors, Kings of Great Britain, were declared to be the Sovereign, and his Lieutenant-General and General-Governor of Ireland, or the Lord-Deputy or Deputies, or the Lords Justices, or other Chief Governor or Governors of that Kingdom for the time being, were to officiate as Grand Masters. Every person of or above the rank of Knight was eligible to be elected a Knight of the Order; but of the fifteen originally nominated one was a Prince of the Blood Royal, one was a Duke, and thirteen were Earls of Ireland. The qualifications and forms of admission, the ceremonials, including investiture and installation, are similar to those in the Order of the Garter, the statutes of which were made, as far as possible, the model of those of the new fraternity. The Prelate was to be the Lord Archbishop of Armagh, Primate of all Ireland; the Chancellor was to be the Lord Archbishop of Dublin, and the Registrar was to be the Dean of the Cathedral Church of Saint Patrick for the time being. Ulster King of Arms and his successors were always to be the King of Arms of the Order; but all the other officers were to be appointed by the Sovereign.

The first Grand Master of the Order was George Nugent Temple Grenville, second Earl Temple, afterwards created Marquis of Buckingham who was then Lord-Lieutenant of Ireland.

The most memorable installation was that held by King George IV at Dublin in 1821. After it a banquet was given in St. Patrick's-hall, at which the Knights Companions sate at the Sovereign's table, which crossed the hall, according to the order of their stalls, together with the Prelate, Chancellor, and Registrar. There were also two tables running down the hall, which were occupied by the nobility and other persons of distinction, who had been specially invited; the Lord Mayor presiding at the one, and the General Commanding the Forces at the other. The general effect of the spectacle is said to have been most splendid; and the installation of the Knights of St. Patrick on that occasion will always form a memorable event in the History of Ireland. While his Majesty remained in Dublin he constantly wore the Star, Ribband, and Badge of the Order of Saint Patrick, and usually appeared with a shamrock in his hat

SCENE FROM MEYERBEER'S NEW OPERA, "L'ETOILE DU NORD," AT DRURY-LANE THEATRE.—(SEE NEXT PAGE.)

THE THEATRES.

DRURY-LANE.

THE Sketch on the preceding page represents the last scene of the second act of Meyerbeer's new opera, "L'Etoile du Nord," at Drury-lane. In this scene the *Emperor* has confronted and overawed the conspirators, who have submitted and received his pardon; and he is in the act of leading his now reunited troops against their enemies the Swedes, accompanied by a grand martial chorus; the whole forming a very effective finale.

THE STANDARD. This theatre on Saturday last produced the great Shakspearian epic, in the dramatic form, of "Antony and Cleopatra," with Mr. H. Marston and Miss Glyn as the representatives of the imperial lovers. Numbers were attracted in consequence to this immense and popular theatre who had never before witnessed its interior. It was crowded with an audience for the most part respectably attired, and deeply attentive to the business of the scene. That the star system should have this tendency to the East, and that the legitimate—the Shakspearian—drama should be so readily planted among the masses, is a sign of the times not to be disregarded, and partly to be accounted for by the improved education of the people. The tragedy in question was mounted with great care and perfection; the scenery being throughout magnificent, the costume various and imposing. That such a tragedy should have been advertured on such a stage is, however, a natural result of Mr. Phelps's admirable management of Sadler's Wells; and the heroine on whom the success of the experiment depends, owes likewise her introduction to the character to the opportunity afforded her on the Islington stage. Dramatic reform is thus striking its roots in the popular mind; and in no long time we shall find it progressing from the east to the west; and, the circle having thus completed itself, there is abundant reason to believe that the national drama may regain the ascendancy that has been interrupted only, not abolished. Already, there are indications of the coming harvest, and we have strong hopes that our more influential and intelligent performers will ere long return to their first love, and prove the fidelity of their attachment to the cause of that poetry which proved the chief glory of the Elizabethan age, and may yet illustrate the fortunes of the Victorian. Miss Glyn's performance of *Cleopatra* has already commended itself to the critics as a remarkable instance of histrionic and personal suitability in the actress for the specific character. From the beginning it was felt that competition was hopeless, and accordingly none of our great actresses have as yet attempted to share the triumph that Miss Glyn had so signally achieved. So many attributes are required to satisfy an ideal so abstract as the Shaksperian portrait of the Egyptian Cleopatra, that the highest talent and genius might fail in the attempt. In Miss Glyn meet, in an extraordinary manner, the specific qualifications that themselves required; and hence we have, in her acting of the part, something that is perfectly unique and inimitable. The manner in which she played it on Saturday was exquisite—surprising. Such dash, rapidity, force, dazzling effect, we have seldom seen on the greatest or the classical kind, and his personal manner, on the stage, not unlike that of C. Kemble himself, who probably was Mr. Marston's original model. He made, at any rate, a capital lover for Miss Glyn's *Cleopatra*, and for tenderness and amorous pathos is not to be exceeded. He also made a deep impression on the audience, who greeted him with frequent applause, and unanimously recalled him before the curtain, both in the middle, and at the end, of the performance.

LYCEUM. An extraordinary trifle, called "Take that Girl Away," was produced on Monday. It is, of course, an adaptation of the usual piece—to wit, "Otez votre fille, s'il vous plait," and of that class in which amusement is the only purpose of the playwright. The annoyance suffered by an artist from a young lady's constantly occupying the opposite balcony is the motive of the action. The first angries that arise by invoking him to "take that girl away" next falls in love with the girl herself; contrives her abduction; gets her father's consent to the match; transfers her former lover to her sister; then falls in love with that sister himself, is afterwards reconverted to his first impression, and concurs in the original arrangement; but doubts, as the curtain descends, whether the other state of things would not have been the better after all.

ST. JAMES'S.—Mr. Markwell has translated for this theatre a French piece, in which Mdlle Rachel once acted, devoted to the final intrigue of the Czarina and the infant Peter Ivanoff. The young prince indulges in a *penchant* for a French chevalier, and Peter's valuable time is wasted in unravelling the miserable intrigue for four tedious acts, until poison puts an end to the tyrant's suffering. The only thing noteworthy in the performance was the acting of Mrs. Simpson in the character of the irascible *Emperor*. His début is certainly promising, and we hope to see him better supported in something better. The parts in general were spoiled by the immature efforts of amateur candidates for stage distinction, whom it would be cruelty, and therefore folly to criticise.

MARYLEBONE.—Mr. and Mrs. Wallack have this week appeared for the first time as *Leontes* and *Hermione*, in "The Winter's Tale," and, as they always do, portrayed the characters not only with great force, but originality. Mr. Wallack, by his searching analysis, brought out effects in the *Leontes* which we had never previously seen developed, and kept his audience in an extraordinary state of excitement regarding a character which usually awakens no sympathy. Much novel business also was introduced by Mrs. Wallack, both in the trial and statue scenes of *Hermione*, which was highly appreciated, and indeed commanded the unanimous applause of a very respectable house.

NATIONAL SPORTS.

THE late severe weather has been such a practical and salutary satirist on the growing absurdity of winter race-meetings, that their promoters will think twice before they fix them so early in 1856. The greatest dissatisfaction was felt at Lord Sefton's second postponement of the Liverpool Meeting, all the fat-race engagements were voided thereby. The same remark applies to Nottingham, which was obliged to exercise the best sport it could; while Lincoln was suffered to die out altogether, and reappears under the Johnson *régime* in a totally new shape, during Passion Week.

Next week will be rich in sport and flat racing, as the season will begin in thorough earnest at Doncaster, which claims Tuesday and Wednesday. The principal features of Tuesday are the Great National Steeplechase and the Imperial Stakes, which will probably bring to the post about twenty out of the fifty dozen two-year-olds engaged. The Doncaster Handicap will be the great event of the second day; and the sports will be varied by the Hunt Steeplechase, which invariably produces more falls than race in the year. About £565 is added to the eleven events. On Thursday and Friday the Racing will take a dividend fury: a few will proceed southward to Salisbury, while the majority will go on to Thirsk, which has this year revived its ancient meeting, and met with no small success in entries.

The regular Steeplechase Meetings for the week are:—Derby (3), on Monday; Diss (2), and Chipping Norton (3), on Tuesday; Nuneaton (4), and St. Ives (2), on Wednesday; King's Lynn (3), and Market Rasen (2), on Thursday; and the long postponed Westbury (3), on Friday.

Coursers are also working hard to make up their leeway. The Amicable Hampton and Oswestry (Ashton) are the fixtures for Tuesday; Spelthorne stands for Tuesday, &c; Sundorne and Mountainstown (Meath) for Tuesday and Wednesday; and Eldgrave for Wednesday, Thursday, and Friday. Cumberland has a little meeting to itself on Thursday; and Waverley has bespoken Mr. McGeorge's services for Thursday, Friday, and Saturday.

The racing stables are in very full work at present; and Polydore, Afghan, and Habena are receiving the most marked attention from the Newmarket fancy. The latter bids fair to make up her leeway. The Amicable with Nettle, who is kept very quiet at Richmond. The public will not have Polydore, in spite of the assumed confidence of Nat and the stable. We believe that the 2000 Guineas will prove him to be thoroughly slow. In this opinion we are joined by most of the knowing ones; Ingmaster, St. Hubert, &c.; but Lord of the Isles is reported weak on his front joints and in a very doubtful way both as regards this race and the Derby.

The pigeon shooting challenger is not likely to back takers, as a keeper of Sir William Cookes's, of Wheatley-hall, near Doncaster, offers, match others, to shoot him for £150 aside. Another of Sir William's keepers has just made one of the most sporting shots of the season, and brought down two wild swans right and left. The gunners were more unsuccessful with two gigantic birds, which they traced close to the Ouse by footmarks, but unlike those which the bucolic mind of South Devon has been lately attributing to Satanic pressure. We hardly wonder that the Devon naturalists forgot the existence of the badger, as this race of animals is fast following the fate of wolves in England; although in one or two parts of Yorkshire it still furnishes most delightful midnight sport to the keepers. The trapper thrusts a sack whose mouth is kept open by a hoop, into its rocky hole, and then mounting an adjacent tree, with the hoop-strings in his hand, tighten s them the instant the badger enters, and then bears him home in triumph to the door. The greatest caution is required, as even a faint whisper on a still night would sound the alarm. Ruff's "Spring Racing Guide" will appear in a few days, and we know of no other literary novelty.

COVENTRY MEETING.—TUESDAY

Handicap Plate.—Lady Flora, 1. Romeo, 2.
Selling Stakes.—Nemesis, 1. Cotton Lady, 2.
Coventry Handicap.—Kitefyer, 1. Sleeping Partner, 3.
Craven Steeplechase Handicap. Augustine, 1. Tom Gurney, 2.
Free Handicap Hurdle Race. Warwick, 1. Star of England, 2.

LIVERPOOL SPRING MEETING.—WEDNESDAY.

Tyro Stakes.—St. Armand, 1. The Baroness, 2.
Scrumble Handicap.—Riverside Hero, 1. The Young Hack, 2.
Liverpool Spring Cup.—Prince Plausible, 1. Lady Tatton, 2.
Optional Selling Stakes.—Royal George, 1. Puncture, 2.
Grand National Steeplechase Handicap.—Wanderer, 1. Freetrader, 2.
Ambree Plate.—Media., 1.
The Trial Stakes did not fill.

NOTTINGHAM RACES.—THURSDAY.

Trial Stakes.—Lady Vernon, 1. Black Pepper, 2
Nottingham Handicap.—Jack Leeming, 1. Miss Allen, 2.
Little John Stakes.—Ingot, 1. Sergeant, 2.
Grand Stand Stakes. Eva, 1 Helmet, 2.

FRIDAY

Junkeegers' Plate.—Helmet, 1. Kennyside Hero, 2.
Forest Plate—Miss Allen, 1. Falcon, 2.
Castle Stakes.—Leybourne, 1. Whitelock, 2
Hurdle Race.—Tom Gurney, 1. Warwick, 2

TATTERSALL'S.—THURSDAY

GREAT METROPOLITAN.—Even 5 sovs each (1): 10 sovs each Fanalanges (1)
CHESTER CUP.—25 to 1 agst Mare Antony (1): 50 to 1 agst Weathercock (1).
DERBY.—5 to 1 agst St. Hubert (1): 12 to 1 agst Gemcubus Eurioca (1); 25 to 1 agst Oulston (1); 2000 to 30 agst Sir George (1).

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The market for all National Securities was far from active on Monday, and the quotations suffered a slight decline towards the close of business. The Three per Cents Reduced marked the first at 93⅝; the Three per Cent Consols, 93⅜ to 93½; the New Three per Cents, 94¼ down to 94⅛; the New Two-and-a-Half per Cents, 80½; Consols for Account, 93⅝ ⅜ to 93⅝. Long Annuities were done at 4⅝. India Stock was 232 to 233. India Bonds, 15s.; Exchequer-bills were 5s. lower—the quotations being 8s. to 6s. prm. On Tuesday Bank Stock was 213½, whilst most other securities were rather flat. The Three per Cent Consols realized 93⅜ ½ ⅝; the Three per Cents Reduced, 93⅜ ½ ⅝; the New Three per Cents varied from 93¾ to 94⅛; Long Annuities, 4 9-16 ⅜; India Stock, 234; India Bonds, 10s.; Exchequer-bills, 5s. to 8s. prm.; Exchequer-bonds were 93½. Very little change took place in prices on Wednesday:—Bank Stock was 214 to 216; the Three per Cents Reduced marked 93⅝ ⅞; the Three per Cent Consols, 93⅞ to 93⅝; Consols for Account, 93⅝ to 93⅞; New Three per Cents, 93⅞ to 94, with div. for Money; Long Annuities, 4 5-16; India Stock, 226 to 228; India Bonds, 13s.; Exchequer-bills, 5s. to 8s. prm.; Exchequer-bonds, 93½. On Thursday business was quiet, owing to the settlement of the Account. Consols opened at 93⅝, fell to 93⅜, and left off at 93; the Reduced Threes were 93⅜ to 93⅝; Bank Stock 215 to 214½; Exchequer-bills, 5s. to 8s.; and India Bonds, 10s. to 13s. prm.

On the whole, the Foreign House has been firm. The actual money business doing in it, however, has been very moderate.

There has been a very fair demand for Joint-Stock Bank Shares, and the quotations have been well supported:—Australasian realized 82; English, Scottish, and Australian Chartered, 15⅞; London Chartered of Australia, 21⅛; London Joint Stock, 27½; London and Westminster, 41½; New South Wales, 19; Provincial of Ireland, 68½; Union of Australia, 68½; Union of London, 29½. Miscellaneous Securities have sold to some extent, at very full prices.

On the whole, the Market for Railway Shares has been steady. In the general quotations, no change has taken place. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Ambergate, Nottingham, and Boston, 47; Bristol and Exeter, 96½; Caledonian, 64½; Chester and Holyhead, 12; East Anglian, 14½; Eastern Counties, 3¾ ex div.; Great Western, 64¼ ex div.; Lancashire and Yorkshire, 77½; London and Brighton, 99½; London and North-Western, 99¾ div.; Ditto, Extension Shares, 6⅛ and B C, 5⅝ ex div.; Ditto, Eighths, 12⅝ ex div.; London and South-Western, 86¾ ex div.; Manchester, Sheffield, and Lincolnshire, 24⅝; Midland, 69¾ ex div.; Newport, Abergavenny, and Hereford, 11½; Norfolk, 48; North British, 24; North Eastern, Berwick, 72½ ex div.; Ditto, York, 50 ⅛ ex div.; North Staffordshire, 13; South Devon, 1¼ div.; South-Eastern, 61½; South Wales, 28¾ ex div.; Waterford and Kilkenny, 4.

LIBERA LEASED AT FIXED RENTALS.—Buckinghamshire, 96¾ ex div.; Gloucester and Dean Forest, 26; London and Greenwich, 13; Royston, Hitchin, and Shepreth, 12½ ex div.

PREFERENCE SHARES.—Eastern Counties Extension, Five per Cent, 4 prem ex div.; Ditto, No. 2, 2 prem ex div.; Edinburgh, Perth, and Dundee, Five per Cent, 63; Great Northern, Four-and-a-Half per Cent, 103½; Great Western, Four-and-a-Half per Cent, 96¾; Lancashire and Yorkshire, Five per Cent, 107; Manchester Shares, 14½; Manchester, Sheffield, and Lincolnshire, New £10 Shares, 12½; Ditto, £6, 4⅞; North British, 102½; North-Eastern, Berwick, Five per Cents, 93¾ ex div.; Oxford, Worcester, and Wolverhampton, £15, Five per Cent, 19½ ex div.; South Devon, 13¼ ex div.; South-Eastern (Reading Annuities), 2⅜; Waterford and Kilkenny, Six per Cents, 18.

FOREIGN.—Antwerp and Rotterdam, 8; Belgian Eastern Junction, 1½; Dutch Rhenish, 8¼; East Indian Five per Cent, 223; Grand Trunk of Canada Six per Cent—Stock till 1860—79; Great Central of France, 11⅜; Great Luxembourg Constituted Shares, 2⅜; Great Western of Canada—Shares—17⅜; Ditto, Bonds, 97½; Paris and Lyons, 37⅜; Royal Danish, 19⅜; Scinde, ⅝ prem.; Zealand, 18¾.

Mining Shares have been firm. On Thursday Australian were done at 1⅜; Imperial Brazilian, 2⅛; St. John del Rey, 30; Cobre Copper, 47⅜; Linares, 6⅜; United Mexican, 3¾.

Friday Evening.

Consols have slightly improved to-day, with a steady market. The Three per Cents for the Account have marked 93⅝ ⅞; the Three per Cents Reduced, 93⅝; and the New Three per Cents, 93¾. India Bonds, 12s.; Exchequer Bills, 6s. to 4s. prm. In Foreign Stocks and Railway Shares only a limited amount of business has been transacted.

THE MARKETS.

CORN EXCHANGE (Friday).—Only a limited supply of English wheat has been received up to our market during the present week, yet as last season's samples are now in full request, the trade is very sluggish state at Monday's decline. Foreign wheat is in good demand, at full prices. Most kinds, however, are nearly inactive, so little business was transacted that prices were almost nominal. The barley trade was in a dopress state, and, therefore, prices have given way 1s. per quarter. Malt and barely, at 1s. per quarter less. We had no fresh arrivals of Irish oats, in which an average business was doing on rather lower terms. Beans and peas were very dull. The flour trade was heavy, and the top price of English was 60s. per 280lbs. Several parcels have arrived from Spain and the United States.

MARK-LANE.—Monday.—Arrivals of wheat, 1910; barley, 7040; malt, 800; oats, 6200; flour, 2550. Irish: wheat, 870; flour, 2000. Foreign: wheat, 3870; flour [illegible].

Essex and Kent.—Red wheat, 48s. to 52s.; fine ditto, white, 60s. to 72s.; Norfolk and Suffolk red, 42s. to 46s.; fine ditto, white, 52s. to 56s.; rye, 32s. to 34s.; grinding barley, 26s. to 30s.; malting, 28s. to 32s.; Lincoln, Norfolk, and Yorkshire brown malt, 52s. to 54s.; Kingston and Ware, 58s. to 60s.; Chevalier, 70s. to 72s.; Torbolton, 56s. to 58s.; potato oats, 26s. to 28s.; potato ditto, 30s. to 32s.; Youghal and Cork ditto, black, 23s. to 25s.; ditto, white, 25s. to 27s.; Dublin ditto, 26s. to 28s.; grey peas, 36s. to 38s.; maple, 36s. to 38s.; white, 36s. to 38s.; boilers, 38s. to 40s.; tick beans, 36s. to 40s.; Harrow ditto, 40s. to 42s.; Lisbon ditto; potato ditto; Egyptian ditto; Odessa ditto, 30s. to 32s.; Marianopoli ditto, 30s. to 32s. per load.

Barley, 1s. per quarter less; malt, 2s. per quarter less.

Linseed cakes, 70s. to 72s.; Hull, crushed, [illegible]; Mediterranean and Odessa, 68s. per ton; hempseed, 40s. to 42s. per quarter; coriander, 17s. to 18s. per cwt.; brown mustard seed, 10s. to 14s.; white, 8s. to 10s.; tares, 11s. to 12s. per bushel; English rapeseed, £40 to £45 per last; foreign ditto, £36 to £38; cake, £11 to £12; ditto, £10 to £12 10s.; rape cakes, £6 5s. to £6 10s. per ton; canary, 44s. to 48s. per quarter.

Seed.—The business done in red trefoil in the metropolis is rare from 9d to 10d, of household at 11d per 14 lbs.

Imperial Mark-lane Report.—Wheat, 46s 6d; barley, 30s 10d; oats, 24s 3d; rye, 43s 7d; beans, 42s 3d; peas 43s 1l.

The Bell Weekly Messenger.—Wheat, 47s 11d; barley, 31s 10d; oats, 25s 11d; rye, 43s 6d; beans, 42s 3d; peas 43s 1l.

English Grain and Seed Trade Report.—Wheat, 49,462 barley, 7,101; oats, 18,785; rye, 63; beans, 7,421; peas, 1,947 quarters.

Liverpool.—The imports of wheat have exceeded 100,000 packages, yet the demand for most kinds is dull and steady, at very full prices. Common sound congou, 9½d. per lb.

Hull.—The trade reports have been languishing, at very full prices; but low and damp qualities have sold slowly, at barely late rates. In crushed and foreign sugars—the latter quite a nominal quotation. Refined goods are tolerably firm. Brown Lumps, 42s. 6d.; and white ditto, 44s.

Wool.—Monday.—Arrivals, 1214 bales; clover ditto, 23 to £4 10s.; and straw, £1 12s. to £1 16s.

Potatoes.—The supplies are very moderate, but fully equal to the demand. York Regents are selling at 110s. to 120s.; Scotch and Essex ditto, 60s. to 100s.; Scotch ditto, 100s. to 110s.; Ilfs, 70s. to 80s.; Lincoln, 100s. to 110s. per ton.

Hops (Friday).—Although our prices are rather lower than last week, the demand for fine hops may be considered steady. Inferior parcels are very dull. This week's imports amount to 1cb bales from New York, 30d and East Kent pockets, £14 10s. to £20; Weald of Kent, £14 to £15 15s.; Sussex, £14 to £15 15s.; [illegible]

[illegible] Harvey 10s.; Bedley, 17s.; Belmont, 10s.; Harwell, 22s.; [illegible]

[illegible]

The Lost old Downs realized 5s. per 8 lbs. The few lambs in the market changed hands at from 5s. to 5s. 6d. per 8lbs. We had a good inquiry for calves, at very full prices. Pigs were quite as dear on Monday. Beasts were sold steadily, at from 4l4 to 4l9 each, including their small calf.

Per 8 lbs. to sink the offals:—Coarse and inferior beasts, 3s. 6d. to 3s. 8d.; second quality ditto 3s. 10d. to 4s. 4d.; prime large oxen, 4s. 6d. to 4s. 8d.; prime small ditto, 4s. 10d. to 5s. 0d.; coarse and inferior sheep, 3s. 8d. to 3s. 10d.; second quality ditto, 4s. 0d. to 4s. 4d.; prime coarse woolled ditto, 4s. 6d. to 4s. 10d.; prime Southdown ditto, 5s. 0d. to 5s. 2d.; large lambs, 5s. 2d. to 5s. 8d.; prime small ditto, 5s. 10d. to 6s. 2d.; large hogs 3s. 6d. to 3s. 8d.; neat small porkers, 4s. 0d. to 4s. 2d.; suckling calves, 22s. to 28s.; and quarter old store pigs, 20s. to 22s. each. Total, 26,960 beasts, 8800 cows, 130 calves, 34,230 sheep, 3420 lambs, 1200 pigs.

Newgate and Leadenhall Market (Friday).—The general demand ruled somewhat active, with very moderate supplies on offer.

Per 8 lbs. by the carcase:—Inferior beef, 3s. 2d. to 3s. 4d.; middling ditto, 3s. 6d. to 3s. 8d.; prime large ditto 3s. 10d. to 4s. 0d.; ditto small ditto, 4s. 2d. to 4s. 4d.; large pork, 3s. 0d. to 3s. 8d.; inferior mutton 3s. 4d. to 3s. 6d.; middling ditto, 3s. 8d. to 3s. 10d.; prime ditto, 4s. 0d. to 4s. 6d.; veal, 3s. 10d. to 4s. 10d.; small pork, 3s. 10d. to 4s. 6d.

THE LONDON GAZETTE.

TUESDAY, MARCH 6.

BANKRUPTS

R. F. BARNES, Sloane-street, Chelsea, wine-merchant. T. BESWICK, Half-Moon-street, Piccadilly, licensed victualler. T. BAIN, Covent-garden, and J. COWAN, Devereux-square, Middle-temple, coal-factors. J. CLARE, Regent-terrace, City-road, tavern-keeper. J. E. BINGLEY, Grove-terrace, St. John's-wood, shoemaker. C. HARLOW, Portsea, draper, brazier, and ironmonger. J. HOLLAND, Glamorganshire, grocer. H. J. EDWARDS, Aberavon, Glamorganshire, grocer. W. H. MINNIS, Plymouth, grocer. J. W. ASHTON, Jun., Horsforth, Yorkshire, cloth manufacturer. J. W. DOBSON, Lowborn, Yorkshire, cloth manufacturer. T. WAGNER, Rawmarsh, Yorkshire, painter. J. LAMBERT, Bradford, Yorkshire, cloth dresser. J. WAGNER, Rawmarsh, Yorkshire, painter. J. LAMBERT, Bradford, Yorkshire, cloth dresser. J. H. HAND and A. HAND, merchants of Liverpool, brokers. E. SPARROW, Liverpool, metal broker. J. FENTON Holmes-mill, Crawshaw Booth, near Rawtenstall, Lancashire, cotton manufacturer.

SCOTCH SEQUESTRATIONS

T. CARGILL, Dundee, flax-spinner. J. WILKIE, Glasgow, warehouseman. CAMPBELL, MACRAE, and CO., Glasgow, merchants. A. BIRNIE, Dundee, merchant. P. MUDIE, and CO., Dundee, tanners.

FRIDAY, MARCH 9

WAR DEPARTMENT

5th Dragoon Guards (Carbineers): Lieut. J. H. Hibbert to be Cornet and Adjutant, vice Bent, promoted. 6th, Lieut. T. D. S. Norbury to be Captain, without purchase, vice Cornet T. Bott to be Lieutenant, without purchase, vice Lieut. J. Hall, who has retired. Cornet F. Bott to be Lieutenant, without purchase, vice Norbury. 6th, Lieut. W. H. Reid to be Captain, vice Cornet T. Bott to be Lieutenant. 3rd Light Dragoons: Cornet A. R. Mansel to be Lieutenant, vice Bagge, who exchanges. 7th, Cornet Sir Percy Hesketh Bt. to be Riding Master, vice Bagge, who exchanges. 10th, Assist.-Surg. J. Fraser to be Surgeon.

1st Foot: Brevet Lieut.-Col. H. Mostyn Jones, to be Major, by purchase, vice Wyndham, who retires. Lieut. and Adjt. W. Smith, to be Captain, by purchase, vice Jones. Ensign F. D. Gridiston to be Lieutenant, by purchase, vice Smith. 3rd: Brevet Lieut.-Col. T. St. Y. H. Troubridge to be Lieutenant-Colonel; Lieut. and Capt. J. Bentley, to be Major, by purchase, vice Malan, who retires. Lieut. G. Beauchamp to be Lieutenant and Captain, by purchase, vice Bentley. Ensign W. H. Burland and J. Hall, to be Lieutenants. 4th, Brevet Lieut.-Col. J. Watson to be Lieutenant-Colonel, vice Ensigns J. D. Bradley, H. Barrow, and W. H. Seaton to be Lieutenants, being Majors of Brigade. Lieut. and Capt. J. R. Dalton and [illegible] to be Captains. [illegible] to be Lieutenants. 5th, Lieut.-Col. C. Cole to be Lieutenant-Colonel, vice Ensigns A. H. Dirom, J. Hall, and W. H. Isaacson to be Lieutenants. Lieut. [illegible] to be Captain. [illegible] to be Lieutenant. 6th, Lieut. and Capt. J. Bentham to be Major, by purchase, vice Bent, promoted. Lieut. and Capt. J. Russell to be Captain, by purchase, vice Bentham. Lieut. [illegible] to be Captain. [illegible] to be Lieutenant. 7th, Lieut.-Col. J. Watson to be Lieutenant-Colonel, vice Ensigns D. Bradley, H. Barrow, and W. H. Seaton to be Lieutenants, being Majors of Brigade. Lieut. and Capt. J. R. Dalton and [illegible] to be Captains. [illegible] to be Lieutenants. 8th, Lieut.-Col. C. Cole to be Lieutenant-Colonel, vice Ensigns A. H. Dirom, J. Hall, and W. H. Isaacson to be Lieutenants. Lieut. [illegible] to be Captain. [illegible] to be Lieutenant. 9th, Brevet Lieut.-Col. H. Rooke to be Lieutenant-Colonel, vice Ensigns A. H. Dirom, J. Hall, and W. H. Isaacson to be Lieutenants. Lieut. [illegible] to be Captain. [illegible] to be Lieutenant. 10th, Brevet Lieut.-Col. H. Bunbury to be Lieutenant-Colonel, vice Ensigns D. Bradley, H. Barrow, and W. H. Seaton to be Lieutenants, being Majors of Brigade. Lieut. and Capt. J. R. Dalton and [illegible] to be Captains. [illegible] to be Lieutenants. 11th, Brevet Lieut.-Col. H. Bunbury to be Lieutenant-Colonel, vice Ensigns the Hon. W. Plunkett and J. Lawrence to be Lieutenants. 12th, Major R. J. Baumgartner to be Lieutenant-Colonel, vice Major C. F. Irwin and Lieutenant-Colonel C. F. Irwin and J. Perkins to be Majors. [illegible] to be Lieutenant. 13th, Brevet Lieut.-Col. J. J. Pattullo to be Lieutenant-Colonel, vice Ensigns J. B. Hyde, H. Bunbury, E. M. G. Smith, and N. W. Massey, to be Lieutenants. [illegible] to be Lieutenant. 14th, Major J. D. Jocelyn to be Lieutenant-Colonel, vice Ensigns J. Thompson and T. Worthington to be Lieutenants; Ensign W. Hayne to be Lieutenant, vice Ensign H. J. Bunbury, who retires upon half-pay. Lieut.-Col. R. D. Kelly to be Lieutenant-Colonel and Ensign R. Keay to be Lieutenant. 15th, Brevet Lieut.-Col. R. D. Kelly to be Lieutenant-Colonel and Ensign R. Keay to be Lieutenant. 16th, Brevet Lieut.-Col. J. J. Pattullo to be Lieutenant-Colonel, vice Ensigns J. B. Hyde, H. Bunbury, E. M. G. Smith, and N. W. Massey, to be Lieutenants. [illegible] to be Lieutenant. 17th, Major J. D. LADIES are invited to inspect SPARKES HALL'S STOCK of SATIN and KID SHOES, which will be found well assorted and in good taste. He begs to announce a very great reduction in price, which he has recently effected by improvements in the cutting-out and manufacture of Boots and Shoes, which now enable him to offer three pairs of hose for the price of two. The quality of his kid and shoes has always been the best, and he pledges himself that it shall continue to be so. In future, his French morocco, kid, bronze, and satin shoes will be of one uniform price—viz., 6s. 6d. per pair, of any size or colour. Elastic Boots, in Black and colours, for the promenade, or dress, Opera, or improved ankle, with kid facings, 5s. 6d. per pair. Enamelled and Camlet Over-shoes, 6s. 6d. and 7s. 6d. Sparkes Hall, Maker to the Queen and the Royal Family, 308, Regent-street, opposite the Polytechnic Institution. N.B.—An Illustrated Price List sent free to any part of the United Kingdom, on receipt of Two Postage Stamps.

PATENT FUSEE CANDLE COOKING LAMPS will boil or stew a pound of meat in one hour—boil water, eggs, rice, soup, &c.—giving at the same time a most brilliant light, is fixed in a mirror-arm a Reading Lamp and Hand Lantern. The Patent Fusee Candles can be instantly lighted as a lucifer, are made of hard stearine, will keep good for years in any climate. The cost in burning is as three one halfpenny per hour; the re gold of the Lamp complete, with one canister of Candles, sufficient to cook a month, supposing the Lamp to be in use eight hours per day, is under twelve pounds. The size of the two together, as in the box as drawn, is inches high, and six inches wide, proving it to be in fact portable, efficient, and economical lamp that has yet been invented for the Army in the Crimea and the public generally. Sold by the Patentee, 50, Albany-street, Regent's-park

N.B. Every Lamp bears a Label. S. CLARKE'S Patent Fusee Candle Cooking Lamp

HYDE CLARKE, Secretary.

17, Gracechurch-street, 9th March, 1855.

THE ASYLUM LIFE ASSURANCE OFFICE, 73, Cornhill, London. Established 1824. Policies on Healthy and Diseased Lives, at Home and Abroad, for Civil, Military, and Naval Employments. The only Office on purely Proprietary principles, involving therefore no Partnership among Policy-holders. For Prospectuses, Proposal Papers, &c., apply to MANLEY HOPKINS, Resident Director

THE ROYAL EXCHANGE ASSURANCE CORPORATION.

Established A.D. 1720, by Charter of King George the First

Chief Office in the Royal Exchange, London. Branch, 29, Pall-mall. Fire, Life, and Marine Assurances may be effected with this Corporation on safe and liberal terms.

The Assured are exempt from liabilities of Partnership, and participate in the whole profits of the Corporation, which are periodically declared. They enjoy the advantages of modern practice with the stability of an office established by Royal Charter under several Acts of Parliament, and tested by the experience of nearly a century and a half.

Prospectuses with Tables of the Premiums and of the Bonuses declared in the Life Department may be had on application at the Branch.

JOHN A. HIGHAM, Actuary and Secretary

THE NORWICH UNION REVERSIONARY INTEREST COMPANY)

Office, 23, Lincoln's-inn-fields. Established 1836

This Company has for its object the purchase of every description of reversionary property, whether absolute or contingent, and to advance principal sums, or grant immediate annuities, on the security of reversionary property and life interests

The paid-up and reserve of [illegible] capital, the Company affords the peculiar advantages of paying a liberal rate of interest, and securing them from all personal liabilities

The Shares are £5 each (paying a dividend of £5 per cent per annum, payable half-yearly, from all deductions for Income-tax), and may be paid for either in full, or by instal ments of £3 on allotment, and £2 in not more than six months

Every information may be obtained upon application at the Company's office.

By order of the Board,

March, 1855. H. ROBBS, Secretary.

CHARING-CROSS HOSPITAL, West Strand.

The Committee earnestly solicits the attention of this Hospital, which is entirely dependent on voluntary subscriptions and the legacies of deceased benefactors, and to which there are annually admitted upwards of 2,000 cases of accident, many of which, but for this asylum, might perish

Donations will be thankfully received at the Hospital by the Committee and Secretary; and by Messrs. Drummond, 49, Charing-cross; Messrs. Coutts, 59, Strand; Messrs. Hoare, 37, Fleet-street; and the clergy, at the principal bankers.

JOHN ROBERTSON, Hon. Sec.

ROYAL WESTMINSTER OPHTHALMIC HOSPITAL, CHARING-CROSS

The assistance of the benevolent is earnestly entreated in support of this Hospital, which is open to the indigent persons suffering from Diseases of the Eye, the funds of which are wholly inadequate to meet the increasing demand for relief, 5000 poor persons are annually admitted: there are thirty beds for in-patients; and it is earnestly to be deplored that the insufficiency of funds compels the committee to the admission of only half that number

Contributions will be received by Messrs. Coutts and Co., Messrs. Drummonds, and by the Secretary, Mr. G. C. Farrar, at the Hospital

THE WESTMINSTER SOUP SOCIETY are now supplying a large quantity of soup, and affording relief to a great number of the poor, twice a week; but, in consequence of the present severity of the weather, and the numerous applicants whom they are obliged to refuse, the Society have determined upon opening their Kitchen three times instead of twice a week, which will entail a considerable additional expense. The public are, therefore, earnestly solicited to assist by their subscriptions in this good work

Donations will be thankfully received by the Treasurers: and for each subscription a corresponding number of tickets will be supplied.

J. C. HOBHOUSE, Esq., } Treasurers.
W. H. SMITH, Millbank-st., }
WILLIAM, Millbank-street, Westminster, } Secretaries.

N.B. The Soup-Kitchen in Orkham-street will be open on Tuesdays, Fridays, and Saturday mornings at Nine o'clock.

London: HERBERT, 98, Cheapside. Editor's offices (offices for patents), 47, Lincoln's-inn-fields

NEW WORK BY WASHINGTON IRVING

Now ready, in 2 vols. 21s.

Cloth, price 3s. 6d.,

CHRONICLES of WOLFERT'S ROOST; and Other Papers. By WASHINGTON IRVING.

Forming Vol. IV. of "Constable's Miscellany of Foreign Literature."

"The best and briefest opinion we can offer on the volume is, that it is worthy of its author, which is as much as to say, in other words, that it is worthy of being read by everybody."—London

"It would not be easy to overpraise this American Miscellany."—Athenæum.

Edinburgh: THOMAS CONSTABLE and CO.

London: Simpson Low, Son, and Co.; and Hamilton, Adams, & Co.

Fifth Edition, with Engravings on Steel, &c., [illegible] nearly ready,

AN ANALYSIS of the BRITISH FERNS and their ALLIES. By [illegible] Fifth Edition, [illegible] Additions by MILBURN [illegible] &c., Professor [illegible] Edinburgh. Edited [illegible] on Botany at St. George's Hospital; with an additional Plate of the Latest Discovered Species.

London: SIMPKIN, MARSHALL, and Co., Stationers' hall-court

THE ART-UNION OF LONDON

Preparing for immediate publication, beautifully printed, on the finest paper, in quarto,

CHILDE HAROLD'S PILGRIMAGE. By LORD BYRON.

The Edition has been undertaken with the concurrence of the Council of the Art-Union of London, expressly for the use and benefit of its Subscribers (who may desire to build up with the Text of Lord Byron's Poem the set of Illustrations which are about to be issued to the Subscribers for 1855).

Early application should be made for this Edition, as only a limited number will be printed, regulated by the number of sets of Proofs taken for the compliment of translation. * * * We are unwilling to forestall the interest which the beautiful Illustrations of Childe Harold have won a youth, and the associates which with great diligence the author has collected on the spot of his Classic wanderings and adventures.—Mr. Longsworthe is a diligent and enthusiastic collector of the treasures of a large house man of strong feeling for the beauties of nature, and an able historian.—Quarterly Review, December, 1854

Here is a book which, if any one can find a purchaser for it without allowing the bloom to escape in the process, cannot fail to be popular among English readers as the best writings of Washington Irving."—Westminster Review

Edinburgh: THOMAS CONSTABLE and CO. London: Hamilton, Adams and Co.

Observe, at 164, NEW RODINGILL'S, 24, Piccadilly, London.

DR. ARNOTT'S SMOKE-C

"IN THE TRENCHES, BEFORE SEBASTOPOL.—FROM A SKETCH BY J. A. CROWE, CORRESPONDENT OF "THE ILLUSTRATED LONDON NEWS."—(SEE NEXT PAGE.)

SCENE IN THE 21-GUN BATTERY.

THE CAMP BEFORE SEBASTOPOL.

(From a Correspondent.)

SEND two Sketches taken from *Life* in the Trenches. You may depend on their exact truthfulness: the want of finish to be found in them may be laid to my scarcely being able to hold a pencil in my hand from excessive cold.

First is a View in the 21-gun, or Gordon's Battery. The snow is melting, but large drifts and patches remain. The men are tired and fatigued with continued watching, and sickness. Injured guns are being remounted.

Next is a scene in a narrow ravine. The snow is above a foot deep. The sky is dark, and everything else perfectly white, except the forms of the men and stones, together with jagged rock, cropping out in ridges, along the right side of the ravine. The places where the men are sitting are low screens of loose stones, their only shelter by day or night.

"IN THE TRENCHES" BEFORE SEBASTOPOL.

WHAT are the trenches? This is a question which appears to be generally asked, and never satisfactorily answered. In truth, the trenches mean all sorts of things. When on a dark night near Sebastopol an officer leads his men down the vale which runs at the base of Chapman's attack, and bears up for the friendly shelter of the high earthern battery, he is going to do duty in the trenches. When he leads his sentries forward from the shelter of the work, and posts them in the sinuosities of the ground in front of the battery, or when, in discharge of a different duty, he places his party behind a projection of earth or rock to cover the battery, he is still said to be doing duty in the trenches. If he marches down a parallel to the very extreme verge of the advance, and lies with his men in a breastwork which barely covers him, in a recumbent position, he is still "in the trenches." The term so used applying to every portion of the works in front of a besieged fortress. It is evident from this that the trenches are at all times a place where soldiers are subject to danger, and that, in many places, that danger is by no means inconsiderable. Amongst the safest of the positions in front of a besieged fortress are those of the parties which guard a breaching battery in its complete state. The height of the work is so great (nine feet) that cannon balls pass harmless over unless they enter the embrasure and shells burst so high or so distant as to be comparatively harmless The breadth of the foundations of the earthwork makes it proof against a cannon-ball, no matter how heavy, and constant exposure to the fire only solidifies the mass and makes it more compact. At the same time that danger from the front is guarded against, satisfactory means are employed to prevent the dangers resulting from a flank or enfilading fire: and the heavy abutments, which may be seen in our Illustration, are a safeguard against an enfilading fire which might not only be dangerous to life, but also to the safety of the guns. It appears probable that the Russians had but feeble abutments in the left face of their Great Redan; for, on the 17th of October, when our fire was opened, we overthrew every gun in it, even before the moment when the Russian magazine exploded with such dreadful noise, and havoc Notwithstanding all precautions however the most perfect battery is a

OUTLYING PICQUET OF THE 19TH REGIMENT IN THE SNOW, IN THE SECOND RAVINE, BEFORE SEBASTOPOL.

...ports ... And mortar shells ... ically, being cast up at a very ... fall into the most sheltered places, where they fret, and fume, and burst, scattering their fragments in a dozen directions and to great distances. The most practical mode of avoiding this danger is by lying flat on the ground, and it is a method practised continually with wondrous efficacy. The more exposed portions of the trenches—such as breastworks or small shelters used by advanced parties—are by no means so pleasant to remain in. Not only are they much more open to the heavy metal of hostile cannon, but they are occasionally visited by the sharp pings of the Minié bullet, which whistles through the air, and patters over the stones and ground with a whizzing sound, as if it were an angry bee whom pri...vacy had been disturbed, and wrath excited in consequence. Nor are the trenches more remarkable for the comforts which they possess. In the best of times it requires long habit to lie upon the bare earth and catch a brief nap in the intervals of sentry relief. But when the snow is lying on the ground, or the soil is hardened by the frost, the most favoured spots are but poor comfort, when compared even with the worst-appointed tent within the Camp.

We have endeavoured to give in the Illustration an idea of that portion of the trenches which is generally considered safest, that in the interior of one of the batteries constructed nearly with sand-bags, of a white-grey colour, and gabions or fascines, whose dark and rugged sides are marked as dark spots upon the lighter grounds. The fore-part is strewn with empty powder-cases, made of shining tin, with little boxes which have once contained shells, and with remnants of gabions, pieces of projectiles, stones, and earth in various shapes.

THE LATE EMPEROR OF RUSSIA.

NICHOLAS PAULOWITCH, late Emperor of Russia, was born at St. Petersburg on the 7th of July, 1796, being the third son of the Emperor Paul, by his second wife, Mary of Wurtemburg. Of his father, whose brutal eccentricities amounted to insanity, and who was murdered by his nobles in consequence of an alliance which his infatuated admiration for the Emperor Napoleon I. had induced him to contract, it is unnecessary to speak. The boy Nicholas was not five years of age when the night-place murder of March 23, 1801, made him an orphan. His brother Alexander was enthroned, and took the oath at the hands of his father's assassins, having been privy to the murder, and having been, when it was perpetrated, in the room immediately below. The Empress, his mother, a woman of intelligence, superintended the education of Nicholas, which she committed to General de Lambsdorff, who was assisted, amongst others, by the Countess de Lieven, the philologist Adelung, and the Councillor Stork. At an early period Nicholas applied himself with great ardour to military pursuits, in which he evinced considerable proficiency, especially in the art of fortification. He also studied the science of political economy; and became as familiar with the French, German, and English languages as with his native tongue. When the French invasion took place, Nicolas was too young to take part in the noble defence which Russia made, or to join in those great military operations which ultimately led to the overthrow of Napoleon and the occupation of his capital. On the restoration of peace in 1814 he left Russia to travel, and visited the principal battle-fields of Europe. In 1816 he arrived in England, where he received a cordial welcome. On returning home he visited the different provinces of Russia, for the purpose of becoming acquainted with the actual condition of the population. In July, 1817, he married Charlotte Louisa, the eldest daughter of Frederick William, of Prussia, and sister of the present King. Four sons and three daughters are the issue of this marriage, the eldest son, Alexander Nicolaiewitch, having been born in the year 1818.

At this time Nicholas had little expectation of obtaining the Imperial Crown, but in the year 1825 his eldest brother, the Emperor Alexander, died at Taganrog, in the Crimea, it is supposed by poison. The next heir to the throne was the Grand Duke Constantine, who was then at Warsaw, and Nicholas hastened to take the oath of fidelity. Constantine, however, whether voluntarily or by compulsion, had entered into an engagement to Alexander, in which he renounced his eventual claims to the throne, and the document attesting this act was in the hands of Nicholas, when he received the news of his Emperor's death. Nicholas, whether sincerely or otherwise, it is not known, refused to accept the homage offered him by those who were aware of the actual state of things, and loudly professed his allegiance to Constantine, the new Emperor. Meanwhile Constantine, who was at Warsaw, was taking the oath to Nicholas, in accordance with the act in question, which he had secretly signed on the occasion of his marriage with the daughter of a private Polish gentleman. Nicholas, with expressions of regret, then ascended the throne, now came a desperate struggle. The vast conspiracy, composed of two classes—the enthusiastic lovers of liberty and the old Russian party, the supporters of Constantine—was formed. Their tactics were to spread a report in the garrisons of the empire that the abdication of Constantine was a forgery; and to appeal to the soldiers, in the name of loyalty, to rise and put down what they represented to be a *coup d'état* against legitimacy. On the 26th of December the oath to Nicholas was to be taken by the garrison of St. Petersburg. Several regiments swore allegiance; but the Moscow regiments, the Marines of the Guard, and the Grenadiers refused the oath, and marched through the streets and squares, shouting for Constantine. Nicholas saw all from his palace windows. The insurrection was speedily suppressed with grape shot. Nicholas then descended, and addressed the remaining rebels. Standing before them with haughty bearing, he cried in a firm tone, "Return to your ranks—obey down upon your knees!" The energy of his voice—his countenance calm, though pale—and the veneration with which every Russian regards the person of his Sovereign—prevailed. Most of the soldiers kneeled before their master, and grounded their arms in token of submission. To the intrepid self possession of that hour he is indebted to the continuance of his authority. Victory was now on his side. He returned from the spot. Wherever resistance was made the artillery played upon the gathering crowds, and the fire of musketry completed the work of destruction. The hopes of the Liberal and old Russian party having been thus quenched, Nicholas found himself the sole and absolute master of the gigantic Russian empire. Immediately afterwards five scaffolds were erected on the esplanade of the fortress of St. Petersburg; thirty-six noble persons were executed, and eighty-five sent to Siberia. From that time Russia Proper has been exempt from outbreaks. If not from conspiracies, and the late Czar was left free to carry out his ideas of government.

In September, 1826, the Emperor was crowned at Moscow with great pomp and ceremony. The Greek insurrection, to which the policy of Alexander had secretly contributed, came to a end the influence of Russia in the East, and in 1828 war was declared between the young Emperor and the Sublime Porte. In 1829 the peace of Adrianople was concluded, by which Nicholas was permitted to retain authority in Wallachia and Moldavia, and the Porte agreed to indemnify the expenses of the war by a payment of eleven millions and a half of Dutch ducats—a sum from which three millions were afterwards deducted But, whatever may have been his designs against the empires of the East in the earlier period of his reign, they were suspended, and a different system was given to his policy for twenty years by the French Revolution of 1830.

In 1830 the Polish revolution broke out; but England and France remained neuter; and Austria and Prussia aided the Czar in crushing the insurgent patriots. A terrible vengeance followed. Poland was conquered. The Russians entered Warsaw, and an iron despotism was substituted for the semblance of constitutional Government which previously had been permitted to exist. A citadel was built on the heights above Warsaw, and when, in 1834, the citizens came to make compliments the Czar, pointing to the citadel, he exclaimed—"You see that fortress: if you stir, I will order your whole city to be destroyed I will not leave one stone upon another, and when it is destroyed it will not be rebuilt by me."

He succeeded in 1833 in establishing a Russian army on the Bosphorus, and extorted the treaty of Unkiar Skelessi from the failing hands of Sultan Mahmoud. From that period, indeed, throughout his whole reign the under-current of Russian intervention in the affairs of Turkey may constantly be traced until it resulted in 1853 that catastrophe which has for the last two years convulsed Europe. In 1840 the insidious propositions of Russia being adopted by the British Government and by that of Austria led us to the brink of war with France, and engaged us in military operations in Syria; but, with this exception, the peace of the world remained undisturbed until 1848. Upon the occurrence of that political earthquake, which shook half the thrones of Continental Europe, the Emperor Nicholas alone seemed quite prepared to meet the shock, and completely removed by its violence. His forbearance seemed equal to his strength. He was prudent enough to seek no pretext for interference in the affairs of other States, although he did not refuse assistance to his brother Emperor when it was required; he took no unfair advantage of the weakness and confusion of other countries, and the advice he tendered was invariably favourable to the cause of conservatism. The conduct of the Emperor Nicholas during those eventful and perilous years, from 1848 to 1851, raised him higher in the estimation of many persons than he had ever stood before; he was regarded as one of the wisest, as well as one of the most powerful, Sovereigns of Europe; and those even who detested his despotic principles could not deny that he had shown moderation, and a strong desire for peace.

His reign lasted twenty-nine years, three months, and one day, a period longer than the majority of his predecessors reached, and quite as long a one as he himself anticipated.

THE DEATH OF THE CZAR.

[THE following memorandum has been communicated to the *Times* by Dr. Granville, the English physician, who formerly enjoyed the professional confidence of the Russian Imperial family. The document purports to have been addressed to Lord Palmerston, from Kissengen, in Bavaria, in July, 1853.]

My Lord,—Failing in my endeavours to meet with your Lordship at the appointed interview at the House of Commons on the 22nd ult., at which I proposed to make a most confidential communication of some importance to the Government, as I thought, concerning the present political discussions with Russia, I stated, in a second note, written at the moment of my departure from England for this place, that I regretted the disappointment, inasmuch as the subject of the intended communication, from its delicate nature, did not admit of being communicated to paper.

I think so still. But, on the other hand, the necessity of the Government being put in possession of the communications appears to me to become every day so much more urgent, that if it is to be of any use it must be made at once, or it will fail to direct Ministers in time, as I think the communication as valuable of doubt, in their negotiations with Russia, and in their estimation of the one particular element which, I apprehend has first provoked, and is since pushing on, the Emperor in his present reckless course.

Mine is not a political, but a professional communication, therefore strictly confidential. It is not conjectural, but positive, largely based on personal knowledge, and partly on imparted information accidentally obtained—it is not essential that I should say from whom, for I take the responsibility of the whole on myself, inasmuch as the whole but confirms what I have myself observed, studied, or heard on the spot.

The Western Cabinets find the conduct of the Emperor Nicholas strange, preposterous, inconsistent, unexpected. They wonder at his demands: they are startled at his state papers; they cannot comprehend their context; they recognise not in them the clear and close reasoning of the Nestor of Russian diplomacy, but rather the dictates of an ass will to which he had been made to affix his name; they view the Emperor's most international principles as extravagant; they doubt if he be under the guidance of wise counsels. Yet they proceed to treat, negotiate, and speak as if none of these perplexing novelties in diplomacy existed on the part of a Power hitherto considered as the model of political loyalty. The Western Cabinets are in error.

The health of the Czar is shaken. It has become so gradually for the last five years. He has been irritable, passionate, fanciful, more than usually suspicious, capricious, hasty, precipitate, and obstinate whilst all from illhealth, unskilfully treated; and of late deteriorating into a degree of cerebral excitement which, while it takes from him the power of steady reasoning, impels him to every extravagance—in the same manner as with his father in 1809; as with Alexander, in Poland, in 1820; as with Constantine at Warsaw, in 1830; as with Michael, at St Petersburg, in 1848-9. Like them, his nature feels the fatal transmission of hereditary insanity, the natural consequence of an overclocked and progressive congestion of the brain. Like them he is hurrying to his fate—sudden death, from congestive disease. The same period of life, between 45 and 60 years of age, sees the career of this fated family cut short.

Paul, at first violent and fanatical, a perfect lunatic at 45 years of age, is dispatched at 47, in 1801.

Alexander dies at Taganrog in December, 1825, aged 48. For five years previously his temper and his mind had at times exhibited the parental malady by his capricious and wayward manner of treating the Polish provinces. He died of congestive fever of the brain, during which he knocked down his favourite physician, Sir James Wylie—who assured me of the fact at St. Petersburg in 1826—because he wished to apply leeches to his temples.

Constantine, eccentric always, tyrannical, cruel, dies at Warsaw suddenly, in July, 1831, aged 52 years, after having caused rebellion in the country by his harsh treatment of the cadet officers. I saw and conversed with him on the parade and in his palace at Warsaw, in December, 1828. His looks and demeanour strongly denoted to a medical man what he was and what his fate would be. It has been said that he died of cholera: again, that he had been dispatched like his father. The Physician-in-Chief of the Polish Military Hospitals assured me some years after that he had died apoplectic and in a rage.

Michael, after many years of suffering from cerebral congestion, which afflicts his only surviving brother—enlarged liver, deranged digestion, and fullness of blood in the head—became, in 1848-49, intolerably irritable, violent, and tyrannical to his own officers of the Artillery and Engineers' service, of which he was the inspector-general, and which I myself reviewed I was present and near him, and witnessed scenes of violent temper towards generals and aides-de-camp hardly equalled in a lunatic asylum. I found him as described above. I advised cupping, diet, non-exposure to the sun and to fatigue, the administration of suitable medicines, and the cessation from drinking steel-mineral waters, of which he had ever since the year 1826 had been at Kissengen. His physician, the younger Sir James Wylie (himself since suddenly dead), assented reluctantly, but did not carry my advice into execution. The Grand Duke, in the state he was, unchecked by any medical measure or proper treatment, joined the army, rode out in the sun, and fell from his horse apoplectic in September, 1849, aged 45.

To complete this disastrous picture of the grandchildren of Catherine, their partner, Maria of Wurtemburg, a most exemplary Princess, died apoplectic in November, 1839, scarcely more than sixty-five years of age. Her malady, mistaken for weakness, was treated with stimulants and bark by her physician, Rehl, and bleeding was only had recourse to when the mistake was discovered—but too late to save. The meek and mild Elizabeth had but a short time before followed her Imperial partner, Alexander, to the grave, in the still fresh years of womanhood, fifty years of age.

During my second sojourn in St. Petersburg, in 1849, for a period of ten weeks . . . . . What the opinion was of the Emperor's health—what it is has come to my knowledge, which, despite eventuality—what were the sentiments of his physician, Dr. Mandt, who, homeopathist as he is, and exercising a most pernicious influence over his master, leaves him, nevertheless, unrelieved, except by mystical drops and globules—what transpired of political doctrines and opinions, or, in fine, what I gathered afterwards at Moscow on all co-equal points, must be left to your Lordship's conjecture—not difficult, after all, I have divulged. To go further would be like a breach of trust, and of that I shall never be guilty.

In all I have related there is nothing that had been committed to me as a privileged communication; while the imperative requirements of the moment calling for its immediate divulgement I hesitate not to make it, under the utmost conviction that my fears and anticipations will be surely realised.

If so, then the method of dealing with an all-powerful Sovereign so visited must differ from the more regular mode of transacting business between Government and Government. For this purpose it is, I suppose, to put her Majesty's Ministers on their guard accordingly, that I have deemed it due in your Lordship's hands the present professional information, which must be considered as so strictly confidential that I shall not sign it with my name.

That I have selected your Lordship as the channel of my communication rather than the Minister of Foreign Affairs, to whom more properly it should have been addressed, will at once appear natural to your Lordship. In my capacity of once, and for some years, your Lordship's physician (though not have honoured with that title), your Lordship has known me personally, and is convinced that what my pen commits to paper may be taken as coming from an honourable man and your obedient servant.

N.B. an acknowledgment of the receipt of this letter came by return of post to Lord Palmerston's gardeners.

Memorandum.—At an interview with Lord Palmerston, Feb. 23, 1854, on matters of a private nature, his Lordship was pleased to ask me before we separated whether I still adhered to my opinion and prediction. I replied that before July, 1855 (the Czar would then be fifty-nine years old), what I had anticipated would happen. "Let but a few reverses overtake the Emperor," I added, "and his death, like that of all his brothers, will be sudden." It has proved so. Alma, Inkerman, Baladava, shook the mighty brain. Eupatora completed the stroke, which has anticipated my prognosis only by a few weeks.

SHAMEFUL CONDUCT OF THE BELGIAN GOVERNMENT.—A few weeks ago a cargo of Belgian paupers and criminals, sent over by the Belgian authorities to the United States, arrived in New York. They were seized and thrown into prison, where they have till the present time been humanely treated. A correspondence at once took place between the authorities and the Belgian Consul. At first it was stoutly denied that the men in question were criminals or paupers; but, when it was conclusively proved that they were both, and demand was made upon the Chargé d'Affaires of Belgium to send these men back to the country they came from, he refused to do it, and the Mayor of New York has declared that he will do it himself. He will; and it will be a lesson that all European Governments will have to learn, that they can no longer send their paupers and criminals to the United States. They will be sent back; and if the thing is kept up, such a state of feeling will arise in the United States towards the Governments of Europe, as no friend of peace or humanity would contemplate with any satisfaction.—*Letter from New York.*

NOTES OF THE WEEK.

WE find ourselves approaching the grand climacteric, and we feel that a clear conscience and a good digestion suffice to content most of our earthly aspirations, we are apt to consider that the chief happinesses of life depend, more or less, upon excitement. We are far enough from being deprived of this stimulus in the fortunate, though foggy, climate. We have our domestic dramas, our divorces and our disappointments, our ingenious robberies and our abominable crimes, just like the rest of mankind; and we have, besides, our manufacturing strikes, our political *crises*, and our administrative mismanagements rather *more* constantly than other folks; but one thing in the way of popular excitation, which has lately been continually, and in perfection, enjoyed by "our lively neighbours," the French, we totally lack—namely, the suppressed pamphlet. There was Victor Hugo's "Napoléon le Petit"—(which I take leave to say, in a parenthesis, was a libel, though not a bit worse than what our newspapers are in the daily habit of saying of each other, or of any public men who don't happen to agree with their *chefs de file*)—the mere existence of which in a portmanteau would probably, if discovered over the water, have sent the owner to Cayenne. There was the "Carte d'Europe Reconstituée," whose (supposed) illustrious author must assuredly have suppressed it himself, but which managed to get loose nevertheless; and now we have "La Conduite de la Guerre d'Orient" purporting to be a memorial addressed to the Government of the Emperor of the French by a General Officer. The titlepage of the copy before me further informs us that it is "Edition autorisée pour la Belgique, l'Allemagne, et l'Angleterre!" Excellent! Here you have the true history of the "suppressed pamphlet," partially killed, it may be, at home, but doubly vivacious just where you would like it to be particularly dead—*videlicet*, abroad. If I were a despotic monarch, and felt anxious to circulate any special views as widely as possible, I would certainly have a pamphlet written which should embody them, and then suppress it with all the rigour of my police. There seems to be little doubt that the general officer spoken of in the title of this much-canvassed *brochure* being, however, not the author, but the inspirer—is the Emperor Napoleon's next heir and cousin, the Prince Napoleon Jerome, very generally known by a less dignified name, that of "Chou-chou." The authorship is very generally, but, I believe, falsely, attributed to M. Emile de Girardin, the proprietor of the Presse newspaper, whom the Chamber of Deputies treated so abominably under Louis Philippe by refusing to recognise him as one of their body on the ground that he was a natural son. That any "General Officer" should be found to write, or at least to father, a pamphlet, the chief object of which is to throw obloquy on the memory of a brave man whose body is yet scarce cold in the grave—the gallant St. Arnaud may well excite astonishment; that that General should be one nearly allied to the Throne, and whose inexperience should have made him diffident of thinking, far more of expressing, a judgment on the conduct of one who, with all his faults, was a *soldier*, and the *story* of whose last hours, during which with almost more than human energy he made his death agonies subservient to his will, is still fresh in our memories, is something more than wonderful. Without prejudging the future, it may be said that so far the French Emperor has shown himself to be a great man. Should he have no direct heirs, it is to be hoped that he will take such measures as may preclude the sceptre of France from passing into the hands of Prince Napoleon Jerome, if, indeed, he have anything to do with the pamphlet before us.

So much for the spirit in which this now celebrated *brochure* is written, which is as bad as the time chosen for its publication is inopportune. Its argument may or may not be correct; which is, shortly, that the Allied forces had no business in the Crimea, but ought to have pursued the retreating Russians into Wallachia.

Rarely has an event occurred which has raised such commotion in the minds of men as the death of the Emperor Nicholas. Utterly unexpected as it was (for though it now appears that he had been seriously ill for the previous ten days, we then knew it not), the news of it fell upon the western world with the shock of a thunderbolt. Nicholas Romanoff, the greatest Prince that the world has seen, except Napoleon and Charlemagne, is gone to his account, and Civilisation and Industry are the more hopeful for his disappearance. Alexander rules in his stead, and the guidances of the House of Commons, and the male Cassandras of the Clubs, are, as usual, wrong again. With what a pitying smile and contemptuous shrug they used to beg you not to believe that there could be such a thing as legitimate succession to the throne of Russia! "Constantine, my good sir, is the man: the army swear by him, so do the navy, and Menschikoff and the old Russian party; and you'll find him a deuced deal worse for England than ever his father was. As for the Tsarovitch, they'll put him out of the way, if he doesn't retire of his own free will." Alas! for these judges of Israel!

Events now succeed each other with such startling rapidity, that it is good that Cabinet Ministers and Generals should always keep a portmanteau ready packed. The news of the Russian Emperor's death only arrived on Friday afternoon; and on Saturday morning Lord Clarendon was at Boulogne, in conference with the Emperor of the French (who was there on a flying visit to the Camp) upon the subject of the possible alteration in the state of affairs which this event might cause. It is not likely that there will be any diminution in the efforts now making by the Allies to send troops and *matériel* to the Crimea, as it is clearly expedient to redouble our blows, now that we have a better chance of winning the game; but, if rumour speak truly, a most unfortunate discussion took place between our Foreign Secretary and the Emperor on a collateral point. It is said that Louis Napoleon objected in the strongest manner to the continuance of Mr. Roebuck's Committee, and declared that, if it were not got rid of, either by a dissolution or otherwise, the French and English forces might continue to act for the same end, but all idea of cordial alliance between them must be considered as out of the question. That this is very generally believed there can be no doubt, and, consequently, reports of a dissolution have been flying about the clubs and the City, to the partial discomfiture of the Three per Cents, which had jumped up on the Czar's decease. Yet we cannot bring ourselves to put faith in it, partly because Louis Napoleon, who from long residence in this country is half an Englishman, knows quite well how bad a thing for both countries a dissolution would be at present: and partly because it is already clear that the examinations of the Committee, such as they are, decidedly tend to compliment the French at the expense of the English army, as far at least as management goes, which appears to be the only subject likely to be taken into consideration.

So much for politics. Since last week there have been, among others, two curious legal cases reported in the papers, which will bear remark. One occurred at the Mansion-house, where a dozen Leadenhall-market salesmen were "pulled up," and fined for having, contrary to law, game in their possession more than ten days after the close of the shooting season. The Act is clear on the point, so there was no help for it; they were fined, and the birds confiscated. Yet this seems hard, inasmuch as a pheasant killed on the 1st of February would certainly, seeing the frost that prevailed, have remained too tough to be eaten till near the end of the month.

THE AMERICAN EXPLORING EXPEDITION.—Serious apprehensions have for some time been felt in reference to the fate of Dr. Kane, and his companions in the American exploring expedition that was sent out in search of Sir John Franklin. A law has been passed by the United States Congress authorising another expedition to be dispatched in search of Dr. Kane, and the Secretary of the Navy has been instructed forthwith to send steam-vessels for this purpose. A commission has been appointed to select the steam vessels to be used, and they will get under way with all possible despatch.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

THE CIVIL SERVICE IN INDIA.

Lord MONTEAGLE, in moving for correspondence touching the examination of candidates for the office of Assistant-Surgeon in the East India Company's Service, made some comments upon the papers which had been thrown in the way of the natives of India when seeking for appointments under the auspices of the East Indian directors

Lord ASHBURTON objected to the measure that had been adopted to remove the disabilities under which the Indian natives had heretofore laboured in this respect, and observed that there was no intention to exclude the natives of India from the covenanted service of the country.

The Earl of ALBEMARLE expressed his hope that the Government would take some steps to enable the inhabitants of India to fit themselves for the civil service without coming to this country

Earl GRANVILLE observed that the names of those appointed by the Government to prepare the scheme of examination was a sufficient guarantee that there was no desire to place obstacles in the way of the natives of Hindostan. The returns were ultimately ordered.

HOUSE OF COMMONS.—MONDAY.

THE WAR MINISTRY.

Mr. HUTT referred to the circumstance that the Duke of Newcastle, before he could recall Lord Lucan from the Crimea, was obliged to consult Lord Hardinge. He wished to ask whether, in the new Army reforms that were contemplated, the War Minister was to be relieved from his subordination to the Horse Guards?

Lord PALMERSTON, in answer, denied that the War Minister was subordinate to the Horse Guards.

THE MEDICAL SERVICE IN THE CRIMEA.

Lord PALMERSTON, in reply to Mr. Layard, believed that orders had been issued to the medical officers in the army, prohibiting them from giving information without orders from head-quarters; but he could not believe that those orders were intended to preclude them from giving evidence before the Medical Commission. At any rate, Lord Palmure would write out to ascertain how the matter stood.

Mr. PEEL, in answer to another question by Mr. Layard, that Dr Lawson, who was censured in general orders by Lord Raglan, had been appointed to another subordinate office in the Sultan's Hospital.

Mr. C. HERBERT said, in reply to Mr. Percy, that he was responsible for the appointment of Dr. Meyer to the hospital at Smyrna. That gentleman was not, as the honourable gentleman alleged, a German, but an Englishman. He was favourably known at the Colonial-office, and he had never had the honour of seeing Prince Albert in the whole course of his life.

MILITARY EDUCATION.

On the motion for going into Committee of Supply,

Mr. RICH rose to move that it is expedient to take measures for improving the efficiency of our military education. He dwelt at some length on the want of all proper training for officers in the Army, the consequence of which was, that at the breaking out of a war the officers were forced to learn the duties at the expense of the treasury and blood of England, and recommended generally that the education of officers should be of a high standard, and that the examination of their requirements should be proportionally severe.

Mr. PEEL admitted the high importance of this subject, and recounted all that the Government had done and was doing on behalf of it. He described the plan of training, which in his opinion would be available for the Army, providing that officers should serve for short periods in all arms of the service, so as to acquire an elementary knowledge before they were appointed to regiments. The full appointments ought to be regarded as the prize of the profession, and men should be trained for them accordingly. But all these matters were under the consideration of the Government, and he hoped, therefore, that the hon. gentleman would not press his motion.

Colonel DUNNE admitted the deficiencies of our officers, especially with respect to their staff; but he doubted very much whether the training of scientific education would attain that end. His plan would be to hold out encouragement to educated officers, and then they might depend upon it officers would become highly educated.

After some discussion (in which Mr. Owen Stanley, Mr. J. G. Phillimore, Lord Palmerston, and Colonel Knox took part), Mr. Rich withdrew his motion, and the Committee proceeded to consider of Supply

THE ORDNANCE ESTIMATES.

Mr. MONSELL in moving the Ordnance Estimates, referred to the supplemental estimate which was rendered necessary by the great supply of hospital stores, warm clothing, and materials for huts, sent out to the army in the Crimea. These supplies were forwarded with the utmost celerity, a day at prices not exceeding 7½, or at the utmost 10 per cent, beyond their fair market value. The quality of the articles, too, he could state was excellent. With regard to the stowage of the stores on board the transports, he stated that a commission of officers at the Crimea, appointed to investigate the matter, had unanimously decline the allegations that shell were placed above the medical stores on board the *Prince* and the *Robert Lowe*. Another vote was for the establishment of a shell manufactory at Woolwich, which was now in operation, turning out seven per day, which, at the cost of the Lancaster shell was reduced from £8 to £1 16s. per shell. The manufactory of small arms at Enfield was commenced, in accordance with the decision of the Committee which sat last session, but on a larger scale than that Committee recommended: it was calculated to turn out 50,000 muskets in the course of the year; and he stated the reasons which had induced the Government to adopt the general design. The factory he expected to be in work by the 1st of July next. The honourable gentleman went into an explanation of the other items, in which there was a great increase, except in the case of the naval establishments and in the Royal Laboratory at Woolwich, where, owing to the ingenuity of Captain Boxer, a larger supply of shells was manufactured at a great reduction of price from that at which they were originally made in the establishment or supplied by contractors. There were other establishments in course of erection, the expense of which he justified on the plea that, at a time when such great improvements were making in every description of military projectiles, it was undesirable to have on hand a large amount which a single new invention might render obsolete; and, therefore, the only safe course was to have large establishments where a large store of projectiles of the newest pattern could be rapidly manufactured whenever they were wanted. He concluded by laying the first vote upon the table.

Mr. WISE proposed that the vote should be reduced by the sum of £15,000, for enlarging the manufactory of small arms at Enfield.

A long discussion ensued, in which Mr. MUNTZ, Mr. Newdegate, and others contended that the Birmingham makers of small-arms were quite sufficient to supply the wants of the Ordnance if they had fair play. On the other hand, Mr. Monsell, Lord Palmerston, and Mr. George Dundas contended that the Government required all the muskets that could be obtained from whatever source. Lord Palmerston stated that the Irish Militia were exercising at the present moment with broomsticks, and that this state of things was therefore absolutely necessary. On a division, the vote was carried by a majority of 170 to 34

Another vote connected with the same subject of the manufacture of small-arms was also submitted to put aside observations upon it, as the vote by the amount of £40,000 The amendment was negatived by a majority of 170 to 24

Several other votes were agreed to, and the Chairman reported progress.

The Newspaper Stamp Bill was postponed till Friday next

The Tea Duties Suspension Bill was read a second time.

The Secretaries and Under-Secretaries of State Bill was also read a second time.

The Ecclesiastical Courts Bill passed through Committee

HOUSE OF LORDS.—TUESDAY.

THE CHARGE OF CAVALRY AT BALACLAVA.

Lord LUCAN said that, as he had been charged by the Secretary of War with having made an incomplete correspondence, because he had not sent an official about a despatch from Lord Raglan of the 16th December, which (Lord Lucan) had never seen till Monday last, he would now read it—

Before Sebastopol, Dec 16, 1854.

My Lord Duke,—I regret to be under the necessity of forwarding to your Grace a copy of a letter which has been addressed to me by Lieutenant-General the Earl of Lucan. When I received it I placed it in the hands of Brigadier-General Airey, the Quartermaster-General, and requested him to suggest to me language to withdraw the commencing that it would not lead to his disadvantage in the slightest degree; but Lord Lucan having declined to take the step recommended, I have but one course to pursue, that of laying the letter before your Grace, and submitting to you that no observations upon it as I am bound in justice to myself to put you in possession of. Lieutenant-General the Earl of Lucan complains that in my despatch to your Grace of the 28th of October I stated that from some misconception on his part the instruction to advance, the Lieutenant-General considered that he was bound to assume great hazards. His Lordship conceives this statement to be a grave charge, and an imputation reflecting seriously upon his professional character, and he deems it to be incumbent upon him to state the facts, which he cannot doubt must clear him from what he respectfully submits is a most unmerited. He has restored to my despatch, and I far from being within, to alter one word of it. I am prepared to declare that not only did the Lieutenant-General misconceive the written instruction that was sent him; but that there was nothing in that instruction which called on him to attack at all hazards, or to undertake the operation which led to such a brilliant display of gallantry on the part of the Light Brigade, and unhappily at the same time occasioned such lamentable casualties in every regiment composing it. In his Lordship's letter he is wholly silent with respect to a previous order which had been sent him. He merely says that the enemy was formed to support an intended movement of the cavalry. That previous order was in the following words:—"The cavalry to advance, and take advantage of any opportunity to recover the heights. They will be supported by infantry which have been ordered to advance on two fronts." This order did not seem to me to have been attended to; and therefore it was that the instruction by Captain Nolan was forwarded to him. Lord Lucan must have read the first order with very little attention, for he now states that cavalry was formed to support the infantry, whereas he was told by Brigadier-General Airey, "that the cavalry was to advance and take advantage of any opportunity to recover the heights, and that they would be supported by infantry" not that they were to support the infantry; and so little had he sought to do so as had been decidedly manifested by his not moving in advance of his main body, made no attempt to regain the heights, and was so little informed of the position of the army, that he asked Captain Nolan "where and what was the enemy to attack, as neither enemy nor guns were in sight." Thus, your Grace will observe, is the Lieutenant-General's own admission. The result of his misconception of an order for the advance, which Lord Lucan considered obliged him to attack at all hazards. I wish I could say, my Lord Duke, that, having decided against his conviction to make the movement, he did all he could to render it as little perilous as possible. This, indeed, is far from being the case in my judgment. He was told that the Horse Artillery might accompany the cavalry. He did not bring it up. He was informed that the French cavalry was on his left. He did not invite their co-operation. He had the whole of the heavy cavalry at his disposal. He mentions having brought only two regiments in support, and he omits all those precautions either from want of due consideration or from the supposition that the unseen enemy was not in sufficient force as he apprehended, notwithstanding that he was warned of it by Lord Cardigan after the latter had received the order to attack. I am much concerned, my Lord Duke, to have to submit these observations to your Grace. I entertain no wish to disparage the Earl of Lucan in your opinion, or to cast a slur upon his professional reputation, but having been accused by his Lordship of having stated of him what was unmerited in my despatch, I have felt obliged to enter into the subject, and to enable your Grace at more length than I could have wished in vindication of a report to your Grace, to which I had confined myself to that which I knew to be true. I had indulged in no observations which were not suggested by that which could be viewed either as harsh or in any way grating to the feeling of his Lordship. I have, &c.,

RAGLAN

To his Grace the Duke of Newcastle.

Nearly at the same moment at which he received that letter, he received another letter from the General Commanding-in-Chief, in answer to an application which he had forwarded to the noble Lord.

Horse Guards, March 5, 1855

My Lord,—I have had the honour to submit to the General Commanding-in-Chief your letter of the 2nd of March inst., reporting your arrival in London, and requesting that your conduct in ordering the charge of the Light Cavalry Brigade at the action of Balaclava, on the 25th of October last, and which was the letter you addressed to Field-Marshal Lord Raglan on the 30th of November, may be submitted to and investigated by a court-martial.

I am directed by the General Commanding-in-Chief to state in reply that, after a careful review of the whole correspondence which has passed, he cannot recommend to her Majesty that your Lordship's conduct in those transactions should be investigated by a court-martial.

I have the honour to be, my Lord, your Lordship's most obedient servant,

G. A. WETHERALL, A.G.

To Lieutenant-General the Earl of Lucan

Having read this letter, with the existence of which he was not acquainted until Monday afternoon, his case appeared entirely altered, that he thought himself obliged to read this letter to the General Commanding-in-Chief —

Hanover-square, March 5

Sir, I have the honour to acknowledge the receipt of your letter, informing me that the Commander-in-Chief cannot recommend that my conduct should be investigated by a court-martial. Until this day I have been kept in ignorance of the letter from Lord Raglan. It appeared to have been addressed by his Lordship to the Minister of War, when forwarding me of the 30th of November last. This letter contains entirely new matter, and is replete with new charges affecting more seriously than before on my professional judgment and character. There is now imputed to me, and for the first time, inattention to, and neglect of, another order; and, again, a total incapacity to carry out my instructions, and to avail myself of the means placed by his Lordship at my disposal. Charges so grave, and of a character so exclusively professional, cannot, I submit, be properly disposed of without military investigation. I had myself, therefore, compelled to express my anxious wish that the Commander-in-Chief would be induced kindly to reconsider his decision, and consent to my whole conduct on the day of the action at Balaclava, on the 25th of October, 1854, being investigated by a court-martial. I have the honour to be, sir, your most obedient servant,

LUCAN, Lieutenant-General

To the Adjutant-General

Lord PANMURE. With reference to what has occurred, I wish, on the present occasion, only to explain one point. The noble Earl says that the correspondence ought to have been laid on the table of your Lordships' House long ago. I have stated that my reason for not producing the correspondence was this—that the noble Earl was on his passage to this country, and that when he arrived in this country, if he desired that they should be laid before the House any letter which no man would withstand in his way than I should. I thought that it was just to the noble Earl to let him arrive in this country, and express his opinion on the subject. The noble Earl has now established the whole correspondence. I now hold it in my hand, for the purpose of laying it upon the table

The Earl of LUCAN was understood to move that the papers should be printed

In reply to Lord Berners, who introduced the subject of the Russian trade, Earl GRANVILLE observed that the Government had no intention of changing the orders in council with reference to neutrals. The blockade, such as they were, had seriously affected Russian trade.

The Bishop of EXETER moved for the production of the proclamation issued by Lord Derby's Government against Catholic Processions in Ireland. The motion was agreed to

HOUSE OF COMMONS.—TUESDAY.

Sir C. Wood, Sir G. C. Lewis, and Mr. V. Smith took the oaths and their seats on the Treasury bench.

Mr. PETER HERBERT moved a writ for Portsmouth, in the room of Lord Monck, who had accepted the office of one of the Lords of the Treasury.

THE CRIMEAN MEDAL.

In answer to Mr Stanley, Lord PALMERSTON said, it was not the intention of the Government that the Crimean medal should confer upon its wearers two years' additional service, or any additional privilege.

LORD PANMURE AND LORD HARDINGE.

Mr. HUTT put a question to the noble Lord at the head of the Government as to the instructions in which the Secretary of War and the Commander-in-Chief stood towards each other, the question was rendered necessary from the fact that before the Duke of Newcastle could recall Lord Lucan, he was obliged to confer with Lord Hardinge.

Lord PALMERSTON, in reply, stated that there was no intention to interfere with the Commander-in-Chief's control over the discipline of the Army; but that in all other matters the Commander-in-Chief was subjected to the decisions of the Government, communicated to him through the medium of the Secretary of War.

LONDON CORPORATION REFORM.

In reply to Mr. Labouchere, Sir G. GREY said that a bill was in preparation for the Reform of the Corporation of London, founded upon the report of the Royal Commission, which he hoped to be able to introduce in the course of the present session

CAPE OF GOOD HOPE.

In answer to Mr. H. T. Liddell, Mr. LABY said that no accounts had been received from the Cape of Good Hope intimating that actual hostilities had taken place on the frontier of that colony; but he was aware that considerable uneasiness was felt in consequence of a union between the kaffirs and the Fingoes, which was thought to bode the colony no good. The last accounts received from the Governor were dated December last, were in a most satisfactory and tranquillising character, and the Governor himself was about to start for the frontier

RECORDER OF BRIGHTON

Mr. CRAUFURD moved for a Select Committee to consider the appointment of Mr. Edwin James, Queen's counsel, to the office of Recorder of Brighton, he having been refused admission to the bench of the Inner Temple, on account of his connection with the election for Horsham in 1852

After some discussion the motion was negatived, Mr. Craufurd having been left in a minority of 1.

Mr. J. BURT moved that the motion be struck off the records of the House.

Mr. CRAUFURD opposed this motion, and insisted on dividing the House, but, as he was unable to find a seconder to act with him, the motion could not take place, and Mr. Butt's motion was of course carried

CONSEILS DES PRUD'HOMMES.

Mr MACKINNON called the attention of the House to the inconvenience now felt in this country from the want of a proper tribunal to adjust the disputes between masters and operatives. He gave an account of the institution of the "Conseils des Prud'hommes" in France, which had been found to be exceedingly advantageous in conciliating differences between masters and workmen in France; and though he did not mean to say that an institution in all respects similar would be equally advantageous in England, yet he thought great benefit would be derived from some modification of it. He therefore moved that a Select Committee be appointed to collect information respecting the working of these institutions in France, and the possibility of introducing some modification of them in this country

Sir G. GREY said, there was no necessity for a Committee for this purpose. All information respecting the French institutions either was already in this country or could easily be obtained; and as to their working, from all he could ascertain, he did not think they were suited to the genius of this country

Mr. INGHAM suggested that the right hon. Baronet should himself turn his attention to this question, and establish a tribunal in which such parties might have conciliation.

After some observations from Mr. Wilkinson and Lord Robert Grosvenor, Mr. MACKINNON withdrew his motion.

CEMETERIES ACTS.

Mr. PELLATT then rose to move for a Select Committee to inquire into the operation of the recent Cemetery Acts, and was in the act of enforcing his motion when the House was counted out.

HOUSE OF COMMONS.—WEDNESDAY.

Mr Horsman took the oaths and his seat, on his re-election for Stroud, he having accepted the office of Secretary for Ireland

PUBLIC LIBRARIES AND MUSEUMS BILL

The House went into Committee on this bill. On the first clause being proposed,

Mr. BUCK moved an amendment that, instead of the Act being made applicable to places containing a population of 5000 persons, it should be limited to places where the population amounted to 10,000. After some discussion the amendment was withdrawn.

Clauses up to 17 inclusive were agreed to. Clause 18 was omitted.

Mr. HEADFIELD moved the omission of the words "with the approval of her Majesty's Treasury"

The House divided on the amendment The numbers were—For the amendment, 39; against it, 64: majority, 25

On clause was then ordered to stand part of the bill.

Mr. EWART proposed that in Lord, after the word "books," "newspapers" should be inserted.

After some conversation the House divided, when the numbers were—For the amendment, 52; against it, 64: majority for the insertion of the word newspapers, 4

Sir E. PERRY moved that the libraries of the institution to be created under this Act should be funding libraries

A division of the House took place, when the numbers were—For the motion, 32; against it, 49: majority, 17

Further amendments clauses having been agreed to, the House resumed. The further consideration of the bill was ordered for Wednesday next.

Mr. CRAUFURD moved the second reading of the Judgments, Execution, &c., Bill; which was lost by a majority of 71

The Tea-duties Decline Suspension Bill and the Marine Mutiny Bill passed through Committee

The report on the Committee of Supply was brought up and agreed to.

The Exchequer Bills Bill (£17,165,000) was read a third time and passed.

The Secretary and Under Secretary of State (House of Commons) Bill went through Committee

---

WAS NICHOLAS POISONED?—Most people believe that he has been poisoned, but I have reason to think that it may be ascribed to another cause, from the following facts which have come to my knowledge, and for the authenticity of which I can vouch, although it is such a delicate subject that I thought it more prudent not to commit it at the moment I heard it, which was several days ago. When the Czar received the intelligence that Sebastopol had thrown off her neutrality and openly joined the Western Alliance, he was so overcome with passion that he raved with impotent rage. His first idea was to imprison all the British subjects residing in Russia, and seize their property and ships. The Empress, in her delicate state of health, received such a shock from seeing the fit of passion that the Czar exhibited, that she was obliged to take to her bed, from which she has not yet risen. Nobody attempted to offer opposition, or to place him under restraint, and it was entirely owing to the humane representations of the venerable Count Nesselrode that he was ultimately induced to adopt more pacific and rational feelings in the circular despatch of the 17th February, which bears evident internal signs of having been penned in a hurry and under great excitement, quite at variance with the usual care and skill which diplomatically distinguish Russian diplomatic despatches. How long the paroxysm lasted I am not able to say, but I can assert that it was so exceedingly severe that it was scarcely expected he would recover his reason. Under these circumstances I think I can warrantably in expressing the opinion that poison was a superfluous agent in causing the alarming symptoms mentioned in the bulletin—or death, according to the general belief—but that they may be ascribed to a brain fever, or another attack depriving him of his reason, and perhaps life.—*Letter from Berlin*

THE ALLIED AND RUSSIAN ARMIES IN THE CRIMEA.—We think we may estimate the strength of the Allies encamped in the Crimea at 150,000 men, including the reinforcements continually sent during the last months from France and England, and taking also into account the arrival of the two French divisions which had been left as reserve at Constantinople. The Ottoman forces under the command of Omar Pacha at Eupatoria, ought to present now an effective force of 40,000 men. And as the sick and dead corps or detachments by the three nations to the Crimea is now going on at this very moment, estimated as we believe at 15,000, that the entire strength of the Allied troops will amount to 150,000 men in the course of the present month of March. The Russian army can hardly attain the same figure before it shall have received the reinforcements sent through Perekop by the routes of Odessa, Nikolaief, and Kherson. This army does not appear at this moment to amount to 100,000 men, inclusive of the garrisons in Sebastopol and the other strongholds of the Crimea, and at the disposal of about 60,000 or 65,000 men for any strategical operation. This explains the total inaction since the battle of Inkermun, where it brought into the field 45,000 men who were beaten and repulsed by 30,000. It may be well remembered. It is an ascertained fact that the Russians have suffered as much at least as ourselves through sickness, the inclemency of the season, and the want of provisions and forage. In a climate something like that of France, the winter has exhausted there, as here, frequent vicissitudes of snow, rain, frost, and thaw. The transports across the Crimea have been almost constantly impeded by the breaking up of the routes in a country that does not possess a paved causeway. The winter in Russia Proper is the season for sledge transport, because the frost lasts there four consecutive months without any intervening thaw. It is not the same in Southern Russia, more especially in the Crimea. We may hence conceive the difficulties the Russian army must have had to contend with when marching its reinforcements, transporting its provisions and munitions, and we may picture to ourselves the impossibility even to which it must have been reduced in this respect, if we remember the route of three leagues merely—that from Balaclava to the camp before Sebastopol—becoming impassable, that the English army remained for several days deprived of provisions; and that it was obliged, in order to keep up the fire of the batteries, to have balls and bombs brought on the backs of mules, and even carried by men in their arms.—*Colonel St. Ange, in the "Debats"*

HOW THE FRENCH MANAGE.—The French Commissariat, with its special companies of soldiers of every profession, has constructed ovens, where the bread for the army is baked; the bakers attend batch after batch; the military butchers, called "roumaines," cut up the meat for distribution; the storekeepers deal out in large lots the supply of wine, biscuits, beans, rice, coffee, rice, and whatever military men call dry provisions; others, whose duty it is to attend to the encampment and clothing, stow away in good order a quantity of miscellaneous goods. The regiments, by means of their own mules or fatigue duty, receive from the commissariat these provisions and goods on delivering tickets previously given to them by the military intendants. The canteens are established, set up coffee-shops, wine-shops, or shops where all sorts of commodities are sold at exorbitant prices, and articles of food, which are bought by such individuals as desire to add some European delicacy or another to their ordinary rations. In addition to the field hospitals, the bakehouses, warehouses, and canteens, you see on the same ground the workshops of the artillery, the engineers, and the navy. Here hundreds of smiths, wheelwrights, carpenters, and armourers—every one of whom is a soldier—are at work. Nothing can be more valuable during war-time, in distant countries without resources, than those companies of workmen in every branch of industry carried on by our military commissaries, and the two schools, the engineers and artillery. Our common foot-soldier even, always a good hand at digging, is easily converted into an active and ingenious workman, never at his wit's end for supplying his wants, and who can set up his havresac and his extempore kitchen in the best possible manner. Were he to stop any length of time on the same spot, he would soon have his kitchen-garden, as our soldiers actually had at several encampments in Algeria, and which have since grown into villages. We see, then, at the French Army carries with it all the arts and trades: everywhere it finds its resources; and is in itself a complete orchard body. This administrative, military, and industrial system, these companies of workmen, all this organisation, in short fails in the English Army, and its soldiers, so intrepid in the combat, have not the aptitude of ours for the various works of war, especially those of a siege in England we know this: it has received the opinion of almost as defective an her military organisation. Enlightened for the time to come by dear-bought experience, she is about to remedy that defect with the energy of a great nation; and she has to go behind other nations, and even go into villages. We see, then, that the French Army carries with it all the arts and trades: everywhere it finds its resources; and is in itself a complete orchard body. This administrative, military, and industrial system, these companies of workmen, all this organisation, in short fails in the English Army, and its soldiers, so intrepid in the combat, have not the aptitude of ours for the various works of war, especially those of a siege in England we know this: it has received the opinion of almost as defective an her military organisation. Enlightened for the time to come by dear-bought experience, she is about to remedy that defect with the energy of a great nation; and she has to go behind other nations, and even go into villages.—*Colonel St. Ange, in the Debats.*

THE SUPPLIES TO THE TURKISH ARMY.—A convention was signed in London on the 24th of January between her Majesty and the Emperor of the French relative to the supplies to be furnished to the Turkish army. The Allies undertook the supplies to the troops as nearly as possible. In the case of one of the two Powers furnishing a larger proportion of the supplies, there shall be an account of the same rendered every three months, and an account of the supplies furnished by each party, and the balance in favour of the expense will then be paid. Any accounts may show to have fallen to the charge of one of the Allied armies, shall be repaid to it by the other. The valuation of the articles will be fixed according to a tariff to be previously arranged between the [illegible] The convention was ratified on the

PRINCE MENSCHIKOFF.

One of the last acts of the late Emperor of Russia is said to have been the recalling of Prince Menschikoff from the command he has held in Crimea since the commencement of hostilities. His successor in that highly responsible position will be Prince Gortschakoff, who commanded the Russian forces last year in the Principalities. If it be also true, as is stated in letters from Berlin, that General Rudiger has been summoned from the high position he held in the army in Poland to take the direction of the Ministry of War, in place of Prince Dolgorouki, and that General Rebutoff, the Home Minister of the Empire, is to be removed, we may now take leave of Prince Menschikoff, whose name has been, and will ever remain, so unfortunately mixed up with these transactions. He was chosen by the late Emperor as one of the principal members of the old Muscovite party in the State, to proceed on the mission to the Porte which gave the signal of this contest. He performed that mission with consummate arrogance; and, if his object was to pick a quarrel, no envoy could have been better chosen for that purpose. Unconciliating, and even uncouth, in his manners—unacquainted with the forms of diplomatic intercourse or the political dangers he called into life, Prince Menschikoff succeeded in nothing but in rousing the spirit of the Divan to all the ardour of resistance, and in enlisting the sympathy of Europe on the side of his victim. The day of his leaving Constantinople was virtually the commencement of hostilities; and the master in whose service he had undertaken this mission was destined never more to know an hour of success or repose on this side the grave.

Prince Menschikoff, in his capacity of Admiral, Head of the Fleet, and Minister of Marine, has continued with great energy to face the storm he had drawn down upon his country. His abilities as a commander of troops in the field do not appear to have been equal to his presumption, and the battle of the Alma first told him how ill-prepared the forces under his command were to meet the picked troops of England and France; but it is due to him to acknowledge that he has shown very great energy and inexhaustible resource in the defence of Sebastopol. There is no example in history of defences and works of so extensive a character thrown up by a besieged garrison in presence of a powerful enemy; and the highest compliment which can be offered to Prince Menschikoff is the simple statement of fact, that on the 26th of September the place was almost open, and only defended by the vessels in the harbour; but that, five months later, and in spite of continual attacks, the town is supposed by many persons to be impregnable to any direct assault. If Prince Gortschakoff is destined to hold the supreme command of the Crimean army, and General Osten-Sacken to command under him, the Allies will have no reason to regret the change.

PRINCE MENSCHIKOFF, LATE COMMANDER OF THE RUSSIAN FORCES IN THE CRIMEA.

The appointment of Count Rudiger to a higher position in the Government is deemed creditable to the sagacity of the new Emperor. This officer was the same who entered into negotiations with Georgey in 1842 to bring to a termination the Hungarian campaign, and who afterwards endeavoured to check the reactionary measures taken against the Magyars. He is a man of experience and moderation, whose influence is likely to be decidedly opposed to that of the fanatical Russian party, which has attempted to give to this war the character of a national crusade. If it be the resolution of the new Emperor to persevere in the negotiations which are about to open at Vienna, and to make the necessary concessions for the restoration of peace, he will need the authority of wise and firm counsellors to render that peace acceptable, and even endurable, to the Russian nation. Its ambition has been deceived, its aggression has been punished, its armies have been defeated, and its own territory invaded; but, in spite of the sufferings occasioned by this war, the resources of the Russian Empire are not yet so thoroughly exhausted, and public opinion, even in that country, is not so dead but that any Government must justify the terms of peace to its own subjects, if that peace is to be lasting and secure. In some respects the Government which has now succeeded to the direction of affairs may have greater difficulties to surmount in this matter than that of the Emperor Nicholas, which could have imposed upon the country any treaty he thought fit to sign. It may be a question whether his son and successor has power to lay the phantoms which the father had so imprudently raised; but this question depends on another—whether the spirit and energy of the Russian people is thoroughly engaged in this war, as the partisans of the Czar pretended, or whether they are anxious to terminate its evils as speedily as possible.

We do not here enter into the long official career of Prince Menschikoff, as we gave in the Illustrated London News for December 10, 1853, an extended biographical memoir of the Prince, accompanied by a Portrait.

HER MAJESTY'S VISIT TO CHATHAM

On Saturday morning last, at half-past ten o'clock, her Majesty, accompanied by Prince Albert, proceeded by way of the Bricklayers' Arms station, along the North Kent line, to Chatham, for the purpose of inspecting the wounded soldiers from the Crimea. In the carriage with the Queen were their Royal Highnesses Prince Albert, the Prince of Wales, Prince Alfred, and the Duke of Cambridge. Viscount Hardinge also attended her Majesty. The battalion of Royal Marines, with their splendid band, was in attendance at the Strood station, which was appropriately fitted up for her Majesty's reception. A substantial platform, sufficiently high to be level with the door of the Royal carriage, was laid down, and was covered with scarlet cloth, so that her Majesty and the Prince passed comfortably from one carriage into the other. Her Majesty proceeded through Rochester and Chatham—the inhabitants of both of which towns evinced their loyalty in the most enthusiastic manner—to the Government

HER MAJESTY INSPECTING THE WOUNDED TROOPS, AT FORT PITT HOSPITAL, CHATHAM.

H.R. MAJESTY INSPECTING THE WOUNDED GUARDS IN THE GRAND HALL OF BUCKINGHAM PALACE. (SEE NEXT PAGE.)

House, the residence of the Commandant, Colonel Eden, and from thence to the hospital at Fort Pitt.

On arriving at Fort Pitt her Majesty was received by Dr. Dartnell, the chief medical officer, and by the other officials of the establishment, who conducted the Royal party through the hospital. Her Majesty visited every ward in succession, and approached the bedside of every invalid, to each of whom she addressed some kind remark. The attention of her Majesty was particularly called to one of the invalids, an old man named George Hayward, who has been an inmate of the hospital upwards of thirty years. In the course of the inspection, her Majesty gave directions to Dr. Dartnell to prepare a return of the name of every patient in the hospital at the time of the visit, the nature of his wounds, and where and how received, with directions to forward the same to her. Those patients who were not confined to their beds were drawn up in one part of the hospital, and these were also visited by her Majesty, who took great interest in their maimed and mutilated appearances, asking several questions of them, and addressing words of kindness to the brave fellows, who expressed the fullness of their feelings for her Majesty's condescension by cheers, which were hearty, and meant also to be loud. Lord Hardinge accompanied the Queen through the hospital, her Majesty frequently asking questions of his Lordship as particular cases attracted her notice

The Royal party then drove to the Invalid Hospital, at Brompton Barracks, which has been fitted up by the Board of Ordnance for the reception of wounded troops. On arriving at this hospital, shortly after twelve, her Majesty and Prince Albert were received by Dr. Reed and Dr. Atkinson, of that establishment, by whom the Royal party were conducted through the very extensive wards. At this hospital there were about three hundred wounded soldiers, and her Majesty evinced the same anxiety to make herself acquainted with the details of each case, as she had done at Fort Pitt. His Royal Highness Prince Albert was also deeply solicitous for the welfare of the brave fellows, and frequently made inquiries of them as to the nature of their wounds, &c. The Duke of Cambridge was most cordially received by the men, his Royal Highness entering into conversation with several of them whom he appeared to remember. The Prince of Wales and Prince Alfred were near her Majesty during her tour through the wards. The inspection of the troops in this hospital lasted till one o'clock, at which hour her Majesty retired amid the loudest demonstrations of applause from all assembled

It was anticipated that her Majesty would pay a visit to the Garrison Hospital, and also to Melville Hospital, and arrangements had been made with that view; but on leaving Brompton Hospital her Majesty did not signify her pleasure of visiting those establishments. The number of invalids visited by her Majesty amounted to 493; but, exclusive of this number, a considerable number are also in the Garrison Hospital

The Royal party drove direct from Brompton Barracks to the Strood terraines, and were immediately conducted to their seats in the Royal carriage, immediately after which the train was set in motion, and the Royal party returned to Buckingham Palace.

THE WOUNDED GUARDS AT BUCKINGHAM PALACE.

At the inspection of the wounded and disabled Guards by the Queen, the other day, in the Grand Hall, at Buckingham Palace, these heroic soldiers appeared before their Sovereign in the very clothes they wore in battle, and most of them were dressed in their coats and forraging caps. Those who were unable to walk from the barracks were conveyed to the Palace in an omnibus. The Queen addressed each man, asking particularly about his wounds, how long he had been ill, whether he still felt any pain, and if the change to his native air had been beneficial to him, with many other inquiries, all dictated in the most kind and gracious spirit. Some of these veterans, for so they have earned the right to be called, had strange tales to tell their Sovereign. One had been left for dead upon the field during many a weary hour, another had received five bayonet wounds, a third had lost an eye in a most extraordinary manner, a fourth had lost his hands in the very act of presenting his gun to fire, when they were struck by an enemy's ball, and some even showed the Queen the holes in their coats through which the bullets had entered when they were wounded. After her Majesty had heard their narratives from the men themselves, the Surgeon-Major of the regiment gave an official report to the Queen of her Majesty made inquiries of that officer respecting the general state of the health of the men. After the inspection, the invalid Guards were, by Royal command, marched to the servants' hall, where the very best banquet their medical officers would permit them to have was served to them. The repast necessarily consisted of the plainest viands. So delighted were these brave fellows with their Sovereign's kindness and condescension that nothing could restrain them, after dinner, from giving three vigorous cheers for the Queen. The most prudent care was taken that the repast should not injure their health; and the surgeon having recommended that porter should be served to them instead of ale, a plentiful supply of that national beverage was provided.

Nearly all these men bear on plainly the marks of the fearful struggle in which they were engaged, and are unfortunately disabled from further service in the Army. Several of them, having been but a short time in the Army, will be entitled to only a small amount of pension, and the brave idea that men who have performed such feats of valour in the service of their country should be left to struggle with penury and destitution cannot be for a moment tolerated. Many of these men, although unfit for military service, are quite capable of duties where steady habits of discipline and punctuality and obedience is required, and would rejoice in any employment that would enable them to maintain their independence. They are well suited to act as private watchmen, gatekeepers, porters at warehouse-keepers, and as porters in attendance upon passengers at railways would be highly useful. It is to be hoped that the generous feelings manifested in innumerable instances by the public during the present war will not fail to find employment for these noble fellows. We are glad to learn that every opportunity of employing them in the Royal parks will not be forgotten.

THE FOOT-MARKS IN THE SNOW, IN DEVON.

(We select the following from several additional communications upon this query):—

In addition to what I said in my letter of the 28th ultimo, relative to the "Foot-marks in the Snow in Devon," it appears to me that, as the "snow lay very thinly on the ground at the time," as stated by your Correspondent, such was the reason why the inner part of the tracks was not so clearly defined as the outer part of them; therefore the outline traversed would look like a donkey's track, as stated in my previous letter; and I presume the heel of the tracks has been taken for the forepart of them.

If birds made the tracks, they probably were either web-footed ones or waders—most likely the latter, as they could run much swifter and better across the country.

Dr. Buckland, in his "Bridgewater Treatise," vol. ii., p. 89, in speaking of tracks in new red sandstone, set forth in plate 24a, that work, says—"None of the footsteps appear to be those of web-footed birds which nearly resemble those of Gralle (waders), or birds whose habits resemble those of Gralle. The impressions of three toes are usually distinct, except in a few instances: that of the fourth or hind-toe is mostly wanting, as in the footsteps of modern Gralle."

Now, if the foot-marks in the snow were made by waders, the shallowness of the snow is a sufficient reason why the impression of the fourth or hind-toe was not made (as in the cases noticed by Dr. Buckland), and with respect to web-footed birds their hind-toe is very small

The size of the tracks in the snow—namely, four inches by two inches and three quarters—shows that they must have been made by very large birds (if they are attributable to them), and the probability is that some waders were frozen out by the severity of the weather from the shores of the rivers or estuaries of the sea, and that they ran over South Devon in the night of the 8th inst. in search of food, and afterwards mounted aloft, as cranes do, before the dawn of day.

If the bird theory is correct, perhaps some one skilled in ornithology may, from the size of the tracks, and the distance (eight inches) of the stride between them, give some idea what species of bird it was

Tivel House, Cheltenham, 3rd March, 1855. JAREZ ALLIES.

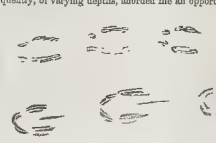
Saint Mary's Church, Torquay, Devon, 3rd March, 1855.

Having seen in the ILLUSTRATED LONDON NEWS of last week the account of the foot-prints made in the snow in this neighbourhood by some as yet unknown, and as various conjectures are made as to what animal has first travelled over fields and gardens, and after going clean over houses has not been stayed by a tidal river two miles wide, I send you an attempted explanation of the affair. There are certain times and seasons for the pairing and breeding of animals accurately fixed by Nature. The green plover is frequently caught in the snow in Scotland after his arrival in that country, and he must bear it as best he can, as why none of not other animals have to face the snow-flake in the breeding season, and have to travel a weary way before they can make their beds and lay them down in peace? This, I am persuaded, is the hard fate of the sable bird who has caused such unwonted prints upon the snow in Devon. In a line from the simple fact of finding the marks of the animal first, and then finding the carcass with the evident marks of a violent and sudden death in the track. It was neither bird nor beast that made the marks, but a reptile; not only putting his feet and claws (for he had claws) to the ground, but his belly too: hence the puzzle of the large print made in a line by his four feet and his belly all at once, every time he hopped. At the twenty-first milestone from Exeter, and third from Torquay, a large toad was found by me in the Dawlish road, crushed to death by a carriage-wheel, the track of the same was well defined for some distance along the road, and was exactly as described by your Correspondents and illustrated by you.

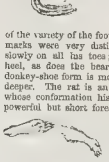
The time for frogs and toads to spawn in Devon is rather earlier than in the north. Frogs are scarce here, but toads are not; and as Shaldon village lies against a steep hill, the houses admit toads to travel over them easily, and all toads that are to breed must travel to the water to do so, be the distance more or less; and as nobody turned out this unfortunate toad to seek his mate and perhaps his grave, there is no doubt been the fate of others like him to have had a trip on the snow-flake. ALEX. FORSYTH

Ballingdon, near Sudbury, Suffolk, March 3, 1855.

The foot-marks described by your Devon Correspondent are made, in my opinion, by the poor despised and insignificant rat. My brother lives in a house a quarter of a mile from Sudbury, surrounded by fields and gardens: he called my attention to the foot-marks of rats about his garden, and we found they had laid siege to his potato clamp. Tracing the depredators, he exclaimed, the Devonshire donkey has been here! and, on examination, I found the foot-marks exactly to agree with those described in the ILLUSTRATED LONDON NEWS for last week. We found the marks of no other mammalia, except of the rabbit, and no one would suppose they could all be made by the same kind of animal. The snow being drifted, and, consequently, of varying depths, afforded me an opportunity of observing the cause



of the variety of the foot-marks. Where the snow was only one inch deep, marks were very distinct: in one they were caused by the rat walking slowly on all his toes; in another track he is evidently trespassing on the heel, as does the hare, the rabbit, and the squirrel; in another track the donkey-shoe form is more clearly defined, which is caused by the snow being deeper. The rat is an expert climber, though far inferior to the squirrel, whose conformation his greatly resembles: they are provided with a very powerful but short forearm, the muscles of which are strongly developed.



It is well known that when these little animals leap or bound along they alight upon their four feet very close together, and the large muscles of their short arm cause the claws to be far apart and nearly touching the ground, and in their descent form in the snow the semi-circular part of the donkey shoe; and the toes of the hind-feet approaching near to the *nine* or elbows of the forearm, complete it by forming its two sides. The impression between the heels and the shoe is made by the rat's tail. I should have said the distance from the toe of one impression to the heel of the preceding one was eight inches. THOMAS FOX.

We agree with a Correspondent that the following attempted solution, from the *Brighton Guardian* of Feb. 29, between its jest and earnest, is calculated to envelop the subject in deeper mystery:—

Is it not possible—nay, probable—that these are the footsteps of that animal so accurately described by Biorn Heriolfson, the Icelandic navigator, who visited the coasts of Labrador, A.D. 1001, and to whom, with Leif, Barni Bjamsdalf, in his "Cosmos," attributes the discovery of America? The records of this event are both numerous and authentic, and have received ample confirmation from the researches of Rafn, the learned Danish antiquarian, and other scholars. Biorn Heriolfson describes an animal, which he terms the Unipeds, or Uniped, as having a foot similar to that represented by the copy given in the ILLUSTRATED LONDON NEWS, with the exception of an almost imperceptible division in the outer and inner circles of the hoof. The character of the limb was, in his opinion, a stronger phenomenon than its singleness, for it partook rather of that of a quadruped than of that of a bird. He informs us that the wings appeared to radiate from the middle of the back with the feathers spreading out in a manner similar to those in the tail of a peacock; but they were slightly divided into two equal parts when the bird was in motion. Moreover, the uniped had the power, when alarmed or excited, of erecting a single crest of feathers above the head as peculiar and striking that an opinion prevailed among the learned of Iceland that this animal was the unicorn, hitherto considered fabulous. Let it be remembered that the inhabitants of Iceland, during the eleventh, twelfth, and thirteenth centuries, created and maintained, amidst its snows and volcanic fires, a literature which would have honoured the happiest climes of Europe. Biorn Heriolfson, in completing his description of the uniped, states that the organs of vision approximated so closely that they had the appearance of a double eye. This bird, he affirms, flew, or rather ran, with incredible swiftness, touching the ground frequently and at equal distances. Thus the footsteps would be in a direct line. In conclusion, your readers may rest assured that the dimension of the tail of the uniped is just one half of that of a great dodo.

We find the following in the *Inverness Courier*:—"The foot-prints seen in this neighbourhood were traced for a considerable way across the fields, and at the Longman, and again at the Crown, near the house of Abertarff. Many of our townsmen went to see the phenomenon, and one brought home a lump of the snow, in which the foot-prints were strongly impressed, exhibiting it as a very curious and mysterious occurrence. The clumsy hoof had an ominous and by no means prepossessing look! Fortunately, however, an observant naturalist had already examined the foot-prints and decided the point. Some animal, probably a hare or polecat, had traversed the field at a gallop with its feet close together. The paws had become slightly filled with snow, so that only the round form was impressed, and the open space between them left a slightly-raised and pointed mark like the centre of a clover leaf. This gentleman followed the track till, on ascending a slope, the animal appeared to have slackened its pace to a trot, and then left upon the snow distinct impressions of its four feet. Further on, the animal seems to have sat down in the snow, and again its four feet were distinctly traced. Nothing more was desired—the mystery was traced.

ROYAL PATRIOTIC FUND.—The Royal Commission of the Patriotic Fund has issued a circular, stating that the following will be the scale of allowance from the 1st of March for the widows and orphans of the non-commissioned officers and privates of the army and marines, and petty officers and seamen of the navy:—

Rank.	Number of Children.	Widow.	Widow and One Child.	Widow and Two Children.	Widow and Three Children.	Widow and Four Children.	Mother only.
Royal Marines		Quarterly.					
		£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Non-commissioned Officer	1st	0 7 0	0 8 0	0 9 0	0 10 0	0 11 0	0 5 6
Corporal (Colour Sergeant in a week additional)	2nd	0 6 0	0 7 0	0 7 6	0 8 0	0 8 6	0 5 6
Corporal or Bombardier	3rd	0 5 6	0 6 0	0 6 6	0 7 0	0 7 6	0 5 6
Drummer, Trumpeter, or Private	4th	0 5 6	0 5 6	0 6 0	0 6 6	0 7 0	0 5 6

Sixpence additional per week to be given to every fifth person.

As the foregoing scale for widows and orphans must necessarily be influenced by the various circumstances of every case, although it is made to be the general rule, the Committee reserve to be at liberty to act from it in cases calling for the exercise of their discretion; sickness and lying-in, for example, will admit of exception.

COMPULSORY PREPAYMENT OF LETTERS TO THE SEAT OF WAR.—As there is reason to believe that the rule requiring the prepayment of the postage upon letters addressed to officers, soldiers, and seamen, serving in the Army and Navy at the seat of war, is not generally understood, the Post-office authorities call the particular attention of the public to this regulation, inasmuch as letters which are not prepaid are detained at the General Post-office, for the purpose of being opened and returned to the writers. The same regulation applies equally to letters addressed to officers and seamen in the Transport Service in Turkey and the Black Sea.

PANORAMIC VIEW OF ST. PETERSBURG.

IN her amusing "Letters from the Baltic," Miss Sedgwick (now Mrs Eastlake), transported by the strange, and yet splendid, appearance of St. Petersburg, indulges in a rhetorical rhapsody which would have much scandalised Dr. Hugh Blair. She says:—"The real and peculiar magnificence of St. Petersburg consists in thus sailing, apparently upon the bosom of the ocean into a city of palaces."

But inasmuch as St. Petersburg, of which she speaks, does not sail into a city of palaces, its magnificence must consist in something else. If the lady meant that the magnificence of St. Petersburg consisted in her sailing into the midst of its palaces: we can hardly agree even with that observation; although the occasion of a charming stranger could nowhere be more valuable than in a city where the ugliest native woman in the world are to be found. It was a magnificent city, however, before she sailed into it, and magnificent after she sailed away. What the authoress evidently intended to imply is, that one of the most splendid impressions which the visitor can obtain of the beauty of the great northern capital is by making the sea entrance to it, and by sailing, not "apparently," but in act and truth, into the very midst of its brilliant edifices. And this, at least, is perfectly exact. Such an approach must, of course be made in summer. The weather is then dazzlingly bright, and as hot as that of Marseilles. You have been some time without incidents and without a view, gently borne over the short chopping "mutton waves" of the Baltic. Upon a sudden, as if by magic, the horizon flashes upon you a blaze of glory—painted cupolas, superb towers and steeples, and the radiance of burnished gold from innumerable domes, shining with an unspeakable lustre in the pure air and powerful sunlight of a Russian summer; and almost immediately (so low and so long-concealed is the situation of St. Petersburg) the massive and imposing architectures of this city of yesterday, stretch around you on every side, and welcome the ship in their gigantic embrace. You thus land on the English Quay, "Angliski Nabreshnaya:" it begins below the bridge on the left bank of the river

Nevertheless, we say it without hesitation, whatever pleasure may be derived from this approach, and from thus sailing into a city of palaces, ninety-nine visitors out of every hundred will experience a far more exquisite pleasure when they sail out of it again. This is no speculative opinion; it is the lesson of our own well-remembered experience. It is, with all its architectural splendours, the gloomiest, the dreariest, and the most inhospitable abode in which we ever had the ill-luck to dwell! The physical atmosphere is pure; but the moral atmosphere is oppressive, chilling, dark with suspicion, with profligacy, with the sense of treacherous tyranny and domiciliary espial, and with the all pervading influences of tyranny above, and servile degradation around. However, our business at this moment is not with Petersburg in its social or political condition, but with Petersburg in its aspect and site. The mistake of Peter the Great in choosing such a situation at all for a maritime capital is an old story; but there is the farther mistake of having selected a morass for the immediate building ground. The place is nothing but a swamp drained; and the canals which are so much admired, along which people row in summer evenings to take tea with each other, and which in a few more picturesque Venetian sort of air to the town, serve in reality a more practical and necessary object—they are the great sewers, which contribute to make the place habitable. Another most serious disadvantage is, that the Neva is liable to overflow its banks, and every autumn and winter, during which Paris and London have been growing, it is indeed an amazing spectacle. On the other hand, this very newness has been of immense advantage to the Russian capital. It began with the improved forms of modern towns. It has no wilderness of slums and courts to remove; no crooked, narrow, impracticable lanes to rebuild into commodious thoroughfares, none of the feelings of political entanglements of barbarous times to remodel. From the first, it arose on a metropolitan plan—grand, airy, and penetrable. At this moment, though not numbering one half the Paris population, it covers as large an area as Paris. And this is the work of about one hundred and seventy years

Let us now turn again to our Panorama. By far the most important part of the city stands on the further bank of the Neva, as the reader looks at a view; that is to say, on the left bank. On this side, there is, however, the fortress; as stunted, that of the Governor were corrupted and it is the first attempt in every conspiracy to gain him or to replace him it would not require ten minutes to blow to pieces the entire capital. On the opposite shore, and to reduce to obedience the entire capital. On the same side are the fortress, and almost in it, a little behind to the left, is the cemetery of all the Emperors. Further up that bank, the town stretches into suburban villas, embosomed in trees, the impenetrable shade of which in summer makes them valuable to all who do not escape early into the country. Down the same bank, are some islands connected with the main land by bridges; of these grove-covered islands, which are the resort of pleasure in the hot months, and pleasant wilderness extend. That is in the further island.

If we now cross the river by that bridge of boats to the right, or, better still, by the truly magnificent new bridge of granite, we come upon probably the largest and finest square in the world—the celebrated Isaac Plain, in which the Emperor Nicholas quelled by personal "derringdee" the dangerous insurrection which greeted his accession to the throne. Before you towers the mighty equestrian statue of Peter the Great, in an attitude and position to furnish a living model for which to the sculptor it is said that Count Orloff, Catherine's favourite, imperilled his neck, in that very fashion, on the back of a thoroughbred horse, which he galloped to the brink of a precipice, and then checked.

To your right hand, running out of this square, stretches the English quay, and parallel with it, behind, several smaller streets, one of which you see under an archway. The rest of that front of the square is occupied with the Senate House—a name which is but a mockery of freedom in reference to the scene of servile deliberations. Beyond this the Mall, with some terraced walks under a few trees, runs out of the picture, parallel still with the English Quay. That to the west side. The south is filled with the Admiralty-garth, not yet finished for they say that the late Emperor has bourred a superstition that he would not survive the year in which it should be completed. It is designed to take rank among the greatest and most splendid fanes in the world. The interior will have the peculiar beauty or effect derivable from innumerable columns of malachite; and in many parts the walls will shine with rare decorations, and be literally encrusted with silver, gold, and gems. At right angles with this square, and opening into it, is another, not quite so capacious, extending before the Winter Palace and the Admiralty. If you reckon both these vacant places as forming one "square" (not of course geometrically), there is nothing so large in any other city. In the smaller square, which is oblong, and which is surrounded by magnificent palaces and public piles, occur, in winter, the games of the ice-hills, the carnival fair, and the sports of swing, merry-go-round, common people's theatricals, &c., under the very windows of the Emperor. The present palace was destroyed in two years (to replace the palace just burned) by an army of builders, working night and day without intermission.

Now being in the Isaac Plain, or rather in that space which abuts upon it, and which is called the Admiralty-square, you see running south, in a straight line, and narrow, the Regent-street of Petersburg, the Nevski Perspective. This crosses all the canals on pretty bridges—one of them adorned with specimens of colossal bronze sculpture, famous all over the world—and traverses the entire city between lines of lofty and massive granite mansions. About half-way you pass the Cazan Church, the name of which is taken from a town in Turkey, under the Baikan. There is no plate-glass in the shop-windows; many shops, indeed, are under ground, with a sign of a glove, or whatever else, to tell you where to descend—all sombre, though imposing.

Returning back to the Admiralty-square, if you pursue the transverse road, and proceed up the left bank of the Neva, you pass the Hermitage, and Constantine's Marble palace, and many other superb piles; and in a few minutes you are in the Champ de Mars, about one-third smaller than that of Paris. Beyond it is the Summer Garden, with its bowers, walks, and statues; and, just outside of this, the Paul Palace

The most curious effect in the whole city is, after all, produced by the domes of the churches. These generally consist of a substance compounded of gold and, we believe, zinc.

We have given a fair description of the odd beauty of the scene, and, knowing all that such a point is worth, we repeat that to most places in the world pretending to civilisation which, as a residence, could give less satisfaction to a stranger than this gorgeous capital

NEW BOOKS, &c

The day, the hour, the year, &c., &c.

A HISTORY of ENGLAND during the REIGN of GEORGE the THIRD. By WILLIAM MASSEY, M.P. Completed in Four Volumes.
London: JOHN W. PARKER and SON, West Strand.

THE ILLUSTRATED LONDON NEWS

No. 732.—VOL. XXVI.] SATURDAY, MARCH 17, 1855. [WITH A SUPPLEMENT, SIXPENCE.

THE POSITION OF PRUSSIA AND AUSTRIA.

ALMOST immediately after receiving the intelligence, the Emperor of the French is reported to have said that "nothing was changed" by the death of the Czar. Having made up his mind to push the war with the utmost vigour, Napoleon III. could not find in the removal of one Czar and the substitution of another any reason for relaxation of effort; but, on the contrary, every reason for redoubled energy. Most people are now of the same opinion; and every day adds strength to the conviction in every part of Europe. If anything have been changed, we must look for the change not in Russia, in France, or in Great Britain, but in Germany. Russia must fight her way as best she can out of the perils and difficulties in which the ambition and the hereditary policy of her rulers have involved her; and the Western Allies must strain every nerve to settle the question by the great *ultima ratio*, against which all other arguments fall powerless the argument of the strong hand and the victorious sword. But in Germany, the death of the Czar seems as if it would operate to the confusion of counsel and to the renewal of the efforts of those Powers who dread and hate war for personal reasons, or who sympathise with the Russian system, and expect to profit by its extension.

Prussia and Austria have, it must be confessed, abundant reasons or disquietude as long as the war continues. Prussia, a still younger member of the European commonwealth than Russia—a Power which, like Russia, is an interloper into the European system, and, like her, has been constructed and built up at the expense of many neighbouring States—approves the policy of the Czars. The Kings of Prussia are in a great degree swayed by a similar ambition. They want Prussia to be enlarged. They want it to swallow up the minor States of Germany. They would like to annex Bavaria, Saxony, Hanover, Wurtemburg, and all the little Dukeries and Principalities that lie in such provoking contiguity to the Prussian territory. And if the Czars were successful in riding rampant over Europe, and in reducing Great Britain and France into the rank of second-rate Powers, Prussia, as far as her King is concerned, would be only too happy at a consummation which might result in making her mistress of Holland, and perhaps of Denmark, as well as of Germany. But, fortunately for Europe, the Prussian people have formed other and nobler wishes. They also desire the grandeur and the elevation of Prussia, not as Prussia, but as Germany. They have tasted the sweets of liberty, and are determined to repossess them. The triumph of Russia, if it pleased their King, would be in the highest degree distasteful to them. They are an intelligent and a civilised people, and, as such, can have no sympathy with the despotism and the barbarism of Russia. Of the same blood and lineage as ourselves, they would look upon the discomfiture of Great Britain and France as the greatest calamity that could befall the world. It is this antagonism between King and people which produces and explains the wavering policy of the weak but ambitious man who is unfortunately at the head of the Prussian State. He would be happy enough to make common cause with the Czar if his people would allow him; but he dreads the revolution which would result. One word from Napoleon III. would let loose the avalanche which would engulf his throne, and lead to the reconstitution of all Germany. As long as the war lasts, this peril is before him; and as it is not in his nature to take the bold course which his people would recommend, and help to bring the war to a speedy conclusion, by throwing the whole weight of the Prussian Monarchy against Russia, he will continue his neutrality as long as he can, and turn it, if possible, to the disadvantage of the Allies. The death of the Czar Nicholas will remove no difficulties from his way. It merely gives him an opportunity to plead for the new Czar, and to strive to make better terms for him than he could have hoped to gain for Nicholas. He will be as heretofore a sham friend of peace, and will support any proposition which would end the war without defeating the arms of Russia,' or exacting guarantees for the future stability of the European system. It remains for the Allies to bring him to reason. They must show him that as a false peace-maker he is a public nuisance; that, if it suits his purpose to look upon the war as changed in its aspects, its nature, or its importance by the death of Nicholas, they have other and wiser notions; and that he must take his side, or abide the consequences.

Austria—though a despotic State—has not, and cannot have, any real sympathy with Russia. The extension of Russian power and influence has been at the expense of Austria more than of any other State in Europe, with the sole exception of Turkey. Metternich knew and acted upon this principle. Schwarzenberg—even when reluctantly compelled to accept the aid of the late Czar—felt the depth of the humiliation, and the danger of the assistance; and meditated even at that moment the "huge ingratitude," which at some future day it would be necessary to display towards the haughty protector of the Austrian empire. Every sentiment of policy, of reason, of justice, and of self-preservation, unites Austria with Great Britain and France; but Hungary and Lombardy are thorns in her side. To Austria war against Russia is far more hazardous than it is to the Western Powers. France and Great Britain have nothi

COMMITTEE OF THE HOUSE OF COMMONS TO INQUIRE INTO THE STATE OF THE ARMY BEFORE SEBASTOPOL.—(SEE NEXT PAGE.)

to fear from internal treason. Russia can appeal to no oppressed nationalities within the boundaries of either. There is no Celtic disaffection to fan into a flame in Ireland; there is no sanguinary Red Republic to call into being to undermine the throne of Louis Napoleon. But in Austria the case is different. The new Czar is just as likely as his predecessor to avenge himself upon Austria *per fas aut nefas*; and, if Kossuth and Mazzini be too pure-minded to become his tools, to look about for new Kossuths and Mazzinis, to raise the flag of revolution, and of Hungarian and Italian independence, if, by so doing, he could weaken the position and distract the councils of the Austrian Emperor. In presence of this great danger, Austria did not scruple, during the lifetime of the Emperor Nicholas, to approximate more closely, day after day, to the policy of the Western Powers. We do not see any ground for the suspicion, that Austria will be less wise and bold in dealing with Alexander II. than she was with Nicholas I.; but, on the contrary, much reason to believe that, even more than formerly, she will see that the only safe and the only prudent course is to be decided, and to carry on the war with such vigour as to isolate her domestic from her foreign foes; and, by helping to conquer Russia, to adjourn the Hungarian and Italian question until a firmly-based European peace shall give her the opportunity to convert those countries into well-affected and well-governed portions of one great and prosperous whole.

And while such are the relations of Austria and Prussia towards Russia and towards the Allies, the position of events in the Crimea is daily improving. The state of the British army has been in every respect ameliorated. With returning spring, and with good management, the health and spirits of the troops have revived. The Russians are dispirited, if not demoralised. To have been beaten by a handful of British soldiers at Inkerman, must have been disheartening, but to have been foiled ignominiously by the Turks at Eupatoria must have been a heavy blow and great discouragement. And the death of the Czar news of which must shortly afterwards have reached their stronghold—must have operated disadvantageously, not only upon the plans of the Generals, but on the courage of the soldiers. If anything, therefore, have been changed by the death of Nicholas, it is to be expected that it will be a change from comparative inaction into the full hurry and impetus of war. Peace shines upon the far horizon; but ere it comes the war-cloud must burst. It is likely that the world will not have long to wait for the explosion.

THE COMMITTEE ON THE ARMY BEFORE SEBASTOPOL.

In the Sketch which our Artist has given of the members of the House of Commons sitting in Committee on the state of the army before Sebastopol, it will be remarked that the numbers present are much larger than is usual in cases where the subject is of less overwhelming interest. In fact there has been no difficulty in getting a quorum. Honourable members will hardly fail to recognise Mr. Roebuck in his place of chairman, Mr. Layard near him, and Sir John Pakington on his right. No one can look at the Hon. Col. Lindsay's bis piercing eye, and military attitude, and not know him, and few who have visited the spot will fail to discover in the bearded Crimean who stands behind the chair the face of the Hon. Member for Lichfield. Our Artist, while free to much justice to the committee, has unfortunately been unable to depict the enormous crowd which forms a "queue" outside for an hour before noon, and which engulfs itself into the Committee-room with an eagerness and velocity only equalled by the noise which accompanies the operation. In truth the interest the Committee is that on which the whole nation is intent, and one in which both members and public are too much interested not to be eager to attend.

Among other witnesses examined during the present week were—the Duke of Cambridge, Colonel Wilson, Captain Blakeley, Captain Shakspere, of the Royal Horse Artillery; Mr. Crowe, Correspondent of the ILLUSTRATED LONDON NEWS; Captain Kellock, of the *Himalaya*; Colonel Sparks, of the 38th Regiment; Thomas Dawson, Sergeant in the Guards; Colonel Kinloch, Lord Carington, and Mr. Macdonald, of the *Times*. The general tenor of the evidence hitherto has been in the main confirmatory of the accounts previously given regarding the wretched condition of the army, and the gross mismanagement as regards the supply and distribution of food, fuel, and winter clothing.

TAMWORTH ELECTION.—Sir Robert Peel having accepted the office of one of the Lords of the Admiralty, one of the seats for this borough became vacant. The hon. Baronet offered himself for re-election on Wednesday, and there was no opposition to his return. The election took place in the Townhall, but the proceedings appeared to excite very little interest, the attendance of burgesses being remarkably small. Sir Robert Peel, who was warmly received, in acknowledging the honour conferred upon him for the third time, remarked, that when the late Aberdeen Administration was crushed, a state of things without parallel was witnessed. No one of the old parties could take office; but a great party, having its influence on public opinion, and irrespective of Whig, Radical, or Conservative, determined to administer public affairs with vigour and proper talent, were placed in office, and, as representing that party of the people, Lord Palmerston found himself at the head of affairs. His position was the will of the country. The character of the Premier stamped the character of the Cabinet, and the country wanted a man of independent action, that would not only inspire vigour into the councils of the Sovereign, but would throw his spirit into every branch of the Administration, more especially into those branches which were connected with the present war. Lord Palmerston was the man to do it, and it became the duty of the country to stand by the man of their choice. It was with this feeling that he (Sir Robert Peel) accepted office. After some remarks on the gross mismanagement of affairs in the Crimea, he proceeded to speak of the war. We had gone out with chivalric feeling to help an oppressed power, and in the interest of justice and right, but let the people take care that we did not become the allies for forcing into a combination of despots against it. The Premiership of Lord Palmerston was a guarantee for that; but he (Sir R. Peel) said that the Austrian alliance had been the curse of the war, had paralysed our efforts, and that German interests had paralysed our action. Why, the whole course of proceedings, from the time when the troops left for the Crimea till now, had been left to lazzard or official mismanagement. We had fought these battles, but what had we gained? Slaughter and death. Why, he had a letter from the Crimea on the preceding day, in which he was told that the 11th Hussars mustered but four men. (Hear, hear.) Peace as soon as we could. Let the people of the country now thoroughly open their eyes to the campaign, and, if peace could be got on honourable terms, and for the interests of Europe, let us have it, and save the vestiges of our army. Let us have a lasting peace. He showed the costliness of war in life. In one year's war we spend, it was supposed, 30,000 British lives, and £35,000,000 sterling. From the returns of the Board of Trade he demonstrated its injurious effects on commerce. Duties had been put on spirits, the reduction of the Tea-duties was stopped, bread was dearer. He heard people bawl out for more blood, and more determination in prosecuting the war. He said "Yes; but let us have peace at the first moment we can have it with honour, and for the interests of the country." He agreed that we should be prepared for the future. In a few days a hundred pennies would float over the finest fleet ever assembled at Spithead; but although we might sweep the ocean of the ships of every enemy, we must do more. We must no longer be humbugged by Austria (Cheers). We must not permit Prussia, under the cloak of neutrality, to act as the ally of Russia (Renewed cheering). He would recommend further, that Moldavia and Wallachia should be erected into an independent state as a bulwark against Russia. He would go a little further. Why not raise Poland? If we want to stop the war, check Russia, save Russia—raise Poland. He had hopes of peace from the mission of Lord J. Russell to Vienna, and from the circumstance that the death of a Russian Emperor had invariably changed the policy of that state. But if peace was not to be obtained, then Government would carry on the war—not by halves as hitherto—but with energy and determination; having in view a double object—resistance to the aggression of Russia, and the promotion of the liberties of Europe. Sir Robert concluded amidst loud applause, by asking for Lord Palmerston's Government, which would correct abuses and originate reforms in our military system in this stage and no favour.

RUSSIAN DESERTERS.—The *Prussian Correspondence* states that the number of Russian deserters now in the Grand Duchy of Posen amounts to more than 15,000.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

So constantly varied is the nature of the reports respecting the proposed expedition of the Emperor, that it is impossible to form any definite conclusion on the subject, and we can but content ourselves with chronicling them. Some of these state that the end of the month is the time at which the departure is to take place; some fix an earlier, others a later date. It is certain that an order has been dispatched to Cherbourg, by telegraph, to send to Toulon all the objects prepared for the voyage by the *Reine Hortense*. The whole band of the Guides, including the various musicians allotted to the orchestras of the principal musical theatres, is to join the expedition. It appears quite certain that the Empress will remain behind. Various rumours, especially one that has often been brought forward, and as often refuted—the prospect of an heir to the Imperial dynasty—are afloat as to the cause of this change of plans; and no fewer absurd reports as to the manner in which her Majesty is to spend the period of the Emperor's absence: one of these asserts that she is to become the guest of Queen Victoria during the whole time that her Imperial Consort is away.

The Emperor and Empress have caused to be remitted to the Ministers of War and Marine the sum of 10,000 francs (£400) to be distributed among the mothers, sisters, widows, and orphans of the soldiers' and sailors' widows, who perished in the wreck of the *Sémillante*.

The question of Court mourning or no Court mourning for the Emperor Nicholas is one which has been so discussed, both as to fact and principle, that we hold it good to state the real cause of its not having been adopted. On an event of this kind occurring, foreign Governments are only supposed to become cognisant of the fact on its being notified by the Court of the deceased Sovereign. As, in consequence of the rupture with that of St. Petersburg, there is no Minister or Ambassador to announce the event here, it is not *officially* known, and therefore no mourning is adopted. Such is the point of etiquette that decides the question, and not the circumstance itself of the Emperor Nicholas having been the enemy of France.

Much censure has been expressed *officieusement* against certain provincial functionaries, who encouraged the most marked and indelicate demonstrations of rejoicing at the death of the late Emperor Nicholas. Such a course could not meet with the approbation of either the Government or public opinion; and both the dignity and good feeling of a great and liberal nation revolt at the idea of such a display.

This week commences the reception of the articles of foreign produce at the Great Industrial Exhibition. The complaints respecting the want of space in the Building are becoming daily louder. Independently of the petitions we spoke of last week, as about to be presented to the Emperor on the subject, a fresh one, to be signed by the cabinet-makers of the Faubourg St. Antoine—who, it appears, are peculiarly affected by the disadvantage—is prepared, and is receiving signatures. The class here comprised forms so large and important a branch of Parisian commerce, that no doubt due attention will be paid to its demands, and means taken to repair so great an evil as one so gravely affecting its interests.

It is said that among the papers of the Abbé Lamennais, has been discovered a translation of Dante, preceded by a preface in which the writer has expressed himself more strongly than in any of his published works against the orthodoxy of the Roman Catholic creed: it does not appear whether the translation will be published or not, but in any case the preface will doubtless be suppressed.

A most serious accident has occurred to M. Baucher, the celebrated *écuyer*, who for so many years has held the head of the *haute ecole d'équitation* in France. Mounting a horse he was breaking, in the manège at the Cirque Napoléon, a sudden crashing was heard; the horse, frightened, sprang away, and at the same moment the great lustre fell, striking down M. Baucher, wounding him in the back and crushing his leg and foot. Severe as the accident has been, it is hoped that the recovery will not be very protracted; though it appears more than probable that it will prevent him from following his profession.

The Mi-Carême is being, as usual, celebrated with various festivities, of which fancy balls are the favourite form. After this, the continuation of Lent will be preserved with increased strictness.

The principal theatrical event of the moment is the *reprise*, at the Grand Opera, of the "Juive," sung by Gueymard and Cruvelli. The house was crowded to excess by a most brilliant audience on the first night, and continues to fill. Decidedly the honours of the evening were for Gueymard. Mdlle. Cruvelli is universally found to be so defective in certain points, so wedded to her errors, so careless of improvement, and so much more occupied with her own personality than with that of the character she represents, that the public begin—somewhat late, it is true—to discover that they would like her to pay a little more respect to their criticisms, and that they have seen so much of Mdlle. Cruvelli, that, just for a change, they would like to see a little of the *Juive*, or whoever else's identity she is supposed, for the moment, to assume. Altogether, the Opera, at this moment, *laisse beaucoup à désirer*, in the way of female singers especially. One of the new acquisitions (?), Madame or Mdlle. Pouilly, of Strasbourg—engaged at an annual stipend of 40,000 francs, and playing first parts—would, in our opinion, and in that of many better judges, be barely capable of sustaining secondary *rôles* with credit. Decidedly the Italian Opera has the honours of the season. The Porte St. Martin has a new piece, entitled "Les Noces Vénitiennes," by M. Victor Séjour—a drama of the true mask and dagger order, which has considerable success, and is well acted; the Théâtre Lyrique, a pretty little *bluette*, called "Les Charmeurs," which is likely to have a good run.

Before closing our letter a report reaches us that the Emperor's expedition to the Crimea is finally abandoned. We tell the story as 'tis told to us.

THE four vacant Colonelcies have been filled up by the transfer of Sir George Brown from the 7th Fusiliers to his old corps the Rifle Brigade; of Lieutenant-General Auchmuty, from the 65th to the 7th Fusiliers, with which he served in the Peninsula; and of Lieutenant-General the Hon. H. E. Butler, from the 49th to the 55th—the regiment in which his gallant son, who was killed at Inkerman, commanded a company. The Batisilon of the 60th, vacant by the death of General W. Cornwallis Eustace, is given to Lieutenant-General Bunbury, formerly of the 97th Regiment, and, two or three years since, Commander of the troops in Jamaica, who had been for fifty-one years in the Army, and actively engaged in Holland and in the American war. The Colonelcy of the 44th, held by the late Sir Patrick Stuart, will be filled by the appointment of Sir Frederick Ashworth, an old Peninsula officer of fifty-six years' service. Lieutenant-General Henry Belneavis succeeds General Auchmuty as Colonel of the 65th: he has been in the service since 1797, and was throughout the war in Spain, from Corunna to Toulouse, for which he now holds the war medal with nine clasps. The new Colonel of the 94th, in succession to General Butler, Lieutenant-General George Powell Higginson, entered the Grenadier Guards in 1806, and was likewise a sharer in many of the Peninsular victories.

SERIES OF COLLIERS.—On Monday morning last about of 700 of Lord Vernon's colliers at Poulton struck work. A meeting of the turn-outs was held in the evening at the Crescent Inn, Poulton; and, according to the statements of the men, it appeared that a man from each pit had been sent for by Mr. Ashworth, the manager, who stated to them that in consequence of the present stagnation in the iron trade and cotton manufactures there was less demand for coals, and it would be therefore necessary to reduce the men's wages in some places 2d. in the shilling, in others 6d. for getting one 2 tons score, and in others again 6d. per yard. As soon, however, as times improved, he promised that the old prices would be given. When this announcement was made to the men, they replied, "Oh, put us on short time rather than that to us." Mr. Ashworth said, he could very well spare 100 or 200 of them, and that were at liberty to take what course they pleased. The men expressed a determination to stand out, and said that they must get 50 of their body to work still at work, to join them. Some of the speakers at the meeting called attention to the fact that in all their previous strikes they had been beat.

THE WAR IN THE CRIMEA.

The latest news from the Camp is contained in a telegraphic despatch from Admiral Bruat, dated Kamiesch, March 7. From it we learn a few important facts, but nothing decisive. The news of the Emperor's death had reached Sebastopol on the evening of the 5th three days after it was known in London. The siege operations were carried on with activity. For some days rockets had been thrown into Sebastopol, which had set fire to it in several places. When the despatch was sent off from Kamiesch a portion of the town was still on fire.

By the *Ganges*, which left Constantinople on the 5th of March, and arrived at Marseilles on Wednesday, telegraphic despatches have been received. The number of deaths at Scutari had diminished to 20 per diem. The news from Balaclava was to the 3rd of March, at which date the weather was fine, but frosty. The preparations for the bombardment were making rapid progress. The railway now conveys ammunition the distance of three miles. The Russians were approaching towards Inkerman from Malakhoff. A truce of one hour was agreed upon on the 27th of February to bury the dead.

Constantinople letters of the 1st March have been received, containing accounts of the attack made by the French, in the night of the 23rd and 24th February, upon the redoubts erected by the Russians in front of the left flank of the fortifications of Sebastopol, which in some measure explain the contradiction existing between the despatch of Prince Menschikoff relative to that affair and the despatches from French quarters. The latter represented the French as having stormed the redoubts, and completely defeated the Russians; Prince Menschikoff's despatch, on the other hand, stated that the French had been repulsed with a loss of 600 men.

It appears that the French did take the redoubts by storm, but then found themselves exposed to a murderous fire from the batteries, and even from the guns of some Russian vessels anchored in the port. The position was not tenable, and having destroyed the redoubts they had taken, they withdrew with about 400 men *hors de combat*, of which number 100 were killed.

Letters from the French head-quarters, dated 27th February, state that the Russians were throwing up formidable works of defence at various points, and that they had sunk two more ships at the entrance of the port of Sebastopol. They feared an assault, and were making every preparation to meet it. It was said that they were establishing a battery of heavy mortars at Kamara, from which they hoped to throw shells into Balaclava. The weather was fine, though frosty, but the severe winter had passed.

According to official reports, which may be relied on, the Russian forces in the Crimea, including those at Perekop, amount to nine divisions of infantry, which are equivalent to the strength of three corps. These consist of the 3rd corps, Read, 7th, 8th, and 9th divisions; 4th ditto, Osten-Sacken, 10th, 11th, and 12th ditto; 5th ditto, Liders, 1st brigade, 14th division; Reserve brigade, 13th division; 6th corps, Gortschakoff, 16th and 17th ditto. These divisions, being each composed of sixteen battalions, give a total of 144, each averaging 500 effectives present under arms; or a total of 72,000 bayonets. To these must be added the 3rd, 4th, and 5th Rifles, six battalions of Black Sea infantry, three battalions of Grenadier-Carbineers, and a battalion of Greek volunteer Rifles from Bessarabia; or a total of 126 battalions of infantry, giving about 78,000 bayonets. Then come eight battalions of Marines, four of Sappers, and 10,000 Artillerymen of different kinds, exclusive of two divisions of sailors, who man the batteries; so that the total foot force may be calculated at about 110,000 effective. If to this be added ten regiments of regulars, and about as many Cossack regiments, the whole effective force may be estimated at nearly 126,000 men. According to the same accounts, the loss of the Russians in the Crimea, from the 24th of September to the middle of last month, exclusive of Eupatoria, has been about 48,000 men completely *hors de combat*; so that the junction of the 3rd corps and other detachments have not sufficed to replace the army on the strength at which it was prior to the 5th of November.

A letter from Berlin, in the *Post Amt Gazette*, says:—

According to the last accounts from the Crimea, the Russians are using every effort to repair the injury inflicted on them by the occupation of Eupatoria by the Turks, and it is expected that a fresh attack on that place will be made. A Russian camp has been established at Orto-Oblam, to contain 40,000 men, to watch Eupatoria, and to be charged with the operations to be undertaken against that place. The Turks are also fortifying every point, even on the side of the lake Sasyk, from whence any attack would be most difficult, particularly as any enemy advancing on that side would be exposed to the fire of the fleet. The most considerable fortifications are, however, being made on the north and north-west of the town. In order to prevent the Turks from interfering with the reinforcements coming from Perekop, the Russians have established movable columns near Eupatoria who immediately make known any movement that may take place in the camp. Some time a part of the Russian army were sheltered in the villages in the interior of the Crimea. With respect to the troops in the neighbourhood of Sebastopol, the Russian advanced posts in the valley of Baidar have retired on Karlowa, and are in communication with the main body at Tchorgoun. General Liprandi is on the Inkerman road, with his centre at Tchorgoun, and his left wing in the valley of Baidar. His right wing is in communication with the corps of General Osten-Sacken, which extends along the line of the northern port of Sebastopol, and from the ruins of Inkerman to the river Tchernaya. The garrison of Sebastopol is at least 40,000 strong, and Prince Menschikoff has, moreover, concentrated 20,000 men in the neighbourhood of Bagtcheserai, to cover the road from Perekop, or to relieve any point that may be threatened. Between Eupatoria and Sebastopol are three Cossacks, in order to paralyse any operations which might be attempted by the troops from the former place against Sebastopol.

THE YOUNG EMPEROR'S MANIFESTO.

The German and French papers are almost unanimous in the opinion that the manifesto issued by Alexander II. is more warlike than any of the proclamations which emanated from his father. The determination he expresses to accomplish the long-cherished schemes of Catherine and the rest of his ancestors, which include Russian supremacy in the Black Sea, does not appear to consist very well with the notion that he will be more favourable to peace than his father was.

In last week's publication we gave the telegraphic summary of the Russian manifesto. The following is the entire document, as it appears in the *Journal de St. Petersburg* of the 3rd inst.:—

ST. PETERSBURG, Feb. 18 (March 2).

By the grace of God, We, Alexander II., Emperor and Autocrat of All the Russias, King of Poland, &c., &c.

To all our faithful subjects make known,

In His impenetrable ways it has pleased God to strike us all with a blow as terrible as it was unexpected. Following a brief and serious illness, which at its close was developed with an unheard-of rapidity, our much-loved father, the Emperor Nicholas Pavlovitch, has departed life this day, the 18th February (March 2). No language can express our grief—which will also be the grief of our faithful subjects. Submitting with resignation to the impenetrable designs of Divine Providence, we seek consolation but in Him, and wait from Him alone the necessary aid to enable us to sustain the burden which it has pleased him to impose upon us. Even as the much-loved father whom we mourn consecrated all his efforts, every moment of his life, to the labours and to the cares called for by the well-being of his subjects—we, at this hour so painful, but also so grave and so solemn, in ascending our hereditary throne of the Empire of Russia, as well as that of the Kingdom of Poland, and of the Grand Duchy of Finland, which are inseparable from it, take, in the face of the invisible and ever present God, the sacred pledge, never to have any other end but the prosperity of our country. May Providence who has called us to this high mission, so aid us that, guided and protected by Him, we may be able to strengthen Russia in the highest degree of power and glory; that by us may be accomplished the views and the desires of our illustrious predecessors, Peter, Catherine, Alexander the much-loved, and our august father of immortable memory.

By their well proved zeal, by their prayers ardently united with ours before the altars of the Most High, our dear subjects will come to our aid. We invite them to do so, commanding them to take at the same time, the oath of fidelity both to us and to our son, his Imperial Highness the Cesarewitch Grand Duke Nicolas Alexandrovitch

Given at St. Petersburg the 19th day of the month of February (March 2), of the year of grace 1855, and the first year of our reign.

(Signed) ALEXANDER

The St. Petersburg papers publish also the two following Imperial orders of the day addressed to the Russian army, dated March 3:—

I. Valiant warriors, faithful defenders of the Church, the Throne, and the country! It has pleased Almighty God to visit us with the most painful and grievous loss. We have all lost our common father and benefactor.

In the midst of his memorable cares for Russia's prosperity and the glory of the Russian arms, the Emperor Nicholas Pavlovitch, my most beloved father, has departed to eternal life.

His last words were:—

"I thank the glorious loyal Guards, who in 1825 saved Russia; and I also thank the brave army and fleet; I pray God to maintain, however, the courage and spirit by which they have distinguished themselves under me. So long as this spirit remains upheld, Russia's tranquillity is secured both within and

without. Then, woe to her enemies! I loved them as my own children, and love as much as I could to improve their condition. If I was not entirely successful in that respect, it was from no want of will, but because I was unable to devise anything better or to do more."

May these ever-memorable words remain preserved in your hearts as a proof of his sincere love for you, which I share to the largest extent, and let them be a pledge of your devotion and fidelity to

St. Petersburg, March 4th, 1855. ALEXANDER

My brave warriors, courageous participators in the deeds of your supreme military chief, now sleeping in the Lord!

You have sealed in your hearts the last words of his tender and paternal letter of the Emperor Nicholas I. so long as one of those, registered own to March 2, 1855, shall continue in the said companies and squadrons.

2. Those also who were attached to his Majesty's person as Generals or Aides-de-Camp General, or as Aides-de-Camp Adlacs, will retain the same title.

May the sacred memory of Nicholas I. survive among our ranks, as a terror to the foe and for the glory of Russia

St. Petersburg, March 3, 1855. ALEXANDER.

The Emperor Alexander has assumed the name of *Chef* of all those regiments of the Guard whose *Chef* the deceased Emperor had been; and, in addition, he remains *Chef* of the battalion of the Sappers of the Guard, of the 1st Brigade of the Artillery of the Guard, of the 1st Corps of Cadets, and of all the troops and forces that the command of which he had had as crown Prince. The Cuirassier Regiment of the Body Guard, however, takes for its *Chef* the Empress Marie Alexandrowna; while the regiment of Lancers, which the Empress formerly had, is made over to the Crown Prince, Nicholas Alexandrowitch. The Crown Prince is also nominated Colonel-in-Chief of the Cossack armies; and General Rüdiger to be commander-in-Chief of the Guard and Grenadiers—equivalent in rank to the post of Commander-in-Chief of an army, inasmuch as the Corps of the Guards and Grenadiers forms a special and separate *corps d'armée*.

THE LATE EMPEROR OF RUSSIA.

Letters from St. Petersburg state that the funeral of the Emperor Nicholas will take place on the 20th inst. An order of the Police of St. Petersburg, in the official journal, announces to the inhabitants of the capital that, dating from Monday (5th March), all persons, without distinction of rank or condition, are admitted to the Winter Palace "to pay a last homage to the late Emperor, from 9 to 11 a.m., and from 2 to 6 in the afternoon." The same paper publishes the order for wearing six months' mourning for the late Czar.

The Emperor Nicholas had made the most detailed arrangements in the event of his death. He has even left a legacy to the 6th regiment of Russian Cuirassiers, of which he had been nominated the proprietor. A report is current that M. de Langenbruck, the celebrated operator of

THE ENGLISH HOSPITAL AT ABYDOS.

be procured at the cost of from 25s to 30s. This machine, as will be seen by referring to the Engraving, consists of a wooden frame, in the front of which is a small platform, or cushion, on which the linen rests; one end of the linen is kept slightly stretched by a simple contrivance, and the other is gradually turned on a roller which the worker holds in her hands. One foot moves a treadle, which lifts up and down a sharp metal blade; this falls with sufficient force to cut one course of the threads without going quite through the material, this requires considerable care and practice. In an able article on this subject in *Chambers' Edinburgh Journal* the writer says:—

The force of the descent, however, is regulated by the dexterity of the worker, so that it shall only partly cover the cross-threads; and at every fall, while the knife is down, and its edge imbedded in the partly-severed threads, the blade is forcibly shifted in the direction of those threads for a certain small space. It is this horizontal shifting of the sharp and heavy blade of the knife upon the strained rag while it is half cut through, which, by disintegrating those threads that cross the blade at a right angle, and raising nine-tenths or more of their entire substance into a soft woolly pile, produces the lint. It is worthy of remark, that the threads which, lying horizontally with the knife, escape serious injury by the process, render an important service, by preventing the disintegrated pile from being detached from the surface of the rag by the violent passage of the blade.

Fine linen rags, being the first item in the manufacture of lint, have, in consequence of the increased demand, largely advanced in value (upwards of 6d. per lb.). These rags, when procured, require to be well washed, cleansed, and cut into suitable shapes. The procuring of this supply has become a sort of business of itself, and affords a good profit to those who travel amongst the different rag-merchants to collect the proper material.

The manufactory shown in the Engraving, is situated at Islington. The proprietor at the present time employs upwards of thirty hands, chiefly young girls from sixteen to twenty years of age: few of them, however, are at present engaged on the premises. The others, like the manufacturers to whom we have above alluded, may be found scattered amongst the dingy courts and alleys of London.

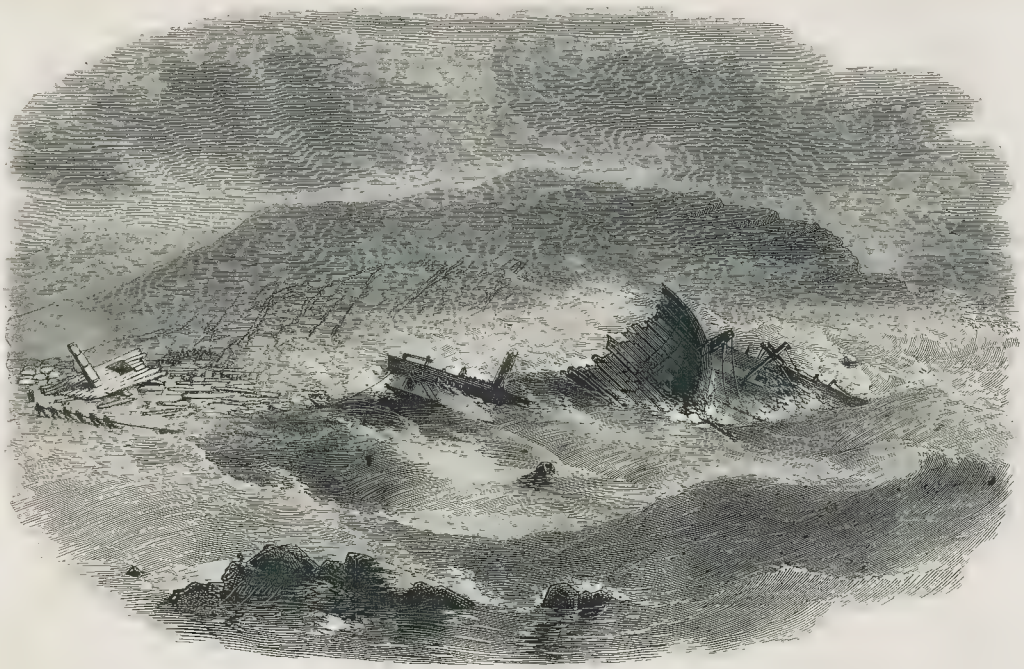
In some of these places may be found a woman, and perhaps two daughters, or apprentices, who manufacture the article, and hand it over to the larger dealers. A woman by her own hands can in a long day's work gain about 2s 6d., too small a sum for the patience, cleanliness, and confinement, required. During the increased demand for Lint these poor women should be thought of.

THE ENGLISH HOSPITAL AT ABYDOS.

ABYDOS is situated on the Asiatic shore of the Dardanelles, about twenty miles from the Sea of Marmora. The accompanying Sketch was taken from the steam transport *Robert Lowe*, on the 19th ult., she having brought down 106 sick to be landed at the station. The English Hospital contains about 400 patients. It is situated on the site of the ancient Abydos, and under a hill called after the Persian Monarch Xerxes, who is said to have watched from its summit the passage of his army across the Dardanelles. The Turks have thrown up a square redoubt on the crest of this hill, armed with four field-pieces. The occupation of this hill by an enemy would render the masonry battery on Nagara Point untenable, as it is completely looked into from it. Between the English Hospital and the Point is the French Hospital. Nearly opposite, on the European shore, is the site of the ancient Sestos. It was at this point Lord Byron swam across the Strait, a distance estimated at four miles allowing for the current, though only one straight across.

Our Hospital at Abydos is remarkable as the only place where, hitherto the English establishment has contrasted favourably with the French hospital.

MANUFACTURE OF LINT FOR THE ARMY IN THE CRIMEA.



WRECK OF "THE JOHN BANNERMAN," OFF HOLYHEAD.

WRECK OF THE "JOHN BANNERMAN."

On Saturday week the *John Bannerman*, 1700 tons, built of deal, with a cargo of raw cotton, was wrecked at Holyhead, on her voyage to Liverpool. The mate and six men, who left the wreck in a boat, have not since been heard of.

The accompanying Sketch represents the wrecked vessel as she appeared on Sunday morning, the 4th inst., with bales of cotton and a portion of the deck of the vessel being pulled up by men from the sea; the beach was also strewed with loose cotton two and three feet deep, which had the appearance of snow.

CONSECRATION OF ST. MARYLEBONE NEW CEMETERY.

It will be remembered that the Legislature, in the year 1850, passed an Act placing all interments in the metropolis under the Board of Health, and taking away the control of burial-grounds from parochial authorities. The Board of Health, after devising several gigantic schemes for providing cemeteries at remote distances from London, and by which it was intended to convey the bodies and mourners either by water or railway, found the difficulties they had to contend with insurmountable; and in 1852 the Government of Lord Derby introduced the present Burials Act (15 and 16 Vic., c. 85) restoring burial-grounds to local management, but enabling the Secretary of State to close the present grounds in the metropolis, and

CONSECRATION OF MARYLEBONE NEW BURIAL-GROUND, AT EAST END FINCHLEY.

giving power to parishes to provide others removed at a distance of two miles therefrom. The metropolis includes the several suburban parishes, such as Hampstead, Fulham, Hammersmith, Greenwich, round which a cordon is drawn, within which burials are prohibited. Under this Act the metropolitan burial-grounds either have been already closed, or will be so in a very short time.

The parish of Marylebone, to provide for the closing of their present burial grounds, have appointed a burial board, as directed by the Act, who have formed the new Cemetery, which was consecrated on Tuesday last, March 13th, by the Bishop of London. The ground is situate at East End, Finchley, fronting upon the road which lies between the Marylebone and Finchley turnpike road, and the high road to Barnet, turning to the left from that road at the Green Man Tavern. It is in a retired and rural spot, the ground lying high, sloping from the road to the valley between Highgate and Finchley, commanding extensive and picturesque scenery. Previous to the purchase of the ground for the present purpose, it was pasture land, known as Newmarket Farm, in the occupation of Mr. Cullum, of Finchley. The Board succeeded in obtaining the ground consisting of twenty-six acres—at a sum of less than £200 per acre; and they have since erected the present buildings at a cost of about £15,000.

Passing the superintendent's lodge, the Cemetery is entered beneath an arched gateway; and a circular carriage-drive leads at once to the Episcopal Chapel, which is of cruciform character, with an open bell turret and crocketed spire on the nave or western gable, 70 feet in height. The Chapel contains 1400 superficial feet, and is at present pewed to accommodate 120 persons. An exit has been provided at the chancel end for transporting the coffins directly through into the upper part of the ground for interment. Passing onwards, we reach the portion of the Cemetery allotted to the Noncomformist population, who are likewise provided with a chapel and waiting-rooms, though on a smaller scale than the Church. The division adopted from the consecrated ground consists of an ornamental post and chain fencing. A commanding position has been preserved in the main carriage drive for catacombs. The general arrangement reflects much credit upon the members of the burial-board. The architects are Messrs. Barnett and Birch, who also carried out the adjacent works for St. Pancras and St. Mary, Islington, cemeteries. At the consecration on Tuesday, the service was read by the Hon. and Rev. J. T. Pelham, Rector of St. Marylebone. There were also present the Rev. T. R. Gurney, Rector of St. Mary's; Rev. C. Baring, Rector of All Souls; and the Rev. F. Braithwaite. The Rev. T. White and the Rev. F. Green, Rectors of Finchley, also attended; the members of the Burial-board, the deputations from the Vestry, the Board of Guardians, &c.

CALENDAR FOR THE WEEK.

SUNDAY, March 18.—4th Sunday in Lent. Horne Tooke died, 1812.
MONDAY, 19.—Louis XVIII. fled from Paris, 1815.
TUESDAY, 20.—King of Rome born, 1811.
WEDNESDAY, 21.—St. Benedict. Duc d'Enghien shot, 1804.
THURSDAY, 22.—Goethe died, 1832.
FRIDAY, 23.—Southwark-bridge opened, 1819
SATURDAY, 24.—Earl of Chesterfield died, 1773.

HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING MARCH 24.

Sunday.	Monday.	Tuesday.	Wednesday.	Thursday.	Friday.	Saturday.
M. h. m. 2 6	A. h. m. 2 31	M. h. m. 3 1	A. h. m. 3 32	M. h. m. 3 49	A. h. m. 4 7	M. h. m. 4 27	A. h. m. 4 45	M. h. m. 5 3	A. h. m. 5 20	M. h. m. 5 38	A. h. m. 5 57	M. h. m. 6 18

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, MARCH 17, 1855.

THE Sebastopol Inquisition continues its researches, and some distinguished witnesses have been heard this week among them H.R.H. the Duke of Cambridge and Lord Cardigan. Two representatives of the press have also been called upon to testify, orally, to the accuracy of the accounts they transmitted from the East—Mr. Crowe (the Correspondent of this Journal) and Mr. John Macdonald (the manager of the *Times*' fund for the civilisation of our Hospital).

The Duke of Cambridge's evidence was given, not only in a frank and straightforward manner—who expects anything else from a member of our Royal family?—but with a tact and discretion not always evinced by exalted personages when subjected to the ordinary forms by which facts are elicited from the common world. He evidently felt strongly upon the subject of the losses sustained by his noble Division, but had resolved that none of that indiscriminating indignation which too many persons have launched upon every head whose owner has been connected with our war system should manifest itself either in the matter or manner of his evidence. But he had a sad story to tell. It began at Scutari: not the present Scutari—a crowded, pestilential lazar-house, where it is now matter of congratulation that there were but twenty deaths each day; but the Scutari of last summer, the grand Asian barrack, full of high-hearted, high-spirited soldiers, eager to be led to the battle. Even there, in the face of the capital of our exulting ally—the great mart of Eastern Europe, where every necessary and most luxuries are to be had at will—the Commissariat began its blunders, delays, and impertinences:—"There was a great deficiency of forage, there was only one place of issue for all the troops, and a man would have to wait all day before he could obtain the supplies he wanted." Those who are acquainted practically with the horse will instantly see that the bad work was begun at once. Regularity of diet is as necessary to him as to his master, and the seeds of ill-health were plentifully sown in our cavalry chargers by this system of demi-starvation. Later, we find, that in the Crimea the same thing was going on:—"The horses before Sebastopol were very irregularly fed, which I attribute to the head-quarter Commissariat." But, insolent as well as inefficient, the Commissariat officers, while themselves blundering in all directions, insisted, upon a pedantic adherence to forms, on the part of others, and refused rations in one case on a false pretence that a printed paper had been wrongly filled up; in another, because a commanding officer had signed his name "half an inch too low." They wanted one half-hour of old Picton.

The Duke's testimony goes on to show that his Division was short of medical men—a privation of which the cruelty to the soldier is unspeakable. His Royal Highness also exposes a signal case of mismanagement at home. We all remember with what pleasure we learned that our gallant fellows were to be amply supplied with what the Duke justly considers almost a necessity of life—to the Guards at least—namely, porter. We heard of enormous quantities of this liquor being furnished, and some among us, who have enjoyed the nearly unspeakable pleasure of a draught of English beer in countries where it is a luxury for the few, were especially laudatory of a provision of the wisdom of which we were able to judge by experience. But it seems that we were all rejoicing without a cause:—"We got porter at Scutari and at Varna, but not afterwards," says the Duke. That is to say, the soldiers had it where it was not absolutely necessary, but the supply was cut off the moment the article became essential. Hear the Duke on this:—"I attribute the sickness to the climate, but I think the great mortality in the Guards arose from the men not being able to get porter." And why was this? The Liquor, in large quantities, was dispatched from England, and is charged for, in very large figures in the accounts. But the routine—the great Anarch interposed, and the porter was sent blundering about the Black Sea; calling, apparently, wherever it was certain that the army could not get it, and never going where it was wanted. And so the soldiers thirsted in vain, and died; and Sir James Graham, Mr. Gladstone, and Mr. Herbert, thought it so unconstitutional that questions should be asked on such a subject, that they yielded up office rather than permit such impertinence.

At Varna the forage was irregularly supplied, as elsewhere, and the Duke's observation is worthy of remark. He saw all the country within fourteen miles of Varna, and noticed its fertility, and considered that ample supplies might have been obtained from it. Of course. A sensible English gentleman, accustomed to use his eyes as he rides, discovers, almost by instinct, the resources of a rural district. It is only Commissariat officials, who are paid to look about them, that cannot see what is around them. Benevolent ladies are sending out tracts to the troops; and a cheap reprint of Miss Martineau's "How to Observe," might work wonders upon the officers of the Commissariat.

A variety of other testimony in support of what the correspondents of Lord John Russell's "rabid press" reported upon the spot, and have been abused by noble Lords for reporting, has been put upon record by the Duke, by Lord Cardigan, and other distinguished personages; and as such truths have now been certified by a Duke and a Lord, and divers titled officers, the facts may be accepted in good society. Let us, therefore, turn to another part of the Duke's evidence, which deserves special note. His Royal Highness, in speaking of the landing at Kalamita on the 14th September, says:—"It rained all that night. The men had no covering, nor had the horses. I had what may be called a dog-kennel tent, which my servant carried on his back. Virtually we had no tents from the 14th September to the 4th of October." We knew this before, and the fatal results of this prolonged exposure—rain above, mud below. But the Duke states, in a few simple words, that the soldiers did not approach the shore with thoughts of encampment, but, as they supposed, to encounter an enraged foe:—"When we first landed, we expected to be attacked immediately by the enemy." This involves, of course, Lord Raglan's complete vindication from all charges made against him and they have been made pretty freely, in reference to this passage of the war. But it is no exculpation of others whose business it was to see that the army, whether it engaged or not, was supplied with shelter. Lord Raglan "had no means of transport for tents," nor—about to throw himself, as he supposed, upon the legions of the Emperor, whose soil he was invading—would he have thought of attacking, except *impedimentis relictis*. But where was the little fleet of transports which ought to have been hovering near, prepared to act as he should direct, in the event of victory or repulse? Those days of exposure ultimately destroyed more men than the fire from the south bank of the Alma, and those deaths are due to the "mismanagement" into which it was so unconstitutional to inquire. In the Duke of Cambridge's simple statement is summed up the history of misfortunes which have been eclipsed by greater subsequent horrors, but which must not be omitted when the account is made up.

The evidence of the gentleman to whom we are indebted for correspondence and other illustration of the history of war—contributions whose value has been far too largely recognised by the judgment of the public to make it necessary, even were it entirely fitting, for us to eulogise them—was chiefly directed to the hideous condition of Balaclava. The contrast which he drew between the state of the French Camp and dépôt and that of our own, will be a feature in the general case when this is made up; and perhaps the "three officers" who were stated to have been sent to Paris to examine the French system will be able to apprise the Government *why* the difference described by Mr. Crowe came to exist. Hitherto, everything that has come out before the Committee tells most favourably for the organisation of the army of our allies. Mr. Macdonald, the able, earnest, and energetic almoner of the *Times*, gave his verbal picture of the horrors of Scutari—a tale which he has told, only too well, in his masterly letters from Constantinople.

Such are the principal characteristics of the Sebastopol Inquiry so far as it has gone. We select and condense these details because—except when attracted by some lofty name or startling piece of evidence—the examinations may not be generally read as carefully as they should be. The Committee would have buried them in a colossal Blue Book, but Parliament over-ruled this device; and it is for the Press to see that the bearings of an investigation, which but for the Press would never have taken place, are understood by a nat on mourning its ruined army, and asking who are the authors of the ruin.

THE complicated measure which the Ministers introduced to relieve the newspapers from stamps and regulate the sending of them by the post, seems not to have given satisfaction. We believe, in consequence—and we think that this will now be the wisest course—that the bill will be withdrawn, and a more simple measure substituted—the same as we formerly proposed, 'abolishing the stamp as a fiscal measure, but leaving it as a means of ensuring postage conveyance, permitting newspapers to be issued without a stamp, but requiring all those sent by the Post to be stamped. Such a measure would, probably, give more satisfaction to all parties. The bill stands for discussion on Monday evening, and will then, no doubt, be brought on.

WHILE the political world is waiting with intense anxiety for the latest authentic intelligence regarding the Vienna negotiations, few persons seem to be aware that the question of peace was almost as good as settled at Newall's-buildings, Manchester, last week, by Mr. Bright. The common impression everywhere is that Russia will never consent to raze Sebastopol; and that, unless the Allies destroy that fortress, we should be in a worse position, were peace concluded now, than we were when the war began. But Mr. Bright does not agree with the public on that point. He would rather not have Sebastopol destroyed, because he sees no danger to liberty or to commerce from Russian encroachment. Even if the Emperor Alexander should attempt to carry out the intentions of his ancestors by taking possession of Constantinople—which he can do at any moment, so long as he remains master of the Black Sea—the honourable member for Manchester would not say a word against it. His doctrine is that we ought not to interfere in the affairs of any foreign country under any circumstances whatever. People of tender feelings may think it their duty to assist a weak nation when attacked by a strong one, but all such sympathy is dangerous, according to Mr. Bright, if it lead us to take a part in the quarrel.

With so very simple a theory regarding foreign politics, the leader of the Peace party can see no difficulty in bringing the war to a speedy conclusion. As for asking any material guarantees from a Power which stands so high in the estimation of Mr. Bright, such a notion would not be entertained for a moment. Of course Lord Palmerston might have some difficulty in meeting the House of Commons, in the event of his concluding what "the populace" would call a dishonourable peace, but in that case he will have the enthusiastic support of Mr. Bright. "Nothing should induce me to interfere the slightest obstacle to the smooth progress of a Government, so long as I thought it was honestly endeavouring to make peace." That is, peace at any price, for he would make no disagreeable stipulations in treating with so formidable a Power as Russia. On the other hand, he warns Lord Palmerston that he must prepare to encounter the most deadly opposition should the negotiations fail:—

> If I were to discover that Lord Palmerston's Government and its Envoy at Vienna (Lord John Russell) were drawing back from their terms, were causing unnecessary delays, were wishful, in conjunction with the Emperor of the French, to get out of their own propositions, what I might say to the Ministry might be of no avail, but there is no opposition that can be conceived that I would not offer to such a Government, as discreditable to the country, most unpatriotic, and most wicked

But how does Mr. Bright expect to find out what goes on at Vienna? He knows very well that all the diplomatic business of the country is carried on in secret. How, then, can he talk of discovering what Lord John Russell has done, unless the Russian Ambassador should furnish him with intelligence?

Apropos of secret diplomacy, we see that Mr. Bright now charges Ministers with having kept the House of Commons in the dark, during the Session of 1853, while the country was "drifting into war." This is rather too bad, considering the active part which Mr. Bright himself played on that occasion. He relies, no doubt, on the forgetfulness of the public; but it was hardly prudent in him to provoke inquiry into the matter. Those who remember the Session of 1853 cannot have forgotten that when Mr. Layard was about to bring forward his motion, in July, regarding our relations with Russia and the Porte, Mr. Bright made a strong appeal to him on the importance of leaving the matter entirely in the hands of Ministers. He made no attempt, on that occasion, to defend the aggression of Nicholas, who had then taken possession of the Danubian Principalities.

> In this country (said Mr. Bright) there is probably no difference of opinion with regard to certain circumstances which are occurring abroad. We all know it is very easy to get up in the House, or in the country, where people are of rather a pugnacious disposition, a feeling, which may seem justified, of a wish to protect the weak against the strong, and that feeling may be so pushed to that extent, that all efforts by the Government, however praiseworthy and patriotic, to preserve peace, may possibly be frustrated. Now, if I thought the Government at this time were pushing the country to war—a war which would be unpopular in this House, and hateful to the people—then I think any one would be justified in insisting upon discussion, that the House might bring its power to bear upon the Government. But that was not so on the present occasion. I speak particularly of the Prime Minister. I have the utmost confidence in the course he is disposed to take. I take it for granted that the noble Earl will maintain peace, if it be possible to maintain peace consistently with the character and position of this country. Well, having that confidence, I think it highly probable the discussion of a question like this in a popular assembly may have the effect of damaging the object I have so much at heart: and it is because I am of that opinion—I think I shrink from the discussion of any question before this House, if opportunity rendered it desirable—yes it is because I am of that opinion that I say (though Ministers, of course, use the phrase when things are to be concealed) that the public service will be injured by discussion.

And so, for these reasons, Mr. Bright begged Mr. Layard not to bring forward his motion. He had "the utmost confidence" in Lord Aberdeen; and as he knew very well that any attempt at explanation by Ministers would call forth a strong anti-Russian demonstration, not only in the House, but throughout the country, he deemed it prudent, for the nonce, to give up his principles in favour of open discussion, and let the most important business of the nation be managed by secret diplomacy. The result of that policy of concealment, which he so strongly recommended for his own purpose, was that the nation drifted into war, and now Mr. Bright turns round upon Ministers and accuses them of having kept Parliament in the dark till it was too late to prevent our being involved in a contest with Russia. Seldom have we witnessed a more unscrupulous exhibition of political dishonesty than this of the honourable member for Manchester. He ought to institute a new system of morality for himself and his friends, as well as a new code of international law.

HUMAN Physiology, or the laws of health—a subject which interests the poor as well as the rich has hitherto been considered a matter on which it did not behove the mass of mankind to be instructed. If it were allowed by some to be a fit subject for the study of the wealthy and the "well to do," it was strictly forbidden to the poor. Why, it was urged, should the poor look to the "flesh" and the things of this world? Of what avail would a knowledge of the wonderful structure of the human body, and of the laws that regulate health and physical happiness be to them? Besides, would not irreligion and infidelity be encouraged among the poor, if anything was taught in common schools but the Catechism and the Bible the Alphabet, and the Rule of Three? Was not every other teaching revolutionary? and certain to lead to the subversion of all law, both Divine and human? Such were the fears expressed by many estimable but very short-sighted and narrow-minded men, whenever a philanthropist or a philosopher attempted to enlarge the circle of elementary instruction, and include within it, the teaching of "Common things;" and of the physical laws of the universe—affecting all material beings. In England, the opposition to the dictates of common sense in this matter—though strenuous and protracted long ago began to yield; and the days have happily passed when the cry of infidelity could be successfully raised against any man for teaching that the laws of health were as much the laws of God as any portion of the Decalogue. In Scotland the ultra-theological bias of the public mind has rendered the resistance still more obstinate than in

England; but even in Scotland we are glad to see that a beginning has been made which promises to reserve that country from the reproach of indifference or hostility to a subject of such high importance.

We refer our readers to a report in another portion of our paper of a speech made by Professor Lee, of the University of Edinburgh (a distinguished divine of the Church of Scotland) to the governors of Heriot's Hospital in that city. From that report it will be seen that the governors have unanimously agreed, on the motion of Dr. Lee, that Human Physiology—or the fundamental principles of the laws of health—shall, for the future, be systematically taught to the elder scholars of both sexes in that institution. This resolution was adopted—partly, no doubt, in consequence of the eloquence and the exertions of the Rev. Dr. Lee—but partly, we have reason to believe, from the impression produced by a "medical opinion," signed by sixty-five eminent physicians and surgeons, which was printed in the year 1853, and extensively circulated in every part of the country. The document states:—

> Our opinion having been requested as to the advantage of making the Elements of Human Physiology, or a general knowledge of the laws of health, a part of the education of youth, we the undersigned have no hesitation in giving it strongly in the affirmative. We are satisfied that much of the sickness from which the working classes at present suffer, might be avoided, and we know that the best-directed efforts to benefit them by medical treatment are often greatly impeded, and sometimes entirely frustrated by their ignorance and their neglect of the conditions upon which health necessarily depends. We are therefore of opinion, that it would greatly tend to prevent sickness and to promote soundness of body and mind were the Elements of Physiology, in its application to the preservation of health, made a part of general education: and we are convinced that such instruction may be rendered most interesting to the young, and may be communicated to them with the utmost facility and propriety in the ordinary schools, by properly instructed schoolmasters.

This opinion is signed by Sir James Clark, Bart., Dr. Arnott, Sir Benjamin Brodie, Sir William Burnett, Dr. Robert Ferguson, Mr. Cæsar Hawkins, Dr. Locock, Dr. Hodgkin, Dr. Southwood Smith, and, we may add, by almost every eminent member of the medical profession in the metropolis. We trust that other institutions for the education of youth will imitate the good example of the Directors of Heriot's Hospital;—and that the day will come when the poor, properly instructed in this branch of knowledge, will learn sufficient of it to make them happier men and better citizens.

THE COURT.

The Court left town on Thursday for Osborne, the marine residence of the Royal family in the Isle of Wight, where her Majesty will probably sojourn until the latter end of next week. During the week just closed, the Queen has held a Privy Council, and a second Levee. A third Levee is announced for Monday the 26th instant; and on the succeeding Tuesday her Majesty will hold her first Drawing-room.

The leading incidents of Court life are thus chronicled by the usual official authority:—

On Friday the 9th instant the Queen and Prince Albert went to Woolwich to inspect the troops quartered there, and also to see the artillery-men wounded and disabled in the Crimea. Her Majesty also visited the Arsenal and Laboratory, through which she was conducted by the heads of the different departments. The Queen and Prince made a minute inspection of the ambulance waggons, the new means of transporting wounded men, and the various works of the Arsenal, and then returned to Buckingham Palace, where they arrived at a quarter after two o'clock in the evening her Majesty and the Prince Consort honoured the Lyceum Theatre with their presence.

On Saturday the Queen held a Privy Council, at which Mr. Edward Horsman, Chief Secretary for Ireland, was, by command of the Queen, sworn of her Majesty's Most Honourable Privy Council, and took his seat at the Board. His Earl of Carlisle had an audience of the Queen previous to the Council, and took leave of her Majesty on proceeding to Ireland. In the evening her Majesty and the Prince Consort, the company at which included the Duchess of Kent, the Prince of Leiningen, the Duchess of Inverness, and a distinguished party of the aristocracy.

On Sunday the Queen and Prince Albert, the Prince of Wales, the Princess Royal, Prince Alfred, and the Princess Alice, the Ladies and Gentlemen of the Court, and the Domestic Household, attended Divine Service, in the private chapel of Buckingham Palace. In the evening Viscount Palmerston and Lord Panmure had the honour of dining with her Majesty.

On Monday the Queen and Prince Albert visited the Exhibition of the Photographic Society, in Pall-mall East. In the evening the Queen had a dinner party, at which the Maharajah Duleep Singh was among the guests.

On Tuesday the Queen—attended by Lady Churchill, Major-General Bouverie, and Captain Du Plat—visited her Royal Highness the Duchess of Gloucester, at Gloucester House; and her Royal Highness the Duchess of Cambridge, at her residence in St. James's Palace. In the evening her Majesty and the Prince Consort, with the Prince of Leiningen, honoured the Olympic Theatre with their presence.

On Wednesday the Queen held a Levee. In the evening her Majesty had a dinner-party, the company at which included, among others, the Duchess of Kent, the Duke of Cambridge, the Prince of Leiningen, the Swedish Minister and Baroness de Hochschild, Viscount and Viscountess Falkland, Lord Adolphus Fitzclarence, Lady Blantyre, Sir James and Lady Graham, Sir George and Lady Theresa Lewis, Major General Freeth, Major-General Forrest, Colonel J. A. Wilson, and Lieut.-Colonel the Hon. James Macdonald.

On Thursday the Queen and the Prince Consort, with the Royal children, left Buckingham Palace for Osborne.

Lady Churchill has succeeded the Viscountess Canning as the Lady in Waiting to her Majesty. The Earl of Listowel and General Sir Frederic Stovin have relieved Earl Somers and Colonel the Hon. A. N. Hood in their duties as the Lord and Groom in Waiting to the Queen.

THE LEVEE.

The Queen held a Levee on Wednesday afternoon, in St. James's Palace. It was the second this season, and was numerously attended, the presentations to her Majesty exceeding two hundred.

His Royal Highness the Duke of Cambridge and Prince Nicholas of Nassau, attended the Levee; were received by the Vice-Chamberlain, and were conducted by his Lordship to the Royal closet.

Ver Meulander Wirdair, Rajah of Coorg, attended the Levee, and wore a magnificent Eastern costume.

Lieutenant-General Vivian also attended, and a number of officers appointed to the Turkish contingent were presented to the Queen.

The Queen wore a train of white silk, embroidered in gold and cerise, and trimmed with gold blonde. The petticoat was white satin, trimmed with gold blonde and cerise ribbons. Her Majesty wore a diamond and opal diadem.

The following are among the more noticeable presentations:—

The Earl of Malmesbury, on his appointment to the Colonelcy of the Hants Artillery, by the Marquis of Winchester.

Captain Lord Bingham, on promotion and return from the Crimea, by General Lord Strafford.

Commodore the Hon. Frederick Pelham, on appointment as Captain of the Fleet, by the First Lord of the Admiralty.

The Right Hon. Edward Horsman, on his appointed Chief Secretary to the Lord-Lieutenant of Ireland, by Viscount Palmerston.

Major-General A. W. Torrens, on promotion, by General Viscount Hardinge.

Mr. E. Betts, by the Duke of Newcastle.

Their Royal Highnesses the Duchess of Cambridge and the Princess Mary left St. James's Palace on Thursday for Egerton Lodge, Melton Mowbray, on a visit to the Earl and Countess of Wilton.

Her Royal Highness the Duchess of Gloucester entertained the Duke of Cambridge and a select party to dinner, on Saturday evening, at Gloucester-house.

The Duchess of Sutherland and Lady Blantyre returned to town, on Saturday, from Brighton, whither they had proceeded on the previous day, upon a visit to the Duke of Devonshire, at Kemp Town.

The Earl of Wilton left town on Monday for Egerton Lodge, Melton Mowbray, where a distinguished circle of visitors are about to assemble to meet their Royal Highnesses the Duchess of Cambridge and the Princess Mary.

Lieutenant Sir George Woombwell, Bart., of the 17th Lancers, has arrived in George-street, Hanover-square. This youthful Baronet has only recently been promoted for his distinguished gallantry at the memorable Cavalry charge at the battle of Balaclava.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE great talk of the week has been the successful *coup d'état* at the annual meeting of the Royal Literary Fund. This society has never been managed with the ability which its objects and its means most unquestionably demanded. It has been dry-nursed too long by a number of well-meaning old gentlemen whose united years would carry us into a fourth figure. It has never advanced with its age (its committee and management has not); and as it would not reform itself, it was necessary that it should be reformed from outside, by the general body of subscribers. From year to year the most patient attempts to bring its Committee to reason failed, in spite of arguments the most irresistible that could possibly be placed before a meeting of honest and really well-meaning men. "We are following the precedent of the Royal Society," said somewhat naïvely the goodnatured chairman of the day (Sir Robert Inglis); for which he was quietly and somewhat sarcastically rebuked by Mr. Dickens. "Would any reform (as it is called) do us any good?" asked, very unintentionally the clever biographer and the best natured of committee-men, Mr. Edward Foss, for which he was rewarded with a titter of admission. The truth is, the subscribing body *out* of the Committee were unanimously of opinion that the expenses of the Fund were too large, its Council a nonentity, and its charter insufficient for the purposes of the day. There were, of course, people who contended that the expenses were *not* large; that a new charter involved an expense that the Fund should not incur; in short, that no change whatever was wanted. Authors not on the Committee contended, perhaps a little too strongly for success, on the necessity of confining the Committee of Management to authors and scientific men. This aroused the jealousy of the publishers, and carried over some useful votes to the Committee. The publishers mustered strongly. We noticed Mr. Murray, Mr. T. Longman, Mr. Green, Mr. Moxon, Mr. Colburn, Mr. Bentley, Mr. J. W. Parker, Mr. Bohn, &c. Nor were the authors of our country ill-represented at the meeting: history was well sustained by Dean Milman, fiction admirably supported by Dickens and Bulwer. While critics mustered in a formidable phalanx, confronting authors they had cut up now and then from necessity, and not unoften from choice.

The triumph of the day was the carrying a Committee "to consider the propriety of applying for a new charter or Act of Parliament, and to report the result of their deliberations to a special meeting summoned for that purpose." This Committee is thus appointed:

Lord Lansdowne.

Dean Milman.	Sir E. L. Bulwer Lytton.
Mr. Thackeray.	Mr. Dickens.
Mr. Robert Bell.	Mr. Procter.
Mr. Tooke.	Mr. Dilke.
Sir Henry Ellis.	Mr. Forster.
Mr. G. R. Gleig.	Sir John Forbes.
Mr. Auldjo.	

This, we think, is a fairly-constituted Committee, and cannot but result in a real service to the Fund and to the cause of authors generally. There are some obstinate men on both sides—as may be seen by our printing of the names as it were in a kind of nominal opposition. Lord Lansdowne is not likely to attend, but the other members will meet, and the result of their deliberations will soon be known. The fight on Wednesday was rather a fight of principles than of men; though we were sorry to see Mr. Milman's name pitted against that of Lord Lansdowne, and as sorry to hear the Dean of St. Paul's (well and honourably known in literature) revive the exploded notion that literature is in any way at present supported—by patrons. An author's only patron in the present day is—the public.

Death, in the shape of bronchitis, has just removed from among us Mr. John Hollins, A.R.A., one of the best portrait-painters in small and in oils that this generation of Englishmen has produced. He had a quick eye for a likeness, a happy skill in the composition of his figures, and a fine sense of the beautiful in colour. He was born at Birmingham, in the year 1802—the son of a painter on glass in that town. He began with small conversational subjects, and has been heard to declare that he owed his first feeling for Art to the works of Moreland. There was, however, little to remind one in his works of his first favourite beyond a certain realth of treatment common to both. He soon became known; and, judging London to be a better outlet for his genius than his native Birmingham, he started for London in his twentieth year, finding a firm friend in the late Lord Wenlock, whom he soon afterwards accompanied to Italy. In 1842 he was elected an Associate of the Royal Academy; but did not obtain any higher honour in that body, having, however, lived to see five junior Associates promoted above him—viz., Messrs. Grant, Cope, Dyce, Marshall, and Frith. He was buried in the General Cemetery at Kensal green, on Wednesday last; the pall being borne by Sir Charles Eastlake, P.R.A.; Mr. Charles Landseer, R.A.; Mr. Redgrave, R.A.; and Mr. Creswick, R.A.

The place of Mr. Hollins's sepulture reminds us that Mr. Copley Fielding was buried on Saturday last, in the churchyard of Hove, near Brighton. Biographers too often omit to mention the places of burial of their heroes. Mr. Fielding was christened Copley Vandyke Fielding, and exhibited for the first time in the Old Water-Colour Exhibition in Spring-gardens, in the year 1810. He is said to have died rich, the well-merited reward of a long life of useful and successful labour.

A well-known collector very properly reminds us that the approaching sale, at Edinburgh, of the magnificent library of the late Lord Rutherfurd more than merits a paragraph in our paper. It is by very far the best library ever offered for sale in Scotland. The books themselves are in the finest possible condition. Mr. Nisbet's shelves were never decorated before with so many tasteful bindings in calf, morocco, russia, and even in simple mottled. Lord Rutherfurd had great taste, and he did not spare expense. He was always on the hunt himself, and he had many active friends on the look-out for him. In point of *condition*, no collection of the kind has been offered to the public since Osborne dispersed the Harleian Library. Great prices are expected.

ROYAL LITERARY FUND.

The annual general meeting of this society was held on Wednesday at the Society's Rooms, in Great Russell-street, Bloomsbury. The attendance of members was unusually numerous, in consequence of a rumour that some influential literary men intended to offer serious objections to the constitution and management of the Society. Among the members present were Sir R. H. Inglis, Sir Bulwer Lytton, M.P., the Very Rev the Dean of St. Paul's, Sir H. Ellis, the Rev. Dr. Croly, Mr. C. Dickens, Mr. H. H. Gibbs, M.P., Mr. C. Dilke, Sir J. Forbes, Mr. W. Dilke, Mr. W. Tooke, Dr. Arnott, Mr. Godwin, Mr. C. Baldwin, Dr. Roget, Professor Graham, Mr. P. Cunningham, Mr. J. Murray, Mr. Longman, Mr. J. W. Parker, Mr. Colburn, Mr. Bentley, Mr. Chapman, Mr. Bohn, Mr. Birch, Mr. Pickersgill, R.A., Mr. Hardwicke, R.A., Dr. W. Smith, Mr. Panizzi, Mr. Colley Grattan, Mr. J. Forster, Sir C. F. Roney, Mr. Mark Lemon, &c.

Sir R. H. Inglis was voted into the chair.

After the statement of the accounts had been read, on the motion that the thanks of the Society be voted to the auditors, Mr. C. Dilke said, that in 1803 it was stated in a report issued by the secretary that all the offices were discharged gratuitously except those of collector and messenger, and it was very natural that it should be so. It was the policy of the founder that all the offices of the Society should be gratuitously filled; and when, in 1886, he had collected a sum of £6000, and when the income of the Society was £600 a year, the Prince Regent was asked to give the Society a place of abode near the Palace. The founder contemplated that any house or museum which might be given to the Society should contain a library of books and manuscripts, and should attract the subscribers as to a common centre of communication and action. The founder hoped that the institution might one day become a college for decayed and superannuated genius—the most pitiable of all objects. If that common centre for literary men and publishers had been established, it would have been one of the most beneficial things to literature and to literary men that was ever projected (Hear, hear). The Prince Regent did not give the Society a house near the Palace; but a sum of £500 per annum was, by his direction, charged upon the revenues of the Duchy of Cornwall to defray the expenditure for a house, and the taxes. At the death of George IV. that grant ceased, and now the Society took its rank with some others, and received an annual donation of 100 guineas from the Crown. The Society had great rooms, which were only used nine times a year by the committee. In 1846 the duties of the registrars were set down, and it was arranged that a registrar should attend every general meeting of the Council of the General Committee, that they should take minutes of the business transacted, and of the orders made at each meeting; and should superintend the Society's correspondence. Now, if the registrars performed that duty without remuneration, what was there for any one else to do? The committee met nine times a year. There were three registrars, and, if they divided the labours between them, each registrar would have three meetings to attend, each meeting occupying about two hours. The first assistance which the registrars applied for was a clerk at £40 per annum. The clerk had now grown to a secretary, and the £40 a year had become £200; while the same duty had been for years performed for the Artists' General Benevolent Fund for £50. The committee of that Society met in a room at the Freemasons' Tavern, which they paid for, and thus avoided a charge for house-rent; and, as the committee met twelve times a year, the remuneration to the secretary of the Artists' Fund was £4 4s. day, which he thought ample. He would take the Artists' General Benevolent Fund, between which and the Literary Fund there was no difference whatever That fund was subscribed for artists generally, and he was sure there was as much difficulty of inquiry in the one case as the other. Mr. Dilke proceeded to read the following summary:—

LITERARY FUND.				ARTISTS' BENEVOLENT FUND.			
Applicants relieved at a cost of—				£11 wants relieved at a cost of—			
1844.	31	..	..	£250 6 10	55	..	£300 17 9
1845.	38	..	..	300 10 7	43	..	362 8 10
1846.	46	..	..	302 13 7	42	..	287 7 1
1847.	56	..	..	364 5 9	50	..	326 19 2
1848.	52	..	..	406 11 10	54	..	365 0 0
1849.	61	..	..	327 18 1	7	..	88 8 5
1850.	56	..	..	426 11 ..	60	..	86 13 8
1851.	57	..	..	328 15 8	62	..	86 3 4
1852.	49	..	..	313 17 8	56	..	191 13 8
1853.	47	..	..	304 4 5	52	..	84 11 4
	493			£3694 0 1	506		£1991 17 1

(Cheers.) In other words, every draught drawn for the benefit of applicants for the Society's aid cost £11 17s., in addition to the sum voted by the committee for their relief (Hear). He moved the following resolution:—

That whereas during the ten years from 1844 to 1853, both inclusive, the cost of assisting 498 applicants to the Literary Fund amounted to £3694 0s. 1d. (exclusive of collector's poundage, advertisements, and expenses attending the anniversary dinner); and whereas the cost of assisting 506 applicants to the Artists' General Benevolent Fund, within the same ten years, amounted to £1991 17s. 1d. also exclusive of collector's poundage, advertisements, and expenses attending the anniversary dinner); this meeting is of opinion that the expenses of managing the Literary Fund are unreasonable and enormous, and that a great change must be made in the administration of its affairs.

The Chairman asked if the resolution were an amendment to the motion before the meeting, or was proposed as a substantive resolution?

Mr. Dilke did not wish to cast any imputation upon the auditors, and wished his resolution to be added to the thanks to the auditors.

Sir B. Lytton seconded Mr. Dilke's resolution.

The Rev. Dr. Russell did not think it fair to adduce the rent of the Society's chambers as a sum withheld from the claimants. The payment of a secretary was, he thought, fairly justified by the result. The secretary bestowed a great deal of labour in obtaining the money which formed the Society's income. The amount received in 1854 in subscriptions, donations, &c., was £1126—a result which was obtained in consequence of the letters sent out by the secretary. Deducting altogether the cost of the maintenance of the house, which he held to be a part of the concern, he did not think that the secretary was overpaid by the sum he received, and he was, therefore, at a loss to perceive how any fair charge of extravagance could be alleged against the Society (Hear, hear).

The Chairman put the question, when there appeared for Mr. Dilke's motion, 28; against it, 22.

Thanks were then voted to the auditors and the registrars.

Previously to balloting for the president, vice-presidents, and officers of the Society,

Mr. W. Dilke said that he should not be supposed to make this a personal question, when he declared it to be his opinion that the high office of president, now filled by the Marquis of Lansdowne, ought to be filled, as a question of principle, by the most distinguished literary and scientific men who were subscribers to the institution. He accordingly moved that Mr. H. Hallam be selected to fill the office.

The Chairman stated that the proper course of proceeding was for each gentleman to hand up his ballot-paper, when the name of any officer of the institution could be erased, and any other substituted in its place.

Mr. C. Dickens was one who held that this Society should be entirely in the hands of literary and scientific men, and that no other human being had any business with it. The committee had favoured the meeting with the names of those whom they proposed, and he called upon the Chairman to read the names of those whom he and his friends proposed.

Mr. Dilke said, he was about to hand in a list of presidents, vice-presidents, council, and a general committee exclusively selected from literary men and scientific men; but the Chairman ruled that separate papers containing these names could not be sent round.

The balloting papers were then collected; and shortly afterwards the scrutineers returned and declared that the house-list had been elected.

Mr. C. Dickens rose to propose the following resolution:

That, whether the general committee's construction of the present charter be legal or illegal (as to which there are differences of opinion), it is manifestly absurd, as conducting a body expressly to be elected from numbers of the general committee, with at least three years' experience, called a council, to which it confides no powers and no duties, and which never meets, because it cannot even be called together by any authority for any purpose; and that it is therefore desirable to apply for a new charter, or an Act of Parliament, and that a committee be specially appointed with this object.

The existing charter was so excessively ridiculous, so inconsistent, and so manifestly preposterous, that it ought to be abandoned by men of sound mind, memory, and understanding (A laugh). The charter having in an express manner declared that there should always be a council, and that the council, with the general committee, should always have the direction of the Society's affairs, he supposed that, out of the Literary Fund and the two great establishments of St. Luke's Literary and Scientific men, but that no metropolis one human being who could doubt that this council was intended to have a real existence and something to do. He had had the honour to be elected some years ago upon the council, and he had hoped that by study and fasting (a laugh) he might be fit to discharge the high duties which he supposed devolved upon that august body. For months he never left home without leaving word where he might be found in the event of the Literary Fund wishing to take his counsel (A laugh). The Literary Fund, however, seemed to get on in its own manner, without requiring his aid; and, when the council met, and where it met, and what it did, he never could learn. The fact was that it never could meet, never did meet, had no place of meeting, and nothing to do—that, in fact, it was, in short, the only thing in creation that had no purpose, end, or object in existence (A laugh). What would the public say of a board of directors that did not direct, of a bench of judges who did not judge, of a jury that did not deliberate or find a verdict, of a physician appointed never to prescribe, of a surgeon directed never to set a bone, of a fireman enjoined never to go within fifty miles of a fire, or of picked officers of the Humane Society being tied up not to approach the water? (Much laughter). This was the case of the council at this moment. It was either used as a shelf for uncomfortable members of the general committee, or it was used to prop up the faults of the concern with the names of literary men who had nothing to do with it. The charter was, in fact, utterly defective and rotten, inasmuch as it appointed a council, but omitted to name its functions.

Mr. J. Forster seconded the resolution.

The Dean of St. Paul's suggested that the committee should report the result of their deliberations to a special general meeting summoned for that purpose.

The suggestion having been incorporated into the resolution, it was put from the chair, and carried unanimously. The appointment of the Committee was then resolved on; and thanks having been voted to the secretary, and the usual acknowledgment having been paid to the Chair, the meeting separated.

A THREATENED PAPER-DUTY IN FRANCE.—M. Didot, the eminent French publisher, has just issued a pamphlet against a projected paper duty in France. In 1240, says M. Didot, King Philip ordered that "paper and books being indispensable to pupils, should be exempt from duty." King John, in 1360, confirmed that privilege; and afterwards Louis XII. and Francois I. declared books exempt from every kind of impost. Henry II., in 1552, ordered that there should always be in France a special favour shown to paper; and, in 1729, when an attempt was made to introduce a paper-duty, the idea was so unpopular that the proposed plan came to nothing.

THE FAST AGE.—The news of the death of the Emperor Paul in 1801 was *twenty-one days* in getting to London. That of the late Emperor Nicholas *four hours and a quarter* at the utmost, according to Lord Clarendon's statement in the House of Lords of the time it had been received at the Foreign-office.

ADMIRAL H. EDEN and Sir Robert Peel, Bart., are appointed Lords Commissioners of the Admiralty; Mr. Walter Drummond to be private secretary to Admiral Eden.

THE BARNSTAPLE ELECTION.—The vacancy in the representation of the borough of Barnstaple, caused by the unseating of Mr. Laurie by a Committee of the House of Commons, was filled up on Saturday at the election of Mr. G. S. Buck, a Conservative. Mr. Tite, the Liberal candidate, had previously withdrawn from the contest, on the ground, as he declared in a placard, that he candidate who did not resort to corrupt practices could be successful

THE RUSSIAN ATTACK ON EUPATORIA.

THE ATTACK ON EUPATORIA.

THE following account of the attack made by the Russians on the town of Eupatoria, on the 17th ult., is by the officer to whom we are indebted for the Sketches which accompany it:—

H.M.S *Valorous*, off Eupatoria, Feb 21, 1855.

At daylight on the morning of the 17th February, the Turkish batteries constructed for the defence of the town were observed to open fire on a large body of Russian troops advancing from the northward; and, as it soon became evident that a general attack was intended, the ships of war at anchor in the bay immediately slipped, and proceeded to assist in the defence of the flanks of the Turkish entrenchments—the *Curacoa*, *Furious*, and *Viper* on the right; and the *Valorous* on the left. The main attack was made on the right or east flank, where the defences are the weakest, while a large body of cavalry made a feint on the left rear—a building originally a Russian barrack, now held by a division of the Turks. A few shells from the *Valorous* soon dispersed these latter; but the main body, on the right, made several determined attempts to storm the works, in which they must have succeeded, being only prevented by the flank fire of the ships and the resistance they met with from a party of the "Bons Jardiers," who remained immoveable at their post of danger. Finding at last, after four hours' hard firing, that all their attempts were unsuccessful, the enemy retired, leaving upwards of 400 dead on the field. The loss on the side of the Turks amounted to about 100 killed, and 200 wounded, among whom was one of the chief in command (severely). The force of the Russians has been estimated at 30,000, and 60 guns, that of the Turks being little above 30,000, and with scarcely any cavalry, of which the former had a large proportion.

The battle-field presented a terrible scene of robbery and barbarism on the part of the Tartars, who not only stripped the dead and wounded of every stitch of clothing, but insulted and mutilated the dead bodies in every possible way. Several Turks were even found stabbing those who were not actually dead, in trying to prevent which a French corporal gallantly lost his life.

Of the horses scarcely a vestige was left three hours after the engagement, the starving Tartar population having taken every part for food save the hoofs and skins.

The enemy have now encamped about three miles outside the town, and a fresh attack is daily expected.

"NIGER." "BANE." "SIDON."

ALLIED STEAMERS ON THE LOOK-OUT BEFORE SEBASTOPOL.

LOOK-OUT STEAMERS OFF SEBASTOPOL.

WE are indebted to a Correspondent for the accompanying spirited Sketch of the Steamers (at the date of our Correspondent's communication, Feb. 23) on the look out off Sebastopol. These vessels were—the *Sidon* and *Niger*, English, and the *Sané*, French. Since the sortie of the two Russian vessels in December last, there have been continually two or three of the Allied steamers anchored off the entrance to the harbour, just without range of the batteries. By day they have to keep a good look-out, and report the movement of troops about the town, or anything stirring in the harbour; and at night prevent any attempt that might be made to tow fire-ships amongst the fleet off Kamiesch. The guns of the look-out steamers are kept loaded, and at night the men are at their quarters, steam up at full speed; and every thing else ready at a moment's notice to receive any Russian who may be disposed to come out.

BANQUET AT THE LONDON TAVERN TO GENERAL VIVIAN AND THE ENGLISH OFFICERS OF THE TURKISH CONTINGENT IN THE CRIMEA.

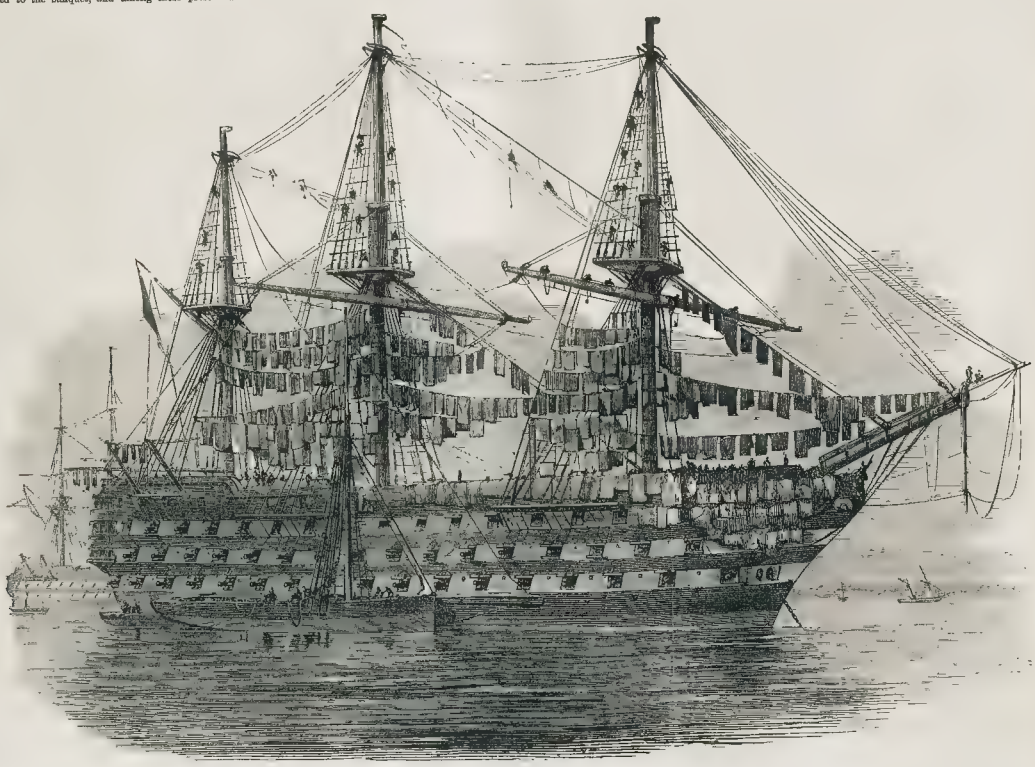
THE TURKISH CONTINGENT.

GRAND BANQUET TO GENERAL VIVIAN.

A magnificent farewell banquet was given on Saturday evening last, at the London Tavern, by the East India Company, to General Vivian and the officers appointed to command the Turkish contingent in the ensuing campaign in the Crimea, previous to their departure to the seat of war. About 150 noblemen and gentlemen, members of both Houses of Parliament, and the principal proprietors of the East India Company, were invited to the banquet, and among those present were Viscount Palmerston, Marquis of Lansdowne, Duke of Argyll, Lord Panmure, Right Hon. R. Vernon Smith, M.P.; the Turkish Minister (M. Musurus), Lord Vivian, Lieutenant-General Sir George Pollock, Mr. Mills, Sir J. W. Hogg, Bart., M.P., Sir James C. Melvill, Lieutenant-General Sir Charles Pasley, Sir E. Currie, Bart.; Mr. Danby Seymour, M.P.; Hon. W. Leslie Melville, Sir F. Abbot, Mr. Shepherd, Sir H. Willock, Colonel Fitzgerald, Commandant of the Artillery; Colonel Sykes, and numerous others. Colonel Oliphant, the Chairman of the East India Company, presided.

The cloth having been removed, the health of her Majesty, Prince Albert, the Prince of Wales, and the rest of the Royal family having been drunk, the Chairman proposed "The health of his Imperial Majesty the Sultan," which was drunk with great enthusiasm.

M. Musurus, who responded in French, after expressing how highly his august master valued the English alliance, and referring to the fact that the Sultan had hastened to detach an important portion of his own troops to place them at the disposal of the Commander-in-Chief, said, he hoped the Turkish contingent would themselves be the generous rivals of the victorious combatants of Oltenitza, of Kalafat, of Citate of Silistria, of Giurgevo, and of Eupatoria—the worthy companions in arms of the heroes of Alma, Balaclava, and Inkerman. He felt certain that the Ottoman soldiers would esteem themselves fortunate



H.M.S. "ST. GEORGE" REFITTING AT SPITHEAD.—(SEE NEXT PAGE.)

in being placed under the direction of such a brave general, and that the general (General Vivian) would have reason to feel proud of having the command of such brave troops.

Sir C. Paisley, in returning thanks for "The Army," which had been duly honoured, indulged in some remarks on "Special Correspondents," which caused more laughter than approbation.

The Chairman proposed "The Health of General Vivian and the Indian Officers who were about to embark for the East." The company might judge with what alacrity those officers had responded to the intimation that their services were required, from the fact that, within three days, no less than 150 to 200 of them had readily volunteered.

General Vivian, in reply, said, he rejoiced to think he would be associated with a band of gallant soldiers. It was with pride and pleasure he had read a speech made the other day by his gallant friend Major Nasmyth, in reference to the Turkish army. With such material, and with such officers as he would have to assist him, he had no doubt of success.

Lord Palmerston did not seem very hopeful as to the Vienna negotiations. In referring to the Turkish contingent, he said –

I have no doubt they will march to victory, that they will cover themselves with glory on the battle-field, and contribute to obtain for us, by the mediation of the sword, that future security for the peace of Europe which we have not been able to accomplish by persuasion or negotiation.

Lord Panmure gave a more cheerful view of the condition and prospects of the Army in the East than the public are accustomed to see: –

No doubt there has been much suffering during the last campaign, and there were, no doubt, many omissions which experience may correct in future; but I have every reason to believe—and I may say it with confidence before this company and the British people—that the corner is turned, that the sun is again shining upon us, and that, with returning spring, the health, the spirit, and the energy of our troops are returning also, and that we may now hope that ere long the decisive moment will come when our gallant army in the East will add fresh laurels to those which they have already gathered—when they will again call forth the meed of their country's praise—again be seen fighting, and fighting with good service, in the cause of truth and liberty against despotism (Cheers)—in a cause which I hope will be dear to the people of this country, and one for which they will ever encourage their fleets and their armies nobly to fight (Loud cheers)

THE "ST. GEORGE" REFITTING.

The refitting of vessels for the Baltic now invests Spithead with the aspect of great activity, and presents several singular objects for the pencil. One of these, selected by our Artist, is very picturesque: namely, the *St. George*, three-decker. Her hammocks are all hung out to dry; their number is quite startling, and gives a good idea of the immense size of the ship. The men are tarring the rigging, and swinging about on the ropes, with the cans hanging below; and, in contrast with the vast ship, they resemble so many bees.

IMPERIAL PARLIAMENT.

(Continued from page 238.)

HOUSE OF LORDS. THURSDAY.

Lord Panmure, in reply to Earl Grey, said that the practice in respect to the granting of first commissions without purchase was to select, in the first instance, such persons as had distinguished themselves in the Military College at Sandhurst. The second claims recognised were those of the sons of officers who had distinguished themselves in our Army or Navy. The third were the claims of the sons of poor deserving clergymen. And, finally, when those claims were exhausted, commissions were given to the gentleman whose names have been placed upon the list of applicants. A great many commissions had been recently distributed amongst the last class of persons; and in order to meet the demands of the Army, the age for qualification was now extended from eighteen to twenty-two years.

The following Bills were read a third time and passed viz., the Marine Mutiny Bill, the Mutiny Bill, the Tea-duties Deeline Suspension Bill, and the Secretaries and Under-Secretaries of State (House of Commons) Bill.

On the motion of Lord Brougham, the Ecclesiastical Courts Bill was read a second time.

The Earl of Malmesbury asked whether the Government had made any arrangements, and what, respecting furloughs to be given to married men in the Militia, and also as to the maintenance of their wives and families?

A long conversation took place upon this question; in the course of which it transpired that those men enlisted under the Act of 1852 were, after fifty-six days' service, entitled to a furlough for the rest of the year, if they liked to claim it. This was not generally understood by the men, but they would not be deprived of that privilege.

HOUSE OF COMMONS. -THURSDAY.

Sir R. Peel and Viscount Monck took the oaths and their seats respectively for Tamworth and Portsmouth, after their re-election.

Mr. Scholefield gave notice of his intention, on that day fortnight, to move for a Select Committee to inquire into the adulteration of articles of food.

Sir W. Clay gave notice that, upon that day fortnight, he would move for leave to bring in a bill to abolish Church-rates.

NEWSPAPER-STAMP.

The Chancellor of the Exchequer, in reply to an hon. member, stated that it was certainly his intention to move the Newspaper-stamp Bill now before the House, and to propose great alterations in its details. On consideration, however, he thought it better to commence *de novo*, and he should therefore propose fresh resolutions on Monday.

Mr. M. Gibson and Mr. Ricardo urged the right hon. gentleman to proceed with his resolutions to-morrow

The Chancellor of the Exchequer then consented to bring forward his resolutions to-morrow

REAL ESTATES.

Mr Locke King moved for leave to bring in a bill for the better settling of the real estates of intestates. He submitted that an alteration ought to be made in a law which sometimes left a widow and all her children, except the eldest, to poverty, while that eldest was placed in a position to indulge in the most unbridled luxury. He proposed that in the case of a man possessed of landed property dying intestate the law should make for him a will as fair and equitable as it would do if he had personal property only

Mr. Massey seconded the motion

The Solicitor-General opposed the bill, on the ground that it would be the first step towards altering the laws of primogeniture, which was at the very bottom of the institutions and of the order of society in this country.

After a brief discussion the House divided; and the numbers were – For the motion, 84; against it, 156: majority against the motion, 72.

Mr. W. Williams moved, "That, in the opinion of this House, real property and unprivileged chattels should be made to pay the same Probate-duty as is now payable on personal property; and that property belonging to corporations, universities, colleges, bishoprics, and deans and chapters, should pay a duty equivalent to the Probate and Legacy-duties levied on personal property."

Mr. Hadfield seconded the motion.

The Chancellor of the Exchequer opposed the motion, on the ground that there were peculiar burdens imposed upon land which did not affect real property. Personal property, for instance, could be transferred without the payment of Stamp-duty, whereas there was a serious charge imposed upon the transfer of landed property.

Upon a division, the numbers were—For the motion, 61; against it, 84: majority against the motion, 23.

Mr. Corbett moved for leave to bring in a bill to limit the hours of work of females and young persons in the factories of the United Kingdom to ten hours in the day, and to provide the means of more perfectly inspecting the factories. The hon. member said, that as inasmuch as the Act of 1847 was evaded by the manufacturers, he considered it necessary by a new measure to define the law more particularly, and to render its observance more imperative.

Sir G. Grey said that the subject was already settled by the Act of 1850, which he considered satisfactorily. It was not, therefore, advisable to reopen the question.

After considerable discussion the motion was negatived by a majority of 109 to 101.

Mr. T. Duncombe moved an address for copies of any despatches or correspondence that has passed between Lord Raglan and the Minister of War relative to the wants of the army in the Crimea.

Lord Palmerston opposed the motion. The Committee that had been appointed to inquire into the subject of the war might, if it pleased, ask for such papers.

The motion was negatived without a division.

Great Fire at Bermondsey.—On Thursday morning, about five o'clock, a terrible fire broke out in an extensive granary and wharf belonging to Mr. Glendinning, termed Lucas's Wharf, and upon the rope and sharp's sail works belonging to Mr. Holl, situated at Bermondsey-wall. Several adjoining premises are considerably injured. The damage was estimated at about £160,000

CHURCH, UNIVERSITIES, &c.

Preferments and Appointments. –*Archdeaconry:* The Rev. W. B. Otter to Lewes. *Rural Deaneries:* The Rev. W. Hayward Cox to Hereford; and the Rev. J. H. Underwood to Froome. *Prebendal Stall:* The Rev. C. M. Church to White Leahungton, in Wells Cathedral. *Rectories:* The Rev. W. English to Bradfield, Norfolk; the Rev. E. C. Swainson to Westacre, near Shrewsbury; the Rev. Isaac Hill to Newbourn, Suffolk; the Rev. T. Lewis to Denbigh. *Vicarages:* The Rev. Mourant Brock to Lyncombe and Wydcombe, Somerset. *Incumbencies:* The Rev. J. E. Nash to New Church at Jacob's Well, near Bristol; the Rev. J. Tinson Wrynford to St. Paul's, Newport, Monmouthshire; the Rev. H. Woodward to St. James's, Kennington. *Minor Canonries:* The Rev. W. R. Cosens to Chichester Cathedral, and to the Incumbency of St. Andrew's, in that city; the Rev. Richard Cattley to Worcester Cathedral.

The Rev. H. Hayman, assistant-master at the Charterhouse, and assistant-preacher at the Temple Church, has been appointed Headmaster of Queen Elizabeth's Schools for the parishes of St. Olave and St. John, Southwark.

The Bishop of London has sanctioned a proposal which has been made to him by his clergy that the collections on the day of Humiliation (Wednesday next, the 21st inst.) may be devoted to the purpose of erecting and permanently endowing a church in some part of the Turkish dominions for the benefit of our countrymen, whether military or civil.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS

TAKEN DURING THE WEEK ENDING THURSDAY, MARCH 15.

NOTE.—The sign ° denotes below the average

The reading of the barometer decreased from 30.1 in. at the beginning of the week to 28.88 in. by the 12th; and increased to 29.84 in. by the end of the week. The mean reading for the week, at the height of 82 feet was 29.55 inches.

The temperature has been low, and below its average on every day on Friday to the amount of 43°: on Saturday to 12°: and on Sunday to 8°. *The mean temperature of the week* was 34·6°, being 6·4° below its average.

The average range of temperature daily was 13°: the smallest was 7°, on the 10th: and the largest was 21°, on the 12th.

Rain fell on four days to the depth of something less than half an inch.

Snow fell on the 9th, 10th, and 11th, and some still lies in places on Blackheath, where it had drifted in the previous snow storms

The weather of the week began with a painfully cold temperature, and which continued till Sunday, but gradually grew somewhat warmer towards the end of the week. On Sunday it fell to 22½° and on Tuesday rose to 47°. The sky has been in general overcast, and the weather fell Lewisham, March 16, 1855. JAMES GLAISHER.

Health of London. Within the week ending March 10, the births of 1020 children were registered within the metropolitan districts: 971 were born and 949 were buried. The average number of births in the week of the year from the preceding ten years were 780 and 742 respectively. The number of deaths registered within the same limits were 679 males and 636 females, in all 1277—exceeding the average number for the tenth week of the year by 161, but are less by 153 than the deaths in the preceding week. Persons of ages exceeding sixty years have experienced the greatest relief; their deaths fell in the week ending March 10 to 266. Bronchitis was fatal to 169 persons, and on the preceding week to 249. To deaths from burns and scalds, 18 are referred; nine of these were children under five years of age, and five others were at ages less than 15 years

OBITUARY OF EMINENT PERSONS.

DON CARLOS

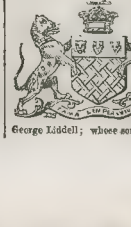
How variable is the public interest in men as well as things! There was a time when the death of the prince would have created a sensation little short of that now caused by the demise of the Emperor of Russia. The struggle between Don Carlos and his niece, or rather between him and his sister-in-law, for the dominion of Spain—a selfish contest at best—happened to be regarded, when it occurred, as a great battle between liberty on one side, and despotism on the other The eyes of Europe were on the belligerents, and the brilliant successes of Don Carlos's General, Zumala-arregui—the Montrose of that Cause—gave to Carlos himself, and his cause, a chivalrous colouring that recalled the remembrance of our own King Charles and his cavaliers. But Zumala-carregui fell, and after him the war dwindled down into a very matter-of-fact and unheroic piece of business. Don Carlos was undone by treachery rather than defeat; he left Spain, and passed into obscurity so complete that his death now hardly excites a passing observation. The very memory of him has perished.

Charles Maria Isidore de Bourbon, familiarly known as Don Carlos, was the second son of Charles IV., King of Spain, by his consort, Louisa Maria Theresa, Princess of Parma. He was born the 29th March, 1788. His whole life was a course of trouble and disappointment. When but a youth he shared in the misfortunes which Napoleon brought upon the Royal house of Spain. Carlos was a prisoner with his brother Ferdinand in France; but, unlike Ferdinand, he always exhibited a firmness and straightforwardness of purpose, which won for him, at least, the respect of his enemies. After a long exile he returned to Spain to be the heir presumptive of Castilian royalty; but, just as he was about to clutch the sceptre, the will of Don Ferdinand overthrew the Salic law, and gave the crown to a female. Hence the Carlist war: hence the armed appearance and vicissitudes and final overthrow of Don Carlos in Spain—events too well known to here require detail. Retreating into France in 1839, Don Carlos was, by the Government of Louis Philippe, put under surveillance, and he remained in a kind of confinement at Bourges until 1845, when he was permitted to retire into Italy. He that resigned his rights to the throne of Spain in favour of his eldest son, and assumed the incognito title of Comte de Molina. Don Carlos was twice married: first, in 1816, to the Infanta Frances d'Assis (who died in 1834), daughter of John IV., King of Portugal; and secondly, in 1838, to the Infant Peter's (his first cousin's) widow, Maria-Theresa, daughter of John VI., King of Portugal. By the former of these Princesses he leaves issue, two sons—the Infant Charles, Count of Montemolino, present claimant to the throne of Spain, born the 31st January, 1818; and the Infant John, born the 15th May, 1822. The Count of Montemolino is married to Caroline, sister to the present King of the Two Sicilies, but has no issue; his brother, however, Don John, is married to the Archduchess Maria, daughter of Francis IV., Duke of Modena, and has three sons; so that a numerous offspring to the Spanish monarchy promises to be quite strong enough to trouble the future

Don Carlos died at Trieste on the 3rd inst.

THOMAS HENRY, LORD RAVENSWORTH.

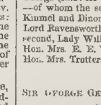
This venerable nobleman, who had completed his 80th year, died at Ravensworth Castle, co. Durham, on the 7th inst. He was the eldest son of the late Sir Henry George Liddell, Bart., by Elizabeth, his wife, daughter of Thomas Steel, Esq., of Hampnet, and represented an ancient family on which a Baronetcy was conferred in 1642, in requital of Sir Thomas Liddell's gallant defence of Newcastle for the King The fourth Baronet, Sir Henry Liddell, was created Baron Ravensworth in 1747, but died without male issue; whereupon that dignity became extinct; but the Baronetcy devolved on his nephew, Sir Henry George Liddell; whose son, Sir Thomas Henry Liddell, Bart., was made a Peer in 1821, as Baron Ravensworth, of Ravensworth Castle, and was the nobleman whose decease we record.



He married, 27th April, 1796, Maria-Susannah, daughter of John Simpson, Esq., of Bradley, county Durham, by the Lady Anne Lyon, his wife, and had no less than sixteen children. The eldest son, Henry Thomas, now Lord Ravensworth, has represented Liverpool since July, 1853: he is married to Isabella-Horatia, eldest daughter of Lord George Seymour; and leaves Henry-George (M.P. for South Northumberland), and several other sons and daughters, one of whom the second, Florentia, is the wife of Hugh Robert Hughes, Esq., of Kinmel and Dinorben, nephew and heir male of the late Lord Dinorben. Of Lord Ravensworth's daughters, the eldest is Marchioness of Normanby; the second, Lady Williamson; the third, Viscountess Barrington; the fourth, the Hon. Mrs. R. R. Vilhers; the fifth, the Countess of Hardwicke; the sixth, the Hon. Mrs. Trotter, of Dyrham Park; and the seventh, Lady Bloomfield.

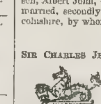
SIR GEORGE LARPENT, BART.

Sir George Gerard de Hochepied Larpent, Bart., of Roehampton, Surrey a gentleman formerly well known as a merchant and a politician—died on the 8th inst., at his residence, in Conduit-street, aged about sixty-seven. Sir George Larpent was, in 1847, the Liberal candidate for the representation of the City of London, and he lost the election by only three votes. He had previously been M.P. for Nottingham. Sir George was formerly a member of the East Indian house of Cockerell and Larpent. He filled, among other commercial offices, the Chairmanship of the Oriental and China Association, and of the London Docks. He obtained his Baronetcy by creation, in August, 1841. Sir George Larpent was the youngest son of John Larpent, Esq., of East Sheen, Surrey, by his second wife, Anna Margaretta, daughter of Sir James Porter, British Ambassador at the Porte. He was born the 16th February, 1786, and married, first, the 13th October, 1813, Charlotte, third daughter of William Crecroft, Esq., by whom (who died in 1851) he leaves a son, Albert John, and a daughter now Mrs. Aldabor Quaniney. Sir George married, secondly, in 1852, Louisa, daughter of George Bailey, Esq., of Lincolnshire, by whom he leaves also a son.



SIR CHARLES JENKINSON, BART.

Sir Charles Jenkinson, tenth Baronet, of Hawkesbury, Gloucestershire, was the eldest son of Col. John Jenkinson, and nephew of Charles Jenkinson, the distinguished statesman and first Earl of Liverpool. He was born the 23rd February, 1770, and married Catharine, fifth daughter of Walter Campbell, Esq., of Shawfield and Islay, N.B., by whom he leaves three daughters, now all married. They are Mrs. Walter Nugent, Mrs. R. S. Guinness, and the Duchess of Montebello. Sir Charles succeeded to the old Baronetcy of Jenkinson on the demise of his cousin, Charles Cecil Cope, third Earl of Liverpool, and tenth Baronet, the half-brother of the second Earl of Liverpool, who was Prime Minister from 1812 to 1827. The Earldom of Liverpool became extinct with the eighth Baronet, and now that Sir Charles, the tenth Baronet (who died at Paris on the 6th inst.), leaves daughters only, the Baronetcy passes to his nephew, George Samuel Jenkinson, of Eastwood-house, Gloucestershire, eldest son of the late Right Rev John Banks Jenkinson, D.D., Bishop of St. Davids.



STEPHEN JACKSON, ESQ., M.A.

This gentleman died on the 16th inst., at his residence, St. Lawrence, Ipswich, aged forty-seven. He was the proprietor and editor of the *Ipswich Journal*. Mr. Jackson was born at Ipswich, and was educated at the Grammar School of Bury St. Edmunds; and at Cambridge, where he graduated, was a scholar of Caius College, and obtained the annual prize for mathematics. On the death of his father, Mr. Postle Jackson, he succeeded to the proprietorship of the *Ipswich Journal*, one of the oldest newspapers in the kingdom, which he conducted with ability and success until his death

Mr. William Jackson was also a lover and patron of the fine arts, and devoted much time to the study of mediæval architecture His judgment and advice were often sought in matters pertaining to ecclesiology by archæologists and architects. The decorated three-light east window inserted in the chancel of Nettlestead Church, in memory of Mr. Jackson's father, which may challenge comparison with the best works of the thirteenth century, was executed from Mr. Jackson's own design. Mr. Jackson married, a few months before his death, Kate, daughter of Captain Frederick Cobbold, and niece to John Chevallier Cobbold, present M.P. for Ipswich. Mr. William Jackson was well known, and bore a high reputation throughout the Eastern counties, and was much and deservedly respected and esteemed by all who were acquainted with him.

THE REV. T. C. BLOFELD.

The Rev. Thomas Calthorp Blofeld, M.A., J.P., died in his 79th year, on the 25th ult., at his seat, Hoveton-house, Norfolk. He was Rector of Hellesdon-with-Drayton, in that county, where his ancestors had been settled from the time of the Conquest; some of whom represented Norwich in Parliament, where Mr. Blofeld was noted for his very regular attendance as a magistrate. He was greatly respected, and is much regretted

SIR FREDERICK HANKEY.

This gentleman, who died on the 13th inst., at his residence in Montague-square, was the third son of John Hankey, Esq. He entered the British service in 1800, and served at first in Ceylon as Assistant Quartermaster-General. He there became a Lieutenant-Colonel and Deputy Inspector-General of Colonial troops; he was subsequently Deputy Judge Advocate at Malta, and afterthat, private secretary to Sir Thomas Maitland at Corfu. He was made a Colonel in 1826, and was, in 1833, created a Knight, Grand Cross of St. Michael and St. George, of which order he was previously Secretary Sir Frederick was twice married, and has died a widower.

JUDGE KNICKERBOCKER.

Judge Herman Knickerbocker, of Rensselaer County, U.S. (who is said to have been the original of Irving's "Congress-man" in his amusing History of New York), died recently in Williamsburg, aged 75. The Judge was a member of Congress in 1806-10. He was widely known, and everywhere respected, as one of the finest specimens of the old Dutch chivalry that time had preserved to these latter days. Having been educated for the Bar, he commenced the practice of his profession at an early age, taking immediately a prominent place in it, as well as in political life. He was a member of the New York Legislature, then Judge of the county of Rensselaer, until the infirmities of age forced him to retire. In social life Judge Knickerbocker always filled a brilliant place. Bred from his childhood to association with some of the most distinguished men of an age remarkable for its high-toned courtesy and accustomed as a Judge to act with authority, he acquired in his manners that blending of suavity with dignity peculiar to those accustomed to early intercourse with the world and the early habit of self-control. This, with his generous hospitality and joyial humour, won for him the popular sobriquet of "Prince of Schaghticoke."

The Rev. James Eyre.—This excellent and amiable divine—a preacher of great eloquence and power—was formerly Incumbent of North Dalton, and the Minster, Beverley, Yorkshire. He died at his residence, in Hampshire, on the 7th inst., aged 63. The Rev. gentleman married in 1806 Penelope, third daughter of J. H. Phipps, Esq., of Leighton House, Wilts, by whom he leaves a numerous issue

Erratum in Notice of W. F. Campbell, Esq.—Mr. Campbell left only a son by his first marriage, and by his second marriage he has left a numerous issue.

Wills and Personalty.—The Right Hon. Charlotte Baroness Colborne, personalty £2000. Sir George Best Robinson, Bart., £18,000. Rev. Isaac Gossel, of Windsor, £60,000. Rev. Robert Ashe, £80,000. Rev. Eleazer Cogan, £20,000. Tristam Whitter, M.D., Bath, £30,000. John Sich, of Chiswick, brewer, £30,000. William Walker, wine merchant, £50,000. Jesse Curling, Esq., of Bermondsey, personalty sworn under £30,000. The Rev. F. J. Faithfull, Rector of Bishop Hatfield, Herts, personalty under £25,000.

General Hubert, Commander of the Legion of Honour, and Member of the Committee of Artillery, died on Saturday. He was buried on Sunday with the military pomp due to his rank.

NATIONAL SPORTS.

THE severity of the past winter, which seemed not unlikely to jeopardise even the Doncaster meeting, may be judged of by the unprecedented fact that a hare was last week discovered feeding on the remains of a frozen rabbit! The great Liverpool Steeplechase was nearly as odd in its result as the weather which had postponed it. Its winner was a rough, understood Irish hunter, who was merely started to keep a more pretentious stable-mate in good humour; while the third out of the twenty hardly looked worth the attention of the knacker when he was sold in an apparently worn-out state at Tattersall's five years ago; and the fifth was running in a Cheshire shandry up to Tarvenham last. Boarton did not start, but both he and Wanderer were among the eleven defeated ones at Doncaster. A field of nineteen contested the Hopeful Stakes, and the victor was Wandering Willie—the first of Windhound's stock that has appeared in public (Windhound is own brother to Ethiliron, Hobbie Noble, Miserrime, and the Reiver, but the worst public runner of the family). The Rold Bucclench, who is as beautiful as the young Annandales always are, showed both here and at Derby that his Nottingham running was a mistake. Wells had the first winning mount of the year, and has followed up his luck at every meeting since.

Race and steeplechase meetings will not set in next week with very considerable strength. Mr. Merry, after many disappointments, has claimed Monday and Tuesday for his Warwick Spring Meeting; Wednesday will, of course, be a *dies non*; but, on Thursday, the licensed victuallers will muster for their annual race festival at Epsom. Although its lamented projector, Mr. Beeton, is no more amongst us, the subscriptions of the fraternity come in as of old: but both the races are slightly on the decline, as regards acceptances and amount of speculation. There will, however, be a fairly strong day's sport, on the card; and the adherents of the "field sports" and "the tartan" will have their favour duly excited. Saturday will be devoted to the Brighton Spring Meeting, which will have a somewhat bleak celebration on its wind-swept hills. The Wetherby and Carmarthenshire Hunt Steeplechase Meetings will enliven their disports on Monday: "Wansford-in-England" and Warwick will be similarly favoured on Friday; and the Manchester garrison intend also to have an afternoon's sport on Saturday. The regular military steeplechases at Warwick have, of course, come to nothing; and many a gallant fellow is now meuldering 'neath the red Crimean sod who so often donned the merry racing-jacket over its town meadows.

Black Cap, Black Cloud, and a host of other good winners, went down before Judge in the last Waterloo Cup—for which Lord Sefton had not even a nomination. His Lordship won it with Sackcloth last year, and beat Judge in the fourth ties, in that short and unsatisfactory course. Judge completely outpaced his opponent from the slips, but made such an unfortunate bungle, after getting "speed to the hare" and the first turn, that Sackcloth got in, and could never be got at again. Coursing fixtures for next week commence with the Northumberland Union on Monday; this is followed by Bredwardine on Tuesday, and by the Caledonian Champion and Newmarket (open) on Tuesday, &c. Besides these, Hilton (open) and the Altcar Club hold their long-tail tryets on Thursday and Friday.

DONCASTER SPRING MEETING.—TUESDAY.

Trial Stakes.—Van Winkle, 1. Jack Sheppard, 2.
Sheffield and Rotherham Plate.—Caliph, 1. Bourgeois, 2.
Hopeful Stakes. Wandering Willie, 1. Gamester, 2.
Grand National Steeplechase. Seaman, 1. Augustine, 2.
Municipal Stakes.—Puncture, 1. Dan Cupid, 2.

WEDNESDAY.

Juvenile Selling Stakes. Drina, 1. Gipsy Girl, 2.
Betting-room Stakes. Ilyaney, 1. Nelly, 2.
Doncaster Handicap Stakes.—Coesey, 1. Freddy, 2.
Scurry Stakes.—Corin, 1. Haxby, 2.
Hunt Steeplechase.—The Hero, 1. Golden Hue, 2.

FOOT-PRINTS IN THE SNOW.

(To the Editor of the ILLUSTRATED LONDON NEWS.)

I beg the favour of you to insert in your newspaper the following fact, upon the authority of a Polish Doctor in Medicine living in the neighbourhood:—On the Piaskowa-gora (or Sand-hill)—a small hill on the borders of Galliela, but in Russian Poland—every year are to be seen in the snow the same foot-prints as these seen in Devonshire, in a single line round the hill, at a few inches and regular distance from each other; no mark of a beginning or end being distinguished. It is universally attributed by the inhabitants to supernatural influence. The same footprints are occasionally visible in the soft sand with which this barren hill is covered.

C. C. C.

Heidelberg, March 12th, 1855.

PORTSMOUTH ELECTION.—The poll for the election for this borough, in consequence of the acceptance by Lord Monck of a Lordship of the Treasury, took place on Monday. The whole of the proceedings were very quiet and orderly. The following was the result of the poll at four o'clock.—For Lord Monck, 1478; for Mr. Gazelee, 473: majority for Lord Monck, 1005.

THE Electoral Committee of the Society for Liberating Religion from State Patronage and Control has been reconstituted, and Samuel Morley, Esq., has consented to be its chairman. The object of the committee is to prepare the way for a large accession to the senatorial strength of the society at the next general election.

THE COLOSSEUM, REGENT'S-PARK.—This famous place of amusement was offered for sale under the hammer by Messrs. Winstanley, at the Mart, on Wednesday. The ground and building are held under the Crown for sixty-nine years to come, at a ground-rent of £363. It was stated that, including the erection of the building, upwards of £200,000 had been expended by Messrs Horner, Braham and Yates, and Turner, the respective successive owners. The sale was by order of the Court of Chancery, to repay the mortgagee, but the only offer was £20,000, which the auctioneer stated was below the reserve, and the property was bought in.

NAVAL MEDICAL OFFICERS. The movement in favour of the naval assistant-surgeons originated at the Middlesex Hospital, has been followed by the pupils of all the other metropolitan schools. An important meeting was held last week, attended by delegates from all the London hospitals, to organise an effective opposition to the recent unjust regulations of the Admiralty, admitting youths of eighteen, and who had only just finished their first medical sessions, into the Royal Navy to rank with, but subordinate to, that of the acting assistant-surgeons. The provincial schools are about to co-operate with the metropolitan in addressing petitions to Parliament on this important subject.

THE PATRIOTIC FUND.—A Toronto paper states that the Six Nation Indians on the Grand River, deeply sympathising with the sufferers by the war against Russia, have liberally and unanimously contributed the sum of £100 sterling towards the Patriotic Fund. It appears, from the same source, that many of the municipalities of Canada intended to petition the Provincial Legislature to double the amount (£20,000) originally voted and remitted, and the meetings were being held from one end of the province to the other to promote individual subscriptions in aid of the fund.

THE CAMP AT ALDERSHOTT. The excavations for the new barracks to be erected at Aldershott, as also the foundations for the huts, are now commencing. The nature of the soil shows that the site selected is very salubrious, and, consequently, most eligible for the erection of the intended permanent barracks. It has also the historical prestige of being contiguous to the spot wherein was Cæsar's camp. The contract has been taken by Mr. G. Myers, of Lambeth, and the immense range of buildings to accommodate several thousand troops, including cavalry and artillery, as well as infantry, with stabling, officers' quarters, hospitals, &c., will be most substantially built, although it is to be more remarkable for its plain and unostentatious style, and the general arrangements with regard to utility, than for architectural embellishment.

EXPLOSION OF GUNPOWDER MILLS AT DARTFORD.—On Saturday last an explosion took place at the gunpowder manufactories of Messrs. Pigou and Wilks, situated close to the town of Dartford. The mills in which the accident took place were termed "incorporating," and they adjoined each other. Both were levelled with the ground, and the entire stock of powder contained in them destroyed. A man named Miller, who was coming out of one of the mills, had his clothes set on fire, but he had the presence of mind to jump into the millpond, and thereby extinguished the flames. He was nevertheless fearfully burned, and lies in a precarious condition. Another workman was struck on the back by a portion of the machinery, and much injured.

MR. LAYARD, M.P.—In returning his acknowledgments for his election as Lord Rector of Marischal College, Aberdeen, Mr. Layard regrets his inability, from the nature of his duties as a member of the Committee of Inquiry into the State of the Army in the Crimea, to state definitely the day on which he could go to Aberdeen. In all probability the most convenient time will be during the Easter recess. Mr. Layard is the youngest rector on the roll, being but thirty-eight years of age.

GENERAL JACKSON'S SWORD. An interesting scene occurred in the United States Senate on the 26th ult. The sword which General Jackson wore through all his campaigns, and which, on his death-bed he presented to his friend and companion in arms, the late General Armstrong, was presented to Congress. General Cass, in presenting the weapon, delivered an eloquent eulogy upon the public services and private virtues of the gallant hero of New Orleans. Mr. Bell followed in a similar strain; and, at the conclusion of his remarks, offered a joint resolution accepting the sword, and thanking the family of the late General Armstrong for the gift. It passed unanimously.

CHESS.

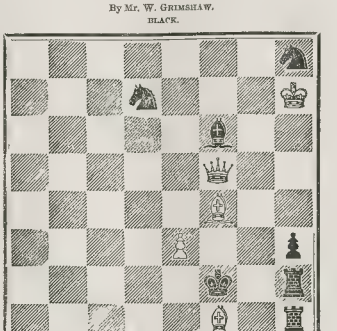
TO CORRESPONDENTS.

F. B. O., Bristol.—White cannot win by stalemate—stalemate making a drawn game only.
DERBYON, W. C. C.—Your Solution of the End-game from M. Deskan's MS. appears to be the true one.
ARACUS.—We last week gave what is considered to be the finest Four-Move Problem extant. The following, by the Rev. H. Bolton, is perhaps the best known in Three Moves.—
White: K at Q Kt sq, Q at K R 3rd, Kts at R 5th and Q B 8th; Ps at K 4th, K Kt 3rd, K 2nd, Q 6th, Q Kt 2nd, and Q R 2nd. *Black*: K at K B 3rd, Q at K R sq, Rs at Q R sq and Q R 2nd, Kt at Q Kt 2nd; Ps at K Kt 2nd, K 5th, and Q 2nd. Let amateurs endeavour to work out these masterly positions by resolve them without moving the pieces, and see as the result.
J. A. M.—The key-move to "Stella" is—K to Q B 2nd, not 3rd, as (by a misprint) it is given in our last.
SOLUTIONS OF PROBLEM No. 375, by Paul, T. J. of Hanworth, Cant., Maggs, I. V. G. M. A., are correct.
SOLUTIONS OF PROBLEM No. 376, by Davy, Glen Bridden, F. F. T., Devon, Mignon, Civis, D. D., Omega, N. B., Percy, M. P., Major, Artillerman, Miles, Alpha, C. W., Finn, P. R. of Norwich, are correct.
SOLUTIONS OF PROBLEM No. 377, by Arundel, B. A., M. P., F. T., Derby, E. H., F. R., Devreon, W. C. C., are correct.
SOLUTIONS OF ENIGMAS, by Alma, Pica, C. W., F. T., Derby, F. R. of Norwich, Devreon, E. H., W. C. C. are correct. All others are wrong.
*** The majority of our Chess communications must remain unnoticed till next week.

PROBLEM No. 578.

By Mr. W. GRIMSHAW.

BLACK.



WHITE.

White to play, and mate in four moves.

A CHESS MANUSCRIPT.

(Continued from page 203.)

"The fourth division of my MS. comprises openings and various games of Giulio Cesare Polerio, of Lanciano (a city of Abruzzo), a short distance from the Adriatic. The forty-two examples of which it is composed have evidently been brought together to form a complete collection of openings, more or less ingenious, both in attack and defence. The amateurs will judge of their value:—

WHITE.	BLACK.	WHITE.	BLACK.
1. P to K 4th	P to K 4th	7. Q B to Q R 3rd	P to Q 3rd
2. K Kt to K B 3rd	Q Kt to Q B 3rd	8. P to Q 3rd	Q B to K Kt 5th
3. K B to Q B 4th	K B to Q B 4th	9. Q Kt to Q 2nd	K Kt to K B 3rd
4. P to Q B 3rd	Q to K 2nd	10. Q to K 2nd	Castles on K side
5. P to Q Kt 4th	K B to Q Kt 3rd	11. Castles on Q side	
6. P to Q R 4th	P to Q B 3rd	White has the attack.	

"That I may not exhaust the reader's patience, I shall give but one *partie* more of G. Cesare Polerio's on this subject, and in that we shall find several interesting developments:

WHITE.	BLACK.	WHITE	BLACK.
1. P to K 4th	P to K 4th	8. Q B to K R 4th	P to K Kt 4th
2. K Kt to K B 3rd	Q Kt to Q B 3rd	9. K Kt takes Kt P	P takes Kt
3. K B to Q B 4th	K B to Q B 4th	10. Q to K R 5th (ch)	K to Q 2nd
4. P to Q B 3rd	Q to K 2nd	11. Q B takes P	Q to K Kt 2nd (a)
5. Castles.	P to Q 3rd	12. R to K 6th (ch) (b)	K takes B
6. P to Q 4th	K B to Q Kt 3rd	13. Q to K 8th (ch)	K Kt to K 2nd
7. Q B to K Kt 5th	P to K B 3rd	14. P to Q 5th—Mate.	

(Notes by the Editor.)

(a) In a variation on this move Greco plays the Q to K B sq, and then makes White combine his attack by K R to K 7th.
(b) Mr. Lewis justly extols this very clever coup.

FIRST VARIATION.

(Beginning at Black's 10th move.)

WHITE.	BLACK.	WHITE.	BLACK
10.	K to Q sq	13. P to K B 4th	P takes Q P
11. Q B takes P	K Kt to K B 3rd	14. P to K 5th	P takes Q B P
12. Q to K R 6th	K R to K B sq	15. K to R sq	(dis. ch)
	And Black must lose. (a)		

(a) Greco prolongs the *denouement*, as follows:

15)	P takes Q Kt P	16. P takes K Kt, (becoming a Q, or Q Kt)	P takes Q R
17. P takes Q (ch)	Kt takes P	18. Q takes R (ch) &c.	
(a) 16.	R takes P	18. Q to the new Q Kt	K B to Q 5th
17. Q takes R	P takes Q R (becoming a Q)	19. Q B takes Q (ch)	K takes B
		20. Kt to Q B 3rd, &c.	

SECOND VARIATION

(Beginning at Black's 10th move.)

10.	K to R sq	14. K to R sq	P takes Q Kt P
11. Q B takes P	Q to K Kt 2nd	15. P to K B 6th	Q to K Kt 3rd
12. P to K B 4th	K P takes Q P	16. P to K B 7th	Q takes Q
13. P to K B 5th	P takes Q B P (dis. ch.)	17. P takes Kt (becoming a Queen, and giving Checkmate.)	

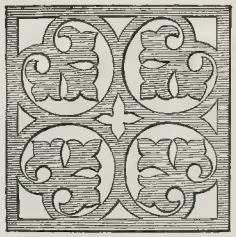
** M. Donzis is possibly not aware that this game, move for move, and diversified by many beautiful variations, is given by the Calabrese (the Lewis's excellent Translation of "Greco, pp. 12 23) *Editor.*

"Are we to consider this game as a formal condemnation of the defence which conquers us? I doubt it. The two variations occur too late in the game. After the 10th move Black may delay, but cannot avoid, defeat. Why does he not, at the 7th move, instead of playing P to K B 3rd, bring out his K Kt to that square? This, it appears to me, was the first variation which should have been proposed, because it modifies the whole attack of the opening player. As the examination of this defence may have tired my readers, I will revive and repay them, by presenting a gambit of Leonardo.

WHITE.	BLACK.	WHITE.	BLACK.
1. P to K 4th	P to K 4th	9. P takes Kt	Kt to K 4th
2. P to K B 4th	P takes P	10. Q to her 5th	Kt to Kt 4th (ch)
3. K Kt to K B 3rd	P to K Kt 4th	11. K to Kt sq	Kt takes K R
4. K B to Q B 4th	P to K Kt 5th	12. Q takes K B P (ch)	K to Q sq
5. K Kt to K 5th	Q to K R 5th (ch)	13. Q B takes P	K B to Q B 4th (ch)
6. K to K B sq	K Kt to K B 3rd (a)		
7. Q Kt to Q B 3rd	Q Kt to Q B 3rd (b)	14. K takes Kt	K R to B sq
8. P to Q 4th	Kt takes Kt	15. Q B to K Kt 3rd	Q to K R 3rd
		16. Q to her 5th	Black must lose.

(Notes by the Editor.)

(a) This variation has always been attributed to Salvio, and its occurrence in a game said to have been played by Leonardo, is certainly surprising. Leonardo was of Naples, and died before 1826, and yet we find him in this MS. practising an opening which was unknown to Salvio (also of Naples), when, in 1604, he produced the first treatise of his known

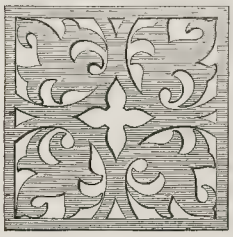


PANEL.

THE NEW PALACE AT WESTMINSTER.

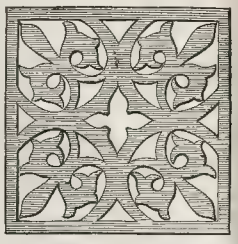
The accompanying Illustrations represent fine specimens of working in metal, which have just been completed for the New Palace of Parliament.

First is the large Chandelier, just hung in the splendid Central Hall. This beautiful piece of work and design loses much of its real size from the height at which it is suspended; being at least thirty or thirty-five feet from the ground. It has two ranges of gas-burners, each range attached to a broad concave band of twelve sides. This band is surmounted by fleurs-de-lis and crosses; on its under edge it is ornamented with a saw-cut small leaf pattern, and is supported from the centre-rod by spandril brackets, enriched with curves, finished by trefoils; below this is a massive twisted ring. There are also lateral branches spreading from the centre-stem to the outer band; between which, and binding them together, are quatrefoils forming, when looking at it from below, a rich circle, through which is seen the intersecting lines of the upper band. The corners of the concave bread band are terminated by the shafts for the gas-burners, twelve in number, each having a cluster of five narrow stems, at the ends of which are acorns, from which issue the gas-jets, making a total of sixty lights in this lower range. Below each cluster of



PANEL.

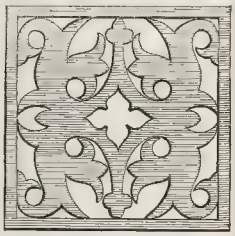
CHANDELIER IN THE GREAT CENTRAL HALL OF THE NEW PALACE, WESTMINSTER.



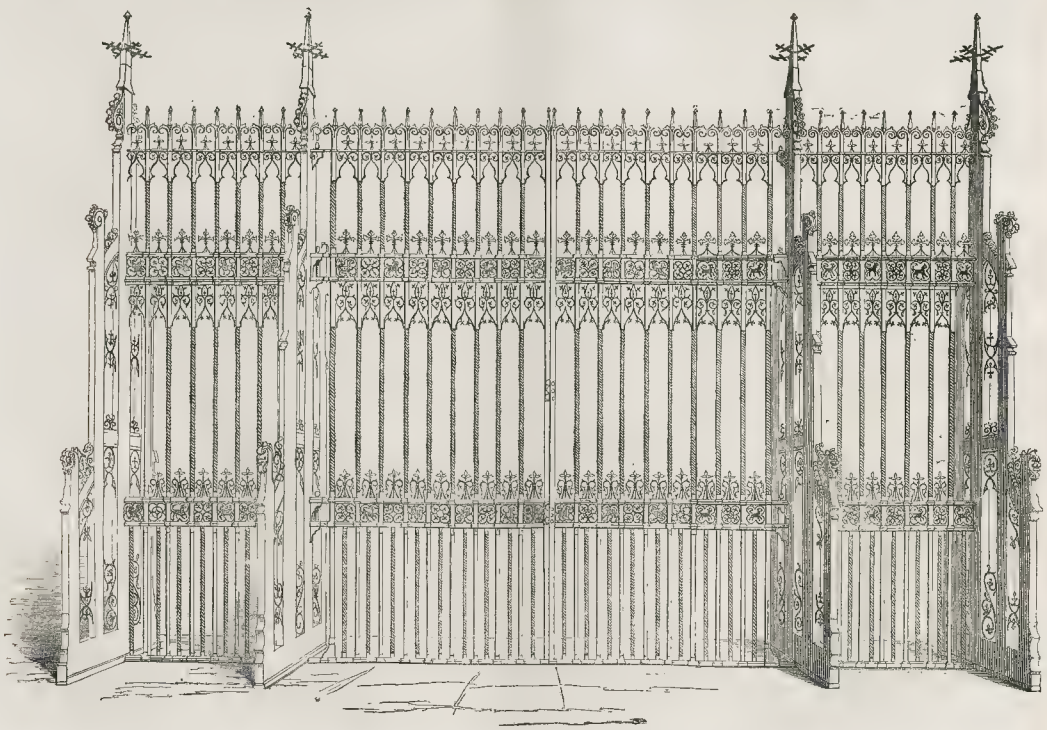
PANEL.

jets, and forming the top of the shaft, is a crown, composed of fleurs-de-lis and crosses. The band itself is ornamented with roses, between two twisted lines. The next tier of lights is very similarly formed, being supported from the centre-rod by spandrils; between each of which is a foliated crowned arch. There are but eight shafts for three branches each, on this range, making twenty-four jets of light. They are of the same pattern as in the large ring—viz., acorns issuing from a crown of fleurs-de-lis and crosses. Above this ring of lights is suspended a rich corona of fleurs-de-lis, crosses, and trefoils. Above this rise three or four smaller coronæ, some distance apart. The centre-rod is sexagonal in form, fluted, and enriched with roses up to the first small corona; after which it is circular in form, and not enriched. When illuminated by the whole number of lights—eighty-four in number—the effect is gorgeous in the extreme. The design has been made under the superintendence of Sir C. Barry, and ably executed by Hardman, of Birmingham.

Next are the gates to the Victoria Tower: they are of wrought iron, and are to be decorated, we believe, in bronze and gold. The workmanship is exquisite. There are two gates for the carriage-way, opening in the centre, and turning upon hinges, placed on the standards. These standards



PANEL.



GATES OF THE VICTORIA TOWER, NEW PALACE, WESTMINSTER.

are about fourteen feet six inches high to the top of the finial; the total width from outer standard to outer standard is twenty-one feet, independent of a small compartment or two, which fill up the space formed by the moulding at the bases of the columns. The blocks of granite into which the standards are let are two feet thick, and each weighs about six tons. The total weight of the iron-work is about twenty-one hundred weight There is great lightness of character about the appearance of these gates; they are finely finished in every part; the twisted shafts are particularly fine, and reflect great credit upon the workmen under Mr. James's direction. The entire framework was executed in Stamford-street, London, and the ornamental part at Messrs. Hardman's in Birmingham.

There are, besides the carriage gates, two wickets for the footway, so nicely contrived as to appear, when all are closed, like one entire railing. There are two bands of panels running from end to end, composed of ornaments, and badges of the Royal houses. Of the former we give Four Illustrations. It may not be amiss to observe that the person who has twisted the shafts in these gates so cleverly was formerly a cab-driver.

THE EXHIBITION OF THE NATIONAL INSTITUTION.

This, the eighth Exhibition of a society too little known, well deserves a visit, and a more extended notice than we are able to give to it this week.

It will be found to excel, as formerly, in its Landscapes a branch of the Fine Arts in which the English school has long been famous, and for which the English people have always exhibited a particular liking.

This Institution is managed by a "Proprietary," embodying many names distinguished in art, and the names of other men to be favourably known hereafter. That it was started in any way antagonistic to the Royal Academy is what few believe, and, indeed, is not the case; though its pardonable parade of its solicitor and its bankers has led many to suppose that a sneer is meant thereby at the honorary members of the Royal Academy, who figure once a year at the annual dinner, and in front of the Academy catalogues.

We agree with the critics generally that this is more than an average merit Exhibition. The "Proprietary" themselves muster strongly, and are seen to advantage. The President and Mr. M'Ian excel in figure-pieces. The elder Williams has all the fire and vigour of his youth. Mr. A. Gilbert has become additionally poetical this "Tranquillity" (No. 472) possessing qualities such as are seldom seen in more ambitious pictures, and in works from men of greater name. The younger race of the name of Williams are a little too metallic in execution, but happy withal. Mr. Edward Hargitt has an eye still more alive than formerly (and it was never dull) to the beauties of landscape nature. We would praise also Mr. Hulme—he has, indeed, a dexterous pencil. A little picture by Mr. Smallfield (No. 60) deserves more than a word of praise. It is called "Ill-Tidings, 1854;" the hands of the widow are most carefully and conscientiously painted. Miss Howitt is too pre-Raphaelite-like; she should quit such an ecentricity, for she has evidently original talent of her own. In Portraiture Mr. Bell Smith is the chief support of the Gallery.

After a very careful examination of the five hundred examples of art that are hung to advantage in these rooms, we have chosen for this week's illustration a landscape by Mr. Raven (one of his two pictures), an English scene, rendered by a very skilful hand. He calls it "The Haunt of the Fallow Deer" (No. 391). It is much in Mr Creswick's manner, and is, if we mistake not, a view in Knowle-park, that fertile source of good things for our yearly exhibitions. The composition is graceful the trees are rendered with a masterly sense of the beautiful, and the sunny glimpse on the right of the composition is a touch of beauty that extracts praise from critics the most sparing in the world of words of approbation.

"HAUNT OF THE FALLOW DEER."—PAINTED BY J. S. RAVEN, EXHIBITED AT THE NATIONAL INSTITUTION.

THE SPANISH DANCERS

(THE SENORA PEREA NENA AND SENOR NARCOS DIAZ)

IN THE NEW BALLET.

We give this week an Illustration from the grotesque ballet of "The Galician Fete," in which the Spanish Dancers have created an decided a sensation. Senor Marcos Diaz is a most valuable accession to the troupe, and does the eccentric admirably: his bashful peasant, fearfully advancing and retreating until sufficiently encouraged by the object of his affections, and then abandoning himself to the momentary impulse, and expressing his passion in the oddest manner, is an entire history—a complete love-tale—in itself. The Senora Perea Nena performs the correspondent part with that rapidity and effect of execution which stimulates the utmost admiration, and is, indeed, irresistible in its power to produce that wonder which is "involuntary praise." Both artistes still continue attractive, and are at present the chief points of interest in the management of the Haymarket.

THE SPANISH DANCERS AT THE HAYMARKET THEATRE.

The French Exhibition.—The Lords of the Committee of Privy Council for Trade, in a circular which they have just issued, state that they have had under their consideration the measures necessary for conducting the British Section of the Universal Exhibition in Paris and are of opinion that the object will be most successfully obtained through individual responsibility; their Lordships have, therefore, entrusted the superintendence over the arrangements in the Exhibition to Mr. Henry Cole, C.B.

MUSIC.

THE PHILHARMONIC SOCIETY'S first concert of this season took place at the Hanover-square Rooms on Monday evening. The programme of the performance was as follows:—

PART I.

Sinfonia, No. 7 (Grand)	Haydn.
Terzetto, "Soave sia il vento" (Così fan tutte), Madame Clara Novello, Madame Weiss, and Mr. Weiss	Mozart.
Dramatic Concerto, Violin, Herr Ernst	Spohr.
Scena, "Ocean, thou mighty monster" (Oberon), Madame Clara Novello	Weber.
Overture, "The Isles of Fingal"	Mendelssohn.

PART II.

Symphony in C minor	Beethoven.
Duett, "O, my Father" (Der Vampyr), Madame Weiss and Mr. Weiss	Marschner.
Overture (Zauberflöte)	Mozart.

From this it will be seen that the society have adhered to their general practice of gratifying the cultivated taste rather than the appetite for novelty The selection consisted of well-known pieces; but they were among the grandest and most beautiful productions of the art. The only novelty of the evening was the new conductor of the orchestra—Herr Ludwig Wenzel—a musician whose character and merits have been made the subject of violent controversy—a civil war, indeed -among the artists and *dilettanti* of Germany. His arrival in England has consequently excited no small interest in our musical circles His appearance at the head of the Philharmonic band enabled the public to judge only of one thing—his capacity *as a chef d'orchestre*; a point which that one evening settled beyond all question. Though the whole orchestra—till the rehearsal, two days before—were utter strangers to him, yet that single rehearsal had established so thorough an understanding between them, that, at the concert, every piece was performed with a clearness, spirit, and delicacy which we have never heard surpassed; and this was the more remarkable, as his manner of marking the time, and his readings of many passages, differ materially from those of his predecessor. The soft and subdued tone with which he made the orchestra accompany the vocal music was especially remarked by every one present. So convinced were the audience of the admirable manner in which he had acquitted himself that, at the conclusion of the concert, he was saluted with repeated rounds of applause. It is sufficient to add, in regard to the solo performances, that Ernst in his concerto showed that in tone and expression he is still without a rival; that Clara Novello sang Weber's glorious scena as she alone can sing it; and that Mr and Mrs. Weiss did ample justice to Marschner's very dramatic and effective duet.

THE THEATRES.

PRINCE'S.—At this theatre the elegant is preferred to either the subtle or profound, as best suited to a fashionable audience, and finds in Mr Keen an "arbit r" in all respects qualified for the office of leading their taste in this direction. "A Game of Romps," produced on Monday, is a traduction by Mr. J. M. Morton, from the French of Duvert and Lausanne, a young widow (Miss Heath); and last, not least, *Jeannette*, a waiting woman (Miss Murray). Here is, indeed, a "bevy of fair ladies," calculated to make a game of romps not only interesting but charming, in order to discover whether *Julien* loves *Violet*, and thus to defeat the plans of his tyrannical aunt. Acted by such artistes, we need not add that the piece was entirely successful, and pleasingly terminated the amusements of a gay vaudeville evening.

ADELPHI.—Two new farces have been produced at this theatre —one with eminent success, and one with an equivocal result. The name of the former is "Beauty Unadorned"—a clever adaptation of "Le Chapeau d'un Horlogr:," a Gymnase piece, in one act, written by Madame Girardin; the plot of which turns upon the terror suffered by a housemaid in consequence of having accidentally broken a magnificent clock, and the means she takes to conceal and repair the injury. This terror, which is excessive, commences the action, and receives full expression long before the cause of it is explained. Mrs. Keeley, as the unfortunate domestic, threw into the expression a tragic intensity which, while thoroughly artistic, was extremely painful. It was a good ground for the lighter interest which glittered the more from the contrast. Her master, *Major Militaires Mohawk* (Mr. C. Selby), irascible and vacillating, is utterly confounded by her strange conduct; and, being somewhat jealously inclined, mistakes the clock-maker for a foreign Count whom he suspects of loving his wife. The but of poor *Mainspring*, which is left on the table, becomes the occasion of much excitement; and the nervous agitation displayed by the girl to get it out of the way only serves to increase the confusion. The acting of Mrs. Keeley throughout all these perplexities, is wrought, and, in fact, we may say, her *Betty Martin* may be pronounced equal to any *Lady Macbeth* that ever thrilled an audience with irresistible emotion.

The second piece, which was produced on Saturday, also proceeded on the element of terror, not exhibited, however, by Mrs. but by Mr Keeley, as a certain *Dr. Bile*, whose daughter is about to be married, and who fears that an amour of his may be disclosed to his wife, whence the title of the piece, "I'll tell your Wife." It may be mentioned, by the way, that the little drama is of French origin. "Les Maquises de la Fourchette"—a trifle by MM. Marc Michel and Choler. The scene takes place in an hotel, and the situation is realised to the eye by numbers and writing on the doors of different apartments. In one of these *Dr. Bile* deposits a mysterious parcel; in an adjoining one *Paul* (Mr. Leigh Murray), his intended son-in-law, conceals another. Afterwards, the two parties meet in the common room, and endeavour to get rid of each other's company, but at last are compelled to dine together, each seeking to keep his own secret, and to send his fellow partner a plateful of food on the sly. *Dr. Bile* now resolves that *Paul*, who could be guilty of such an indiscretion the day before his wedding, shall not be his daughter's husband, and scrawls on door No. 8 "You shan't have my daughter," The latter is seen responding on Paul's writing on door No. 9, "I'll tell your wife." At this point Mr. Keeley's terror becomes magnificent. The ladies prove ultimately to be *Mrs.* and *Miss Bile*—a concession made to English propriety. It would, however, seem in vain, as the audience, having laughed heartily up to a certain point, suddenly exhibited a change of mood and—hissed. The management, however, appear to demur to this proceeding, as the piece was repeated on Tuesday.

HAYMARKET. "The Secret Agent," founded on a German drama by T. W. Heslander, as it first appeared in an article in *Blackwood*, was produced on Saturday. The piece is in two acts, by Mr. Stirling Coyne, and is constructed with his usual neatness and skill. The moral of the piece is unexceptionable: it is, indeed, a political lesson which is enforced. The argument is the undue influence maintained by a *Duchess*, *Duchess* (Mrs. Frynton) over her cousin, *Duke Victor* (Mr. Howe), who neglects to exercise the authority over the state to which he is entitled;—in a word, the *Duke* reigns, but the *Duchess* governs. The young *Duke* finds time hang heavy on his hand, from very indolence; but he is roused by the *Count Steinhausen* (Mr. Caroline White), who proves to him that various abuses under the cover of his name had crept into the practice of public affairs, and that a marriage between himself and a certain Princess had been settled for him by his intriguing mother without his knowledge. Not to compromise those concerned, the *Count* has had the information from his "Secret Agent," whose arrival he is hourly expecting. This fiction, once set on foot, is kept going until it becomes a puzzle to the whole Court, and almost drives *Count Steinhausen* (Mr. Howe), the *Duke's* Premier, mad; and induces the *Baron Standion*, (Mr. Compton), the Grand Chamberlain, to assume the disguise of Mephistophales at a masked fête, and which disguise is responded to by the *Count* appearing in the attire of a female—the costume of a Spanish dancer being preferred by Mr. Buckstone, whose occasional exits obstreperous are tolerant. In the end these worthies become mutually convinced that the other a himself the Secret Agent, and endeavour to get each other inprisoned in the Castle of Spilsberg. A *Count Oscar*, also, (Mr W. Farren) has a duel with the Secret Agent that is, the *Duke* himself in a domino and mask, on account of *Ernestine*. These perplexities, however, are solved by the *Dowager* wisely perceiving that her government has expired, and surrendering to the necessity of retiring from its cares. The *Duke*, of course, weds *Ernestine*. Here are enough incident and bustle for a two-act drama. The interest is well maintained, and the idea is decidedly ingenious. The acting was capital, and altogether the p rformance" is suft for a good run."

THE season at SADLER'S WELLS closes with this week, and Mr. Phelps on Wednesday accordingly took his benefit, performing on the occasion *Cardinal Wolsey*, in "Henry VIII," and, for the first time, as an example of his power in eccentric comedy, the part of *Bailie Nicol Jarvie*, in "Rob Roy." His skill in such characterisations is extraordinary. We hear that Mrs. Lovell has written a new five-act play, which has been accepted at the Haymarket, the principal character being intended for Miss Cushman.

GRISI AND MARIO'S TOUR IN AMERICA. These famed artistes are now in London, on their way to Italy, after terminating their six months' engagement in the States, during which they received £17,000 with all travelling expenses paid in addition. The operas in which they appeared were Donizetti's "Lucrezia Borgia," Bellini's "Norma," "Sonnambula," and "Puritani;" Rossini's "Otello," "Barbiere," and "Semiramide;" and Mozart's "Don Giovanni." The cities they visited were—New York, Boston,, and Philadelphia. Grisi sang in all seventy-five times. They sang twice for the public charities in New York, realising more than 10,000 dollars for the poor. *Carte blanche* was offered by the speculators, who were represented by Hackett the actor, to renew their engagement and continue their tour to the Southern States. Their farewell appearance was at New York on the 6th of February.

ROYAL GALLERY OF ILLUSTRATION. The following distinguished persons have recently visited the Diorama of the "Events of the War," viz.:—His Grace the Archbishop of Canterbury, the Marquis of Ely, the Marchioness of Downshire and party; the Earl of Malmesbury, Earl de Grey, the Earl and Countess of Fitzwarine, the Countess of Jersey, Lord of Cardigan and party; the Countess of Granville, the Countess of Kinmoul and party; Sir G. Wombwell, Sir G. Leith, Sir John Walsh, General Fane, Major-General Carnagie, Major Gage; Colonels Buckley, Macdo ald, Bruce, Michel, &c.

SPANISH BIGOTRY.—The hopes which the last revolution in Spain had awakened, that the bigotry and intolerance of that Government had been their day, are, it seems, doomed to be disappointed. The printing of the Protestant Bible, which had been commenced at Madrid, has just been prohibited by the authorities; while demonstrations are made in the northern provinces of the country against the part of the Constitution which sanctions liberty of worship, so much for the progress of civilisation in Spain!

THE LATE FROST ON WINDERMERE LAKE.—The late severe frost having disappeared, it may be worth while to record a few circumstances which occurred, as they are not likely to happen again for years to com A few of the most remarkable are as follows:—During the severe week—from the 15th to the 23rd of February—a lady and gentleman skated safely from Newbridge to Bowness without any obstruction whatever (except about ten yards at the ferry crossing, kept open). Several sportsmen, after some wild scrapes which were on the ice, went down the centre of Miller Ground Bay, where the ice was very strong. A lady, quite alone, crossed over direct from Wray Castle to Calgarth, where the water is 220 feet deep! One gentleman skated right down from Waterhead to the other end of the lake at Newby-bridge; and a young woman walked over from Bowness direct to the wood, landing at Belle Grange, where no one had previously been, and returned the same way; and, finally, everything required by residents on the opposite side was taken over, not in boats, but on the ice, in wheelbarrows!

THE CONSERVATIVE LAND SOCIETY.—The tenth quarterly general meeting of the members of this society was held at Exeter-hall on Wednesday, the 14th inst.; Viscount Bancleugh in the chair The quarterly report of the committee stated that the result of the Old Ford allotments (on the 24th of January) must be regarded as of paramount importance. No less than 101 out of 187 lots were taken, amounting to £664 14s. 6d. The amount actually paid is £715. The Retford estate, in Nottinghamshire, was allotted at the same date, and the Alford estate, Lincolnshire, and Malvern, Worcestershire, will be allotted on the 30th of April. Building had been active despite of the perilous winter. On St. Margaret's, building contracts to a considerable extent had been entered into; and on the Brighton estate, the progress is likewise considerable; on the latter the minimum ground-rent being ten per cent. The accounts showed an increase on the receipts of the quarter. The total land sold during the operation of the society amounted to £102,984.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

There has been great inactivity in the Consol Market this week, so far as actual money business is concerned; yet, in the absence of any fresh reference to the Eastern question, are regarded in a favourable light, and as commercial matters here as well as in the United States and on the Continent, the quotations have had an upward tendency. Money stock continues extremely scarce, and, so long as such is the case, any great decline in price cannot be anticipated. The steady accumulation of bullion in the Bank of England, the large imports of gold from Australia and the United States, and the abundance of unemployed capital, added to the favourable nature of foreign exchanges, have, no doubt, tended to strengthen the Consol Market, and it is pretty generally considered that, in the event of matters in this respect continuing to improve, the present affords a most favourable opportunity for raising a loan in the Stock Exchange; and, further, that £30,000,000 might easily be raised without having any great influence upon the market value of other nation securities.

In the discount market, money has been abundant; but the demand for it has not been extensive.

The imports of the precious metals have amounted to £400,000 from Australia, and £107,724 from New York. The shipments have been on a very limited scale.

The Consol Market, on Monday, was flat. The Three per Cents varied from 92½ up to 92¾ for money, and 93⅛ to 93 for the account. Long Annuities were 4¼. India Bonds 3s. to 2s. discount. Exchequer-bills, 6s. to 5s. prem. Exchequer-bonds marked 99¾. On Tuesday a slight advance took place in the the quotations, the highest figure for the Three per Cents being 93¼ for Account, and 93⅝ for Account. India Stock was 254 to 257. Long Annuities, 4 5-16ths. Exchequer-bills, 6s. to 8s. prem.; Exchequer-bonds, 99¾. On Wednesday the Three per Cents were 92⅞ to 93⅛; Long Annuities, 4¼; India Stock, 227; India Bonds, 1s.; Exchequer-bills, 6s. to 8s. prem. The Consol Market was steady, and the Three per Cents were done at 93⅛ to 93⅜ for Money, and 93⅜ to 93½ for Account. India Stock was 227; India Bonds, 1ls. to 14s.; and Exchequer-bills, 8s. to 9s premium.

On the whole the Foreign-house trade has been steady. Annexed are the leading quotations. Brazilian Five per Cents, 100¾; Chili Seven per Cents, 93; Chilian Six per Cents, 104; Ecuador Bonds, 4; Mexican Three per Cents, 20½; Peruvian Four-and-a-Half per Cents, 79 ex div.; Russian Five per Cents, 103; Ditto Four-and-a-Half per Cents, 100; Ditto five per Cents, 100; Spanish Three per Cents, 37; Ditto New Deferred, 18½; Turkish Six per Cents, 79½; Dutch Two-and-a-Half per Cents, 59½; Dutch Four per Cents, 96; Belgian Four per Cents, 89½. A New Bavarian Loan (4½ per cent) is announced for £550,000.

Joint-Stock Bank Shares have been very firm, and prices generally have ruled steady. Australasia have realised 91; Colonial, 74½; English, Scottish, and Australian Chartered, 15¾; London Chartered of Australia, 20¾; Ditto, New, 6; London Joint Stock, 27; London and Westminster, 41; Oriental, 40; South Australia, 39; Union of Australia, 65¾. In miscellaneous securities, only a moderate business has been doing: Berlin Waterworks have marked 3; Canada, 12½; Ditto, Government Six per Cent, 103½; Crystal Palace, 3¾; Ditto, Preference, 3¾; London Docks, 21; Ditto, New, 9; Mexican and South American, 6¼; Peel River Land and Mineral, 2¾; Peninsular and Oriental Steam, 51¾; Royal Mail Steam, 61¾; Van Diemen's Land, 13. Canal Shares have been dull, and Railway Shares only a limited business has been transacted:—Berlin, 3; Kent, 78¾; Southwark and Vauxhall, 80¾; New River Company, 56; West Middlesex, 91. The market for Gaslight and Coke Companies' Shares has been dull—Brentford have been 20; Brighton, 14; Equitable, 29¾; Imperial, 99; Ditto, New, 15; Ratcliff, 7; Shitty Chelsea, 11, Ditto, Ditto, 10½; Westminster Chartered. Insurance Companies Shares have been in request:—Globe, 12; Guardian, 5¾; Imperial Life, 18; Law Life, 55; Pelican, 46; Provident Life, 39. Re Life, 67¾. Bridge Shares have marked the following quotations:—Hungerford, 13; Waterloo, 3¾; Ditto, Old Annuities of £8, 30; Ditto, New, of £7, 27¼; Vauxhall, 23

In the value of Railway Shares very little change has taken place, and the business done in these Securities has been but moderate. The following are the official closing prices on Thursday:

ORDINARY SHARES AND STOCKS.—Ambergate, Nottingham, and Boston, 4¾ ex div.; Caledonian, 64¾; Chester and Holyhead, 12¾; Dublin and Belfast Junction, 41 ex div.; Eastern Counties, 11¾; Great Northern, 88 ex div.; Ditto H Stock, 124¾ ex div.; Lancaster and Carlisle, New Thirds, 10 ex div.; Lancashire and Yorkshire, 79¾ ex div.; London and Blackwall, 8; Ditto, Four per Cent Preference, 93; London and North-Western, 99½; London and South-Western, 85; Manchester, Sheffield, and Lincolnshire 24¾; Ditto, Quarter Shares, No. 1, 8; Midland, 69¾; North British, 29¼; North-Eastern, Berwick, 73¾; North and South-Western Junction, 9¾; South-Eastern, 61¾; Waterford and Kilkenny, 4¾.

LINES LEASED AT FIXED RENTALS.—London and Greenwich, 13; London, Tilbury, and Southend, 10¾; West Valley, 31¾.

PREFERENCE SHARES.—Great Northern Five per Cent Scrip, 2¾; London and Brighton Five per Cents, 114; Ditto, New Five per Cents, 113; Midland Consolidated, Six per Cents, 134½; ditto, £5 Four per Cent, 84; Oxford, Worcester, and Wolverhampton Six per Cent, 108.

FOREIGN.—Antwerp and Rotterdam, 8¾. Belgian Eastern Junction, 1¾; Bombay, Baroda, and Central India scrip, 3 prm.; Dutch Rhenish, 3¼; East Indian Extension, 11¾; Grand Trunk of Canada, A issue, 6¾; Hamilton and Toronto, 20½; Northern of France, 34¾; Paris and Lyons, 38; Royal Danish, 19¾.

Mining Shares have been dull. The principal dealings have been in United Mexicans at 4¾.

THE MARKETS.

COAL EXCHANGE, March 13.—The show of English wheat in to-day's market was very limited as to the parcels of fair qualities was very scarce, as a consequence the trade opened on Monday last at about 4s to 5s per quarter dearer than on the previous Monday for fine qualities, at full quotations. We were largely supplied with foreign wheat, and sales progressed slowly, on former terms. In malt very little business was transacted to-day, at full prices. Fine barley, and grinding qualities, were in request to-day at late rates. Oats were slightly dearer. The flour trade was firm, and, in some instances, Norfolk households produced 2s. per sack more money.

March 14.—We have had a steady demand for all articles of grain, to-day, at fully Monday's prices.

English.—Wheat, finest red, 76s to 78s; ditto, white, 78s to 85s; fine, 72s to 75s; Norfolk and Suffolk, red, 65s to 68s; ditto, white, —s. to —s.; fine, 72s. to 74s; grinding barley, 27s. to 28s. Malting ditto, 30s. to 36s.; malting ditto, 32s. to 33s.; Lincoln and Norfolk malt, 64s. to 68s.; brown ditto, 61s. to 64s., Kingston and Ware, 68s. to 70s.; Chevalier, 70s. to 74s.; Yorkshire and Lincolnshire feed oats, 21s. to 23s.; potato ditto, 27s. to 29s., Tonghal and Cork, black, 23s. to 25s.; ditto, white, 25s. to 26s.; lisk beans, 35s to 36s.; grey peas, 36s. to 38s. tick beans, 34s to 35s.; white, 35s. to 36s.; boilers, 37s to 40s. per quarter. Town-made flour, 60s to 63s.; suffolk, 48s to 49s.; Stockton and Yorkshire, 46s. to 50s. per 280 lbs.; American flour, 36s. to 42s. per barrel.

Seeds. We have met a better feeling in the demand for clover seed, at an advance of 2s per cwt Trefoil is 2s to 4s higher. Other seeds command full quotations. In cakes, only a limited business is doing.

Linseed, English, sowing, 68s. to 70s.; Baltic, crushing, 58s. to 62s.; Mediterranean and Odessa, 56s. to 58s.; brimpseed, 48s. to 50s. Coleseed, new, October, 70s. to 74s. per last. Rapeseed, new, 34l. to 36l.; white, 36l. to 38l.; tares, 9s. to 11s.; rapecake, 7l. 5s. to 7l. 10s. per ton. English rapeseed, 42l. to 44l. per last of ten quarters. Linseed cakes, English, 12l 5s. to 13l 0s.; foreign, 11l 10s. to 12l 15s.; Hempcake, 6l. 15s. to 7l. 5s. per ton. Canary, 60s. to 70s. per quarter. Red clover seed, new, 70s. to 78s.; old, 72s. to 80s. ext cwt.

Provisions. The prices of wheaten bread in the metropolis are from 9d. to 10d.; of household ditto, 8d to 9½d. per four-pound loaf.

Tea.—Our market has become firm, and a steady business is doing, at very full prices Common congous is being sold at 9½d. per lb

Sugar.—The demand for most kinds of raw sugar is steady, yet some difficulty has been experienced in maintaining prices. Foreign refined have commanded extreme rates. Refined goods are tolerably firm, at 62s. 6d. per cwt. for brown lumps and 63s to 63s. for bonded ditto. The total clearances to the 10th inst. was 1,37,628 cwts against 1,40,327 ditto, in 1854

Coffee.—The general demand is steady, and, in some instances, the quotations have an upward tendency. Good ord inary Ceylon is sold at 67s to 67s 6d per cwt.

Spices.—The spice market is firm, but with moderate business doing.

Provisions. There is a fair inquiry for most kinds of Irish butter, at full prices. Foreign qualities move off slowly, on somewhat easier terms English butter is lower, to purchase. Fine Irish pork is firm. Hams and bacon are in fair request. Lard is dearer. The bacon market is steady, and the quotations have an upward tendency. In other kinds of provisions very little doing.

Tallow.—Our market is dull, and we have sellers of P.Y.C., on the spot, at 47s. 9d. to 48s. 3d. per cwt. Rough fat is 2s. 7½d. to 2s. 9d. per 8lbs.

Oils.—Linseed oil, on the spot, is selling at 28s. 3d. to 31s. Pale rape is sold at 38s. 6d. to 39s.; brown, 36s. 6d. per cwt. Turpentine is dearer. Linseed, 34s. 6d.; nutria, 33s. to 36s. per cwt

Hops.—There is more doing in rum, and prices have an upward tendency. Proof Leewards, 2s. 3d. to 2s. 4d.; East Indis, 2s. to 2s. 1d. per gallon. Brandy moves off slowly, at late prices. Malt spirit is 9s. 3d. per gallon.

Coals.—Eden Main, 18s. 6d.; Belmont, 17s. 3d.; Haswell, 20s.; Hetton, 20s.; Hilton, 20s.; Lumbton, 19s. 6d., Stewart's, 20s.; Kelloe, 17s. 3d.; Chanel, 18s. per ton.

Wool.—Market quiet. Monday last, £2 15s. to £3 0s. for Super ditto, £3 6s. to £3 15s.; and strips, £3 5s. to £3 10s. per load

Hops.—We have a moderate demand for all kinds of hops. In price very little change has taken place. The imports from abroad have fallen off.

Wool.—All kinds are very dull, and, to effect sales, very rates must be submitted to

Potatoes.—The demand is heavy, at from 80s. to 120s. per ton.

Smithfield.—The general demand has been steady. In pric s no material change has taken place.

Beef, from 3s. 6d. to 5s. 0d.; mutton, 3s. 6d. to 5s. 2d.; veal, 4s. 2d. to 5s. 4d.; pork, 3s. 6d. to 4s. 6d. per 8 lbs to sink the offals.

Newgate and Leadenhall.—Each kind of meat has been in moderate request, as follows:—Beef, from 3s. 8d to 4s. 6d.; mutton, 3s. 6d. to 4s. 8d.; veal, 3s. 10d. to 4s.; pork, 3s. 0d. to 4s. 4d. per 8 lbs. by the carcase.

ROBERT HERBERT.

TUESDAY, MARCH 13.

DISPATCHES FROM SIR E. LYONS.

Despatches from Sir E. Lyons, bearing date Feb. 6 and 24, have been received at the Admiralty. By them it appears that the Naval Brigade was in excellent health, all symptoms of scurvy having disappeared; and that it was actively engaged in carrying shot to the batteries, and in getting up slops and provisions to the Camp. Several intentional sorties had been made by the French. The enemy continued augmenting his defences, and firing on our working parties during the day. The weather which, for the few previous days, had been severe, was at the date of the last despatch remarkably fine.

WAR-OFFICE, MARCH 13.

7th Foot: Lieut.-General S. B Auchmuty to be Colonel

14th: Lieut.-General Sir F. Ashworth to be Col.: 1

1380, 1381, 1382, 1383, 1384, 1385, 1386, 1387, 1388, 1389, 1390, 1391, 1392, 1393, 1394, 1395, 1396, 1397, 1398, 1399, 1400, 1401, 1402, 1403, 1404, 1405, 1406, 1407, 1408, 1409, 1410, 1411, 1412, 1413, 1414, 1415, 1416, 1417, 1418, 1419, 1420, 1421, 1422, 1423, 1424, 1425, 1426, 1427, 1428, 1429, 1430, 1431, 1432, 1433, 1434, 1435, 1436, 1437, 1438, 1439, 1440, 1441, 1442, 1443, 1444, 1445, 1446, 1447, 1448, 1449, 1450, 1451, 1452, 1453, 1454, 1455, 1456, 1457, 1458, 1459, 1460, 1461, 1462, 1463, 1464, 1465, 1466, 1467, 1468, 1469, 1470, 1471, 1472, 1473, 1474, 1475, 1476, 1477, 1478, 1479, 1480, 1481, 1482, 1483, 1484, 1485, 1486, 1487, 1488, 1489, 1490, 1491, 1492, 1493, 1494, 1495, 1496, 1497, 1498, 1499.

At 36th Drawing, at the Offices, 33, Norfolk-street, Strand, to be held for the 30th April 1855, the following numbers:—

The allotment of the Malvern Hills Estate, West Worcestershire, and of the Penge Estate, North Lincolnshire, will take place on Saturday, April 28th, at the Office.

For prospectuses as to the mode of taking Shares, either as an eligible investment for capital and savings, or as a means of obtaining a suitable allotment for second-rate groundrents, and for Forms of Application for Shares of Building Allotments, Address, apply to the Secretary. Plans of the Society's Estates in various counties may be had (price 2s. coloured, or 1s. plain), by post, 6d. extra. Shares are payable by small monthly subscriptions, or in advance, and are withdrawable at par at a few days' notice.

CHARLES LEWIS GRENSHEN, Secretary

FOREIGN VINEYARD ASSOCIATION.—(Capital £200,000.)

President—His Most Hon. Lord MARCHAM.

A Joint-Stock Company has been formed for the purpose of purchasing private families and establishments with first-rate wines at a large reduction on the usual quotations, at really reasonable prices that is, from 25 to 50 per cent under those of wine-merchants. Examples:—Best Champagne, per dozen, 24s. per three-dozen case, instead of £36 18s.; Claret, finest Chateau H. Margaux wines, at £7 4s., instead of £10 10s.; Sherry, at 20s., 30s., and 40s., in lieu of 36s., 48s., and 60s.; Ports, same rate, and the finest pale or brown Cognac, 20s. per gallon, sent free by T. W. STAPLETON, Esq., Secretary and Manager, 10, King-street, Regent-street, for prospectuses and detailed price lists. The principal clubs in London are supplied, and wines sent out duty free. Samples forwarded first if desired. Terms, cash or reference.—And at 6, Boulevard des Italiens, Paris

NEW EQUITABLE ASSURANCE COMPANY.—BONUS.—Policies effected on the PARTICIPATING SCALE before the 31st of DECEMBER will be entitled to a SHARE in FOUR FIFTHS of the PROFITS, to be Divided 1 at the close of the present Year. JOHN THOMSON, Secretary

16, Strand, Charing-cross.

UNIVERSAL LIFE ASSURANCE SOCIETY, 1, King William-street, City, London. Established 1834. Empowered by Special Act of Parliament 5 William IV. cap. 20. Trustees—HENRY WILLIAM KLUGE, Chairman; JOHN STEWART, Esq., Deputy Chairman. The successful operations of the Society since the Bonus for the last seven years to declare the premiums on policies entitled to participate in profits on an average more than forty per cent, and during the last four years a reduction of twenty per cent has been declared. Weekly Board, day, Thursday, one o'clock. MICHAEL ELIJAH IMPEY, Secretary.

THE NORWICH UNION REVERSIONARY INTEREST COMPANY.

Office, 23, Lincoln's-inn-fields. Established 1836

This Company has for its object the purchase of every description of reversionary property, and the granting of loans thereon, for the purpose of effecting a principal sums, or grant immediate annuities, on the security of reversionary property and life interests.

The Directors have the honour to notify that the capital of the Company affords the peculiar advantages of paying a liberal rate of interest, and securing them from all personal liability.

The Shares are £10 each (paying a dividend of £5 per cent per annum, payable half-yearly, free from all deductions on account of Income-tax), and may be paid for either in full, or by instalments of £5 at intervals of not less than six months

Every information may be obtained upon application at the Company's Office. By order of the Board,

March, 1855. H. NORRIS, Secretary.

MEDICAL, INVALID, and GENERAL LIFE OFFICE, 25, Pall-mall Established 1841.

At the THIRTEENTH ANNUAL MEETING, held on the 30th November, 1854, it was shown that there had been issued no less than 2130 Policies, assuring the sum of £1,037,000, and yielding Annual Premiums amounting to £30,118.

By the Annual Report for 1853 it appeared that the number of Policies then in force was 3434, insuring £1,437,500, and yielding an income of £52,297.

The Number of Policies now in force is ... 5348
The Amount Insured is ... £2,796,077 0s. 2d.
The Income from Premiums is £100,519 9s. 1d.

Two Bonuses have been declared (in 1846 and 1853), adding nearly two per cent per annum on the average to sums assured, and by which a Policy of £1000 issued in 1813 on a healthy life is now increased to £1260.

Profits divided every five years

Assurances are effected at home or abroad on either healthy or diseased lives, at as moderate rates as the most recent data will allow.

Policies issued free of stamp duty, and every charge but the premiums

Agents wanted for vacant places

Prospectuses, Forms of Proposal, and every other information, may be obtained of the secretary at the Chief Office, or on application to any of the Society's Agents in the country

JOHN GIBSON, Actuary
G. DOUGLAS SPENCER, Secretary

THE FAMISHING HIGHLANDERS.—Contributions are earnestly requested to be made to the ROYAL PATRIOTIC and INDUSTRIAL SOCIETY of SCOTLAND'S account, at Messrs. Smith, Payne, and Smith's, to Messrs. Hoare and Nevill, Rivington, Watrous-place; to Sir Charles Forbes, Bart., Clapham; to George Bass, Esq., 18, Parliament-street, or, at Mr. Charles Road, at the Society's Highland Industry D pot, 195, Piccadilly, the aid of the clergy on the Fast-day is earnestly solicited. "Deal thy bread to the hungry." N.B. A large stock of warm, soft, and very durable knitted hose, suitable to the Baltic and the Crimea

ST. MARY'S HOSPITAL, Cambridge-place, Paddington.—Notice is hereby given, that the ALDERMAN DUNKIN is and of the Queen's Patronage to the Hospital, is appointed to take place at the LONDON TAVERN, on WEDNESDAY the 2nd of MAY, when the Right Hon. the Earl of CARDIGAN has promised to preside. Gentlemen willing to become Stewards are requested to announce their intention to the Secretary forthwith.

ROBT. J. MORAN, Secretary

ST. MARY'S HOSPITAL, Cambridge-place, Paddington.—EXETER-HALL.—Her Most Gracious Majesty QUEEN and her Royal Highness PRINCE ALBERT have kindly signified their intention of honouring the SECOND GRAND PERFORMANCE by the NEW PHILHARMONIC SOCIETY, on WEDNESDAY, MARCH 28th, for the BENEFIT of St. MARY'S HOSPITAL, Paddington, which will be performed, among other Works, Mendelssohn's Concerto for the Pianoforte in G minor, by Miss Arabella Goddard; and Beethoven's Symphony in C minor. Conductor, Dr. Wylde. Stall 10s. 6d.; Reserved Seats, 10s. 6d.; to be had at Messrs. Cramer, Beale, and Co.'s, 201, Regent-street; at Messrs. Keith, Prowse, and Co.'s, 48, Cheapside; and at the Hospital

ROYAL WESTMINSTER OPHTHALMIC HOSPITAL, CHARING-CROSS.

I am sorry to be obliged to repeatedly entreated a support of this Charity, as the number of out-patients has increased to 1500 in the year. I have the kindest wish to make every exertion to relieve the poor; but I cannot do more than I have done, unless they look for it to the public. I have not the means to meet the heavy demands which are daily made upon me. I am obliged to say that I cannot relieve Mr. Farrant at the present moment.—Mr. Farrant is a poor man, and has a large family.

CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, Established 1855. Kingston-on-Thames. Under the patronage of the Queen, the Prince Albert, and other members of the Royal Family.—CONTRIBUTIONS are earnestly solicited by the Chapel-place South, South Audley street; or by

EDWARD FREDERICK LEEKS, Hon. Sec

Offices, Palace Chambers, St. James's-street, and 2, Charlotte-row, Mansion-house

The Clergy are specially requested to consider the claims of this National Charity

SCRIPTURE READERS TO THE SEAT OF WAR

SOLDIERS' FRIEND and ARMY SCRIPTURE READERS' SOCIETY.

PATRONS

The Right Hon. the Lord it Grosvenor, M P
The Right Hon. the Earl of Carlisle, K.G
The Right Hon. the Earl of Shaftesbury, K.G
The Viscount Ebrington, M P
President—The Rev. Dr. Marsh.

Offices, 14 and 15, Exeter-hall, Strand, London.

The Committee feel it a duty to themselves, and to the Christian public to state, that, encouraged by the liberality of the friends of the soldier, they have considerably extended the line of their operations; and from the deeply-interesting reports received, which have been regularly printed, and widely circulated), which they are constantly receiving from their agents, it is evident that the Lord is working by them and with them, and thus crowning their needful and arduous labours with a large measure of success. Hence they are encouraged and emboldened to make a fresh appeal to the continued sympathies and prayers, and to the increased liberality of their supporters in this cause.

For the spiritual and eternal benefit of the brave and beloved defenders of our country (in humble dependence on the Divine blessing), there are now actively employed under the auspices of this Society nineteen Scripture Readers. And the Committee would entertain the hope that the number may yet further be augmented if this appeal, so literally responded to, prove that the people of England are not behindhand with the wife, and yet widening field of labour which is presenting itself as opening

The following are the several departments of labour occupied by the Christian agents:—(1) Our agent is actively and usefully employed in visiting the barracks in London, Westminster, and the surrounding military depôts. (2) He is engaged among the militia in Middlesex and vicinity, who will also visit the wives and families of the soldiers. It is also the intention of the Committee, as soon as possible, to station agents in other parts of the kingdom. (3) Another agent is actively employed in the Royal Dockyards, Portsmouth, Chatham, and Sheerness. (4) Another is at Deal, in Dorsetshire occupied amongst the militia, one in the West of England, and a fourth, just appointed to the Scottish prisoners at Plymouth and elsewhere, one in Scotland, and one in Ireland.

On foreign service, there are eight at Constantinople and Scutari. Two of these are clergymen of the Church of England, and whose chiefly directs his attention to the spiritual instruction of the Protestants in the Female Orphan Asylum at Scutari. Two of the Scripture Readers have much to engage in stating, that they have also been appointed a Scripture Reader to labour amongst the soldiers and military of Malta, under the auspices of the Rev. W. Hare the garrison chaplain.

A series of small and interesting publications, especially adapted to the thoughts and habits of the soldiery, have been prepared, and gratuitously and widely circulated by the Society's agents in the spheres of labour, at home and abroad. Also, an interesting magazine, entitled the "Sentinel," is published monthly, and circulated gratuitously circulated and cordially accepted by the soldiery.

Having before them under solemn and trying a field of labour, the Committee confidently present the religious claims of this Society, continued and increased support before all those who profess to feel the vast value of immortal souls. They, therefore, most respectfully, yet most earnestly, entreat their friends, and the public at large, to use their influence in every legitimate way, and to the utmost of their power, to obtain for this Society the needful pecuniary aid, by their united and fervent prayers for a still larger measure of the Divine blessing on their several labours, at home and abroad

SKETCHES ON THE BLACK SEA.

HARBOUR AND TOWN OF BALACLAVA.

We have been favoured by a Correspondent, who writes from off Katscha with the two accompanying Sketches of the southern and western portions of the Crimea, which convey a good idea of its coast scenery; whilst the third view is on the coast of Circassia: the three scenes being interesting localities of the war.

The first Sketch shows the Harbour and Town of Balaclava, which, it is scarcely necessary to remind the reader of the news of the war, lies on the Black Sea, near the southern extremity of the Crimea, thirty miles south-west of Simpheropol. Its excellent harbour, land-locked and deep enough to float the largest ships, is likewise familiar to the reader. The Sketch is taken from an eminence on the foot-road leading to the encampment of the Royal Marines, bearing west. Koch, in his interesting little book on the Crimea (just published) says:—

I had certainly been told a good deal about the peculiar position of this little town; but, when we descended from the plateau, and the hollow, with its dark-blue waters, lay expanded before us, it surpassed all we had ever seen, all we had ever heard. The basin is about a mile in diameter, and is surrounded, with the exception of a narrow gorge, by very precipitous and only partially wood-covered rocks, which have an elevation of some hundred feet. The arm of the sea occupies nearly the whole of the hollow, and, save on the side opposite to us, where the water comes up close to the rocks, is surrounded by a green velvety lawn. Here lies, too, the little town of Balaclava, composed of a few private houses and a number of shops. The agricultura. inhabitants have settled on the slope, which we descended, in order to be nearer the produce of their industry.

While walking along by the side o. the dark waters, I noticed medusæ, a sure indication that this was no lake, but a gulf connected with the sea by some narrow outlet.

The romantic acclivities, which are not formed of nummulite limestone, but of a greyish blue or light red Jura rock, have their beauty augmented by the numerous ruins visible upon them. Here certainly stood the old castle

WRECKS ON THE COAST EAST OF EUPATORIA.

rom which the entrance to the strait was commanded. Traces are still found of an immense outer wall; and there are two towers in a respectable state of preservation, one of which is built right above the narrow entrance. A harbour more protected against storms and sudden attack, would be difficult to find. It is, however, too small ever to acquire any importance.

Dubois de Montpereux fancies he found here the spot which Homer describes in the tenth book of his "Odyssey." In truth, if we visit the harbour of Balaclava with this book in our hand, we would be induced to imagine that the bard had actually visited the place. It is the passage describing Ulysses' first approach to the country of the Læstrigones, and which Pope thus translates—

Within a long recess a bay there lies,
Edged round with cliffs, high pointing to the skies
The jutting shores, that swell on either side,
Contract its mouth, and break the rushing tide.
Our eager sailors seize the fair retreat,
And bound within the port their crowded fleet
For here, retired, the sinking billows sleep,
And smiling calmness silvered o'er the deep.
I only in the bay refused to moor,
And fixed, without, my hawsers to the shore.

The picturesque ceases at Balaclava; beyond it the country, though undulating, is devoid of trees, and the vegetation is parched up.

The second Sketch represents a number of Wrecks on the coast east of Eupatoria, extending from the windmills to the Turkish liner on shore.

The third View shows a small village called Djimiteia, a few miles north-west of Anapa, on the coast of Circassia. The *Tribune*, *Highflyer*, and *Lynx* completely destroyed the white martello tower, which mounted a few guns; and set fire to the village, which was garrisoned by some hundreds of Cossacks and Russian infantry. The tower, when entered, was found to have several hundred shells and a great quantity of powder in it. This was set fire to, but unfortunately blew up much sooner than was expected, and severely burnt Lieut. Smithett; it also slightly injured Captain Moore.

VILLAGE OF DJIMITEIA, ON THE COAST OF CIRCASSIA.

ALEXANDER II, EMPEROR OF RUSSIA

THE PRESENT EMPEROR OF RUSSIA.

The new Sovereign of Russia, Alexander Nicolaiewitch, is the eldest son of the late Emperor, and was born 29th (17th) of April, 1818, and has, therefore, very nearly completed his 37th year. Previous to his accession he held the posts of Commander-in-Chief of the Corps de la Garde, and of the Grenadiers; presided over the Military School, and was Curator-in-Chief of the Military Hospital of Tchesmé; and holds the command of the Lancers, the Carabiniers of Erivan, &c. The Emperor married, in 1841, Marie-Alexandrowna, daughter of Louis II., Grand Duke of Hesse.

M. de Custine, in his popular work on Russia, has given the following sketch of the then Grand Duke Alexander, as he appeared in 1839. The author writes from Ems:—

The Hereditary Grand Duke has arrived at Ems, preceded by ten or twelve carriages, and followed by a numerous court.

I found myself at the side of the Grand Duke, among the curious crowd, as he alighted from his carriage. Before entering the house, he stood for a long time at the door of the baths in conversation with a Russian lady, so that I had time to examine him. He looks his exact age, which is twenty. His person is tall, but a little too stout for so young a man. His features would be fine, were it not for a puffiness that impairs his physiognomy. His face is round, but rather German than Russian, and suggests what the Emperor Alexander must have been at the same age, without, however, in any way recalling the Kalmuck type.

The look has many phases to pass through ere it will assume its definitive character. The habitual humour it now denotes is mild and benevolent. Between the ready smile of the eyes and the constant contraction of the mouth, there [illegible] the moderate frankness [illegible] The elegance of youth, the age when [illegible] always the better kept, that it is a mystery inexplicable even to the sufferer. The Prince's expression is one of kindness: his step is light and gracefully noble—truly that of a Prince. His air is modest, without timidity, which is a great point for all about him, since the embarrassment of the great is really an annoyance to the rest of the world. If they fancy themselves demigods, they are incommoded by the opinion they have of themselves, and which they despair of making others partake.

This silly disquietude never afflicts the Grand Duke. His whole bearing wears the impress of perfect good-breeding. If he should ever reign, he will make himself obeyed, not by terror, but by the attraction of his inherent grace, unless the necessities that cling to a Russian Emperor's destiny should alter his character as well as his position.

* * * * * *

I have again seen the Hereditary Grand Duke, and have had a long and close examination of him. He was not dressed in uniform, which gives him a stiff and swollen look. The ordinary costume suits him much better. His manner is agreeable, his gait noble, and without the stiffness of the soldier; and the peculiar grace that distinguishes him recalls the singular charm belonging to the Slave race. There is not the vivacious passion of warm countries, nor the imperturbable coldness of the North; but a mixture of southern simplicity and adaptability with Scandinavian melancholy. The Slaves are white Arabs. The Grand Duke is more than half German; but there are German Slaves in Mecklenburg, as well as in some parts of Holstein and Prussia.

Notwithstanding his youth, the Prince's face is not so agreeable as his figure. His complexion has lost its freshness: it is visible that he is a [illegible]. The eyelid droops over the outer corner of the eye with a melancholy betraying already the cares of a more advanced age. His pleasing mouth is not without sweetness, and his Grecian profile recalls the medals of the antique or the portraits of the Empress Catherine, but beneath that air of kindness, almost always conferred by beauty, youth, and German blood it is impossible not to recognise a force of dissimulation that terrifies one in so young a man. This trait is, doubtless, the seal of destiny, and makes me believe that the prince is fated to ascend the throne. His voice has a melodious tone, a thing rare in his family, and a gift he has received from his mother.

He stands out among the younger men of his suite without anything to stamp the distance observable between them, unless it be the perfect grace of his whole person. Grace always denotes an amiable turn of mind; so much of the soul enters into the gait, the expression of the physiognomy, and the attitudes of the man. The one under examination is at once imposing and agreeable. Russian travellers had spoken to me of his beauty as a phenomenon; and it would have struck me more, but for this exaggeration. Such as he is, the Grand Duke of Russia still seemed to me one of the finest models of a Prince that I had ever met.

The new Sovereign of Russia is stated to have been initiated at an early age into the affairs of the empire by the Emperor his father; he was present at all the councils; he was invested with situations which gave him frequent opportunities of rendering himself useful to the army and pleasing to the youth of the schools. Whenever the Emperor Nicholas quitted the capital, he left the supreme direction of the Government to his son. In short, he had taken the utmost pains to prepare him to become his successor. The new Emperor is stated to be very popular in Russia—he is beloved and esteemed by the people. He will not exercise the great authority of his father, for he does not inherit either his hauteur or his inflexibility. He will rather please, as the Emperor Alexander I. did, by his mildness and his affability, and between the uncle and the nephew there is a very great similarity of character in [illegible]. The new Empress is also highly spoken of and her [illegible] and her conciliating manners are much extolled. It is thus [illegible] she will exercise a salutary influence over the Emperor.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

...ve was given to Lord LUCAN to attend before the Sebastopol Inquiry ...ittee. The noble Lord afterwards read two letters, one from him... to the Commander-in-Chief, renewing his demand for a court-martial, and the other from Lord Hardinge, declining to accede to the re...uest.

... Bill and Tea-duties Suspension Bill were read a second ...

The motion for the second reading of the Secretaries and Under-Secretaries of State (House of Commons) Bill gave rise to a miscellaneous discussion, in the course of which many comments upon the Ministerial and military systems of the country were offered by Earl Grey, Lord Panmure, the Earl of Ellenborough, Earl Granville, the Earl of Ellesmere, and other peers.

...is bill was ultimately read a second time.

The Exchequer Bills (£17,185,000) bill went through Committee.

HOUSE OF COMMONS.—MONDAY.

Solicitor-General for Ireland took the oaths and his seat on his re-election for Ennis.

Sir G. GREY stated, in answer to a question, that the Commissionership of the Ionian Islands had been offered to the late Secretary for Ireland (Sir John Young), but he was not aware that the right hon. gentleman had yet accepted it.

THE ORDNANCE SURVEY FOR SCOTLAND.

The bringing up of the report from the last Committee of Supply gave occasion for a debate, introduced by Lord Elcho, respecting the scale on which the Ordnance Map of Scotland should be completed and engraved. ...ns recommendations on the subject, varying from an inch to twenty-to... per square mile, had been upon the Government, and were ...ed by different hon. members, upon considerations of convenience ... purposes. ... only 7 days since that some experimental surveys upon the largest scale were in progress; and the final decision of the question, it was understood, would be postponed until the results of those experiments had been ascertained.

THE COLONIAL DEPARTMENT.

Sir J. PAKINGTON called the attention of the House and the Government to the present anomalous condition of the Colonial Department, owing to the absence of the noble Lord the present Colonial Secretary, at the Vienna Conferences. Yet there never was a period when Colonial affairs more urgently pressed for a decision. Points of the utmost moment were constantly rising up for arrangement, yet there was neither Chief nor Under Secretary for the Colonies to attend to them. He wished to know how long this state of things was to last?

Lord PALMERSTON said, it was not true that there was nobody responsible for the Colonies. His right honourable friend the Home Secretary and himself were responsible, and were ready to answer all Colonial questions in this House. He was unable to gratify the very natural curiosity of his right honourable friend as to the business of the noble Lord at Vienna, or the duration of his stay; but he could assure his right honourable friend that the stay of the noble Lord was not likely to be protracted, as he seemed to anticipate. He reminded the House that other instances of the absence of leading Ministers had occurred in recent times, and he especially referred to the time when the Duke of Wellington administered all the leading offices of the State for several weeks together.

Mr. ADDERLEY deprecated the absence of the noble Lord, as leading to the further delay already too protracted of settling the Australian constitutions.

Sir J. PAKINGTON denied that any practical inconvenience had resulted from the present arrangement, which, he said, would only last for a few weeks longer. The only shadow of inconvenience that could be complained of was the delay in bringing forward bills for the settlement of the Australian constitutions; and, even if Lord John Russell had been in his place, he did not see how these bills could have been pressed while the Lords were pending.

Mr. ...low impugned Sir John Pakington's administration of Australian affairs, when he was Colonial Minister, especially the attempt to induce the Colonies to adopt a nominated Upper Legislative Chamber.

Mr. JOHN M'GREGOR condemned the appointment of the noble Lord as Colonial Minister, whose return to this country he was sure would not be ex...ted for a long time.

Mr. ... PHILLIMORE defended the appointment of the noble Lord, as one of the most accomplished and successful Colonial Ministers of the present age.

THE COMMISSARIAT ESTIMATES.

The House having gone into Committee on the Commissariat Estimates, Mr. PEEL went through over the different items, and explained that there was a sum of £115,000 for land transport, which was put down before the new arrangement of the Land Transport Service, for which a separate Estimate had been taken; but it was not judged advisable to withdraw the present vote, as various expenses of transport would still fall upon the Commissariat Department, and among others that the expense of the Balaclava Railway would be paid out of it.

The different items of the Estimate were all voted, after a long and discursive conversation upon the several heads.

... bills of minor importance were forwarded a stage.

... Solicitor-General obtained leave to bring in a bill to relieve Mr. ..., M.P., from the disabilities he might have incurred by reason of a contract for sending wooden huts to the Crimea.

HOUSE OF LORDS.—TUESDAY.

... Marine Mutiny Bill was read a second time.

... Mutiny Bill, the Tea-duties Decline Suspension Bill, and the Secretaries and Under Secretaries of State (House of Commons) Bill respectively went through Committee.

On the motion for the third reading of the Exchequer-bills (£17,185,000) Lord MONTEAGLE commented upon the financial policy of the late Chancellor of the Exchequer in relation to public debt; and contended that, while laying down the principle that the exigencies of the year should be provided for out of the taxes of the year, Mr. Gladstone had, in reality, fixed a large additional amount of debt permanently upon the country.

... bills were ordered by Earl GRANVILLE; and, ... further remarks from the Earl of Derby, the Duke of Argyll, ... Grey, the bill was read a third time, and passed.

HOUSE OF COMMONS.—TUESDAY.

THE FAST DAY.

In reply to Sir J. Walmsley, the CHANCELLOR of the EXCHEQUER stated that no stoppage of wages would be occasioned among the ...s of the Admiralty, Post-office, Custom-house, or other public departments, on account of the proposed day of general fast and humiliation.

MARRIAGE WITH A DECEASED WIFE'S SISTER.

Mr. HEYWOOD moved for leave to bring in a Bill to Amend the Law relating to Marriage, so as to admit of union with a deceased wife's sister or nephew. Examining the historical, the moral, and the Scriptural arguments on which the existing prohibitions were based, the hon. member ... that the Act passed in 1835 forbidding marriages within degrees of affinity had produced much injustice and not a little immorality, especially among the lower classes. He did not regard the difference between affinity and consanguinity, declaring that relationship of ... form a class presented no obstacle to marriage between the parties ... the wounds of nature or general expediency. Admitting the ... of serious objections to his proposal among the inhabitants of ..., he offered to leave that section of the United Kingdom out of ... operation of the bill.

... HUGHES regretted that the hon. gentleman had again agitated this question, as he must be aware that there was no chance of ultimate success. It was emphatically "a social question," and he must say that, so far as his own experience went, the feelings of the women of England were against this bill. His own opinion was, that the opinion of the people of England was strongly and decidedly adverse to any change in the law. He combated Mr. Heywood's views on the subject of the Mosaic law, and contended that the spirit of that law did class marriage with ... wife's sister among incestuous marriages; and that the law ... imported into the Christian system by the first Council held at Jerusalem, as recorded in the Acts of the Apostles, which declared what portions of the Jewish law were to be observed by the Gentile converts; and among these the prohibition of all sorts of uncleanness, under the general name of fornication, holds a prominent place.

Mr. ... remarked that the legal restrictions upon marriages of affinity in England were of modern origin, and not based upon any abstract principle.

Mr. E. BAIL replied to the theological arguments advanced by Sir F. Thesiger, and observed that the unions now in question were sanctioned by the laws of nearly every European country.

Mr. M. MILNES also supported the motion, being convinced that the ... enacted in many cases, since it had not diminished the number ... within the prohibited degrees, but merely rendered the unions ... the offspring illegitimate.

Mr. G. ... contended that no case had been made out sufficient ... in the existing state of the law.

Mr. E. BAIL ... the present law exercised most demoralising ... effect on the scripture texts which had been cited ... permission for the contract of marriages within the degrees ... the Act of 1835.

... MONDAY and Admiral WALCOTT considered that the unions ... session were forbidden by the law of God.

Lord PALMERSTON observed, that Parliament had formerly legalised marriages contracted within the degrees now prohibited. He believed that the restriction produced much social evil. The unions in question were viewed with no disapprobation on moral grounds throughout the country. He expressed his intention of voting for the bill before the House.

Mr. WALPOLE and Mr. MOORE opposed the motion.

Mr. COBDEN supported it, remarking that the Biblical argument, formerly so much relied on, had now been entirely given up by the opponents of the measure; that the number of children before the Court of ... evasion of the existing law was sufficient proof of the expediency of altering it.

After a few words of reply from Mr. HEYWOOD, the House divided—For leave to bring in the bill, 87; against, 53: majority, 34.

IRISH PAUPER EDUCATION.

Mr J. BALL moved a resolution declaring the expediency of adopting some means for improving the education of pauper children in Ireland. Recent returns showed that the number of children below the age of fifteen in the Irish workhouses was nearly 80,000, of whom more than half were orphan or deserted. The provisions for educating these children were, he urged, exceedingly inadequate. To supply the deficiency he suggested the application of some moderate grant of money from the public exchequer, as in England, for the purpose of supplying teachers to the union schools.

The motion was seconded by Mr. BOWYER, and supported by Mr. KENNEDY.

Mr. HORSMAN confessed that the system of instruction and amount of remuneration to the teachers in the union workhouses of Ireland were altogether deficient. The primary cause of this deficiency, however, lay with the parsimonious management of the boards of guardians, whom the Poor-law authorities had no means of compelling to a more liberal course. Matters were, he believed, gradually mending, especially by the multiplication of agricultural schools; and altogether he saw no reason for calling upon Parliament to grant money in aid of the improvement.

The discussion was continued by Mr. Roche, Mr. J. Fitzgerald, Mr. O'Brien, and Mr. F. Scully.

Mr. J. BALL, to whom Mr. Horsman had appealed not to press his motion to a division, declared that his sense of public duty compelled him to challenge a division of the House on the subject.

Lord PALMERSTON had been figure-showing, that Ireland received for various purposes connected with education, criminal jurisprudence, &c., nearly twice the amount of public money devoted to those services in England.

This assertion called forth some angry comments and contradictions from Colonel Dunne, Mr. Deasy, and Mr. Keogan. On a division, there appeared For the motion, 32; against it, 80: majority, 48.

Mr. WRIGHTSON moved for leave to bring in a bill, repealing an Act of Anne, by which Members of Parliament were compelled to vacate their seats on accepting office.

After some conversation, leave was given, and the bill was subsequently brought in and read a first time.

On the motion of Mr. JACKSON, a Select Committee was ordered to be appointed to Inquire into the State of the Metropolitan Bridges.

HOUSE OF COMMONS.—WEDNESDAY.

The Speaker took the chair at five minutes past twelve.

FRIENDLY SOCIETIES BILL.

On the order of the day for going into Committee on this bill, Mr P. SCROPE urged, for the consideration of the House, as instructions to the Committee, the necessity of introducing clauses limiting the scope and objects of these societies to purposes more commensurate with their means. They should not be allowed to enter into contracts for distant periods, which, when the time came, they were found utterly unable to fulfil, and he hoped the House would take the subject into its consideration.

Sir G. GREY said, great attention had been paid both in the framing of the bill and the consideration of the details in the Select Committee. The bill had been already before the House and read a second time, but in Committee the observations of his hon. friend might be taken into consideration.

After some observations from Mr. BRIGHT and Mr. A. PELLATT showing that the workpeople of all trades in Manchester and the metropolis were in favour of the bill, the House went into Committee.

Clauses 1 to 5, as amended, were, after some discussion, agreed to.

On clauses 6 and 7 being proposed,

Dr. MAYNEELL said, they were very objectionable, and suggested that they should be expunged.

After a lengthened discussion as to the appointment of an unpaid commission in which Mr. Henley, Mr. Baines, Mr. P. Scrope, and other hon. members, took part, clauses 6, 7, 8 were negatived and withdrawn, their consideration to take place on bringing up the report. Clauses 9 to 15 inclusive were agreed to. Clause 16 was negatived. The clauses up to 24 were, with technical amendments, agreed to. Clause 25 was withdrawn. The remaining clauses and schedule to the bill were, after a lengthened discussion, agreed to.

The report was ordered to be taken into consideration on Tuesday, the 27th inst.

MEDICAL ATTENDANCE IN THE EAST.

On bringing up the report of Supply, Mr. STAFFORD asked for its postponement, as he was desirous of calling the attention of the House to medical arrangements for the sick and wounded soldiers in the East. The right hon. gentleman complained of the absence of the Secretary at War, and gave notice that he should ask the question on Friday.

Mr. WILSON stated that it would be more convenient that the question should be postponed, and asked the honourable gentleman to bring forward the subject on his moving the adjournment of the House on Friday.

Mr. STAFFORD assented.

The Dean Forest Bill was read a third time and passed.

(*Continued on page 260.*)

COPYING DAGUERREOTYPES ON PAPER.

A new application of ... Mr Mayall, the photographic artist, of Argyll-place Regent street, has developed a very interesting result—viz., the reproduction on paper of likenesses taken by the daguerreotype. Copies, whether on plate or paper, have not hitherto been valuable, from the loss of definition they present. Mr. Mayall, however, has so far overcome the difficulties in the way of securing good impressions that he can produce silver photographs from glass or indifferent daguerreotypes. He takes an enlarged negative copy, which, after undergoing some little preparation to strengthen the details, will yield any number of positives. A simple plan of arresting the light serves to foreground the background by which many daguerreotypes are disfigured, and the result is an exact copy of the face and figure, minus the disagreeable characteristics of the original plate. If the copy is to remain black and white, little or no retouch will be required; on the other hand, if it is to be coloured, the paper surface will admit of the most exquisite miniature work. The melancholy tint of some daguerreotypes is by no means calculated to convey an agreeable remembrance of friends we have lost, added to which many are of a fleeting character, and will certainly fade away. Mr. Mayall's plan of reproduction throws these objections on the rocks, as the copies are not only agreeable to the eye, but are as permanent as ivory paintings.

LABOURERS' CLUB-HOUSES.—A commodious building is in course of erection, in the village of Charlton Marshall, near Blandford, Dorset, the largest portion of which is intended for a club-house, for, but not exclusively, for labourers and artisans; and the remaining portion for a beerhouse and shop, which will indirectly be useful to, though independent of, the former. The idea of such a club-house suggested itself to its promoter, Mr. T. Horlock Bastard, from his attention having been drawn to the little benefit which has accrued, from mechanics' institutes, to labourers, or even to mechanics; and from his attributing the ill-success to the circumstance that, as these institutions, intellectual recreation has been made the sole object, without any consideration of the question, whether the physical comfort of the members has previously been provided for. This led him to consider what were the real wants of the lesser favoured of the industrious classes, and how, by supplying these, the opportunity might be taken morally to elevate their hearts, tastes, and aims. For the labouring class then some common home is necessary, and why should this not be of the club-house kind? The club has advantages to club together, for the purpose of supplying themselves with comforts and conveniences which their individual means would not afford; and why should not the poor do the same? a moral improvement is to be expected with, and the risk of the necessary outlay borne by, the promoter, he deems it allowable, in forming the club, to make the following conditions—viz., that decorous conduct shall be strictly enforced; that no intoxicating liquors or tobacco shall be supplied or introduced, nor smoking allowed; and that female members shall be admitted; and he proposes that the club-house shall be shut on Sundays from ten in the morning until five in the afternoon. The entrance-money is proposed under the sole object, without any consideration of the question, whether the physical comfort of the members has previously been provided for. This led him to consider what were the real wants of the lesser-favoured of the industrious classes, and how, by supplying these, the opportunity might be taken morally to elevate their hearts, tastes, and aims. For the labouring class then some common home is necessary, and why should this not be of the club-house kind? The club has advantages to club together, for the purpose of supplying themselves with comforts and conveniences which their individual means would not afford; and why should not the poor do the same? a moral improvement is to be expected with, and the risk of the necessary outlay borne by, the promoter, he deems it allowable, in forming the club, to make the following conditions—viz., that decorous conduct shall be strictly enforced; that no intoxicating liquors or tobacco shall be supplied or introduced, nor smoking allowed; and that female members shall be admitted; and he proposes that the club-house shall be shut on Sundays from ten in the morning until five in the afternoon. The entrance-money is proposed under the sole object, without any consideration of the question, whether the physical comfort of the members has previously been provided for. This led him to consider what were the real wants of the lesser-favoured of the industrious classes, and how, by supplying these, the opportunity might be taken morally to elevate their hearts, tastes, and aims. For the labouring class then some common home is necessary, and why should this not be of the club-house kind? The club has advantages to club together, for the purpose of supplying themselves with comforts and conveniences which their individual means would not afford; and why should not the poor do the same? a moral improvement is to be expected with, and the risk of the necessary outlay borne by, the promoter, he deems it allowable, in forming the club, to make the following conditions—viz., that decorous conduct shall be strictly enforced; that no intoxicating liquors or tobacco shall be supplied or introduced, nor smoking allowed; and that female members shall be admitted; and he proposes that the club-house shall be shut on Sundays from ten in the morning until five in the afternoon. The entrance-money is proposed to be 1s., and the subscription three-halfpence per week for males, and one penny per week for females. The things provided to be tea, coffee, sugar, milk, bread, butter, cheese, fruit, buns, biscuits, and effervescing drinks, and possibly soap, and cold meat—all at prices little exceeding their cost, to pay for fuel and service—one day and one weekly London, and one provincial newspaper, a few periodicals, and some books and maps. There are, however, reasons for expecting that some friends of the project will add newspapers and periodicals of not very old date, and books and other sources of intellectual recreation. In order to extend the advantages of the club, and give it a better chance of success amongst a small population, it is proposed to admit persons for one day, on payment of a penny, but without giving them any right to interfere in the club concerns.

EMANCIPATION OF THE JEWS.—While Lord John Russell was passing through Manchester, the editor of the *Gazette des Israelites*, sent an address, signed by several of his co-religionists, to the noble Lord, thanking him for his efforts in favour of the complete emancipation of the Jews in England, and for their admission into Parliament. The address, at the same time, expressed a hope that, in the Conferences of Vienna, no difference among the royals of the Ottoman Empire would be admitted, as to divide the principle would be to weaken it. Lord J. Russell, in a letter to Dr. Philippson, announces the firm resolution of the English Government to see that the Jewish and Christian subjects of the Sultan shall be admitted to the enjoyment of the same rights and the same impartial administration.

EPITOME OF NEWS FOREIGN AND DOMESTIC.

Lord John Russell had an audience of the Emperor of Austria on the 7th instant.

The Court of Tuscany has gone into mourning for a fortnight, on account of the death of the Emperor of Russia.

One of the last acts of the Emperor Nicholas was to present a diamond ring to a writer named Rotchoff, for a pamphlet entitled "The Truth About England."

Lady John Russell landed on Friday week at Calais, on her way to Vienna, to join her husband.

Should Louis Napoleon go to the Crimea, the Empress will accompany him as far as Constantinople, and take with her her Dames du Palais, the Countess de Montebello, Madame de Pierres, and M. de Valabregue.

Lord Duncan, one of the Junior Lords of the Treasury, was on Saturday re-elected for Forfarshire without opposition.

The rite of confirmation was administered to the Princess Charlotte, daughter of the King of the Belgians, by the Cardinal Archbishop of Mechlin, on the 8th inst. The ceremony was celebrated with a certain pomp in the chapel of the Palace of Laeken.

Mr. C. H. Darling, late Lieut.-Governor at the Cape, having been appointed to the Governorship-in-Chief of the Leeward Islands, is about to sail for Antigua.

General de Hess, commander of the Austrian army of the north, having no children, has been authorised by the Emperor Francis Joseph, in consideration of the services which he has rendered to the Imperial house and to the country, to transmit his name and arms to an adopted son.

The Pope is about to erect a colossal statue of the Virgin Mary at Rome, in celebration of the triumph of the Immaculate Conception dogma.

General La Marmora left Paris on Saturday for Genoa. He has contracted the arrangements with the Government of France and England.

Mr. H. Reeve has been appointed editor of the *Edinburgh Review*.

The Right Rev. Dr. Barber, the recently consecrated Bishop of Sydney, and the Metropolitan of Australia, sailed from Liverpool last week, accompanied by his chaplains.

Colonel Cler, Commander of the second regiment of Zouaves in the Army of the East, has been promoted to the rank of General of Brigade, and to command the second brigade of the first division of the army of reserve, now organising at Constantinople. General Marquenat is to assume the command of the first brigade.

Gen. Prince Andrew Gortschakoff died at Moscow, on the 27th ult.

The Academy of Inscriptions and Belles-Lettres has elected M. Regnier a member, in the place of M. Lajard, deceased

A travelling glazier, the last descendant of Leonardo da Vinci, the famous Florentine painter, who expired in the arms of Francis I., died a few days back in the neighbourhood of Rosme (Loire).

A white marble statue of Charlemagne, by M. Lemol, is about to be erected in the open space in front of the College of France.

The Edinburgh people have already raised £1100 of the £1500 required for the colossal bronze statue of Professor Wilson, which is to be shortly erected.

The naturalist Chevalier de Meyer, known to the scientific world by his travels among the Altai Mountains, and in the region of the Caucasus, died on the 28th ult. Mr. de Meyer was born in 1795, at Vitebsk.

The Rev. Messrs. O'Shee and O'Keefe, of Callan, the Roman Catholic priests whose coercion in political matters by their Bishop has given rise to the famous memorial to Rome, have been removed by their ecclesiastical superior into distant and separate rural districts, in which they will have fewer opportunities for agitation.

General Adjutant Prince de Lieven arrived at Vienna on Sunday to notify to the Emperor the accession of Alexander II. of Russia. The General was received by the Emperor on the day of his arrival.

The *Moniteur* publishes an Imperial decree realising the institution of Civil Levalds, which the revolutionary leaders of 1848 proposed to establish in the Palace of the Tuileries.

A Chamber of Commerce at Birmingham is to be established, with the support of the bankers, merchants, and others, of the town and neighbourhood.

The greatest activity has prevailed of late in the manufactories of arms to Liege. 60,000 muskets have been ordered there for England, 40,000 for Russia (which are to be sent through Prussia), and 50,000 for France, Piedmont, Spain, &c.

The California Legislature having passed a bill appropriating 1000 dollars from the State treasury to each member, the Governor refused his sanction to it; but it subsequently passed the Assembly in spite of the veto, by a vote of 55 to 21.

The Government Emigration Commissioners have chartered the *Elephantes* to take out emigrants to Sydney, and the *South Sea* to convey emigrants to Adelaide.

Great numbers of wolves have appeared this winter in the department of the Sarthe. In the arondissement of Le Mans alone, the officer appointed to destroy wolves has killed not fewer than fourteen.

Shellfish is scarcer in the Channel Islands than has been known for some time, in consequence of the destruction of the lobster-pots and fishing tackle by the late severe weather.

Twelve sisters of different religious orders have just left Lyons—each followed by a hearse—to attend the funeral of their mother, aged 104.

Three new daily papers are announced for publication in Glasgow on the abolition of the compulsory stamp—viz., the *Daily News*, the *Morning Bulletin*, at a penny, and the *Evening Digest*, at a halfpenny.

A retired magistrate died the other day at Falaise, aged 100 years and six months. He had been a member of the Municipal Council for forty-three years.

The telegraph cable across the Solent, by which Osborne House can communicate with London by the electric telegraph, has been broken twice lately.

A prohibitory liquor law has been passed in the Delaware House of Delegates, by a vote of eleven to ten. The Senate of New Jersey rejected a measure with the same object by a majority of one.

Three slight shocks of earthquake were felt at St. Germano Chipsley on the 21st ult., and one on the 22nd. No damage was experienced.

Mr. Smith, a chemist of Auchterarder, is said to have discovered a means of transferring the impressions of natural objects to glass with minute ...

Austria has just issued a circular to her agents in Germany, which very distinctly announces Prussia if she does not come at once to some settlement with the Western Powers.

A company of French and Belgian capitalists has been formed for the construction of a ... railway from Lille to Brussels, by Tournay.

The arrivals of specie during last week were about £1,100,000 The exports (including £128,000 shipped on Friday by the Brazil mail) are estimated at about £250,000.

The strike for the terms asked by the journeymen sailmakers of Greenock from their employers has extended to Glasgow, six out of nine lofts having ceased work. The difficulty has reference to the number of apprentices each master shall be permitted by the rules to employ.

The *St. Petersburg Journal* publishes the text of a convention concluded between Russia and Prussia, for the transmission of telegraphic messages between the two States

The report is contradicted that the Russian Government has formed the project of sell...g its North American possessions to the United States.

Fifty pictures by members of the Academy of Fine Arts of Berlin have been sent off to the Exhibition at Paris

About thirty cart-loads of water-cresses are brought to the Paris markets daily, and the value of them is estimated at about 300f. each. Upwards of 3,000,000f. worth of water-cresses is consequently sold in Paris annually.

The Municipal Council of Paris has voted a sum of six millions for the indemnity to be granted to the bakers in order to maintain the price of bread at 40 centimes the two-pound loaf, increasing at the same time its weight that this subvention may cease on the 1st April next, when the abundance of work and the influx of foreigners into Paris will render it no longer necessary

At Beyrout the proclamation of the dogma of the Immaculate Conception took place with great pomp, the ceremony terminating by a discharge of fireworks The Pacha, not knowing what was meant, sent in great haste to the French Consul to ask if news of the fall of Sebastopol had arrived

It is stated to be the intention of Mr. Headlam, M.P. for Newcastle, and Chancellor of the Diocese of Durham, to bring in a bill to prevent the celebration of the irregular border marriages.

Dr. Daubeny has signified his intention of shortly resigning the Professorship of Chemistry in Oxford University, which chair he has occupied since 1822.

NOTES OF THE WEEK.

"The debate was very dull and stupid, last night," said somebody to somebody else (a smart article-writer would tell you who they were, without hesitation, and knowing no more who they were than I do); to which the latter replied, "Why date?" I was going to begin by saying that much nonsense is being talked in club-windows, and at this time, but when is not much nonsense therein spoken? But the death of Nicholas has given an especial stimulus to the manufacture of anile crudities. People who, one would wager, could not have told you with positiveness, a couple of years ago, how many Russian sovereigns have intervened between Peter the Great and Alexander the Second, now talk as familiarly of the wills and testaments of the Czars, as a knot of hungry cousins, after a rummage at Doctors' Commons, do of the codicils of their crabbed uncle deceased. Moreover, the intentions of the late Nicholas are now so clearly known in smoking and billiard rooms that one regrets that Lord Palmerston is not seen oftener in such places, where he would be so rapidly "posted up," as the Americans say, with the information he really ought to have. We need not know that the second son, the Archduke Porphyrogenitus, was trained, from a baby, in the idea of being Emperor of Turkey, that his nine-pins were all Turks, to be knocked down, and that the rehearsal of his coronation in St. Sophia was one of the *Jeux innocens*, in which his father delighted to see him engaged. In a word, Turkey was invaded in order to obtain an empire for Constantine, and thus settle the difficulty the old Emperor found from his being so unfortunate as to have two eldest sons. Consequently—for we are practical, *nous autres*—Alexander, who has bound himself to carry out his father's will, is even more deeply pledged to the war than Nicholas himself, and his remaining upon the throne depends upon his "doing his possible" for the amiable Constantine. Peace, of course, is out of the question. It is a sad thing that Governments are so ill informed. If all this had been known, the Embassy of Lord John Russell's mission to Vienna might have been saved.

When the City was electing the Colonial Minister the other day, one of his opponents—doubtless a loud-mouthed friend of civil and religious liberty—proposed to exclude him because he was a Puseyite. This piece of novelty being rather incredulously received, the accuser exclaimed triumphantly, "Why, he has been known to attend regularly at St Barnabas's, Pimlico!" But what will the ultra-Protestants say now that his Lordship has actually "assisted" at the christening—of course, according to the Roman Catholic ritual—of the little Princess of Austria? Luckily Lord Shaftesbury—Protestant *sans peur et sans reproche*—has countenanced the Cabinet, though he could not stop in it; and this will assure timid people that, although Lord John has attended a Catholic service, and although both the Irish law officers belong to that Church, Government has no immediate intention of going over to Rome.

The Emperor Louis Napoleon is announced by an English paper, supposed to be in Lord Malmesbury's confidence, to have "taken precautions for the safety of his crown." This is a delicate reference of course to poor Chou-Chou -whom they also call "Crin-Plon" (*crainl plomb*) and may mean anything; either that our affectionate cousin is to be cast into a Vincennes dungeon, with a patent *oubliette* below it, warranted to swallow him up in the event of any undesirable demonstration elsewhere; or else that Chou-Chou has received orders to get his *sac de nuit* ready, with a view to the Crimea. My opinion, however (*salent quantum*), is that the crown of France is not in the least earthly danger from anything Prince Napoleon is likely to do, or his friends to do for him. But that "precautions" for preventing the possible transfer of that crown to so unworthy a head as that of Chou-Chou, in the event of the Emperor having no direct heir, will be taken, is a probability which the good sense of France will desire to see reduced to a certainty. The man who could write, or furnish *materiel* to the writer of, the pamphlet of which I spoke last week, is evidently and utterly unfit to stand in the position of heir to the empire. The unabashed "canvass" of that pamphlet is one of its most remarkable characteristics: the public is particularly requested to take notice that there *are* members of the Imperial family who do not share in the opinions of the Tuileries. "The man you require," said Mirabeau, "should be an orator, a statesman, and a patriot; he should be of vigorous habits and mature age, he should be a member of the aristocracy, but trusted by the people; he should be courageous, resolute," &c., &c. "And," asked the auditor, "may dear M. de Mirabeau," should he not be somewhat marked with the smallpox?" An old story; but then Chou-Chou's is an old trick, and may be tolerated on the principle on which Sheridan gave a bad shilling to the driver of a bad coach.

Cochin-China has gone out, and real China come in. The sums Mr. Bernal's cups and saucers have fetched are perfectly appalling. I looked into Christie's on Wednesday with an idea of a very humble purchase, but Falconbridge's words came upon me, "Must your bold verdict enter talk with Lords"—and Hebrews? and I speedily retreated: a pretty little green cup—nothing else—being knocked down, after a "spirited competition," for £52; and a saucer, with a painting on it of "Apollo trampling the Python," for (I think) £37. It would take some money to complete one's tea-service at that rate. It was worth while to notice the way that the professional purchasers, and especially the foreigners, snatched the articles from the attendant showman's hand, and rapidly passed them about—precious treasures, fit for "baby fingers, waxen touches," were handled in a way that only buyers and housemaids treat such things. What a good Chairman of Committees the late owner of these things was. He had not the cool courage with which the late Earl of Shaftesbury, in similar capacity in the Lords, used all but to bid the Peers of England hold their tongues and not talk nonsense, but look at the words before them, and read them if they could read (his tone said that, and a good deal more); but Mr. Bernal was very adroit in not hearing bores until he had put the question. The decision was taken, when it was too late for them to speak. Sometimes father and son (Mr. Bernal Osborne) had to exchange words. It was worth while to notice the way that the professional purchasers, and especially the foreigners, snatched the articles from the attendant showman's hand, and rapidly passed them about—precious treasures, fit for "baby fingers, waxen touches," were handled in a way that only buyers and housemaids treat such things. What a good Chairman of Committees the late owner of these things was. He had not the cool courage with which the late Earl of Shaftesbury, in similar capacity in the Lords, used all but to bid the Peers of England hold their tongues and not talk nonsense, but look at the words before them, and read them if they could read (his tone said that, and a good deal more); but Mr. Bernal was very adroit in not hearing bores until he had put the question. The decision was taken, when it was too late for them to speak. Sometimes father and son (Mr. Bernal Osborne) had to exchange words. "Does the honourable member mean to say ——?" the paternal Chairman would ask. "Of course, Sir, if you decide that, I have done, but ——" the filial member would reply. The judgment of Brutus was not more impartial than that of Bernal.

What a rage Mr. Surtees's books have put the "sporting men" into. I use the term as distinguishing a class not to be respected, from one of the best classes in the world—the sportsmen. Whenever the sporting men can abuse him they do. It is true he survives their bad will and bad grammar, but the *asinus* is the same. I need not say that to satire as such, the pachydermatous "do" is perfectly indifferent, but the books are bad for his trade. Surtees has done as much to destroy the conventional idea of the true British sportsman as the burlesque men have towards annihilating the true British sailor of the stage, who was always crying, delivering innocence, scattering sovereigns broadcast, and hitching up his trousers. He has as yet exhibited only one of the two orders I have mentioned—the sporting men; and the mischief he has done them is great. In his next book I hope he will bring the English sporting gentleman into actual, instead of only implied, contrast with the jobbers, and swindlers, and vulgarians whom he has worked so hard. I must not speak of Leech, because he is a *collaborateur*; though I do not know why that should be a reason for my not saying that some of his real "swells" would come into capital relief beside the Facys, Spraggons, Sponges, and others who are so savage with him and Surtees, as may be read in "sporting publications"—with pardon for mentioning such rubbish.

A large gallery painting, representing "Adam and Eve in Paradise, before the Fall," has just been received in Pall-mall for exhibition. The picture is painted by the celebrated Belgian artist, Van Lerius, who has devoted several years to the production of this work of art, of which Continental critics speak highly

SOME OBSERVATIONS ON THE ORIGIN OF CHESS,

BY DR. DUNCAN FORBES.

(*Continued from page 218.*)

CHAPTER IX.—THEORY AND PRACTICE OF THE SHATRANJ, OR MEDIÆVAL GAME OF CHESS.

I am now entering on a subject which, I think, has hitherto been very imperfectly understood in Europe, at least in modern times. From the sources of information alluded to in our last chapter, I am enabled to lay before the reader a tolerably correct view of the mode in which Chess was played on the side the Celestial Empire from the sixth to the sixteenth century of the Christian era. I may further mention that, with regard to the three Oriental MSS. which I have already briefly described, it luckily so happens that what is either omitted or lost, or summarily discussed, in one MS. is treated of very fully in one or both of the others. As this will necessarily be a long chapter, I shall, for the sake of perspicuity, divide the subject into two sections.

SECTION 1ST.—ON THE MEDIÆVAL CHESS-BOARD AND THE MOVES AND POWERS OF THE PIECES.

The ancient board on which the Chatrainga was played (as was shown in Chap. V.) had no variety of colours; in fact, a chequered board in that case would have been rather objectionable than otherwise. When the game was modified into the Shatranj, the board, so far as we know, still remained unspotted; although the division into black and white would, in the latter case, have been a decided improvement. Hyde (p. 89) gives a drawing of a splendid ivory chess-board presented to him by Daniel Sheldon, Esq., an East India merchant, nearly two centuries ago, on which the squares are, indeed, ornamented, but not of different colours. And here occurs a *query*. What is become of Hyde's Indian Chess-board? Surely the race have not eaten it up: nor can I conceive the possibility of such a piece of barbarity as its being cut up into some other trumpery ornament or ornaments. But to proceed. The oldest representation of a chequered board in the East that I have yet seen is in a copy of the Shâhnâma, in the British Museum (No. 18,804, folio 260), transcribed about 140 years ago. It is a picture of the scene where Buzurjmihr is unfolding the mysteries of the game in the presence of Nausherwân and the Indian Ambassador. The Persian sage has a chequered board of *sixty-four* squares placed before him, with the pieces arranged thereon, and a white spot to the right. However, in none of the three MSS. mentioned in our last chapter is there any allusion to the squares being of different colours. In the mediæval game of Europe the board seems to have been coloured about the fourteenth century: for in a Latin poem, supposed to be of that period, given in Hyde (p. 181), we have "Asser quadratus vario colore notatus;" but in an older poem of the time of the Anglo-Saxons, given by the same author (p. 179), there is nothing said about difference of colours

The arrangement of the pieces in the Shatranj was exactly the same as our own in the present day, that is—the Kings stood opposite to each other, and so did the Farzins or Queens. There is a general impression (though erroneous) that on each side the Queen was placed on the right hand of the King. This I found to be peculiar only to the modern Indian game; but it was not so in that country 300 years ago, as may be seen in the Museum MS. (No. 16,859), dedicated to the Great Mogul of the day. The pieces and Pawns being thus drawn up, the game generally began, as with us, by moving either the King's or Queen's Pawn; with the difference, however, that in the Shatranj the Pawns could move only *one* square, in the commencement. The King, Rook, and Knight moved exactly as they do now. The Farzin, or what we call the Queen, moved one square diagonally; consequently her power slowly extended only over that half of the squares which we should say was her own colour. The adverse Queen, being on the opposite square at the extremity of the board, was necessarily of a different colour—hence the two Queens could never by any chance encounter one another. That this was the case in Europe, in the eleventh or twelfth century, we know from a line in the older Latin poem given by Hyde (p. 180):—

Nam Regina non valebit impedire alteram.

The Fil, which we call Bishop, moved two squares diagonally. He attacked and commanded only the square next to him but one; he had no power over the intermediate square: hence his attack, like that of the Knight, could not be covered or warded off by the intervention of another piece. It will be found, by a slight inspection, that his power extended over only seven squares of the board (one leap of two squares at a time), besides the one on which he originally stood. It will also be found, on examination, that each of the *four* Bishops had a diocese of eight particular squares for himself, out of which he could never move. It so happened, also, that the eight squares belonging to any one Bishop never fell within the range of any of the other three; hence a Bishop could never, by any chance, encounter an adverse Bishop, even when running on the same colour. Here, again, we can throw light on a line of the older Latin poem in Hyde:—

Furnum pectum Calvi tenent, neque sibi nocent.

Lastly, when a Pawn reached the opposite extremity of the board, he obtained the rank of *Farzin only*, and never that of any other piece. He commenced thenceforth to move diagonally, one square at a time, being, of course, restricted to the colour of the square on which he had landed; hence arose the power of the Pawns mentioned in the Oriental MSS. above described we find two or three Farzins on either side of the board, of which more hereafter. Here, once more, the older Latin poem in Hyde agrees with us:—

Cum Pedester usque laminam veneris ad Tabulam,
Nomen ejus tunc mutatur: appelletur Femina!
Ejus interim Regiæ gratiam obtinebat.

Here we have absolutely the Persian word Farzin still retained, although the term Queen had already become in vogue. Volumes could not speak more in proof of the Oriental origin of Chess. I may further observe that this peculiar fact of promoting the Pawns to the rank of Farzin, in the mediæval game, sweeps away at once the whole rubbish that has been written about the *nonentiquity* of "a plurality of Queens," which Philidor and his sapient editor, Mr Pratt, seemed to consider as a modern invention. *Vide* Pratt's Philidor, 12th, p. 514. Let me not be here misunderstood: when I speak of Philidor, I fully admit that he held the first rank in chess-playing, but not in scholarship. Having now explained the moves of the pieces in the Shatranj, I shall henceforth discontinue the use of the terms "Farzin" and "Fil," and understand the well-known appellations of Queen and Bishop; the reader always bearing in mind their exact and very limited range on the board

In conveying an idea of the relative powers or exchangeable value of the pieces, the Arabs and Persians have adopted the following quaint and practical method, founded upon their smaller denominations of money. It so happens, too, that we have ourselves, as nearly as may be, a corresponding coinage. The dram is our sixpence; the dânk, our penny, and the tasû, our farthing; and with this explanation I am enabled here also to dispense with the Oriental terms

The King, they say, is beyond all value, *on account of his rank*, but in reality from the nature of the game. The value of the Rook is a sixpence; that of the Knight is fourpence. On these two points all the three MSS. agree. The value of the Queen, however, is less decided, as one MS. estimates her at threepence, and another only at twopence; perhaps twopence halfpenny is near the mark. The value of the Bishop is three halfpence. The average value of the Pawns is one penny each, but the two centre or Royal Pawns are each worth a penny farthing, and, according to some, the King's Pawn is worth three halfpence. Again, the two side Pawns are worth only three farthings each. Finally, the real value of any particular piece or Pawn is liable to undergo considerable modifications according to circumstances. Thus it may happen that on certain occasions a Knight or even a Queen may be of more value than the Rook. So a Pawn, as it advances towards the opposite side of the board, gradually assumes a higher value than that of the Bishop

I now conclude this section with a very appropriate end game by Adali, an Arab an player of the highest class, who flourished in the first half of the tenth century. It is to be found in folio 6 A of the Asiatic Society's MS., in which Adali plays the Black. This I have altered into White, simply to secure the reader's good humour, as we are now accustomed in our problems to make the winner play with the white men. For the same laudable purpose, I have used, as in Ali's problem given in last chapter, our own chequered board, which, I maintain, the Shatranjic *ought* to have found out to be an improvement

White: K at Q K₂ 2nd, Q at her R 2nd, Bishops at Q B and Q 3rd, Rooks at K B 4th and Q 6th, K₁ at K B 5th; Pawns at Q R 4th, Q 3d, and K 3rd.
Black: K at his sq, Rooks at Q B 2nd and K R 2nd, K₁s at K 1 and K 2nd, Bishops at Q K₁ 6th and K K₁ 8th; Pawns at Q 4th, Q K₁ 3rd, K 4th, K K₁ 4th, and K R 5th

White moves, and mates in eight moves.

SOLUTION

WHITE.	BLACK.	WHITE.	BLACK.
1. K to QK₁ 7th (ch)	R must take	5. R to Q's 8th sq (ch)	R interposes (best)
2. R to Q's 8th (ch)	K takes R.	6. R takes R (ch)	K to his Q R's 4th
3. R to K B 8th (ch)	K to his Q's 2nd sq (a)	7. B to Q B 3rd (ch)	K to his Q R's 5th
4. K B to Q K₁ 5th (ch) (a)	K to Q's 3rd sq (he must)	8. Q to her K₁'s 3rd—mate	

(a) I have selected this problem in order to show the play the Bishops, which did not occur to any extent in the problem by Ali Shatranji given in last chapter. We see in this problem the productivity of the Bishop's check when covered either by the Knight or Queen, as would have been the case in our problem. It is to be noted, then, for the Black King, to move to his Q's 3rd.

N.B.—White Q B wastes over his own King and checks the adv King over the adv. Bishop

The foregoing position has every appearance of having occurred in actual play. It will be seen that Adali is immensely inferior in force by two Pawns and a Queen against a Knight, and, counting in all to at least three Pawns. These, we may safely infer, were given away by the shrewd old master as so many sprats, in order ultimately to secure the whale

In a paper on Chess, by Captain H. Cox, inserted in the "Asiatic Researches" (Vol. VII., 8vo edition, page 494), the writer says "They (the Bishops) move diagonally in advance or retrograde, always two steps in a move, and have what Mr. Irvin calls the motion of a racket-boy, hopping over any piece in their way *except the King*." Here we see that the exception does not exist, for the Bishop *does* hop over the King

SECTION 2ND.—ON THE GIVING OF ODDS, AND THE DIVISION OF PLAYERS INTO FIVE CLASSES.

The subject of odds is most minutely discussed by the author of the Asiatic Society's MS., of which the following is an abridged translation. "Having now explained the moves of the pieces, and their exchangeable value, I shall proceed, O reader! to inform you of the different degrees of odds established by the masters of old. A true chess-player ought to play with all sorts of people, and, in order to do so, he must make himself acquainted with his adversary's strength, in order to determine what odds he may give or require. A man who is unacquainted with the rules for giving or demanding odds is not worthy of the name of chess-player. It is only by equalising the combatants that both of them may reap amusement and edification; for what interest could a first-rate player, such as Adali, or Sîlî, or Ali Shatranji, find in playing even with a man to whom they could give the Knight or the Rook?

"The smallest degree of odds, then, is to allow the adversary the first move. The second degree is to give him the Half-Pawn, which consists in taking either Knight's Pawn off his own file and placing it on the Rook's third square. The third species of odds is the giving the Rook's Pawn; the fourth, that of the Knight; the fifth, that of the Bishop; the sixth, that of the Queen. The seventh degree of odds is to give the adversary the King's Pawn, which is the best on the board. The eighth species of odds is the King's Bishop. The ninth is the Queen's Bishop. The tenth degree of odds is the Queen. The eleventh, the Queen and a Pawn; or, what is equivalent, a Knight: for, truly, the Queen and Pawn be slightly inferior to the Knight at the beginning, yet you must take into account the probability of the Pawn becoming a second Queen. The twelfth species of odds is the Knight and Pawn. The thirteenth, the Rook. To give any odds beyond the Rook can apply only to women, children, and tyros. For instance, a man to whom even a first-class player can afford to give the odds of a Rook and Knight has no claim to be ranked among chess-players. In fact, the two Rooks in Chess are like the two hands in the human body, and the two Knights are, as it were, the feet. Now, that man has very little to boast of on the score of manhood and valour who tells you that he has given a sound thrashing to another man who had only one hand and one foot."

There is one point in the preceding gradation of odds which I am unable at present to explain. All the MSS. agree in considering the Queen's Bishop of greater value than that of the King. The author of the Asiatic Society's MS appears to have given the reason, but unfortunately has a point breaks off suddenly at the end of fol. 93 B.; and the leaf that ought to follow is missing. So far as I understand him, it would appear that the Queen and her Bishop (which is necessarily of a different colour) contribute in certain situations to make a drawn game, which game with the King's Bishop would have been lost. It is possible, however, that some explanation on this point may be found hereafter in our Section on Drawn Games. It would appear, also, that the Bishop's Pawn was considered to be slightly superior to that of the Knight: though, according to the author of the Mus. Pers. MS., this point is undecided among the best players

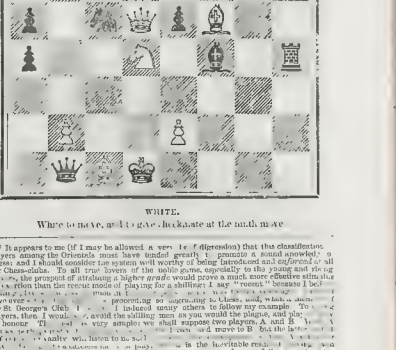
"The Arabs and Persians divided chess-players into five classes, viz.—1st, the 'Ahyat,' or 'Class of Grandees,' of whom seldom three exist at the same time. It is stated in the old Arabic MS. that Adar for some time remained alone of his class, and that the same thing happened to Al-Ari, a more recent Arabian player, and also to Ibn Dandân and Al-Kuhîf, both of Bagdad. The second class consists of such players as are able to win only two or three games out of ten when playing even with one of the Ahyat; the difference between the two classes being reckoned equal, on an average, to a Pawn; that is, a player of the first class could give to the very best of the second class a Rook's Pawn, and to the weakest of the same class the King's Pawn. The third class consists of players to whom one of the Grandees can give the odds of the Queen. The fourth class consists of those to whom one of the highest can give the odds of a Knight. (Here the hiatus occurs in the MSS., but we know from other sources that) The fifth class consists of those players to whom one of the class of grandees can give the odds of a Rook

After due consideration of the section, I cannot help arriving at the conclusion that the Arabs and Persians must have been very fine players. It is only among good players that such a minute and almost, to us, imperceptible gradation of odds could have been established. I may remark at the same time that it was much more difficult in the game of Shatranj to have given the odds of the Knight or of the Rook, than it is in our modern game. The difficulty arose from two distinct causes, easily perceived. In the Shatranj the Knight constituted the eighth part of the whole force; with us it is about only a twelfth part. Again, the Rook in the former was something between a fifth and a sixth part of the whole numerical strength; whereas in our game it is only about the eighth part. Another great disadvantage attending the giving of the Knight or Rook was that the superior player had no brilliant openings to trust to as with us. He owed his superiority alone to his strategic skill and powers of combination. Hence the number of fine positions occurring in actual play to such men as Adali Shatranji, &c. The mediæval game depended mainly on *position*. Hence the epithet "manshûba-bâz" (position-player) applied by the Persians to a chess-player of the first degree of skill.

The following problem is worthy of due reverence from all true lovers of Chess. It is the finest piece it is in itself a beautiful piece of strategy. In the second place it is one of the oldest on record, being upwards of one thousand years old. Lastly, it is the invention of a crowned Sovereign, Mutasim Billâh, the son of the renowned Harun Rashid of Bagdad. It is from folio 92B of the Asiatic Society's MS., which, as I think I stated before, has no solutions. I have myself solved it, but, instead of inserting the solution with it, I have deposited the same in the hands of the editor, in order to afford the reader an opportunity of solving a mediæval problem

PROBLEM BY THE CALIPH MUTASIM BILLAH, WHO REIGNED AT BAGDAD FROM A.D. 833 TO 842:—

BLACK.



WHITE.

White to move, and to give checkmate at the ninth move

* It appears to me (if I may be allowed a very few words of digression) that the classification of players among the Orientals must have tended greatly to promote a sound knowledge of Chess: and I should consider the system well worthy of being introduced and enforced at all our Chess-clubs. To all true lovers of the noble game, especially to the young and rising members, the prospect of attaining a higher grade would prove a much more effectual stimulus to exertion than the present mode of playing for a shilling: I say "present" because I believe [illegible] proceeding to encounter [illegible] and [illegible] for honour. The [illegible] very simple: we shall suppose two players, A and B. [illegible] and move to B. But the latter [illegible] [illegible] [illegible]
